"By all means, thank Him as much as you like," retorted the Captain, "but while you're about it you might as well spare a couple of 'thank you's' for our friend here." And he jerked his chin towards his companion.

"Was there danger?"

"I have a notion that there was, and—and, well, the long and the short of it," broke off the Captain in his most ungracious tone of voice, and making a desperate plunge, "is that Hibbert turned up in the nick of time—saved my life they'd call it in the story books, I suppose; so if you are being bothered by any such feeling as gratitude, perhaps you had better say so." And with a blind grab at Mr. Hibbert's hand, which he wrung in an excruciating manner, Captain Berrincott disappeared into the inner apartments.

Marian made a movement as though to follow him, and then turned vehemently towards Mr. Hibbert. But before she had succeeded in speaking he interposed, almost coldly:

"Do not trouble to compose pretty speeches. I have done nothing that any other fellow in my place would not have done."

"But, Mr. Hibbert, won't you let me try and say how grateful I feel?"

"If you insist on having it, of course I must listen, but I think it would simplify matters immensely if we took your gratitude for granted."

She looked at him in consternation. Never before had she been so distinctly aware of the need of sympathy as she was at this moment; and she had been so sure of finding it here. What had come over the man? Ah, what indeed! How could she know that the unfortunate creature was acting only in self-defence, that, with the remnant of prudence which still survived after yesterday's intoxication, he was struggling to keep at arm's length whatever might engender false hopes?

What followed was almost unavoidable. The unexpected chill coming after the strain of the long solitary day, and joined to a physical weakness of which she was not clearly aware, proved too much for Marian's self-control. For the space of a few heart-beats her eyes were fixed on him with something of the wonder of a frightened child; then a mist passed before them, her upper lip quivered and she burst into tears.

It was the most foolish thing she could have done, but so great was the the relief of those tears that for several minutes she made no attempt to check them, but wept on in a sort of reckless enjoyment. As she became a little more composed she was surprised to find herself again sitting in the rocking-chair, never having observed how Mr. Hibbert had led her back to her seat. He was standing not two paces from her, gazing intently into the open [illegible].

"Mr. Hibbert," she said, just above her breath.

In the moment that he turned, his look gave her a fresh shock of surprise. Once more, what had come over the man? Three minutes ago his face had been hard and cold, as though cut out of stone: what then had happened since to make him look as though he had heard good news or found a treasure? Whence that glow under his sun-tanned skin, and why did the look in his pale blue eyes make Marian think of a man who is not quite sober? Why, too, this abrupt leave-taking and this hurrying away without explanation? Marian did not understand it at all.

Most likely she would have understood it still less if she could have followed Mr. Hibbert's movements after he was out of sight. Having reached the limits of the village, riding at an insane pace, he pulled his horse back on its haunches, leaped to the ground beside a hedge of dragon's blood, whose flaming red was beginning to be quenched in the first gloom of dusk.

It was to the tangled grasses that he confided his secret. "She has wept, therefore I have hurt her; but I have the power to hurt I must also have the power to heal; does this not stand to reason?" For all reply the grasses rustled softly against his cheek: evidently they were of the same opinion. "It is only those whom we love who can hurt us." And then having formed the thought, Mr. Hibbert sat up straight, as though frightened at himself, and gazed with awe-stricken eyes towards the house which he had just left.

On most paths in life Dame Prudence is doubtless the most excellent guide to whom we can commit ourselves; but in this case the worthy dame had blundered. Those grateful speeches which this unlucky man had sought to guard against by putting on his densest armor of coldness, would have been harmless compared to this unlucky burst of tears, which, coming at this ill-chosen juncture, proved to be the very shower that was still wanted to water the tiny seed of hope implanted in his soul by yesterday's events, but which without these life-giving drops, might yet have died a natural and harmless death.

CHAPTER XXII.

Ten days had passed since the day of the picnic, and Marian, very weak still from the fever she had but barely shaken off, was luxuriously stretched in a hammock in the gallery, when Catherine, the housemaid, dropped from the skies with the announcement:

"Please, ma'am, Miss Mercury says as how she's come to fetch you."

Before the sentence was complete, "Miss Mercury" herself started up out of the dusk at Catherine's elbow and made a vigorous grab at Marian's hand.

Marian had had fever, and every one who had fever always came to Cane Hill in order to recruit; therefore it was no more than a logical deduction that Marian must come. The air there was ever so much purer than anywhere else on the island.

"But can I leave father alone?" queried Marian, doubtfully.

"Of course you can. It is your duty to your papa to get well with the least possible delay."

Marian still attempted to resist, but of course "Miss Mercury" had her way in the end, and when an hour later the Captain returned home he found the nest empty, and nothing but a hastily-scribbled note from the bird that was flown.

It was pretty nearly dusk by the time Cane Hill was reached, so that Marian saw little of her new abode that night. Having dismounted from the buggy, and hand-in-hand with Miss McCrie, charged a grassy slope which boasted not of the pretence of a road, she found herself standing in a square hall, in which doors opened from all sides, and from which a perilously worm-eaten staircase led to an upper story. Up this staircase they walked, with for every step a resonant creak, and, arrived on the upper floor, Marian was hurried into what was to be her bedroom, a very large and lofty apartment containing a fourpost bed, one chair, one table and innumerable small dark objects on the wing, whose real nature it took her some little time to ascertain. The clearing up of this latter point bade fair to undermine Marian's night's rest, for the small, dark objects wheeling high above her head while she was preparing for rest, clinging to the mosquito curtains and eyeing her with their suspicious bead-like eyes after she had retired behind that friendly shelter, proved themselves to be—bats.

And if it had been the grown-up bats alone; but judging from the piteous squeaking which, the moment the candle went out, began to issue from under various rafters of the ceiling, it was Marian's fate to spend her night in a bat-nursery, or rather in the midst of a conglomeration of bat-nurseries.

"This is not to be borne; I must speak to Miss McCrie," she groaned to herself innumerable times while turning and re-turning in her bed.

But it may as well be here noted that when Marian next day timidly let fall some remark about there being rather many bats in her room, the observation completely missed its object, for the reason that bats were things which to Miss McCrie were scarcely more noticeable than the air she breathed.

It was daylight when Marian opened her eyes, for so great is the strength of convalescence that she had actually slept. The bats had apparently had it out in the night and had just gone to bed behind the rafters.

Half-an-hour later she was downstairs and out-of-doors. The house, a steep-roofed, wooden building, embowered in old mango-trees, straggled over a green mound at the foot of the hills. To the right the road led down to the village, to the left a shallow valley, shaded with occasional bread-fruit trees and studded with bamboo-clumps, wound away out of sight. Marian looked at it longingly, but, in consideration of the low ebb of her strength, wisely refrained and turned her steps backwards.

Her little tour of inspection had given the household time to rub its eyes and look about it. In front of the house Jeremias, the black coachman, was chopping wood to the tune of "Tiddlewinks the Barber," which operation he, however, interrupted in order to inquire, with obviously heart-felt interest, what sort of a night "ma'am" had passed; for Jeremias was a cheerful and benevolent young man, with boundless sources of sympathy at his command.

"I'm so glad to hear that the Cap'n is pretty well, ma'am; I am always really and truly glad when I hear of any person being well or happy," was the comprehensive sentence with which he closed the interview and relapsed into his wood chopping.

As she was making for the open door Marian heard her name pronounced, as it seemed to her, close to her ear. Looking up with a start, she found herself near an open window which disclosed to her Miss McCrie, for the first time in her experience of that lady not attired in a riding-habit, but in an old-fashioned white cotton dress, seated at a square wooden table on which reposed three enormous and fearfully business-like looking books, and with a pair of yet more business-like spectacles perched upon her nose.

(To Be Continued).

Recipe for Grapes.

You may pickle them.

(If you approve of pickles).

First take ripe, perfect grapes.

Divide the large bunches carefully.

Put a layer of grape leaves in an earthen jar.

The tannin in the leaves helps preserve the firmness of the grapes.

To four quarts of vinegar take two and a half or three pints of white sugar.

Add an ounce of cinnamon, a half ounce of cassia and cloves.

Boil the vinegar, sugar and spices a few moments. Let cool and pour over the grapes.

By pouring over cool the color of the grapes is preserved and they do not burst.

SUNDAY SCHOOL LESSON

October 15, 1916. Lesson III.

The Appeal to Caesar—Acts 25: 1-27.

Commentary.—I. Paul accused by the Jews (vs. 1-7). 1. When Festus was come into the Province. Little is known of Festus, who succeeded Felix as governor of the Roman Province of Judea. Josephus speaks of him as a man of better character than Felix. He died two years after becoming governor of Judea. After three days—Festus remained in Caesarea, the city where his official residence was to be, but three days or perhaps but one full day, before he went up to Jerusalem the centre of Jewish influence. It was important that he should become acquainted as soon as possible with the nature and needs of his subjects, and make an attempt to secure the favor of those whom he was to rule. 2. The high priest—This official, now appointed by the Roman Government, stood at the head of the Jewish ecclesiastical system. Chief of the Jews—Not only the members of the Sanhedrin, but other influential Jews also. Informed him against Paul—The verb indicates that the proceedings here assumed a legal form. It was no mere mention in any irregular way, but a definite charge was made, no doubt in the same terms which Tertullus had used before.—Lumby. 3. Desired favor against him—"Asking a favor against him."—R. V. The nature of this favor is explained in the next clause. Would send for him to Jerusalem—The Jews wished Festus to send to Caesarea to have Paul brought to Jerusalem under the pretence that he might be tried before the Sandhedrin, but the real purpose was that they might in some way bring about his death. Laying wait in the way—The two years that had passed since Paul was rescued from the conspirators who had not lessened the hatred of the Jews toward him nor their desire to kill him. The moral corruption of the Jewish leaders is made clear by this wicked and cruel plot. 4. Answered that Paul was kept in charge (R. V.)—It is probable that Festus was suspicious of the intentions of the Jews who wished Paul brought to Jerusalem. He gave them to understand that Paul was being securely kept in Caesarea and that was the place for him to have a trial, if any trial was necessary. 5. Which among you are able—Festus invited and urged those Jewish leaders who had influence and the ability to bring charges against Paul to go with him to Caesarea and make their accusations there. If there be any wickedness in him—Festus opened the way for a hearing of the case before himself, and Paul's accusers would have the opportunity of showing whether or not there was anything amiss in the prisoner. 6. More than ten days—The marginal reading is, "No more than eight or ten days," and this is in agreement with the Revised Version. The stay of Festus at Jerusalem was not prolonged. He seems to have been active and firm in the prosecution of his duties as governor. Went down into Caesarea—Caesarea was situated on the shore of the Mediterranean and Jerusalem upon a ridge two thousand five hundred feet above the level of the sea, hence there is propriety in saying that Festus "went down" to Caesarea. The next day—There was no delay in giving Paul's accusers an opportunity to present their case. Sitting on the judgment seat—Festus, as the governor of a Roman province, was also a judge, and before him were brought cases for trial. 7. Stood round about—In their eagerness to secure Paul's condemnation. Many and grievous complaints—No doubt the Jews had gathered many complaints against Paul from rumors during the two years since his arrest, and they were glad of the opportunity to bring before Festus their many charges against him. Which they could not prove—The judge did not consider the evidence strong enough to sustain the charges.

II. Paul's reply and appeal (vs. 8-12). 8. Answered for himself—The Roman law gave the accused person the opportunity to answer the charges made against him. Neither against the law of the Jews—The accusations against Paul were three as refuted by him in his reply. He had not broken Jewish law nor had he spoken against the Jewish system of religion, but had declared that Jesus came as the fulfilment of the law. Neither against the temple—He had not polluted the temple, as his enemies had charged. Nor yet against Caesar—It is evident that the Jews had charged Paul with sedition against the Roman Government, but the apostle promptly denied any disrespect for Rome. 9. Willing to do the Jews a pleasure—Festus desired to secure the good-will of the Jews. Wilt thou go up to Jerusalem—The procurator had no authority to compel Paul to appear before the Sanhedrin, for that was an ecclesiastical court, and its decisions were not recognized by the civil government. Before me—Festus signified his willingness to go to Jerusalem with him, probably to see that Paul had a proper hearing. 10. I stand at Caesar's judgment seat—Every civic court in the Roman empire was looked upon as Caesar's judgment seat. It was a part of the Roman judicial system. Paul had been brought before Felix many times during the two years of his imprisonment. He, as the Roman citizen, had the right to justice at the hands of Roman judges. As thou very well knowest. It was so evident that Paul had not wronged the Jews that Festus must at once acknowledge his innocence. 11. If I be an offender—The question of Paul's guilt or innocence must be decided by the civil court and not by the Jewish Sanhedrin. I refuse not to die—The apostle was ready to endure any just punishment, even to suffer death, but he was conscious of his innocence. No man may deliver me unto them—Paul was certain of his rights as a Roman citizen. He was firm in his determination to trust to the protection of the Roman government, and there was no power that could give him over to the Jews against his will. I appeal unto Caesar—Paul had looked the ground over well and had come to the decision to place himself under the power of Rome. An appeal to Caesar meant that his cause would be brought before the emperor himself. 12. Conferred with the council—Festus had those about him who understood the law and its operation, and he consulted with them as to the case before him. Evidently the result of this conference was the decision that no other course was open but to grant Paul's appeal. Hast thou appealed unto Caesar—Doubtless the correct reading is, "Thou hast appealed unto Caesar."

III. Festus and Agrippa consult about Paul (vs. 13-27). Agrippa, who is here mentioned, was Herod Agrippa II., son of Herod Agrippa and the grandson of Herod the Great. He had been placed over the provinces east and north of the Sea of Galilee, and Perea and Galilee were also included in his kingdom. Bernice was his sister. These royal personages visited Festus after he had been settled as procurator over Judea, and, inasmuch as they were Jews, Festus told them about Paul, expecting that they would give him information that would lead him to a better understanding of this notable prisoner. He gave them a history of the case as he had to do with it, and Agrippa expressed a desire to hear Paul speak. Accordingly Paul was brought the next day into the "place of hearing," and was introduced to Agrippa and his company. Festus was in perplexity, for Paul had appealed to Caesar and had committed no crime deserving capital punishment, and he did not know what report to send to Rome with his prisoner. He was hopeful that Agrippa would be able to let some light upon the question.

Questions.—Why had Felix left Paul a prisoner? Who succeeded Felix? Who brought charges against Paul? What did they request Festus to do and for what purpose? What reply did Festus make? What further step was taken in the trial of Paul? Why did Paul appeal to Caesar? Who was Agrippa? Bernice? What request did they make of Festus?

PRACTICAL SURVEY.

Topic.—Contrasted forces.

I. The complicity of the Jews.
II. The perplexity of Festus.
III. The decisive appeal of Paul.

I. The complicity of the Jews. With the Sanhedrin the first thought of a change of government seems to have been the hope of working upon the inexperience of Festus so as to get Paul into their power. It was the religious influence of Paul working mightily, sapping the very foundation of their religious system, presence in Jerusalem. To everything that corrupt Judaism held dear Paul was an uncompromising antagonist. Moral corruption superstition, traditions, the policy and ambition of the priests and their wholesale apostasy from God met his steadfast disapproval. Though two years had passed since the Sanhedrin had accused Paul of a Roman court, their restless hatred and determined purpose to destroy his life had not lessened. On their continued insistence Festus gave the Jews the haughty and genuinely Roman reply that whatever their Oriental notions of justice might be, it was not the custom of the Romans to grant any man's life to his accusers by way of doing a favor, but rather to place the accused and the accusers face to face and so give the accused a full opportunity for self-defense. The Jews knew better than to disclose their real grievances, so they accused Paul of offenses against their best institutions, the law and the temple, and of treason against the state. In truth Paul had put the law in its proper place and had everywhere vindicated its true functions.

II. The perplexity of Festus. As a shrewd man, Festus must have seen that Paul's accusers were capable of fabricating the most groundless charges; and they must have known from the spirit of the apostle that he was an innocent man. He must have known that Felix had found no fault in him. The Jews charged Paul with heresy, treason and sacrilege. Of treason Festus could form a judgment, but he knew nothing of heresy or sacrilege. He was keen enough to see that the only treason of which Paul was guilty was in supporting a "theological King." Manifestly the whole matter was out of his range. Had it been a question of politics or law, that same judge would have brought all the power of his intellect to bear upon it. There does not seem to have entered the mind of Festus the thought of investigating Christianity. It appeared to him that the men over whom he was appointed to rule were permitting themselves to be passionately absorbed by questions not worthy of a moment's consideration. Nothing could exceed the contemptuous indifference with which he referred to Christ. He looked upon the vital subject of Paul's preaching and of his contest with the Jews as a trifling matter unworthy of the serious consideration of educated men. He made the occasion of Agrippa's visit an opportunity for an explanation of all the "complications which so confused him. He was painfully embarrassed as to what to say about Paul to Caesar. The law required that he send with each prisoner a full report of his case to the emperor. His failure to declare Paul's freedom and his proposal to place him under trial before the Sanhedrin led to an appeal which ended his authority in the case.

III. The decisive appeal of Paul. Two years of imprisonment had not lessened Paul's courage nor affected his presence of mind. His defense was as clear and firm as ever. He held no desire of revenge against his enemies, no conspiracy against his unrighteous judges, no impatience at so long a trial. He possessed a calm submission to Roman law and a confidence in the divine protection. Continued hardships had tested his quality. He maintained the same quiet dignity and offered the same defense. His appeal to Caesar was proof of a conscience void of offense before God and man, of a humble submission to divinely ordained authority, of a wise avoidance of an unnecessary martyrdom and of an unwearied zeal for the extension of the kingdom of God. Paul eagerly seized the occasion for teaching both the Roman ruler and the Jewish Agrippa that the gospel was not a mere idle question, but a great reality for which he was ready to die if need be.—T. R. A.

Why Mothers Sing to Babies.

Physiologists who have carefully studied the characteristics of instinct in women have discovered just why mothers sing their babies to sleep. It is not merely inspired by the expectation of better sleep in their children, but it is the primeval call of the feminine nature. It is a material prompting which occurs naturally in each mother.

Savage mothers who are never known to sing upon other occasions invariably hum and croon to their children at night and upon one other instance, when they are planting seed. It is a peculiarity of the Zuni native women and one which has been but recently understood. The theory of primitive peoples is that there is some mysterious connection between the sound of a woman's voice and growing things.

GETTING POULTRY READY FOR EXHIBITION

In Selecting Fowl for Exhibit on Make a Thorough Examination—Don't Rely on General Appearance—How to Wash and Prepare for the Show.

The tyro in exhibiting poultry is too ready to rely on the general appearance of the birds. The old hand at exhibiting fowl never makes this mistake. He takes the bird that he thinks will make a good show bird in his hands and makes a thorough examination of it for hidden defects. A bird that has faults that cannot be remedied should be rejected at once.

Blemishes that can be removed by legitimate means should be corrected. In the show room it is looks that count; looks count for everything. Blemishes count for everything. Blemishes which might be passed over in a breeding bird are inadmissible in a show bird. The smallest positive disqualification immediately throws it out of the category of exhibition birds.

The all-round good bird is the exhibitor's reliance. Once in a long while a bird is found fit to go from the yard to the show room, but in most cases a great deal needs to be done before the bird is ready to show. To show to advantage birds must be in perfect condition, and must have been so handled that they are not "coop shy," and are not disturbed by the inspection of visitors or the handling of the judges, but will pose and show themselves to best advantage.

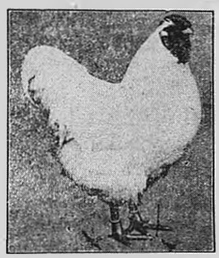
Birds intended for the showing should be selected two months prior to the show, and the males separated from the females to avoid breaking the feathers. Each specimen should be carefully examined and all broken and off-colored feathers removed, which, if pulled at this time, may come in perfect, as off-colored feathers are often caused by a bruise or injury to the feathers when it is forming. Dust each bird to make sure that it is free from lice. On stormy days confine the birds to the buildings. If the birds are quite dirty they will require several washings to get them in the best possible condition. The first washing should be done about two weeks before show time.

To wash birds a warm room, soft water, good soap, a sponge, several towels, three washtubs and a requisite amount of patience and care are the chief requirements. Perhaps we might add a little "elbow grease."

Fill the tubs half full with warm water, just enough for the hand to feel comfortable in. Rub the soapsuds thoroughly into the plumage, rubbing with the feathers, not against them. Lather the birds thoroughly and remove every particle of dirt. Begin at the head and rinse the bird thoroughly until every particle of soap is removed. This is important, for if the soap remains the plumage will come out blotchy and will not take the blueing water evenly.

Next give the bird a final rinsing in the tub of clean, cold water, to which a slight amount of liquid blueing has been added. Dip two or three times in the blueing water to make sure the latter permeates all through the feathers. But don't put too much blue pigment into the water, as it will show next to the quills in the web of the feathers and lose, instead of win, the prize. After the bird has been thoroughly rinsed in this blueing water squeeze the water out of the plumage, drying with towels, and place the bird in a roomy coop having a wired or slatted front, the side and top being covered with muslin.

The bottom should be covered with clean straw or coarse shavings. Place this coop near a good fire—not a roaring red-hot one—and in a few hours the bird will plume itself, and when thoroughly dried will look as clean and white as it is possible to make it by legitimate means.



"Blemishes that might be passed over in a breeding bird are inadmissable in a show bird."

The bird having been washed and in fine plumage now needs the finishing touches to the comb, wattles, lobes and legs. There are all kinds of preparations used to bring these points out effectively, but there is nothing better or easier to use than pure carbolated vaseline. After comb wattles and lobes have been washed and dried rub a very little vaseline into the skin, rubbing it in fairly hard. It will bring out the color in great shape. Shanks and toes, after being thoroughly brushed with soap and water applied with a toothbrush, and dried, can be anointed the same way with vaseline. Fowls treated in this manner and placed in shipping coops that have muslin on the inner sides, plenty of coarse straw or shavings on the bottom, will arrive in the show room in first-class condition, and need little or no handling prior to the judging.

With parti-colored breeds the main thing is to have birds tamed and in high condition. Washing is not necessary where cleanliness and care are observed in housing the fowls. But in laced and barred varieties of fowl, it is necessary to pluck the old feathers and often some of the new and overlapping ones, from the back, wing bows and breast, to bring out a better laced or pencilled effect.

—CANADIAN COUNTRYMAN.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

A NECKLACE OF LOVE.

No rubies of red for my lady,
No jewel that glitters and charms;
But the light of the skies in a little one's eyes,
And a necklace of two little arms.

Of two little arms that are clinging
(Oh, ne'er was necklace like this!)
And the wealth of the world and love's sweetness impearled
In the joy of a little one's kiss.

A necklace of love for my lady
That was linked by the angels above?
No other but this, and the tender, sweet kiss
That sealeth a little one's love.
—Frank L. Stanton.

THOU HEAREST ME ALWAYS.

Jesus lifted up His eyes and said, Father, I thank Thee that Thou hast heard Me.—Father, glorify Thy name. Then came there a voice from heaven, saying, I have both glorified it and will glorify it again.—Lo, I come to do thy will, O God.—Not my will, but thine, be done.

As he is, so are we in this world.—This is the confidence that we have in him, that, if we ask anything according to his will, he heareth us.

Whatsoever we ask, we receive of him, because we keep his commandments, and do those things that are pleasing in His sight.

Without faith it is impossible to please Him; for he that cometh to God must believe that he is a rewarder of them that diligently seek Him.

He ever liveth to make intercession for them.—We have an advocate with the Father, Jesus Christ, the righteous.

WATERLOO.

A poet visited this memorable field:
'Stop! for thy tread is on an empire's dust!
An earthquake's spoil is sepulchred below!
As the ground was before, there let it be,
How that red rain hath made the harvest grow!
Ambition's life and labor all were vain;
He wears the shattered links of the world's broken chain."

Here is a portrait of men in all ages, in all lands; he belongs to a broken chain and is himself a shattered link. Look at the old lands; there are two classes, the oppressor and the oppressed. Look at the activities of the higher men, they are clever, they are greedy, they go into the city to get gain, they imitate others who belong to the same chain, wear the marks of the same degrading type. Violence, lust and war, these are the marks of men; the son is like the father, there is nothing complete, there is no finish; they die and leave their task undone; they are shattered links of a broken chain.

At the time of the battle of Waterloo, Napoleon was on the down grade. Here was a crisis. Victor Hugo says: "Waterloo was not a battle, but the universe changing front." Soon the feet of Bonaparte will stand on the main deck (not on the quarter deck) of the "Bellerophon," and he hands his sword to the British officer, in token of submission and defeat. He never set his foot on English soil; the nearest he came to it was to stand on the deck of a British man-of-war. Here is a portrait of universal man, a shattered link of a broken chain.

"We love sweet voices, and God makes them mute.
We hold no treasure sure to last a day;
We fill our hearts with flowers that have no root;
We build snow huts that summer melts away.

Yet never need our weak lives hopeless roam,
For One, descendant from a brighter land,
Who came to save, will guide His children home,
And keep secure all trusted to His hand."
—H. T. Millar.

THE POULTRY WORLD

(By Victor Fortier, C.E.F. Ottawa, (Ont)

The goose is one of our easiest and most profitable fowls to raise, and it should be bred far more extensively than it is at the present time.

Breeds.—The most popular breeds are Toulouse, Embden and African. They grow very quickly and fatten easily. The common goose is not so profitable as is the smaller and consumes nearly as much food as the standard breeds.

Housing.—It is not advisable to house turkeys, ducks, geese and hens together as is sometimes done, as they differ in their habits and require different treatment. The males of the various species seldom agree and frequently fight and sometimes one or more of the combatants are killed.

The house may be of simple construction, but it must be bright, clean, well ventilated, free from dampness, and large enough to avoid overcrowding.

The floor should be covered with litter, which should be frequently renewed, or at least covered by an addition of fresh litter. Geese delight in cleanliness; it is essential to their well being. A pond or stream is an advantage, but no absolutely necessary. Geese raised near a body of water are much better looking and more thrifty than others. Their feathers are of a finer quality, and as the feathers are one of the products, this condition should not be overlooked.

Breeding Stock.—A gander will mate with several females. It is better to have as few males as possible in the poultry yard so as to avoid quarrels and fights as the ganders may waste their energy to such an extent that they may be useless as breeders. Geese should be mated early in the fall, for if the mating is long delayed there is risk that females will not produce anything during the year. Goslings or yearlings are poor breeders; two-year-old birds are better, and although geese may live to a great age, they are only in the best possible breeding condition at from three to five years of age.

Feeding Adult Birds—Variety should be observed in feeding. Geese have a special liking for grass and green foods. They do well on all sorts of grain and clovers, as well as on cooked vegetables or fruit. They must have a run of some sort, but do no require a very large space. They may be kept in part of a field until they have eaten all the grass, then transferred to another part of the same field. Geese should never be pastured in seeded fields, as they do great damage by eating the plants right down to the crown. They dig into the heart of the plant with their bill, which is toothed like a saw, and destroy vegetation. Their droppings, which are very caustic, burn the plants. They should not be left at large in pastures kept for farm animals.

Laying and Incubation.—When the goose walks around, holding straws or bits of wood in her bill, it is a sign that laying time is near. It is best then to provide her with a pile of soft straw in which she may dig and hide her eggs. The eggs should be removed as soon as laid, so as to avoid chilling, but, one or two dummy eggs should always be left in the nest so that the goose may not see that the eggs are being taken away, as she would then go elsewhere.

When ready to set some ten to fifteen eggs should be put in the nest, which should be almost flat, placed on the ground and spacious, so that the sitter may be quite comfortable, and in a secluded place where she will not be disturbed by any one. It is also better to keep the gander away during sitting time as he might disturb the goose and annoy the person in charge.

While sitting the goose should be given pure water, grain and green food. Some breeders, during the first few days, carefully lift the goose from the nest to make her eat; in doing so care should be taken to see that no eggs are retained under the wings. When she leaves her nest to feed, etc., she covers the eggs with down feathers or with bits of straw.

Experience has shown that it is best to let the goslings break through the shells unaided. By helping them there is danger of fatally injuring them; through the membranes being prematurely ruptured, bleeding to death may easily take place.

Rearing.—Goslings should be removed one by one as they hatch, so as to prevent the mother from leaving the nest before the hatch is over. They should be placed in a basket, lined with cotton or wool, or in a brooder.

When hatching is over give the goslings to the mother, who will watch over them with great care; the gander may then be allowed with the mother, as he helps her, and protects the young ones very tenderly.

Was Troubled With CONSTIPATION FOR OVER FIVE YEARS.

Unless one has a free action of the bowels, at least once a day, constipation is sure to ensue, then in the wake of constipation comes sick headache, billious headaches, jaundice, piles, and many forms of liver complaint.

Milburn's Laxa-Liver Pills will regulate the flow of bile to act properly upon the bowels, thus making them active and regular, and removing the constipation and all its allied troubles.

Mr. Phil. G. Robichaud, Pokemouche, N.B., writes: "I have been troubled with constipation for over five years, and I feel it my duty to let you know that your Milburn's Laxa-Liver Pills have cured me. I only used three vials, and I can faithfully say that they have saved me from a large doctor's bill."

Milburn's Laxa-Liver Pills are 25 cents per vial, or five vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Fruits for Jelly Making.

Currants are best.
Crab apples are fine.
So are quinces and grapes.
Many like blackberry jelly.
Raspberry and peach are good.
Acid apples require no extra flavor.
Apples, peaches and pears must be cooked in water.
It is easier to make jelly from fruit which require no additional water.
Likewise berries which are sandy or dusty must be washed as speedily and carefully as possible.
Juicy fruits like currants and raspberries, should not be gathered after a rain. They've absorbed so much water as to make the juice [illegible] jelly.

HAD KIDNEY TROUBL

For SEVERAL MONT

DOAN'S KIDNEY PIL

CURED HIM.

Mr. Fred. Stevens, Raymond, writes: "I am writing to bear my mony of your wonderful medicine had suffered for several months kidney trouble. I had been under doctor's care for two months, wh read your advertisement. I purchased four boxes of Doan's Kid Pills, and when I had used two boxes them I was cured. I have recommended this treatment to several of my friends.

When you ask for Doan's Kidney Pill see that you get "Doan's." The wrapper is grey and our trade mark "The Maple Leaf" appears on every box.

Doan's Kidney Pills are 50 cents per box, or 3 boxes for $1.25; at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

FARM AND GARDEN

REPORTS ON WINTER GRAINS.

Experiments have been conducted at the Ontario Agricultural College and throughout Ontario in the past year with winter wheat, winter rye, winter barley, winter emmer an hairy vetches. The autumn of 1916 and the spring of 1916 were very wet, and the month of July was dry and hot.

About two hundred and ninety varieties of winter wheat and a large number of selections and crosses have been tested at the college within the past twenty-seven years. Of the named varieties fourteen have been grown in each of twenty-one years, and the results of these are of special value. The following gives the average for twenty-one years in yield of both grain and straw per acre and in weight per measured bushel of a few leading varieties: Dawson's Chaff 51.3 bushels, 2.9 tons, [illegible]1 lbs.; Imperial Amber, 47.9 [illegible], 3.2 tons and 61.2 lbs. Early [illegible] Giant, 46.8 bushels, 3.0 tons, [illegible] 60.2 lbs.; Early Red Clawson, 46.6 bushels, 2.5 tons, and 59.2 lbs.; and [illegible] Amber 46.4 bushels, 3.2 tons and 61.7 lbs.

The average results of the fourteen varieties are as follows: Yield of grain, per acre, 40.9 bushels for 1916, and 46.1 bushels for the twenty-one year period; yield of straw per acre 2.9 tons for 1916, and also for the average of the twenty-one year period; and weight per measured bushel 63.2 lbs. for 1916 and 61.1 lbs. for the whole period. It will be seen that in 1916 the winter wheat gave an average of practically four bushels per acre below and two pounds per measured bushel above the average of the past twenty-one years.

Of the twenty-eight varieties of winter wheat which have been tested for the past five years the highest yields in bushels per acre were produced by Grand Prize 46.7, Kharkov 46.4, Imperial Amber 45.3, Gillespie Red 44.9, Yaroslaf 44.7, American Banner 44.1, Theiss 43.8, and Michigan Amber 43.7.

Those varieties of winter wheat which produced the largest loaves of bread from equal quantities of flour in the average tests of nine years made in the bakery branch of the chemical department of the college are as follows: Yaroslaf, Banatka, Crimean Red, Tuscan Island, Buda Pesth, Tasmania Red, Egyptian Amber, Kentucky Giant, Rudy, Turkey Red, Treadwell and Bulgarian.

Crosses have been made between the Dawson's Golden Chaff and some of the varieties of particularly high quality for bread production, such as Tasmania Red, Crimean Red, Turkey Red, Buda Pesth and Imperial Amber. In the average tests for the past five years one of these crosses has surpassed in yield per acre all the named varieties which were grown at the college.

In treating winter wheat for smut the best results were obtained by immersing the grain for twenty minutes in a solution made by adding one pint of formalin to forty-two gallons of water. This treatment is simple, cheap and effectual. Other experiments show the great importance of using large, plump, sound, well matured seed of strong vitality.

In the co-operative experiments throughout Ontario reports have been received from thirty-three counties. These results show the following average yields in bushels per acre: Imperial Amber 36.5, American Banner 31.9, Banatka 30.8, and Pelkes variety made the highest records both at the College and throughout Ontario. Winter Barley gave a yield in 1916 of 49 and an average yield for nineteen years of 52 bushels per acre. Winter Emmer gave a yield of 2,625 pounds of grain per acre in 1916, and an average of 2,450 pounds for nine years.

Distribution of material for experiments in autumn of 1916.—As long as the supply lasts, material will be distributed free of charge in the order in which the applications are received from Ontario farmers wishing to experiment, and to report the results of any one of the following tests: 1, three varieties of Winter Wheat; 2, one variety of Winter Rye and one of Winter Wheat; 3, spring applications of five fertilizers with Winter Wheat; 4, autumn and spring applications of nitrate of soda and common salt with Winter Wheat; 5, Winter Emmer and Winter Barley; 6, Hairy Vetches and Winter Rye as Fodder Crops. The size of each plot is to be [illegible] rod wide by two rods long. Fer[illegible]ers will be sent by express for [illegible]ber 4 this autumn, and for num[illegible] 3 next spring. All seed will be [illegible] by mail except that for number which will accompany the fertilizers. C. A. Zavitz, Agricultural College, Guelph, Ont.

BLACK LEG IN POTATOES.

Testimony is forthcoming that owing to the work of the Dominion plant pathologists, the disease of black leg in potatoes has decreased. Still it causes considerable destruction to the potato crop, particularly in the Maritime Provinces. In continuation of the good work that has been done, Circular No. 1 has been issued by the Division of Botany at Ottawa, entitled "The Black Leg Disease of Potatoes Caused by Bacillus Solanisaprus," which can be had free on application to the Publications Branch of the Department of Agriculture. The author is Paul A. Murphy, B. A., A. R. C. Sc. I., assistant in charge of the Plant Pathological Field Station for Prince Edward Island, who was also responsible for the recently published circular on "Late Blight and Rot of Potatoes. "It is," says the director of experimental farms," with a view to making known to Canadian farmers the means of control found to be most efficacious, that the present circular has been prepared." Mr. Murphy states that the disease, notwithstanding the diminution noted, in 1915 cost the Maritime Provinces the large sum of $693,255. It is interesting to know that with early care and attention the disease is comparatively easily controlled. Mr. Murphy details the symptoms in clear, terse language, describes the life history of the casual organism, estimates the loss in the Maritime Provinces at $6.65 per acre with an average yield of 12 bushels, gives the methods of control and supplies notes on the preparation and use of the disinfectants that are suggested. Notification is also conveyed that further information, if desired, can be had on application to the Dominion Botanist, Central Experimental Farm, Ottawa.

NOTES.

For calf cholera try the formalin treatment. Add one-half ounce liquid formalin to 15 1-2 ounces of water. Reduce the milk ration at least one-half and add one teaspoonful of the diluted formalin to each pint of milk. Keep the calves in clean, dry, well-lighted stalls and see that the milk, pails, etc., are clean.

According to experiments tried by the New York Agricultural Experiment Station lime-sulphur is not a good fumicide for potatoes. In 1915, as in four years preceding, applications for this mixture injured the plants and reduced the yields, while bordeaux mixture benefited the plants and increased the yields. In this year blight was prevalent for the first time since the test began, and the lime-sulphur had little or no effect in controlling it.

Cows greatly simplify the marketing problem. The hay, grain, soiling crops, silage and grazing crops the cows eat may be marketed in such finished products as milk, cream, butter, cheese, with the by-product, skimmed milk, to be fed to pigs, calves or lambs. Thus the markets are seldom "glutted" with these finished products and the cost of handling and transportation may be reduced to a minimum. Cows are indeed valuable as producers on farms.

The profit-making trio in the dairy farm's equipment are the cream-separator, the silo and the manure spreader.

It is just as essential to know how to keep a cow at her best as it is to know how to build her up to her full capacity.

Sweet clover is an excellent green manure crop. It grows rank, and the roots are large and areate the soil to a great depth. It is claimed that one crop plowed under is equivalent to 20 tons of barnyard manure to the acre. Even if the stock do not like to eat it, sweet clover is a valuable addition to our crops.

Thousands Are Ailing From Constipation

No condition causes so many diseases as consumption. It not only prevents proper kidney action, but causes anaemia, stomach trouble and indigestion.

Why not use Dr. Hamilton's Pills and get cured? This excellent medicine restores normal bowel action in one night; thousands say so.

Just think of it! Your system will be pure and clean. You'll be free from headaches, sour stomach, biliousness—in short, you'll have jovial spirits and perfect good health. Get a 25c box of Dr. Hamilton's Pills today. At all dealers.

Changed Words.

The English language presents a large number of words that have been completely changed in their significance since they first came into use. In some cases their meaning has been exactly reversed. A conspicuous example of this is the word "let," which Shakespeare uses several times with the meaning "to hinder." Hamlet exclaimed, "I'll make a ghost of him that let's me," of course "him that stops me."

The word is used in the same sense in the Bible, as in II. Thessalonians ii. 7—"He who now letteth will let until he be taken out of the way."

"Ravel" and "unravel" mean exactly the same thing, although at one time to unravel probably meant to reduce confusion to order. Compare the words "valuable" and "invaluable" and "loose" and "unloose."

As used frequently in the Bible "prevent" instead of meaning to "hinder" means to "precede" or "go before," which is, of course, its etymological meaning.

Better pass a danger than be always in fear.

Henpeckke—I feel like an awful hypocrite. Wigwag—What have you been up to? Henpeckke—I've just been offering congratulations to a bride and groom.

Constant Headaches

When the nervous system gets run down one of the most persistent symptoms is headache. Nervous headache has been described as the cry of the starved brain for more blood.

Because of its remarkable blood-forming and blood-enriching qualities, Dr. Chase's Nerve Food ranks first as a means of overcoming nervous exhaustion, nervous prostration, headache, indigestion, sleeplessness, irritability and all the annoying symptoms of nervous breakdown.

It is not a mere relief, but thorough cure; for it rebuilds and reconstructs the wasted and depleted nerve cells.

50 cts. a box, 6 for $2.50.

Dr. Chase's Nerve Food

WAS A MASON AND SOLDIER

Imposing Funeral of a Plain Private

Who Was Unknown at Place of Death.

William Moses Kedey was a soldier—just a private. He enlisted at New Liskeard and died of wounds in the Derbyshire Royal Infirmary. He was absolutely unknown in Derby, but among his papers was found, after his death, a certificate showing that he was a member of Timiskaming Lodge, 462 of Free Masons, New Liskeard, and in this certificate he was commended by his lodge to the tender care of any Free Mason if he was wounded or killed. This exhortation was printed in French and German, as well as in English. The Masons of Derby were notified and the Derbyshire Gazette thus describes the funeral:

The procession to the Nottingham Road cemetery was an imposing sight. It was headed by a military band from Normanton Barracks, under Bandmaster Duchall. Following this was the firing party, and the hearse, which was drawn by four horses. The elm coffin was covered with the Union Jack and a profusion of beautiful flowers, whilst the lid bore the Masonic emblem. Immediately behind the hearse walked the following wounded soldiers from the Derbyshire Royal Infirmary: Lance-Corp. Noble, Pte. Clarke, Pte. Bell, Sapper Russell, Dr. Bevan, Pte. Brown, Lance-Corp. Sweet, Pte. Gilmour, Pte. Gee, Pte. Booth, Pte. Tanner and Pte. Nield. Coaches containing the mourners came next, and members of the Derbyshire Imperial Veterans' Association brought up the rear in a motor car, with a contingent of soldiers.

The Rev. C. W. Crump officiated, and the mourners included the following Masons: Ald. Sir Thomas Roe, M.P., Councillor J. Hill (deputy mayor), Mr. W. S. Ullman, Mr. Henry Offiler, Mr. J. MacDonald, Mr. W. Heath, Mr. E. Oates, Mr. F. Munns, Mr. J. Twells, Mr. A. J. Topple, H. J. Garnham and Cadet Bromley, A. Buxford. Also present were: Colonel and Mrs. Pearson, of Wingfield House, Alfreton, the latter representing the Canadian Red Cross Society; Major Pine-Coffin, Lieut. Lieut Winslow, Mr. J. C. Barnes, representing the Infirmary Governors; Mr. E. Forster, superintendent of the infirmary; Miss Sutcliffe, matron; Miss Nullimor, sister of the ward in which deceased was nursed, and the following representing the Derbyshire Imperial Veterans' Association: Petty-Officer Rouse, R. N.; Sergt. Wood, Fourth Dragoon Guards; Corp. Dunnacliffe, First Northants Regiment, and Gunner E. Middleton, R.F.A.

Upon the coffin was the inscription: "Wm. Moses Kedey, at rest Sept. 3rd, aged 25 years."

The firing party fired over the grave and the Last Post was also sounded as tribute to this gallant soldier.

Wreaths were sent by the following: The Mayor and Mayoress (Councillor A. and Mrs. Green), "In deepest sympathy for the loss of a gallant soldier and Free Mason, from the Duke of Devonshire, Provincial Grand Master, and the brethren of the Provincial Grand Lodge of Derbyshire; the matron and sisters of the Derbyshire Royal Infirmary; Mrs. Pearson, Wingfield House; employees of Messrs. Burrows & Sturgess; Mrs. Shardlow, Green Lane; the artistes appearing at the Hippodrome, Derby; from the Hippodrome staff; Mr. and Mrs. Sephton and friends; employees in the electrical department of Councillor A. Green's factory; Mr. and Mrs. Bates and daughter, Brailsford; from the late soldier's wounded comrades in Ward 4 at the infirmary; a spray from a Derby girl; from the soldiers' wives and friends in Bradshaw street; from a mother with two sons in France; Mrs. Brailsford; from a soldiers' little boy, Willie Clifford; from a Derby mother; Mrs. Warren; to a brave soldier from two soldiers' mothers.

Jolting the Memory.

The old method of tying a string about the finger to recall to mind some task to be done at a certain time has been done away with. The new way is to transfer a ring from one finger to another. On the accustomed finger the ring feels natural and does not cause annoyance, but on the other finger it slightly irritates. This irritation constantly will aid in recalling the task to be done. Just try it once.

For the bathroom, cork mats which can be rolled up are sensible accessories.

ABOUT GOOD BUTTER.

How to Keep It in the Refrigerator Without Contamination.

Most persons nowadays are fastidious about the butter they eat. The woman who is content to do without fruit and vegetables out of season usually considers it no extravagance to buy the best butter. And the number of persons who pay a really high price for special butter, fresh butter or other butter with an especially sweet flavor increases every week.

But the best butter can be rendered unfit for eating with little difficulty. Good butter needs to be carefully kept and it is often so carelessly or ignorantly cared for in stores and houses that it loses its good qualities.

The intelligent dealer, of course, has proper refrigerators and usually keeps butter in a separate compartment. As an extra safeguard he buys butter in small prints or blocks, and these are wrapped in waxed paper. But now comes the task of preserving its freshness in the home refrigerator.

Butter absorbs odors very readily, and that is why it is so difficult to keep properly. Of course it is quite out of the question to have a separate compartment for butter in the ordinary home refrigerator. But it is possible to keep the butter separate from everything else by keeping it in a special covered dish. Glass jars with glass covers that clamp securely into place are sold for this purpose, and one of them is an economy. As soon as the butter comes into the house remove the pasteboard and paper wrappings and put it into one of these jars. It should be washed and scalded and thoroughly dried before receiving a new cake of butter. Any old butter remaining should be packed in another covered dish.

If the ice gives out and the butter is soft, try hardening it by putting it in a bowl under running cold water. This will do wonders with the butter. When it begins to harden around the outside cut it in small pieces so that the inside part will also harden.

Cure Children's Colds By External Treatment

Mothers Will Find Nothing so Speedy and Reliable as Old-Time "Nerviline."

It's really a shame to upset a young child's stomach by internal dosing, when external treatment will so promptly break up a cold.

When your boy comes in after play with his feet soaking wet, his throat hoarse and sore, his little chest tight and congested, just apply Nerviline. Give him a vigorous rubbing over his throat, and put lots of Nerviline on his chest and rub it right in. To make Nerviline penetrate more quickly cover his chest and throat with a hot flannel bandage. This treatment WON'T fail. Your boy will be feeling better in half an hour, and you will have the satisfaction of knowing you have worked off perhaps a cold, or grippe, or illness that might have laid him up.

Nerviline is mighty good for preventing colds and for breaking up a bad one, too. For general family use it cures all sorts of external aches and pains—you simply can't beat it. Try it for earache, toothache, neuralgia, sciatica, lame back, rheumatism, or lumbago. Wherever there is congestion, inflammation or pain in the joints or muscles, Nerviline will cure mighty quick. The large 50c family size bottle is so economical, so useful, it should be in every home. There is also a small 25c size. Dealers anywhere sell Nerviline.

The "Tank's" First Trip

They were cheered by a new weapon which was to be tried with them for the first time, the heavily armored motor machine guns of a new style, mentioned already in the official bulletin.

That description is a dull one compared with all the rich and rare qualities which belong to these extraordinary vehicles. The secret of them had been kept jealously for months. Only a few days ago it was whispered to me, "Like prehistoric monsters, you know, the ichthyosaurus," said the officer. I told him he was pulling my leg.

"But it's a fact, man." He breathed hard, and laughed in a queer way at some enormous comicality. "They cut up houses and put the refuse under their bellies and walk right over 'em."

I knew this man was truthful, yet I tried to salve them from shell craters, and they only came to a check on the outskirts of Martinpuich, where they were received with a blast of machine-gun fire.

It was then the turn of the tanks. Before dawn two of them had come up out of the darkness and lumbered over the British front-line trenches, looking toward the Germans as if hungry for breakfast. Afterward they came could not believe him.

"They knock down trees like matchsticks," he said, staring at me with shining eyes. "They go clean through a wood."

"And anything else?" I asked, enjoying what I thought was a new sense of humor.

"Everything else," he said earnestly.

"They take ditches like kangaroos; they simply love shell craters, laugh at 'em."

It appeared also that they were proof against rifle bullets, machine-gun bullets, bomb and shell splinters, just shrugged their shoulders and passed on. Nothing but a direct hit from a fair-sized shell could do them any harm.

"But what's the name of these mythical monsters?" I asked, not believing a word of it. He said "hush," other people said, "hush, hush" when the subject was alluded to in a remote way, and since then I heard that one name for them is the "hush, hush," but their great name is tanks.

For they are real and I have seen them, walked around them, got inside their bodies, looked at their mysterious organs and watched their monstrous movements. I came across a herd of them in a field, and like a countryman who first saw a giraffe, said: "Hell, there ain't no such animal." Then I sat down on the grass and laughed until the tears came into my eyes (in war one has a funny sense of humor), for they are monstrously comical, like toads of vast size emerging from the primeval slime in the twilight of the world's dawn.

The skipper then introduced me to them.

"I felt awfully bucked," said the young officer, who was about five feet high, "when my beauty ate up her first house, but I was sorry for the house, which was quite a good one."

"And how about the trees?" I asked.

"They simply love trees," he answered.

When the British soldiers first saw these strange creatures lolloping along the roads and over the old battlefields, taking trenches on their way, they shouted, cheered wildly, and laughed for a day afterwards. Yesterday the troops got out of the trenches, laughing, shouting, cheering again, because the tanks had gone on ahead and were scaring the Germans dreadfully while they moved over their trenches and poured out fire on the German side. These motor monsters did very good work, justifying their amazing existence.

Over the British trenches in the twilight of dawn one of these motor monsters lurched up and now came crawling forward to the rescue, cheered by the assaulting troops, who called out words of encouragement to it and laughed so that some men were laughing even when the bullets caught them in their throat. "Creme de Menthe" was the name of this particular creature, and it waddled forward right over the old German trenches, went forward very steadily towards the sugar factory. There was a silence from the Germans there, then suddenly their machine-gun fire burst out in nervous spasms and splashed against in their throat. "Creme de Menthe" the tank did not mind. The bullets fell from its sides harmlessly.

It advanced upon a broken wall, leaning up against it heavily until it fell with a crash of bricks, and passed over them and walked straight into the midst of the factory ruins. From its sides came flashes of fire and a hose of bullets, and then it trampled around over the machine gun emplacement, "having a grand time," as one of the men said, with enthusiasm. It crushed the machine guns under its heavy ribs and killed the machine-gun teams with its deadly fire. The infantry followed in and took the place after this good help, and then advanced again around the flanks of the monster.

In spite of the tank, which did such grand work, the assault on Courcelette was hard and costly. Again and again the men came under machine gun fire and rifle fire; for the Germans had dug new trenches called "fabeckgraben" and "zollerngraben," which had not been wiped out by the artillery. They fought with great courage and desperation. Seventy men who advanced the first on part of these lines were swept down, 70 others who went forward to fill their places fell also, but their comrades were not disheartened, and at last carried the positions in a great wave of assault.

Then they went on to the village. It was like all those villages in German hands, tunneled with a nest of dugouts and strongholds hard to take. The British troops entered it from the eastern side, fought yard by yard, stubbornly resisted to have it. A tank came along and played about, searching for German machine guns, thrusting over bits of wall, nosing here and there and sitting on heaps of ruin while it fired down the streets. By 6:20 last evening the village was taken. The British took 100 prisoners, and when they were brought down to Pozieres last night they passed old "Creme de Menthe," who was going home. They held up their hands, crying "Gott in Himmel," and asked how they could fight against such monstrous things. The taking of Courcelette was a great achievement, skillfully planned and carried out by splendid men and one monster.

* * *

They were co-operating with some troops on their left who went straight from Martinpuich. These men went across no man's land for nearly 1,000 yards in six minutes' racing. They made short work of the Germans, who across no man's land like enormous toads with pains in their stomachs and nosed at Martinpuich before testing the strength of its broken barns and bricks. The men cheered them wildly, waving their helmets and dancing around them. One company needed cheering up, for they had lost two of their officers the night before in a patrol adventure, and it was the sergeants who led them over, but now, when they saw the ichthyosauri, they shouted with the others and laughed loudly.

Twenty minutes afterward the first waves were inside the first trenches at Martinpuich and in advance of them waddled a monster. The men were held up for some time by the machine guns, but the monsters went on alone and had astounding adventures. They went straight through the shells of broken barns and houses, straddled on top of German dugouts and fired enfilading shots down the German trenches. From one dugout came a German colonel with a white, frightened face, who held his hands very high in front of the tank, shouting, "Kamerad, Kamerad."

"Well, come inside, then," said a voice in the body of the beast and a human hand came forth from a hole opening suddenly, and grabbing the German officer.—Philip Gibbs corr. New York Times.

PILES.

CORNISH PASTIES.

A Recipe for a Celebrated English Meal in One Dish.

A short time ago I was staying with a friend in Cornwall, and one day she taught me how to make the pasties for which the country is famous. The idea of these pasties is that they give one a complete meal in one "dish."

The pastry takes the place of a pudding course, while in the crisp brown case is concealed the meat, and two, or sometimes three, vegetables.

They can be made either in one large pasty, sufficient for each member of the family to have a portion, or in small ones, one for each person.

In some parts of the county, meat potatoes and onions only are used, but in other turnips are also added, the reason being that as they contain much water, this makes the mixture nice and moist, and far more flavorsome than if water is used to give the necessary moisture.

Required for the Pastry:
One and a half pounds of flour.
Three quarters of a pound of lard or dripping.
Cold water.
One and a half teaspoonfuls of baking powder.
Half a teaspoonful of salt.
For the Mixture:
Twelve ounces of potatoes.
Eight ounces of meat.
Two ounces of onion.
Two ounces of turnip.
Salt and pepper.

Cut the meat into neat, small pieces. Wash and peel the potatoes and turnips, and cut them into dice.

Chop the onion finely, mix all together on a plate with pepper and salt and two tablespoonfuls of water.

Sieve the flour, baking powder and salt into a basin; shred and rub the lard finely into it, then gradually add enough water to mix the whole into a stiff paste.

Flour a board, put on the pastry and roll it out about a quarter of an inch thick.

Cut it into neat rounds, put a good heap of meat and vegetables on the pastry, brush the edges with water, then fold the pastry over it, pressing the edges together. This is an important point; they must be so joined that none of the juices can escape.

Corns Drop Out INSTANT RELIEF

Paint on Putnam's Corn Extractor tonight, and corns feel better in the morning. Magical, the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "Putnam's" Extractor to-day.

Pigeons in Constantinople.

In no big city in the world are there so many tame pigeons as in Constantinople. In many squares in London there are small flocks of pigeons, but in the Turkish capital they are to be seen by the thousand. These pigeons are sacred, and, indeed, many a wealthy Turk leaves money to be devoted to buying food for them. The story of why they are sacred is rather interesting. When Mohammed, the Turkish prophet, was flying from his enemies he hid in a cavern. At the mouth of the cavern two pigeons built their nest, so tradition runs, while across the entrance a spider spun its web. The soldiers who came along some days later felt certain that no one had entered the cave, seeing the birds nesting and the spider's web, and so never troubled to enter it and search. Ever since then the Turks have held pigeons and spiders to be sacred.

Needed a Double Dose.

An old colored man had a mule that would not move for him. He pulled and dragged his mule until he was exhausted and finally he sat down and said, "Well, ole fellow, yo's got de best ob me." There was a drug store across the street, and a thought struck him. He went across and he said, "Has yo' got anything dat will make dat mule ob mine go?" The druggist said, "I don't know; I can try it." He came out and punched a little medicine into the mule's side. The mule commenced to wriggle around, and finally off he started over the side of the hill at a brisk pace. Sambo watched him for a moment or two and then ran into the drug store saying, "Mister, how much yo' charge for dat medicine?" "Ten cents." "Has yo' any mo'?" "Yes." "Den jes put twenty cents wuf inter me so I kin ketch dat mule."

THANKFUL MOTHERS

Thousands of thankful mothers throughout Canada—many of them your own neighbors—speak with the greatest praise of that splendid medicine, Baby's Own Tablets. Many mothers would have no other medicine for their little ones. Among these is Mrs. Albert Nie, St. Brieux, Sask., who says: "I have been using Baby's Own Tablets for the past seven years and they have done my four children a world of good. I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A GREAT LOSS

What Forest Fires Have Cost Canada in 1916.

Canada has lost through forest fires in 1916 over nine million dollars. This equals more than six times what has been spent on forest protection work from coast to coast.

The enormous sum wasted through this year's forest fires, most of which were preventable, would add another $100 to the first year's pension allowance of nearly 19,000 Canadian soldiers.

It is noteworthy that while some parts of the Dominion owe to rainy weather their immunity from fire damage, the season's record proves beyond gainsay that in areas where first rate fire protection systems were in operation, losses of life and property were held down to a remarkable minimum.

Quebec had some heavy fires in the Lake St John and Saguenay districts, also in the Gaspe peninsula and west of Escalana on the Transcontinental railway. It is a striking fact, however, that within the 24,000 square miles of Quebec, covered by the two well-organized associations of limit holders, the amount of green timber burnt is practically negligible. This immunity was not a matter of luck, but of consistent patient effort to educate settlers, lumberjacks and others in care with fire, coupled with a system of promptly reporting all outbreaks, and attacking forest fires in their incipiency with large forces of men and modern equipment.

British Columbia faced fairly favorable fire conditions through the summer months, and the cost of fire fighting was reduced by about 75 per cent. over the record of 1915. The number of fires was about half of last year. The British Columbia forest protection service is the most complete in Canada thus far and the saving of timber is a logical consequence.

A heavy average of rainfall kept fire troubles at arm's length in Alberta, Saskatchewan and Manitoba, and this weather condition was undoubtedly responsible for the escape of the large areas of big timber throughout Ontario. The Claybelt fires at the end of July and first week of August provided a tragic sacrifice of 262 lives, and what is estimated to be six million dollars worth of property. There was practically no forest guarding organization in the fire-swept district, except along the railway track.

New Brunswick escaped the risks of 1916 with a very small timber loss, Nova Scotia having a similar experience. The records of the Dominion Railway Board show that the private-owned railway lines of Canada have not been responsible this year for any damaging forest fires. Those that were started were promptly extinguished by railway employees.

BETTER THAN SPANKING

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child. The chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

MAN.

(Edgar A. Guest in Detroit Free Press).

I've seen the creatures at the zoo,
And laughed at funny thing they do,
I've seen the ostrich hide his head,
The boa constricting being fed,
I've heard the jungle monarch roar
And watched him pace his little floor,
I've studied lynxes, dogs and cats,
And cows and pigs, and even rats
And all are natural in their ways
And free from sham live out their days.
And thinking of all creatures queer
I'd say that man's the queerest here.

The human animal to me
Is more a thing of mystery
Than is the spindle-necked giraffe
At which we gaze but to laugh
One day all smiles, with courage fine
With head erect and eyes that shine
He woos his way; the next, he wails
And scatters gloom and dismal tales
And in his rage he does more harm
Than all the wolves about the farm
He poses, swaggers, boasts and broods
Swayed by his habits and his moods.

One day you'll find a man a man,
Serving some high and noble plan,
The next he'll be a creature small,
Without an aim or plan at all,
He'll drink too much, and over-eat,
Rival the beggar in the street
And, following his own desires,
Wallow in mud until he mires,
Or, puffed with vanity, will try
To live a gold and tinsel lie
And pose as being what he's not,
Thus letting finer virtues rot.

Of all that live by nature's plan
The queerest animal is man.
He can be gentle, honest, kind,
Modest and simple and refined
And often is, and yet at times
He stoops to vice and shame and crimes
With all the strength that wisdom brings
He keeps on doing foolish things
And out of temper or in jest
Will hurt the ones he loves the best
There is no furred or feathered clan
So puzzling as the tribe of man.

Where there is much light, the shadows are deepest.—Goethe.

WIT AND HUMOR

A QUIET MAID.

(Boston Transcript)

Caller—That new girl of yours seems nice and quiet.

Hostess—Oh, very quiet. She doesn't even disturb the dust when she's cleaning the room.

UNCOUTH.

(Exchange)

"Bill Blunt is one of those rough and ready chaps, isn't he?"

"Yes, that describes him pretty well. He is rough in manners and dress, and he's ready to do anything except work."

HIS FAVORITE STUDY.

(Washington Star)

"What's your favorite study?"

"Botany," replied the indifferent student.

"But they don't teach botany in your school."

"No. If they did they'd probably turn me against it, as they have with most of the others."

A FACT.

(Widow)

New Teacher—Who can tell me a thing of importance that did not exist a hundred years ago?

Little Boy—Me.

SCRIPTURAL AUTHORITY.

(Rochester Times)

"Look here, doctor," roared the irate man who had just received a bill from the physician, "on what do you base these enormous charges?"

"On the best authority in the world," calmly responded the doctor. "Doesn't the Bible say: "All that a man hath will he give for his life"?"

URGENT.

(New York Evening Post)

Just as the Christmas dinner was on the table, and the family had gathered about it, Big Sister stepped into the hall to look at her hair in the mirror there.

Helen was hungry, and everything did look and smell so good, and yet she knew well that Father would not say grace until Big Sister was also in her place.

"Hurry up, Ruth," she called. "God's waiting."

GAMBLING.

(London Tid-Bits)

Jack (rushing into papa's room)—Papa, the coffee-pot and the kettle are singing.

Papa—Nothing strange about that, my boy.

Jack—But they are singing for a wager.

Papa—Nonsense!

Jack—But I can prove it.

Papa—How.

Jack—Because the frying pan is in the middle holding the steaks!

PRESERVING THE WRECKAGE.

(Exchange.)

Bobby came home in bad shape one day, with his face bruised and battered, and two of his front teeth missing. Upon cross-examination he admitted that he had been involved in a physical difficulty with another boy, who had apparently held his own well.

"Now, Bobby," his mother said, "I told you not to fight, but you have been at it again, and have lost two of your teeth."

"Oh, no, I didn't lose 'em," said Bobby, cheerfully. "I've got 'em both in my pocket."

THE MAN AT THE GATE.

(Rochester Times.)

Sunday School Teacher (reviewing the story of the beggar Lazarus)—Who was the poor fellow who sat at the gate watching all the people go inside and wishing that he, too, could get in and enjoy himself?

Reddy Backrow—De guy in de box office.

HE WASN'T SCOTCH.

(Exchange.)

The chief of the clan McIntosh once had a dispute with a cabman about his fare.

"Do you know who I am?" indignantly exclaimed the Highlanders. "I am the McIntosh."

"I don't care if you are the umbrella," replied the cabby; "I'll have my rights."

ONE WAY TO DO IT.

(Rochester Times.)

"Father, how do you fill a fountain pen?" asked Johnny.

"Well," asked his father, "is it your pen that you want to fill?"

"Yes, sir."

"Well, then, my boy," thoughtfully answered father, "I would fill the bathtub with ink, and then get in and fill the pen."

FROM S. S. EXAMINATION.

(Living Church, Milwaukee)

Question—What effect did the Ten Commandments have upon the children of Israel?

Answer—The Ten Commandments made the children of Israel very miserable.

ACCOUNTED FOR.

(Yonkers Statesman)

Patience—I hear Will has been hurt again in his car?

Patrice—Yes, he has.

"That's about his sixth accident, isn't it?"

"Yes."

"The idea! Where did he get that chauffeur of his?"

"His doctor recommended him."

THE SILVER LINING OF THE CLOUD.

(Rochester Times).

The pessimist was suffering from rheumatism. "Every bone in my body aches," he complained bitterly.

"That's all right," said the optimist cheerfully. "You ought to be glad that you are not a shad."

THEY CHEATED HIM.

(Exchange)

Sandy had returned to his native village in Scotland after a visit to London. On being asked what he thought of the great city he said: "It is grand, but the folks are no honest."

"How is that?" asked his friend.

"Well, I bought a box o' pins labeled a thousand for two cents, and, coming home on the train, I counted them an' found them 12 short."

PROVIDENTIAL FACILITIES.

(Exchange)

A farmer in a small way walked into the office of one of the great fire insurance companies and intimated that he wished to insure his barn and a couple of haystacks.

"What facilities have you for extinguishing a fire in your village?" inquired the superintendent of the office.

The man scratched his head and pondered over the matter for a little while. Eventually he answered: "Well, it sometimes rains."

KEEPING HER BUSY.

(Ladies' Home Journal)

An old lady went one morning to a friend who kept poultry, to purchase a setting of eggs. The latter, not having many on hand, asked: "Have you got your broody hen?"

"Well, no," answered the prospective purchaser, "but our old hen has broken her leg and she might as well spend her time hatching out some eggs as to sit around doing nothing."

THEN PECKEM FLED.

(Rochester Times)

"William," said Mrs. Peckem, sternly, "did you ever stop to think that someone might steal me when you were away?"

"Well," responded the poor husband, with a faraway look, "I was a little alarmed when a horse thief was prowling through these parts last week."

Mrs. Peckem stiffened up haughtily.

"A horse thief, eh?"

"Yes, I heard that he carried off two or three nags from this district."

And then Peckem made a bee-line for the club.

The First Showing of Fall Furs

Rich, Luxurious Furs but a luxury you can safely indulge in at the very moderate prices these are marked.

We buy our furs from a house of long-established reputation and are in a position to guarantee satisfaction. No tricks. No nonsense, but good honest quality and for this reason it is especially desirable to patronize a merchant of known integrity and reliability.

No store can nor does buy to better advantage nor does buy to better advantage nor does any retail organization, big or little, give better value than we are offering in our Fur Department. **See Our Furs when You wish to Buy.**

News of the Week Collected by Staff of Live Correspondents

OTTER CREEK

Mr. George Pfohl and son of South Line were visitors at Mr. David Grem's.

Miss Katie Gress left Monday for Galt to attend the wedding of her niece Miss Elvina to Mr. Robert Rutherford of Galt. Wedding takes place on Wednesday at 2 o'clock.

BORN—To Mr. and Mrs. Peter Hutton, formerly of here, of Bruce, a son, on Oct. 15th.

Mr. Earl and Almeda Quans were visitors at Mr. Wm. Mielhausen's of Walkerton.

Recollect I was in here last week and bought an incubator. Yes: I remember, I trust you found it in good order. "In good order! Why say man the "thing" hasn't laid an egg since I bought it."

Mrs. Zarn of Walkerton is visiting at Mr. Henry Steinhagen's.

The funeral of the late Mrs. Ernest Smith took place on Tuesday afternoon from the home of Mr. William Perschbacher's of 12 con. Carrick. Deceased was born in the year 1840, Mecklenbourg, Germany, and died Oct. 15th, 1916, in the home of her son Mr. Wm. Perschbachers. The remains were carried to rest in the Evangelical Cemetery 10th con. Carrick, after burial Service was held in the church by Rev. Greuzenbach. He preached on the text Revelations 14th chap., 13th verse. She leaves to mourn one sister and two sons, Mr. Samuel Smith of Hanover and Mr. Ezra Smith of Carrick and four daughters, Mrs. Henry Koenig and Mrs. Wm. Perschbacher of 12 con. Carrick, Mrs. Jno Krueger of the 10th and Mrs. Hopf of Berlin. Her last illness was dropsy from which she suffered about a year.

GLAMIS

Mrs. Reith and Miss Louise have been visiting Toronto friends the past week.

Inspector Bald of Port Elgin paid Glamis school a visit last week.

Mr. Arthur Groves made a business trip to Toronto on Friday.

Mrs. Angus McLean and daughter, Mr. and Mrs. D. A. McLean and family attended the marriage of his niece, Miss Sadie Matheson, in Southampton on Wednesday.

Miss Florence Webb is visiting friends near Paisley.

Rev. Mr. Reith is spending a few days in Toronto.

Mrs. John Derhan has returned from a visit with Detroit and London friends.

Mrs. Thos. Gamble and son are visiting in Stratford.

Pte Clyde McKeeman of the motor cycle corps returned to London on Thursday.

Mr. James Thompson is in Toronto this week on business.

The teachers from Glamis and vicinity attended the Teachers Convention in Kincardine on Thursday and Friday.

Miss Daisy Cronin was in London the latter end of the week bidding good-bye to her brother, Lieut. Cronin of the 160th Bruce Battalion.

Mr. R. Y. McFadyen's many friends regret to learn of his critical condition at his home in Toronto. No hope is entertained for his recovery.

Since writing the above item, word has been received that Mr. McFayden passed away at his home in Toronto on Monday. Remains are being brought here on Wednesday. More particulars next week.

Additional Correspondence on Page 5

CARGILL

Mrs. M. Bell spent the past week with friends in Galt and Hamilton.

Mrs. Leo Williams left on Thursday for her home in Walkerville after spending the past two months with her mother, Mrs. Alex Thompson.

Miss Clara Grainger is visiting with friends in Stratford and Chatham.

Mr. H. M. Brownscombe visited in London a few days last week with his son, Pte. W. Brownscombe of the 160th Bruce Battalion, returning to Stratford for the week-end.

Rev. Mr. and Mrs. Homer returned on Saturday from an extended visit with friends in Toronto and Farrans Point.

Rev. W. C. Almack occupied the pulpit of the Methodist Church, Paisley, on Sunday, Rev. Creighton of that place conducting the anniversary services in Eden Grove.

Mr. and Mrs. Schmidt of Walkerton, Sundayed with the former's brother, Jos. J. Schmidt.

Messrs W. D. Cargill M. P. P. and J. Clancy, were in London on Saturday bidding the boys Good-Bye on their trip Overseas.

Mr. Geo. Sirse received his Dodge Car the first of the week.

Your correspondent paid a visit to Carling Heights, London on Saturday to see the boys before their departure for the East. The "fall in" was at 12.15 p.m. and all carried their full equipment including their kit bags, and led by the bugle band of the 153rd Wellington Batt. they marched to the G.T.R. depot, London East, their own Band bringing up the rear. Arriving here A and B Cos. boarded the first section and C and D Co's, the second, departing at 1 20 p.m. and 1.50 p. m. respectively for Halifax. The reception given the Battalion by the citizens of London on its march and departure showed the esteem in which they were held and it has been the greatest Boost the County has ever had and all eyes will be on the course followed by the 160th.

Corp. Jas. Hamilton who assisted recruiting was the only one rejected in the Cargill bunch.

Lance-Corps. Anderson and Clancy each received an additional stripe last week and are now full fledged Corporals.

Mrs. Irving of Paisley visited a few days last week with Mrs. F.L. Martin.

Mr. and Mrs. J. G. Schuett and family with Chauffeur Hanmore motored to Clifford on Sunday and visited with friends.

Messrs. MacRae and Mitchell of the Head Office, Royal Bank, Toronto inspected the local branch here on Tuesday.

Mrs. M. J. Kenny returned to her home in Denver, Colo. on Wednesday after a few weeks' visit with friends here.

VESTA

Miss Florence Connolly, court stenographer of Walkerton, spent Thanksgiving at the home of her parents.

Miss M. Webb, teacher S. S. No 11 spent Thanksgiving at her home near Glammis.

Mr. William McGill and Miss Martha Lembke, were united in the holy bonds of matrimony at Sacred Heart Church, Walkerton, by Rev. Father Haller, Oct. 11th. On their return from a short honeymoon trip to London they were given a grand reception at the home of his brother Dan, Friday evening. A large number of costly presents were brought showing the high esteem in which this young couple are held.

Another North Brant boy honored, in the person of Rev. Fr. J. P. Ferguson Cobourg, Oct. 11th, special to the Globe:—"Rev. Fr. Ferguson formerely of St. Mary's parish, Lindsay, has been appointed to the parish of Warkworth, Burnley and Harwood, Northumberland, Co. Before leaving he was presented with a purse of $400.50 and numerous other gifts. Mayor Kylie presided over the gathering and Senator McHugh, Mr Peter Kennedy, Mr. P. Clancy of South Ofc. Principal Rogers, Monsignor Casey and the other clergy of the District gave addresses."

EDEN GROVE

This is the kind of weather that makes a feller hunt up his last year's mittens.

The fowl supper—the great Annual event given under the auspices of the Methodist Church Monday evening—not withstanding the juicy weather was a decided success. Early in the evening autoes, carriages etc. filled with the cream of the surrounding country commenced to come, Everybody looking happy and bent on enjoying themselves. About seven o'clock the farmers, Chesley choir numbering 25 members, followed by a large number of their admirers arrived after partaking of a most delicious supper served by the ladies of the church—All adjourned to the Church, which was well filled. A splendid program was rendered by the Chesley choir under the able Leadership of Mr. Sanderson an old Eden Grove boy. Rev. J. Creighton Paisley acted as Chairman and kept the larger Audience in the best of humor.

Mrs. Clark, Cargill, spent Sunday with friends in the Grove.

The proceeds of the Red Cross Social Evening amounted to over fourteen dollars, quite a number from Cargill being present.

Mrs. Lochleen Cargill visited friends in town Sunday.

Mr. and Mrs. Pearson and son Melvin were in London Saturday seeing the 160th. off.

Mrs. Tennant visited Paisley friends last week.

Rev. J. Creighton, Paisley delivered two very able and impressive Anniversary sermons in the Methodist Church Sunday. The choir rendered special music which was also well appreciated by the large audience present.

Miss Long, teacher, Dunkeld, and Miss Lena Pinkerton and Miss Koexof Pinkerton were among the outsiders who attended the social evening held in the Masonic Hall last week.

MILDMAY

Lieut. Geo. Helwig, Ptes. Earl Harper and Geo. Weiler of the 160th, were rejected at the final examination last week. The other boys passed successfully. Lieut. Helwig and Pte. Geo. Weiler are home. Pte. Harper is to be transferred to another part of the army.

The Epworth League of the Methodist Church held a social evening on Wednesday night of last week. The collection taken at the close was handed over to the Red Cross.

I guess this is the time of year when we can say,

"The melancholy days are come,
The saddest of the year,
Of wailing winds and naked trees,
And meadows brown and sere."

Rev. Mr. Mitchell B.A. of Victoria College preached two powerful sermons on "The Excellence of Character" in the Methodist Church on Sunday. Rev. Mr. Halfyard of Victoria College will occupy the pulpit next Wednesday.

Schools will be closed on Thursday and Friday of this week on account of the Teachers' Convention which meets at Chesley.

A party of local sports went out rabbit shooting on Monday.

Mr. Jack Schourr returned to Galt to resume his work on Friday last.

Mr. Henry Hergott and Mr. David David Weber went to St. Thomas to install one of their cider presses and apple butter outfits about half a mile from the city.

Mr. Robb of St. Thomas intends to manufacture apple butter or latwerk as the Germans call it from the apples in that section which otherwise would go to waste.

CARRICK

The people of S. S. No. 3, Carrick, assembled at the home of Mr. George Scott, 12th con, Carrick, recently to give a send-off to the boys of the neighborhood who are going Overseas. Each of the five, Russell Hutton, Albert Fenner, Gordon Hogg, Stephen Hickling and Jacob Lerch, were presented with a five dollar gold piece and a copy of a very nice address which was read by Mr. Arthur Fletsch. Songs by the children of the school, conducted by Mrs. Patten, music by the Aristocracy Orchestra, and dancing followed. This Section is proud of the young men who have gone to represent us at the Front.

OUR "SWISS NAVY"

Capt. "Had" Robertson Says the Tanks Have Done Excellent Work to Date Thinks War Will Last at Least Eight Months Longer.

September 22nd, 1916.

Dear Attie,—

This is an off night with us, and we are all lying around on our bunks reading papers, some writing letters, and one of the boys is playing the gramophone. It does not seem much like war except for the roar of the guns. It is hard to keep any glass in the windows on account of the concussion of the guns. I am writing this on my knee and by the light of a candle, so I trust you may be able to read it. Roy is in his bunk along side of me and is reading the paper. I was out on horseback this morning and was sticking around camp this afternoon, and was glad that I did so as Jim dropped in. He happened to be going through our area in a motor so dropped in to see us. I took a trip up with him and saw some of our "Swiss Navy." They sure are some land ships, and have done excellent work up to date. It seems hard to imagine what will come next. It seems to me that we are going back to ancient methods, but making them more formidable and destructive. It sure is some war when you come to think of fighting underground, undersea, on land and water, then in the air, using all kinds of explosives, air darts, fire, clubs with spikes in them, steel helmets, armour plated machines to travel overland, one wonders where it is going to end. Even at that, the boys get so used to it they carry on natural-like. They march up the line singing and whistling. Saw one Battalion marching up the other day and they were singing "God only knows how dry I am." It was raining then, and had been for three days, so I guess there wasn't very much that was dry about them. When you consider these conditions and that they were going up to sit and take a shelling for hours, then over the parapet to follow up our own barrage as close as possible until they got hand to hand with Fritz, some spirit.

The artillery work is wonderful when you consider that men can figure on walking right behind a barrage in safety while a few yards in front is a perfect hell. A great deal of credit has to be given to the air service, which is proving wonderful and even the German papers own up to it. Diaries on Germans, who were captured all talk about our air service and the cowardice of their own men. It is hardly that, but ours is so much superior that they have not got much show.

Everything points to a superb victory, but not for another eight months or so. The German people have to be shown that they are badly beaten, and that cannot be done this fall before the wet season. Why some of the Bosche prisoners state that London is burnt down and the German Navy has control of the North Sea, so you see what they are being fed on.

We are looking forward to leave now in a few weeks and it will be a pleasant change to get into the city and see some shows, have a decent bed and some decent meals. When you hear any of the bunch grouching, why don't consider it seriously as they don't seem to be real soldiers until they can grouch about anything and everything.

September 23rd.

I think I mentioned in my last letter that I had seen Jim and he gave me a lot of tobacco and two pipes, one for Roy. There are a great many partridges in the fields around about, but we are not allowed to shoot though as it is too dangerous for the troops. Our Interpreter was telling me that the troops shot a lot of wild bear in the woods near Pozieres. It seems that there are still a number kept on the estates in France. Our deer season will soon be in again and I bet they will be thick this year, as there cannot have been much shooting last Fall and there will be less this.

"Had."

"BLOWN UP" BY SHELL

But "Came Down Again"—Dr. Fraser Refers Vaguely to Hair-breath Escape from Death on the Somme —Some Thrilling Experiences.

That the rumor that Dr. Fraser was blown up at the Front, had some foundation in fact, appears from a letter which Mr. Arthur Collins received lately, although the Doctor makes only vague reference to the incident. Dr. Fraser has been having some thrilling experiences and he gives an interesting account of it in the letter which we are permitted to publish:—

Forward Area,
September 30th 1916.

Dear Attie:—

Have just passed through the most exciting week I have had for some time. I sent you a cable-gram, because there was a rumor that I was blown up. Well I was, but I came down again. Some of the German shells seem to have very little shrapnel in them just the high explosive but most of them are full enough. Went up on the day that Thiepval and Combles were taken. Although the casualties were not heavy in comparison with the results achieved still we had a very busy time of it. The bombardment that started the show was something that cannot be imagined as one paper said, it was fantastic. Three quarters of an hour after the bombardment started German prisoners were coming over the field and we were smoking Bosche cigars. Just as soon as the first barrage lifted they beat it over to us. They cannot run the other way because the barrage was then behind them, and as they said, a mouse could not get through it. The enclosed is a very good photo taken by the Official Photographer, who seemed to be everywhere. It shows how the wounded were dressed in the reserve trenches. The advanced dressing stations were in deep dugouts, but we had to get them back to them first, and the shelling kept up. I told you about two of our officers being wounded, Kelly and Jeffs. Two more were wounded this week Woods and Jeffrey, both light but are at duty. One day I was going into Courcelette with a party of bearers, they turned a machine gun on us. We ducked into a shell hole and would have liked to have stayed there, but shells started dropping around—they snipe there with whiz bangs. We started but the machine gun began popping again. We crawled along between the holes and made for a dug out. It was really a series of underground chambers, two bed rooms, a dining room, a kitchen, with a cooking range and several passages with three openings outside. It had been fitted up with a regular switch board for telephoning, electric lights, push bells &c., easy chairs and splendid bedsteads. The Bosche Anti-Aircraft is a joke here. Our Planes fly over their lines back and forth all the time. There is a constant hum in the air. They are no longer in singles or pairs, but in flocks and are very seldom fired at, while up in the salient, they used to plaster the sky with puffs. Things have been going fine, and there is no sign of a let up. The Canadians will have not more than one more tour I hope. Best regards.

"Jim."

A Bruce Pioneer

The funeral of Wm. Watson took place Monday afternoon from the residence of his daughter, Mrs. F. F. Moore of Teeswater. He was one of the pioneers of Bruce County, having been born 83 years ago near Ottawa and coming here early in life. After his marriage he settled on the farm on which Teeswater is now built. In addition to farming he conducted a lumber and sawmill for many years. He leaves four sons and two daughters.

DIED

TAYLOR—In Walkerton, on Sunday, Oct. 22nd, Kenneth Moreton Taylor, aged 31 years, 6 months and 11 days.

BURNHAM—In Brant Tp. on Friday, Oct. 20th, Mary Rivers, relict of the late Albert Burnham, aged 88 years, 9 months, 3 days.

STROME—In Culross, on Oct. 9, Caroline Lines, widow of the late Noah Strome, aged 68 years.

+ + +

BORN

WHITEHEAD—At Cargill, on Monday Oct. 23rd, to Mr. and Mrs. Ben Whitehead, a son.

KRAMER—At Excel, Alta., on October 3rd, to Mr. and Mrs. Anthony Kramer, a son.

MCGREGOR—In Culross, on Oct. 3, to Mr. and Mrs. Duncan McGregor, a daughter.

STRAUS—In Carrick, on Oct. 11th, to Mr. and Mrs. Frank Straus, a daughter.

Carrick Gave $600

Carrick Tp. raised $600 for the British Red Cross on Trafalgar Day by a farm to farm canvass. Otter Creek division contributed $72.

Walkerton Lady Married

Mrs. Madeline Ernst, who with her daughter, Marion and Pearl, removed recently to Owen Sound, was married on October 11th at the Methodist Parsonage, Owen Sound, by Rev. Mr. Kelly, to Mr. Geo. B. Ellis of Owen Sound.

+ + +

Wounded In Chest

Mr. William Keppler got word this week that his son-in-law, Sergt-Major George Curlew of Toronto, has been wounded at the Front. He is now in the hospital suffering from gunshot wounds in the chest. Sergt-Major Curlew went over in the 35th. Batt'n, with the First Canadian Contingent in August 1915. His wife and two small sons live at Todmorden, Toronto. A good photo of the Sergt-Major appeared in the Toronto Star a few days ago.

+ + +

Brant Pioneer Gone.

The death occured on Friday of a very old and respected Brant resident, Mrs. Mary Rivers Burnham, relict of the late Albert Burnham in her 88th year. She was a member of the Rivers family, who were among Brant's earliest settlers. Mrs. Burnham had been poorly since suffering a stroke last winter. Death resulted from old age. A family of six children survive. They are:—Bruce, Richard and Mrs. Smart at home, Harry and Albert at Galt a married daughter, Amanda at Toronto. The funeral was conducted on Monday by Rev. R. Perdue, rector of St. Thomas Church, Walkerton.

+ + +

Walkerton Gives $1600

The Trafalgar Day canvass for the Red Cross in Walkerton has brought in so far $1367.15 in cash, the total contributions will run about $1600. This is nearly seven hundred dollars less than last year, but it must be remembered that a great many citizens are busy paying so much a month on the combined Patriotic and Canadian Red Cross Fund which was subscribed three or four months ago. The weather was about as bad as possible for a canvass on Thursday but the pouring rain did not hinder the Committee of thirty-odd canvassers from covering the ground pretty thoroughly. The exact amount subscribed is not yet known as the lists have not yet been gone over since the death of the Secretary-treasurer, K. M. Taylor.

+ + +

Dicks—O'Neil

A quiet wedding was celebrated at the church of the Holy Rosary, Detroit, on Monday, October 23rd, at 9 a. m. when Miss Mary O'Neil, daughter of Mr. Hugh J. O'Neil of Walkerton, was united in marriage to Mr. Earl Dicks of Detroit, the ceremony being performed by Rev. Father Van Antwerp. The bride, who was handsomely gowned in navy blue broad cloth with hat to match, was assisted by Miss Josephine Ehrlich who wore black velvet. Mr. Edward Monahor, a cousin of the bride, acted as best man. Afterwards a dainty wedding dinner was served at the home of the bride's sister, Mrs. Ditner. Mr. and Mrs. Dicks are at present spending a few days in Walkerton on their wedding tour.

+ + +

Greenock Will Give

An enthusiastic meeting of ratepayers of Greenock, met at the call of Reeve Phalen at Chepstow on Tuesday afternoon to discuss what action the township Council should take towards contributing to the British Red Cross. Senator J. J. Donelly occupied the chair, and Mr. Joseph Carter acted as secretary. W. H. Cargill M. P., H. M. Lay and John Rowland were the speakers. Mr. Rowland said he had never sought a public office in his life but he would like to be Member of Parliament for a few months when the boys come back to have a part in seeing that they got a square deal. A resolution was carried unanimously asking the Township Council to vote 1 mill, or about $1800 for the British Red Cross.

+ + +

Our School Inspector

The Chesley Enterprise published a very nice half tone cut of Inspector John McCool of East Bruce last week, the occasion being the annual teachers' convention at Chesley. Mr McCool takes an active part in every convention, in fact in everything that pertains to the welfare of both teachers and children in spite of his multitude of duties. His work includes the inspection of no less than 117 Public Schools extending over a stretch of country of 120 miles from North to South. Mr. McCool although a Bruce County boy, was English Master in London Collegiate Institute before his appointment to the East Bruce Inspectorate in 1900. Mr. McCool has filled the position in such a way as to win the highest respect and confidence of all who have to do with educational matters in the County.

NEWS ABOUT TOWN

News About Town on page 5.

Business Is Good

It looks as if 1916 will be a record business year in Walkerton. The retailers report business good. The factories are all unusually busy. R. E. Truax & Son, who were working half time at this season last year are now working 12 hours and expect to be busy until after Christmas at least.

+ + +

Ernie Cartwright Wounded

Pte. Ernie Cartwright was reported wounded in last week's lists. Ernie was employed as a shoemaker by Mr. M. J. Ramsey before enlisting with the 34th Battalion. His home is in England. Mr. Ramsey has written his parents in the Old Country for further particulars.

+ + +

Funeral of Mrs. McCann

The funeral of the late Mrs. McCann took place here on Thursday on the arrival of the C. P. R. noon train. Her son, Mr. J. E. McCann accompained the remains from Regina. Service was conducted at the grave by Rev. C. W. Cosens, pastor of the Methodist Church, a large number of old friends being present.

+ + +

Vic Bell Missing

A telegram received on Wednesday morning by Mrs. David Bell of Goderich who is at present visiting at Mr. Henry Williams, announced that her son, Signaller Victor Bell has been missing since October 8th. Victor made his home with Mr. and Mrs. Williams before enlisting in the 31th Batt. He was well thought of here and has many friends in Walkerton.

+ + +

Walter Pitt Wounded

Mr. W. G. Searle received a telegram from Ottawa on Friday stating that, an old Walkerton boy, Lance Corp. Walter Pitt had been wounded in the left arm and is now in No 8 General Hospital at Rouen, France. Walter, who was brought up by Mr. and Mrs. Searle, has many friends here. He enlisted in the First Canadian Contingent, went with the R.C.R's to Bermuda and has been at the Front since a year ago September.

+ + +

Town Should Give

A fact that impresses one in connection with the Canvass for Red Cross or other Patriotic Funds is that a good many people who are able to give, contribute nothing. Also that while one man gives five dollars, his neighbor in like circumstances, gives fifty cents. The moral obligation to support these funds is equal upon all, and we believe that steps should be taken to make every person a contributor according to his means. This could be done by raising these funds by local taxes, and levying a special tax, similar to poll-tax, upon those who are not ordinary tax-payers. Of course it would not be fair to remove the privelege of personal giving, and a great many people would give no matter whether the town gave for them or not. In a good many municipalities the Council contributes a large share of all of these Funds. It is probably too late for the Walkerton Council to do anything in 1916, but we believe that next year the Council should plan to assume a large share of the giving to the various patriotic schemes.

Girl Wanted

For general housework. Apply to Mrs. Lorne A. Eedy, Victoria St.

Wednesday P. M. Cables

Oct. 25—French War Office announces two violent German counter attacks were held last night against positions on Haudromont-Damloup won by French yesterday. Both attacks failed. French holding all gains securely.

Gen. Haig reports on the Somme last night Germans shelled British front northeast of Courcelette. Also along Pozieres Bapaume road with great violence as if in preparation for great counter attacks.

Salonika despatches: Italian cavalry from Southern Albania formed a junction yesterday with Cavalry and Artillery of Allied forces on Macedonian front.

Copenhagen despatches say: Following Norway's refusal to harbor German submarines, Germany has practically blockaded Norwegian coast and continues persistent war on Norway's shipping.

FROM CHESTER CLENDENNING

Somewhere in France, Oct. 2nd, 1916.

Dear Mrs. Dixon:—

I received your parcel the day before yesterday and I appreciate your kindness very much. Out here is where a person knows how to enjoy the good things their friends send especially when our army feasts are made of bully beef and stew. I saw Elliott about a month ago and say he has grown. I did not know him at first. He is looking fine. I am hoping to run across him again soon as I think his Division will be close to ours soon. It is very hard keeping writing material, especially envelopes, they get wet or damp and are useless. It seems like old times to see one of Mr. Dixon's letters. Walton used to always show me his weekly letter in Toronto and had many good laughs. He writes a very comical letter. Must close for now, must thank you again for your very kind remembrance of me. Yours sincerely,

Chester Clendenning

ALL WALKERTON MOURNS

The Taking of One of Its Best and Best-Liked Citizens at the Beginning of Promising Career—Widow and Five Little Children Bereaved by K. M. Taylor's Death.

The whole community suffered a distressing shock on Monday morning when it was learned that Mr. K. M. Taylor, one of Walkerton's most prominent and promising young business men, had passed away. Mr. Taylor had been ill only a couple of days. On Friday morning he was taken to the hospital, being threatened, it was thought, with typhoid fever. Only the previous day he had taken an active part in the British Red Cross Campaign, of which he was Secretary-Treasurer. The trouble dated from the previous Monday when he went out hunting with some friends and became badly drenched in the rain, besides eating some food that did not agree with him. Dr. McPhedran, the Toronto specialist was summoned on Saturday, but before he arrived on Sunday, motoring from Stratford, the end had come. Death was due to ptomaine poisoning and paralysis.

It is safe to say that few men were better liked or respected in the town than "K. M." His many-sided nature made him a favorite with everybody. Whether it was on the line-up of the town hockey club, in the bank manager's office, in the social life of the town, or on the bowling green, K. M. "played the game." He was a lovable companion, a clear-headed aggressive businessman, a good sportsman and a true-hearted gentleman. He occupied a position in the social and business life of the town which will be hard to fill. That he should be cut off at the beginning of a life which promised much, and that his wife and family of five little children should be deprived of husband and father at a time when he would seem to be most needed is a distressing circumstance which humankind cannot attempt to explain.

Mr. Taylor came here five years ago from Creemore as Manager of the Merchants Bank. He was Secretary-treasurer of the local Red Cross League, Secretary of the local hockey club, and was actively connected with several other organizations. His home was at Perth, Ont., where his father conducts a hardware business. An only brother is in charge of a bombing unit at the Front.

On Tuesday afternoon the remains were taken to Perth via C. P. R. for interment. Service was conducted here at two o'clock at St. Thomas church by the Rector, Rev. R. Perdue who made appropriate reference to the life and work of the deceased in the town. The following friends acted as pall-bearers:—Messrs A. Collins, W. H. McBurney, H. G. Hunter, A. P. Sieveright, R. M. Player, and H. M. Lay.

THE PAPER FROM HIS OLD HOME TOWN.

When the even' shade is fallin' at the
endin' of the day,
An' a feller rests from labor smoking at his pipe of clay,
There's nothing does him so much
good, be fortune up or down,
As the little country paper from his
ol' home town,

It ain't a thing o' beauty, an its print
ain't always clean,
But it straightens out his temper
when a feller's feelin mean;
It takes the wrinkles off his face an'
brushes off the frown,
That little country paper from his
ol' home town,

It tells of all the parties an' the balls
of Pumpkin Row,
'Bout who spent Sunday with his
girl an' how the crops 'll grow,
How it keeps a feller posted 'bout
who's up and who is down,
That little country paper from his
ol' home town.

Now I like to read the dailies an' the
story papers, too,
An' at times the yaller novels an'
some other trash—dont you?
But when I want some reading that
will brush away a frown,
I want that little paper from my ol'
home town,

NOTICE

As I am closing my shop for a time, would ask all persons who have not called for bicycles or other articles left for repair do so at once. After Nov. 10th, storage charges will be added. W. M. White.

AN EVIL HERITAGE

"Is that really you? What are you doing there?" asked Marian, in astonishment.

"Come in here and I will show you. I declare you have forgotten that I am a government official!"

"To be sure. But somehow I never took it to be so serious as this."

And when, within the next minute, Marian stood within the dining-room of Cane Hill, she needed no further proofs of the serious nature of her hostess' work. At the first glance it was evident that the room was three quarters office and only one quarter dining-room, and that whatever meals were eaten there were eaten on sufferance.

"These three books," explained Miss McCrie, "are the ones in use, the latest births, deaths and marriages; the old ones are stored on these shelves by the wall. They have no proper place for them in town, and as I frequently am obliged to look up a date it was considered simplest to leave them in my charge."

"And you are responsible for all these documents?"

"With my head—that is to say, in plain English, with my pay. But here comes Di with the breakfast."

That first day at Cane Hill was spent principally in exploring the rambling old house. About all the surroundings there clung such a dreamy flavor of unreality, that more than once Marian felt inclined to rub her eyes and ask herself whether she was asleep or awake. Cane Hill was one of those houses which, in spite of there being no white figure to turn out on the stroke of midnight, and no one but the bats to utter unearthly shrieks, is nevertheless haunted in the truest sense of the word. Miss McCrie's brothers and sisters, though invisible to the naked eye, did not give the impression of having permanently retired. Their names were to be met with at every turn. There was "Georgie's painting-room," and "Rosie's study," and "Fred's museum," for in the numerous and defunct family most talents had been represented. Here a strip of embroidery with a rusty needle sticking in it, "begun" by Fanny, my dear," and apparently waiting for Fanny to step in and put in the finishing stitches; there "poor Georgie's" palette with the colors still mixed upon it as he had mixed them on his last day, in the entrance "Walter's" overcoat dangling feebly by a half-rotten loop and considered too sacred to be moved, and very obviously too sacred to be dusted; these and a dozen other things proclaimed that the air was thick with the shades of all the defunct McCries. The drawing-room was a large apartment on the first floor, with four windows in a row looking towards the sea, a plank flooring and a rafter ceiling. Walls that had once been painted pale-green and were still called pale-green by Miss McCrie's friends, out of a sort of vague courtesy, although the last vestige of color had crumbled away about two years ago.

Some old photographs in fancy work frames, much bleached and spotted with the heat, were the only ornaments on the walls, while one or two handsome Chippendale tables that had come out from England in the days of the family's prosperity contrasted strangely with their decrepit surroundings. But the glory of the apartment was the funny square piano which stood in the window, and some of whose notes still had a feeble, hoarse tone lingering about them; the rest were dumb. About a dozen ragged songs were cherished in a worm-eaten portfolio. "Nelly's songs," as Miss McCrie explained. "Her voice is quite exquisite; I wish you could hear her!" And Miss McCrie caught her breath and put up her head, almost as though she were listening for some sound.

The hovering shades were everywhere. Once in the course of the day Marian, opening a wrong door by mistake, found herself in Harry's laboratory, as her hostess, following upon her heels, informed her; a small room, now deserted, except for some rusty instruments on the window-sill and a skeleton packed neatly in a box in the corner, for Harry had been the doctor brother.

Even the rickety staircase had its ghost—the faint remains of an old French fresco on the landing, half-way up, the usual foaming mill-stream and pastoral couple in blouses, flirting in an idyllic, but now almost undecipherable, manner. "Georgie's work, of course, for which reason, too, the whitewash brush had not been allowed to swallow up the ruins.

It was not till the cool of the evening that Miss McCrie consented to a moderate stroll being taken. And now Marian was able to satisfy the curiosity awakened by the inviting glimpse she had had that morning. No more perfect and peaceful scene for a leisurely stroll could have been invented than this shallow and brilliantly green valley winding among the hills, unexpectedly deepening and darkening in the shade, and coming to an end at last in a sort of wonderful leafy dell, in the centre of which two enormous old nutmeg trees stood side by side.

When they had sat down at the foot of these trees, Marian drew a deep breath and looked around her. The roof overhead was laden and fragrant with spicy fruit, the perfectly ripe ones being daintily split and showing the bright red network on the kernel, while the ground around the trunks was littered with straw-colored husks.

"When I was five years old I used to cook my doll's dinner with them," remarked Miss McCrie, "and when I was ten years old I used to thread them into necklaces. These husks have been most things in their day, from the coin of the realm to death-dealing bullets. Most of the memories of my life are associated with nutmeg scent. It was here that Harry confided to me his plan of going to England; and it was here, too, that papa broke to us the news of the estate being sold to Tanner & Co., and our all being beggars. Somehow this spot has always been used by the family as a sort of confessional."

There was a pause, during which Marian played with the husks on the ground, but seemed to be thinking of something else.

"Dear me, Miss Berrincott," said Miss McCrie, with a half-laugh, "I declare you look as though you had something on your mind. Have the nutmegs infected you, too?"

It almost seemed as though the nutmegs had infected Marian, for, after a short, sharp struggle she said almost in a whisper:

"Yes, there is something on my mind; it's father. Tanner & Co. want to buy Lot 13, and I do so wish father would sell."

"And won't he?"

Marian shook her head.

"He says that to sell would be to declare himself beaten by Uncle Simon. He is spending every penny he has got on the place, all on the chance of its turning up trumps some day. It's exactly as though a sort of poison has got into his veins."

"I have gone through very much the same thing myself," said Miss McCrie, softly.

"His efforts to make the thing pay are getting wilder and wilder," went on Marian, gaining courage. "Mr. Ritchie has persuaded him to get all the machinery new, and there is some talk now of a portable railway, which is to be shifted about the estate for bringing in the canes. But in order to do all that father would have to sell some more shares, and—and don't laugh at me, please, but really and truly I am beginning to believe in 13 being an unlucky number. At any rate, if Uncle Simon is in any place from where he can look on he ought to be chuckling with delight at the success of his little plan."

Miss McCrie stretched out her hands and laid it upon Marian's.

"I am not going to laugh at you," was all that she said.

There passed some time while the two sat on in the scented shadow, drinking in the peaceful tones that the wind carried up from the village. Miss McCrie had been able to offer her no more substantial comfort than sympathy, and yet Marian's heart was immeasurably lighter since she had spoken. There was something about this intensely energetic and impulsively warm-hearted little lady, cool as a man yet simple as a child, with her strange mixture of mad recklessness and overflowing sympathies, which appealed to Marian's confidence as nothing had ever before appealed.

It was dark even outside the nutmeg dell when Miss McCrie at last made a movement as though to rise.

"Are you quite sure that is all?" she asked, checking herself in the act. "No more secrets for me to-day? Because if you have, we had better have it out in the family confessional."

"But I have no more secrets," said Marian, rising somewhat hastily.

"Quite sure?" Miss McCrie as she put the question could not see Marian's face, but she was thinking of Mr. Hibbert.

"Of course, quite sure," and Marian stepped quickly out of the shade of the nutmeg-tree, giving herself a light shake as she did so, almost as though she were trying to rid herself of some objectionable influence. There could be no doubt certainly that this heavy fragrance had about it something dangerously conducive to confidences.

CHAPTER XXIII.

Marian had been a week at Cane Hill when Miss McCrie met her one morning with a scrap of paper in her hand, and a distressed look on her face.

"I have just got a message from one of the villages down on the coast," she began, in a briskly apologetic tone. "They have accomplished one of the finest muddles it has been my lot to come across since I knew what a register meant; mixed up two babies so hopelessly that there is no chance of my disentangling them by proxy. I must start immediately after luncheon and shall not be back before dark, which means that I must leave you to your own devices the whole of this live-long afternoon."

"You are not exactly very complimentary to me or my devices," said Marian, in some amusement. "Do you not think that my own company ought to be able to drag me through one single afternoon?"

"Yes, to be sure; but how will you amuse yourself? There is the piano, of course, but it has been rather hoarse lately, and you have read most of the books there are. Perhaps you have letters to write?"

"Perhaps. And if not, I am certain to have holes to darn, or buttons to sew on."

"Well, well. I have no choice in the matter," and Miss McCrie gave a sharp little sigh of resignation.

It cost her a real pang to abandon her charge, even for only one afternoon, for Miss McCrie was very intense in everything she did, and within the last week the heart of the wiry little woman had closed pretty completely over the girl whose presence shed so new a light upon her dreary old home. Miss McCrie had visited England in her young days, and her affections still clung to British shores with a regretful tenderness that had something reverential in its nature. Marian embodied for her a hundred thoughts of that far-off country, which to her would ever rank as "home."

Daily strolls up the nutmeg dell had furthered the growth of this apparently so incongruous a friendship. Within the last week Marian had got to look with a sort of affectionate awe on this brisk little scrap of a woman, whose life was so full of tragical reminiscences. She could now read aright the droop at the corners of the tight little mouth, and understood that it could not be otherwise.

It had been a week of eventless restfulness, very conducive to convalescence. The weather had been brilliant, and the atmosphere laden with Messrs. Tanner & Co.'s sugar-making, as indeed even a blind person would have been aware of, owing to a certain jobbery and juicy sound which enlivened the village street, and which any one who has been on a sugar-plantation at this season cannot fail to recognize as an undercurrent of cane-sucking.

Luncheon was hurried on by half-an hour to-day out of consideration for Miss McCrie's business. It had been settled that Marian was to accompany her for the first mile or so, and then return under the charge of the faithful Jeremias.

They had been riding for about half an hour and were engrossed in conversation when Jeremias' voice hailed the ladies from the rear.

"Here we be at Dry River, ma'am; lady do better turn herself back here; Dry River neat over and above too pleasant place to cross."

Miss McCrie pulled up the Mosquito with a jerk, and looked about her.

The road they had been following was at this point cut right across by what appeared to be a very wide and stony track, shelving down from the hill in irregular curves, broken up by deep fissures, and with here and there a clump of dead reeds, rustling in the breeze with a sharp papery sound.

"Jeremias is right. The Dry River is a nasty bit to cross."

"The Dry River?" repeated Marian, staring in some bewilderment. "Is this a river? I thought it was a road, or rather about ten roads run into one."

"It is a river, and if you were to come here after a couple of really wet days, you probably would not recognize the place. The water comes from the hills, and at such a tremendous pace that there is scarcely any guarding against it. My volume of 'Death Registers' could tell you many stories about the place. But duty calls; I must stop chattering now, and be off."

The final word had apparently been spoken when Miss McCrie turned back once more.

"By-the-bye, Miss Berrincott, would it be bothering you very much — in case any papers are brought this afternoon—of course you cannot make the entries, but would you mind taking charge of the papers for me? Only put them in a safe place till I come back, that is positively all."

Marian gave the assurance required and within the next minute had turned the head of her mule back towards Cane Hill, while the Mosquito was prancing gingerly away across the stony bed of the Dry River.

It was still early in the afternoon when Marian reached the house, and even after having submitted herself glove-buttons and the toes and heels of her stockings to a conscientious inspection there yet remained several hours of compleet solitude to be more or less agreeably filled up.

It so happened that there was nothing pressing in the way of letters, the mail having lately gone; so after having tidied up her drawers with a thoroughness which had rarely fallen to their lot, Marian repaired to the drawing-room and tried the piano. Considering that it was only about every third note on the average that had a tone, and that the songs in the portfolio crumbled away into brown flakes between her fingers, it was only natural that she should give up the music as a bad job, within the first quarter of an hour.

Presently Marian began to wander about from room to room in search of entertainment. She had got as far as the third empty room when she heard steps on the gravel outside, and, looking down, caught sight of a black woman approaching the house.

"A paper to be taken charge of," said Marian to herself, with genuine satisfaction. "Here is occupation at last."

Rapidly descending the staircase she entered the dining-room. The black woman was already standing outside the low window and peering into the room. It was a death that had to be registered; and, having taken charge of the slip of paper, on which it was recorded that Juno Queshie had died of old age on the 22nd of that month at Fillagree Village, Marian was on the point of remounting the staircase when another step crunched on the gravel outside.

It seemed that business was going to be brisk this afternoon; would it not therefore simplify matters if she established herself in the dining-room once for all?

Accordingly she sat down at the big table and began turning over the pages of the dark-green books. Although she did not know the people, yet a sort of mild entertainment was to be gained by the mere perusal of the names. Such picturesque designations as, Balbina Cupid, Rawlinson Landseer, or Gloriana Bob could not fail to tickle the fancy very much more than any amount of Joneses, Browns and Robinsons could have done. To look out the funny names was surely as good a way as any other of passing the time. Presently she remembered that the old registers would certainly be a yet more grateful hunting-ground, since the quaint appellations were said to be dying out year by year, and going to the shelf by the fall she fetched another of the big dark-green books.

It had been the death register which Marian had hit upon by chance, and it had been well worth the trouble of fetching, as she accertained to her delight, when on the second page she discovered, a "Shakespeare Wellington" and a "Queen Victoria" recorded side by side.

She had turned over a good many pages more, when in the very thick of the mythological and geographical appellations her eye was all at once caught by her own name, looking among all these Jupiter Sosos and Daniel Liverpools about as incongruous as a correctly cut coat in the midst of a crowd of red and yellow checked shirts.

Berrincott! How, in the name of all the wonders——But already she had remembered about Uncle Simon's first marriage; this probably was the death entry of the "West Indian wife" of whom Bernard had spoken in so off-
ily, and mixed with the gaiety there
hand a manner beside the cemetery, that first morning at Thornton.

'Caroline Berrincott, wife of Simon Berrincott," —yes, that was exactly it. So she was called Caroline, was she? And only twenty-four years old, poor thing! Registers were strange things to Marian, and with a newly awakened interest in this unknown "Aunt Caroline," of whose existence she had never been very distinctly aware, she began more closely to scan the headings of the page before. "Rank or Profession of Husband: Landed Proprietor. Residence at Time of Death: Lot 13. Date of Death: June 20th, 1859."

SUNDAY SCHOOL LESSON

October 22, 1916. Lesson IV.

Paul's Defense before Agrippa.—Acts 26: 1-32.

Commentary.—I. Paul's Jewish principles (vs. 1-11.) 1. Agrippa—This was Herod Agrippa II., the grandson of Herod the Great. He had jurisdiction of the provinces lying north of Palestine and also of Galilee and Pedea, and bore the title of king. He was appointed by the Roman emperor. He was a Jew and sought to secure the favor of the Jewish population of his kingdom. He was at Caesarea at this time as the guest of Festus, the newly appointed governor of Judea. Said unto Paul—When Festus told Agrippa about Paul, the king expressed a desire to hear him, and this occasion gave the opportunity. Agrippa presided at the meeting, and after Festus had introduced Paul to Agrippa, the king gave the apostle the privilege of making his defense. Stretched forth the hand—This act indicated that he was about to speak and that he respectfully asked for the attention of those present. Answered for himself—Agrippa had heard from Festus, and perhaps from others also, about Paul, but now Paul was about to give an account of himself, presenting his case from his own point of view. He had no hesitancy about telling Agrippa what the Lord had done for him and what had come upon him in consequence of his becoming a Christian.

2-11. The apostle was glad to have the privilege of speaking before Herod, for the king was acquainted with the scriptures, and the beliefs and practises of the Jews, and he would be able to understand his argument and position better than one who was a Gentile. Paul was a Jew and belonged to the sect of the Pharisees, who were careful in adhering to Jewish customs. He had been condemned by his people for preaching what they considered a new and strange doctrine, but it was the doctrine of the scriptures, that Christ should appear as the Redeemer of the world; hence Paul was doing nothing contrary to the word of God. He proceeds to relate his experience as a hater of Christianity and shows that he formerly persecuted the followers of Jesus, as the Jews were then doing. He was so zealous for Judaism that he gave himself up to searching out and punishing all whom he could find that were believers in Jesus. Paul's recital of his mad zeal in persecuting the sect of Christians would show his hearers that he was formerly a most hearty exponent of Judaism. His early prejudices were altogether against the course which had led him into conflict with the Jewish leaders. Nothing was farther from his purpose in early life than to become a defender of the people who were later called Christians.

II. His conversation (vs. 12-18.) Paul's statement regarding his early training and his former attitude toward Christianity prepared the way for the next argument in his defense. While he was on one of his tours of persecution, he met Jesus himself. He saw a light from heaven that was brighter than the sun at midday, and he and all that were with him fell to the earth. He heard a voice speaking to him personally and saying, "Saul, Saul, why persecutest thou me? it is hard for thee to kick against the pricks" (v. 14.) In answer to his inquiry the speaker said, "I am Jesus whom thou persecutest." Jesus told him what he should do, and from Acts 9 and 22, we learn the details of the change that came over him. Jesus explained to him why he had appeared to him. It was that he might become an apostle of the Gentiles. He was to declare to them the gospel and "to turn them from darkness to light, and from the power of Satan unto God." The Lord Jesus had arrested a fierce persecutor of his followers and with his co-operation changed him into a most earnest, powerful and tireless advocate of the doctrine he formerly despised.

III. Preaching the gospel (vs. 19-23.) Paul is now coming to a statement of the charges that stood against him. At his conversion he received the vision of what life meant to him and to the world, and he "was not disobedient," but began at once to declare the Messiahship of Jesus and proclaimed a risen Saviour. He preached repentance as a condition of salvation. It was for preaching the great and saving truths of the gospel that the Jews had raised a storm of opposition against him, and were trying to have him put to death. Paul attributed his preservation to the special care of God. He had made it a practise to preach to all with whom he came in contact the great truths of Christianity, basing all his utterances upon the scriptures. He preached Christ, his sufferings, his death, and his resurrection because "the prophets and Moses" had foretold them. He had met the Christ and had had a vision of him, and he became henceforward a preacher of his gospel. His vision had so changed his outlook that he saw nothing to compare with Jesus Christ and the salvation he had brought to Jew and Gentile alike.

IV. Appeal to Agrippa (vs. 24-32). 24. Festus said with a loud voice—The procurator of Judea was impressed with Paul's earnestness, but thought he was talking foolishness, and decided that it was time to stop him. Therefore with much earnestness he addressed the prisoner. Much learning doth make thee mad—Festus had just declared that Paul was beside himself, and in this sentence states the cause of what he thought was insanity. The apostle had quoted from the scriptures, thus showing his familiarity with them, and Festus hastily formed the conclusion that he was beside himself from too much study. It is not uncommon in modern times for the world to accuse Christians of being beside themselves. 25. Words of truth and soberness—Festus was a pagan, and consequently the gospel seemed to him an idle tale, but Paul assured him that what he had been saying was true and weighty. 26. The king knoweth of these things—Paul skilfully turned to Agrippa for confirmation of what he had said, for he, being a Jew, would be acquainted with the scriptures and would know about the coming of Christ and the spread of the gospel. This thing was not done in a corner—Of the truth of this we can be sure from the excitement caused both in the religious and political world by the work of Jesus during his life, by the efforts put forth to stop his teaching, which culminated in a trial in which both Jewish and Roman magistrates were consulted, and by the exclamation of the Pharisees (John 12: 19). "The world is gone after him." and the declaration (Acts 17: 6). "These that have turned the world upside down."—Cam. Bib. 27. Believest thou the prophets—Herod was a Jew and as such would be supposed to accept the scriptures. Paul instead to answer the question himself. Herod desired to stand well with the Jews, and this fact would lead him to believe the prophets, at least nominally. Whatever was the nature of Herod's belief, it is evident that it did not affect his practices so as to make him a consistent Jew.

28. Almost thou persuadest me to be a Christian—Many modern commentators hold that Agrippa spoke derisively to Paul of his efforts to make him one of the despised sect. The language affords some ground for that conclusion, but what Paul says in the next verse shows that he considered that Agrippa spoke with seriousness. Chrysostom and many able and pious writers since his day hold to the idea that Agrippa was in reality almost persuaded to become a Christian. This view seems to be well founded. 29. I would to God, etc.—Paul was Christ's ambassador before the officials who were listening to him. He was intensely in earnest to have them become Christians. He would desire for them what the gospel had done for him, only that they should not be prisoners for the gospel's sake, as he was. 30. The king rose up—The hearing was over and the time had come for deliberation. 31. Nothing worthy of death or of bonds—Both Festus and Agrippa were struck by the sincerity and authority of the apostle, and were agreed that he was an innocent man. 32. Might have been set at liberty — There were no just grounds for holding Paul as a prisoner. He appealed to Caesar because Festus spoke of returning him to Jerusalem to be tried again there. The apostle chose to appear before Caesar rather than to put himself in the hands of the bloodthirsty Jews. Having appealed to Caesar he could not be set free by Festus.

Questions.—Who was the Agrippa of this lesson? Before whom did Paul speak? What did he say of Agrippa's knowledge? What did Paul say of his own early life? What change took place in him? Why did he become a preacher? Why was he a prisoner? How did his address affect Festus? How was Agrippa affected? What was Agrippa's opinion of Paul? What prevented Paul's being set at liberty? What was the wish of the Jews regarding Paul?

PRACTICAL SURVEY.

Topic. Paul's life-story.

I. Defined the way of salvation.

II. An object-lessen to sinners.

1. Defined the way of salvation. Paul exhibited remarkable skill in the adaptation of his defences before the different rulers. The best defence he could make in his interview with Agrippa was an appeal to the knowledge and conscience of his countryman. By a system of gradual approaches the citadel of Agrippa's heart was besieged. Directness, gentleness, fervor and masterly skill characterized his presentation of the truth. Paul was uniformly calm, courteous, conciliatory, quick to see and prompt to seize every favorable opportunity, adapting himself to the different circumstances in which he was placed. He maintained his own cause with consummate skill, with the boldness of a pure conscience and the energy of an invincible courage. A pure and fervent desire filled his soul that all whom he could in any way affect might be blessed by the ennobling truth which the risen Saviour had revealed to him. Though speaking of his own experience Paul was all the while preaching the whole gospel of salvation. Paul knew that he had met with Jesus, that he was turned back from darkness to light, from Pharisaism to Chrstianity, that he received a world-wide mission and that he was obedient to the heavenly call. The heavenly vision marked the decisive hour on which his future depended. Obedience or disobedience to that vision made all the difference between success and failure, between peace and unrest of soul, between life and death to Paul. The heavenly light brought a revelation of self, of Christ, of duty. It was the illumination of the Holy Spirit which awakened his soul, subdued his will, renewed his nature and transformed his life, his plans and his hopes. Repentance involved the reversal of the old life, old character, old principles of action. Faith included trust in Christ's teaching, in his example, in his loving, sympathetic guidance, in all his providences, in the worthiness of his service and in his power to save. Paul began at once to carry out his Master's will, to follow his guiding hand and to witness without fear to all. He rendered prompt attention and practical obedience. If the Jews had not yielded to blinding prejudice, they might have found in that Christian Pharisee the conservator of all the essentials of Judaism. Paul embraced Christianity as the natural and proper outcome of true Pharisaism. The change effected in Paul and the commission he received were manifestly divine.

II. An object lesson to sinners. The blindness of sin in Festus looked at the wisdom of God and mistook it for madness. For Paul to have felt the greatness of the gospel facts and issues, and to have suppressed them would have been madness. He was not abashed by the sudden outbreak of Festus, nor did he give way to unsuitable or injudicious resentment. He replied calmly and with dignity to the charge of the Roman governor. He respectfully denied the charge and proceeded to describe the character of his teaching. He turned appealingly from Festus to Agrippa. Clear, straightforward, manly and consistent was the tenor of his address. His persuasion lay mainly in his personal testimony of the power of grace in his own soul. He gave his experience as a guide and warning to others. If Festus and Agrippa had known through what Paul had passed since his journey to Damascus, they would have better understood his acknowledgment of God's help. Apparently it did not occur to them that the hour spent in hearing Paul would be one linked with their destiny. Festus charged Paul with madness. Agrippa admitted the persuasiveness of Paul's preaching. To the Gentile the gospel was foolishness, to the apostate Jew it was the voice of God to his slumbering conscience. As offenders against God, Paul was trying them at the bar of gospel truth. They were examples of souls close to the light, yet passing into darkness. Agrippa closed the interview with a remark intended to be pleasing to the speaker and went his way. He missed the blessing which full persuasion would have brought him. The closing words of Paul revealed the triumph of God's grace in an irresistible argument giving expression to pathetic affection.

T. R. A.

My piece is gone, my heart is heavy.
—Goethe.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

THE BRIGHT SIDE.

Why not expect the best?
Why not dread the coming years?
And why not welcome the unseen
With smiles, instead of tears?
To-morrow's sun may shine for you,
Its friendships make you glad;
Why not make ready for the joy,
And not expect the sad?

Why not believe the best?
Why be so swift to blame?
Why let a mist of bitterness
Gather around a name?
Why should not you be advocate
In the cold court of men,
And plead a brother's, sister's cause,
So wak'ning trust again?

BOUGHT WITH A PRICE.

Behold the Lamb of God, which taketh away the sin of the world. The blood of the Lamb. The precious blood of Christ, as of a lamb without blemish and without spot.

Without shedding of blood is no remission. The blood of Jesus Christ his Son cleanseth us from all sin.

By his own blood he entered in once into the holy place, having obtained eternal redemption for us. Having therefore, brethren, boldness to enter into the holiest by the blood of Jesus, by a new and living way, which he hath consecrated for us, through the veil, that is to say, his flesh; let us draw near with a true heart in full assurance of faith.

Ye are bought with a price: therefore glorify God in your body, and in your spirit, which are God's.

MARKS.

Birth marks, trade marks, sacred marks; marks of royalty, dignity, degradation, of ownership, scholarship, friendship. The Oriental buys sheep; they go through a narrow passage in single file; he holds a mop with some paint on it; he lets it fall on each that is going under the rod; he marks them for his own.

The destroying angel passes over; he keeps a sharp look-out for the marks on the door post. "When I see the blood I will pass over you." Oh! distinguishing grace!

The first born of Eve had a mark. Angel—The Lord thy God and mine commandeth me to set His seal on Cain.

Cain—What wouldst thou?

Angel—To mark upon him exemption from such as thou hast done.

Cain—It burns my brow, but that is nought to the fire that burns within.

But God has His marks of approval and sanction. He marks His people on their forehead. The forehead is the mark of a man. No other creature bears this smooth-domed architrave. Birds lack the forehead altogether, and beasts have heavy frontals, but not the arched dome on which a name may be written. The humblest human brow is far removed from that of the noblest ape; on an ape's brow nothing can be written, but on the man's is at least this: That he is a man.

The darkest hour of the world is that seamed, blighted, blasted front of the imperial being. "How art thou fallen from heaven, O Lucifer, son of the morning."

Let use be careful that we do not disfigure the body, for it is made in the image of God. There was an old tenor in the pagan world; it has been transferred to the Christian Church. Monks and bishops have been guilty of self-torture. What do you think of a bracelet on the arm, worn secretly and not discovered till after death. When the wearer wanted to chastise his soul, he would nip it and produce fresh wounds for the good of his spirit. Think it well over, and ask, can the inner man be benefited by such ministry?

"Who is to be the coming saint? Is he to be in the likeness of the past; the pale ascetic, nourished in the mediaeval creed, fleeing this world as evil, despising his humanness as though it were opposed to divineness, scorning the present and exalting the future—as though this piece of eternity were less valuable than any other piece of eternity—is he to be this kind of man? That ideal is passing; a new one is already taking its place; a new human perfection in which holiness is constituted as wholeness, which accepts the world as good, and this moment as good, and labors to make the best of both; which takes the whole man into consideration his body for strength and beauty, his mind for widest knowledge, his soul for noblest emotions. That is a sample of what is coming in man's most intimate life."

Paul says, "I bear in my body the marks of the Lord Jesus," and these marks shall shine like stars for ever.

H. T. Miller.

French Ways In the War

(By Herbert Corey.)

"War is a trade," said Sweeney, "and it is full of tricks."

Charles Sweeney is the sort of soldier of fortune one reads of in books. He fights because he likes to fight. He has heased wars all over the world. He is a West Pointer, though certain differences as to the ethics of hazing kept him from graduating. When the war broke out he joined the Foreign Legion. He is the only American to have won a commission among the foot soldiers. The surgeons said the wound he received at Champagne would kill him, but he is back at the front.

"In the French army," said Sweeney, "we do not believe in sniping."

It appears that sniping is primarily the Saxon's game. Both Briton and German turn out some extraordinarily good shots. The Frenchman does not shine at sniping, partly because he did not run heavily to outdoor sports before the war, and partly because of the anti-sniping theory that governs his officers.

"Suppose that you do kill a few men by sniping?" asked Sweeney. "That won't help you win the war."

The French prefer to let the Germans ramble about behind their lines, believing themselves unobserved. By and by the watchers see that Germans disappear in a hole in the ground at the angle of a certain hill, or that other Germans emerge from that hole. It is just like watching wild animals play about their dens. Sweeney said. When the hole is definitely located—when the observer thinks the hole is sufficiently full—when an apparent immunity has baited the trap—

"The seventy-fives are turned on," said Sweeney. "One round of the battery—bam, bam, bam, bam—good-bye Boche."

The modern rifle, he thinks, is not well adapted to modern conditions of warfare. There is no probability that on the western front, at least, the fight will ever return to the old wars of movement. No matter which side breaks the line in the end, the defeated side will fall back slowly, from trench to trench. Both sides have scored the whole countryside in the rear of their frontal positions with these trenhes of prevention. For the same reason it is difficult for him to see an early end to the war. But that is not speaking of rifles.

"The rifle with a flat trajectory of 400 yards would be the best for present conditions," said he. "You never get a chance to shoot at a man at a greater distance. You likely never will have. The rifle of an extremely long range is a misfiet."

FRENCH BULLET THE BEST.

It is the knockout blow at short range that is desired. This ha sbeen fairly well secured by the French bullet, in which the centre of gravity is so far in the rear of the centre of length that the bullet keyholes when it strikes a bone. It is entirely within the limits set by the Geneva convention, but it disables as the other bullets do not.

"Any bullet will smash a bone that contains marrow," said Lieutenant Sweeney, "but the German bullet will merely drill a hole through a solid bone. The French bullet is infinitely more effective. A wounded man is more trouble than a dead one."

"Are explosive bullets ever used?"

"The Germans use them. I know of instances in which they have been used. They may not be often used, but they are used sufficiently often that we can tell the difference in sound they make as they go over our heads."

This statement is not prompted by a venomous hatred of the foe. Lieut. Sweeney is extremely fair in his estimate of German fighting qualities.

"They are as brave as any men," said he. "Their differences from the French and English are those of temperament and training and not of courage. I do not believe they could act semi-independently as our men do on occasion. But no other troops could beat them in mass formation against concealed batteries. Do not think this is an idle waste of life. Occasions arise when the mass formation is the cheapest way of gaining a position."

"It has been stated that Germans do not like the bayonets."

"They did at first," said he. "but lately they have turned from it. That is no reproach to them. It is in German military history to avoid cold steel, as it is in French history to rely on it."

STEEL SHIELDS FAIL.

At one time the Germans tried to shield their machine guns with steel turrets, monitor fashion, but that seems to have been given up. It was too easy for the artillery to get the range, and one shell would blow such a turret to kingdom come. It was the same way with the steel shields, which were sent to the front for the use of the bombardiers. The plan was for the bombardiers to advance slowly behind them, half a dozen at a time.

"A flivver," said Sweeney. "In the first place they were too slow, and heavy to handle, and in the second the seventy-fives could find them too easily, and in the third and last place we found that by reversing the bullets in our guns they penetrated the shield better than if they were sent pointed end first. That, of course, is at very close range. The shields went out of circulation at once."

He does not agree at all with the estimate expressed by others that the 105 is the best gun in the German box. He thinks its decreased rate of speed, in comparison to the weight of the projectile, makes it inferior to the French 75. None of the small guns will beat down properly-made bomb-proofs, said he. The Germans had an unquestioned superiority in heavy guns at the beginning of the war. He naturally declined to discuss the French position in this matter.

"The grenade," said Lieutenant Sweeney, "is the best weapon of the war. Our men habitually go forward in the charge now armed only with an armful of grenades and a long knife. Some of them carry the rifle, of course, and when the bombardier has exhausted his supply of bombs he never has any difficulty in finding a gun. There has been some discussion on taking the rifle entirely away from some of the men, even in defensive work. The advisability is rather fully recognized, I believe; it is only a question of the proper proportion. Some officers advocate arming three-fourths of the men with grenades only."

VALUE OF THE BAYONET.

This has not been decided on, but as the men are never permitted to carry a loaded rifle in a charge, for fear of a stray shot proving dangerous to the attackers, it is likely that the use of the grenade will be enlarged. Men armed with the rifle are tempted to stop on the embankment of an enemy trench and load and fire. While so doing they make excellent marks.

"They are ordered never to jump into a trench," said he, "because if they do the attack stops right there. The thing to do is to run on and try to take the next trench. A grenade is handy for this sort of work. It is easy to throw it into a filled trench. You don't have to stop and take aim."

Lieutenant Sweeney was asked to explain why so few bayonet wounds are seen in this war.

"The man wounded with the French bayonet is usually dead," was the explanation. "It has four angles, and it holds so tight that often you must put your foot on the other man before you can pull it out. The wound closes after it and he bleeds internally. It is the best bayonet in the world."

"Do the French soldiers like to use it?"

"You ought to see them," Sweeney said.

A COSTLY PRECAUTION.

(New York Times)

The nervous man had an unconquerable dread of fire. Even when he went holiday-making he carried a rope with a hook on the end to facilitate his escape in case of fire. In one of his Summer trips the proprietor of a small country hotel happened to come into the nervous guest's berdoom just as he was unpacking. The proprieter's eyes lighted on the rope.

"What is that?" he asked suspiciously.

"That is a fire escape," the nervous man said. "I always have it with me so that in case of fire I can let myself down from the window."

The landlord rubbed his chin meditatively.

"That is not a bad idea," he said at length, "but guests with fire escapes pay in advance at this hotel."

A MIRACULOUS CURE OF CHOLERA INFANTUM

By DR. FOWLER'S EXTRACT of WILD STRAWBERRY.

Cholera Infantum is one of the most common summer complaints of infants, and many die who could be saved if properly looked after on the first sign of the trouble.

It begins with a profuse diarrhoea, very often accompanied by vomiting, and the matter ejected from the stomach has a bilious appearance. The child rapidly loses flesh and becomes weak and languid.

On the first sign of cholera infantum Dr. Fowler's Extract of Wild Strawberry should be administered, and thus check the diarrhoea before it becomes serious.

"Dr. Fowler's" has been on the market for the past seventy years, so you are not experimenting with some new and untried remedy when you use it, but be sure and get "Dr. Fowler's" when you ask for it.

Mrs. B. A. Cirwell, Rossway, N.S., writes: "I can recommend Dr. Fowler's Extract of Wild Strawberry most highly. A friend of mine had a little daughter who was ill with cholera infantum, and was given up by the doctors. The little one's mother asked me to come in and see the child. I told her I had a bottle of "Dr. Fowler's," and asked her if she would try it. When the bottle was half used the child was well. This cure was a miraculous one, for I thought the child was dying at the time."

The genuine Dr. Fowler's Extract of Wild Strawberry is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

Bradstreet's Trade Review.

TORONTO—Mercantile is fairly good and merchants agree in asserting that trade is considerably ahead of that of last year. Even in the absence of war orders, one prominent drygoods man said that the week's trade was substantially ahead of that of last year when Government orders were being turned out as rapidly as the goods could be secured. Business men generally have no cause for complaint. In the hardware trade, orders in connection with munition firms are proving the greatest source of activity. Staples are being sold better than a couple of months ago, and there is a noticeable difference between last week's trade and that of August. The grocery trade is reported as being fairly active. General buying for the Christmas trade is beginning.

MONTREAL.—Steady demand for dairy products from Great Britain, and a consequent strengthening of prices for their product than ever before. Drygoods, millinery, boots and shoes and hardware are showing satisfactory degrees of activity. In drygoods lines especially there is a brisk seasonable trade with deliveries being hindered by both labor shortage and a scarcity of raw materials. Grocery lines are fairly active. Collections are reported to be good.

OTTAWA.—Trade in the eastern sections of the province is still maintaining a healthy tone. Country business is reported to be good by practically all local wholesale houses. Drygoods, groceries and boots and shoes are moving out in good quantities, and payments are generally good.

HAMILTON.—An active trade is passing. Labor is scarce, especially in the steel industry. Drygoods, millinery, and boots and shoes, each show activity, and there is no ground for complaint in any line of business. Farmers are getting unusually high prices for their commodities, and this is inducing an active country trade.

LONDON.—The autumn trade is quite satisfactory and measures up to the expectations of those who looked for a big increase in business over the corresponding period of 1915. Labor is scarce, and most employees declare that help is urgently needed. Money is quite plentiful, and payments are very fair.

WINNIPEG.—Wheat has gone to higher prices than have been known for years. The grain market is still strong. Business generally is good and money is fairly plentiful.

CALGARY.—Colder weather has impeded harvesting, but a warmer spell will aid Alberta farmers to thresh a crop which is the best in the history of the province. Some record acreage yields are reported in different parts of the province. General business is quite active, and little is left to be desired in clothing, boots and shoes and grocery lines.

VANCOUVER.—The general tone of business throughout the province is good. The lumber and pulp mills are doing an extensive business, and new mills are projected. While the salmon run on the Fraser river had been disappointing, better reports are received from the northern part of the province and the season's catch is expected to measure up better than was anticipated a month ago. Mercantile business is generally good.

QUEBEC.—Business conditions are much about the same as preceding weeks. Drygoods report orders to hand are more of a sorting up nature, sales to date exceed this time a year ago, and in spite of increased prices the outlook is bright. Groceries and provisions are active, owing to shipments to coast points, other trades are normal. City and country collections are fairly satisfactory.

SLIGHTLY TWISTED.

(Rochester Times)

A girl was required to write a brief sketch of Queen Elizabeth. Her paper contained this sentence:

"Elizabeth was so dishonest that she stole her soldiers' food."

The teacher was puzzled and called the girl.

"Where did you get that notion?"

"Why, that's what it says in the history."

The book was sent for and the passage was found. It read:

"Elizabeth was so parsimonious that she even pinched her soldiers' rations."

Mrs. Gnaggs—I suppose the reason Mr. Singleton has never barried is because he is so tongue-tied. Mr. Gnaggs—He should worry. He has a free feet, hasn't he?

The lad who tkes the palm in political advertising is James Dugan, of Springfield, Ill., who runs for the office of coroner with the ad. "Here's hoping that you never will need me, but if you do I will be there."—Denver Rocky Mountain News.

Had Pimples and Festering Sores

ON HER FACE.

When the blood gets bad, boils, pimples and festering sores are sure to break out on the face and body. To get rid of them the blood should be cleansed by Burdock Blood Bitters.

Mrs. Charles Jewell, Orrville, Ont., writes: "I feel it my duty to write and tell you about what Burdock Blood Bitters has done for me. I was so pale I had no color at all. I also had pimples and festering sores on my face, and my head ached nearly all the time. I had been reading in the paper, and saw that Burdock Blood Bitters was good for such troubles so I tried a bottle and before it was half done I felt fine, and when the bottle was finished I felt like a new woman. I tell all my friends about it, and advise everyone suffering from such trouble to use B.B.B."

There is only one B.B.B. That is the genuine, manufactured by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

ADVANTAGE OF FALL PLOWING

Fall plowing is valuable in many ways, and is labor profitably spent. One of the advantages is that the land can be placed in first-class condition early in spring with much less labor than otherwise. It may be safely said that in nine years out of ten, crops planted early produce the most satisfactory yields. When plowing is delayed until spring there is very often difficulty in preparing a proper seed bed, and instead of being busy fitting his land for planting, the farmer is still plowing.

Soils that are turned up and exposed to the frosts of winter penetrate to a considerable depth; unplowed soils are not penetrated beyond half the distance by the frost as are those recently plowed.

Especially in clay soil, it is important to loosen the earth below the depth to which the plow goes. With ground plowed thoroughly before frost, the soil will, after the arrival of freezing weather, be found frozen often to the depth of 20 inches. This means that every particle to that depth is moved to a small extent. The expansion of the particles of moisture pushes apart and breaks up the most retentive soil.

It has been demonstrated that when clay soil has been well drained it is made friable to a considerable depth, and upon the arrival of spring the frost leaves the ground, and in consequence the soil becomes so loose that air can penetrate to a great depth, and chemical action be prepared for.

Another important consideration is the destruction of insects. Land that is plowed in the fall will be free of cutworms and other insects which are injurious to young and tender plants in the spring.

Some of the insects strive to reach a point below the frost line. Fall plowing turns up these insects, and, though they still are covered by the soil, the ground is so loose about them that they freeze several times before spring and are thus killed. This, however, will not entirely destroy all the cutworms, but it will lessen their number, and consequently lessen the damage done to plants.

In the case of certain insects which pass the immature stages in the ground, the larvae may be so deeply buried by plowing that they are unable to reach the surface.

In order that there may be a free drainage the furrows should run directly up and down hill by the shortest slope; if plowed across, the furrows will become filled and the land soaked with water. It may be well to shovel the loose earth out of the dead furrows for the same purpose. If the ground is wet or undrained, plow narrow lands.

FARM NEWS AND VIEWS.

After weeks of severe drought and intense heat, pastures are so dry that they will furnish no pasturage until late in the fall, even with the aid of the usual late summer and early fall rains. The man who has much live stock on hand will find it necessary to provide temporary fall and winter pasture. For this purpose there is no better crop than rye. Rye may be seeded any time during September or October on stubble land, or after corn has been cut for silage or fodder. A bushel and a half is enough for early sowing, but two bushels should be used later. Small fields of such cover crops furnish a great deal of pasture at little expense, and leave the soil in better condition than if they had not been grown. Vetch is a legume which adds nitrogen, and the fine roots of rye protect the soil against washing, which is more serious between growing seasons than most people realize. But vetch should not be sown early in September for good results. Next spring the rye may be turned under as a grain manuring crop before corn planting time.

As a succulent feed for dairy cows, young stock and hogs, a 20-ton crop of rutabagas is equivalent to a 12-ton crop of corn. With clover hay and oats they make a balanced ration. Twenty pounds of clover, fifty pounds of rutabagas and six pounds of oats make an ample dairy ration for a cow giving 30 pounds of milk containing 4 per cent. of butter fat. From 15 to 20 tons of roots an acre is the average yield, on unmanured land. So an acre yield on the average will provide 50 pounds daily to each of three cows for seven or eight months. The roots may be stored in a cellar or root house, which saves the expense of a silo.

Dean Alfred Vivian, of the College of Agriculture, Ohio State University, Columbus, points out that a manure shed on every farm would prevent the manure losses to a great extent. Such a structure need only have a concrete floor and a covering which will prevent rains from reaching the manure as it does in the barnyard. It should be connected with the stables by a litter carrier. When the manure cannot be hauled directly to the fields its value will remain the same by storing. Manure handled in this manner has returned as high as $5 per ton in increased crop yields.

Neither manure nor any combination of fertilizers has been able to produce a full yield of wheat without the help of lime, said Director C. E. Thorne regarding the value of lime on soil similar to that of the Ohio Experiment Station. This year manured land yielded 21 to 26 per cent. more wheat where lime was applied. Another plot fertilized with nitrate of soda, acid phosphate and muriate of potash gave 21 per cent. more wheat where limed than on unlimed soil similarly fertilized. The yield on a plot receiving complete fertilizer with nitrogen in sulphate of ammonia gave 115 per cent. increase in crop by application of lime.

It is an opportune time to think about putting away well-selected seed potatoes for next season. It is an excellent practice to dig a good many hills separately with a hand fork and to select seed from only the best-yielding hills. Such a practice will lead to the improvement of potato strains, and will largely prevent the "running out" of varieties. Whatever attention is given to hill selection of seed potatoes must obviously be given at the time of digging. If this selection is not resorted to, it will be found to be profitable at least to put aside a sufficient quantity of the best-typed, sizeable tubers for seed. The selection of such tubers even from the bulk seed, will insure a harvest of better yield and type than if culls are planted.

In preparing to fill the silo or build a silo, one should remember that an air-tight condition is necessary, and unless the hoops are kept tight and coat of paint applied, considerable silage will be spoiled. A cubic foot of silage weighs about 40 pounds. A 1,000 pound steer will eat about a cubic foot per day. This is a good basis on which to calculate the size of silo to build.

Green weeds and summer grasses exhaust moisture from the orchard soil in a dry time; a mulch on the ground saves soil moisture.

Every man to his trade. Any fellow can pick a quarrel, but it takes a burglar to pick a lock.

You can't take something from nothing, but many a man is thrown on his own resources who hasn't any.

INDUSTRIAL USES OF HYDRO-ELECTRIC POWER

(By J. B. Challies, Superintendent, Dominion Water Power Branch.)

At the present time the great steel mills of this continent are absolutely dependent upon the electric furnace for the production of alloys. The automobile manufacturer is dependent upon another electric furnace production, aluminium, for car bodies. The manufacturer of steel products needs these materials for making tools, and countless factories require abrasives which cannot now be imported, and which are now being produced in the United States, at any rate, only by electric processes. Without acetylene gas and graphite, and other electric products, many existing industries would be absolutely crippled.

So far as the products of electro-chemistry are concerned, it is found that the surgeon and the doctor look to electric plants for chloroform and disinfectants; the cotton and the paper manufacturer need the bleaches produced by electricity; the user of soap patronizes the electro-chemical establishment, as does every user of matches. Gold and silver mining of the west requires electric products to assure a profit, and it is only lately that the United States, cut off from its supply of German dyes, has found itself dependent upon electric products to supply the deficiency, in part at any rate.

These are but a few of the industries dependent upon cheap electric power. The further development in either Canada or the United States, or the inauguration of such processes in Canada, is very largely, if not altogether dependent upon cheap available, dependable power. The source of such power is admittedly, for a very large portion of our country, water-power. The development of water-power in making available a supply of cheap hydro-electric energy in various parts of the Dominion, would probably result in the reduction of the cost to the consumers of countless articles of every-day use, which, to the man on the street, are in no way associated with hydro-electric development.

To be more specific, the manufacture of steel is one of the greatest of the United States industries, and is fast becoming a very important one for Canada. To-day, electrically produced ferro-silicon is used as an alloy by most steel manufacturers, with the result that the Bessemer process is fast becoming obsolete. The essential element in the manufacture of armor plate and armor-piercing projectiles, is introduced into steel by the alloy, ferro-chromium, strictly [illegible].

Ferro-chrome, another product of the electric furnace, has made possible the manufacture of high-speed tools, which in turn have tripled the capacity of our machine shops and enhanced the efficiency of our mechanics. It has cut to one-third the capital invested in tools to accomplish a given volume of work.

In the absence of chromium, tungsten, vanadium and molybdenum, all alloys made by electrical processes, the builders of American battleships and other weapons of national defence, and a large portion of our Canadian steel and metal-working industries and other industries, would be in the condition of twenty years ago. The electrical industry itself is largely dependent upon silicon steel, a product that does not age and does not wear.

The development of aeroplanes also calls for aluminum, and only with the abundant production of cheap electric energy from waterpower will the price of aluminum kitchen [illegible] within the reach of every household.

At the outbreak of the war, we were cut off from the supply of Greek and Turkish emery. To-day the metal-working industries of this country are dependent almost entirely upon electric furnace abrasives, carborundum and alundum. The manufacturers of agricultural machinery, locomotive, firearms, milling machinery, automobiles, and countless other metal products must have these abrasives and they can now be made only where waterpower is developed cheaply.

The electric furnace also turns out calcium carbide, the only source of acetylene, which is being so extensively used in Canada. The oxy-acetylene flame has become of intense value in the welding of metals and the cutting of steel. The same calcium carbide is the important factor in the fixation of atmospheric nitrogen, and is the source of supply upon which we may have to rely for nitric acid and nitrates employed in making munitions of war and fertilizers.

All the artificial graphite used in the world to-day is produced at Niagara Falls, by cheap waterpower. Its uses are manifold. Practically the whole supply of abrasives on this continent is from Niagara.

Considering the products of electro-chemistry alone, chlorine stands out as of first importance. The sterilization of water supplied of countless cities has been made possible by the use of bleaching powder or hypochlorite, and in communities where this is used extensively, typhoid has been largely eliminated. The armies of Europe use chlorine to avert typhoid and other chlorine products, including chloroform, are used surgically, both as anesthetics and antiseptics. This same chlorine, or bleach, makes possible the manufacture of white cotton goods and white writing paper. Other products of chlorine, produced electrically, entered into manufacture of soap. Even into fire extinguishers goes this products of cheap electricity.

To meet the shortage in coal-tar dyes, by the combination of chlorine with coal tar benzol and toluol, there is now beginning to be produced quantities of these necessary intermediates formerly made and exported from Germany.

Metallic sodium, also a product of electricity, is the basis for sodium peroxide which is used in generating oxygen for hospitals, for laboratories, and for submarines and mine-rescue apparatus. It also enters into the manufacture of hydrogen peroxide. Without sodium cyanide, many gold and silver mines could not possibly operate at a profit.

There are but a few of the products of every day use which will largely depend upon water-power. Many of these, a few ago, had no known value. What other products remain to be developed with the growth of electricity, no one can predict.

There can be no question regarding the fundamental and essential relation of water-power to the economic and industrial situation in Canada.

SCIENCE NOTES.

It is said that one-fourth of the so-called germicides are useless.

Women are taking a rapidly-increasing part in the medical profession.

A New York woman is the inventor of many new surgical instruments.

The first European nation to adopt the metric system of weights and measures was France. This was in 1790, and was followed by Holland in 1816, by Belgium in 1820 and by Sweden in 1889.

One-half of the 12,000 fires which took place in New York city last year were traceable to carelessness.

The loss by hog cholera last season alone in the United States was $100,000,000.

The verdict comes from England that women are poor "drummers" and their number is decreasing.

On the western wheat ranches five meals a day are offered as inducements for harvest hands.

In every 1,000 marriages solemnized in Great Britain 21 are between first cousins. Among the nobility the rate is much higher, amounting to 45 in 1,000.

Washington stands first in lumber production, with Louisiana second.

A bee will visit from 80 to 100 heads of clover before getting a single load of honey.

At the last computation (1910) there were 4,003,844 work people in the State of New York, 983,686 of them females.

The State of Washington shows the smallest death rate of any of the United States.

Generally speaking, the New England States have the largest death rate, but in recent years the greatest improvement has been shown in this section.

Oil lamps lighted the London streets in 1681 and onward, while gas came into use just over 100 years ago.

Great Britain in one year spends nearly $150,000,000 on tobacco.

Boston and New York talk over the telephone 600 times each day.

The population of Long Island is more than that of the States of New Hampshire, Vermont, Montana, Utah, Idaho, Oregon, Delaware, Nevada and Wyoming.

On a test, a bee was found competent to pull a weight 300 times greater than its own.

The use of red lead and white lead are prohibited in France by a regulation which was enacted some time ago. The latter will be replaced by zinc, which offers an excellent substitute, and oxide of iron will probably be used instead of red lead, although it does not answer the purpose so satisfactorily. Graphite and linseed oil make an excellent composition for protecting iron work. If we were dependent on the natural product the graphite would not be available for this purpose, because of its insufficiency; but it is now produced in great quantities by the electric furnace.

In the manufacture of machinery abroad, the worm gear is made use of to a great extent, but on this side of the world it has not achieved any great popularity; but there has been noted in the United States a tendency to make a compromise between the noisy bevel gear and the worm gear, and it is known as the "skew bevel" gear. It differs from the usual bevel gear in that the teeth are not straight and placed at right angles to the centre, but are slightly curved. The result is that whatever clash there may be in a bevel gear is eliminated, the teeth rather sliding together as they do in a worm. It is further pointed out that the skew gear reduces the backlash to the minimum.

ZAM-BUK

Purely Herbal—No poisonous coloring matter.
Antiseptic—Stops blood-poisoning, festering, etc.
Soothing—Ends quickly the pain and smarting.
Heals all sores.
50c. Box. All Druggists and Stores

No More Corns

Cure Guaranteed

Never known to fail; acts without pain in 24 hours. Is soothing, healing; takes the sting right out. No remedy so quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c per bottle.

COLONY HOMES

The houses which the C.P.R. is building in the west for the returned soldiers will cost them about $1,000 each, with out-offices. They will consist of four rooms—each two bedrooms, dining room and kitchen. Each farm will consist of 160 acres and there will be no additional acres which may be availed of in the course of time, and as the settler concludes that he can work it. The C. P. R. has several designs for homes which will be submitted to the intending settlers. These offer a variety of design to suit different tastes and different pockets. It may be said. The settler can choose a house which will cost him $2,000, but the payments will be made exceedingly easy. In all there are probably [illegible] acres of land held by speculators in the West; but, apart from that, there are literally hundreds of millions of acres of cultivable land lying idle over the West—not close to the tracks, of course, but good land which many have longed for so ardently that they have sat on the steps of the land office all night to be the first in the morning to get their application in. The C.P.R. is going on on its own account with the colony homes; but it expects that the Government will shortly outline a plan of a comprehensive nature which can be generally applied to the situation.

CHARGE OF THE GUARDS

Philip Gibbs, the English war correspondent, tells of the Guards' charge in the Somme battle:

I must tell a little more in detail the story of the Guards in this battle. The Guards had their full share of fighting and of difficult fighting, with strong forces against them. They knew that would be so before they went into the battle and yet they awaited the hour of attack with strong hearts, quite sure of their courage, proud of their name, full of trust in their officers, and eager to give a smashing blow at the Germans. They went away as one might imagine the knights and yeomen of England at Agincourt. For the first time in history the Coldstreamers, three battalions of them, charged in line, solid waves of men. Behind them were the Grenadiers, and again behind those were the Irish.

They had gone not more than two hundred yards before they came under an enfilade fire of massed machine guns. The noise of this fire was so loud and savage that although hundreds of guns were firing, not a shot could be heard. It was just a stabbing, staccato hammering of German maxims.

Men fell, but the lines were not broken. Gaps were made in the ranks, but they closed up. The wounded did not call for help, but cheered on those who swept on and past: "Go on, lily whites" (which is the old name for the Coldstreamers). "Get at 'em, lily whites."

They went on at a hot pace, with their bayonets levelled. Out of the crumbled earth, all pits and holes and hillocks, torn up by the great gunfire, grey figures rose and fled. They were terror-stricken by this tide of men.

The Guards went on. Then they were cheered by two lines of trenches, wired and defended by machine guns and bombers. They came upon them quicker than they expected. Some of the officers were puzzled. Could these be trenches marked out for attack, or other and unknown trenches? Anyhow, they must be taken, and the Guards took them by frontal attack, in the face of continual blasts of machine gun bullets.

There was hard and desperate fighting. The Germans defended themselves to the death. They bombed the British, who attacked them with the bayonet, served their machine guns until they were killed, and would only surrender when the British were on top of them. It was bloody work for an hour or more. By that time the Irish Guards had joined the others. All the Guards were together, and together they passed the trenches, swinging inevitably under a machine gun fire which poured into them from the right, but going steadily deeper into the German lines, until they were 2,000 yards from their starting place. Then it was necessary to call a halt. Many officers and men had fallen. To go further would be almost death. The troops on the right had been held up. The Guards were up in the air, with their flank open to all the fire that was flung upon them from the German lines.

The temptation to go further was great. The German infantry was on the run. They were dragging their guns away. There was a great panic among the men who had been hiding in the trenches. But the German machine gunners kept to their posts to prevent a rout, and the Guards had gone far enough through the searing bullets. They decided, wisely, to hold the line they had gained, and to dig in where they stood and make forward posts with strong points. They had killed a great number of Germans and taken two hundred prisoners. So they halted and dug and took cover as best they could in the shell craters and broken ground, under a fierce fire from the Germans.

The night was a dreadful one for the wounded and for the men, who did their best for the wounded, trying to be deaf to agonizing sounds. Many of them had hair-breadth escapes from death. One young officer in the Irish Guards lay in a shell hole with two comrades, and then left it for a while to cheer up other men lying in the surrounding craters. When he came back he found his two friends dead, blown to bits by a shell.

In spite of all these bad hours, the Guards kept cool, kept their discipline and their spirit. The Germans launched counter-attacks against them, but were annihilated.

The Guards held their ground and gained honor for the self-sacrificing courage which has ever given a special meaning to their name. With the other regiments, they struck a vital blow at the German line of defence.

ASHAMED OF THE PIMPLES

How embarrassing it is to have pimples and blackheads break out on the face, and particularly just when one is trying to look the best.

You will find a friend in Dr. Chase's Ointment, for it not only cures pimples and blackheads, but also makes the skin soft, smooth and attractive.

In a score of ways Dr. Chase's Ointment proves useful in every home as a treatment for eczema, salt rheum, barbers' itch, ringworm and all forms of itching skin disease.

All dealers, or Edmanson, Bates & Co., Ltd., Toronto. Sample box free if you mention this paper.

HIS LITTLE LAPSE.

(Judge)

"I'll say for him," stated Miss Annabelle Tamers in confidence over the back fence to Mrs. Judge Tubman, "that as a rule my brother-in-law, Lyman Spink, is a placid and eventempered man and very seldom utters a careless remark, but the other day, when a boy came yelling that the Methodist church was on fire, Lyman jumped right up and shouted 'Holy smoke!' just the same as the most thoughtless person in the community might have done."

A woman's maiden aim is sometimes to throw herself at a man.

MAGIC BAKING POWDER

THE STANDARD AND FAVORITE BRAND.

MADE IN CANADA CONTAINS NO ALUM

A rich and distinctive suit developed in cream La Jerz smartly belted at the waistline and elaborately trimmed with moleskin.

GUARD THE CHILDREN FROM AUTUMN COLDS

The fall is the most severe season of the year for colds—one day is warm, the next is wet and cold and unless the mother is on her guard the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose will prevent colds or if it does come on suddenly the prompt use of the Tablets will quickly cure it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

THE POULTRY WORLD

PULLETS FOR WINTER EGGS.

With feeds at record prices obtaining a good egg yield from poultry becomes more difficult. In fact, unless the hens will give a good return of "hen fruit" the balance will be on the wrong side of the ledger as far as profits are concerned. For years the getting of winter eggs has been the bugaboo to many poultry keepers, and still is to a majority of [illegible]. Yet it is not hard to obtain the egg yield if the proper rules are followed. When the chicks have been properly hatched there is something wrong in the way the flock has been handled if they do not begin laying at from five and a half months to six months of age. No matter how well bred the parent stock may be, all is lost if the chicks have not been properly grown. To do this is no secret, or mystery, but simply following well-known rules that must be adhered to faithfully. That they are not followed in our cases is plain to be seen by the many flocks of poultry throughout the country that do not lay enough eggs during the fall and winter to pay the feed bill, yet the hen is blamed for this condition of affairs, and not the management. Poultry cannot manage themselves.

It does not require a college education to be successful with poultry. But it does require work and a business method to make a profit from the hen. Beginners should be made to realize they cannot attain the same success at their first attempt, that the poultry keeper of experience can make; furthermore, they cannot do just the same success at their first attempt, that the poultry keeper of experience can make; furthermore, they cannot do just the same things with the same degree of success. Experience gained through actual work with hens, and never making the same mistake twice, is the foundation that one must work on.

One's own experience through actual work with poultry, and only in this way, is a solid foundation made toward success in the business. Care of the pullets to become the profit-making winter layers is most important. In the past, and yet too largely indulged in, the one big mistake has been to overcrowd. In many cases good hatches have been made, a large number of chicks raised and well started, only to be ruined in the end by attempting to raise too many in limited house and yard quarters.

As youngsters, these chickens grow well, up until the time when more room in both the poultry house and yards was required, and then came the usual check in growth, and what promised to be a fine flock of pullets resulted in a majority of them being but little more than culls. Checked half-way in their growth to maturity they prove a disappointment to their owner and a loss in money by not producing eggs at the required time. Growing pullets will not stand neglect and make good in the egg basket. No extra forcing feeds are required to make pullets produce a goodly number of eggs, but such essentials as good, well-ventilated poultry quarters, allowing four square feet of floor space, especially for the heavy breeds, not overcrowding them. Plenty of green feed, clean, fresh water, and a good balanced ration of feed is important. Changing from one system to another at maturity, or near maturity, is important. Changing from one system to another at maturity, or near maturity, is harmful; many pullets have received a setback because the owner was eager to obtain eggs at a certain time and changed from one system of feeding to another, resulting in throwing the fowls off their feed entirely and retarding egg production rather than hastening it. Pullets well grown will come into maturity at the required time only when they have been handled along safe and sane lines. Forcing for egg production may give results for the time being. But no experienced poultry keeper will advocate this method for lasting results. A hen's usefulness should be longer than one year, and to obtain a good egg yield for two laying seasons forcing methods should not be used. Each year the experienced poultry keeper is getting down to fewer grains, and cutting many things in the mash feeds that in the past was thought important in producing eggs. Oats, corn and wheat are all that is required in hard grains, while bran, ground oats, middlings, mealed alfalfa and cornmeal with a good, fine beef scrap, will give the desired results. Once adopting a good feeding system, one should not change until thoroughly convinced that the system has not the desired merit. Fancy mixed feeds do not make eggs. It is the safe and sane one of good feeds that will give results, coupled with the proper handling of the pullets through their growing period.

NOTES.

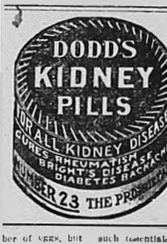
Use lice paint freely on the roosts during hot weather. It will go far to check vermin.

Don't forget to save some stock beets and cabbage for green poultry food for winter. A dime or two spent for seed will return many dollars when this green feed is fed in the winter.

Are your young chickens crowded in their roosting place? Just because there was sufficient room a few weeks ago is no indication that they are not crowded at present. Look into the matter.

The Barred Rock claims to have the call over all breeds in this country, it being estimated that there are over 60,000 breeders of this stock who practice buying stock or hatching eggs each year with which to add new blood.

Everything seems to go by contraries. For instance a man never appreciates his club till he gets married and has a home of his own.



Chronic Skin Disorders Now Overcome Quickly

There is no hope of getting rid of disfiguring skin blemishes until the blood is purged of every trace of unclean matter.

Wonderful results follow the use of Dr. Hamilton's Pills, which provide the blood with the elements it needs to become rich and red.

Quickly indeed the blood is brought to normal strength it filled with nutrition, is given power to drive out of the system the humors that cause rashes, pimples, pasty complexion and kindred ills. Don't complain. Get Hamilton's Pills to-day; they go to work at once and give prompt results. Mild, efficient, safe for men and women, or children. Get a 25 cent box to-day from any dealer.

DOES CATARRH BOTHER YOU? ARE YOUR NOSTRILS PLUGGED?

Why not give up tout snuff and stop dosing your stomach? The one sure treatment is "Catarrhozone," sure to cure because it goes where the disease really is. Catarrh is sure in your case because it has cured tens of thousands worse than you are. Catarrhozone is a thorough cure, because it destroys the cause as well as the effects of the disease. Relief is prompt, cure is quick with this powerful remedy, which is guaranteed to cure Catarrh in any part of the nose, throat, bronchial tubes or lungs. To be really cured, use only Catarrhozone, and beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, which is sold everywhere, large size, containing two months' treatment, costs $1; small size, 50c; sample size, 25c.

WIT AND HUMOR

SATISFACTORY.

(Exchange)

Grace was taking her first look at the new baby.

"I'm afraid you don't like your new sister very well," said the nurse.

"Oh, yes, I do," Grace affirmed quickly. "Why, it's just my favorite shade."

A PACIFIST.

(Rochester Times)

"Henford is a pacific, isn't he?"

"Pacific! Why, he wouldn't let his wife have cartridge paper on their dining room wall!"

WORTH THE EFFORT.

(Life)

Josephine (eight years old)—But if we pray to the Lord for a limousine He may at least send us a flivver—it's worth trying, anyway!

DIPLOMACY.

(Harper's Magazine)

Billy was sending out invitations to his birthday party.

"I don't think I would mention the birthday," advised his mother. "It looks so much like asking for a present."

To this Billy demurred violently, but was finally persuaded to yield the point. For a long time he thought deeply. Then solving the problem, he asked:

"Well, mother, we won't say anything about the birthday, but don't you think that we might put the picture of a cake with candles at the top of the paper?"

TAUGHT BY EXPERIENCE.

(Puck)

Teacher—Which little boy can tell me what it is that comes in like a lion and goes out like a lamb?

Scholar—Please, miss, it's our landlord when he gets the rent.

THE FATAL COMMENT.

(Passing Show)

"There we stood, the tiger and myself, in the thick of the jungle, face to face!"

"O Major, how perfectly frightful it must have been for both of you!"

ANOTHER GOOD POINT.

(Rochester Times)

"Don't you know that automobile of yours is a joke?"

"Yep," replied Mr. Chuggins. "That's the reason I selected it. It's a great thing to have a motor car that makes people laugh when they see it coming instead of getting mad."

WHY SHOULDN'T THEY?

(Life)

In one of the schools in St. Paul, Minn., a fifth-grade class was asked in examination to name five countries of Europe, their capitals and forms of government.

After naming four correctly, a boy concluded with this statement: "The capital of Switzerland is Berne. They have no form of government, because they can hide in the mountains."

A COME-BACK.

(Rochester Times)

"Lend me your ears!" exclaimed an orator.

"That's asking too much," said one of the audience.

To which the orator replied:

"Now that I look closely at your ears, I find that I am asking a very big bit."

A CAPTIVE WIT.

(Exchange)

During President Lincoln's first visit to the Springfield penitentiary an old inmate looking out through the bars remarked: "Well, Mr. Lincoln, you and I ought to be well posted on prisons. We've seen all there are in the country."

"Why, this is the first one I ever visited," replied the chief executive, somewhat astonished.

"Yes," was the reply, "but I've been in all the rest."

A SLIGHT MISTAKE.

(Exchange)

"My poor fellow, I fear you are something of an invertebrate."

"No, ma'am. Never touched a drop."

A DIFFERENT TRUST.

(Rochester Times)

"Please, sir, father wants to know if it is true that there is such a thing as a tobacco trust?"

"Yes, my lad, there is," replied the man.

"Well, father would like to be trusted with two ounces?"

HIS NUMBER.

(Harper's Magazine)

Teacher—I'm surprised at you, Sammy Wicks, that you cannot tell me when Christopher Columbus discovered America. What does the chapter heading of the week's lesson read?

Sammy—Columbus—1492.

Teacher—Well, isn't that plain enough? Did you never see it before?

Sammy—Yes'm, yes'm; but I always thought it was his telephone number.

SANDY'S RETORT.

(Exchange)

A new pulpit had been presented to the church, and the old one came under the auctioneer's hammer. A local country laird, slightly deficient in intellectual endowment, was an interested spectator. The minister, who was fond of his joke, tackled the laird.

"Man, Sandy," he said, "you should buy the pulpit; it would make a fine calf's crib."

"Na, na," replied Sandy, "let it gang for something else now; it's been a calf's crib lang enough!"

NO PRECAUTION NEGLECTED.

(Harper's Magazine)

The little son of a clergyman recently appeared at breakfast with distinct evidence of a hastily made toilet.

"Why, Edmund," his mother remonstrated, "I believe you forgot to brush your hair!"

"I was in such a hurry to get to school," he explained.

"I hope you didn't forget to say your prayers?" she asked anxiously.

"No, siree!" was the emphatic assurance; "that's one thing I never forget. Safety first!"

WHAT BETTER MESSENGER.

(London Tit-Bits)

Over the garden fence the conversation had suddenly turned acrimonious.

"An' if your boy 'Erbert ties any more cans on our pore dog's tail," was Mrs. Moggins' stern ultimatum, "'e'll 'ear about it, that's all! Oh, an' per'aps you've come ter that saucepan wot you borrered last Monday."

"'Erbert," asked Mrs. Grubb, shrilly, "wot 'ave you bin doin' to Mrs. Moggins' dog?"

"Nothin', ma," replied the small boy, unblushingly.

"There!" said his mother, triumphantly. "An' you returned 'er saucepan yesterday, didn't you, dearie?"

"Sent it back by 'er dog," said Herbert calmly.

TWO SIDES OF THE STORY.

(Rochester Times)

With pathetic tears on her baby cheeks, little Ethel ran up to a big, stalwart policeman.

"P-p-please, sir," she sobbed, "will you come and lock a bad man up?"

"What's he been doing?" asked the man in blue, gently.

"Oh-hoo-hoo," wailed Ethel; "he's been and broken my hoop wif 'is nasty bicycle!"

"Has he?" replied the bobbie, angrily, as he saw her tears flow afresh. "Where is he?"

"Oh, you'll easily catch 'im," said Ethel, drying her tears. "They've just carried 'im into that chemist's shop on a shutter!"

BRAND NEW.

(Rochester Times)

During his vacation a San Francisco lawyer met an old friend in the village, and their conversation drifted to a discussion of the natives. A young farmer came under their view.

"He's a fine-looking young fellow," said the lawyer.

"Y-e-s," assented his friend dubiously.

"Well, anyway, he has a mighty good head."

"It ought to be good," was the reply. "That man's head is brand new—he's never used it any."

"Your father was very rich when he died, wasn't he?" asked the young man in search of an heiress. "Oh, yes!" replied the world-wise maiden. "Did he leave your mother much?" "About twice a week."—London Answers.

WALKERTON, OCTOBER 26th, 1916

BILLY SUNDAY HAS SYSTEM

Billy Sunday has decided to go to Boston, and a tabernacle has been built there, and a pre-campaign series of meetings arranged for. This feature of the Sunday meetings is never overlooked. He is billed for New York some time this winter, and already 5,000 prayer meetings are planned in anticipation of his visit. There is never a detail overlooked, and nothing is left to chance. It seems that Sunday and his workers expect to get results and lend everything to securing them in the very largest measure. If the average church adopted these same tactics with an equal amount of enthusiasm, devotion and zeal would it be too much for them to expect results? Surely not.

As a matter of fact, this element is lacking to a very large degree in many of the churches at the present time. There is too much taken for granted. Members take it for granted that some one will stop the stranger in the church before he gets to the door, and give him a welcome; they take it for granted that some one will visit those who are sick; they take it for granted that some one will see that those in want are looked after. If the Billy Sunday meetings were run on that basis where would they end? We don't know, but it is a good safe guess that they would never accomplish the results that they do under perfectly organized conditions.—Guelph Mercury.

+ + +

MIGHT WORK IN BRUCE

Certain criticisms, says the Owen Sound Advertiser, are rife at this season regarding the fall fairs that are in progress all over the country. It is claimed, and with some degree of truth, that these fall fairs are very restricted in interest and that, by adopting some other system better results could be obtained. Without attempting to criticize the present method of managing these fairs, let us detail the manner in which other places in the Dominion run their societies, and with a greater degree of success than is evident in the local fairs.

The system to which we have reference is found throughout the West. A concrete instance is as follows:—The society is known as the "A" Agricultural Society, but "A" is a village situated between the villages of "B" and "C." The directors are chosen or elected from each of the villages and surrounding districts, each place having equal representation on the board. During the year three events are held one at each of the centres, "A," "B" and "C." In the early spring a plowing match is held at "B" under the course of management of the central organization. After the match a picnic is held at which the whole countryside from each of the three villages is pretty well represented. Entry fees and admissions are charged and credited to the "A" Agricultural Society. In the fall a usual fall fair is held that is similar in all respects to the fairs held here in the East. This is held at "A" and all receipts are credited to the central organization again. In the winter a women's fair and stock show is held, taking place at the village of "C" under the same conditions.

Under this system each of the places receive one show per year and the villages are benefitted to that extent. At the same time, having three shows in the year, consequently three sources of receipts swell the treasury of the society. In this way the society is put on a financial footing that is equal to any emergency and is enabled to offer prizes at all of their fairs that are real inducements to exhibitors. At the same time the whole district, comprising the communities of each of the villages, are given adequate facilities to keep up local and general interest in the operations of the society. Presidents are chosen alternately from each of the villages. This system might be applied with advantage in Bruce County where we now have no less than sixteen full shows.

NICKEL STILL WORSE

Nickel continues to be one of the most important issues in provincial affairs. The latest blow against the Hearst Government and its notorious laxity in this vital matter is the statement of Lord Robert Cecil, Minister of Blockade in the British Cabinet, in which he says: "When I tell you that the Deutschland took on board in America certain vitally necessary metals of which there is a serious shortage in Germany for munition purposes, and that there is reason to believe these particular metals were a part of the small stock mined in allied territory, you will see again how important it is that we should take precautions to prevent allied property getting into the hands of those who we know will use it to help our enemies. And concessions made by the Allies in regard to their war measures might assist the German armies in the field to prolong the war and even in the extreme case jeopardize our success."

As the Toronto World (Conservative) says in regard to this and the Hearst Government's connection with it—"Murder will out and Hon. Howard Ferguson would have been better advised to repudiate all connection with the Nickel Trust in the first place than to attempt to repudiate Lord Robert Cecil's strictures at the present time."

If it were not so serious it would be rather amusing to see the Government frantically trying to dodge the responsibility which that laxness has brought to pass. During the last session of the House, day after day, in the most prolonged debate of the session, Mr. Rowell, Mr. Carter and the other Liberal members assailed the Government with vigor, both for their failure adequately to safeguard the export of nickel and for their illegal under-taxation of the nickel company. The government at that time almost laughed at the Opposition. Now, however, the situation has become too serious to laugh about; the government knows what happened in South West Toronto, where nickel was one of the leading issues; they know how public opinion responded to Mr. Rowell's attack on them at London on the question of nickel, and now this statement from a British Minister caps the climax.

EDITORIAL COMMENT

Help the other fellow and boost yourself.

Prohibition is fast gaining friends in Ontario. In Toronto Mr. George Wright, of the Walker House, and president of the License Victuallers' Association, is credited with expressing the view that the leading houses which did business with the commercial public are being well patronized. Similar reports come from various parts of the province.

+ + +

Canada is now paying about twenty-five million dollars per year to the wives and dependents of the soldiers who have gone to the front. Separation allowance, which a year ago totalled about one million per month, now exceeds two millions per month. In addition to this amount paid monthly by the Dominion Treasury, the Patriotic Fund is now expending about one million per month.

+ + +

The Menonites are holding a series of revival meetings at Stayner and are using a column of space in the Sun to advertise these gatherings. "The old-time religion will be the order of the services," the advertisement says; but the method of drawing a crowd is modern. And surely it is to be preferred to the not unknown practice of adding doubtful features of entertainment to religious gatherings for the purpose of making them popular.—Orillia Packet.

+ + +

"Billy" Sunday is to invade New York next April, and an idea of the magnitude of the projected campaign, which will extend over three months, will be gleaned from the fact that the committee in charge has been advised that from 15,000 to 20,000 church workers will be needed, and 12,000 singers, along with 4,000 ushers and 600 secretaries. Plans are also being made for holding 5,000 prayer meetings at hundreds of private homes during the winter months.

+ + +

"Construction", a builders' publication, says in an editorial that on the day the corner-stone of the new arsenal was laid at Lindsay Canadian manufacturers were down in New York, hat in hand, putting in tenders to an American firm for materials needed in constructing this Canadian public work. The circumstance causes the Toronto Star to observe that it looks as if somebody were trying to make this country an adjunct of the United States.

Telescope Letter Box

Walkerton Boys in The Trenches Write Home Interestingly of Conditions at The Front.

SERGT. BERT. CARTWRIGHT

A rumor was circulated around Walkerton a month ago that Sergt. Bert Cartwright was killed in action. Judging from the letter published below, which his old employer, Mr. M. J. Ramsey received last week, Bert is still very much alive.

France, Sept. 14th.

Dear Mr. Ramsey:—

At last I have found time to write you a few lines. We are a long way from where I last wrote you, we have left the muddy trenches in Belgium never to return I hope. I received your nice parcel about two weeks ago, on the way down here, everything was in the best of condition and I thank you ever so much.

Well, Mr. Ramsey, the Canucks are sure in the thick of it, and I am proud to say they have made a name for themselves as they never did before, a lot of brave boys are down and out, but the work they did was great. I don't see how Germany can last much longer if we keep it up like the last few days. We have gained a lot of ground and taken large numbers of prisoners. I have seen lots of them the last day or two and they were a sorry sight, our big guns shatter their nerve. Last week we were camped out in the open and we had to work out in the open. We were busy fixing shoes one morning when Fritz sent over a few shells we had to run and leave the work, some lads had no shoes on others just one shoe on. He shelled us for about half an hour, then we went back to work.

I am keeping in the best of health, hope all the boys are well. Kind regards to all.

From Bert.

GEORGE CARBERT'S GRANDSON

Mr. George Carbert had a letter from his grandson, Billy Shaw a bright young chap of twenty years, who has been doing his bit on the firing line but is at present in Fort Pitt Military Hospital at Chatham, England, as the result of a gunshot wound in the leg. "Billy" who is a son of Rev. Wm. Shaw of Gilbert Plains, Man. writes:—

"I am back in England now on account of getting a shot through my right leg which has broken the bone eight or ten inches above the ankle. I have been in this hospital since Sept. 19th having been hit on the 15th at the Somme. It isn't a serious wound at all and I didn't lose hardly any blood. I am quite healthy but it will take a long time for the bone to set and I shall probably be in England several months now."

+ + +

GOOD LETTER FROM GLAMIS BOY

Mrs. Arch. McKinnon of Con. 11, Kincardine, has received the following letter from her son, Finnie, now wounded in an English hospital. His brother, Jack, is also among the wounded, and his sister, Elizabeth, of whom he speaks is a war nurse. He knows what he is talking about and there is not an atom of down-heartedness in his letter. It is cheery and bracing. He is not so badly wounded as his brother, Jack, who was cut in three places near the elbow. An artery was severed and he lost a lot of blood.

Sept. 22nd, 1916.

Dear Mother:

Just a few lines to let you know I am feeling fine. I got a piece of shrapnel in my right arm, just at the muscle and it came out at the elbow. Just a slight wound as you can see I am able to write. I can work my my right arm fairly well and I am practically past any danger from poisoning now.

We were in the big attack at the Somme on the 15th. It started at 6.30 a. m., but I never got a scratch until evening, until 6 o'clock. I was on my way out as a guide for the machine guns that were coming to relieve us when the shell burst overhead. There were quite a few of us. One man was killed, another lost his leg and six were wounded. We lost all our officers and N. C. O's. I think I am the luckiest man in the war. Early in the day most of our machine gunners were knocked out and our officer called for a volunteer to take up reinforcements and I went up and got them up through Fritz's barrage of shells and machine gun fire and never lost a man. I was beginning to think he couldn't get me and was rather surprised when I got hit. Jack got his wound on the night of the 11th. I don't know what hospital he is in but will in a day or two. I expect Elizabeth to be up to see me any day now. I am in a swell place here. It is owned by a Countess and she and her daughters run it. They turned it into a hospital at the beginning of the war and they can't do too much for us here. It is just like being at home. The son was also wounded on the 15th and it makes quite a difference when you have somebody in the game, too, but believe me, you can't beat those English aristocrats.

It was pretty tough fighting on the Somme, but nothing like what we got on the 2nd. of June. We went into the trenches 850 strong and came out with 67. It was some scrap and the like I don't want to be in again. But now we have it all over Fritz and he knows it, too. We have big tractors about the size of a threshing machine armor clad, and carry two 6-pound guns. They run on an endless chain like a caterpillar engine and are 210 horse power strong and they crawl all over Fritz's trenches over barbed wire and everything, nothing but a direct hit from a big shell can harm them. Fritz thought it was all Hades turned loose when we used them on the 15th. As soon as it got near them they up their hands crying "Kamerad." They are as cowardly as they are treacherous. He had it pretty much his own way up till now but they are finding out that the lion has more than a growl in him yet. I am confident the war will be over this year. We have guns and guns and then more guns and lots of shells and they are hammering him. We have the best airmen, too. Any time you can count as many as 30 of them up and Fritz dare not send up one. They will crash right into him regardless of themselves and they burn down every baloon he has got. We sure got his goat and unless the unexpected happens there is nothing to stop us, but there is many a slip you know. At any rate there is not a doubt about the final issue of the war now. It is pretty rough all the time in the trenches, mother, but I am mighty glad to-day that I enlisted and helped to do my "bit."

Well I think I have written you a long letter and next one I will start in to tell you about my experiences in France. I can write you good long ones now as they will not be censored.

Your affectionate son,
Finnie George McKinnon,

Address—Eden Hall,
Edenbridge, Kent,
England.

160th BRUCE BATTALION

(London Advertiser)

A blurred cipher on a typewriter with which the "copy" for a bulletin was written caused an Advertiser bulletin writer one day last week to announce from the front of this newspaper's buildings that many men were missing from the 160th Battalion.

The bulletin had not been out five minutes before a stream of khaki-clad men commenced to flock to the editorial rooms of the paper. They had "blood in their eye." The staff trembled. What had been done to arouse the wrath of the friendly boys from Bruce? Those who waited were not long left in suspense.

"Your bulletin says that a lot of men are missing from the 160th Batt. There are no deserters from the 160th Battalion, and we want that bulletin taken down." This was the message of the men of Col. Weir's great battalion. The error was gladly and speedily remedied.

That is the spirit of the Bruce Batt. which has just taken leave of London where it commenced its training early in the summer, and where its headquarters remained until the time for departure had arrived.

"Its headquarters" is used advisedly. The battalion which was brought to a strength of 1 400 men in two months, and which was 83 per cent of Canadian stock, had many difficulties during the three and a half months of its stay in the city.

Most of the members were farmers or the sons of farmers. Some of them had literally left their plows standing to answer to the call of the figurative "cross of fire" that was carried through Bruce County by the prominent men of both parties in such a manner as to reveal that Canadians only need to be inspired to respond to the call.

It is probable that they did not have more than two months solid training as soldiers. But when Major-General Lessard inspected them some weeks ago he was moved to praise them beyond the bounds of customary military procedure. He was enthusiastic. So were the Londoners who saw them march through the streets last Thursday. "They look like veterans", said an overseas officer who witnessed their marching. "A fine battalion!"

And when they left the city they carried a full battalion and more, despite the fact that a draft has been taken from them. It is stated that they will go to the firing line as a unit, part of the new 5th division.

With no intention of disparaging any battalion which has been trained at Camp Borden, The Advertiser wishes to ask if any of them has a record which will stand beside that of the London-trained Bruce Battalion, who, thanks to their splendid esprit de corps, confidence in their officers, and camp grounds, rose above all handicaps and left fit to be classed with the best of Canada's battalions?

SEVEN YEARS TORTURE

Nothing Helped Him Until He Took "FRUIT-A-TIVES"

ALBERT VARNER

Buckingham, Que., May 3rd, 1915.

For seven years, I suffered terribly from Severe *Headaches and Indigestion*. I had belching gas from the stomach, bitter stuff would come up into my mouth after eating, while at times I had nausea and vomiting, and had chronic Constipation. I went to several doctors and wrote to a specialist in Boston but without benefit. I tried many remedies but nothing did me good. *Finally, a friend advised* "Fruit-a-tives". I took this grand fruit medicine and it made me well. I am grateful to "Fruit-a-tives", and to everyone who has miserable health with Constipation and Indigestion and Bad Stomach, I say take "Fruit-a-tives", and you will get well".
ALBERT VARNER.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

JIM'S AT THE FRONT

There is a kind of settled gloom,—
A sort of all-day valley-tolst—
That has a hold, in every room,
Like some unseen antagonist.
And all about the house and farm
The simple joys that were our wont
Have disappeared or lost their charm
Since Jim, our Jim went to the front.
I watched the wife a while ago
Setting the table for our tea,
Deep lost in thought, with movements slow,
A place for her, a place for me,
And, as in days that have gone by,
The old accustomed place for Jim;
Then, with a smothered sob and sigh,
She stopped, and tried to joke of him.
Oh, she is brave! I've tried and tried
A hundred times to do the same,
And simulated joy and pride
That Jim, our Jim, had played the game;
And all the while my heart is sore,
And all the while I know that she
Prays for the only child she bore,
And adds a postscript prayer for me.
Last Sunday at the fall of night
Another to our fireside came,
And almost in a manner light
And frivolous she spoke his name,
"It's all right, dear old Mum," she said,
"Old Jimmie knows a thing or two;
Don't you go worrying your head;
I know the old chap will pull through.
But when I'd taken down the Book,
And read the lesson for the day,
She took in her old hands that shook,
And knelt between us both to pray.
Then, to my heart of hearts I felt
The strong faith of her youth pass out,
And words forsook me as I knelt,
For I had deadened hope with doubt.
I know that sobs came to me there;
I know I trembled on my knees:
I know I stumbled through the prayer—
"Do with him, Lord God, as you please
But keep him worthy of his race
And the traditions made for him."
But she, with love-lights in his face,
Prayed simply—"Make us worthy Jim."

—Ottawa Journal.

News About Town

Mr. and Mrs. J. B. Huether of Guelph were week-end visitors in town.

Mr. Peter Schwartz of Hespeler has been visiting his father, Mr. Nicholas Schwartz near Mildmay.

The crops may not be as big as the country had hoped for but the farmer will get big prices for them.

Paper is getting so scarce that even Confederate and Mexican bills may be worth something before long.

Time you are thinking of Christmas presents for friends in the old land, particularly your soldier friends.

Miss Shaw expects to return to her cottage on Durham St. this week from the hospital. She is considerably improved.

On April 28th, 1894, fresh eggs were 10c. a dozen on the Toronto Market, wheat 62c., hogs $4.75, Milch cows and springers $30 to $46.

"Don't parade your troubles before an unsympathetic world. Bury them as a dog does old bones, and growl if any one tries to dig them up."

The price of weekly papers is going up all over Canada. One dollar and fifty cents a year is the prevailing figure. It means less than three dozen eggs and a pound of butter to the farmer for a whole year's subscription.

Some jokster started the rumour the other day that a farmer near Belmore was keeping a "blind pig." It appears that the pig this farmer keeps is the common variety that lives in a stye but this one has not the use of its ocular orbs.

The wives of Canadian soldiers are warned to stay at home and not to cross the seas to be nearer their husbands at the front. Nothing but disappointed and distress await the wives who go over there. Stay at home. —Hamilton Times.

The Ford Motor Co. states that there is absolutely no truth in the statement which has been going the rounds of the papers that the Co. sells Ford Runabouts to its employees at a reduced price. The employees pay the same price as any other person.

Mr. William Houston, Chairman of the Board of Education, Toronto, has been elected to fill a vacancy in the University of Toronto Senate. Up to two years ago, Mr. Houston had sat on the University Senate continuously since 1883. Mr. Houston is an old Bruce boy and taught school in this district in his younger days. Dr. Houston of Paisley is a nephew.

In removing a board from the wall of the second storey of Bremner's Fair the other day, Mr. Bremner came across some old papers that had apparently been there for over forty years. One of them was a postcard signed by Mr. James Tolton, sec. of the Walkerton Fair, notifying the late Mr. William Collins, to attend a meeting of the Walkerton Fair Board on Aug. 23rd, 1875. It is interesting to note that Mr. Tolton is still secretary of the Fair Board, although there are few, if any, of the old directors still living.

Mr. J. M. Chase who formerly conducted a woolen mill at Paisley, passed away at Notawa recently in his 81st year.

The Ontario Winter Provincial Fair at Guelph will open on December 1st, and continue till the 8th. This is the second largest live-stock show on the continent.

Walter Cole of Chesley who was wounded and sent home from France recently, has now enlisted in the British navy. He has two brothers both in khaki. One is in France and the other is on the way to England.

Mrs. Herbert Oliver of London, is staying in Toronto, with her sister Mrs. John C. Lerack in St. Clarence Ave. while Lieutenant Oliver is Overseas with the 160th. Mrs. Oliver will join her husband in England early in the New Year.

A conceited young clergyman, walking home from church with one of the ladies of his congregation, remarked "I preached this morning to a congregation of asses." "I thought of that," observed the lady, "when you called them 'beloved brethren.'"

The Inmates of the House of Refuge enjoyed a treat one evening last week in the form of an entertainment put on by the Mission Band of Knox Church under the direction of Miss Warren. A feature that greatly pleased the old people was a talk on the war by Rev. Mr. Wilson, illustrated by lantern slides.

One onion grower in the vicinity of Leamington is reported to have harvested 32 car loads of onions off 00 acres of land. The prices being good, they will average over $1,000 a car. Another farmer will make $25,000 out of his tobacco crop. Tomatoes, notwithstanding the unfavourable weather, have returned a profitable yield.

From a decision given recently by Magistrate Denison in the Toronto police court the carrying of liquor in a bottle is a violation of the Canada Temperance Act. In the Ottawa police court a magistrate ruled that carrying liquor in a flask or bottle was permissible, providing it is unopened. The wording of the Act prohibits any person from having liquor "in a place other than the private dwelling where he resides."

This remarkable story comes from Aylmer. Two dogs belonging to Geo. Wall were taken coon-hunting Monday night in Malahide Township and disappeared. Friday morning Morley Cattle released them from a drain on his farm, after his attention had been attracted by a noise directly under his feet. The dogs had crawled about two miles through a fourteen inch drain, but the twelve inch drain on the Cattle farm prevented their going farther. The dogs are none the worse for their experience.

John Skelling, of Teeswater, has just received from his son Will a piece of the zeppelin brought down in one of the recent English raids. Will Skelling is a young Methodist preacher who enlisted a year ago. He was out of London at the time of the raid, but on reaching his "diggings" that night heard that the airship was lying a wreck not far from London. He immediately started off and secured a precious little bit of rope wire and steel. The metals are all badly fused, indicating the immense heat of the burning zeppelin.

Toronto has done "a good stroke of business" in securing the factory to be established in Canada by the Imperial Munitions Board for the manufacture of aeroplanes. To cost one million dollars, to turn out six aeroplanes a week, to continue the business on a commercial scale after the war, and to have an aviation school in connection, the institution seems destined to be one of very great importance. By the time the war is over there will be so many aeroplanes in commission and so many aviators in the world, we may be sure that airship flights will continue to be made both for business and for pleasure. The aerial carriage may displace the automobile even as the auto discounted the bicycle.

Hugh Clark's Appointment

Hugh Clark M. P. of North Bruce has received an important appointment in the Dominion Government. He is to be Parlimentary Secretary for External Affairs, his duties being to assist the Prime Minister in his international correspondence. Col. Clark, who is publisher of the Kincardine Review, is one of the group of "Whitney tories" who contested Federal seats in 1911, when he defeated the late John Tolmie, the liberal member for North Bruce. Prior to that event, he represented West Bruce in the local legislative since 1902.

Put To The Test

A preacher at the close of one of his sermons said: "Let all in the congregation who are paying their debts stand up." Presently every man, woman and child, with one exception, rose to their feet.

The preacher seated them and said: "Now, every man not paying his debts stand up." The exception, a careworn hungry-looking individual, clothed in an ink-spotted last summer's suit, slowly assumed a perpend'cular position. "How is it my friend," asked the minister, "that you are the only man not able to meet his obligations?"

"I run a newspaper," he answered, "and the brethren here who stood up are my subscribers, and—"

"Let us pray," exclaimed the minister.

If this question were asked in your congregation what would you do—stand up or sit still? Look at your label now!

New flooring was put in, in front of the wickets and considerable other repairing done at the post office the past week by Messrs McKinnon and McCannel.

Writing to Mr. Geo. H. Mitchell of the Port, a Hanover soldier at the Front says:—Well, one thing, we have the best of officers and Mr. S. L. Young from Walkerton is as fine a man as one would wish to meet, and when we go at Fritz again it will not be the fault of the commander if we do not succeed.

+ + +

Brant Farmers' Club

An interesting meeting of the Brant Farmers' Club was held last week, the chief item being a report of the recent meeting at Palmerston by Mr. A. E. Webb. That the farmer will never get a fair price for his products until he is educated to the necessity for organization was urged by speakers at the Convention. Practical examples of the benefits of co-operative buying and selling were given. The Brant Club has protested to the Government against the custom of having Agriculture represented at the Trade Congress by Government officials instead of representatives of independent farmers' organizations.

Fedy—Meyer Wedding

A happy event transpired in the Sacred Heart Church, Mildmay, on Tuesday morning of last week, when Miss Lavina M., daughter of Mr. and Mrs. Martin Meyer of Mildmay became the bride of Mr. Harry J. Fedy of Formosa. The ceremony was conducted by Rev. M. Halm in the presence of a large number of friends and relatives of the contracting parties. The bride, who was attired in a lovely gown of white satin, was assisted by Miss Doretta Sauer of Mildmay, while Mr. Herbert Fedy of Formosa supported the groom. The ceremony over, the guests repaired to the home of the bride's parents where the happy event was appropriately celebrated. Mr. and Mrs. Fedy will take up residence at Formosa, where Mr. Fedy is engaged in the blacksmith business. Their many friends here wish them much joy and happiness.

+ + +

A Lemon Drunk

Lemon extract contains a much higher percentage of alcohol than Peruna and since the Ontario Temperance Act came into force it has served as a substitute for whiskey. A young man named Roy Van Wyck took too much of this flavoring preparation and went out on the street in an intoxicated condition and $10 and costs were extracted from him by the police magistrate of Owen Sound. While in a stupid haze after taking a big dose of this strongly alcoholic extract an Owen Sound man named Geo. Sensebaugh, walked off the dock and was drowned. Looks as though Lemon Extract would have to be included in the booze list. When the grocer is asked for Lemon Extract by a customer who has been addicted to drink he will wonder whether it is for flavoring his breath or his pudding.—Chesley Enterprise.

HE WAS A SUCCESS

And yet he died poor, unhonored, and unrecognized, and he rests in a forgotten grave; but he loved God, he loved his fellows, and he did his best to translate that love into service. And that is success. We misjudge men. We measure them by faulty standards. The dollar standard is useless, for Christ died poor, and Commodore Vanderbilt left millions. Fame is not an accurate measure, for sometimes it rests upon falsehood. History is not always true, and some little men have great reputations, and some great men are unknown. Kant was dead long before men realized the greatness of his thought. Education is no true test of success. The unlettered father is sometimes a much bigger man than his cultured son, and the doctor of divinity is often a lesser saint than some of his uneducated hearers. Mountain peaks and stars are grand but they are no more useful nor beautiful than the blades of grass. To be just and merciful; to love honor and truth; to be pure and kind and loving; to live our faith and help our neighbors, this is true success.—Christian Guardian.

EAST BRUCE TEACHERS

Held Their Annual Convention at Chesley and Hear Helpful Talks by Outside Experts—Teachers Subscribe Liberally to Red Cross.

Despite dull skies and an almost steady downpour of rain over one hundred teachers from the different schools in East Bruce assembled in Chesley on Thursday Oct. 19th. to hold their annual convention. The meetings were held in the Third Form of the High School which had been artistically draped with flags and bunting for the occasion.

Mr. Kidd, Principal of Mildmay Public School, occupied the chair. The chief speaker at the Convention was Mr. Emery B. A. of Stratford Normal School. He gave two very inspiring addresses to the teachers. His first one was entitled "The Health of the Pupils" and in it he showed the close relation between mind and body and how all our great educationalists such as Spencer and Locke emphasized the importance of health. Mr. Emery went on to point out to the teachers that the chief aim in teaching hygiene should be to create and form good habits in the children. The other address was on "Nature Study and Literature." The speaker called attention to the fact that there was a great tendency in this age towards rational things and that the man who can do things was the man who was honored and people were in danger of losing sight of the spiritual side of life. He then went on to show how teachers through a proper teaching of Nature Study and Literature can do a great deal to arouse in a child a deeper spiritual life and a greater love of the beautiful.

Rev. Mr. Hilts spoke a few words of encouragement and advice to the teachers. He urged them not to stress too much the mental side of a child but to strive to develop him fourfold—mentally, physically, morally and socially.

Other matters of interest to teachers were discussed and an excellent paper on "Geography in Rural Schools" was given by Miss Viola Goodwin.

On Thursday afternoon at the close of the regular meeting the Teachers re-organized as a Patriotic Society and decided to contributed to the British Red Cross. Miss K. Schwalm of Mildmay was appointed Treasurer of the contributions.

Through the kindness of Mr. N. A. Halliday and Manager Griffen, the teachers enjoyed a visit to the munition factory on Friday morning and followed with much interest the different processes through which a shell passes before it is ready to be used against the enemy.

It was decided to hold the Convention next year at Wiarton. The officers appointed were—Pres., Miss Tugman; Vice Pres., Mr. Sanderson; Treas., Mr. McCool; Sec., M. G. Wallace.

The Farmer's Advocate:—School Fairs are accomplishing two things at least: children are learning to speak in public, and weed-naming contests are making them familiar with Ontario's noxious weeds.

+ + +

World's Record Wheat Crop.

In view of various claims of world's record wheat crops for large areas the Crowfoot Farming Company of Crowfoot, Alberta, submit a sworn statement of their results for the year 1915 which probably surpasses all properly authenticated claims from other sources. From 3856 acres the Crowfoot Farming Company received an average yield of 51 bushels, 56 1-3 pounds per acre of number on spring wheat, by actual selling weight. 400 acres wheat averaged 59½ bushels per acre. These records were established in the Canadian Pacific Railway Irrigation Block in Southern Alberta.

THE COST OF LIVING

I hied me down to the butcher store, for I felt that I had to eat, and I asked in fear at the worthy's door the price of a pound of meat. "It is sixty cents," said the butcher man, as he mocked at my tears and groans, "and I sell it now on the new-style plan where you have to return the bones." So I went out minus the Hamburg chop now utterly past my means, and turned my steps towards the grocer's shop, in quest of a quart of beans. "Potatoes?" hinted the clerk to me; "we've some that are really prime, and to-day we're letting them go at three like these for a single dime. It's so near cost that it hardly pays (like everything else, alack!); of course you know within sixty days the skins must be all sent back." Then I journeyed down to the baker's place with hurried and anxious tread, and with fear writ large on my pallid face I asked him the price of bread. "They've doubled my price of my flour and yeast, and labor is scarce and high, so if on bread you are bound to feast," the baker said in reply, "pay eighteen cents for a loaf you must that used to be six before, and at that you'll have to return the crust, or hand over two cents more." When I'm thus perplexed by the problem grave of buying the simplest grub, I covet my ancestor's well-stocked cave, kept filled by his trusty club.

A BOY'S QUESTION

(From Life)

"Father, when people go to Heaven, do they get to be angels right away, or do they have to pass a lot of darn old examinations?"

Clean, smokeless and odorless oven means perfect cooking and baking. This is assured by ventilation and the nickel-coated non-rust steel lining in

CURRENT COMMENT

It is said that Count Zeppelin [illegible] sworn to destroy London [illegible] bombardment or die in the attempt. The man is either crazy or a black-hearted villain. If he ever falls into the hands of the British we hope that they will hang him.

The following table showing the increased cost of foodstuffs is given by Bradstreet's agency. They are the wholesale prices on the Montreal markets:

	1915.	1916.
Flour	$5.85	9.10
Butter	.30	.37
Cheese	.15	.21
Eggs	[illegible]	[illegible]
Potatoes	.65	1.70
Beans	2.15	6.00

The retail prices go up in sympathy with these.

The following table gives the date of the first day of prohibition in each of these provinces:

Prince Edward Island	June 4, 1901
Saskatchewan	July 1, 1915
Manitoba	June 1, 1916
Nova Scotia	June 20, 1916
Alberta	July 1, 1916
Ontario	Sept. 17, 1916
New Brunswick	May 1, 1917
British Columbia	July 1, 1917

The Duke of Devonshire, our coming Governor-General, was presented by the Freemasons of Derby the other day with silver-gilt replicas of the Warwick Vase and of an Armada wine jug. In acknowledgment of these gifts the Duke said:

No one was more conscious than himself of his lack of the qualifications necessary to one who would follow the footsteps of the very [illegible] men who had already filled the [illegible] of Governor-General of Canada. It was a task which required nerve and courage, but with the good will of his friends at home and the hope of a friendly reception in Canada he trusted that he would have the strength and good sense to make the most of the opportunities that were placed in his hands. We were passing through anxious and serious times, but out of all that was sad and all that was terrible he hoped good would come, and that we should go forth resolved and determined not to allow the outrage which Germany had perpetuated on humanity to be repeated. That was the message which he knew he should be justified in taking from the Mother Country to Canada, of whose generous share in the war England was justly proud.

EVERY MAN NEEDED.

"We are not justified in expecting to win the war unless the service of every man and woman in the country be utilized to the fullest extent.

"We must be under no delusion as to the end or probable duration of this great struggle. We must be prepared to continue for a time which cannot at present be estimated.

"In fact, we must prepare for the worst while we hope for the best. We have adopted in theory the principle of national service. We must see that we put it into practice, because we want more men, and we want them now, and eventually we shall want all who can be spared."

This was the statement made yesterday by Gen. Sir William Robertson, chief of the Imperial Staff of the British army, at the War Office. The General is the one man who controls all the British forces on all fronts. In his hands is the disposition of the British troops. Other men may enlist and organize and drill. He is the man who directs and places them as the exigencies of the war may require.

He tells the whole Empire that we need not expect to win the war unless every man and woman in the country is utilized to the fullest extent. He wants more men and he wants them now, both for the army and for the munition factories. It seems hard to think that, after all the sacrifices the people of Britain have made, that they should be asked to make more. But we believe that they will make them that they will go the whole way until victory is achieved.

But the call comes to us as well as to them. It looks like folly to see bodies of men declaring against conscription and even against registration in the face of the crisis that confronts the country, for assuredly Canada is in more danger than is Britain should this war be lost. It would be to the eternal infamy of Canada should it slacken its hand in this struggle and allow free peoples to be ground to the dust.

The man is a coward, we care not who he is, who will refuse to fight for his own home and his own family. This war is a struggle to the death for these very things, no matter how one looks at them. Eligible young men may walk the streets, heedless of the finger of scorn pointed at them, but they do so only by reason of the British fleet, which prevents German ships and German soldiers from reaching Canada. National service is not conscription as it is understood on the continent. National service only means the calling up in a crisis of every available man to fight for his own country when it is in peril.

Sir Thomas Tait and his colleagues cannot too soon get to work if Canada is to respond to the appeal of Gen. Robertson. Something ought to be done to place women in our munition factories so that eligible young men can be released for service abroad. No half-hearted measures should be tolerated.

Fine linens and all pieces of handsome lingerie should be wrung out by hand and never put through a wringer.

HER HUMBLE LOVER

"Pray don't apologize. Delamere himself would be anything but offended by your curiosity. Is he so bad as he is painted? I suppose not. It all depends upon how black the village folk have painted his portrait; but, to be truthful, an artist would need a quantity of dark color on his palette."

"I understand," says Signa, thoughtfully, and admiring the delicate way in which the speaker has answered her. "Lord Delamere is—not just quite as bad as he is painted."

"Exactly," he says. "No one is, you know."

"And why does he not come home and live in this beautiful place?" she asks. "But I beg your pardon once more. Perhaps you never asked him?"

"Indeed, but I have," he says, thoughtfully. "I don't think he himself knew. Do you remember the legend of the man who could not rest in the same place for more than twenty four hours? It is a Flemish legend—there are many good Flemish stories, by the way. The story goes that he could not live unless he took a strange draught of water drawn from a fresh town or village each day. I fancy Lord Delamere is like that man; he must have a draught from a strange spring each day."

"What an unhappy man he must be!" says Signa.

"Very," he assents, laconically.

"And where is he now?" asks Signa, thoughtlessly.

The stranger shrugs his shoulders.

"I don't think any of his friends know. His last date was Cairo, I believe. He may be now—anywhere. Perhaps I could find out——"

"Oh, no, no," says Signa, earnestly; then she laughs. "Your rebuke was well deserved," she says, with a flush. "I have allowed myself to appear unwarrantably curious."

"No," he says, in his decided fashion, "by no means. The old place at the back of us interested you, and from it to the owner was an easy step. And now, may I ask a question?"

"You may if you like," says Signa, looking down at the handsome face with a smile in her gray eyes. "I think it is quite your turn now."

He laughs.

"Do not be afraid," he says, lightly; "I am only going to ask if you know whether I should find the Reverend Joseph Podswell, the rector of Northwell, at home—I mean in Northwell and where the rectory is situated?"

"Yes," answers Signa, smiling with faint amusement; "he is at home, and the rectory is close to the entrance gates of the Grange here; you must have passed the gate—I mean the rectory one—if you crossed the park."

"Oh, I remember," he says. "I took it for a part of the Grange grounds."

"The rector is generally at home at this time of day," says Signa. "I know, you see, because I live at the rectory. Mr. Podswell is my uncle."

He looks at her with deepened interest.

"Indeed!" he says. "Then—then our young friend Archie is——"

"My cousin," explains Signa, simply, "or rather my half-cousin, I suppose, I am not certain; the rector and my father were half brothers."

"I see," he says, gently, then he looks at her black dress and is silent for a moment.

"My name is Grenville," says Signa, why she knows not. "I am living at the rectory, because—my father is dead," quietly, composedly, though her face grows paler and her lips quiver.

He inclines his head.

"I understand," he says, almost in a whisper, so low, so gravely sympathetic is the voice.

"Perhaps," she goes on, impelled by some subtle impulse, "perhaps you may have heard of—my father?"

He is silent for a moment, then he says:

"I once knew a man by that name. One of the noblest, one of the grandest men I ever saw. He was an artist, musician, poet, painter—the sweetest, highest type of humanity one can conceive. 'Jack' Grenville they called him; we were at Vienna together, my tutor and I; I was a lad fresh from school, when I met him, he a man of the world. I shall never forget the charm his presence and manner, his look and voice had for me. I was spellbound. But I shall say no more," he says, gently.

"Yes, go on!" says Signa, calmly, though the tears are running down her face, and her hands are clasped tightly. "Go on! I remember that time; he had left me in France. I was a little child then, and—and sick and ailing. Go on, please; if you knew how sweet it is for me to hear you speak of him as—as you do—" she stops and sweeps the tears away with an impatient gesture.

"I have pained you!" he says, with self-reproach.

"No, no," he says, earnestly, eagerly. "I am not crying for grief, but pleasure. I have never cried for grief since he—he went. I promised him that I would not. And you knew him! It was kind and good of you to speak as you did of him! Here"—and he knew she meant at the rectory—"they avoid all mention of his name as if"—with a laugh and a sob of scornful amusement—"almost as if they were ashamed of him."

He looks at her with gentle sympathy.

"Such people as those, if they are the ordinary type, could not understand such a man as your father," he says. "His place was in the world of the great. They learned to value and to love him there; and you are Jack Grenville's daughter? How small the world is!"

"Is it not?" she says, smiling, and secretly wiping her eyes. "My father always said that if his heart were large enough it would take all the world in and yet have room to spare."

"Yes, I can fancy him saying it; his heart was a vast one," he says. "I remember once being taken by my tutor to the old room in which your father was lodging. As we climbed the stairs—— Can you bear to hear me tell you this?"

"See," she says, turning her face to him with a smile in her eyes that is almost angelic in its serenity and peacefulness.

He inclined his head.

"As we reached the stairs we heard the sound of a violin, and my tutor stopped me. We sat down on the top of the stairs and waited and listened. I had never heard such heavenly music before. I have never heard anything like it since. We sat as if in a dream, and were only awakened when the door opened and your father appeared leading a blind old man carefully by the hand. The tears were streaming down the old man's face; our own were wet. It appeared that your father played for an hour each morning to the old man whose soul existed for music, but whose hands were too crippled by rheumatism to play for himself."

"Yes," says Signa, with the swell of a sacred pride in her voice, "that was my father; and he is dead now, you see, while such a useless creature as myself"—with outstretched hands, and eyes full of sorrow—"still cumbers the ground."

"He would not care to hear you speak thus," he says, not rebukingly, but with the tenderest sympathy.

They were both silent for a moment, then he says:

"Yes, the world is very small. Though we have never met before, Miss Grenville, we are scarcely strangers."

"No," she says, simply, with quiet, modest dignity: "my father's friends are mine while life lasts. Will you tell me your name? Perhaps I may remember it."

She asks with no idle curiosity, but with her whole heart and mind full of her lost one; and she is so absorbed in reflection that she does not notice his momentary hesitation.

"I am afraid you will not," he says. "I scarcely think your father heard it. It was my tutor whom he knew, and he merely suffered me to haunt his chambers in the goodness of his heart. My name is—Hector Warren."

Signa thinks for a moment, and murmurs the name softly.

"No; I am afraid I cannot remember it," she says, with a touch of regret. "My father knew so many—no man had more friends. Wherever we went, in every capital of Europe, we found a circle ready to welcome us. I say 'us'—I mean him."

Then she turns with that sweet, grave smile which renders the gray eyes so deep and soft, and holds out her hand.

"We must go now. I am almost afraid to look at my watch."

He rises and takes the hand in his and holds it for a moment, looking into her eyes with the grave, subtle earnestness peculiar to him.

"I will fetch Archie," he says, in a low, calm voice, and he goes down the beach, and hoisting the child on his shoulders, carries him up the cliff. Then he comes down and helps her to ascend.

As she reaches the top, his hand closes on hers with a gentle pressure.

"Good bye," he says. "We shall meet again."

"Perhaps," says Signa, laughing. Then she stops short and looks down at him. "Shall I tell the rector that you will call?"

He thinks for a moment—scarcely a moment—and a strange look comes into his eyes.

"Do not, please," he says.

"Very well," says Signa. "Good bye."

"Good bye!" echoes Archie, leaning over and nodding with infinite condescension. "Are you going to wait there till the mermaids come?"

"Perhaps," he replies, with a smile. "Shall I catch one for you, Archie?"

"Yes, do!" replies the child; then he adds, with infinite generosity, "But you can keep it yourself; I've got Signa, you know."

"Thanks," responds Hector Warren, gratefully; and Archie, with a last grave nod, bounds after Signa.

CHAPTER IV.

It was a strange meeting. Signa pondered over it on their way home through the park, while Archie ran by her side, chatting in his old-fashioned style.

Hector Warren! She searched her memory closely, going back to the happy times when she and her father had wandered over Europe, from court to court, for with the highest and noblest "Jack" Grenville had been welcome; but she could not remember the name. It was strange that she could not, for even in her early girlhood her father had been accustomed to talk to her about the people whom he had met; then, again, it was rather singular that, in the course of her wanderings, she had not met with this Hector Warren. As he had said, the world is very small, and she felt certain that Hector Warren had seen a great deal of it. He had all the appearance and manner of a man who had moved in society, and become familiar "with men and cities."

Signa thought that never in all her life had she seen so perfect a manner, so full of ease and grace, so natural and unconstrained, with an admirable mixture of grace, dignity, and respectful deference.

Even as she recalled him on her way home, the voice, and the handsome face, and the quiet, self-contained manner haunted and possessed her. It was singular that such a man should be here in this out of the way spot, more singular that he should have business with her uncle, the rector. But was it business? Perhaps he was a friend. Then she remembered that he had not inquired about the rector as a friend would, but rather as a stranger, and she concluded that it must be business. Thus her thoughts ran on half unconsciously, when she was brought to a little start and a blush by an exclamation of Archie's.

"Signa, why don't you answer me? That's the third time I've asked you, and you don't take a bit of notice. I don't believe you're listening!"

"I am afraid I was not, Archie," she confessed, penitently.

"I asked you if you didn't think him a very nice gentleman?"

"Yes, very," said Signa. "He was very kind to you, was he not?"

"Yes, awfully. It's a pity he's so poor, isn't it?"

Signa looked down at him with a smile.

"Poor! How do you know he is poor?"

"I knew by his clothes," said the child, with that odd shyness peculiar to him; "they were all worn, and his hat was old—I'm sure it had been wet through fifty times. Besides, he did not wear a ring or a watch-chain, like papa, you know. I'm sure he was poor. I wish I had offered my pocket-money. I've got it all in my pocket, Signa."

"I'm very glad you didn't," said Signa, laughingly. "Your eyes are very sharp, Archie, but don't trust them too much. At any rate, though Mr. Warren may be poor, he is a gentleman, and one doesn't offer gentlemen one's pocket-money. Do you understand?"

"I think I do," he replied, thoughtfully. "But I don't think he would have been very angry; he would only have laughed, and then I should have felt ashamed. Yes, I'm glad, too, that I didn't offer him my money."

Archie's chatter served to keep Signa's mind on the same tack, and when she went down for luncheon she found herself still thinking and wondering whether Hector Warren would pay his intended visit that afternoon. So absorbed was she that the rector had to ask her twice to pass the salt; and Mrs. Podswell regarded her with a stony stare of cold-blooded surprise when she passed the pepper instead.

"You seem—ahem!—a little absent this morning, my dear Signa," said the rector, with a feeble smile; and Mrs. Podswell snorted, complainingly,

"Absence of mind is another term for inattention to the wants of others."

"I beg your pardon," said Signa, coloring for a moment, but recovering herself almost instantly. "I was thinking——"

"Of what may we inquire?" demanded the rector, with a heavy sort of playfulness—"of your new bonnet, or what?"

"We will say it is the new bonnet," said Signa, quietly, and the rector, not being quick at repartee, smiled feebly and relapsed into silence.

While the cloth was being removed, and Signa was rising to take her departure for the schoolroom, the servant entered, and said that a gentleman wished to see the rector.

Signa's face flushed, but fortunately her back was turned to the sharp eyes of her aunt, who had betaken herself to her sofa.

"What name?" asked the rector, reluctantly—he did not like being disturbed immediately after his meals. "Always ask the name, Mary."

"It is somebody to sell steel pens or patent door handles," moaned Mrs. Podswell. "Mary is a careless! Of course she has taken him into the drawing-room. One of these days some one will get in and steal something. It is just the way they do it—get admission to the house, and strip the drawing-room while the servant has gone to inquire."

"Mr. Hector Warren, sir," said Mary. "He says he's very sorry, but he hasn't a card."

The rector looked up from his cozy chair with a sigh.

"I don't know anybody of that name, do I, Mary, my dear?"

"No," said Mrs. Podswell, emphatically. "It's some one come for a subscription. Show him up here, Mary, and do be more careful for the future."

Signa turned to leave the room, but the rector stopped her. Taking up a quantity of papers he held them out to her with a conciliatory smile.

"If you have nothing more important to do, my dear Signa, will you look these parish papers over for me, and enter them in the book? It is on that table. You can do it here."

Signa had once or twice made herself useful with the parish accounts, and though she would have much preferred escaping, she took the papers and seated herself at the table.

She had scarcely done so, when the door opened, and Mary announced "Mr. Hector Warren."

Signa raised her eyes, and saw the tall figure standing in the doorway, but, though the dark eyes rested on his face for a minute, he made no sign of recognition, though Signa fancied that a faint, almost imperceptible smile shone in the dark eyes.

The rector looked up with a slight elevation of the eyebrows — which might be taken for an apology, for even his dull brain could not fail to recognize the fact that his visitor was a gentleman—and stood rubbing his hands behind his back.

"Mr.—er—Mr. Warren, I believe?" he said. "You wish to see me?"

The stranger inclined his head, and the rector, shuffling with marked embarrassment, nodded with a sickly smile.

"Yes, yes, certainly. Will you—perhaps we had better go to the library. Will you follow me, sir?"

The visitor half raised his hand.

"Pray do not let me disturb you," he said, in his low, grave voice. "My business is by no means private. I am the bearer of a letter—I may almost say of introduction. Permit me to hand it to you," and he took an envelope from a pocket-book and handed it. As he did so, Signa saw that the envelope was emblazoned with a coat of arms in crimson and gold, and the rector saw it also, for his manner grew more embarrassed and apologetic.

"Pray sit down. That is a comfortable chair. Yes; a letter—ahem! from—dear me, this is very extraordinary, my dear; yes, very extraordinary!"

"What is it?" demanded Mrs. Podswell, with ill concealed impatience and irritability. "Who is it from?"

"Well, really—dear me! From, my dear? It is from Lord—ahem—Lord Delamere!"

Signa looked up involuntarily. Hector Warren was leaning back in the chair with natural, easy self-possession, his eyes resting wattingly upon the rector; but as Signa glanced up he seemed to know it, and for a second's space his eyes turned and met hers. Signa bent over her papers again instantly.

"From Lord Delamere?" echoed Mrs. Podswell, rising with a sudden alacrity which one would scarcely have deemed her capable of. "Indeed!" and her light eyes glanced at the quiet figure in the chair curiously.

(To be continued.)

WHAT BETTER MESSENGER.

(London Tit-Bits)

Over the garden fence the conversation had suddenly turned acrimonious.

"An' if your boy 'Erbert ties any more cans on our pore dog's tail," was Mrs. Moggins' stern ultimatum, "we'll 'ear about it, that's all! Ah, an' per'aps you've gone wiv that saucepan wot you borrowed last Monday."

"'Erbert," asked Mrs. Grubb, shrilly, "wot 'ave you bin doin' to Mrs. Moggins' dog?"

"Nothin', ma," replied the small boy, indignantly.

"There!" said his mother, triumphantly. "An' you returned 'er saucepan yesterday, didn't you, dearie?"

"Sent it back by 'er dog," said Herbert, calmly.

"How's things in Plunkville?" "Quiet." "How's your piano fund coming on?" "Well, every time we give an entertainment to raise money we get deeper into debt."—Louisville Courier-Journal.

Resourceful Burglar.

A constable going the rounds of his beat in London a few nights ago noticed a light in a house from which the family and servants had gone out of town. After the officer had pulled the bell several times a man put his head out of the bedroom window to say that he would be down in a all was right. After chatting for a little dressing gown and carrying a candle in his hand.

The constable explained his suspicion, whereupon the man stated that he had just run up-town to see that all was right. After chatting for a little he invited the constable to have a glass of wine. He lit the dining-room gas and produced a bottle of port. After they had drunk each other's health he let the constable out and bolted the door after him.

The man lost no time in getting the "swag" together and left the house by another exit.

Minard's Liniment Cures Garget in Cows.

Chronometers Aboard Ship.

A ship's chronometer is the most wonderful and accurate timekeeper made, for upon its accuracy depend the lives of all on board. So accurate, indeed is a ship's chronometer that it does not vary a second a day. An error of only a few seconds may put a captain of a vessel miles out of his reckoning at sea and run the ship into great danger. For that reason every ship's timepiece goes through the most thorough tests before it is pronounced perfect. It is set going in a very hot room and then transferred to a cold one, for it may be used in any part of the world, from the polar regions to the tropics, and it must always keep good time.

Most large vessels have three chronometers on board in case of accident, and whenever a vessel goes into port they are sent on shore and tested to see if they are still accurate. On board ship the chronometer is kept amidships, because there are the least motion and the smallest variation of temperature.

When Appetite Fails And Health Declines Follow This Suggestion

REQUIRES ONLY A COUPLE OF SMALL TABLETS AFTER MEALS TO FIX YOU UP AGAIN.

A New Blood-Food Called Ferrozone Sure to Restore You Quickly.

Every day comes the good news of wonderful cures with Ferrozone.

In Peterboro it worked marvels for Louis Meehan—put him right on his feet—made him entirely well.

"About three years ago," says Mr. Meehan, "I had the Grippe, which left me in a very run-down condition that finally developed into Dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me, and on the advice of a friend used Ferrozone. It not only cured me of Dyspepsia and Biliousness, but has built up my strength to what it was before I had the grippe. I can recommend Ferrozone as an ideal restorative."

Ferrozone gives you force, energy, vim.

It strengthens the stomach, cures indigestion, prevents headaches—guarantees good health.

Thousands use Ferrozone—they all feel better; try it yourself—sold in 50c boxes, six for $2.50, at all dealers or direct from The Catarrhozone Co., Kingston, Ont.

FACTS FOR THE CURIOUS.

Eighteen thousand bricks can be manufactured by the steam process in 10 hours.

An agricultural census of Uruguay has been postponed because of the losses occasioned by an invasion of locusts.

It is estimated that those slain on the battlefield represent about half the total deaths attributed to war.

A dinner table reaching round the earth 16 times would be required if the inhabitants of the world sat down at a meal together.

With a four horsepower engine a motor driven plow of English invention cuts a six-inch furrow at a speed exceeding three miles an hour.

The charts of the coast and geodetic survey will be publicly displayed at the leading post offices of the United States to make persons familiar with their use.

The islands of Lake Erie are part of a limestone ridge that the ice age glaciers did not wholly reduce. Geologists call this ridge the Cincinnati anticline. It extends into Tennessee.

A calculator that shows the money values of one country in the terms of several others and applies the values to various weights and measures has been invented by an Englishman.

That the "back to the farm" movement is led by city boys is shown by statistics at the agricultural school of the Pennsylvania State College. To day the three large cities of Pennsylvania have more than 200 young men in the school. Some of these have never seen a farm, except at a distance.

Aluminum is one of the most abundant of metals, and ranks third among the elements which compose the crust of the earth, being exceeded only by oxygen and silicon. It is an important constituent of all common rocks, except certain sedimentary rocks, as sandstone and limestone. It is never found native or in elementary form, but occurs as an oxide, hydrous oxide, flouride, phosphate, sulphate silicate or other compound.

Dr. Henry Noble McCracken, president of Vassar College, says "the modern tendency of education is to undervalue all that does not have a visible dollar and cents value. The economic side is ever uppermost, and the greater part of our educational facilities is trained upon the problem of becoming successful in our present attitude is that in our eagerness to be practical we forget to be theoretical, thus putting the cart before the horse as it were."

It is quite likely that at no distant date all the amateur wireless stations in the United States will either be abolished or will be operated under strict government control. There have been repeated clashes between the amateurs and the navy radio men, and at times the latter have been seriously interfered with in their work by the interference of the amateurs, so that it seems that the only way to prevent this is for the government to take control, which has been recommended in a report by Captain W. H. G. Bullard, superintendent of the navy radio service. If the recommendations are accepted the radio service will be a government monopoly.

A WOMAN'S MESSAGE

If you are troubled with weak, tired feelings, headache, backache, bearing-down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write today. Address, Mrs. M. Summers, Box 8, Windsor, Ontario.

RETIRED BURGLAR.

Crying Babies Gave Him Two Shocks in One Night.

"Of course in my business, same as in any other," said the retired burglar, "you learn by experience. One of the first things I learned in that way was to avoid houses where they had young children, infants.

"Grown folks may sleep right through thunderstorms, windstorms, things falling down in the house, most any sort of racket, but you never can tell what an infant will do. And there some grown up folks that will sleep right through anything else will wake up sharp at the smallest peep from an infant. They seem to be tuned that way. But I had to learn this by experience.

"One night when I was new in the business I went into what seemed to me a promising looking house in the suburban district. Got in by the basement cellar window and padded upstairs to the second storey front room with no trouble at all and went straight to the bureau. I opened the top drawer gently, without a squeak, and when I turned in my light the very first thing I saw was a diamond ring that I guess must have made my eyes sparkle as much as the ring did. It was a big stone—I should think two or three carats.

"It was a man's ring, and instead of slipping it straight into my pocket as I should have done I put it on my finger for just a moment to look at it. At that same instant I heard a baby begin to cry.

"I had seen two persons in a bed in this room, but I had not observed a crib over on the other side of the bed. But the instant that baby cried one of the figures in the bed raised up on its elbow with its back toward me and looked over into the crib at the child, and I didn't need to have anybody tell me that it was time for me to go, which I did, without those two persons in the bed knowing then that I had been there at all.

"When I got back into the street it was still within what you might call my business working hours. I hadn't been in that house ten minutes and I thought I still had plenty of time for another.

"In this second house I had just exactly the same experience as in the first, with one thing added that I will tell you about. In this house there was a crib which I saw, and that ought to have been enough for me, but sometimes, you know, we have to have our experience rubbed in.

"I went to the bureau here just the same as in the first house and opened the top drawer and was pawing around in it with one hand and holding the lamp with the other when the baby here fairly screamed—nightmare, I suppose. Two persons in the bed jumped up as if they'd been blown out of bed, one on the side toward the crib and the other on the side toward me, but I got out and got away.

"I hadn't much more than got settled down and started on the road for home when I began to feel as if something was wrong, as if I had missed something or lost something, and then it struck me all of a sudden that I had lost my diamond ring! I must have clenched my hand on it when that first baby cried, for I know I still had it on my finger when I reached into the bureau drawer in that second house, but there I must have left it. That second baby's sharp cry was really startling, and when it struck me I must have let go of myself for just an instant; let my hands open, and in that instant the ring slipped off my finger.

"Those two experiences, being scared out of two houses by infants and losing a valuable diamond ring all in one night, were enough to teach me the lesson, and from that on as long as I was in active business wherever I went through a town prospecting by day I always left out of my calculations all houses around which I saw a baby carriage."

TRAPPERS!
Send your
RAW FURS
to JOHN HALLAM
and receive highest cash prices. We send money the same day the furs are received. Charge no commission—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada, who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

PLANTS OFTEN ARMED.

Only Goat Will Attack One Plant —Some Carry Poison.

Many plants protect themselves from their enemies by the use of spikes or prickles, and venom, just as certain animals do. Of those using the first named device there are—as a naturalist pointed out—innumerable examples. The bramble, the gorse, and the holly are familiar instances of shrubs and trees "armed to the teeth," so to speak. Many plants imitate the reptiles in arming themselves with venom. Of these are the deadly nightshade, or belladonna, and the nux vomica. Less destructively inclined are those plants which are simply protected by their disagreeable taste. The common buttercup, which is one of these, is generally shunned by horses and cattle. A plant which, like the skunk, is protected by a disagreeable smell is the figwort. Only that hardy and insensitive animal, the goat, will touch it.

THE ONLY WAY TO CURE RHEUMATISM

MUST BE TREATED THROUGH THE BLOOD AND THE POISONOUS ACID DRIVEN OUT.

The tortures and twinges of rheumatism are not due to cold, damp weather, as so many people suppose. Rheumatism comes from poisonous acid in the blood. This is a medical truth that every rheumatic sufferer should realize. There is only one way to cure rheumatism—it must be treated through the blood. All the liniments and rubbing and so-called electrical treatment in the world will not cure rheumatism, and the sufferer who tries them is not only wasting money, but is allowing the trouble to become more firmly rooted in the system and harder to cure when the proper remedy is tried. Dr. Williams' Pink Pills have had remarkable success in curing rheumatism because they go right to the root of the trouble in the blood, driving out the poisonous acid, releasing the stiffened joints, clearing away the torturing pains, and giving the victim renewed health and ease. Mr. Vincent Brow, Havre Boucher, N.S., says: "For two years I was an almost constant sufferer from rheumatism, the trouble being so bad at times that I could scarcely get about. The trouble seemed to bring with it anaemia, and altogether I was in a very bad condition. I used doctor's medicine for almost a year without relief. Then on the advice of a friend I decided to try Dr. Williams' Pink Pills. I think I took altogether about a dozen boxes, with the result that I am again enjoying perfect health."

You can get these pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The Way of a Boy.

This is the way a boy comes home
  And the way it shall ever be:
A [illegible] or test through the leaf and
  [illegible]
A coat cast off and quite forgot,
  A whistle and ringing cheer,
A [illegible] cast out and quite clear,
And a romp near every well known spot
  [illegible] way from here to here.

This is the way a boy makes haste,
  And the way it has ever been;
A squirrel seen is a squirrel chased,
  And a top is made to spin;
A frog to chase and a brook to wade,
  And the shade is a place to lie
After the rest of the game that's played
  When the sun is hot and high.

This is the path a boy calls straight:
  By every winding way
Where berries are or wild birds wait
  Or squirrels dart at play;
By banks that bid you sit and cool
  Two dusty feet and brown
In the pebbly shallow of the pool
  That's on the way from town.

This is the errand swiftly done,
  As doing shall ever be:
An ounce of care to the pound of fun,
  And an hour that grows to three.
A fence to climb and a rail to stride,
  With berries to hunt and share,
And a breathless quarter hour beside
  A timid woodchuck's lair.

And this is the thing that a boy calls care
  And the thing it shall ever be:
An old straw hat that's lost somewhere
  In the shade of some far off tree;
A shirt that's damp or trousers rent,
  A bruise or a hornet's sting,
And lagging footsteps homeward bent
  In the soft twilights of spring.

So these are the ways that boys all know
  And so may they ever be:
Fancies as fickle as winds that blow,
  And dreams as wide as the sea;
Heaven above where the blue sky smiles
  With no day overlong,
And a whistle of merry tunes that whiles
  A whole world into song.
—James W. Foley, in Youth's Companion.

Minard's Liniment Cures Distemper.

"I don't hear you complain any more about the cost of living." "No. It seems quite reasonable after getting rates from some summer hotels."—Louisville Courier-Journal.

ISSUE NO. 42, 1916

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

WANTED— EXPERIENCED COOK-general; no laundry work; wages $25.00; references. Address, 2[illegible]5 Queen street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital, St. Catharines, C

WANTED
Help for Woollen Mill, Carders, Weavers, Fullers and Napper Tenders. Good wages paid in all Departments and steady work assured. We have several openings for inexperienced help, where energy and ability will bring promotion. Wages paid to apprentices while learning weaving. Special inducements to family workers. Write, stating full experience if any, age, etc., to the SLINGSB MANUFACTURING CO., LT BRANTFORD, ONT.

GIRLS WANTED
Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.
CHIPMAN-HOLTON KNITTING CO., LIMITED,
HAMILTON, ONTARIO.

RABBITS FOR SALE.

Temporarily overstocked; bargains while they last. Grey Flemish Giants, Rufus Red Belgian Hares all ages fully pedigree. Write to
DONALD WATERS,
175 Jackson Street West, Hamilton, Ont.

NO PRECAUTION NEGLECTED.

(Harper's Magazine)

The little son of a clergyman recently appeared at breakfast with distinct evidences of a hastily made toilet.

"Why, Edmund," his mother remonstrated, "I believe you forgot to brush your hair!"

"I was in such a hurry to get to school," he explained.

"I hope you didn't forget to say your prayers?" she asked anxiously.

"No, siree!" was the emphatic assurance: "that's one thing I never forget. Safety first!"

Minard's Liniment Cures Diphtheria.

ENGLAND.

"Great England put her armor by, and stretched
  Her stately limbs to slumber in the sun.
The nations, seeing then how long she slept,
  Communed together, and in whispers said:
'Lo! She is old and tired; let us steal
  The crown from off her brow. She will not know.'
And Goneril and Regan, over seas,
  Mocking her, cried: 'Her time is past Her blood
Is sluggish, and her rusted sword fro out
  Her scabbard she will draw no mor And so,
Thus gibing, flung with cruel hands th seeds
  Of discord and of hate amidst her sor
But from the East there came a bl too loud,
  As from the West there came a ta too much;
And she, awaking, raised her head, a and saw
  Around her all the faithless frien and all
Her sisters and her children jeering her,
  And crying, 'She is old' and meting out
Her lands among themselves, and par celling
  Her honor. Then, swift as lightnin flashes
From blue skies, her glance of scor fell on them,
  And they crouched like wolves the are o'ermastered.
England stretched out her hand a touched the world—
  England arose, and spake, and calm said:
'Nay! I am mistress still!'"

Thirty-four years ago Ouida (Lo[illegible] Ramé) wrote these lines. She lived within six years of the great war.

TWO SIDES OF THE STORY.

(Rochester Times)

With pathetic tears on her baby cheeks little Ethel ran up to a big, stalwa policeman.

"Please, sir," she sobbed, "w you come and lock a bad man up?"

"What's he been doing?" asked t man in blue, gently.

"Oh—boo—hoo," wailed Ethel; "h [illegible] broken my hoop wif 'is nasty b [illegible]"

"Has he?" replied the bobbie, angril as he saw her tears flow afresh. "Wher is he?"

"Oh, you'll easily catch 'im," said Ethel, drying her tears. "They've just carried 'im into that chemist's shop o a shutter!"

An Ingenious Picture.

There is in one of the Europea picture galleries a painting calle "Cloudland." It hangs at the end o a long gallery, and at first sight looks like a huge repulsive daub o confused color without form or come liness. As you walk toward it th picture begins to take shape. It prove to be a mass of exquisite little cheru faces like those at the head of th canvas in Raphael's Sistine Madonna. If you go close to the picture you see only an innumerable company of little angels and cherubim.

It's always the open season for office hunting.

For a Quick Pick-Up Luncheon try that most delicious, nourishing, whole wheat food, Triscuit, the shredded wheat wafer-toast. It contains all the body-building material in the whole wheat grain, including the bran coat which promotes healthful and natural bowel movement. It is rea whole wheat bread withou yeast, baking powder c chemicals of any kind—a ideal food for children b cause it compels thoro mastication and ensure fect digestion. A cris "snack" for picnics o sions. Toast in the and serve with butter, cheese or marmalades.
Made in Canada

Belgian Press Under Germans

The following is one of a series of articles from a correspondent of The Christian Science Monitor, who has had opportunity of making an extended stay in Belgium.

IV.

The Hague, Holland—The press of occupied Belgium is in itself a historic study. All save one of the former newspapers have ceased publication in Belgium or moved abroad to neutral or allied countries, some appearing in Holland, others in France and England. It would seem a very difficult thing to edit a newspaper where where the censorship that hand of its editors, but it is ten times more difficult to publish a newspaper in Belgium, which must not only voice the feelings of its readers and the people of Belgium, who are to read it, but at the same time must conform to the German censorship, and the requirements of authorities who deal out imprisonment to those who in any way hinder their oppressive policy or their war aims. Thus the new Belgian press has to struggle against unprecedented obstacles. All of the papers naturally are censored, controlled by the Germans, or are under German influence. At any rate, they are not the ideal journals that Belgians would like to have. They in no way resemble the Petit Bleu, Derniere Heure, Le Soir, the favorite of the Brussels population, or the Etoile Belge, which was the daily companion of the Belgians two years ago. The papers they are allowed to read now are just as foreign to their sentiments as is the German rule itself, yet they read them because they are thirsting for news, in the same way that they stop at street corners to read the German official bulletins, silently, but with a look that seems to say: "These Germans are always victorious."

In Brussels there are 16 papers appearing in the Flemish language. In Antwerp and Ghent even the old Flemish papers being still published. In the smaller towns, such as Namur, Hassell, Alost, new weekly publications satisfy the desire for news, but these are just as much under control as those in Brussels. Among the new papers, the most popular seems to be the Bruxellois, which appears twice daily. "Tirage, jusqu'a 45,000 exemplaires." It publishes the official bulletins of all the belligerents and carries many advertisements. Another paper, Le Quotidien, is quite a fair-sized sheet, and also publishes maps. The only paper which existed before the war and still appears in Brussels, is the Messenger de Bruxelles. It now deals chiefly with the life of the provincial towns, and has a celebrated women's page, with illustrations.

Nevertheless, the most interesting journal in Brussels until recently was La Libre Belgique (Fonde de Ire Fevrier). It announced that its appearance would be "regularly irregular," and that it would not be submitted to censorship. As a matter of fact it was never censored, for though it was printed somewhere in Brussels, nobody knew where until a short time ago, when, after hunting for it for two years, the Germans discovered its officers in a cellar, in a most unexpected part of the capital. It was a very unpleasant publication for the German military authorities, and they set their whole secret service in motion, but for over 18 months it was all in vain. La Libre Belgique made fun of the Germans and their methods; it announced, on the front page, that all letters and communications were to be addressed to the "Commandatur—Bruxelles," that the offices were to be found in a cellar, and that "No advertisements would be accepted until better times arrived, etc." The paper was distributed free among the people of Brussels, who shared it with one another and thoroughly enjoyed it. Certainly this bright little organ served to unite the nation and cheer those who were depressed more than any of the other two dozen papers which appeared with the consent of the commandatur.

The economic papers are appearing as usual. The 70-year-old L'Ami de l'Ordre, a Clerical journal at Namur, appears with its old-time contents, but cautions its readers that it is "publie sous le controle de l'authorite militaire allemande." In the first year the Belgians boycotted the new publications, because they knew they were published for the German authorities. Later, however, they got used to them and found that they were better than nothing. Sometimes they get hold of one of their old journals, which appears in Havre or London, and it is a day of rejoicing for those who do so. There are also German publications appearing in Belgium, for this is another way in which the Germans are trying to spread their kultur. An agricultural weekly organ especially is being distributed freely. It is called Der Landmann, and is described as a "Landwirtschaftliche Wochenschrift." It gives advice to farmers on agriculture.

Best Foods For Children

Every year during the warm weather many little children sicken and die. In the majority of cases neither illness nor death would have occurred had they been properly fed. Parents and caretakers are responsible in summer and at all other seasons for much sickness that could be averted, simply because they do not know what kind of food is suitable for their little charges. Infants and tiny toddlers are, as a rule, somewhat better cared for than children a little older. It is the child from three years upward who escapes watching usually, and helps himself to food which disorders his digestion and invites illness. It is to fill the needs of children from three to six years of age that the following dietary has been prepared:

Children from 3 to 6 years of age may be allowed, if they are healthy, meat in some form once a day. The best are beefsteak, mutton chops, roast beef or lamb, white meat of chicken and delicate kinds of fresh fish, which should be boiled or broiled. Beef and mutton should be rather rare.

Eggs are an important food. They should be given boiled or coddled—never fried. Children rarely are able to digest the whole egg. Some, however, can take two; a few cannot take them at all.

Milk should be the basis of all diet; most children need a quart daily. If it is digested with difficulty it should be diluted with water. Milk should always be given warm.

Cream may be used upon cereals, potatoes, in broth, and mixed with milk. It should never be used upon fruits.

Children need vegetables. Potatoes may be given once a day, perfectly baked. Cream or beef juice poured upon the potatoe is better for the child than butter. Give one green vegetable a day in addition to the potatoe. The best vegetables are spinach, asparagus tops, stewed celery, string beans, carrots and fresh peas. All vegetables must be thoroughly cooked.

Cereals are needed—these must be thoroughly cooked. Give oatmeal, wheaten grits, hominy, rice, cornmeal, farina and arrowroot. Never give children ready-to-serve cereals.

The cooked cereals should be well salted and served with milk or cream, but with very little sugar.

Soup and broth made from meat are safer for children than vegetable broths. Dried bread, zwieback or stale bread may be given every day.

Desserts should be limited to junket, plain custard, rice pudding without raisins. Once a week a small quantity of ice cream may be given.

Children need fruit every day. Oranges, baked apples and stewed prunes are the best for them. Peaches, pears and grapes, with the seeds removed, if fresh and thoroughly ripe, may be eaten raw; it is better, however, to give these fruits as well as berries, stewed. If fruits and berries are not fresh they are dangerous if eaten uncooked.

Articles forbidden—The following articles should never be given:

Meat—Ham, sausage, pork in all forms, salt fish, corned beef, dried beef, goose, duck, game, kidney, liver bacon, meat stews and dressing from roasted meats.

Vegetables—Fried vegetables of all varieties, cabbage, carrots, potatoes (except when boiled or roasted), raw or fried onions, raw celery, radishes, lettuce, cucumbers, tomatoes (raw or cooked), beets, eggplant and green corn or canned corn.

Bread and cake—All hot bread and rolls; buckwheat and all other griddle cakes (particularly those containing dried fruits and heavily frosted.

Desserts—All nuts, candies, pies, tarts and pastry of every description; also salads, jellies, syrups and preserves.

Drinks—Tea, coffee, wine, beer and cider.

Fruits—All dried, canned and preserved fruits; bananas; all fruits out of season and stale fruits, particularly in summer.

When to give the meals—From the third to the sixth year of age, four meals should usually be given daily and at regular intervals—e. g. 7 and 10.30 a.m.; 1.30 and 6 p.m. The 10.30 a.m. meal should in most cases be smaller than the others.

First meal—Half an orange, two table-spoonfuls of some cereal well salted, with two or three tablespoonfuls of cream, a glass of milk; one slice of bread with a little butter.

Second meal—A glass of milk or cup of broth (both must be warm), with bread or two or three biscuits (crackers).

Third meal—Two tablespoonfuls of finely divided steak or chop, one tablespoonful of baked potato, one tablespoonful of spinach, bread and butter, a cup of junket, water to drink.

Fourth meal—Warm milk with bread, or milk toast.

From the list of foods allowed a sufficient variety in the diet can be secured. To be sure that the child receives the food that is correct for it, the caretaker should make a copy of the foods "allowed" and one of the forbidden, and hang them side by side, to be consulted at all times.

Teach the child to eat slowly and to thoroughly masticate the food. As a rule, up to the sixth year of age, mastication is very imperfect, and for this reason the food should be finely divided (cut into small pieces). Encourage the child to take plenty of time for the meal. Hurrying through a meal is apt to cause indigestion.

Do not force children to eat if they they are disinclined to do so at the regular hours of meals. Neither should indigestible articles of food be given to tempt the child to eat. Food should not be allowed between meals when it is habitually declined at mealtime. If a child refuses to eat and there is no fault to be found with the food offered to it at meal time, it should seldom be offered again until the next meal time.

In all cases of temporary indisposition, no matter of what nature, and during periods of excessive heat in summer, the amount of solid food should be reduced, and more water given. If milk is the food it should be diluted.

Sealskin bids fair to be the most popular trimming for this winter. It is used with distinction in this French coat of taupe colored velours de laine which has two collars, one of seal, and below it a square cape trimmed with seal.

THEN PECKEM FLED.

(Rochester Times)

"William," said Mrs. Peckem, sternly, "did you ever stop to think that someone might steal me when you were away?"

"Well," responded the poor husband, with a faraway look, "I was a little alarmed when a horse thief was prowling through these parts last week."

Mrs. Peckem stiffened up haughtily.

"A horse thief, eh?"

"Yes. I heard that he carried off two or three nags from this district."

And then Peckem made a bee-line for the club.

HOW TO FEED DAIRY CATTLE PROFITABLY

The Methods Followed by Mr. W. Stewart of Campbellford, Ontario—Silage and Alfalfa Indispensable How He Maintains the Fertility of the Soil.

When a man has been in the same business for forty-five years or more he is bound to gather an immense amount of information which, if it could only be collected and printed would save many others who are starting in the same business many pitfalls.

The writer does not presume for one moment to be able to set down for the benefit of the reader all the practical information regarding the dairying business that Mr. W. Stewart, of Campbellford, Ontario, has gained during the forty-five years or more that he has been in the dairy business; nor, indeed, does he undertake to write down all that he himself learned from Mr. Stewart. All that can be done in this article is to set down a few of the things which Mr. Stewart considers the essentials in running a dairy farm successfully.

Mr Stewart, like a good many other successful dairymen, who now breed pure bred cattle exclusively, did not start in with pure breds. He first had grade cattle and went into pure breds gradually, as he gained experience.

In reply to a query as to how he came to breed only pure bred cattle, Mr Stewart replied: "I started breeding pure bred Ayrshires about forty-five years ago. At that time I owned grade Durhams. I had a good herd, as I always bought and bred my animals for their milking qualities, though I wanted an animal that at the same time could be fattened and produce a good carcass.

HOW HE STARTED.

"A neighbor of mine brought two pure bred Ayrshires. As a dairyman, of course, I was interested in them. I found that these cows gave as much milk as my Durhams, but with much less care and attention, and on rougher and cheaper feed, and so I decided to quit raising dual purpose animals and go in for dairy cattle pure and simple. I started with some grade Ayrshires, but soon bought two pure-bred heifers and a bull and that started me in the pure bred business."

Mr. Stewart has 25 head of cattle and is milking 14 cows at the present time. He is a strong believer in weighing the milk and using the Babcock tester to see which cows are earning for their living and which are merely boarders.

It would be a good thing for the dairy business as a whole and for dairy farmers individually, if more of them followed Mr. Stewart's example. No matter how well one may think he knows his cattle, if careful tab is not kept on the amount of feed consumed by each cow and the amount and quality of milk she gives in return, one is bound to keep at least one or two "star boarders." Moreover, it is only by weighing the feed and the milk produced that one is able to tell by feeding more grain to a certain cow whether she will respond by giving an increased quantity of milk.

With a good cow up to a certain point it is possible to increase the quantity of milk given by increasing the amount of feed. When this point is reached it is impossible to tell unless everything is carefully weighed. Mr. Stewart has a fixed standard in milk production, and unless his cows come up to this standard he gets rid of them.

As an instance of what can be done by feeding and weeding, Mr. Stewart made $63 clear profit from a heifer with her first calf. This was made from the sale of the milk alone and did not include the calf.

Silage and economical feeding of dairy cattle, in Mr. Stewart's opinion, are inseparable. "I think I can safely claim to be the first man to put up a silo in this part of the country," said Mr. Stewart. "This was over twenty-five years ago. I well remember that after the job was completed and the neighbor who helped me to put it up was going home he said: 'Well, Stewart, I was glad I could oblige you by helping to put the silo up. When you are ready I will be equally glad to assist you to take it down.' Although the old silo has been taken down long ago, I never have been without a silo from that day to this.

"I prefer two small silos to one big one, as they are easier to feed from. The trouble with a big silo is that if you do not feed at least two inches off the top every day the silage will go bad on you.

"I never put in less than twenty acres of corn of silage. I find that it is the cheapest succulence feed I can grow. I find it a God-send in July and August, when the pastures dry up. I don't know what I would have done without it this year. While the milk flow of some of my neighbors' cows has dropped by one-half, from my cows you would never know that we have just had a month of the hottest weather on record. Although it helps some to feed hay and grain when the pastures get bare, these dry feeds are not "in it" with silage for keeping up the milk flow. You can feed all the grain you like, but if the amount of succulent feed the cows get is cut down for any length of time you can never get them back to to their former milk flow. Some people object to a silage for horses, but I feed mine a forkful all the year round, and it does them good. The silage, however, must be of better quality than it is necessary to feed to cattle.

"In conjunction with silage, I find alfalfa invaluable for winter feeding. A pound of good alfalfa contains as much protein as a pound of oats. Milk is very rich in protein and on this account dairy cattle need a much richer or more concentrated ration than is required for fattening steers. By feeding alfalfa my feed bill is reduced by seventy-five or one hundred dollars every year. I don't have to buy so much cotton seed meal and oil cake.

"One of my neighbors has been growing sainfoin for a number of years and likes it, and I am trying some this year, as I see by the analysis that it makes rich hay."

DON'T GET CALVES FAT.

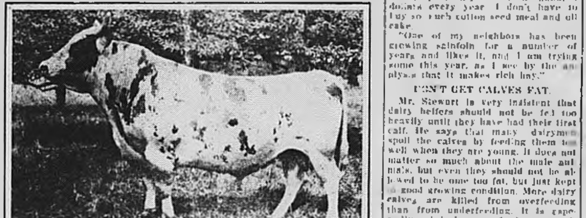
Mr. Stewart is very insistent that dairy heifers should not be fed too heavily until they have had their first calf. He says that many dairymen spoil the calves by feeding them too well when they are young. It does not matter so much about the male animals, but even they should not be allowed to be one too fat, but just kept in good growing condition. More dairy calves are killed from overfeeding than from underfeeding. It is especially injurious to feed too much skim milk. If given too much the animals will sour badly and get a setback from which they may never recover.

Mr. Stewart is a strong believer in the value of drainage. When his father came to the farm sixty-four years ago the place was practically a black ash swamp. To-day the farm has over four miles of stone drains in it besides open ditches.

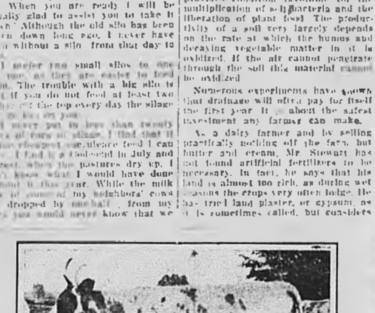
Drainage not only gets rid of the surplus amount of water that shapes the tiny roots of the growing plants, but it also aerates the soils and thus provides condition favorable for the multiplication of soil bacteria and the liberation of plant food. The productivity of a soil very largely depends on the rate at which the humus and decaying vegetable matter in it is oxidized. If the air cannot penetrate through the soil this material cannot be oxidized.

Numerous experiments have shown that drainage will often pay for itself the first year. It is about the safest investment any farmer can make.

As a dairy farmer and by selling practically nothing off the farm but butter and cream, Mr. Stewart has not found artificial fertilizers to be necessary. In fact, he says that his land is almost too rich, as during wet seasons the crops very often lodge. He has tried land plaster, or gypsum, as it is sometimes called, but considers it to be a soil stimulant. If farmyard manure is not used in conjunction with it, perhaps it would be right to call it a soil stimulant, as it liberates some of the insoluble plant food in the soil, but where rational methods of farming are practised and all the manure made on the farm is carefully conserved and returned to the soil its use can be safely recommended.



Springhill Cashier—bull at the head of Mr. Stewart's herd. He was first in class of aged bulls at the C.N.E. in 1914. His sire's dam gave 18,250 lbs. of milk in eight months testing 4.3 per cent. butter-fat.



May Beauty—eighteen years old and has dropped a calf every year since she was a two-year-old—gave 10,000 lbs. of milk in her 15th year.

FEET AND FOOTWEAR

Greatly as the modern human being falls below the standard of beauty there are few points in which the general average is so low as in the feet. Most people take a certain pride in and trouble about their figures, their hands, faces and hair, but they seem quite unaware that there is any difference between a beautiful and natural and an ugly and distorted foot. The only thing aimed at is smallness, with no thought of the true proportion between the size of the foot and the body. A tall person with tiny feet is as unnatural and as badly proportioned as a short one with big feet. Both are wrongly adapted.

The craze for small feet is responsible for an enormous percentage of deformed toes, bad carriages of the body with consequent faulty relations of the internal organs and of the spine and its muscles. The modern pointed toe and high heel throw the body all out of balance, force the great toe inwards (providing a good beginning for a bunion) and tend to atrophy the muscles of the calf and ankle, which never come fully into play. Modern surgeons are inclined to put down a number of cases of chronic constipation to faulty carriage of the hip and pelvis, whilst the absence of "spring" in the walk jars and tires the spine and the muscles of the trunk. If we consider for a moment it will be clear that the system of muscles and joints which is planned to carry and balance the whole weight of the body on the slender ankles and small supporting surface of the feet must of necessity be a delicate and complicated one, not to be lightly tampered with. No one would without consideration or mechanical knowledge meddle with the inside arrangements of a watch, changing this piece of leverage and that cogwheel; but anyone without the slightest knowledge of anatomy or even the laws of gravity will play tricks with their feet and expect no harm to come. They are usually mistaken.

PERSPIRATION.

We are apt, during the summer, to look upon perspiration as an inconvenient and even a distressing phenomenon, and one which we could well dispense with. Let us by way of consolation, consider its uses and function in the bodily economy. First and most important, perspiration is an agent for the elimination of waste products from the body. So great is the amount of these products carried away by means of the sweat glands that in cases of disease of the kidney, where the functions of that organ is impaired, its work can be almost replaced by stimulation of the organs of perspiration. Thus Turkish, hot air, and vapour baths enter largely into the treatment of these diseases of the kidney.

Perspiration has the further result of reducing the excessive heat of the body. It does this in two ways: First, by actually freeing the body from a certain quantity of warm water, and secondly, by wetting the surface of the skin so that it cools by evaporation. It is for these last reasons that it is so unwise to sit in draughts or in cold air after being over-heated and covered with perspiration. The rapid evaporation from so large a surface of the body is apt to chill it unduly, and so lower the vitality.

CARE OF THE HAIR.

All patent medicines are not rubbish, and all advertised "hair restorers" are not frauds. Still, with regard to the latter, we should do well to ask ourselves how much of the result claimed for the restorer, and undoubtedly produced, is due to the stuff applied, and how much to the manner of its application. The fact is that the scalp, like the rest of the surface of the skin, is apt to become dead and choked up unless it is frequently cleansed and stimulated. Now the best method of stimulation is firm but gentle rubbing and massage, whilst any slightly greasy or alcoholic fluid rubbed in and rubbed off is an effecting cleansing agent. It is an open question whether by following the instructions as to brushing and massaging the head and hair-roots given as directions with any advertised hair restorer, but substituting for the restorer a lotion made simply from one part of glycerine and eight parts of water, an equally good result would not be produced. In other words, the effects are mechanical, and not due to the virtue of the application.

IF AUSTRIA QUITS

(New York Tribune)

Reports from Petrograd suggesting that Austria may make a separate peace should be accepted with extreme caution. Conceivably Austria is in a mood for peacemaking. Conceivably the Dual Monarchy has sufficiently preserved her freedom of action, despite German influence, to take such a momentous step, but so far there is no evidence of this.

It is plain that Austria has just met with another great defeat, as yet less considerable than her breakdown of August and September, 1914, but nevertheless of the first magnitude. Coincident with this defeat, or perhaps consequent upon it, there have come the abandonment of the Italian operations of the Austrian drive from Trent toward Verona and Vicenza, and the recall of Austrian troops from the Balkans. The Russian advance has not yet been halted, and the loss of Lemberg and Eastern Galicia seems possible, even probable.

On this basis of military fact it is easy to see why Petrograd expects an Austrian collapse. Laying aside the question of the accuracy or fallacy of the Russian calculation, what would be the effect of an Austrian surrender, if it should come?

First of all, on what terms would the Entente be likely to make peace with Austria? Probably on some such basis as this: Russia would insist upon the possession of all of Galicia and Bukowina and the cession of Bosnia and Herzegovina, together with the southern end of Dalmatia, to Serbia. Italy would demand Trieste, the Trentino, the islands of the Dalmatian coast and probably most of Dalmatia. In addition Italy would require that Austria abandon all claims upon Albania.

In sum, Austria would lose, at the least, some 60,000 square miles of territory, with a population of about 12,000,000, or roughly speaking, a quarter of her area and a quarter of her population. With slight exceptions from Italian and Roumanian groups, this population is wholly Slav—Pole and Ruthenian in the east, Serb in the south and Slovene around Trieste. To-day the Slavs number a little more than half of the population of the whole Austro-Hungarian Empire. Peace on the terms indicated above would remove about half the Slavs and leave only the Slavs of Bohemia as a considerable Slav block.

Such a settlement would take no territory from Hungary. It would insure the supremacy of the Teutonic element in Austria and leave the Magyar control in Hungary undisturbed. It would unquestionably contribute to strengthening the Austro-Hungarian state.

But it would deprive the Hapsburg monarchy of practically all its water front on the Adriatic, and it would permanently extinguish the Hapsburg dream of extending its frontier to the Aegean and dominating the Balkans as it dominated Germany until the rise of Prussia. It would mean that Austria would have to surrender her Balkan ambitions, as she had been compelled to give over her Italian and North German influence.

By taking Galicia, Russia would carry her territory to the Carpathians and obtain a "natural frontier." Warsaw, and, in fact, all Poland, would no longer be a huge salient open to attack from the north and south and practically indefensible. Five million Poles would be added to the 12 millions in Russian territory and, save for the Poles of Prussia, the reunification of the Polish race would be accomplished.

More important, however, would be the practical termination of Austro-Russian rivalry in the Balkans. Serbia would be transformed into a considerable state, with a population of some 7,000,000, capable of barring the road to Constantinople and Saloniki. In her own time Russia could dispose of Turkey and establish herself at Stamboul. Once this happened, Bulgaria would become once more a Russian ward, since she would be isolated and completely at Russia's mercy.

Austrian surrender now would in effect change the whole face of the Eastern question. A century of rivalry between Romanoff and Hapsburg would end in the decisive victory of the former. Seated at Constantinople, politically supreme in Sofia and Belgrade, Russia would effectually bar the road of the Austrian and the German to the East. Asia Minor would conceivably be the occasion for rivalry between Russia, Italy, France and Great Britain, but beyond the grasp of Viennese and Berlin statesmen.

If Austria quits, the military situation would not be immediately changed. Germany would necessarily shorten her line, but behind the Niemen, the Vistula and the San—for she would never give up Western Galicia without a struggle—she would still have a strong defensive line. She would have to bear the full weight of Russian attack without an ally, but on a shorter front she might easily hold out for a long time.

Italy would disappear from the war with Austria; so would Serbia and Bulgaria would doubtless follow. It would be left for Germany single handed to fight France, Russia and Great Britain. Such a fight might continue long, but not even the German people could mistake the inevitable outcome.

The Petrograd suggestion will awake no great apprehension in Bucharest. If Austria makes peace before Roumania enters the war, then Roumania will not acquire Transylvania or Bukowina. The dream of a Greater Roumania will vanish, and this disappointment of the Roumanian patriots will be difficult to deal with. Perhaps the Petrograd rumor is really intended to influence Roumania and bring in this Eastern Latin state, which has so much to make from picking Hapsburg bones.

Once more it is necessary to caution observers to put small reliance upon present rumors of Austrian collapse. Austria is the weakest of the great states at war. She has suffered the most in losses of all save Russia, and she has no such resources in men as Russia. She has a huge Slav population, which is in part, at least, frankly disloyal; her financial situation was bad at the outbreak of the war and is possibly well nigh hopeless now.

But that Austria is yet beaten to the point of making a separate peace seems unlikely. She may get to that point before long if Russian victories continue. She will be a heavy burden for Germany to carry if her military disintegration continues at the present rate. But Austria in all her history has been at frequent intervals on the point of extinction and yet pulled through. Up to the present moment the Eastern offensive has in political as well as military consequences greatly exceeded the Western. It may continue to be the more important operation. The signs pointing to Austrian collapse are many, but the time has hardly come when it is safe to expect a separate peace.

Not only in its excessive length is this fur scarf distinguished but also in its pelt, for it is of the almost unprocurable fitch. The scarf is a rare possession for wear with formal costumes.

Chats With the Doctor

BY A PHYSICIAN

FIRST AID IN FRACTURES.

Fracture is such a common accident, and knowing what to do at the moment, and even more important knowing what not to do, make such a difference to the prospects of a successful issue, that some first aid knowledge ought to be possessed by everyone. The chief signs that lead one to suspect fracture when an accident has occurred, are pain and loss of power. The pain is generally of a severe kind, and is increased with every violent movement. The loss of power may be more or less, according to the situation and completeness of the fracture, and if any time has elapsed there will also be swelling in the neighborhood of the pain. In the majority of cases, an alteration of shape in the limb—if the fracture be in the limb. Whenever there is the smallest grounds for suspecting a fracture the case should be treated as such until a doctor has examined it and given a decisive answer.

A fracture which has not perforated the skin or which has no perforated wound from outside leading to it, is called a simple fracture. On the other hand, a fracture which has an external wound leading to the broken bone is known as a compound fracture, and is infinitely more serious, owing to the greater possible complications in the healing process. Now the chief object of first-aid treatment in the case of fracture is to prevent the jagged ends of the broken bone from movement, and so saving pain and further damage to the tissues, and especially preventing a simple fracture from becoming a compound one. This is effected by keeping the whole limb from movement of any kind. If the patient can be kept in the position and situation in which he happens to be at the time of the accident well and good, but if he has to be moved, splints of some kind should be applied. Any rigid substance will serve in emergency, provided it is of sufficient length to reach from above the joint above to below the joint below the fracture. A narrow strip of wood or a walking-stick or umbrella is admirable. This should be firmly attached to the limb by means of bandages, handkerchiefs, neckties, or string. One bandage should be applied above the joint above, one above the seat of the fracture, and one below the joint below. In the case of a fracture of the arm some kind of a sling should be improvised, and in the case of the leg the two legs should be bandaged together.

FOOD AND CLOTHING IN HOT WEATHER.

Though the climate of Great Britain when compared with that of many—probably of most—other countries, is uniform and stable the year through, yet even here the differences between the temperature of January and that of August are considerable. Unless we adapt our conditions to these variations we expose ourselves to the unnecessary discomfort and to unnecessary risks to health.

For it is certain that a great deal of the discomfort and ill-health peculiar to the hottest and coldest months of the year by the exercise of a little common sense and precision. In the first place, as far as we have any choice, we should endeavor to spend as much of our time as possible during the hot months in the open air or in rooms so freely open and ventilated as to provide for a continuous movement of the air. During the middle hours of the day, shade is important. The ideal form of room during these hours is one completely open on two sides at least. This, however, is a luxury impossible for most of us.

Apart from rooms and buildings, the chief conditions within our control in this connection are those which come under the headings of clothing and food. In these matters, at any rate, everyone has a good deal of choice. Clothing in hot weather should, of course be light. But that is by no means the end of the matter. It should also be openwove and porous to visible and also to invisible (or "insensible," as it is called), perspiration. It should among other things be absorbent. These qualifications are possesed by various materials, and it is found that it is their structure rather than their ultimate constitution which gives them their qualities. Cellular cotton and thin flannel are equally suitable for wearing next to the skin, and light flannel and thin, open-woven tweeds are good for outer garments. Specimens of bad materials are close-woven linen or cotton shirts, and the close-woven material known as Italian cloth, so often used for linings. The actual number of clothes should be as small as possible; and the nearer one gets to the ideal of one thickness of under garment and one thickness of outer garments, the better.

In the matter of diet we are as a race far from judicious. A better tendency has, however, lately been apparent. In the English summer months, nearly all of us would be the better for doing without meat altogether. Milk, fruit, vegetables, eggs, cheese, and a little fish make up an adequate dietary for everyone. Alcohol is better abstained from, but most people benefit by drinking water or lemon water, or similar drinks, in much larger daily quantities than is usual with us. One of the minor goods which we look like getting is a simplification of our national habits in the matter of food. Never, probably, have fruits and vegetables played so big a part, and rarely has meat played so small a part in our dietary as at present. It is almost certain that this change in our habits has come to stay.

WHAT HE PROPOSED.

(Washington Star)

"What I propose," says the man who puts very much in earnest, "is a political organization that will be free from all selfish interest, laboring only for the highest ideals—"

"I know," interrupted the rude person. "You're going to start one of those sea-serpent parties."

"Why do you refer to it as a sea-serpent party?"

"Because there ain't no such animal."

"Your father was very rich when he died, wasn't he?" asked the young man in search of an heiress. "Oh, yes!" replied the world-wise maiden. "Did he leave your mother much?" "About twice a week."—London Answers.

Was Troubled With Stomach and Liver
FOR SEVEN YEARS.
MILBURN'S LAXA-LIVER PILLS CURED HER.

Mrs. Thomas Sargent, Berkeley, Ont. writes: "I have been troubled with my stomach and liver for the past seven years; also have had constipation, causing headaches, backaches and dizzy spells, and at times I would almost fall down. I tried all kinds of medicine, without obtaining any relief. I commenced using Milburn's Laxa-Liver Pills, and they have cured me. I have recommended them to many of my friends, and they are all very much pleased with the results they have obtained from their use."

Milburn's Laxa-Liver Pills have been on the market for the past twenty-five years, and can be procured from all dealers.

The price is 25 cents per vial, or five vials for $1.00.

If your dealer does not keep them, they will be mailed direct on receipt of price, by The T. Milburn Co., Limited, Toronto, Ont.

Some Truths About German Conditions

(New York Sun.)

The alert and rigorous censorship practised by the belligerents renders it difficult to ascertain the true condition of affairs in their respective countries. This is particularly true of isolated Germany, about which the most conflicting reports have been published. It is therefore matter for satisfaction to the newsgatherer to secure from an unprejudiced source apparently reliable information.

The Ugeskrift for Laeger, a Copenhagen journal, publishes a letter from its editor, Mr. V. Scheel, who has recently visited Berlin in company with four other Danish citizens and army surgeons. He describes Berlin as greatly changed in many respects. The first impression indicating a deviation from the former gay appearance of the city was the absence of rubber tired vehicles and their substitution by old-fashioned cabs driven by decrepit nags. The predominance of women among conductors, motormen, letter carriers, street sweepers, and even street pavers, was plainly in evidence.

The food supply in Berlin was extremely scant, probably more than usually, by reason of the near harvest. Potatoes were unpromising on account of a cold spring. The bread ration was about six ounces a day, and of meat it was about four ounces a week, Tuesday and Friday, being no meat days. Cream was rarely seen anywhere, butter was doled out in quantities of not quite three ounces a week; eggs two a week; sugar very scarce. The substitutes ingeniously invented or devised, were not nutritious.

It was endeavored to gloss over this lack of substantial food by supplementing it with green vegetables, fruit and poultry, which were not restricted. In bargaining for a sandwich it became necessary to present a coupon for butter and meat from the bread and meat card. From this account the epicure had opportunity for mending his ways, and the householder was learning valuable lessons of economy and thrift that may aid in recouping the national loss in finances.

There appeared to be no more under nourished persons, however, than are usually found in a large city. The sight of women and children standing in line to buy food bears pathetic testimony to the scarcity of the necessaries of life. State organization of the food supply is a great aid to the people; children are fed in the schools and public kitchens supply midday meals of tolerably good food. Nursing women, young infants and the sick may procure at moderate prices extra food on a physician's prescription, or from hospital kitchens. There are no apparent detrimental effects upon the health of the community, as indicated by the municipal records.

The treatment of the wounded is a marvellous demonstration of efficiency: the Berlin hospitals have never been naturally full. Few capital operations are performed, the convalescents are kept interested in studying languages, learning practical trades or raising chickens and rabbits. The hospital food was abundant and above reproach. By a singular coincidence the College of Sculpture at Charlottenburg is converted into a hospital for injuries of the face. New faces are built up by transplantation of bone and flesh; "the whole is worthy of the Institution for Plastic Arts." Dentists are in charge who have learned transplantation, because it was easier to teach them this branch of surgery than to teach surgeons their mechanical art.

The prisoners' camps have been subjects of acrimonious discussion and recrimination; they are divided into quarters for 1,000 men enclosed with barbed wire. The food is no longer farmed out, but is calculated according to heat units, 2,500 a day. This is a little scanty, but scarcely scantier than most Germans are living on at present, and "judging from the prisoners' aspect, the nourishment was sufficient."

MILBURN'S
HEART and NERVE PILLS
CURED
Salvation Army Captain.

Capt. Wm. E. Sanford (Salvation Army), 38 Earlscourt Ave., Toronto, Ont., writes: "A short time ago I suffered from heart trouble, which seemed to come on me very suddenly. I was so bad, that at times it seemed as if it was all I could do to breathe. I noticed an announcement of Milburn's Heart and Nerve Pills, and decided to give them a trial. After taking two or three days' treatment I felt fine, and my heart has not bothered me since. If this testimony would be of any service to others you are at liberty to use it."

To all who suffer from any form of heart trouble Milburn's Heart and Nerve Pills will give prompt and permanent relief. They strengthen and invigorate the action of the heart, and tone up the whole system.

Milburn's Heart and Nerve Pills are 50 cents per box, or 3 boxes for $1.25. For sale at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The First Showing of Fall Furs

Rich, Luxurious Furs but a luxury you can safely indulge in at the very moderate prices these are marked.

News of the Week Collected by Staff of Live Correspondents

EDEN GROVE

Gollies, Boys, Hallowe'en is on the way and don't forget it.

Miss Blanche Powell attended the teachers convention held in Chesley last week. The poor little Kiddies enjoyed a couple holidays in the rain.

At a meeting of the Red Cross Thursday it was decided to have a Fowl Supper in the near future if suitable arrangements could be made.

Mr. and Miss Loughleen, Cargill were the guests of Mr. and Mrs. Pearson "Quality Hill" Sunday.

Mr. James Clancy, Cargill and Mrs. Mays Southampton called on friends in the Grove Friday.

Mr. Desmond received word that his nephew John Callahan had been drowned during the recent storm on Lake Erie. He was fireman on the S. S. Merida and resided in Goderich.

Miss F. Seele, delighted the large Audience at the Anniversary services in the Methodist Church by rendering a beautiful solo in her usual pleasing style.

Mr. and Mrs. McCool, Public School Inspector, paid our School an official visit Monday and found everything satisfactory under the efficient management of our teacher, Miss Powell.

Miss Verna Loughleen and Miss Elder, Cargill, visited Grove friends Sunday.

We hope the girls will turn out Tuesday night and help the boys celebrate.

Mr. OReilly shipped a car of lambs last week and two cars of hogs Tuesday.

Miss L. Fraser, Glamis, called on friends in the Grove Monday.

Mr. Edward Butler of the 160th. has arrived home being over the age limit.

Everybody is busy taking up the murphies this week. The crop looks as if it was going to be a hard winter for the Irish.

Mr. and Mrs. McKeeman visited Paisley friends last week.

Mr. Perine a former G. T. R. Agent at this station renewed old acquaintances here this week. Mr. Perine sees quite an improvement. In his time there were no miles of cement pavements, electric lights or fine brick residences with their beautiful flowers.

Remember boys the Chief of Police lives in town now but look a little out.

Miss Lily Alexander visited Walkerton friends Tuesday.

VESTA

Mrs. John Connolly and son Jack spent Sunday afternoon with Mr. and Mrs. P. McGarrity.

Miss Webb, teacher of S. S. No. 11, Brant, attended the East Bruce teachers' Convention in Chesley last week.

Owing to the wet weather the latter part of last week many people took a rest.

We are pleased to see Miss Eva Fortune able to start back to High School in Chesley again.

OTTER CREEK

Mr. John Bell returned home from attending the wedding of his cousin, Elvina Grese, of Galt.

Wedding bells are ringing very loudly.

Mr. John Reuber of the fourth concession was a business visitor over here.

It isn't a difficult matter to love his neighbour as himself; that is if she is young and pretty. Guess that is why Billy crosses this road so often.

Mr. and Mrs. Robert Long of Brant were visitors at Mr. Walter Jasper's.

Mr. Henry Wolfe is very seriously ill. We all hope he soon may be able to have good health again.

The canvassers for the Trafalgar day were around here and they report a handsome amount for the Red Cross.

GLAMIS

Miss Lily McKinnon has returned to Brantford to resume her duties.

Mr. G. W. Reynolds of The C.P.R. Co. Toronto visited here this week.

Miss Lexy Fraser is visiting relatives in Southampton

Mrs. Flora McDonald has returned to her home in Detroit Mich. after spending some time with her daughter Mrs. W. H. McNally.

Miss Mary Jane McLean "Base Line", Tiverton, visited relatives and friends in the vicinity last week.

Miss Archer of Walkerton is spending some time with Mrs. W. H. McNally

The people of the village and vicinity are organizing a Red Cross Society here this week.

Mr. I. J. Husk returned home from Stoughton, Sask. on Monday.

A gloom was cast over this community when news reached here on Monday night Oct. 16th 1916, that Mr. Robert Young McFadyen had passed away at his late residence, 187 Markham St. Toronto, that afternoon at the age of 78 years. Mr. McFadyen was the son of the late Hector McFadyen, Boundary West. He was born in Airdrie, Scotland, and with his parents immigrated to Canada while only a little lad. He lived with his parents on lot [illegible], con. 1 Bruce Tp. until married to Miss Catherine McKay, after some time he moved to Glamis. The deceased was an old and respected resident of this district. He was a Builder and Contractor also manager of the Glamis lumber mills, and cheese box factory in which capacity he was very successful to the entire satisfaction of his employers. Failing health caused him to relax his energies and take life easier. Moving to Toronto about five years ago for the past three years he has been in delicate health. He was very active, energetic and intelligent and put forth great energy in any affairs pertaining to his work. He was Tax Collector for Bruce Tp. for many years. In politics he was a staunch Liberal with strong convictions of same. He held the office of President of the West Bruce Liberal Association for a number of years. Although in poor health for some time his death came as a shock as he had been up and around the day he passed away. He leaves to mourn his loss, his wife, and son Alexander, and one daughter Robena, all of whom reside in Toronto. The remains were brought here from Toronto on Wednesday on arrival of noon train to Pinkerton Station. Interment in Purdy's Cemetery. The I. O. O. F. of which the deceased was a member, had charge of the services. To the bereaved ones heart felt sympathy is extended. Mrs. Arch McFadyen, Boundary East, Tiverton, and Mrs. Ferguson of Vancouver, B.C. are sisters of the deceased.

MILDMAY

The death of Mrs. John Schneider occurred here on Monday morning. Mrs. Schneider had been suffering for some weeks with cancer of the stomach. She was 59 years of age. The funeral is to take place on Thursday morning.

Rev. Mr. Hallyard of Victoria college delivered two extra good sermons on Sunday in the Methodist church. Mr. Hallyard is a native of Newfoundland.

Miss Kate Schwalm of the Public School Staff visited friends in Chesley Paisley, and Elmwood last week.

Mr. Geo. Klein, we understand, has purchased Thomas Godfrey's house and lot. Mr. Godfrey intends moving his family to Detroit in a month or two.

Miss Uhrich, Miss Reis, Miss Rau, Miss Hallagh, Miss Pfohl, Miss Dieworth, Miss Hogg, Miss Weinert, Mr. Kuhl and Mr. Wendt attended the teachers' convention held in Chesley last Thursday and Friday.

The Carrick branch of the Bruce County Preparedness League purpose holding a public meeting in the Town Hall, Mildmay, on the evening of Monday Nov 6th. Subjects of interest to farmers will be taken up and discussed and the meeting will be helpful and interesting to everybody.

A party of seven Kitchener and Waterloo business men were here last week on a hunting expedition. One of the party, a Mr. Chas. Miller of Waterloo, took sick here with pneumonia and died last Friday night.

The remains were conveyed from Mildmay today and on Monday at 2.30 P. M. from his late residence, interment will take place in Mount Hope cemetery. It's said Mr. Miller carried a $100,000 insurance on his life.

CARGILL

We are pleased to see Postmaster Keeling out again after being confined to his home with inflammation of the eyes.

Mr. E. A. Ruttle and Miss Gladys Keeling attended the Teachers' Convention in Chesley on Thursday and Friday.

Mrs C. W. Keeling attended the funeral of her aunt the late Mrs. McCann, in Walkerton on Thursday.

Mr. R. H. Jones, Route Agent, Canadian Express Co. Toronto, paid an official visit to the local office on Thursday.

On Thursday evening the shareholders of the Beef Ring, No 1 Brant and Greenock, assembled at the home of the butcher Mr. C. Schnitzler and closed business for this year which was a most prosperous one, the beef averaging 120 lbs. For 1917 all shares were taken up and all enjoyed the hospitality of Mr. and Mrs. C. Schnitzler and God save the King concluded the proceedings.

The Misses Bond gave a party on Friday evening to their friends when card playing and tripping the light fantastic toe were indulged in by all.

Mrs. S. Anderson and Mrs. J. Hamilton were in the County Town on Saturday.

Mrs. John Clancy returned on Saturday after a two weeks' visit with friends in Stratford.

Mr. and Mrs. W. B and Miss Juanita Cargill spent a few days in the Queen City last week.

Miss Verna Loughleen left on Monday for Woodstock where she has accepted a position as book-keeper with Blair Bros.

Mr. W. Grainger of Stratford visited over the week-end with his parents.

It was with deep regret we learned on Monday of the sudden death in Walkerton of Mr. R. M. Taylor, manager of the Merchants Bank. He often visited our burg with the County Town Bowlers and was most popular and our sympathy is extended to the bereaved widow and family in the great loss they have sustained.

Corp. R. Loughleen of the headquarters Staff, Toronto, spent the week-end with his parents.

Mrs. A. J. Helm of Cranbrook, visited with her sister, Mrs. C. W. Keeling on Friday.

Mr. and Mrs. F. F. Balsdon entertained a number of their friends on Friday evening, it being the first anniversary of their marriage.

Mrs. Wm. Meyer and family spent a few days last week in Chepstow with her mother Mrs. Golden.

Major F. S. Tidy of the 160th Batt. (Buffs) Toronto Sundayed at Hyllmere.

The wants of the villagers in the Meat line are being attended to, no less than 3 or 4 farmers calling and offering the bargains of the season. It's a very easy task to butcher in the cold weather but when the warm days are with us and ice required the new comers are generally found following the plow and then the local man is besieged for the T Bone or porterhouse.

On Wednesday of last week J. J. Schmidt's house, west of the village, was discovered on fire and on phoning here autos were soon secured and a number of the villagers rushed and succeeded in removing the contents of the house and forming a bucket brigade soon extinguished the fire, although not before considerable damage was done which we understand is fully covered by insurance in the Formosa Mutual.

Potato picking and cider making are the order of the day.

Mr. A. A. Black of Guelph was in the village a few days last week in the interests of the Excelsior Life Co.

Mr. J. F. Mays of Southampton, spent Friday with J. T. Clancy.

Mrs. Ben Neil left Saturday on a month's visit with friends in Paisley and Toronto.

The Brant side of the village has subscribed a total $150 for the Red Cross. The list of contributors will be published next week.

FORMOSA

A pretty wedding was solemnized in the Roman Catholic Church Formosa, October the seventeenth, when Miss Georgina, daughter of Mr. and Mrs. Alex Meyer was united in marriage to Mr. Herbert Beninger also of Formosa. Rev. Father Brohmann performed the ceremony. The bride looked charming in white satin trimmed with real lace wore veil and orange blossoms, and carried a bouquet of bridal roses and maiden hair fern. She was attended by Miss Eleanor Beninger, sister of the groom, who wore pink silk with flowers. Mr. Eddie Meyer brother of the bride acted as groomsman. After the ceremony many friends assembled at the home of the bride's parents, where a dainty dinner was enjoyed by all present. The afternoon and evening was spent in social games, dancing and music. The presents were numerous and costly. Mr. and Mrs. Beninger will reside near Formosa, where the groom has a splendid farm. The out-of-town guests were the bride's aunt and cousin from Michigan, Mrs. P. Ernewein and daughter Ida, and Mrs. Chas. Stoddard of Rochester, New York, a sister of the groom, Florence Oberle, a cousin of the bride, Mrs. Pauline Jones, a cousin of the groom, Buffalo, New York, Conrad Geese of St. Clements and Frank Voisin of Glenelen.

Dr. McCue has orders to report the first of the month at London, where he has an appointment with the Army Medical Corps.

The marriage took place at Formosa on Tuesday morning, of Miss Nora Beninger, a highly esteemed young lady of Culross, daughter of Mr. Henry Beninger, to Mr. Frank Voisin of Macton. The ceremony was performed at nine o'clock by Rev. Father Brohmann. The happy couple will reside on Mr. Voisin's farm at Macton.

HANOVER

Pte. Russel Devlin of St. Thomas, a brother of Mr. J. C. Devlin of Hanover, is dead on the field of honor in France. He went over with the 33rd battalion in March of this year and had been in France about 2 months. Deceased lived in Hanover about 18 years ago.

Cliffe Anderson had part of his ear bitten off by the groom of the driver of Robert McLean's horse at the Blyth races recently. They got into an altercation about the Kincardine races where the Shiells' horse driven by Cliffe won against the McLean horse, when suddenly McLean's groom grabbed Cliffe and bit off a portion of his ear. Mr. Shiells is prosecuting the offender for his very serious crime. The case will be tried in Goderich.

The death occurred in Hanover on the 6th inst. of Mr. William Weir, at the early age of 38 years, 11 months and 15 days. Death was due to anaemia after about a year's illness. He was employed in the Knechtel factory and worked until 6 weeks ago. He has been bed-fast 2 weeks. Deceased was born in Normanby, being a son of Mr. Peter Weir of Hanover. He moved to Hanover about 3 years ago, coming here from Elmwood. He married Miss Elizabeth Reiner of Hanover 6 years ago. He is survived by his widow and three children two sons and one daughter.

John Wardell, an old and respected resident, committed suicide by hanging, in the loft of the stable in the rear of his residence, William street, Shelburne. Dec'sd was 80 years of age. He was of a cheerful disposition and one of the last men that would have been expected to depart this life in the manner in which he did. He was last seen alive between two and three o'clock in the afternoon. The body was discovered by Town Clerk Whaley, between nine and ten o'clock at night. Financial difficulties are supposed to have been the cause of deceased's action. An inquest was deemed not necessary.

A fakir giving his name as Robert Lamont of Owen Sound, was arrested in Hanover on Tuesday and brought to Tara by High Constable Ward. He wore a soldier's uniform and stated he was attached to the 212nd Battalion at Montreal. On Fair Day here he sold tags and chocolates and stated the revenue derived was in aid of the Red Cross Society. He did a considerable business, and it turns out that he was in business for himself. On Wednesday of last week he hired Frank King's auto to go to Owen Sound and returning to Tara the following day and again hired the car to go to Elmwood, driving the car himself. He did not return the following day and King notified the police. On Tuesday of this week the authorities located him at Hanover and he was brought to Tara. The car showed that it had been badly racked and will require repairs to the extent of seventy dollars. A telegram was received from the military authorities in Montreal to hold Lamont as he was wanted for swindling the 212nd Battalion out of $390.00, and he was taken to Wiarton on Tuesday where he was handed over to the military authorities. Lamont admitted that he had previously served a term in Owen Sound jail. The military authorities will deal severely with his case.—Tara Leader.

The Elmira Signet reports the wedding of a former Hanover boy as follows: The home of Mr. and Mrs. I. Hilborn, Park St., was the scene of a pretty wedding on Wednesday October 11th, when their daughter Lavina became the bride of Rev. Gustav A. Trede of Blunt, S. Dakota.

Mrs. Harry Miller of Bentinck had a misfortune on Saturday week to lose her barn and contents destroyed by fire from some unknown or unsuspected cause. The barn was a big one, with a frame barn too, and contained the season's crops, consisting of several loads of oats, four or five loads of wheat, a binder, buggy, harness, and a number of hens, all of which were destroyed.

Auction Sale

I am instructed by

Jas Clark, Lot 18, Con 4, Saugeen Tp.,

to sell by Public Auction, on

Thursday, November 16th

at one o'clock p. m.,

his Farm Stock and Implements.

LATE MRS. THOMPSON

Was A Resident Of Walkerton Nearly Fifty Years.

Mrs. Anne Thompson, relict of the late W. G. Thompson, passed away at her home, Cayley St., on Monday afternoon. She had been poorly for about two years as the result of a stroke, death resulting from heart weakness. Mrs. Thompson was born in Ireland but had lived in Walkerton no less than forty-nine years. Being bereft of her mother in infancy, she was adopted by the late Mrs. Boddy, a daughter of Joseph Walker, the founder of Walkerton. She was a woman of quiet tastes, exceedingly devoted to the home and family and a life-long faithful member of the Presbyterian Church. Her husband predeceased her fifteen years ago. Of her grown-up family of nine, all are still living, and deeply mourn the loss of a devoted mother. They are:—R. A. of Otterville, W. B. of the 160th Batt., A. P. of Chicago, Misses Winnifred and Annie and Mrs. W. A. Clarke of Walkerton, Mrs. John Richardson of Brant, Mrs. Ed. Anderson of Owen Sound, Mrs. B. King of Mounds, Ill. The funeral takes place this (Thursday) afternoon.

C. H. ROGERS. Walkerton, Ontario

DEATH OF BRANT PIONEER

Late Joseph Carbert Hewed Out A Homestead From the Solid Bush—A Man of Fine Character and of Great Physical Endurance.

On Tuesday, October 30th, 1916, there passed over the Great Divide, another of the old pioneers of Brant township, in the person of Joseph Carbert, who for the past forty years has resided in Walkerton.

In the death of Mr. Carbert our town loses one of its most respected residents. A man of sterling character and integrity was he whom to know was a benefit and pleasure. A plain, humble-minded devout spirit did he possess. Always kind to everyone, he seemed to have no enemies. Coupled with a well-balanced mind, he possessed intelligence and always had a good knowledge of passing events.

Born at Bishopthorpe, Yorkshire, England, England, December 22nd, 1829 and married at the age of 20, the young couple came to Canada in 1850 and settled in the Gore at Toronto where they remained a short time, later moving to Bolton, afterwards to near Brampton and then settled on lot 15 concession 5 Brant, at that time a solid bush farm of 100 acres. A man of great physical endurance, Joseph Carbert in a few years cleared most of this farm, and by dogged perseverance in the midst of great difficulties, secured for himself and family a comfortable home. In the early part of 1870 Mr. Carbert sold the homestead and moved into Walkerton and for many years he managed the farm on the hill just east of the town, owned by the late Alex. Shaw.

A few weeks since Mr. Carbert met with a bad accident which at his advanced age proved too much for even his robust frame, and he gradually weakened and quietly passed away on above date.

A public funeral is to be held in the Methodist church, of which he was a consistent member, on Thursday afternoon at three o'clock and promises to be largely attended.

The surviving members of the family are:—George, the eldest son of Walkerton, William of Horkaway; and Margaret (Mrs. O. Gammond of Toronto) Two other sons, Joseph and Thomas passed away a few years ago.

What Bruce Gave

Bruce County's contributions to the British Red Cross to date are as follows:—Carrick $860, Eastnor $350, Elderslie $1,500, Kincardine Twp. $500, Kinloss $750, Saugeen $1,000, Hepworth $200, (to be supplemented by Council Grant) Port Elgin $1,000, Tara $900, Kincardine $3,200, Southampton $950, Walkerton $1,600, Wiarton $500. It is expected that Brant Twp. will vote $1,500 and Greenock Twp. $1,800.

Conundrum Supper

Don't forget the Conundrum Supper at the Methodist Church tonight (Thursday). No admission, pay for what you get. Bring your wife and your pocketbook.

+ + +

New Children's Shelter

The executive of the Bruce Children's Aid Society are looking foward to erecting a new Children's Shelter in the town shortly. Arrangements are being made at present to have members of the Committee visit Children's Shelters at various points in the Province to get ideas for the proposed building.

+ + +

Called To New Hamburg

Walkerton Lutherans are losing their pastor, Rev. H. R. Mosig, who has accepted a call to a larger work at New Hamburg and will leave for his new charge at New Years. The reverend gentleman came here about four years ago from Port Elgin and is held in high regard by the congregation here who regret his leaving. Steps will be taken at once to secure a successor for Rev. Mr. Mosig.

+ + +

On Last Leave

Four Walkerton boys of the Divisional Signalling Corps, Ottawa, are home on last leave this week. They are:—Sergt. Ralph Glave, Sappers John Rowland, Clayton Freeman and Wilfred Freeman. Jack Rowland is accompanied by his friend, Sapper Stewart Forbes of Denver, Col., who is spending his last leave here owing to his own home being too far away to make it. The boys leave Walkerton Saturday morning.

+ + +

Bonnell—Jasper

Miss Estelle L. Jasper, second daughter of Mr. and Mrs. Walter Jasper of Carrick, and Mr. Ernie D. Bonnell, druggist of Owen Sound, formerly of Walkerton, were quietly wedded at the home of the bride's parents, at High Noon, on Wednesday, Nov. 1st, by Rev. C. W. Cosens, pastor of the Walkerton Methodist Church. Only a few relatives witnessed the ceremony. The wedding march was played by Mrs. Robert Long. The bride who was unattended looked pretty in a navy suit. Mr. and Mrs. Bonnell left on the afternoon train for a short wedding trip. On their return they will make their home at Owen Sound, where Mr. Bonnell is engaged in the drug business.

Latest War News

Wednesday p. m. (via G. N. W. Telegraph)—French War Office announcement says on Macedonian front east of Struma, British troops stormed and captured town of Barakliidjuma seven miles southwest of Demirhissar. There is artillery fighting on Doiran and Vardar fronts. Bucharest despatch states Austro German forces have retreated from region of Kimpolung, Northern Roumania, pursued by Roumanian troops who have passed over the frontier in the movement. Despatch from Gen. Haig reports British successfully raided German trenches northwest of Festubert and in the region of Mesalnes last night. Berlin War Office states British advanced with strong forces in Courcellette district but north of Courcellette were unable to advance owing to German defensive fire.

+ + +

Gemmell—Taggart

A quiet wedding took place at the home of Mr. and Mrs. David Taggart at High Noon, Tuesday, Oct. 31st, when their eldest daughter, Charlotta Elizabeth, was united in marriage to Mr. Alfred Morris Gemmell of Perth, Ont. Only the immediate family were present. Rev. Thos. Wilson performed the ceremony and Mendelsohn's Wedding March was played by Miss Stella Taggart. A large number of lovely presents received from friends in Walkerton and many outside points bore testimony to which the esteem in which the bride was held. The groom's gift to the bride was a handsome set of Isabel fox furs. The bride who was unattended wore a lovely gown of ninon over crepe de chine and carried a bouquet of roses and carnations. Mr. and Mrs. Gemmell left on the afternoon train for a trip to Toronto, Montreal and Quebec. On their return they will make their home at Perth, where Mr. Gemmell has a position as a trainman with the C. P. R.

BORN

SCHNURR—In Walkerton, on Tuesday Oct. 31st, to Mr. and Mrs. Con. Schnurr, a son.

+ + +

Airing Troubles in Court

The troubles of a young Walkerton couple who have not been living together were aired before Magistrate James Tolton on Thursday night, a charge of non-support being laid by the wife. On the suggestion of the opposing lawyers, the Magistrate adjourned the case to allow the two to settle their differences amicably. As the wife has since decided that she will not live with her husband, her charge of non-support falls to the ground.

+ + +

Walkerton Horticultural Society

Jas. Tolton, Secy.

Walkerton, Oct. 31st, 1916.

+ + +

Took Out a License.

Chief Ferguson laid a charge against S. N. Holler, representative of the Columbus Oil Co., charging him with contravening the transient traders' by-law of Bruce County by delivering oil at Walkerton station without a license. The defendant who had been selling oil to the farmers around Walkerton, appeared before Magistrate James Tolton on Saturday night, when Lawyer O. E. Klein, who appeared for him, asked the case to be adjourned until Wednesday to allow the Company's own lawyer at Hamilton to appear. The Magistrate granted the request. The following day the agent took out a transient traders' license and the case was then allowed to drop.

Mrs. Reefer Hurt Again

Mrs. Reefer, an old lady who has been living alone across the street from the County Hospital, has had her share of accidents lately. Six weeks ago a bicyclist riding on the sidewalk knocked down and injured her so severely that she has been in the Hospital almost ever since. Again on Saturday morning in getting out of bed in the dark, she fell and injured herself badly. She lay there, she states, in an unconscious condition for several hours. Finally she was able to drag herself to the door and attract the attention of some children on their way to school, who summoned a neighbor. The doctor found that her left arm was fractured above the wrist and her right elbow as well as her right leg were seriously bruised. Mrs. Reefer was taken to the Hospital again and on her recovery she will make her home with members of her family.

+ + +

John Rowland At The Bat

Speaking at the Red Cross meeting at Chepstow last week, Mr. John Rowland, in a burst of confidence, told the audience that while he had never held or even sought a public office in his life, he would dearly like to be a Member of Parliament for a month when the Boys would be coming home from the Front. Of course one can't be a member for a few months only. But the point is that John Rowland has his eye on Parliamentary honors. Some wise ones figure it this way. The present member for the local House, Mr. W. H. Cargill M. P. P. of Cargill, is understood to be tired of political life and unwilling to accept the nomination again. And if he won't, there is a hustling Walkerton drover who will, in the person of John A. Rowland Esq. And any aspirants, if there are any, will have to "go some" to beat him to it. Because Rowland is a fighter. He has his hat in the ring and he has a way of going after things that usually lands him "inside the money." Mr. Rowland has only recently blossomed out as a platform man. He has done a lot of it in the recruiting campaign and he seems to like it. He belongs to the Billy Sunday type of orators and when he breaks loose on a platform the audience gets few quiet moments. Whether or not Mr. Rowland would stand a fair chance of being elected is a question for the tories between now and nomination day. Just now the Tory politicians from Premier Hearst and Hon. G. Howard Ferguson down, are boasting how they really and truly love Hydro. Wouldn't it be funny to see Mr. Rowland join this happy band of "Hydro boosters?"

HE WAS KILLED IN ACTION

Heroic Deed which Cost Lieut. Adam E. Reid of Pinkerton his Life, Won Him the Distinguished Service Order—A Young Man of Outstanding Character

Mr. Adam Reid of Pinkerton received a telegram from Ottawa on Thursday stating that his son, Lieut. Adam E. Reid, had been killed in action on September 17th. Word had been received some two weeks previously that Lieut. Reid was missing and the family had entertained high hopes that he would still turn up. In the death of Lieut. Reid, a most promising young life was cut off. His high character and all-round manly qualities were an inspiration and example to the young people of the neighborhood. Before enlisting he taught at the home school at Pinkerton, taking an active part in the various departments of church work. He abounded in activity, taking a warm interest in sports and everything in which young folks are interested. He was president of the Young People's Guild and in Sunday School work he was specially interested. At midsummer of last year he resigned his school with the idea of taking up a University course at either Toronto or Queen's, but before enrolling as a student, he heard a very clear call from his country and he took a commission as lieutenant with the 71st Battalion. After arriving in England he was transferred, on the breaking up of the battalion, to the 54th.

The manner of his death indicates that he died as he lived, fighting the good fight. The heroic deed which cost him his life won him the Distinguished Service Order, a distinction which is awarded only in cases of exceptional gallantry.

The following letter from Lieut.-Col. Kimball, commanding officer of the 54th Batt., received by the parents a couple of weeks ago, tells how their son met his death. At the time the letter was written Lieut. Reid was reported "missing."

Flanders, Sept. 18th.

"I regret to inform you that Lieut. Reid has been reported missing after a raid on a German Crater. He was seen in our trenches after the return of the raiding party. One reports having seen him go back over our parapet and it is presumed that he had heard that some men were left behind wounded and went in search of them. These men were brought in by another party but nothing was seen of your son. As soon as it was known that Lieut. Reid was missing I had the space between our trenches and the Germans, as well as the open ground and unused trenches in rear of our own thoroughly searched, in case he might be lying wounded in some shell hole or depression. This has been done as far as possible by day and on the successive nights. Lieut. Reid behaved with the greatest gallantry during the raid for which his name has been submitted for recognition. I can assure you that we have done all we can possibly think of to find him. I personally felt greatly distressed at the failure to find him, if wounded, but still hope that he may be heard of. He was a most gallant officer and a man of sterling character.

Telegrams of sympathy have been received from the Premier, Sir Robert Borden and his Colleagues.

A special memorial service will be held at Pinkerton Presbyterian church on Sunday afternoon at 2.30 o'clock.

PROMINENT OFFICER

Who Died Of Wounds At The Front Was Old Walkerton Boy.

An old Walkerton boy, Lieut.-Col. R. M. Thomson, a prominent Winnipeg lawyer, died of wounds recently at the Front. As a young man he left Walkerton with his parents, Mr. and Mrs. James Thompson, who still reside at Winnipeg. Lt.-Col. Thomson was interested in military affairs all his life. He fought in the Riel Rebellion and later organized the famous Cameron Highlanders of Winnipeg, which has recruited several Battalions for service at the Front. He was the senior member of a large law firm and it is a notable fact that no less than three out of the four principals in the firm have been killed in action, while three members of the staff are on active service and a fourth has returned invalided. Lt.-Col. Thomson recently offered his magnificent home to the government as a Military Hospital, an offer which is still open. A Walkerton lady informs us of a coincidence which happened at the Bermuda Islands a few years ago. Col. Thomson was staying there for the winter and became acquainted with a Major Jones, who he discovered also came from Walkerton, being a son-in-law of Mrs. P. Todd, now of Toronto. Both Walkertonians, who became acquainted that day in the Bermudas, have been killed in action in Flanders.

AN EVIL HERITAGE

Marian raised her head and gazed reflectively out of the window. For some reason on which she could not immediately lay hands, the date of '59 was familiar to her. Had it been her parent's marriage-year? No; presently she had it; surely Bernard's parents had been married in '59? But how did this fit in? Here was the first Mrs. Berrincott's death put down in the same year, whereas she had always understood that Uncle Simon had been a widower for at least a couple of years before marrying his second wife. Evidently she must be making some mistake, and yet, now that she came to think of it, there had also been that remark of Bernard's about his parent's silver wedding-day, which—as it had been made in '84—likewise pointed to '59 as the year of their marriage. How then explain this entry that was staring her in the face? Date of Death: June 30th, 1859.

"But it cannot be," reflected Marian in growing perplexity. "Even supposing that the date of the year should be right, the day must be wrong, for I know that I met Bernard beside the cemetery next morning. Therefore the 29th was the wedding day. What can it all mean?"

Staring at the page however brought no enlightenment. At whatever side of the matter she looked there seemed to be no room for a mistake, although of course it stood to reason that it must exist somewhere. Perhaps Miss McCrie would explain this seeming mystery; should she put the question to her hostess? Marian considered the matter for a minute or two, but ended by coming to the conclusion that she would rather say nothing. Her mind was not seriously disturbed by the discovery she had made, only mildly puzzled, and her resolution to hold her tongue was purely instinctive. She could not in the least have explained to herself why, when the gravel outside suddenly sputtered under the sound of horses' hoofs, she hastily shut up and half-guiltily pushed away the book over which she had been straining her eyes—for meanwhile the dusk had fallen—almost as though she were afraid of being caught at her late occupation.

She had not yet stood up when already Miss McCrie's voice rang through the open window.

"Ah, so here you are, Miss Register-General, and at work, too, I see; and here I am again, but not alone. The babies are disentangled, and I have had a glorious gallop. The Mosquito has behaved like an angel. I have got a surprise for you; come and see!"

Marian looked out of the window just in time to see Mr. Hibbert dismounting.

"I picked him up on the way, and he is going to take supper with us. Aren't you, Mr. Hibbert?"

"I should rather think I am," replied Mr. Hibbert in a tone that was so completely different from his usually so cool and cautious manner of speaking that Marian looked at him in surprise.

Undoubtedly a change had come over the man, but—as she now recognized—she had seen the beginning of that change at their last meeting. He had looked then as though he had heard good news, or found a treasure, and he looked now as though that good news were still true, or as though the treasure then found were already safely stowed under lock and key. And yet, no, not quite safely stowed; for the excitement under which he labored was too obvious to suggest anything as peaceful as perfect security—was an undercurrent of anxiety which was for ever making its way to the surface. A close student of human nature could scarcely have failed to see that the man had artificially worked himself up into this frame of mind, and that a continual strain was required to keep him at the desired pitch. There was something in his ostentatiously light-hearted, almost jaunty manner of talking and moving to-day which contracted so strangely, nay comically, with his usual sober reserve, that during the whole of that evening Marian did not recover from her astonishment, and that while supping in the kitchen Jeremias confided to Di that according to his opinion "Mr. Magistrate" was quite "out of his elements" to-day.

Whether this was so or not, it is certain that the evening meal gained considerably by the liveliness of the conversation. Whatever the subject broached, he had something to say. He was just as ready to discuss the Mosquito's merits as to draw pictures of his island residence.

"It's better surely to king on a strip of sand than slave in the best-kept garden in the world," he laughed, "and I am king at Cassacon."

Marian, despite her astonishment, was honestly delighted to see Mr. Hibbert in such good spirits. He had long mounted as a friend; and since the day of the excursion to White Village, he had become also a benefactor, to whom, as she gladly acknowledged, her warmest gratitude was due. Evidently, Marian told herself, Mr. Hibbert was at last beginning to get over his disappointment about that horrid Daley.

"Is it true that there are still real original Caribs on your island?" she inquired. "Miss McCrie says that all the real ones have died out on St. Clara."

"People don't die out in my kingdom. Yes, there are two unadultered Caribs among my subjects—James and Joseph Rabacca, father and son."

"What are they like?"

"Imagine a head of the shape of a cocoa-nut, and the color of a lemon, with slits for eyes, and black wire for hair. That's the yellow Carib."

"I should like to see one," said Marian.

"You shall have your wish. I am certain that either Joseph Rabacca or his lemon-colored papa will be delighted to accompany me next time I come over—always supposing that there is going to be a next time. How about that, Miss McCrie? Are you going to repeat your invitaion?"

"Nonsense!" was Miss McCrie's unexpected reply. "That's not the way to do the thing at all. Where are your ideas of hospitality, Mr. Hibbert? If Miss Berrincott is anxious to see what a Carib is like, surely it is more satisfactory to see him in his hut with all his funny implements around him, than to have him transported in his Sunday clothes. Since you are king at Cassacon, why dont' you ask us to come and look at your kingdom for ourselves?" And Miss McCrie looked with dancing eyes from Mr. Hibbert's face to Marian's, and from Marian's back again to Mr. Hibbert's. On both astonishment was written, but it was Marian who got over her surprise first.

After all, why not? There was much to say in favor of an excursion to Cassacon. It would probably amuse Mr. Hibbert to show off his kingdom, and, besides, did not the carrying out of the plan mean a trip, or rather two trips, in a sailing-boat, a sea-shore ramble, and the exploring of some quite new tropical scenery? Marian saw it all at a glance, and so delighted was she at the vision that she actually clapped her hands.

"Oh, that is simply splendid! Oh, Miss McCrie, what good ideas you have got! Please let us come, Mr. Hibbert! You are going to invite us, are you not?"

Mr. Hibbert was too busy scanning her face to answer immediately. Closely and eagerly he was watching her expression, striving with all his might to read that in it which he wanted to find. The idea of having her as his guest, even for one single day, startled him almost as much as it enchanted him.

"Yes, I am going to invite you," he said, abruptly, as though having come to some sudden conclusion.

A rapid parley followed, during which details were settled. The excursion was fixed—weather permitting—for the following Monday. At break of day Miss McCrie and Marian were to sail for Cassacon in one of the large fishing boats, which a few days' warning generally made it possible to secure. The passage was seldom longer than three hours — so that even by spending five or six hours on the island, they could easily be back before night.

"That idea was an inspiration," said Miss McCrie to herself while laying her head on the pillow that night. "A whole day to themselves, and the most suggestive surroundings in the world; surely this must bring matters to the point!"

CHAPTER XXIV.

Of all the small islands that lay scattered round about St. Clara Cassacon was the flattest and probably the windiest. It was so flat that nothing but huts and trees prevented a clear view being gained from one end of the island to the other, and so windy that, except in the height of the still season, nobody's hair had a chance of lying still for more than half a minute at a time. Even the tight nigger-wool seemed as though alive, and as for a young lady whose hair inclined to curl—though, to be sure, young ladies with or without hair were not usual at Cassacon — their heads were so persistently enveloped in a playfully dancing cloud that it was impossible to form an opinion of what they were really like until they had been seen in a still place—in other words, brought under cover.

The only breaks which occurred on broad, sandy beach, speckled with wet stones and glistening with shallow salt-water pools, was here and there the trunk of a dead tree, and not necessarily of a tree that had grown on Cassacon, but very likely one that had drifted over from some neighboring island and been deposited there by the waves. Here it stuck half-embedded in the sand, encrusted with seaweeds and slowly rotting away into salt-flavored moisture, stretching its black and broken branches fantastically against the sky, and looming over the beach like the carcase of some antediluvian monster that had here been stranded.

The beach was bounded by a row of cocoa-nut palms, which formed a sort of gigantic and irregular hedge all round the interior of the island, from which they were supposed to keep off the very worst brunt of the irrepressible wind. They did their best, the poor cocoa-nuts, as was to be seen by the variety of attitudes into which they had got twisted in the fulfilment of their hard duty.

The impression they gave was that of a file of undaunted but perfectly undrilled soldiers, with a touch of desperation in their manner of tossing their heads and waving their arms, and yet determined to die at their post.

The interior of the island was scattered over with groups of little low huts, which consisted more of roofs than of anything else, and often lay so deeply buried in tall grasses that from a distance they had the semblance of big mushrooms. A ragged banana, torn to strips by the wind, stood beside almost every hut, for, despite the self-sacrifice of the poor doomed cocoa-nuts, the tyrant had it pretty much his own way, even behind the barrier.

Such, then, was Mr. Hibbert's kingdom. As for his residence, this was situated on the north side, close behind the barrier of palms. It was only a wooden palace, it is true, with not more than four windows in a row; but what could it matter what it was built of, seeing that the walls were so closely wrapped in a cloak of pale lilac convolvulee, that even had they been of Carrara marble, no one could possibly have had a chance of guessing it? A tuft of bamboos, planted one on each side of the house, was all that represented that pleasure-garden in which, as one accustomed to read, kings are also fond of wandering.

The nearer the great Monday came, the more did Mr. Hibbert's alarm grow at the thought of the day that was to be. Not that any bribe on earth would have induced him to relinquish the prospect. People who had known him three months ago would scarcely have recognized Mr. Hibbert as the same man while plunged in his primitive preparations. He had grown about twenty years younger—over-night, it might almost be said. In its continual hunger after happiness, human nature is very liable to fall a prey to deception. Having talked himself into the idea that Marian loved him, Mr. Hibbert eagerly grasped at every proof that might be taken as supporting his theory, and instinctively closed his eyes to every symptom which, in a cooler frame of mind, might have appeared to him unfavorable. His frame of mind was not cool, and he felt that it must not be allowed to grow cool. Who knows what the world would look like if viewed again with sober eyes? For the present he wanted to be happy. After all, a man cannot go on living for ever without happiness in some shape.

And to-day he actually was happy, though even this sky had its clouds. For instance, the thought that the queen of his heart would have to eat from off cracked plate was terrible to him; but fortunately his philosophic nature here came to his aid, and after laying the table with his own hands, and disposing the plates so that the chipped edges were as little as possible exposed to view, his majesty, the king of Cassacon Island—having first collected into one room all the chairs that were in possession of their full complement of legs—started for the landing place with a joyfully beating heart.

He was far too early, of course. It wanted about an hour to the time when the St. Clara fishing-boat might reasonably be expected to become visible. Perhaps this was, on the whole, the happiest hour in Mr. Hibbert's life. He had nothing to do but to stand on the little wooden pier, straining his eyes towards the opposite coast, and all the time to draw pictures of that which the day was going to bring. For that it was going to bring something he indistinctly expected, without having formed any definite plan. His state of mind was that of a schoolboy on the very brink of a long and blissful holiday.

After a time the landing-place struck him as far too low for a look-out, and, somewhat to the detriment of his knees and his coat sleeves, he swung himself on to the nearest of the stranded tree-trunks; scarcely the thing, perhaps, for a district magistrate to do, but Mr. Hibbert was in far too joyous a humor to-day to waste a thought upon his dignity. This tree had been rotting here for so long a time, that it was scarcely possible to imagine this particular bit of the beach without it. Its gigantic trunk, jagged with broken stumps, and in particular two enormous tusk-like branches protruding from its upper end, appealed so vividly to a sensitive imagination, that an eccentric visitor to Cassacon had once declared it not to be a tree at all, but a dead Mammoth, deposited here by the Deluge. The name had stuck to it ever since, only that in the mouth of the negroes the "Mammoth" had been turned into a "Mamma," so that to every one on the island this particular stranded tree was known as the "Big Mamma."

It was while perched on the shoulders of the "Big Mamma" and feverishly dwelling on the question as to whether Charlie would or would not overdo the chickens, and possibly even singe the soup, that Mr. Hibbert caught his first glimpse of the boat he was expecting, and in less than thirty minutes more he was already handing his guests ashore. Whatever else may have been mixed and misty about his feelings, it is quite certain that at that moment the king of Cassacon Island would have changed places with no other monarch on earth. Never in his experience of her had Marian looked so charming as to-day, in the shady straw hat and the spotless dress which had been donned for the occasion, and which only on the previous evening had issued white as a flower from out of Catherine's black but agile hands; for Marian, too, was in a holiday humor, and looking forward with quiet, but not the less intense delight to the long day before her. It was a positive relief to her to have an opportunity, however slight, of showing herself grateful to Mr. Hibbert, and since this visit evidently gave him pleasure, she had felt it to be almost her duty. Also she had arrived determined to be pleased with everything. And she really was pleased, both with the "Big Mamma," which struck her as a mixture of something very awful and very funny, and with the brave file of palms staggering under the assault of the enemy, soldiers whom the deadly bullet has already struck, always falling and yet never fallen. The lilac creepers and the bamboos, and even the unornamented interior of the residence, were viewed with an interest that could not fail to be flattering. Mr. Hibbert's hopes grew apace, reaching their height during the somewhat nondescript midday meal which had been prepared in so much fear and trembling, but which turned out so successful that even the chipped plates ceased to weigh on the District Magistrate's mind.

"And when you have no visitors like us you always dine alone?" inquired Marian.

"Always alone."

"But you told me that there was a doctor and a judge on the island, and I think you said something about a clergyman to. Why do you never invite them?"

"They are not the sort of people I can invite," he said with a mysterious smile.

"Is there anything wrong with them? Surely one of them must be nice. What is the doctor called?"

"The doctor," said Mr. Hibbert, exchanging an inexplicably mischievous look with Miss McCrie, "is called Hibbert."

Marian stared a little.

"How strange! Is he a relation of yours?"

"I believe he is. Rather a near relation."

"Then why don't you invite him?"

"Because I don't care for his company. Rather a dreary fellow at best."

"And the Judge?"

"The Judge, oddly enough, is likewise called Hibbert, and is just as dull company as the doctor."

Marian's eyes opened wider still.

"Surely you are joking, Mr. Hibbert? Please try and be serious, and tell me at least what the clergyman is called."

"The clergyman doesn't exactly exist, but if he did he would probably have the same name."

Miss McCrie here broke down.

"Oh, my dear Miss Berrincott, don't look so bewildered; it is only because dear Mr. Hibbert is in such good spirits to-day that he is talking such nonsense. There is no judge and no doctor on the island; he does it all himself."

"I beg to say," observed Mr. Hibbert, with assumed gravity, "that no calumny of my kingdom can be allowed to pass here unchallenged. In my official report of the West Indies you will find it printed, black upon white, that the island of Cassacon is furnished not only with a district magistrate, but likewise with other personalities I have mentioned."

"Produce them!" laughed Miss McCrie.

(To Be Continued).

* * *

"So you don't like to kiss girl babies, eh?" laughed the young mother. "Um—not until they are about 18," replied the old bachelor.

SUNDAY SCHOOL LESSON

October 29, 1916. Lesson V.

The Voyage.—Acts 27: 1-38.

Commentary.—I. From Caesarea to Fair Havens (vs. 1-12). It was customary to send certain prisoners from the various Roman provinces to Rome. Such prisoners were those who had appealed to Caesar and those who were guilty of political crimes. Some of the prisoners were from high positions, and others were probably desperate characters. Paul was a prisoner in common with the rest, and, under the charge of Julius, a Roman centurion, they were being taken to Rome. A ship was found that was to sail from Caesarea to a point west of Asia Minor. On this Julius and his prisoners took passage and sailed along the coast of Palestine by Sidon and east and north of Cyprus to Myra, a port of Lycia in Asia Minor. This was the route which ships from Egypt took in sailing to Rome during the late summer and the early autumn, since the dangers of navigation were less by that course than by the direct route. The centurion found a ship, laden with wheat, that was sailing from Alexandria to Rome, and on to this he and his prisoners took passage. On account of adverse winds, the progress of the ship was slow. The course was westward to Snidus as the southwestern point of Asia Minor, thence in a southerly direction around the eastern extremity of Crete under the shelter of the island as far as to Fair Havens, the port of Lasea. This was about midway of the southern coast of Crete. Paul's advice was that the ship remain at Fair Havens during the winter, and that no attempt be made to sail further, for the stormy season had arrived.

II. The storm (vs. 13-20). 13. The south wind blew softly—The mariners had sailed south of Crete to find shelter from the north wind. There was a great change in the direction and force of the wind. A gentle south wind was what was needed that the sailors might bring the ship to Phenice. Loosing thence—Sailing away from Fair Havens. Sailed close by Crete—The sailors kept close by the shore, so that they would not be in great danger if a sudden storm should strike the ship. 14. Not long after—Just west of Fair Havens a long promontory extends into the sea, and it was dangerous to sail around it. Tempestuous wind—A wind like a hurricane. It swept down from the mountains of Crete with almost irresistible force. Such changes of the wind are not infrequent in that region. Euroclydon—"Euroquilo."—R. V. A strong northeast wind. 15. Caught—The ship was seized by the wind so violently that the sailors could not control it. Could not bear up into the wind—Literally, "Could not look the wind in the eye." We let her drive—The sailors gave the ship over to be driven by the wind. 16. Running under a certain island—Sailing along the south side of Clauda, there was a measure of protection from the storm. To come by the boat—"To secure the boat."—R. V. In old times a small boat was towed by the ship and not carried by it as now. In time of storm it was liable to be washed away or filled with water. It was difficult for the crew in this case to bring the boat on board the ship. 17. Which when they had taken up—When the small boat had been placed on board. Used helps, undergirdling the ship—The sailors feared that the violent storm would cause the ship to part and they wound cables about her, passing them under the keel, to hold it together. Quicksands—Syrtis, the name given to the great shoals along the north coast of Africa. The sailors feared the ship would be driven upon them by a fierce wind. Strake sail—"Lowered the gear."—R. V. Struck sail. They lowered the sails and rigging so as to be less exposed to the violence of the storm, and at the same time endeavored to keep the ship from being driven toward the quicksands.

18. Lightened the ship—The sailors began to throw the cargo overboard. They did not yet throw out the wheat, but other articles of freight. This was done that there might be less danger of the ship's foundering. 19. The third day. The third day of the storm. With our own hands—The passengers assisted the sailors in their efforts to make the danger of shipwreck less. Tackling—The rigging and furniture and all that could be dispensed with. The danger appeared great or this sacrifice would not have been made. 20. Neither sun nor stars .... appeared—The obscuration of the sky continued for fourteen days (v. 27.) As the mariner's compass was then unknown, there was nothing to denote the direction of the ship when the sky was thickly over cast. No small tempest lay on us—The violence of the storm continued. All hope .... was then taken away—Two elements contributed to this hopelessness. 1. The sailors did not know whither the ship was being driven. 2. The severe storm threatened to drive it upon shoals or rocks or to sink it.

III. Paul's vision (vs. 21-26.) 21. After long abstinence—All on board had been long without food on account of the excitement due the storm and the difficulty of preparing meals. Paul stood forth—Although he was a prisoner, he had come to be respected by the ship's company. He "stood forth in the midst of them" because he had an authoritative message to deliver, and he spoke to a terror-stricken assembly. Not have loosed from Crete—Paul's advice was that the ship should winter at Fair Havens, even though the harbor was not "commodious." This harm and loss—The sailors and passengers were suffering from the strain and exposure and there was also a large property loss. 22. I exhort you to be of good cheer—It was a great advantage to the ship's company to have such a man as Paul on board. To them there appeared to be nothing to bring cheer; but Paul brought them the divinely-given assurance that no life would be lost, although the ship could not be saved. 23. For there stood by me—Paul gave a reason why he assured the company of their safety. A messenger came to him from his God and declared that all would escape with their lives. Whose I am—The apostle acknowledged God's ownership in him. Whom I serve—Paul had served the Lord many years, but never more truly than in those days of darkness and distress. 24. Fear not, Paul—A message came from the Lord to Paul personally. Before Caesar—God's will was that he should appear before Caesar and preach the gospel in Rome, where he would be preserved. God hath given thee all them that sail with thee—It is not stated that Paul prayed for them, but the inference is plain that he did and that the Lord heard his prayer. Those who sailed with Paul evidently owed their deliverance to his prayers. 25. I believe God—In the midst of danger few things could be more inspiring than such an address; and by this time all in the ship must have learned that they had no common prisoner in the Jew who had appealed from his own people to the Roman emperor.—Cam. Bib. Paul was positive and strong in his profession of faith in God. 26. Cast upon a certain island—The promise was given that the lives of all would be saved and it was foretold that the ship would be lost. It was further foretold that the shipwrecked company would reach an island in safety.

IV. Approaching land (vs. 27-28). On the fourteenth night the sailors believed they were approaching land, and by sound found they were coming into shallow water. To guard against being driven upon rocks they cast out four anchors from the stern of the ship to wait for daylight to show them where they were, if they were near land. The sailors then tried to let down the small boat to make their escape to land, but Paul said they would be lost if they did not remain in the ship. He urged them to eat for they had been fasting for fourteen days, and he assured them that all would escape with their lives. He took bread, gave thanks to God and began to eat. This encouraged the rest and they also ate.

Questions.—Why was Paul going to Rome? Where was Crete? Fair Havens? Describe the voyage to Crete. Where did they intend to sail when they left Fair Havens? What did Paul advise? What came suddenly upon them? Near what island were they driven? How was the ship strengthened? What was Paul's message to them? What did the sailors attempt to do? What good example did Paul set?

PRACTICAL SURVEY.

Topic.—Paul's protection in peril.

I. Gave opportunity for witnessing.

II. Gave opportunity for leadership.

I. Gave opportunity for witnessing. Paul's determination that he would sail to Italy was, on the human side, the result of his purpose to disappoint the murderous treachery of the Jews, but above that was God's purpose that the gospel should be more fully preached, not only in Rome, but in all the empire. Paul was living for Christ and as His ambassador, he was confident that he would reach his destination. He was the one calm watcher of everything that transpired on the perilous journey which should finally bring him to Rome. We have studied Paul in many positions, noticed his activity, boldness, wisdom, faith, charity, devotion, skill and patience. In this crisis he combined them all. He stood forth before that ship's company, the world in miniature, to teach them that the world was governed by Providence and not by fate. Paul belonged to God by a personal consecration. He put implicit confidence in His word. He trusted Him whom he served. The storm revealed the weakness and selfishness of the seamen. It revealed the moral grandeur of Paul's character. He positively and publicly committed himself to the statement that God had promised him all who sailed with him. Paul's every word expressed an unfaltering faith in him to whom he had committed himself. Paul's faith appeared in the ready regard which he paid to the testimony of the angel, although circumstances at the time seemed directly opposed to its fulfilment. There was no attempt to magnify himself by concealing the source of his prophetic assurance. He attributed nothing to his own wisdom or power. He ascribed the honor entirely to God. All the essentials of Christian faith and practice were contained in Paul's words, "Whose I am, and whom I serve."

II. Gave opportunity for leadership. Having shown his interest in every preparation at the beginning of the voyage, Paul would not leave the post of danger in the hour of trial. He had a high and noble idea of service. Until that dark night of the utter failure of hope, except from God, the apostle spoke only as a wise and judicious counselor. Then he spoke as from the mouth of God and they could not gainsay his words. While the tempest was so furious that despondency took possession of the crew, the apostle came forth to cheer their hearts as his own had been cheered, by declaring that no man's life should be lost. When Paul was taken on board that vessel, none was less regarded than he. In the tempest he arose as a prince among men. Faith made him master of the ship's company. He took the responsibility of the whole situation. The prisoner Paul became the central figure. He was the man of the hour. He not only commanded respect, but practical obedience from all. He had resources of strength and comfort that those around him had not and thus he became their comforter and adviser. While others were struggling for themselves, Paul's great nature was all concern in behalf of his suffering companions. The centurion, accustomed to speak with authority, became the obedient servant of his prisoner. Paul was the man whose heart failed him not, and who revived the hearts of others. He was the preacher of comfort and of courage, the confident prophet of hope and safety. He was the genuinely religious man. Added peril came in the selfish project of the sailors to seize the boat and leave the passengers to their fate. It was again the Christian apostle whose ready discernment and calm promptitude averted the danger. Beyond that a formidable danger threatened Paul's life. It was the counsel of the soldiers to kill the prisoners lest they should escape at landing. Their suggestion was frustrated by the centurion Julius. Whatever might have been the religious ignorance or inexperience of the Roman centurion, he evidently was impressed by Paul's character and conduct. For the sake of Paul the lives of the prisoners were spared and thus God's promise to Paul to give him all the ship's company was fulfilled. The whole incident brings honorable testimony to Paul.—T. R. A.

A LITTLE KNOWLEDGE, ETC.

(Rochester Times)

It was his brother's birthday, and he wished to buy him an appropriate present. He entered a bookshop and asked for a book suitable for a scientist dealing with natural history, for his brother was a zoologist.

The assistant looked over the shelves with a knowing air. Finally selecting a book, he placed it on the counter and said:

"This is by a first-class author, sir."

The would-be purchaser took hold of the book and saw, in large letters, the words "Buzzer's Anthology."

"Anthology?" he remarked.

"Aye," said the knowing young assistant. "All about ants you know—by Professor Buzzer."

* * *

"Say what you will of me, father," remarked the dissipated youth, "I am always up and doing." "Yes, long after you ought to be in bed," growled the stern parent.

INDUSTRIAL USES OF HYDRO-ELECTRIC POWER

(By J. B. Challies, Superintendent, Dominion Water Power Branch).

At the present time the great steel mills of this continent are absolutely dependent upon the electric furnace for the production of alloys. The automobile manufacturer is dependent upon another electric furnace production, aluminium, for car bodies. The manufacturer of steel products needs these materials for making tools, and countless factories require abrasives which cannot now be imported, and which are now being produced in the United States, at any rate, only by electric processes. Without acetylene gas and graphite, and other electric products, many existing industries would be absolutely crippled.

So far as the products of electro-chemistry are concerned, it is found that the surgeon and the doctor look to electric plants for chloroform and disinfectants the cotton and the paper manufacturer need the bleaches produced by electricity; the user of soap patronizes the electro-chemical establishment, as does every user of matches. Gold and silver mining of the west requires electric products to assure a profit, and it is only lately that the United States, cut off from its supply of German dyes, has found itself dependent upon electric products to supply the deficiency, in part at any rate.

These are but a few of the industries dependent upon cheap electric power. The further development in either Canada or the United States, or the inauguration of such processes in Canada, is very largely, if not altogether dependent upon cheap available, dependable power. The source of such power is admittedly, for a very large portion of our country, water-power. The development of water-power in making available a supply of cheap hydro-electric energy in various parts of the Dominion, would probably result in the reduction of the cost to the consumers of countless articles of every-day use, which, to the man on the street, are in no way associated with hydro-electric development.

To be more specific, the manufacture of steel is one of the greatest of the United States industries, and is fast becoming a very important one for Canada. To-day, electrically produced ferro-silicon is used as an alloy by most steel manufacturers, with the result that the Bessemer process is fast becoming obsolete. The essential element in the manufacture of armor plate and armor-piercing projectiles, is introduced into steel by the alloy, ferro-chromium, strict-

Ferro-chrome, another product of the electric furnace, has made possible the manufacture of high-speed tools, which in turn have tripled the capacity of our machine shops and enhanced the efficiency of our mechanics. It has cut to one-third the capital invested in tools to accomplish a given volume of work.

In the absence of chromium, tungsten, vanadium and molybdenum, all alloys made by electrical processes, the builders of American battleships and other weapons of national defence, and a large portion of our Canadian steel and metal-working industries and other industries, would be in the condition of twenty years ago. The electrical industry itself is largely dependent upon silicon steel, a product that does not age and does not wear.

The development of aeroplanes also calls for aluminum, and only with the abundant production of cheap electric energy from water-power will the price of aluminum kitchen utensils come within the reach of every housewife.

At the outbreak of the war, we were cut off from the supply of Greek and Turkish emery. To-day the metal-working industries of this country are dependent almost entirely upon electric furnace abrasives, carborundum and alundum. The manufacturer of agricultural machinery, locomotive, firearms, milling machinery, automobiles, and countless other metal products must have these abrasives, and they can now be made only where waterpower is developed cheaply.

The electric furnace also turns out calcium carbide, the only source of acetylene, which is being so extremely used in Canada. The oxy-acetylene flame has become of intense value in the welding of metals and the cutting of steel. The same calcium carbide is the important factor in the fixation of atmospheric nitrogen, and is the source of supply upon which we may have to rely for nitric acid and nitrates employed in making munitions of war and fertilisers.

All the artificial graphite used in the world to-day is produced at Niagara Falls, by cheap waterpower. Its uses are manifold. Practically the whole supply of abrasives on this continent is from Niagara.

Considering the products of electro-chemistry alone, chlorine stands out as of first importance. The sterilization of water supplied of countless cities has been made possible by the use of bleaching powder or hypochlorite, and in communities where this is used extensively, typhoid has been largely eliminated. The armies of Europe use chlorine to avert typhoid and other chlorine products, including chloroform, are used surgically, both as anesthetics and antiseptics. This same chlorine, or bleach, makes possible the manufacture of white cotton goods and white writing paper. Other products of chlorine, produced electrically, entered into manufacture of soaps. Even into fire extinguishers goes this products of cheap electricity.

To meet the shortage in coal-tar dyes, by the combination of chlorine with coal-tar benzon and tuluol, there is now beginning to be produced quantities of those necessary intermediates formerly made and exported from Germany.

Metallic sodium, also a product of electricity, is the basis for sodium peroxide which is used in generating oxygen for hospitals, for laboratoris, and for submarines and mine-rescue apparatus. It also enters into the manufacture of hydrogen peroxide. Without sodium cyanide, many gold and silver mines could not possibly operate at a profit.

There are but a few of the products of every day use which will largely depend upon water-power. Many of these, a few ago, had no known value. What other products remain to be developed with the growth of electricity, no one can predict.

There can be no question regarding the fundamental and essential relation of water-power to the economic and industrial situation in Canada.

* * *

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

THERE OR HERE.

With silence only as their benediction,
God's angels come.
Where, in the shadow of a great affliction,
The soul sits dumb!

Yet would I say what thy own heart approveth:
Our Father's will,
Calling to Him the dear one whom He loveth,
Is mercy still.

Not upon thee or thine the solemn angel
Hath evil wrought:
The funeral anthem is a glad evangel,
The good die not!

God calls our loved ones, but we lose not wholly
What He hath given;
They live on earth, in thought and deed, as truly
As in His heaven.

Up, then, my sister! Lo, the fields of harvest
Lie white in view!
He lives and loves thee, and the God thou servest
To both is true.

—Whittier.

HE REMEMBERETH THAT WE ARE DUST.

The Lord God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.

I will praise thee; for I am fearfully and wonderfully made; marvellous are thy works, and that my soul knoweth right well. My substance was not hid from thee, when I was made in secret. Thine eyes did see my substance, yet being imperfect; and in thy book all my members were written, which in continuance were fashioned, when as yet there was none of them.

Have we not all one father? hath not one God created us? In Him we live, and move, and have our being. Like as a father pitieth his children, so the Lord pitieth them that fear him.

He, being full of compassion, forgave their iniquity, and destroyed them not; yea, many a time turned he his anger away, and did not stir up all his wrath. For he remembered that they were but flesh; a wind that passeth away, and cometh not again.

POOR AND WISE.

Shall I draw the portrait of a poor wise man? I have more than one to give me a sitting. My friend is poor in pocket and rich in thought, one who measures life by loss instead of gain, not by the wine drunk, but the wine poured forth; the strength of love standeth in love's sacrifice. This man stands in the image of God, cool, humble, defiant, with vision strong and clear. This man has a history; he suffered much, he had much to give, his sorrows shook the heavens, while earth grew giddy at his lightest laugh. He is the world's master, because he despises it. He rideth easily, because he is carried, he bears the cross cheerfully and finds the cross bears him. He thinks himself happy, and he is happy. This poor wise man has followed these maxims: "No one virtue should usurp the sphere of another, affection must not smother modesty, courage must not elbow meekness out of the field, modesty must not jostle energy, patience must not slaughter resolution, public usefulness must not injure private piety. Take care to know your place, take it and keep it.

Needless to say this man exerts influence; he knows a little, he is ignorant of more, he will gather all. The power of life over life is startling. There have been single looks of an eye which have changed a destiny; there have been meetings for a moment which have left impressions for life, for eternity. No one can understand that mysterious thing we call influence. It is embodied in a thousand passages of Holy Scripture. It goes with us wherever we go; it is something we unconsciously exert upon others, like perfume from a flower. Every moment's time living, every victory we win over self, or sin, every fragment of sweet life we live, makes it easier for others to be brave and true and sweet. We are unceasingly exerting unconscious influence upon one another. Insensibly to themselves, they are moulding one another's character, conduct and destiny. The instinct of imitation, based upon this, is one of the most powerful in human nature, moulding the form of society and determining the kind and degree of civilization.

Our poor-wise man has much pity, and it increases every day. One thing I learned of him was the play-actors, whose portraits are given in the papers. He well knows the labor of that exhausting profession. These artists are gifted, clever, industrious; they feed ambition, they love applause, they shine in the footlights. But how short, heartrending and disastrous the career of many! The beauty of next week will eclipse the beauty of this, and, like the dew of the morning, they melt away. Our poor-wise man is a student of beauty. Lavater says, "God fixes all of a man's features for him except his mouth; this he can change." It can be marred by the curl of scorn and the pout of discontent, or it can wear the beauty of Cupid's bow. Delsarte says there are 700 expressions of the eye, and 2,000 expressions of the mouth. The miracle of the face is the triumph of expression over features that otherwise were plain and homely—over lines and contour that one would not expect could lend themselves to beauty. What influence are we spreading; are we hindering or helping other lives? Think, pray, live! Only one life but our influence never dies, it lives on in the lives of others.

Sir Philip Sydney says, "He travels safe and not unpleasantly who is guarded by poverty, and guided by love."

—H. T. Miller.

KEEP THE BOWELS REGULAR AND AVOID CONSTIPATION.

When the bowels are not kept regular they become clogged up with waste and poisonous matter, causing constipation, biliousness, sick headaches, piles, and all kinds of liver troubles.

Milburn's Laxa-Liver Pills will regulate the bowels so that you may have a free and easy motion every day. One pill every night for thirty days will cure the worst cases of constipation.

Mr. John J. Smith, Elginburg, Ont., writes: "I had been troubled for a great while with constipation, and tried many different remedies which did me no good. I happened to try Milburn's Laxa-Liver Pills, and I have found them most beneficial."

Milburn's Laxa-Liver Pills are 25 cents per vial, or five vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

HINDENBURG

Hindenburg was not even a name to the man in the street in Berlin when the Kaiser called the square-headed veteran from his favorite tap-room in Hanover in August, 1914, and bade him repel the bear. Military men knew him; remembered that he had retired from a corps command after a quarrel with the Emperor. But the public was introduced to a perfect stranger.

Within 30 days he was the national idol. For nearly two years he has been a demi-god.

Hindenburg personifies German belief in victory. He has been placed in supreme command of the Germans' military fortunes because they have had a childlike, legendary confidence in his prowess if all else failed—as failed it has. Events are about to prove the efficacy of myth in war. For "Papa" Hindenburg—"Napoleon," "The Saviour of the East," "Charlemagne" Hindenburg to give him a few of the pet names with which the idolatry of the nation has endowed him—is Germany's great myth, is he to follow his predecessors in failure at the general staff and become German's great illusion?

Men coming out of Germany say that Hindenburg is immensely amused at the mountain of romance which has grown up around him. He is not overburdened with modesty—he is too typical a Prussian martinet for that—but he has sufficient sense of humor to confess amid the privacy of his Liebgetrank (special drink), which is a knock-out concoction of stout, German champagne, brandy and Burgundy labelled East Prussian cup, and cigarettes (his favorite smoke), that many of the best tales which fame has wreathed round his name are imaginary. He realizes that he has to a large extent been press-agented into world's renown.

But Hindenburg, for all that, typifies the Prussian war god. His bulk and general exterior lend themselves well to the image the popular imagination has constructed. He has a head which looks as if it had been chopped out of a block of wood with a blunt axe. Ferocity, which Germans love to associate with their war idols, leaps out of a pair of deeply-set beady blue eyes. The aspect of Furor Teutonicus is completed by a shock of bristling, upstanding hair and set of fierce outward pointing moustaches. Add to these outstanding features a frame of ample girth and some six feet of burly stature and you have the physical incarnation of courage, brutality and cruelty which the Germans think a conqueror ought to be. So they have driven nails of homage into his effigy for one and a half years.

Hindenburg has done his best to live up to his nails. Since the Russians barred his further progress, after the conquest of Poland, he has been putting in most of his time fitly enacting the role of national idol. The legend factory at his headquarters has enormously increased its output. Aphorisms have been reeled off needlessly. Evidently he is not of the strong and silent breed.

"I hate the English," was one of the first of his utterances to enhance his mushroom fame. "The war will last, I hope, until all and sundry have been subjected to our will," is the autographed inscription embellishing the photograph which the field-marshal declared to be his best likeness. He has emphasized his innate modesty on every possible occasion. "I don't like to be made a fuss of," he said to his principal press agent, Dr. Goldmann, of the Vienna Neue Freie Presse, last Christmas. "Cincinnatus, who went back to his plow" (Hindenburg added) "was an inspiring figure. When I have done my duty I want to return to my Stammlokal (favorite tap-room) and my garden in Hanover."

Whether all this has been a pose or his bearish naturalness, the mien of Hindenburg has gripped the German imagination to an astounding extent. He completely overshadows the Kaiser himself in popular favor. The fantastic scribbler who wrote "Hindenburg's March into London" was a literary worm, but a master psychologist. He knew that no war objective could possibly be too chimerical to catch the fancy and the pfennige of the Germans, if only "Napoleon's" name could be identified with the mirage. Hence, too, the amazing alteration of German nomenclature which will some day make visitors to Germany wonder whether they are in Germany or Hindenburgany. The newest battle cruiser is the Hindenburg. The biggest architectural monstrosity of all time is the pagan-like statue of the hero in Berlin. Provinces, counties, towns, streets, museums, hospitals, orphan asylums—an appropriate touch, that—babies countless will be known to posterity under the magic name. East Prussia, which he saved, venerates him almost as if he, not the Hohenzollerns, ruled their hearts and claimed their fealty by divine right.

In the welter of flattery, legend and bombast in which Hindenburg has had his being since August, 1914, very little has been said or done by him or his admirers actually to justify his claim to the dizzy eminence to which he has just been elevated. He has a different problem to confront, as strategist-in-chief of Germany's beleaged armies, than he had when he met the Russians in the Mazurian mud or followed their unequipped armies back through Poland. Such oracular utterances as Hindenburg has emitted about the war itself have, indeed, indicated amateurishness rather than profound military genius. He has rambled incoherently about "England's Achilles' heel—and I don't mean India either." He depicted the Russians as "rotting and rotten" after Warsaw and Brest-Litovsk, and laughed at the notion of their eventual recuperation. He has whimpered his "inability to understand why the allies do not face iron facts and acknowledge their defeat." Events have marched fast and furiously in the meantime. A few months ago Hindenburg was credited with saying: "Germany's military situation is brilliant, but without prospects." I imagine that down in his old warrior heart he realizes to-day that, while the Kaiser's cause still remains without prospects, it has visibly ceased to be brilliant.—London Mail.

"Did you meet any nice men while you were away?" "Yes, mother. Lots of them." "Lots of them! There aren't that many in the whole world."—Detroit Free Press.

Newlywed — Have you never thought seriously about marriage? Singleton—Certainly not. No man ever thinks [illegible] marriage until after [illegible].

Had Weak Back and Kidneys.

COULD HARDLY MOVE IN BED.

When the back becomes weak and starts to ache and pain it is a sure sign that the kidneys are not performing their functions properly.

On the first sign of backache Doan's Kidney Pills should be taken and serious kidney troubles prevented.

Mr. Francis McInnes, Woodbine, N.S., writes: "I deem it my duty to let you know the wonderful results I have received from the use of Doan's Kidney Pills. For a long time I had been suffering from weak back and kidneys. I used to suffer the most at night, and sometimes could hardly move in bed with the pain. I could do no hard labor on account of my back. A friend advised me to give Doan's Kidney Pills a trial, and I am glad I did for the pain in my kidneys is gone; my back is strong, and I can perform any hard labor and get my good night's sleep. I only used three boxes of the pills."

Doan's Kidney Pills are 50 cents per box, or 3 boxes for $1.25; at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont. When ordering direct specify "Doan's."

FARM AND GARDEN

CARE OF CURRANT BUSHES.

Propagation is generally made by cuttings of the ripe wood, which is usually done the later part of August or in September. The cuttings are made six to eight inches long, from good, sound wood of the present season's growth, cut off smooth, just at the base of a bud.

Cuttings planted in early fall, will usually become rooted by the time winter sets in, and this, too, without their buds pushing into leaf. The next season they will make a far better growth than if their planting is deferred until spring.

Fall planting of currant cuttings is practiced by most of our leading nurserymen of the present time, especially by those whose nurseries are upon soils or in sections of the country where the currant ripens its wood early in autumn.

The cuttings may be made in the fall, and if it is not convenient to plant them then, they may be tied in bundles and buried in the open ground or cellar until spring. But as the currant is one of the earliest plants to show its leaves, the cuttings should be planted as early as possible.

In cases where a variety is scarce and valuable, the cuttings may be but two or three inches in length. However, in that case they need more care in handling and planting, as well as keeping the ground moist, until they become rooted.

Propagation can also be done by layers. Branches, when bent down and covered with soil, or even pegged to the surface and then covered with a mulch will readily take root. The best time to do this, however, is in the spring of the year, because the layer will become well rooted by fall. Leave the end of the branch uncovered, only burying that part on which it is desirable to produce root. In the fall separate the layer from the parent plant and heel-in until spring. Cuttings grow so readily that this method of propagation is but seldom practiced with the currant.

While the currant will grow in almost any kind of soil or situation—it having great vitality—it requires good culture and a deep, rich soil to bring it to perfection, and it is a profitable crop.

The best soil for the currant is a heavy loam, approaching a clay. But, regardless of the character of the soil, it is important that it be a rich, deep soil. The currant, being a gross feeder, manure of almost any kind may be applied with impunity, and in almost any quantity.

The rows should be about six feet apart, with the plants about four feet distant in the rows. Some fruit growers grow currants between the rows in their orchards. This has proved to be very satisfactory, as the growing trees furnish some shade to the currants, and the ground is occupied with a money crop while the orchard trees are coming into bearing.

During the early part of the season the plants should be given frequent shallow cultivation. The currant naturally becomes bushy and requires but little pruning. From four to eight canes should be maintained, and these frequently renewed. All old canes should be removed when 3 or 4 years old, and all straggling shoots shortened in.

Barnyard manure is the best fertilizer for this crop. A few forkfuls should be placed around each bush in the fall, in the form of a mulch. This should be forked into the soil later, when it becomes rotted.

FARM NEWS AND VIEWS.

From time to time during the summer, go over young fruit trees to guide their growth. If too many limbs are starting from a given point, they may be thinned to the required number. If a rank limb tends to fill the centre or cross other limbs, it may be removed. If the strongest limbs all grow in the same direction, thus giving a one-sided tree, they may be pinched back, thus encouraging other limbs to start on the opposite side to balance the framework of the tree. In the case of upright-growing varieties, particularly the main limbs often tend to grow straight upward instead of spreading. In such cases the tips of these upright limbs may be pinched back. This will induce side limbs to grow outward, thus securing a spreading form.

Pruning tools should be disinfected after pruning each tree affected with fire blight, so that the disease will not be carried from tree to tree, and should be disinfected still oftener than this to avoid carrying the disease from one part to another of the same tree, as the pruner finds that he is cutting through diseased wood, says the Missouri experiment station.

Self-boiled lime-sulphur for spraying peaches and other stone fruits on which ordinary lime-sulphur cannot be used with safety, is made as follows. Put eight pounds of pure stone lime in a 50-gallon barrel and all just enough water to start it slaking. Stir thoroughly until the lime is all slaked and the material becomes a smooth, creamy mass. Fill the barrel with water and let it stand for a few minutes, then stir thoroughly and strain into the spraying tank. It should be used full strength. When carefully made, it will not injure the tenderest peach foliage.

Starved and stunted trees mean poor crops and small peaches. Trees which make a poor growth suffer most from unfavorable weather at blooming time. Trees should receive enough plant food to maintain an annual growth of at least twelve inches at the tips of leading branches.

We have had some degree of success in controlling the radish maggot by scattering tobacco dust in the row made for teh seed. Land plaster liberally distributed in the row at the same time will give the radishes a brighter color, and some folks think it improves their quality.

The sheep flock needs plenty of shade in July and August. Turn them into an open woodlot or in pasture where there are large shade trees. If this is impossible, better build them an open shed.

The strawberry field should be worked all summer and kept free from weeds and grass. The cultivator should be followed with a hoe.

PILES CURED at HOME By New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P.8, Windsor, Ont.

WONDER BOATS OF THE NAVY

"Jackies" at St. John, N.B., Tell of New Marvels.

45 Mile-an-Hour Cruisers—Huns Will Fight.

(St. John, N. B., Telegraph)

"You won't know our navy, you won't when this war is over," said a sturdy son of the sea, who was on board the battleship Warrior when she was sunk in the Jutland fight, when talking to a representative of The Telegraph last night.

He was a member of a gun laying draft of forty-three men that arrived in the city yesterday on the Chignecto from the West Indies where the boys have been engaged in gunnery practice. Not a few of them had been in that famous battle, but they did not seem to be wan or paralytic, in spite of that terrible experience; they were men after Nelson's own heart, who saw their duty ahead and did it.

"Yes," he continued, "no one knows the wonderful new ships that have been added to the navy since the war began. There's two I know about, light battle cruisers in Beatty's squadron, the Glorious and Revolution. They develop a speed of forty-five knots an hour, those fighting boats do. Now what do you think of that?"

"FAST AS EXPRESS TRAIN."

The poor landlubber could only blink hard and express his wonderment. "Yes, sir, fast as an express train, and that's tearing up the water all right."

The tar in question shifted his quid to the other cheek and said with a twinkle in his eye, "That's a bit faster than the express trains in this country. I don't know much about them, but what with the experience I've had that's my impression." The other members of the bluejacket party laughed heartily at what they called a "direct hit." While The Telegraph admitted that perhaps Beatty would be able to go racing the railroads to this country with good chances of success.

"A nitty little boat, that's wot I calls it," said a second member of the party who had hitherto held his peace. "We've never seen her likes afore in the old North Sea and I guess the next time we meet Fritzie he'll think we harnessed up the lightnin' bolts."

"So you think he'll come out again?" or there'll be some disappointed blokes in Jellicoe's outfit, I'm tellin' you. There'll come a time when they've got to come out and fight it out with bare knuckles under the old London rules."

His last remark betokened that he sometimes donned the mitts with his chums while afloat.

"There'll be no rounds, either, just one straight scrap to the end. One of us for the junk heap after that. Can you guess who?" Then the land-lubber was sure this jolly sailor was a scrapper with hard knuckles as well as big guns.

"BEAR BAD MAN WITH PADDLE."

"Some say that the Germans are cowards when they beat it back to the Kiel, but that's not so," he continued, displaying his salt-sea opinion. "The Germans are scared the Russians will come down out of the Baltic and run in the back door when they come out the front. Oh, the old bear is a bad man with a paddle, too, when he's roused, and the Russian fleet is watchin' all the time."

That the British tar is not only a fair fighter but unprejudiced in his opinion was shown when he was asked what kind of gunlayers the Germans were. "They're not so bad at first—middlin' good I'd say—right neat when they goes into action, but the poor blokes git excited. They needs nerve tonic, they do. When we give 'em two or three salvoes they go into the air and their gun layin' is jist 'orrible for a sailor to behold."

He said that in the Jutland fight the German fire was very effective at first, but as soon as the British ships got warmed up in action the Germans seemed to lose their skill and their shells went wide of the mark.

WARRIOR SANK ON WAY HOME.

The lad who was a [illegible] of the Warrior said that his ship sank nine hours after the action, [illegible] being towed home. Every effort was made to keep her afloat without success, and finally she went down, with her colors flying as gaily as ever. Five hundred and twenty men were taken off the ship before she yielded to the call of Davy Jones.

The boys expressed the oft repeated opinion of the navy that more ships were destroyed in the Jutland battle than the German or British admiralty ever announced and that the German loss was heavy indeed, losing some of their finest ships.

ST. VITUS DANCE CAN BE EASILY CURED

A Tonic for the Blood and Nerves With Rest All That is Needed.

Many a child has been called awkward, has been punished in school for not keeping still or for dropping things, when the trouble was really St. Vitus dance. This trouble may appear at any age but is most often met between the ages of six and fourteen. The most frequent cause of the disease is poor blood, aggravated by indoor confinement, or mental strain at school. Under these conditions the blood fails to carry nourishment to the nerves and the child begins to show listlessness and inattention. Then it becomes restless and twitching of the muscles and jerking of the limbs and body follow. A remedy that cures St. Vitus dance and cures it so thoroughly that no trace of the disease remains is Dr. Williams Pink Pills which renew the blood thus feeding and strengthening the starved nerves. This is the only way to cure the trouble, and parents should lose no time in giving this treatment if their child seems nervous or irritable. Mrs. Wm. A. Squires, Cunnington, Ont., says: "My only daughter, now fourteen years of age was troubled for several years with St. Vitus dance. She was so bad that at times she would lose control of her limbs and her face and eyes would be contorted. We had medical advice and medicine, but it did not help her. In fact we thought the trouble growing worse, and finally we had to take her from school. About a year ago we began giving her Dr. Williams' Pink Pills and by the time she had taken five boxes she was completely cured, and is now a fine healthy girl. I firmly believe we owe this to Dr. Williams' Pink Pills and are very grateful for her restoration to perfect health." You can get these pills from any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

GAMES AND THE CHILD.

Influence On Young of Games of Chance.

There is a certain fascination about games of chance for young as well as old. The human mind seems to be made up along lines which enjoy the element of suspense and surprise. This, coupled with the hope which springs eternal in every breast, makes the average individual of even tender years, enjoy "taking a chance" with the expectation of winning something.

Mothers are likely to meet this problem soon after their children begin to play with other children or to go to school. Playing marbles for "keeps" seems to appeal to every young boy with the passing of the snow and the coming of the leaves. It is a mistake to think that no action should be taken in regard to games of this kind, for there is a distinct principle involved, and the child who is allowed to play games of chance will become calloused to the finer sensibilities of right and wrong.

Games of chance are immoral, in that through them we hope to gain that for which we have not offered honest and adequate return. They teach us to expect something for nothing and so discourage the disposition to proper effort. Sooner or later the one who indulges in pleasures of this kind is led into sporting company and so the ideals are bound to be lowered.

Perhaps one of the things which young America needs to be taught to day is that it takes continued effort to accomplish worth while things. A game or a lottery which awards something of value creates false standards and the question soon arises: "How else can I get what I want without effort on my own part?"

Any game of chance should be avoided and a child's parents should take pains to explain why it is wrong and forbid participation in plays of this kind. Every effort should be made to arouse the sense of honor in the child so that there will be no disposition to do anything of this kind on the sly.

This does not mean that competitions may not be entered which offer a test of wits and skill, for this is a different matter. In a competition each person is pitted against every other one and rewards are offered to those who can show the greatest efficiency in some given lines.

The very fascination and charm of games of chance soon make it difficult to break from their hold. The gambler is not made in a moment. He has to travel a long path before he becomes obsessed with the idea that if he keeps on he may win large stakes.

Corns Cured Quick Applied in 5 Seconds

Sore, blistering feet from corn-pinched toes can be cured by Putnam's Extractor in 24 hours. "Putnam's" soothes away that drawing pain, eases instantly, makes the feet feel good at once. Get a 25c bottle of "Putnam's" to-day.

STAY-AT-HOMES' RIGHT TO SING

Of Their Guard of Canada, Doubted by Preacher.

Coming and Going Soldiers and Their Outlook.

Two crowds of men in khaki met and mingled at Quebec this last week-end. The one bunch going to the front, the other coming back from the front,—many wounded, all disabled.

You could see the difference in their faces and in their walk. You could not say that one bunch was in better spirits than the other; and yet, even in that matter there was a difference.

It came out in the course of an after-church conversation.

There was a church parade for the men about to leave, and some of the newly-returned men were there too.

The preacher, in the course of his sermon, said:

"I sometimes ask myself the question, when we sing, 'O, Canada, we stand on guard for thee,' what right we have to sing it,—we who stay comfortably at home."

Some of his civilian hearers must have found it hard to give a satisfactory answer to the question. Even among his soldier hearers there was at any rate one who was not altogether satisfied with himself.

He was talking it over afterwards with a young fellow of the departing regiment.

"I hadn't been two days in the trenches," he said, "didn't have a chance to do anything, before I got hit, and now this," he continued, looking down at his right arm, "is good for nothing. It'll be months before I can use it, they say, and maybe never. Talk of me 'standing on guard' for Canada or anything else!"

The other was evidently at a loss, at first. But then an idea struck him.

"I guess that's what was the matter with my brother," he said, "It's on account of him getting knocked out that I'm going. There's only two of us boys, and we did most of the farm work between us. He came back with a game leg,—had to spend three months in a convalescent hospital—one of the places that the Military Hospitals Commission is running, if you ever heard of them.

"Well, they had all sorts of classes there, teaching the boys book-keeping and short-hand and type-writing, and mechanical drawing and carpentering and metal-work, and cobbling, and raising vegetables and chickens and such like. They wanted to find out what every man was likely to do best, and make him real fit for it, so he shouldn't be shoved out of his job when the rest of the boys come back and jobs are not plenty as they are now.

"Jack said he didn't feel as if he'd ever be fit for anything. The job he'd taken on was fighting, and he wanted to go back and finish it, and as he couldn't do that—well, you know how a man would feel.

"There was another man there, half-crippled with rheumatism, and he said to Jack one day I was there—'See here, somebody's got to keep things going at home, or how can we keep things going at the front? I've got to go into an office or something of that sort. It's not what I've been used to, but even office work's got to be done. As for you—well, I envy you. There's some things you can't do, but there's many you can, on the farm.

"'If you can't fight with 'em you can feed 'em,' he said. And Jack sort of chewed over that for a while, and said he guessed it was so. And he's doing it. Jack says his leg don't bother him near as much as he thought it would. And Dad says Jack is more use now than he was before.

"There's lots of things they show you how to do with one arm. Only I guess, with the electricity, and machines for getting power back into your limbs when they feel like being gone for good and all, you won't have to do with one arm after all."

The invalid seemed to see things in a more cheerful light.

"Well," said he, after a pause, "If I can't do my bit over there, I can't do it over here, darceny. It won't be for lack of trying, if I don't."

LET IN THE LIGHT.

Faded Carpets Are Not as Pitiful as Faded Cheeks.

Fresh air enthusiasts are familiar enough to most of us, but we hear less of enthusiasm for light. Darkened parlors, darkened bedrooms, darkened sickrooms are too common.

Sir B. W. Richardson, the eminent London scientist and physician, declared that when the professors of healing enter a sickroom their first words in most cases ought to be Goethe's dying exclamation, "More light, more light!"

The light of the sun is God's own microbe killer, germicide, disinfectant, prophylactic, sickness healer. There is no physician, no chemical antidote no compounded prescription to be compared with sunlight. Without it nature could not perform her functions. Man, beast, bird, insect would fall victims to the deadly gases that would prevail. The horrid mists and deadly gases are dispersed and decomposed by the action of light.

Let it in, everywhere! Let the light in more and more abundantly. Faded carpets are not so pitiful as faded cheeks. Soiled cushions are trivial compared with spoiled health. Darkened rooms are too suggestive of darkened lives.—Christian Herald.

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commissions—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada, who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

THE SOLDIER AND THE SHEEP

Wool and Lambs Can Be Raised By Men Who Cannot Till Soil.

(By J. H. Grisdale, B. Agr., Director of Experimental Farms.)

"The Soldier and the Hen" was the title of a paragraph published recently describing the way in which soldiers had taken up poultry-raising at some of the Military Hospitals Commission's convalescent homes.

Poultry raising is one of the out-door occupations available for men too badly disabled for general farm work.

Several kinds of farm work, however, are within the powers of men partially disabled and one of these is sheep-raising.

Mr. J. H. Grisdale, Director of the Dominion Government's Experimental Farm system, has kindly sent the Military Hospitals Commission the following article on "Sheep farming for returned soldiers":

Agriculturally, Canada is and has been a land of big things. Sheep, however, though great money-makers in many other countries, have received anything but the attention their possibilities well merit in this country. Yet, every province in Canada has been proved to include extensive areas highly suitable to the successful pursuit of the sheep-breeding industry, and climatic conditions seem favorable in practically all parts of the Dominion.

One peculiarity of this industry is its suitability to either fertile or inferior lands. Much money has been made with sheep on farms where no other line of farming could possibly have been followed.

Another peculiarity is that it may be conducted either on a small scale, earning a satisfactory income, or on a very large scale, building a fortune. The small-handed farmer with his tidy little flock of high-grade ewes is sure of a comfortable income while the rancher with his wide scattered flocks and his hired shepherds may be easily on a financial par with the railway president.

A MOST ATTRACTIVE LINE.

To the soldiers returning war-wearied to peaceful pursuits in this country, in my opinion no single line should prove more attractive than sheep-farming. Even though previously entirely innocent of any knowledge in this connection, one really interested can easily and quickly get into the business. A few months spent where sheep are kept, then a little bit of cheap land, a few [illegible] grade ewes with a right good ram, and the thing is on its way.

The initial investment is small, the daily labor is light, and the sum of work for the year much less than with most other lines of live stock. Besides, the work is of such a character that great physical strength or robust health is not essential to success, though these conditions are usually most necessary to farming.

There is plenty of room, there are many farms ready and waiting for thousands of small sheep farmers, in Nova Scotia, New Brunswick, Quebec and Ontario, to say nothing of the prairie provinces and British Columbia.

Anyone at all interested in making a living in this country, with a minimum expenditure in capital and labor, cannot afford to neglect the possibilities of this most attractive industry, for its present returns are most satisfactory, and even when war prices fall there is no reason why its future should not continue to prosper.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day it is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Don't Whip a Child in Anger.

It is absurd to whip a child who is overcome by anger. The best thing to do is to let him alone and let his passion wear itself out. If he could be taken before the anger gets the upper hand of him he might be controlled.

What the parent should do is to study the things which will arouse the child's anger and then avoid those things. It is the height of folly for a parent to excite anger in a child and then try to control it by punishment. It is worse than folly; it is brutal and is likely to ruin the child.—Mother's Magazine.

LINERS TO BE OVERHAULED

The C. P. R. is going to overhaul its trans-Pacific liners at the beginning of the new year. The boats will be laid up at drydock at Hong Kong for renovation and repair. The Empress of Asia will be the first to be laid up. She will be out of commission for about a month. The Empress of Russia and Empress of Japan will be laid up in turn—the former have a month and the latter 26 days at Hong Kong. The big liners are kept in the best of trim, being all thoroughly overhauled once a year. The Empress of Asia and Empress of Russia have not been completely overhauled since they were released from the Admiralty service, toward the latter part of last year. The Monteagle, which is now on her way across the Pacific, was recently overhauled in Hong Kong.

THE POULTRY WORLD

FANCY VS. UTILITY.

One of the leading questions among those interested in poultry is that of fancy vs. Utility. For years the dyed-in-the-wool utility poultry keeper has made the claim that breeding for fine feathers, good looks, proper color, eye, comb, etc., retarded the utility qualities of the fowls. In the commercial poultry keepers mind was ever the idea that no prize winner or high grade show bird was worth anything from the utility standpoint. But in past years a few broad minded progressive breeders have shown that this does not hold good when the poultry keepers' mind was over the manner. At the very beginning the utility fowl of to-day was made and formed into the standard bred fowl by the so-called fancier, and in the past, when the farmer wished to improve his flock, they sent to the fancier for new blood by either purchasing eggs for hatching, a male or pen of females. The standard bred fowls of to-day will not be improved fast, except in egg production, unless there is a more give-and-take attitude taken in the utility vs. fancy question. There should be no great dividing line between the two classes of breeders, for there is no good reason why in a measure the two cannot be combined to a great extent. The much-discussed egg type question is gradually passing away—due to the proof given out by the leading progressive breeders and laying contests showing that high grade performers as far as egg production was concerned were not all one shape, type or breed, that shape of the fowl, color of the eye, size of the comb, etc., has anything to do with egg production has been exploded by tests under trap nests. In the hands of the leading breeders, the laying contests and the experiment station. All any hen must have is a body large enough to hold a heart, a good pair of lungs and body capacity enough to hold good egg organs. These can be found in almost any of the standard bred fowls to-day, and beginners should consider carefully when purchasing the different claims made by advocates of fancy and utility. Without question the great majority of the breeders of the future will be those that will combine both qualities to the highest state of perfection. That it requires more time in obtaining these requirements is admitted by all well-known experts, but it is worth while in the extra price obtained for this class of poultry.

WHEN PULLETS SHOULD LAY.

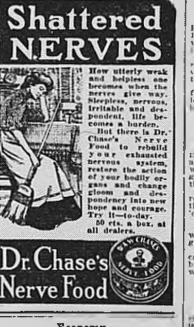
The age when an April hatched pullet will begin to lay depends altogether on the care she has had since hatching. If she has been fed to make a steady growth without interruption, she may lay in six and a half months, and possibly a month earlier. If she has been stunted in her growth at any period by lack of food, improperly balanced food, overcrowding, or chilling, she may not lay until after Christmas. Then, too the weather has a good deal to do with early laying. If pullets are exposed to inclement weather at the time when they might lay egg production will be delayed. Again, if they are moved just when the egg organs are maturing, they are likely to be set back in their laying. For this reason, it is important to get the pullets into their laying houses early; move them gradually; have the house clean, the pullets free from lice, and make sure that they are contented in their new quarters. Chickens have their likes and dislikes. If the house suits, then, and they can settle down comfortably to scratch and sing, they will lay sooner than if they are wandering around discontentedly, flying from floor to window, trying to escape.

Chickens have very human characteristics: the most successful breeder is the one who humors his birds. We used to have a hen that would fight every bird in the exhibition pen if she went in first; but if she was put in last, she behaved peaceably. She had to go in tail first, too, or she would flap her wings and struggle until there was danger of broken feathers. The average man won't cater to these idiosyncrasies, but it pays.

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always. *50c. Box at All Druggists and Stores.*

USE ONLY ZAM-BUK FOR CHILDRENS SORES



Shattered NERVES

How utterly weak and helpless one becomes when the nerves give way. Sleepless, nervous, irritable and despondent, life becomes a burden.

But there is Dr. Chase's Nerve Food to rebuild your exhausted nervous system, restore the action of your bodily organs and change gloom and despondency into new hope and courage. Try it—to-day.

50 cts. a box, at all dealers.

Economy.

"There is much truth in the say-
wife is a woman who never allows a
crumb to fall from her husband's
table without carefully picking it up
and putting it in her husband's bed,"
says a writer in an English paper.
ing of the cynic, that the economical

The real beggar is indeed the true and only king.—Lessing.

WIT AND HUMOR

JUSTIFIED.

(Exchange)

Elderly Spinster—Policeman, arrest that man! He just walked up to me and whispered that I was the most beautiful woman he ever saw.

Policeman—Very well, ma'am. What shall I charge him with—insanity?

NAUGHTY THING.

(Lampoon)

"Mrs. Murphy, have you seen my glass eye?"

"Yes, sur; it was readin' one of your letters, and I hid it in the bureau."

WHAT COOK MISSED.

(Rochester Times)

Landlady—I'm sorry you think the chicken soup isn't good. I told the cook how to make it. Perhaps she didn't catch the idea.

Boarder—No; I think it was the chicken she didn't catch!

HER VIEW OF MAN.

(Exchange)

Woman's changing appreciation of man, according to Mary Irwin, may be correctly summoned up in three brief but definite interrogative sentences. At the age of 16 years she asked: "Who is he?" When she has reached the age of 26 years she asks: "What is he?" And at the age of 36 she nervously inquires: "Where is he?"

FOUND HIS BROTHERS.

(London Tit-Bits)

An Irishman went to Australia looking for two of his brothers who had been out there for some years. Their names were Pat and Ted. Whilst walking off the railway station he saw an engine with the inscription: "Patented 1900."

"Begorra," said he, "Oi have found them bhoys afther all; they are bhoiler manufacthurers. Pat-en-ted 1900, and it was the very year, bejapers they came out here."

THE FOXY CANVASSER.

(Rochester Times)

Irate Business Man—You book agents make me so angry with your confounded nerve and impudence that I cannot find words to express my feelings.

Agent—Then I am the very man you want. I am selling dictionaries.

PIONEER HARDSHIPS.

(Exchange)

"When we first came here," said a Dakota man to his visitor from the east, "our nearest neighbor lived 12 miles away."

"The land sus!" she cried. "Who'd yer borrer from?"

FACIAL MEASUREMENT.

(The Christian Herald)

A teacher one day asked her class if they knew which was the longest word in English language. A small hand waved frantically.

"Well, Johnny, what is the longest word?"

"Smiles," promptly answered Johnny.

"But that has only six letters!"

"Yes'm, I know it, but it's a mile between the first and last one."

CLEVER HENRY.

(Pearson's Weekly, London)

She (tearfully)—Henry, our engagement is at an end, and I wish to return to you everything you have ever given me.

He (cheerily)—Thanks, Blanche! You may begin at once with the kisses!

They are married now.

HOW THEY DO IT.

(Dallas News)

"Well," said the Far West mayor to the English tourist, "I dunno how you manage these affairs over there, but out here, when some of our boys got tied up in that thar bankrupt telephone company I was tellin' yer about they became mighty crusty!"

"Oh!"

"Yus; they didn't like the way the receiver was handlin' the business no-how."

"Indeed!" commented the earnest listener; "then, may I ask what they did?"

"Sartinly; I was goin' ter tell yer. They just hung up the receiver."

FISH.

(London Tit-Bits)

In a North-country harbor a Scotch drifter was having her name repainted. Near to her was a British war vessel, from the deck of which a knot of interested tars watched lazily whilst the letters "P-S-Y-C-H-E" were completed. Just then one afflicted with a particularly sensitive "receiving station," received a "brain wave."

"Ho, there below!" he drawled, and the words squirmed along the stem of his small clay. "Cawn't yer not spell? Was yer never at school, eh? That's not the way we spell 'fish' in the navy."

POSITIVE PROOF.

(London Tit-Bits)

Two Scottish soldiers on their way to France passed through London recently. It was their first experience of the "big village," and they were naturally keeping their eyes open.

Their watchfulness was, however, not sharp enough to avoid a taxi in the vicinity of Victoria Station, and one of them got knocked over.

As he picked himself up, none the worse for his fall, his mate growled: "Mebbe ye'll believe it's busier than Kirkintilloch noo."

NOT SO SLOW.

(Exchange)

The train had stopped, and the old lady put her head out of the window and inquired of an old railway porter what it was stopping for. The luggage smasher was inclined to be facetious.

"Engine out late last night, ma'am," remarked, with a smile, "so she's got a thirst on her this morning; they're givin' 'er a drop o' water."

"Sure it's water?" queried the dame.

"If you'll wait a minute, I'll inquire whether they're givin' 'er port wine," he grinned.

"Never mind, my man, don't trouble," came the answer. "I thought, perhaps, by the way we've been getting along, it was sloe gin."

ECONOMY.

(London Tit-Bits)

In the third-class compartment of the city train the conversation turned on the important subject of economy. Various views were expressed. Then a small man in one corner said, slowly:

"A friend o' mine—leastways, 'e's more of an acquaintance like—'e ain't spent a ha'penny in five years."

"Hot!" "What are you givin' us?" and similar remarks greeted this statement.

"Fact!" said the small one, briefly, as he lit his pipe. "But 'e'll be out of jail next week!"

NOT AN EVANGELIST.

(The Christian Herald)

The orthodox minister's son, Tommy, aged 6, had a fight with a larger boy, with the usual result. As his mother washed the blood and tears from his face, he sobbed:

"Jimmy will go-o away into ev-everlasting punishment for this, w-won't he, ma?"

"Oh, I hope he'll repent and be saved," said his mother.

"Well, I just hope he won't," said Tom.

EVIDENCE CLOSED.

(New York Sun)

Lawyer's Wife—So your client was acquitted of murder. On what grounds?

Lawyer—Insanity. We proved that his father once spent two years in an asylum.

Lawyer's Wife—But he didn't, did he?

Lawyer—Yes. He was doctor there, but we had no time to bring that fact out.

TOO BUSY.

(Exchange)

An Edinburgh gentleman died the other day, and a small boy—open-eyed and silent—watched while the coffin was placed in the hearse.

"Have you said your prayer, Willie?" said his mother, after tucking him into bed that night.

"I'm not going to say any prayers to-night," replied Willie, with the air of one who had fully made up his mind.

"But you must."

"No, not to-night," Willie persisted.

"Why not?" asked the mother, in astonishment.

"It's no use," said Willie. "They will be so busy in heaven to-night unpacking Mr. Jones that they will have no time to listen to the prayers of little boys."

EDITORIAL COMMENT

"The man who gets mad at what the newspapers say about him should return thanks three times daily for what the newspapers know about him and supress." Old, but yet true.

+ + +

The Hartford Courant remarks that a curious development of the present business activity is the scarcity of boys for office work. This in turn has resulted in the employment of many men so old that they had already been dropped from their former occupations.

+ + +

The automobile was going down hill at top speed. The driver did not know there was a curve in the road until he reached it. The sudden turn took the machine off of the two outside wheels, the girl in the front seat screamed, grabbed the driver's arm, and then they had to call the coroner. Such foolishness!—Rochester Herald

+ + +

In view of the high cost of living and the huge profits made by the few out of the necessities of the many we would suggest to the clergy as a text for a sermon, Isa'h 3: 14-15: "For you have devoured the vineyard and the spoil of the poor is in your house. Why do you consume my people, and grind the faces of the poor?"—Toronto Star.

+ + +

A Toronto mother instructed her husband to proceed down the cellar, and bring up a pail of coal for the stove fires. After half an hour's absence she went to the cellar door, and asked: "How long are you going to be with the coal?" "It's all right" came the reply in muffled voice "I'm half way to the coal bin now; I'll soon move the rest of the bottles."

+ + +

As an instance of the whole-hearted sacrifice made by Britain, Sir Hamar Greenwood, M. P., stated in Toronto, in an address before the Canadian Club, that motoring as a pastime had been given up. "There are more motor cars running on the streets of Toronto to-day than in the whole of England. Cars have either been stored or sent by the tens of thousands over to France."

+ + +

Prof. Wrong opines that Capitalistic influence is too strong in the daily press of Canada. If that is true, the situation would be helped by the metropolitan papers raising their subscription price so as to lean more upon their readers and less upon a few big advertisers for financial support. The fact that the big dailies are being driven to raise their subscription price owing to the higher cost of newsprint is not an unmixed evil.

+ + +

This is a lean year for American as well as Ontario farmers, in so far as volume of production is concerned at all events. Across the line, as here hay is the only staple crop that has given a really satisfactory yield. The American wheat crop, it is estimated, is short practically 400 million bushels, oats another 400 millions, corn is short 600 millions, and the yield of barley is the smallest in many years. The potato crop is only about half of the average crop.

+ + +

In the Christian Guardian, Rev. Byron Stauffer says some plain things about church going, and the excuses people make for not attending regularly. The blame is usually laid on the preacher. The average pastor has a lovely job. If he preaches too long he is dry; if too short he does not put enough preparation on his sermons. If he attends strictly to the people he does not draw outsiders to the church. If he mixes with "the people" he is a rounder and is accused of neglecting "his own" people. He has to please the officials, the managers, the Ladies' Aid, the Mission Society, the Sewing Circle and "The Old Women's Fault Finding Club," the members of which do not all wear skirts. He's expected to shoulder all the real spiritual work of the church, and if he does not always do everything right up to the mark the anvil chorus leads off in trouble forte. The average preacher in a small place gets less than $1000 a year and on this he has to dress well and educate his family well. In addition he has to please everybody who contributes to that munificent salary, not excepting those who by rigid economy and stupendous sacrifice manage to contribute 10c per week to the church's finances. And so it goes. And the church suffers because of it. We go to church and we criticize the choir and let brotherly love love die from starvation. And then we have to import a professional reviver like Rev. Billy Sunday to revive us, and tell us our short-comings. A little more co-operation, a few more words of encouragement to the preacher might make a wonderful difference in our churches. But after all, if we did not have the preacher to find fault with, a lot of us like Othello, find our occupations gone.

A Derby farmer's wife had a sad experience for her on Friday morning last. She offered ten pounds of butter for sale on the market, but before she got rid of it Mr. Chas. Pratt discovered that every print was two ounces short. He confiscated the lot and the woman's husband was asked to appear in the Police Court on Saturday morning. He failed to put in his appearance and the butter was handed over to the Children's Shelter.—Owen Sound Sun.

+ + +

The local Red Cross Society find that in their business the purchasing power of a dollar is considerably less. Shirts that used to be made up for $1.50 now cost $1.83, and flannel shirts that formerly cost $1.30 now are worth $1.54. In the material for socks the same thing is noticed. Two years ago yarn for a pair could be secured for 25 cents, whereas now it costs 60 cents. But the Red Cross work must go on, and it simply means that the contributions must increase. If it pinches to give more here, remember that it pinches the boys at the front harder if we do not give.—Guelph Mercury.

+ + +

If the Laurier Naval Act, which is still on the Statue Books of the Dominion, had been put into effect, Canada would now be possessed of a fleet of light cruisers and torpedo boat destroyers that would give ample protection against German submarines along the Atlantic Coast. The appearance of a raiding submarine on this side of the Atlantic is one more proof of the wisdom of the policy of establishing a Canadian navy, which policy was adopted unanimously by both parties in the Canadian Parliament in 1909, and subsequently repudiated by the Conservative leaders in order to placate the Nationalist.—Simcoe Reformer.

AFTER THE BEANS ARE SPILLED

(Toronto Saturday Night)

The attempt on the part of Sir Robert Borden to hand a lemon to Sir Wilfrid Laurier, in the shape of a seat on the National Service Board, has had little or no effect on the general situation. As often pointed out in these columns, the possibilities of any success crowning a movement of this sort, at this late date, are very doubtful indeed. Now that the beans are spilled, it was thoughtful of Sir Robert to ask Sir Wilfrid to come forward and share the responsibilities. The mismanagement of our man power in connection with the war has been such that nothing that can be done will ever repair the damage. Muzzling Bourassa would probably be the most effective method of still accomplishing a little something, but, of course, this will not be done. But asking the Liberal leader to share the responsibilities of Conservative mismanagement was rather a good idea, the only trouble is the Old Man saw the point of the hook and concluded not to bite.

OUR WESTERN LETTER

Written for the Telescope
By an Old Bruce Boy.

I think it will be advisable to come to Walkerton and take a course of training in the Business College there with the typewriter. The Monoline or Lynotype or whoever sets up the type for the "Telescope" has made some bad mistakes at reading our writing. In our last letter he has got "land suckers," we wrote "land seekers." I see the Telescope has labelled me as farming in Northern Alberta which is away off. I am in Central Alberta about half way between Calgary and Edmonton and a few miles west of the 5th meridian.

Last week we took a trip to Lacombe and were surprised at the amount of oats uncut. We were told the land was so wet the binders couldn't run. Some farmers were still hoping to get some cut when it dried. As far as our travels extended we saw hardly any wheat that would be worth threshing, and any barley was of the feed variety. Seed barley we should say will be at a premium in this part of Alberta next spring. One neighbour who had good wheat sold it all last week when he threshed, at $1.10 a bushel in the bin. All was bought for seed.

We are now having squaw winter after several weeks of really nice weather. On Monday night it snowed over six inches of good wet snow that would do credit to Ontario. Yesterday and this morning it was not sure whether to quit or keep on a-doing of it. Present indications look like a return to good weather. As a great many people here thresh direct from the stook, this snow will put the Kibosh on threshing for several days.

A good story is circulating here. Some weeks ago, a farmer who came from the U. S. A. a few years ago got a letter from a firm of lawyers saying that a wealthy uncle of his had died some ten or eleven years ago, that not knowing his whereabouts they had been advertising and searching for him through the States and had only recently located him. They enclosed several papers relative to the density of his hair, age of grandfather at birth, color of mother's eyes etc., to be filled in and sworn to. In reply he was informed that he had fully established his claim as heir to the wealthy uncle. Also was enclosed the lawyers bill for advertising and searching for him and administration of estate with a draft for $1.00, being the balance of the estate after settling the small items.

LIVE QUESTION OF THE DAY

Thoughtfully Treated By Mrs. B. J. Waechter at Walkerton Women's Inst.—How Shall We Meet the Problems That Shall Confront Us After the Great War?

We are members of one of Canada's women's organizations and, as such, is it not up to us as a body of intelligent women, to be ready when this world war is over, to meet the problems that shall confront us, and not only be ready as a body, but individually as well. In time of war, to save the national life, extreme measures are resorted to. War is to be deprecated, but it inspires such heroic virtues that hero worshippers we all are instinctively. War develops some noble qualities. It generates patience, self-denial, courage, chivalry and patriotism. It broadens our ideas, teaches us other people's ways, brings out inventiveness never dreamed of in times of peace, and many other things. Now you think I am getting away from my subject, but what I want to get at is this—after all this upheaval, do you think we as individuals, or as a nation, or as an organization of women, will go back to where we were before the war started and continue as if it had not happened? Certainly not! The world has had the greatest upheaval socially, industrially and politically that it has ever known and it will never be the same, and we are bound to meet with innumerable problems unthought-of now.

But just now there are five problems standing out distinctively in my mind, namely—

1. Our returned soldiers, 2. The immigration problem, 3. Labour problem, 4. Propagation of home industries, 5. and by no means least, Women's franchise in Ontario. Just now a line I read in a magazine the other day occurs to me. It was this, "While we are fighting let us fight only, and waste no breath on home controversies," but as 'Preparedness' is one of the main words of to-day also, I guess a little previous discussion of the problems before mentioned won't hurt.

Canada has already some three hundred and eighty-seven thousand khaki clad lads doing their bit at home and abroad a couple of hundred thousand more likely to sign up, and of these let us pray that after the war we may count the returned by the hundred thousand still. But of those men are there not likely many to return unfit to fill the positions held open for them by many of their former kind Canadian employers? What of these? They sacrificed good positions and prospects. Now what? War pensions—yes, but will they be content with that? Canada must find new industries where these men can work. Then again in Western Canada thousands of acres of untilled land lies. Land grants for the soldiers, eh? After the South African war, the veterans got grants of land but the trouble was only a few of them availed themselves of the opportunity and the land in many cases was bought for next to nothing by Company men and real estate dealers and the west was none the better developed thereby. Again, do these boys, after being for a couple of years in with their fellows, and having as well as the horrors of war, the pleasures of fellowship, want to go away to some western wild and settle on a lonely homestead? No, there is nothing very enticing about that, but it is up to this country to see that if they are left land and they go to it, things are more pleasant for them. The grants should be made so that they may be in communities and the government should see to it that they have schools, churches and community halls, built at once and not leave it till these men make the money to build them. Then again, there will be some, perhaps the mainstay of many homes, who will return to these homes unfit to work or take part in anything and it is up to us to see to it that there are institutions wherein they may be cared and money raised to keep such institutions up. This war has taught us to be thrifty and to save, but what shall that avail if we use our savings to disadvantage. The problem of our returned soldiers is a big one but they have sacrificed their all to do for us, therefore our best shall be none too good for them.

How about immigration? Canada has talked much about immigration in the past. It has acted some, but after the war, what then? Downtrodden Europe with its thousands of homeless, poverty-stricken inhabitants looking across the broad Atlantic to this fair Canada of ours—shall we let them look in vain or shall we open our arms in welcome to them, seeing in them the means of solving many of our labour difficulties, of developing our industries and of bringing to us the secrets of the old land's thriftiness and industry. There is much said about indiscriminate immigration. If I am not mistaken our Canadian law calls for all immigrants being examined physically, mentally and I might add, financially. There is justice in the first two but what about the last? What I mean by the last is that all immigrants must have at least ten dollars when landing here. They discriminate against the poor man regardless of the fact that those self same men are those whose brothers have moistened with their heart's blood the sands of so many battlefields. Must that law remain after the war? If a man lands in Canada with the necessary ten, he is allowed to remain but if, perchance he has consumed all his earnings in making the voyage, he is not permitted to stay. Perhaps that man may have a loving family, an affectionate wife or an aged mother in that distant eastern continent for whom he is ever solicitous. He sees in Canada opportunities for freeing them from European misery, but if he has not got that necessary ten, he must return to that misery from whence he came. The Salvation Army has done much toward immigration, and why should not we, the Women's Institute, take up this work along somewhat similar lines, and secure for our homes servants and laborers of good character from abroad, and in so doing, not only help the needy in Europe, but ourselves as well.

Then again, the immigration problem if correctly handled will solve the labor problem, and this in turn, will tend towards the propagation of Canadian industries. For in this fair Canada of ours, our national resources are many but the trouble is we have not the labor to handle it. Our mines lie dormant. Our nickel plants are taken over by foreign concerns and the money that should be ours to handle goes elsewhere for lack of laborers. This war has taught us to be self-reliant and why should we not retain that self-reliance in industry instead of relying on foreign trade.

Now then, again and lastly, as this is already growing lengthy, this war has made men of our males and women of our females, and as women we are not merely petticoated housekeepers but beings with ideas and knowledge of work in its various forms and since we were capable of taking over the work in the absence of our men, don't you think we might have a little say in the administration of laws pertaining to that same work when this war is over? Have not the Women's Institutes, the Daughters of the Empire and other women's organizations done much to make woman's name honored by our men during this war? Where do you think they would be at if the women had stayed strictly out of this war? Where, I say? Yet are they who have sacrificed, sons, brothers, fathers time, work and money to save our country's honor—are we to have nothing to say after this war?

Let me tell you that without the franchise we can't do much; but with it—oh! what would we not do to meet the problems that shall confront us after the war. Just think—the Institutes of Ontario are composed of about thirty thousand intelligent women. Now, tell me what could we not do if we co-operated and had the franchise after the war? I think our vote would count some in the making of our laws, don't you?

SOLDIERS' POSTAL RATES

To Great Britain—12c per pound or fraction thereof; limit of weight, 11 pounds. To France and Flanders—For parcels weighing up to three pounds, 24c; from 3 to 7 pounds, 32c; limit of weight 7 pounds. Mediterranean and Salonika—1 pound, 32c; 2 pounds, 40c; 3 pounds, 48c; 4 pounds, 74c; 5 pounds, 82c; 6 pounds, 90c; 7 pounds, 98c. All parcels must be securely wrapped in stout paper, or preferably in cotton over paper, and tied firmly with the address in full written in two or more places. All parcels must be addressed in care of the Army Post Office, London, England. A Customs declaration stating the contents with the value of the same must be attached to each parcel. Soldiers will not be required to pay duty. Special care must be taken in packing liquids, such as honey and syrups. Parcels not sufficiently packed or tied up in flimsy parcels will not be accepted by the Postal authorities. The soldiers appreciate gifts of cake, tobacco, gum, oxo and soup cubes, candy, chocolates, sardines, chicken, pork and beans, etc., in tins, raisins, socks, handkerchiefs, mitts and gloves, wristlets and money. Post office orders may be sent to any soldier, no matter where located, provided the sender has his number and Battalion. Razors, indelible pencils, fountain pens, writing papers magazines and papers, and especially letters are also very acceptable.

Col. Hugh Clark M. P. will have a salary of $5000 besides his indemnity as Parliamentary Secretary for External Affairs.

Mr. Charles Thompson of town has a fine little cow who is doing her bit in these strenuous times. She recently gave birth to triplets. She has had three pairs of twins and one single calf in the six years since Mr. Thompson got her. Can any one show a better record than this?—Teeswater News.

POETS' CORNER

BOYS OF BRUCE

(Mrs. L. Moore, Teeswater)

What do you stand for Boys of Bruce?
As you mass a thousand strong,
As you tread our streets with your masterful stride
Or so cheerily swing along.

What do you stand for Boys of Bruce?
Your sons of our noble sires,
You sons of the mothers whose love and zeal
Keep glowing the old home fires.

Stand you for Liberty, Boys of Bruce?
For Honor and Truth and Right?
For a land unsullied by tyrant's tread
Untrammelled by tyrant's might?

Yes we are proud of you Boys of Bruce!
Who are pledged for our Empire's sake,
Proud as your names grace our Honor Roll,
But—your record is still to make.

May you prove true to our faith in you,
To the home light's steady gleam.
True to yourselves, to your king, to your God
Though the cost be the Price Supreme.

WALKERTON POET WROTE THIS FOR TORONTO STAR

A critic once unstintingly
Gave vent to praises deep:
The way he raved about that play
Would almost make one weep.

It's future was assured, he said:
A big success 'twould be.
He urged the public all to go,
This masterplay to see.

And though the other critics said
The show was "on the bum,"
He calmly said he'd back it up
No matter what might come.

No doubt you wonder why he did
Not put it on the shelf.
I'll tell you folks the reason why:
He wrote the play himself.

Walkerton DEEJAY KAY.

News About Town

Chesley contributed $1200 to the British Red Cross.

Midland town council voted $2,100 for British Red Cross.

Dr. Houston of Paisley is taking a postgraduate course at New York.

The new C. P. R. time card has no changes in Walkerton train-time.

Rev. Father Sullivan visited old friends in North Brant last week.

Mrs. Frank Phelan, near Dundalk, gave birth to triplets, two boys and a girl.

The heavy storms on Lake Huron last week did considerable damage at Kincardine Beach.

Owen Sound reduced all electric rates 10 per cent this week after six months under hydro.

Master Nelson Lay has been walking with crutches the past week as the result of a sprained ankle.

Fireman Blair of the Durham-Palmerston train was shot in the leg by astray bullet from the gun of a sportsman.

Harold Jarvis, the veteran soloist, was married recently to a Detroit young lady, who was a former vocal pupil.

Mr. James McKerracher of the Canadian Bank of Commerce, Montreal, called on friends in town last week.

Rev. John McNeill left Toronto last week to go to Flanders for evangelistic work among the soldiers on behalf of the Y. M. C. A.

Mr. and Mrs. John Kupperschmidt of Deemerton and Mrs. Frank Rich of Formosa visited their parents, Mrs. Paul Hofferth of Carlsruhe.

By a strange coincidence Mrs. James Salter whose death occurred at Palmerston, was born, married, and died on the 22nd. day of October.

Liesemer and Kalbfleisch have sold new Ford cars to George Bros. and Mr. N. C. McKay of the Agriculture Dept. Both parties are old Ford owners.

The Vancouver Province says that when a bachelor over 40 marries, he should wed a widow. Good advice, perhaps, but it's a wee bit hard on the widows.

Mr. and Mrs. Wilbur Ritchie spent the week-end With friends at Wingham. While away they motored with friends to Brussels, Seaforth and Clinton.

Mr. Gordon Smith, an old Walkerton boy, who has been Grand Trunk Agent at Hespeler the past year, has been made a district freight agent of the Toronto district. He will make his home at Toronto.

If you can't get back to the old home as frequently or as regularly as you'd like, a new photograph will come nearest to taking your place—will bring cheer to home-keeping hearts. Make the appointment today. Fraser Studio.

Prohibition had made a vast difference in Toronto already, according to Chief of Police Grasett. The number of arrests from drunkenness in the past month was 214, as compared with 1,050 for the same month last year.

Huron county council held a special meeting and voted a half a mill to the British Red Cross, thereby realizing $21,250.

The teachers of Prescott and Russell counties enjoyed an address by Dr. Thomas O'Hagan, the Canadian Author, on "The Study and Interpretation of Literature."

Mr. and Mrs. John Leifso of North Brant and son Art are expected home this week from Readlyn, Sask. Mr. Leifso has been working on a farm which he bought for one of his sons the past year.

John Burns a young farmer who lives seven and a half miles out of Durham was fined two hundred dollars and costs for keeping whiskey on his premises. This conviction was under the New Temperance Act.

A deligation of twenty prominent tories of this vicinity waited upon Premier Hearst and Hon. I. B. Lucas at Toronto last Thursday to urge the appointment of Dr. Clapp of Mildmay to the position of Clerk of the County Court.

Friday's Casualty list contained the names of no less than six Kincardine men:—Corp. Barton Stewart, Pte J.T. Dingsdale and Pte John Hughes, killed in action; Lieut. J. H. McLean, Ptes E. J. Anderson and Robt. Larose wounded.

Drivers complain of the delay in getting the culvert near Norman Brocklebank's filled, which is holding up traffic on the east Durham Road. Owing to the heavy mud in the adjoining field, autoists are driving five miles around the block over roads that are anything but good at this time of year.

Toronto Globe:—The Asquith family has not shirked its duty in this conflict. Mr. Asquith is bearing the weight and responsibility of an unparalleled war. His eldest son, Raymond Asquith, K. C., fell leading his men into action; one has been badly wounded; one has been invalided home, and one is still at the front.

A Brant young man who calls on a young Lady on Sunday nights, has a habit of staying late. The young lady always turns to that grand old air "Oh, Why Do You Wait, Dear Brother, Oh why Do You Tarry So Long?" while the said young man persists in warbling that famous old ballad "I'll Stand By You 'Till the Morning."

The nut crop like most everything this season has proven a failure. Butternut, walnut and beech trees have nothing whatever in the shape of nuts this year. The old adage has it that where there are no nuts for squirrels it is a sure sign of an open winter. We would however advise the good house provider not to neglect the coal bin.

Mr. William Adamson left on Saturday for Pomona California, via Canadian Northern. He will visit his daughter, Mrs. John McNaughton at Lashburn, Sask. and his sister, Mrs. Wallace at Seattle, Wash. en route. He expects to join his daughter at Pomona about December 1st. Mr. Adamson still has a hankering for Canada and states that if he could get railway connection near his old tile yards next year, he would return and open a big tile yard here.

Mrs. Fred Leifso of North Brant arrived home last week from St. John Kan., where she was called some weeks ago owing to the death of her mother. She was accompanied on the return journey by her father, Mr. L. A. Eddingsfield, who will spend a short time here. Mr. Eddingsfield, who is a farmer in a large way says that the corn crop in his section was very light this year. He sold seven thousand bushels of wheat off his farm. Mr. Eddingsfield is of the opinion that Kansas which is ordinarily Republican will go to Wilson this time.

It is announced that a big round-up of wild animals is about to take place on Manitoulin Island For some time bears and wolves have been committing depredations on farmer's sheepfolds, also killing young cattle, and as the marauders seem to be increasing rather than diminishing in numbers, it is felt the time is ripe for heroic action. For the round-up about three hundred men will be available, but if the residents of the island desire it, they could probably secure hunters from over all Ontario, everyone paying his own expenses. Participation in such an undertaking could not but be the event of a lifetime, while the fur and other trophies of the chase to be secured would be worth much money.

At the close of the war conditions will make another change. They will never be as previous to July 1914. Changes that will surely affect the farming industry will take place. You want to be prepared for this change. The Weekly Sun will do its part for you by keeping you posted on the different changes that are likely and how they will affect the farmers. It remains for you to help a paper that has served its subscribers and the Ontario farmer generally so faithfully during the past quarter of a century. The subscription price of The Sun remains the same as formerly and is cheap at the price. We will be pleased to accept subscriptions for The Sun at this office.

Fall Assizes.

The Fall Assizes opens here next Tuesday before Sir John Boyd There are five criminal cases before the court one of which is a charge of rape against a man who pretended to be a doctor, two are charges of forgery one is a charge of obtaining money by false pretences and one of stealing hydro-electric wire.

The Local Merchants

The amount of business that the mail order houses get from any community depends proportionately upon the aggressiveness of the local merchants. In these times it is a good investment for the home merchant to follow the example of the mail order house and advertise aggressively.

+ + +

Can't Beat The Indians

Rev. Father Cadot of Cape Croker sent $30 to the Provincial Secretary of the British Red Cross last week, being the amount collected in his church the previous Sunday. Father Cadot stated:—"This is an Indian Reserve and you will be pleased to hear that absolutely all the married men who are physically fit for military service have enlisted in the 160th Bruce Battalion, and have already gone to England last week. Fifty-eight men have enlisted from here from a population of less than 400 souls —all Indians."

+ + +

Suit Against Counties

A few weeks ago an accident occurred in Culross by a tree falling across the road, and damaging an auto and injuring its occupants. The owner of the car, who resides in Normanby is bringing an action against the Counties of Bruce and Huron on the ground that the tree stood on the road allowance. The accident took place on the Turnberry and Culross townline, and the action is brought against both Counties, the plaintiffs claiming that this road was assumed by the two counties named. A committee composed of Reeves Filsinger of Carrick, Phelan of Greenock and Ferguson of Teeswater, viewed the scene of the accident yesterday, and will bring in their report to the County Council.—Mildmay Gazette.

+ + +

With The Grand Fleet

A cablegram to Dr. and Mrs. Morrison of Sudbury, formerly of Pinkerton and Paisley, received Tuesday from their son, Midshipman Raleigh Morrison, Portsmouth, reads as follows:—"Attached to Grand Fleet in North Sea." After his last visit to his home the young naval officer reported at Halifax, where he joined the flagship, Leviathan, under Commodore Marcus Hill, and sailed for Glasgow. They were sent to Portsmouth where they were given a course in naval gunnery and in referring to this work he mentions in a letter, dated Sept. 10, that all the Canadians passed the tests and now they go to the Grand Fleet and are privileged to become part of the most powerful armada the world has ever seen. No doubt the boys will acquit themselves with the greatest credit to themselves and honour to their people.—Paisley Advocate.

+ + +

Printers' Errors

Most editors try to eliminate errors as far as possible, but none succeed fully in doing so. One paper estimates that in a sentence of fourteen letters it is possible to make over three million errors by transposition of the letters. What infinite possibilities therefore, in a whole paper. A New York publisher once undertook to print a book absolutely free from errors. The proofs were read by eight or ten expert readers and every line and word was subjected to close and repeated scrutiny. Yet when the book finally appeared a glaring error was found on the first page. One of school exchanges tried to get a perfect issue, typographically. But the California News points out that the editor did not even succeed in getting his own name right. Perhaps the only book ever issued free from errors is some editions of the Oxford Bible. When the first of these was issued the publishers offered a guinea for every error discovered by anyone and this plan soon resulted in the detection and elimination of all mistakes.

+ + +

War and the School

A Walkerton young lady, Miss May Cyderman B. A. daughter of Mr. and Mrs. C. W. Cyderman has been receiving great praise for an address given at the South Grey Teachers convention. The Durham Chronicle says.—Perhaps the item of greatest interest at the convention was the address of Miss May Cyderman, B. A. of the Durham high school staff on "The War and the School." Reviewing briefly the causes of the war, the conditions in Germany which popularized war, as such, with the German people, and the effects of the titanic struggle upon the world at large and especially upon our own country, Miss Cryderman, in a masterly and comprehensive summary, outlined the probable adjustments that would have to be made in the educational systems of the nations comprising the British Empire to meet the new world conditions resulting from the war. It was clear that in many spheres of human action, the old order of things had passed away, never to return. The point of view of statesmen and educationists concerning the future had already undergone a change and would change still more as the war went on. A new and deeper patriotism, which will hate graft and dishonesty and political chicane, must be inculcated and the schools must be the channel through which will flow this quickened love of home and country. Christianity must take its rightful place as the foundation of statecraft and everything national if we are to escape the bloodlust that has changed peaceful Germany into an armed camp. These and many other points were emphasized with relentless logic, yet in such sincere and artless simplicity that the audience hung upon the fair speaker's words. It was noted that even the knitters forgot their knitting.

Culross Tp. Council

Town Hall, Teeswater Oct 23rd.

Council met on above date. Members all present. The minutes of the last meeting were read and adopted.

Case—Donaldson—That we give a grant of fifty dollars to gravel the road opposite lots 10 and 11 Con. 14 and 15 and that Jno. Armstrong expend the same.—Carried.

Donaldson—McPherson—That the Court of Revision re the Thacker Drain be now opened and that the Reeve be Chairman of the Court.—Carried.

Armstrong—McPherson—That this Court do now adjourn to meet at 2 o'clock.

Armstrong—McPherson—That we appoint the Reeve Donaldson and Case to investigate the claims for damages re accident to auto on Culross and Turnbury Boundary and consult our Solicitor and act accordingly.—Carried.

McPherson—Donaldson—That we give a grant of fifty dollars for the Moscow road, Con. 12, opposite lots 18 and 19 and that Wm. Case have the same expended.—Carried.

Case—Armstrong—That this Board give a grant of five hundred dollars to the British Red Cross Society the same to be paid not later than the 15th of Dec. 1916.

Kuntz—McPherson in Amendment—That this Council grant the sum of one thousand dollars to the British Red Cross Society to be paid as soon as convenient. For the Amendment Kuntz and McPherson. For the Motion, Case, Armstrong and Donaldson. Motion.—Carried.

Donaldson—Case—That this Court of Revision on the Thacker Drain be adjourned until Monday, Nov. 20th at 2 o'clock p. m.—Carried.

Donaldson— Armstrong— That a Committee composed of the Reeve, Case and McPherson, be appointed to award the contract on the Rennell Drain.—Carried.

McPherson—Armstrong—That the Clerk write Middlebro and Spereman re Fischer and Tone, claim for damages to auto. That as soon as we can consult our Solicitor we will inform them of our action in the matter.—Carried.

Case—Donaldson—That we grant an amount to the south end of the gravel road sufficient to gravel the portion that has been graded, and that the mover and Thos. McPherson expend the same.—Carried.

Armstrong—Case—That the Collector's Bond be handed to the Treasurer for safe keeping.—Carried.

FINANCE REPORT

Geo. Weddell, taking stones off road	$ 1 25
Louis Becker, abutments for bridge	201 50
Dunc. Grant, culvert on side-road 20	18 00
A. Haldenby, sheep killed by dogs	35 00
Wm. Baptist, lamb killed by dogs	12 00
Jos. Voisin, inspecting sheep killed	1 50
Jas. Whiteman 30 yds gravel and road	4 60
Ed. Massel, cement tile culvert Con. 12	4 00
Jos. Hillick, operating road drag	3 50
Mich. Fisher 74 yds. gravel and road	8 40
Phil Keppler 5 days grading 2 teams	27 75
Phil. Keffer, working Grader on boundary	4 75
E. G. Kuntz, selecting Jurors	4 00
Jno. Rettinger, 10 yds. gravel and road	2 00
Jno. Rettinger, 50 yds. gravel	5 00
W. H. Wall, 70 yds gravel	7 90
F. Keiffer, putting in tile	1 00
Wm. Bannerman, rep. bridge Con. 11	6 00
Wm. Case, 120 lbs flour for Indigent	0 90
Thos. Elliot, 71 yds gravel and road	8 10
Jas. Harkness, rep. covering on bridge	15 00
Weiss Bros. beef for Indigent	1 40
And. Schnurr, 91 yds gravel ½ share	4 55
Molsons Bank, for souvenirs for soldiers	150 90
R. Donaldson, butter and tea for Indigent	2 80
Agricultural Society, grant	25 00
Robt. Patterson, rep. bridge	2 00
Rod. McDonald, rep. bridge	27 00
G. Benninger, railing for sidewalk	95 57

McPherson—Donaldson—That the Finance report as just read be adopted and orders issued for payment of accounts. That we do now adjourn to meet again on Nov. 20th. or at the call of the Reeve.—Carried.

CHAS. BUTTON
Clerk.

These are hard times. We throw away the ashes and buy soap. We raise dogs and buy hogs. We grow weeds and buy vegetables. We catch fish with a $4 rod. And at last we send out our boys with a $40 gun and a $16 dog to hunt a 10 cent game.

The Town You Live in

Stand up for it.
Think well of it.
Speak in its favour.
Patronize its merchants.
Encourage its industries
Cheer every live enterprise.
Hurrah for the enthusiastic.
See all that is beautiful in it.
Chant praises to the good it possesses.

Sing of its wonders, you'll find it has some:

Love it, stick to it—the town you live in.

Welcome improvements, stagnation's a sin.

No warping or cracking is possible with our secret process semi-steel fire-box linings. Being in five pieces, they are easily removed or replaced without bolts or cement.

McClary's Pandora Range

Before you invest in a new range let me show you the Pandora's sensible ideas for saving time and labor.

CURRENT COMMENT

Germany's peace terms as stated in the Reichstag mean that the Allies will fight to a finish.

The U-53 boat did not prevent the sailing yesterday of about a dozen vessels from New York.

When Admiral Jellicoe calls to Canadians to come over and help, there should be no holding back.

King Constantine has lost his navy and Venezelos is stealing his army. He can blame Mrs. Constantine for his troubles.

Perhaps Henry Ford meant this coming Christmas when he said he would have the soldiers out of the trenches by that time.

The U. S. navy is having a busy time looking after the country's neutrality. U 53 is more of a menace to the States than it is to Britain.

British women training for farm work like their male attire so well that they refuse to discard it when off duty, at the behest of a County Women's Field Labor Committee. They have to wear the "breeks" when at work, and they claim the right to wear them when off duty.

The last convoy of troopships which arrived at English ports last week carried two French-Canadian battalions on the way to join those which are doing so well on the fighting line. There are other battalions being made ready from the same human material. The Montreal Gazette thinks that Ontario newspapers should pay more attention to these facts than to the disturbances caused by the Laval students.

In New York City, for the week ending Sept. 30, 140 new cases of poliomyelitis were reported, a decrease of 34 as compared with the previous week. The total number of cases in the city to the same date was 9,029, and of deaths 2,266. So far as any serious danger to children is concerned, the health officials believe that the epidemic is now a thing of the past. Yet they know as little about it as they did when the epidemic started.

The American people have apparently not yet sized up the situation that confronts them just outside the three-mile limit of their coast line. They are too busy making money and following the ball games to give much attention to the depredations of the German submarines. But little Spain and Holland are not so indifferent, nor are their Governments so ready to give these marauders asylum as is the United States. Spain has debarred them from her harbors and Holland has both German and British subs interned.

SOME WAR NOTES.

As a drowning man grasps at a straw, King Constantine seizes the perilous position Roumania finds herself in at the present moment as an excuse for having "kept Greece out of the war." He predicts that in fifteen days Roumania will exist no more. Whatever may be the immediate fate of that country, her ultimate safety is assured, unless the whole combination of Allies go down to defeat. German cunning as well as strategy has been well exemplified in this attack on Roumania. When Falkenhayn was removed from chief command of the German army, the Kaiser let it be known that he was in disgrace, no doubt to hide the part he was destined to play in Transylvania.

However, there is evidence that succor will be sent to Roumania. Russia is understood to be hastening forces from Galicia to her assistance. Gen. Sarrail is forcing the pace with his troops, and Italy is doing the same. It is to be hoped that the Allies will thus be able to save King Frederick's country from disaster.

The Germans cannot afford to release men from the Somme front. The British is now within striking distance of Bapaume. Verdun is now safe from German attack. The French dominate the situation. It may be possible after the Somme offensive has proceeded some farther for the Allies to take the offensive at Verdun and drive the enemy out of the country entirely.

Three outstanding figures in Britain at the present time are Premier Asquith, Lloyd George and Lord Robert Cecil, Minister of War Trade. Lord Cecil has a clear head, and a clear way of expressing himself. He has no trouble in exposing the sophistries of Bethmann Hollweg or of putting up an argument against the enemy or a grumbling neutral which is unanswerable. His latest utterances refer to the submarine depredations on the American coast and their effect on the war and American neutrality. He puts the case very aptly when he says: "The whole of the German foreign policy has proceeded on the same principle. Kiao Chau, Agadir, the mailed fist and shining armor are examples of the international procedure. In private life it is called blackmail. It may be well to say at once in answer to these German ideas of international diplomacy that the sinking of ships off Nantucket is precisely calculated to prove at once the danger of any concessions by the Allies, and the injustice of the many American criticisms levelled against our naval and military measures."

We are all apt to sneer at luck, especially if it comes to other people.

HER HUMBLE LOVER

"Yes, a letter of introduction," said the rector. "Lord Delamere—whom I regret to say I have not the pleasure of knowing, though his father was my patron, and presented me with this living—Lord Delamere writes, in really—ahem—the kindest way, asking me to assist his friend, Mr. Hector Warren, in—er—ahem—the writing is a little indistinct—"

Hector Warren smiled.

"Delamere doesn't write the plainest of hands," he said, quietly. "As I know the contents of the letter, perhaps you will permit me to read it for you."

"Thank you, thank you! very kind!" assented the rector, with an air of relief, and he handed the letter, and put his head on one side, with an air of respectful attention. The rector dearly loved a lord.

"Dear Mr. Podswell,—The bearer of this is a friend of mine, who is anxious to make acquaintance with some of the old books in the library: please give him the key, which I believe my father left in your care. I don't know whether the rats have left any of the old books, but at any rate let Mr. Hector Warren have perfect liberty. I may add that he bears a letter to the steward, authorizing my friend to do pretty much as he likes with the Grange—that is, if the rats and the winds have not eaten it or blown it away.

"I remain, yours truly,

"Delamere."

Quietly, almost mechanically, Hector Warren read the strange epistle. The rector's mouth opened wider and wider; Mrs. Podswell stared with all her eyes; Signa herself could scarcely keep her glance of curious surprise fixed on the book beside her.

"Bless my soul," exclaimed the rector, vaguely, "what an—ahem—extraordinary letter!"

Hector Warren folded it, and handed it back with a smile.

"I am afraid Lord Delamere has earned the character of being somewhat eccentric," he said, quietly. "You think the letter gives me rather too wide a power? Do not be alarmed, I shall not take advantage of such carte blanche. I am merely desirous of amusing myself in the old library, if there is any of it left, as Delamere says, and that only for a few days, perhaps for a few hours only."

The rector breathed a sigh of relief. As a friend of the great Lord Delamere's, Hector Warren was sure of a courteous welcome at the hands of the rector; but the rector could not quite make him out. He was a gentleman certainly, but why did he wear such well-worn clothes and such a seedy hat, unless he were poor? and the rector, who had an instinctive dislike for poverty, felt unusually glad that Lord Delamere's mysterious friend might only stay a few days.

"Some chance acquaintance Lord Delamere has picked up on his travels," thought the rector, "and whom he has given permission to examine the library. I'd better be civil to him, I suppose."

So, having come to this conclusion, the worthy clergyman said, with the usual smile:

"Ahem, we shall be delighted to be of any service to you, Mr.—Mr. Warren; his lordship; his lordship knew he could count upon us. Let me introduce you to my wife in proper form."

Hector Warren rose and bowed in response to the half-civil, half-reserved nod Mrs. Podswell bestowed on him. Then he looked at Signa, and the rector, with a little cough, added:

"And—ahem!—my niece, Miss Grenville."

Hector Warren bowed again, and Signa bent her head in acknowledgment, scarcely raising her eyes from her work. She felt guilty of deception and concealment in thus permitting it to be thought that they had met for the first time, but she so dreaded the flow of commonplace questions which the rector and his wife would shower upon her if she made any explanation, that she remained silent and did not say, "I have met this gentleman before."

He waited to see if she would speak, then he said in the most ordinary of tones:

"Miss Grenville and I met by chance on the beach this morning."

"You didn't mention it, Signa," said Mrs. Podswell, suspiciously.

Hector Warren gave a faint shrug with his shoulders and smiled.

"I imagine Miss Grenville would scarcely think it worth while," he said, coolly, and Signa felt grateful to him for saving her the necessity of a reply.

"And now, Mr. Warren," said the rector, "I trust you will become our guest during your stay in the neighborhood; we are homely people, but——"

But Mr. Warren shook his head reluctantly, and made haste to decline, much to the rector's relief.

"Thank you very much, my dear sir, but I have already taken up my quarters at the little cottage at the end of the lane, Mrs. Thompson's, and I could not think of troubling you. Besides, my stay is uncertain, and I am, I regret to say, such an irregular member of society in the matter of meals and appointments generally, that I should be a nuisance in a well-ordered household."

The rector murmured a faint, half-hearted expostulation, but Mr. Hector Warren remained firm.

"At least, you will let me offer you some luncheon? My dear," to Mrs. Podswell, "there is some cold salmon."

But Hector Warren shook his head again.

"I rarely eat in the middle of the day. A crust of bread and a glass of water is generally my lunch, and I have already had that."

The rector stared, and his mouth dropped with mild horror, and Hector Warren smiled, adding by way of explanation:

"You see, I have been travelling for some years—have been, in fact, a wanderer on the face of the earth, and have found it wise to limit my requirements. In some countries a crust of bread, a slice of bacon, are the best fare one may expect."

"Just so, just so," murmured the rector, who would have fretted to death without at least three good meals per day. "Ahem! Very wise! Then we may hope to see you to dinner?"

Hector Warren hesitated, and the rector waved his hand.

"At any rate, we are—ahem!—very pleased to see you. We dine at six, and shall make no ceremony."

Hector Warren bowed.

"That is true hospitality," he said, gravely.

The rector glanced at the letter and coughed.

"When did you see his lordship last? This, I see, is dated Genoa. Is he there now?"

"I should think so," was the reply. "Delamere is always on the wing. He may be at the other end of the world by this time. Indeed, he was starting for Egypt a few months ago."

"I hope his lordship was in good health," said the rector.

"Excellent," replied Hector Warren. "He is always well."

The rector shuffled his feet.

"It is a pity that his lordship doesn't favor us with a visit. He would find Northwell well worth a few weeks' stay in the course of the year. You will be surprised to hear that I have never seen him. In fact, I don't think he has even been here."

"I believe not," assented Lord Delamere's friend. "Yes, it is a pity. The Grange—already I have had a glimpse of it—is a fine place."

"Yes, too fine to be so neglected," said the rector, complainingly.

"Some one ought to make it his duty to inform Lord Delamere of the condition of his property, and recall him to a sense of his responsibility," said Mrs. Podswell, acidly.

Hector Warren inclined his head toward the sofa with an air of respectful deference.

"Indeed, yes. That is quite true. I am quite sure, from what I know of Delamere, that if any such reminder had reached him, he would have given it his attention."

"Then it's a pity I don't write," said the rector. "But, really, one dislikes interfering in other's people's business; and besides"—naively—"I don't know his address. No one seems to know. The steward even does not."

"Delamere is very erratic," remarked Hector Warren. "I have heard him say that he never reads nor writes a letter unless he is compelled; and I believe that he does not have them forwarded from place to place."

"A most extraordinary young man," said the rector, frowning, with strong disapproval.

Lord Delamere's friend assented with an inclination of the head.

There was silence for a moment, then the rector shuffled to the door.

"I will get you the key," he said. "I don't feel certain that you will be able to get in with it. It is months since the door was unlocked. I had a fire there in the winter; it was a liberty, I am afraid, but I ventured on it. I hope his lordship will not deem me too presumptuous."

"Delamere will be much obliged, I am sure," said Hector Warren.

The rector left the room, and there was silence again. Signa, bending over her work, felt rather than saw the dark eyes turn her way, but he did not address her. Mrs. Podswell made a few inane and commonplace remarks about the weather, and he agreed with her that England could boast of the worst climate in the world, and by that time the rector returned, dangling a bunch of keys.

"Here they are," he said, in his feebly pompous way. "I deliver them into your charge, Mr.—Mr. Warren, with much pleasure. By the way, I don't know whether you will need a guide," and he smiled.

CHAPTER V.

Hector Warren rose, and took the keys with a smile.

"I don't know," he said.

"Perhaps I'd better come," murmured the rector, reluctantly; the day was warm, and it was his time for "reading" in his study—that is, snoozing comfortably in the easy chair.

Hector Warren made haste to assure him that it was not necessary.

"I can find my way," he said, "and if the keys will not prove a sufficient 'open sesame,' I dare say one of the windows will open. Good afternoon."

"Good-afternoon," said the rector, with a sigh of relief. "You'll be smothered in dust!" he added, with a faint touch of enjoyment. It is always pleasant to anticipate the troubles and annoyances awaiting our fellow-creatures, though we shrink from our own.

"I should advise Mr. Warren to take a duster with him," said the voice from the sofa. "Signa, ring the bell, and tell Mary to bring one—that is, if Mr. Warren has no objection to carrying it. He can put it in his pocket."

Signa could scarcely repress a smile as she rose to obey, but Hector Warren bowed gravely and gratefully.

"Thank you very much," he said; "that is very thoughtful and considerate of you." And he took the duster and put it in his pocket. "Good-afternoon."

And, with a pleasant bow, he took his departure.

The door had scarcely closed before the rector gave vent to his bewilderment.

"A most extraordinary business!" he exclaimed, using his favorite ejaculation—"really extraordinary! What do you think of it, my dear?"

And he took up the letter and scanned it curiously.

"I suppose it's all right," responded Mrs. Podswell, querulously. "There's no mistake—or deception? This is a very wicked, designing world, Joseph."

"There's no deception, my dear," said the rector, in the tone of a conjuror addressing his audience. "Here's the letter, the Delamere coat of arms and all correct."

"It may be a forgery," remarked Mrs. Podswell, grimly.

"It—may," admitted the rector. "But ahem!—I can't see how it would be anybody's while to commit such a—ahem!—crime."

"Robbery!" answered Mrs. Podswell, in an awful voice. "The letter may be a forgery to obtain possession of the keys, Joseph."

"Ahem!—I think not, my dear," said the rector, "considering that any one could get into the place, as Mr. Warren remarked, by opening one of the windows."

Signa smiled; it was about the most sensible remark she had heard her uncle make since she had entered the house; and even that was Mr. Warren's, and therefore second-hand.

"Besides, if we may judge from appearances, Mr.—er—Warren doesn't strike me as a burglar, my dear."

"Appearances are deceitful," said Mrs. Podswell solemnly. "I must say that there is something about the young man that does not prepossess me in his favor."

"A gentleman, I think, my dear—evidently a gentleman. I wish we knew something more about him. It would be rather awkward—if he should turn out to be a real friend of Lord Delamere's. We were quite right to be cautious, but I think, my dear Amelia, we were"—a deprecatory cough—"rather cool."

Mrs. Podswell sniffed.

"Who is to know who he is?" she replied. "He doesn't look anybody of any consequence."

"Appearances are deceptive," said the rector, timidly retorting on his beloved Amelia. "He may be Lord Delamere's most intimate friend; now I think the matter over, I feel convinced that he is! and if he should be, we—we—ahem!—we ought to be civil to him, my dear. Lord Delamere may return any day or hour, and if he should, I shouldn't like to be anything but—ahem—a friend and neighbor; besides"—here the cough is very pronounced—"there are the alterations to the church, and the paddock, I want to get. Really I think we ought to treat this young gentleman in a friendly way if we trust him at all."

Mrs. Podswell sniffed again, but rather more faintly.

The rector shuffled his feet about uneasily, for a few moments.

"Don't you think we'd better ask him to dinner to-morrow? There will be some people for him to meet. Sir Frederic would—ahem—like it; he likes strange faces, I think, my dear, you had better make room for him, if you can."

Mrs. Podswell coughed warningly and glanced at Signa, and the rector colored and was silent for a moment, then he looked across at her uneasily.

Aunt Podswell moaned faintly, and sighed apologetically.

"I forgot to mention to Signa that we expected a few friends to dinner to-morrow," she said.

Signa looked up and turned her clear gray eyes on the pale shifty ones that flinched from the calm, steady regard.

"A few friends in a quiet way. We should be very glad if you could have dined with us, Signa, but there will not be room. I am sure you will not mind; your good sense will tell you that little sacrifices must sometimes be made."

"Pray do not apologize," said Signa, and her sweet, low patrician voice contrasted awkwardly with the thin, mean one. "I do not mind in the slightest. Indeed, I would rather"—and her voice dropped—"remain in my own room."

"Oh, but you must join us in the drawing-room, my dear," said the rector, with the air of a man conferring a tremendous favor and benefit. "You must, indeed! Come, we will take no refusal. As you say, my dear, perhaps under the circumstances"—glancing at her black dress—"your absence from the dinner-table would be only proper and—ahem—consistent, but you can join us in the drawing room with perfect propriety."

"Thanks," said Signa, quietly, and she went on with her task.

There was silence for a moment. The worthy couple felt rather awkward and ashamed of themselves, and felt sure that Signa saw through the thin excuse.

"Well, my dear," said the Reverend Joseph, at last. "Will you ask him or not?"

"What will Lady Rookwell say? She will be sure to ask all sorts of questions as to who he is!"

"Introduce him as Lord Delamere's friend," said the rector; "that ought to satisfy her."

"If it should not, she will not fail to badger him until she is satisfied," said Mrs. Podswell, with grim satisfaction.

"At any rate it is the safest course," remarked the Reverend Joseph, rubbing his chin. "He is a gentleman, and he may be Lord Delamere's intimate friend, and—yes, I think you had better ask him, my dear. Write him a note, saying—saying that you forgot"—he caught a smile on Signa's face and stopped, stammering—"better send a message, perhaps," he said; "it will seem less formal. Say that—that"—he stopped again and shuffled, then a bright idea struck him. "Perhaps Signa would not mind walking up to the Grange—he won't be gone yet—and explaining. I am sure she will know how. She can take Archie with her, he will like the run—eh, my dear?"

"My dear" wailed an assent.

"Put on your bonnet, Signa. You will know what to say," he said, in a tone of resignation.

Signa colored faintly, and sat for a moment silent and hesitating, then she rose; after all, what did it matter? Yes, she would go.

"Tell him in the excitement and confusion of the moment, we forgot our little party," said Mrs. Podswell.

Signa smiled with good-natured irony.

"It doesn't matter what I tell him in the way of excuse," she said. "I don't think he would believe it. But it doesn't matter."

She found Archie in the schoolroom brooding over one of his fairy books, which he threw down with alacrity when informed of the object of their walk, and they started.

There was no occasion to creep through the hedge this time, for Hector Warren's strong hand had opened the tall iron gates, and they were still ajar.

With a vague sense of reluctance Signa approached the house. It was not a pleasant mission to tell a man that after due consideration he had been considered respectable enough to be invited to dinner. She wished that she had refused, that she had suggested that a servant should be sent; and yet in the innermost recesses of her heart was a dim feeling of pleasure at the near prospect of seeing the grave, handsome face, and hearing the deep, musical voice, which still seemed to ring in her ears.

(To be continued.)

EXCLUSIVE.

(New York Times)

A new story is being told about a certain London club famed internationally for both its exclusiveness and its dullness.

In one of the rooms a rule of silence is stringently enforced. The other day occupants of the room were startled to see a member press a bell button with evident annoyance, and when the waiter appeared to hear him exclaim, pointing to a neighbor in a chair:

"Waiter, remove that member."

The man in the chair had been dead three days.

Wigwag—I feel fine. I was up with the lark this morning. Guzzler—I wonder if it was the same lark I kept up all night?

HOW BLOTTERS ABSORB INK.

Being a Simple Explanation of Capillary Attraction.

Every student of physics knows that water will run up a narrow tube by capillary attraction. Anything immersed in water has a similar attraction for the water—that is, the object becomes wet by the water that clings to it. The amount is limited by the weight of the liquid itself. Place your hand in water and your hand when withdrawn is wet. The limited attraction between the hand and the water is gauged by the weight of the water that clings to the hand.

Imagine several hands placed close together in water, but not touching one another. If this composite hand were formed of ten single hands it would attract ten times as much water as the one hand would attract and hold on its surface. So a wisp of hundred spears of dried grass, placed in water will remove a hundred times as much of the fluid as would cling to one spear. Bushes in a marsh will remove a certain amount of water, which will by capillary attraction cling to their submerged parts.

Under the microscope fibrous blotting paper when absorbing ink resembles on a small scale a marsh matted with shrubs and sticks and twigs around which water is flowing, as ink runs about and among the fibers that together form the spongy paper. There is a limit to the amount of liquid which a blotter will absorb, as there is a limit to the amount of water that a marsh will absorb without overflow. That limit in the blotter is the combined capillary attraction of the fibrous shrubs and sticks and twigs that together form the paper.—Popular Science Monthly.

Delicate Young Girls, Pale, Tired Women

There is no beauty in pallor, but proof of poverty of the blood. Exertion makes your heart flutter, your back and limbs ache, and you sadly need something to put some ginger into your system. Try Dr. Hamilton's Pills; they make you feel alive, make you want to do things. They renew and purify the blood; they bring strong nerves, rosy cheeks, laughing eyes, robust, good health. You'll be helped in a hundred ways by Dr. Hamilton's Pills, which are an old family remedy of great renown. Thousands use no other medicine and never have a day's sickness of any kind. Get a 25c. box today. Sold by all dealers.

Lunch Sandwiches.

Tomato and cheese sandwiches are good.

Slice a small tomato very thin and take out seeds.

Also remove the soft part, leaving only the firm portion.

Put one slice on the bread, one thin shaving of cheese over it, and then put on bread.

Sardine sandwiches are excellent when carefully prepared, and when lemon is used.

Scrape off all the skin from the sardines, take out the bones and drain them on brown paper.

Mash the sardines with a fork, sprinkle with lemon juice, and spread on toasted bread smoothly.

Cut the bread very thin for all lunch sandwiches, and spread lightly with butter, trim crusts (not taking off all the crust)- but making the two pieces even. Wrap in wax paper.

Minard's Liniment Cures Garget in Cows.

COLD LIGHT.

Man is Far Behind Nature in Illumination Power Yet.

If M. Dussaud has succeeded in producing cold light he has raised mankind in this particular to the level of the glow worm and the lightning bug. These attractive creatures produce their illumination without heat; man has never been able to equal them in this respect, though engineers of the highest attainments have studied the problem, the solution of which would result in a conservation of energy in a degree difficult to estimate. Mr. Hutchinson, of Mr. Edison's establishment, has told the Sun's readers that if all its energy could be transformed into light "one small dynamo would light a whole city"; and the application of light in new ways in industry, mechanics and art is obvious.

Dame Nature does these things better. A lady of the Phengodini flashes a red light at each end of her body, and a green light along her sides. Her Paraguayan admirers call her the railroad beetle. The cucuyo one of the Elateridae, reaches a length of two inches, and is the beetle used a a hair ornament in the countries fortunate enough to harbor it. The light of these interesting fellow citizens is produced practically without heat, as is the luminosity of the familiar lantern carriers who may be seen on the lawn o' nights. But the method by which they generate their illuminant is a mystery.

M. Dussaud wears a good reputation, earned by his achievements in engineering. We hope the announcement made in his behalf is justified by his discoveries. It is humiliating to confess that an untutored lightning bug, without scientific or technical training, surpasses man in the field of applied physics.—New York Sun.

HALLAM'S GUARANTEED FUR COATS AND SETS

Write to-day for the 1916-17 edition of HALLAM'S FUR STYLE BOOK. 32 Pages illustrated, which shows beautiful photos of fur sets and fur coats moderately priced, and also gives full particulars of HALLAM'S ZOOLOGICAL CONTEST. 64 Prizes. $300.00 in CASH given away free. Address as follows:

John Hallam Limited
405 Hallam Bldg., Toronto

GUNS, traps, animal bait, nets and supplies are described and priced in our 32 page Sportsman's Catalog which we mail free.

RAW FURS—We are the largest Cash Buyers of Raw Furs direct from the Trapper in Canada. Our Raw Fur Quotations sent Free.

Every Woman's Ambition For Rosy Cheeks Now Easily Satisfied

Hollow cheeks, with dark lines under the eyes, how a woman hates them!

But rosy cheeks, clear skin, and bright eyes, give them to a woman, and she is happy.

The woman who attracts, whose fresh, dainty complexion compels admiration, is always careful of her health, particularly of her blood condition. Bad complexion always means bad blood.

Girls, don't let your blood grow thin or watery. To do so brings on haggard looks and declining strength. Many a woman who has allowed herself to run down, to develop that tired, worried look has built up again in this simple way. Why don't you try it?

At the close of every meal, just take two small chocolate-coated Ferrozone Tablets—any person can do this in a minute. The action of Ferrozone is apparent at once. It sets you up, makes you feel good, starts up your appetite, aids digestion, brings that old-time feeling of youth into the system again.

Ferrozone puts you on the right road—the one leading to health.

Not a man, woman or child needing blood, vigor, endurance—not a person who is weak, nervous or sickly, not a person in ill-health who won't receive immediate help from Ferrozone.

As a tonic or restorative, as a health-bringer and body builder, Ferrozone is unrivalled. It cures because it tones and nourishes, because it contains the elements that build up and strengthen. For better looks and better health try Ferrozone yourself, sold everywhere, 50c. per box, 6 boxes for $2.50, or by mail from The Catarrhozone Co., Kingston, Ont.

THE MOTHERS.

All night the fickle planet had never ceased,
The tiny clutching hands had found no rest,
Till wan and gray the slowly-paling east,
I pressed the tiny face upon my breast.

"Dear God," I said, "oh, teach me how to pray!
Though very little my faith has faltered slow;
No words have I, I know not what to say,
Save this alone—O God, I love him so!"

A hand was sudden laid upon my hand;
A woman's eyes looked pitying at me;
A star-haired form stood close—"I understand,
I was a mother, too, in Galilee.

"Across the sunny Galilean sea
I heard the rumored power of Jesus' name,
I laid my dying child upon his knee—
I trusted him—canst thou not do the same?"

The whisper ceased, and through the blinds aslant
The first soft rays of morning wan light crept.
Warm-breathing, gathered close against my heart,
My child stretched drowsy limbs, and, smiling, slept.

A RECORD STURGEON.

One Fish Provided a Meal for 1,000 People.

Very seldom indeed is the sturgeon the finny monster which Edward II. made a Royal fish, and which, when caught in the Thames, becomes the property of the Crown, captured in English waters nowadays. For this reason not a little interest was aroused a few days ago when it was announced that a sturgeon 9 feet 9 in. in length, weighing 432 pounds, had been caught in the River Delph at Welney Washes, near Littleport, Norfolk. This fish, which according to the estimate of a salesman at Spitalfields, who ultimately sold it for $30, would provide a meal for nearly 1,000 people, had been noticed in the river, and attempts had been made to shoot it. But the cartridges used were loaded with shot too small to have any effect on the sturgeon's hard skin. A large net, therefore, was drawn across the river, after which a boat rowed alongside the fish, when one of the men succeeded in forcing a large and powerful hook attached to a strong pole into its throat. This enabled him to keep its head out of water just long enough for the fish to be killed with a gun. Some idea of its size and weight may be gathered from the fact that five men were required to land it. This, however, is by no means the largest sturgeon which has been caught in English waters. The record was a fish weighing 460 pounds, while in the North Sea fish weighing as much as 662 pounds and 735 pounds have been captured by trawlers. It is pointed out that one of the most remarkable facts about the fish netted in the North Sea is that they are similar to the American species, whence it would seem that the specimens caught from time to time in our waters must have made the voyage across the Atlantic, since the fish appears to have died out as a regular inhabitant of British waters. Sturgeons pass the greater part of the year in the sea, but periodically ascend large rivers, and it was due to this characteristic that the specimen was caught recently in the River Delph. Not only do they attain great size and weight, but, according to the estimates of some experts, they sometimes live as long as two hundred years. Apropos of the fact that Edward II. made the sturgeon a Royal fish, it is interesting to note that its flesh, quite apart from the fact that caviare is made from the roe, is always held in great estimation, and in olden days was always reserved for the table of the king.

Art Pottery

You will be pleased with the choice assortment of

New Art Pottery

which we are showing this week. The assortment contains Flower Bowls, Bud Vases, Vases of various shapes, Jars, etc., in Yellow, Jet, Verd, Red and Blue. This is very attractive. Priced from $1.00 to $5.00

THE HOUSE FOR GIFTS.

Double Eyed Fish.

There is a fish equipped with bifocal eyes, one-half of the lens for seeing above the surface of the water and the other for submarine use. This characteristic also gives the fish it popular name—double eyes.

The fish inhabits the shores of South America. Sometimes they swim with the eyes half out of water. Examination shows that each lens is divided into two parts by a dark band. The half above the band is out of water and the other half below the surface.

Naturalists tell us that the fish's eyes became "double" from its practice in swimming with them half submerged. Nature made the part of the eye above water adapted for seeing in the air, while the other part remained adapted for vision under water.

The double-eyes grow to about a foot in length, and in Brazil are caught for food.

NIGHT AND MORN.

I.

As I lay a-thinking, a-thinking, a-thinking,
As I lay a-thinking, at the close of the day,
In the crimson west the golden sun was sinking,
And sweetly sang the birds as they sat upon the spray.
As I lay a-thinking at eve's bewitching hour,
I had a charming vision which filled me with delight.
I saw a maiden fair,
With lovely golden hair,
Arrayed in garments beautiful and bright,
She seemed more fair than the dawn of day.
As I lay a-thinking, she vanished far away.

II.

As I lay a-thinking, a-thinking, a-thinking,
I saw this maid again in my vision clear as day.
In the crimson west no more the sun was sinking;
Sombre shadows seemed to deck the world in weird array.
As I lay a-thinking, at morning's rosy hour,
I saw this maid again with a lover kind and true.
He vowed by all above
She was his only love,
Then pressed her lips 'neath skies of azure blue.
She clasped his hands, and smiled serene, and gay.
As I lay a-thinking, they vanished far away.

A MOST WORTHY OBJECT

Dear Sir,—With the continued duration of the European war, the increased suffering and destitution of thousands of widows and orphans have impelled the various societies and churches of the Allied countries in Detroit, to combine for the purpose of giving a grand charity bazaar for their relief, which will be held at the New Tabernacle, Grindley Field, Detroit, Mich., November 15th to 25th.

A space has been assigned to the Canadians for a booth, and all donations in cash, as well as the proceeds from merchandise donated to the Canadian section, will be forwarded to the Relief Committee, founded and conducted by the Canadian Government. The fund will also be increased by t proportion of the general fund which the Canadian section is en led.

May I ask you in the interests charity, to give this public notice, a request the readers of your valual journal to forward to the secretary 111 East Congress street, Detro Mich., the names and addresses their relatives and friends now residing in this State, in order that w may communicate with them with view of interesting them in this hu mane undertaking.

Thanking you in anticipation, I am, yours very respectfully.

H. Buchnell, Secretary.

THE BEST WAY

In Which the Homemaker Can Do Things Needful.

To economize on asparagus and at the same time make an appetizing dish, try paring the stalks of the vegetable its full length and then cutting them together with the tips and cooking in the usual way. This prevents waste, not alone of the food, but also of time in cutting the asparagus with the fork—and then no remaining portion is left upon the plate.

To clean straw hats, moisten a clean old tooth brush with water, and then carefully sprinkle peroxide of hydrogen upon it. Scrub the hat with this quickly, a small section at a time, wiping up the soiled moisture with a bit of sponge or soft, clean linen rag. If the hat is much soiled the brush may be quite wet, and a little bland white soap rubbed thereon before it is sprinkled with the useful peroxide.

To clean weeds from a walk, make a strong solution of rock salt and boiling water. Pour this upon the weeds as hot as you can have it after the salt is dissolved. Take care that the solution does not get upon the plants and grass you may wish to preserve on either side of the walk. Weeds, snails, ants, brave worms and ambitious grass disappear after a treatment of this solution.

ECONOMY.

(London Tit-Bits)

In the third-class compartment of the city train the conversation turned on the important subject of economy. Various views were expressed. Then a small man in one corner said, slowly:

"A friend o' mine—leastways, 'e's mate of an acquaintance o' me—'e ain't spent a 'a'penny in five years."

"Rot!" "What are you givin' us?" and similar remarks greeted this statement.

"Fact!" said the small one, briefly, as he lit his pipe. "But 'e'll be out of jail next week!"

"Beans Is Beans"—and the cost is soarir skyward with pork, beef, eggs and other foods until the cost of living represents an increase of from 30 to 50 per cent. While meats and vegetables are beyond the reach of many millions of families, **Shredded Wheat Biscuit** continues to sell at the same old price and retains the same high nutritive quality. Shredded wheat biscuit contains all the rich body-building nutriment in the whole wheat grain, including the bran coat, which is so useful in keeping the bowels healthy and active. Eat it for any meal with milk or crea or in combination with frui

HUMANITY PAYS

Not a Man Can be Spared—Country's Financial Interest In the Disabled Soldier Problem.

(Statement by Sir F. Williams Taylor.)

Sir Frederick Williams Taylor has lately returned from Europe, where he visited our soldiers at the front, to the headquarters of the Bank of Montreal, in which he is general manager. "The interests of our fighting men and the interests of our national finance," he said to a correspondent the other day, "are identical."

"Some people talk as if business and humanity were antagonistic," the interviewer remarked.

"Because," Sir Frederick replied, "some other people have tried to push their business and 'get rich quick' by disregarding human rights. But humanity pays in the long run—and often in the short run, too—with a nation and with an individual.

"This war is going to be won," he continued, "by a combination of humanity and finance. We say, and truly, that the Allies now fighting for civilization and peace, against destructive German militarism, would have no chance but for the financial strength as well as the organized enthusiasm of the British Empire. But we should be fighting with one hand tied behind our back if we had neglected as we often neglected in former wars, the health of our soldiers.

"Look at the hideous mortality from disease in almost every war we have had to wage before this one. If we now had to add to our inevitable losses by shot and shell anything like the old percentage of loss by disease, and by lack of swift and scientific care for the wounded our armies would be short of men, not by thousands, but by hundreds of thousands. Men could do little without guns, but guns can do nothing without men.

"It is men that will win this war, as they have won every other war."

"And this new thoroughness in looking after our men will have to be continued when the war is over. Every man will be needed, and the utmost energy of every man, too, if our country is to go ahead or even to hold its own."

"You know, of course, what the Military Hospitals Commission is doing to make that possible?"

"Yes, indeed," Sir Frederick replied. "Though I said 'when the war is over' it is perfectly clear that we need thorough organization and the keenest scientific care in dealing with the men already coming back disabled. Fortunately we have the Military Hospitals Commission carrying out this task, and it has already reached a rare degree of efficiency.

"The Canadian people should know more about this magnificent work that is being done in their name and for their interests, because its success must depend largely on the way it is backed up by well informed public opinion.

"What we must aim at and what I am glad to see the Commission aims at, is nothing less than the restoration of every man to efficiency as a member of an industrious and self-respecting community.

"In the case of those men who unhappily suffer from some permanent disability, there is all the more need for painstaking ingenuity in restoring them as far as possible, by building up their general health, by fitting them with really workable artificial limbs and other appliances, and by equipping them with technical skill for such occupation as will suit their capacities and bring them the highest returns.

"That, I am sure, is what the men themselves will want. 'If we can't be efficient, let's be as efficient as we can,' they would say. And, thanks to modern advance in our knowledge of the human body and its needs and possibilities, a large proportion of our disabled soldiers can become as efficient as ever they were.

"There would be no excuse nowadays for the existence of a large class of men incapable of earning their living, in spite of the worst that our enemies have done to them.

"Speaking now with some knowledge of finance, I should like to point out that by neglecting to restore every man to the highest degree of efficiency he is able to attain, we should be adding to the country's burden in two ways, both of them very serious.

"The country, through Parliament, has adopted a pension scheme more generous, I believe, than is in force anywhere else, and I am glad of it.

"Under that scheme, which I am sure will be administered in the interest equally of the ex-soldiers and the country as a whole by the excellent board of commissioners just appointed, it has been stated in Parliament that the disabled men will receive $[illegible] a year. And presumably for several years the amount would remain about the same. That figure is only based on an enlisted force of [illegible]. With [illegible] men under arms, the pension charge at that rate will be $[illegible], equal to 5 per cent. on a loan of $[illegible].

"The country has shouldered the burden with the utmost good will. But that is all the more reason why the country should be assured that the burden will not be unnecessarily increased. The pension is given as compensation for disability. Every removable disability that is not removed, therefore, lays an increased and unnecessary burden on the whole community, including all the soldiers themselves, besides being a particularly grievous injury to the man who is allowed to suffer from it.

"A still heavier burden would be laid on the country by the loss of these men's industry. Every citizen is, as it were a part of the great economic machine of Canada. If he is an efficient part, he is adding to the wealth and maintaining the prosperity of the country. If he is not efficient, he is a dead weight for the rest of the nation to carry, and [illegible] instead of increasing the country's resources.

"That is not the sort of position that any soldier will want to occupy.

"I hope that the finding or making employment for soldiers will be carried out with the same thoroughness of organization that has been adopted to fit them for employment. This is the business of every employer, and indeed of every citizen who can either stimulate or in any way assist the provincial and other organizations formed for this purpose."

She—Maud is very fickle. She never has use for one fellow long. He—That's because she doesn't have him long before he gets short.—Boston Transcript.

Full of color and of snappy style, line, is this out-of-door costume for October and November days. Heavy silk jersey tingray, crossbarred with orange is the material, with facings of orange kid on cuff and collar.

Latin Lake In a Slav Ocean

"The Roumanian is very obstinate in character and does not let himself be easily persuaded," says the wife of an Austrian officer of Roumanian cavalry. "He does nothing without reflection, and often he reflects so long that the time for action has passed. This slowness has become proverbial, for the Saxon says 'God grant me the enlightenment which the Roumanian always gets too late.' Frankness is not regarded as a virtue, and the Roumanian language has no word which directly expresses this quality. What is commonly understood by military enthusiasm is wanting in the Roumanian, for he is too ignorant to perceive the advantage of letting himself be shut in the service of a foreign master, for a cause of which he understands nothing and cares less."

This summary of the Roumanian character will go a long way to explain the procrastination of these song-loving shepherds and farmers on the southern slopes of the Transylvanian Alps in espousing the cause of the Allies. They want to be certain before they do so that they will get back the [illegible] provinces of [illegible] from Austria-Hungary.

"It is a fine country," said a Hungarian Magyar, "but there are dreadfully many Roumanians," and this expresses the sentiments of Hungarians on the north and Turks on the south. A popular legend of Transylvania tells how, when the Lord sent the Hungarian angel Gabor (Gabriel) to Paradise to banish Adam and Eve, the erring pair so regaled the angel with good fare (even as Milton relates) that he had not the heart to fulfill his mission.

Then the Wallachian (Roumanian) angel Florian was sent down to carry out the sentence, but Adam asked asylum for the [illegible] and Florian turned back abashed. Then the German archangel, Michael, was given the writ of eviction. Hospitality and [illegible] were alike of no avail. "[illegible]!" And out they went.

The Roumanians have been accused of a blind superstition, but the Roumanian is said to exceed them in his ignorant pantheism. The idea is strongly rooted in the Roumanian mind that they alone are Christians, and that consequently no man can be a Christian without also being a Roumanian, and this seems to imply that there was a time when the two words were identical for them, and that, surrounded for long by pagans with whom they could hold no sort of community, they lacked all knowledge of other existing Christian races.

What would appear to be liberalism is merely a historical survival. After the conquest of Dacia by the Romans in the early part of the second century, A. D., that province with the plateau of Transylvania, "the land beyond the forest" became the stronghold and base of the Roman dominion in those parts. On almost all sides the new territory of Rome was surrounded by barbarians. To defend the new province against them Trajan founded military stations in the mountain country, and around them Roman influence spread out beyond the area of the actual province.

After the conquest of Dacia Roman influence and civilization covered like a blanket both shores of the Danube, less potent of course in proportion to distance, but for one very good reason the Romanization was more complete here than anywhere else on the eastern front. Romans had settled there before the conquest, for Dacia was the California of those days of scarcity of gold, and Trajan himself brought here colonists from every part of his immense empire.

Still there colonists came of their own private initiative, attracted by the lure of gold or through the trading instinct. Roman kultur was introduced into the Carpathians and in a short time the Dacians who still remained after the conquest accepted the Roman rule and became citizens. Roman [illegible] arose. Roman roads were built, and Roman camps enforced peace. The flying dragon of Dacia was preserved on the Daco-Roman arms, together with the bent sword, easily distinguishable on the coins from the short, straight sword of the Roman.

For a century and a half Dacia was part and parcel of the Roman empire, quite long enough for the Romanization of a province which attracted such crowds of settlers. But it was not an era of uninterrupted tranquillity. There were others who wanted a place in the sun. Trajan's successor was disgusted with the constant struggle he had to maintain to hold Dacia. In fact, Hadrian seems to have been too proud to fight. In fact, he wanted to "scuttle." But there were some among his counsellors who believed that the eagles "should stay put," and according to a writer of that time, "it would be a great pity to leave so many Roman citizens helpless against the barbarians."

So the Philippine bill of A. D. 1[illegible] did not pass. It came up again a century and a half later under Aurelian, and the order went forth for Romans to get out of Dacia. "Rome," said Gulielm to Hrianus, "should exploit no lands that any other people wanted." But what were the peaceful Daco-Roman provincials to do, with the Roman arm withdrawn? To wait serenely to be overcome and plundered by the wild invader?

Some gathered up their movable wealth and trekked to safer regions of the empire. As for the poor, their homesteads were destroyed, their tilled lands ravaged, and they could only seek safety with their cattle and sheep in the mountain valleys, where such names as Caucasus Mons (Mount Ocean) and Sontele (Christianitor (the mountain of the Christians) preserve the tradition of their wanderings.

The Roumanian say no more "Christian," but "Crestin." And here are Trajan's table, Trajan's prairie, and Trajan's walls. The common word "trojan," for the snowdrift, suggests the wonderful wall built by the great emperor, and the milky way is called by the Roumanians "Calea lui Trajan," or "Trajan's road." For thirty generations or more the Roumanians led the pastoral life, each handing down to the next a fainter and fainter memory of the grandeur that was Rome, and each bearing along with itself something more of the Roman civilization.

The two principalities of Wallachia on the north of the Danube and Moldavia, stretching up into the eastern Carpathians, united to form the modern Roumania, and Prince Carol became King Charles in 1881. His nephew, Ferdinand of Hohenzollern, an Austrian princeling, succeeded him in 1914.

Roumania has her Alsace and Lorraine in Russian Bessarabia and Hungarian Bukowina and Transylvania, and her "aspirations" extend to the whole Danube valley east of the Iron Gates up to the slopes of the Haemus, or Balkan range. The power that controls the Danube threatens Vienna and is likely, with the help of the allies, to break the chain that binds Turkey to Germany and to open the [illegible] of the Dardanelles.—John [illegible] Bramhall in Chicago Tribune.

Finlay Barrell—We look for a nervous trading wheat market, pending

GIVE THE FARM SPRING A CHANCE

Study Its Possibilities and How to Make the Most of Them, and the Spring Will Demonstrate Its Value by Increasing Your Wealth, Improving Your Health and Lightening Your Labor.

If you were thinking of buying a farm, and jotted down the items you wished to keep before you vividly in your search for a suitable one, that of a good water supply would, I am sure, appear very near the top of your list. And then, if you were deciding between two farms of about equal value, except that one had a valuable spring or two on it, I should not have any hesitancy in foretelling your decision. Frequently, indeed, farmers are asked by visitors or would-be purchasers the question: "Is there a spring on your place?"

A good spring is undoubtedly a valuable farm asset, and the purpose of this article is to solicit special attention to this source of water supply, in the hope that the spring may receive its due share of development and use in the farm economy. Among its many admirable features are the following: First, the high quality of the water it furnishes; second, its reliability in all seasons and years, wet or dry; and third, the accessibility of its water without special labor or cost. The farm, then, that has a spring or two possesses a unique value that cannot be calculated in dollars and cents. Particularly true is this if the farm be a dairy farm, and many are such because one or more springs provide an ample supply of pure water for the cattle in the pastures. If the spring be near the buildings all the better, for then there is the additional benefit of having the water piped into the house and stables at a very low cost.

WORKING IN GRANDMOTHER'S WAY.

What a sense of satisfaction possesses the farmer with a good spring of water when an unusually dry season occurs! He feels secure and thankful, and takes pleasure and pride, no doubt, in being able to provide water for his neighbors who are less fortunate. His spring has a community value, because its service reaches beyond its narrow confine and the whole community is richer thereby.

Yet sometimes one wonders whether these free gifts are appreciated as much as they should be. Maybe it's a case of "come easy, go easy." One farmer expends much money and time in sinking and equipping a first-class well; another farmer doesn't need to do this because he has a good spring close by, but evidently, in some cases at least, he doesn't realize the true value of it, for he fails to pipe the water to the house and stables or even to "wall it up." Perhaps the housewife still goes down to that spring many times daily with her pail on soft, wet ground, and stooping over dips the water and carries it home just as her mother-in-law did years ago. Such conditions should surely not exist; they are fair neither to the women nor to the spring, and both may fail in their highest service from the same cause—neglect. Did you ever try to quench your thirst at a poorly kept spring? If so, you know the inconvenience and humiliation.

Springs in their natural condition discharge far more water than we think, and unless they are large enough to create a spring creek, we do not appreciate their capacity at all. The reason for this is that the water steals away quietly "amid the grass and fern," and escapes our notice for the most part. It is quite different, however, if a spring be cribbed and provided with an overflow pipe, for then the water level is raised in the spring, and the discharge made more noticeable in the overflow. The supply then can easily and very accurately be calculated by measuring the flow in gallons per minute in a pail held at the pipe. The capacity can also be appreciably increased by cleaning out and deepening the bed of the spring before walling it in. Sometimes, too, several small springs may be united in one common basin. This could be done to good advantage. Walling in a spring not only increases its head and capacity, but insures cleaner, purer and cold er water.

Any spring will respond noticeably to a little care and attention and give much better service. The overflow pipe should be joined to a closed drain leading to a good outlet, so that the surroundings of the spring will always be dry and accessible. If the spring be in a pasture field it should be fenced in and the water conveyed by a pipe to a trough outside; if near the house it should be covered by a little house of some simple form of protection.

MAKING THE SPRING EFFICIENT.

I have made reference to the utilization of the spring in the pasture fields; now I wish to point out and illustrate the various ways of getting the spring water "on tap" in house and stables when the spring is within a reasonable distance. The simplest, yet safest, case is when the spring is located on higher ground than the farm buildings, and the water is conveyed by gravity to them by an iron pipe under the frost line. Sometimes the spring is high enough to make this method practicable, but a hill or ridge intervenes and makes direct piping impossible through the elevation. A siphon will meet this case satisfactorily if the bend or highest point of the pipe line is not more than twenty feet higher than the water level in the spring, and a valve is put at the bend to remove air that may accumulate there and stop the siphon. When the spring is not high enough to serve the taps by gravity, the water may be pumped by hand or other power, as in the case of wells. If the water in the spring is not more than twenty feet lower than the pump cylinder, the pump can be located inside the buildings and the piping carried under the frost line to the spring. A check valve and strainer should be attached to the end of the pipe in the spring. If power enough be used on the pump the water can be elevated any required height to a supply tank.

HYDRAULIC RAM FOR PROFITS.

Very often the spring has an elevation and location that makes the installation of the hydraulic ram an easy and most satisfactory proposition. This method of utilizing the spring water is worthy of more attention than it usually receives by farmers. Many farmers, it is true, have this equipment, and can testify to its efficient service, but the writer is of the opinion that there should be many more such installations, and there would be, probably, if the farmers knew more about the hydraulic ram, its value and the conditions necessary for its successful operation.

In order that the reader may judge for himself whether he could make use of this pumping device in connection with his spring or not, I shall note the most important conditions that must exist in order to have satisfactory results.

1. Supply of water. Six to eight gallons per minute are sufficient for operating a ram that will pump all the water required per day for any ordinary farm.

2. Head or fall of water: This is the vertical distance between the level of the water in the spring and the level of the ram. A large fall is not necessary; eighteen inches will operate a ram if sufficient water is supplied, but a few feet is better, say about five.

3. Distance between spring and the ram: This distance varies with the fall, but it should be at least five or six times the fall, that is to say, if the fall be four feet, the ram should not be nearer the spring than about twenty-five feet.

4. Drainage from the ram pit: The large amount of waste water should be able to get away quickly, as flooding the ram would result in stopping it.

5. It should be possible to get all pipes below the frost line.

6. The question regarding the distance and height that the ram will pump water need not trouble one, as it will serve all ordinary conditions in this respect. Of course the greater the distance or height the less proportionately the quantity of water that is delivered. But as the ram works all the time a very small stream will supply a surprisingly large amount of water per day.

The question may arise, "How much water will a ram pump in twenty-four hours?" Under ordinary conditions a ram supplied with 8 gallons per minute, under four-foot head will lift 5?0 gallons a day a height of sixty feet. This quantity is sufficient for the needs of an ordinary sized home, equipped with all modern conveniences and also for watering an average-sized stock.

The first cost of a ram outfit is very moderate, and the cost of maintenance practically nil. The ram itself and the piping are the two most expensive parts, and as the type of ram and the length of piping required varies considerably with different conditions, the cost cannot be definitely stated, but from $50 to $75 will cover most cases.

It is seldom, I believe, that the farm spring could not be made more efficient and serviceable, as the source of the water supply by one or more of the means suggested in this article.

—CANADIAN COUNTRYMAN.

How the Zep. Met Her Fate

British newspapers just received contain vivid eye-witness descriptions of the destruction of the German Zeppelin by Lieut. W. R. Robinson, of the Royal Flying Corps, at Cuffley, near London, on Sept. 3. The following is by the Daily Chronicle's Cuffley correspondent:

The Zeppelin was brought down here about 2.30 this morning.

It fell headlong, a blazing mass, with a tearing sound, in a meadow midway on the road from Potters Bar to Enfield. For several hours the wreckage burned furiously, leaving only a tangled skeleton of wire and crumpled parts of her engines, and nearly a score of grim, coal-black bodies that are all that are left of her crew.

This is the story of her bringing down as I have had it from reliable witnesses who were almost underneath the falling airship as she came down; who, indeed, most narrowly escaped destruction with her.

"We first heard a Zeppelin over us about 1 o'clock this morning," said Mr. Gray, of Cuffley Hill Farm. "It remained overhead for about 20 minutes, and then went away southwards over Enfield. It was very foggy, and as it was then unilluminated by searchlights we couldn't see it; but we heard the sound of its engines die away in that direction.

A DEEP GLOW.

"Ten minutes or a quarter of an hour later we heard gunfire and the sound of bombs dropping. Then we again heard the Zeppelin overhead. All that we could see at the time was a deep and general glow in the air. We thought the Zeppelin had dropped star-shells.

"Then we looked up and saw the ship above us like a huge incandescent mantle with an orange centre of flame. Almost immediately one end of her dipped. The orange centre extended till she seemed all on fire. Then the Zeppelin, now in a vertical position, fell headlong.

"She dropped with a terrible tearing sound and struck the ground with a crash that could be heard for miles around.

"The wreckage burned for hours, lighting up the whole countryside. Every few minutes came a pop-popping from her machine-gun ammunition.

14 BODIES RECOVERED

"A policeman was the first on the scene. Then came a few villagers and myself, and soon afterwards a corps of special constables from [illegible] Oak. We did our best with buckets of water from a pond near by and an old hose that was brought along later to put out the flames and rescue some of the bodies we saw entangled in the blazing wreck.

"Curiously enough, at first we did not know whether she was one of our own airships or a Zeppelin. She made such a comparatively small patch on the ground—for the reason, of course, that she struck nose-on. Then we came across half a propeller, with a charred body mixed up with the wheel, and immediately behind that two other bodies. On one of them we found a piece of cloth with some German lettering on it, and near by some German cartridges and a German cap. Then for the first time we knew it was a Zeppelin.

"About 4 a. m. parties of military arrived and took charge. From that time to 7 a. m. altogether 15 bodies were taken out of the debris, together with some more or less damaged machine guns."

VILLAGE'S ESCAPE.

The few cottages and farm buildings that constitute the village of Cuffley had the most marvelous escape. Fifty yards from the fallen Zeppelin is the little corrugated iron church of St. Andrew's.

To-day, except that its fences and its little lawn of grass are trampled down, it stands unscathed. A little farther on is a cottage, an inn called The Plough and a farmhouse. The first, which is the nearest inhabited building to the scene of the disaster, and is called Hill Farm Cottage, is occupied by Mr. James Leslie, a dairykeeper.

He told me the following story:

"I slept right through the raid. I did not even hear the Zeppelin fall. The first I knew of it was when a man sleeping in the next room to me called out and told me to dress. I woke up and saw a great glare at the window.

"This was nearly 2.30 this morning. I got up at once, thinking it was the little church opposite on fire, and went outside. When I saw the fire was in the field across the road. One or two people were already there. It burned like a furnace.

"We saw some bodies in the flames and threw buckets of water on them. When the wreckage cooled sufficiently we managed to pull some of them out. But most of them could not be got out for hours later.

"The Zeppelin fell nose first. We could tell that by the small patch she made on the ground. On the shoulders of a coat recovered from the wreckage were four short gold bars—two on each shoulder. A naval airman who saw it said he was the commander.

"Machine-gun bullets in the fire were popping all the time. The whole place was as light as day. The wood in the body of the ship burned furiously, leaving only a skeleton of tangled wire. Another flying officer who was there said she was a super-Zeppelin, one of the largest and latest type."

ALL LONDON ILLUMINATED.

An eye-witness of the destruction of the Zeppelin writes:

Suddenly, away to the north, a ball of fire in the sky riveted our attention. The ball spread in size, and there was a great [illegible].

The whole of London, north, south, east and west, was illuminated by the one giant flash. The dome of St. Paul's and the towers at Westminster, hitherto obscured, stood out with remarkable clearness, and for a brief second it looked as if a panorama view of the whole of [illegible] had been thrown upon a screen in a darkened hall.

There was no need now to speculate as to the fate of the invader. The people who had come out into the streets raised cheer after cheer and sang the National Anthem.

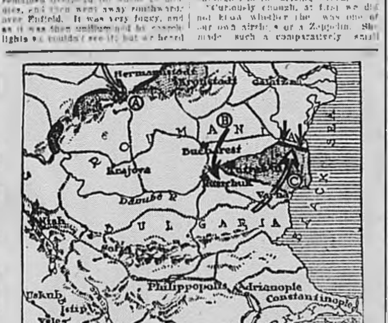
FALL NOSE DOWNWARDS.

The burning Zepp could now be seen falling nose downwards to the earth, like a huge blazing cauldron emitting sparks.

The news of the whereabouts of the locality where the Zepp had fallen spread round London with great rapidity and before daylight thousands of people were making their way by road to the scene. As soon as the train service for the locality started there was a great deal of congestion at the railway stations on the line, and overladen trains bore thousands to the scene until an order was issued that all bookings for Cuffley were to cease.

"Woman is a little slow in [illegible]," "What makes you say that?" "I have never seen one [illegible] with a hatpin [illegible]."

The [illegible] everything that is beautiful [illegible] The Maid [illegible] can I refuse you when you ask it so beautifully? [illegible]



A general view of the Balkan campaign is shown by the map. A marks the point of the Germans' counter thrust at Roumania, the shaded area is that portion of Hungary and Transylvania occupied by the Roumanians. B shows the direction of the Russian invasion of Bulgaria and C the invasion of Dobrudja by von Mackensen, the territory he has occupied being shaded. Arrows D and E in Macedonia show the direction of the Serbian and British offensives, respectively, both being victorious.

LOYAL SOULS AID EMPIRE

This is Mlle. Tania, a Russian girl of sixteen who is serving in the ranks of Brusiloff's armies. She has been recommended for the Cross of St. George for bravery on the field.

The history of the war would not be complete without a chapter entitled "Voluntary Contributions to War Expenses." The materials for it are in the archives of the treasury. They consist of dated, numbered, and annotated documents. Each of them records a free and spontaneous offering which has been gratefully accepted by His Majesty's government.

Merely to name the places from which they come would be a lesson in geography. Where is Sandakan, B.N.B.? There is a romance in the sound of Sandakan, and surely it was romance that moved a firm in Sandakan to send [illegible] to the Chancellor of the Exchequer with this message: "In this territory we contribute nothing towards the imperial finances, while at the same time we enjoy all the benefits of British protection. By disposing of the above sum for us you will be assisting us to discharge a welcome duty." Business is business, but this is the sheer romance of patriotism.

AROUND THE WORLD.

From Sandakan we leap to Matsqui, in British Columbia. The municipality of Matsqui sends £52. A civic romance! From Matsqui we fly to Fanning Island. The natives of the Gilbert Islands employed there have sent two gifts of the [illegible] princes. From Fanning Island we wing our way to West China, alighting in a mission station, fourteen hundred miles from the coast. There we find an old missionary who sends his gift to the chancellor with these words: "I wish you with the national burden on your shoulders to understand how the rank and file of us wish to carry with you the nation's sorrow and fulfil its obligations."

In Summit, New Jersey, an American citizen is found writing a cheque payable to the British Empire. From New Jersey back to China, where we discover a husband and wife taking counsel together and jointly resolving to send a draft in four figures to the motherland. From China we hurry back to Canada, where we surprise a man writing a cheque for £200 "to cover moneys received by me while an engineer studying at Keyham" nearly half a century ago. Then to Saskatchewan, where we look over the shoulder of an old man who is writing a cheque for £20. He remarks that "it is a small thing to invest in war loan and draw a dividend when brave men are laying down their lives." He begs the chancellor to print notes or stamps for those who prefer giving to lending.

SENDS ONE SHILLING.

Even the children's mite tinkles in treasury romances. It is properly classified: "Gifts from Children towards War Funds". Schools club together to pour their pence into the war chest. But in this Wonderland Alice sometimes scrapes together her own savings and sends them to the Chancellor of the Exchequer with a letter painfully written in [illegible] hand. Here is a letter from Alice herself:

"I am sending you one shilling out of my pocket money to help to pay for the war. Daddy says you are collecting for it. I am seven years old and I have ten uncles fighting."

My lords did not return it. They initialed it "thanks" and issued the command, "Prepare H.O." This being interpreted means "Prepare [illegible] Order." The [illegible] order was prepared. The gigantic treasury machine was set in motion to absorb Alice's shilling.

There are many gifts from officers on active service. Some send a year's pay. Among the contributions from retired officers is one from a very gallant gentleman in a far country. He writes: "I have twice applied to be taken in the army reserve, but have been refused on account of my hearing. As my service has been refused, I hope my money will be accepted and am therefore sending you what money I have in the bank."

SENDS "THE" POUND.

There is somewhere in England a poor old woman with a Dickensian name. She anxiously asks the Chancellor whether he will take her pound. The Chancellor thanks her, and promises to add it to the revenue. "Dear Sir," she replies, "I have much pleshr in sending you the pound." Do not smile at the naive ardor which moves her to say not "a" pound but "the" pound—her own particular, and probably her only pound.

Great is the patriotism of the poor. There is a golden letter from a Golden Donkeyman, which utters the very soul of the merchant seaman, to whose valor in tramp and trawler the navy owes much and the nation owes more. "Sir," he writes. "I have just come back from Hell—from among the submarines. Do not mind the submarines. Do not mind the grammer. Grammer does not count as a rule with gentlemen."

* * *

Beside the portrait of the donkeyman we may hang the portrait of the miner who sang at seventeen inns and workmen's clubs "for the benefit of the war," and slowly gathered, in small sums, no fewer than twenty pounds. Then there is the poor man who sent a National Health Insurance Commission money order for ninepence, the cashier of which set an almost insoluble problem to the assistant paymaster-general, the accounting officer of the treasury, the postmaster-general, and the Bank of England. As a proof of the vigilant stewardship of the treasury, we may cite an order pencilled upon one of the minutes dealing with this enigma: "Mr. Blank, I'll secure the 9d."

Shareholders in armament firms send the excess of their war dividend over the peace dividend. Clergymen send increases in their tithes due to the war. Other gifts come from citizens who do not pay income tax. One comes from a curate who cannot fight and does not drink.

* * *

HE OFFERS HIMSELF.

The most touching gift of all comes from a poor old Irishman. His letter is a moving picture of unconscious pathos and humor:

"As I was not able to answer your request owing to chronic catarrh in my head and rheumatism in my blood which has caused me much trouble.

I have two boys at home. They one has jaundice in his stomach, and they other's head is not right.

I am willing to help in any way I can. I now send you a subscription of 1 pound, trusting you will get it all right, but I have no money for exchecer bonds, and I would offer myself if I would be of any use."

The old Irishman is the last of the shadowy forms in these treasury romances. He hobbles off to his bog without hearing our plaudits. What a gallery of portraits!—James Douglas in the London Chronicle.

FIRE BAGS AT SEA.

The Kind They Used in the Day of the Old Tinder Box.

Every whaler and sealer that sailed the seas in the days of wooden ships carried a fire bag. This was a tarpaulin bag about a foot long and six inches wide, lined with waterproof material, with interlinings of oilcloth and thick flannel. Into this was placed the flint and tinder box for kindling fire, and the bag was then securely fastened with double flaps and that to keep its contents dry.

It was the special duty of the second mate to look after the fire bag and in case of shipwreck to attach it at once to his person by means of such straps provided for the purpose. Thus if a ship and crew were cast away [illegible] the means of obtaining a fire to warm themselves by and to heat food and drink would not be wanting as long as the precious fire bag was safe.

The [illegible] whalers [illegible] present day still carry a fire bag stowed in the [illegible] with the [illegible], but now it is of [illegible] holding half a dozen tin boxes of matches.

[illegible] scrub with a [illegible] and powdered alum.

DIARRHOEA

Was Caused By Change of Diet, Etc.

Diarrhoea arises from many causes such as, change of diet, change of water, change of climate, catching cold, the eating of unripe fruits, or anything that will cause or induce an excess of bile.

On the first sign of any looseness of the bowels it should not be neglected, but should be looked after immediately, for if not diarrhoea, dysentery or some other serious bowel complaint may ensue.

Mr. Geo. Smith, Victoria, B.C. writes: "It is five years ago since I first tried Dr. Fowler's Extract of Wild Strawberry. I was then on a timber survey, and suffered greatly from diarrhoea, caused by change of diet, etc. A friend in the party gave me a few doses which gave me great relief. Since then I have been in survey work, and would as soon think of starting out on a trip without my compass and blankets as without my supply of Dr. Fowler's Extract of Wild Strawberry, which I consider the woodsman's best friend."

Dr. Fowler's Extract of Wild Strawberry has been on the market for the past seventy years, and is universally known as a positive cure for all complaints arising from any looseness of the bowels.

When you ask for "Dr. Fowler's" be sure you receive what you ask for as there are many rank imitations of this sterling remedy placed on the market to try and fool the unsuspecting public.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

Price, 35 cents.

A Battle In the Air

A thrilling story of a battle in the air is told in a letter from an officer to his parents, published in Lloyd's Weekly. He writes:

One sunny afternoon four of our machines went over the lines on an offensive patrol. In other words, we were sent on a roving commission over a certain area of Boche territory, taking with us plenty of ammunition and orders to shoot all enemy machines on sight.

We wandered around for more than an hour, sitting over Boche aerodromes and picking up useful scraps of information relative to rolling stock, transport and the like. Then, suddenly, after we had passed the important town of —— the patrol leader fired a signal light and dived. We looked beneath him and saw three enemy biplanes.

We followed him down, and I emptied a drum and a half of ammunition into a German machine during the dive. All at once our fuselage shivered, and, looking down, I saw that Archie had left his card in the form of a piece of burning H. E.

"Fuselage burning—pass the fire extinguisher," I shouted down the speaking tube to my pilot. But the pilot's earpiece had slipped from his cap during the dive, and he heard nothing. I stood up, leaned across, and shook his shoulder. "Pass the fire extinguisher," I yelled.

"Hun down on the left," he shouted back, my words having been lost in the roar of the engine.

"Fire extinguisher," I called again.

"Why don't you fire at that Hun, you fool?" was the reply.

Seeing that the flames were licking their way back to the tail, I abandoned the attempt to get the extinguisher, and crawled down the fuselage to the scene of the fire. I managed to beat out the flames, which had eaten half way through one of the longerons.

Meanwhile the pilot had been attacking one of the enemy machines, and a bullet had gone into our petrol tank. Confronted with a diminishing pressure, he decided to make for Allied territory at once, and turned west.

Five minutes later, by which time the number of revolutions had dropped alarmingly, we found the way barred by two more Boche machines. My gun having jammed, the pilot did the only thing possible—he went straight at the nearest German, firing all the time. The Boche swerved just in time to avoid a collision, but had previously been hit, for his machine all but did a nose dive, and he only landed with great difficulty.

Then our engine petered out altogether, and there was nothing for it but to do a long glide and try to reach the lines. We were at 4,000 feet when we started to glide, and for a long time we didn't know if we had sufficient height to get us across.

But the pilot took advantage of a small salient, and we managed to glide over the trenches at a height of about 400 yards, fired at by machine-guns and rifles, besides dear old Archie. We landed just behind the second line trenches of a certain part of the French line, and, to our joy and astonishment, we were not shelled on the ground.

We all, when we are well, give great advice to the sick.—Terence.

"Man wants but little here below," quoted the Wise Guy. "If that is so, a fellow generally gets what he wants," added the Simple Mug.

COULD NOT SLEEP

Nerves Were So Bad.

To the thousands of people who are tossing on sleepless beds night after night, and to whose eyes sleep will not come, Milburn's Heart and Nerve Pills offer the blessing of sound, refreshing slumber, because they restore the equilibrium of the deranged nerve centres, thus restoring strength and vitality to the whole system.

Mr. Arthur McCutcheon, Mt. Pisgah, N.B., writes: "I have been much troubled with my nerves, and could not sleep for hours after I would go to bed. I would toss and turn from one side to the other before I could go to sleep. I would then wake up in the night, and lie awake a long time before I would get to sleep again. I thought I would try Milburn's Heart and Nerve Pills, as they were recommended so highly. I now get to sleep without any trouble; my nerves seem quieted, and when I lie down I go to sleep quickly. Anyone who is bothered with their nerves should keep a box on hand."

Milburn's Heart and Nerve Pills are 50 cents per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Extraordinary Selling OF WOMEN'S COATS

Regardless of weather conditions the selling of women's and misses' coats is remarkably brisk. The soft, warm cloths and rich pile fabrics and the smart lines of this season's garments are of course big inducements to buy but there's another inducement in our coats that spells economy—buying at prices that saves money on every purchase.

Children's and Girls' Coats

Cardinal, Brown, Navy, Dark Green and pretty mixed Tweed effects in warm all wool cloths.
$2.50 to $8.50

Women's Coats

Sizes 34 to 41 and small women's and Misses' sizes, 14 to 20 In handsome Tweeds, Cheviots, Velours, Zebelines, Velvets and Kerseys.
$7.50 to $25.00

New Coatings and Mantle Cloths

Cheviot at $1.50, Blanket Cloth at $2.00 and Chinchilla at $2.25 per yard. They come in pretty shades and are warm, servicable all wool cloths suitable for Children's Misses' and Ladies' Coats.

Every yard of these splendid cloths was bought a year ago and are priced at least 50 per cent lower than the present value.

Warm Sweaters for Men and Boys

Penman's Outing and Beaver Brands, the three best lines you can buy are represented in our big stock of fall and winter Sweater Coats in rich colorings of brown, navy, khaki, grey in plain shades and combinations.
Men's sizes, $2.00 to $6.00
Boys' " 1.00 to 2.25

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

GLAMIS

Miss Mable Kloktown and friend motored here from Hanover to spend Sunday with her parents.

We are sorry to report the illness of three sons of J. J. Husk who are all sick with typhoid fever.

Mr. Fiddis and Miss Mary Webb, of Vesta were Sunday visitors at the latter's home here.

Word was received that Pte. W. McNally is in London Hospital suffering with inflamation in his eyes, All wish him a speedy recovery.

Mrs. Thos. Gamble and son have returned home from Stratford.

Mr. Martin McKinnon has been home from Detroit, Mich.

Mr. Teddy Chapman left last week for London, Ont. where he purposes entering into military service again. All wish Ted every success.

Miss Dewar of Tiverton was the guest of her friend, Miss Reta McKinnon, over the week-end.

Mr. Duncan Guest of Dervie was a visitor here Saturday and Sunday.

Miss Abby Symons left last week to visit her sister Mrs. Ford of Philadelphia.

Mr. Joseph Purdy is visiting relatives near Fort William.

Miss Florence Webb who is working in Paisley spent a week-end at her home.

Miss Annie Currie spent a week with relatives in Kincardine Twp.

Mr. and Mrs. George Ferris of Ripley spent Sunday with his grandmother Mrs. Woodstock.

Miss Kate McKinnon spent a few days last week with her brothers Messrs. John and Alex McKinnon of Lucknow.

Miss Bella McGregor, 6th con. Bruce sundayed with Miss Flossie McLennan.

A Red Cross Society was organized here last week. Mrs. Dochen, Pres., Mrs. Dave Robertson, Treas., and Miss Laura Cunningham, Sec. All persons interested in Red Cross work are cordially invited.

Mr. Sidney Johnson is engaged at Mr. Joseph Purdy's.

The report received here last week of the arrival of "The 160th Bruce Battalion," in England, was not true.

VESTA

Mrs. Hugh Ferguson and Mrs. John Connolly spent Sunday in Walkerton.

Congratulations to Miss Eva Fiddis on securing first prize in the bread baking contest at Vesta Rural School Fair.

Mr. Peter McGarrity Jr. spent a few days with friends in Toronto.

Miss Bertha Cannon is visiting her brother, Mr. Harry Cannon.

Vesta has at last produced champions. Some euchre players in this district!

A successful taffy pull was held at the home of Mr. and Mrs. Fred Fortune on Monday ev'g.

A number of cattle were sold from this locality last week.

Miss Webb spent Sunday at her home in Glamis.

HANOVER

A complimentary banquet was given at the Reid House in honor of Lieut. Harold Young, and also as a farewell tribute to Mr. and Mrs. Ross Young who are shortly leaving town. After a very fine toast list, Lieut. Young was presented with a handsome wrist watch.

Mr. Henry Hoenemeider of Hanover, received word yesterday from his son Jake, who arrived safely in England. Jake enlisted in the 111th Battalion of Waterloo, and is now a corporal on the orderly staff.

Mr. Ross Young is leaving for the Canadian Soo where he will take over the management of the office for the Canadian Oil Co. of Toronto. Mrs. Young will likely remain in town for the winter. Ross has a host of friends here who will wish him all kinds of success in the north.

Mr. and Mrs. Henry Cross of Louise who are moving to Hanover are leaving many friends behind them in the township of Bentinck. Mr. Cross was a councillor of Bentinck and he has always taken an active part in the affairs of his district. Mrs. Cross was actively identified with the Women's Institute.

EAST BRUCE

We are pleased to report that Mr. Harry Lamont is able to be around again after getting hurt with a limb at the bush.

Mr. D. McArthur held a successful auction sale on Oct. 26th, and the sale netted him over $3,500. Mr. McArthur and family are going to retire to Port Elgin.

Major Thomas Hay has returned home after spending a month in the West. He says the black rust is what trimmed a lot of the West this year.

Official word was received from Ottawa by Mr. Menno Reppel that his son Gunner D. Reppel had been wounded in action. Gunner Reppel enlisted at Prince Albert, Sask., about a year ago and has been at the front about three months. Although of German descent he and his parents are true to king and country and he played the part of a British hero.

Miss Brown of Rocanville, Sask. is visiting Mr. J. B. McRae and other friends in the neighbourhood.

BRANT

MILDMAY

Miss Madeline O'Brien of Stratford was the guest of Mr. and Mrs. W. E. O'Brien last week.

Henry Schultheis, who spent the last six weeks in Saskatchewan with his sons, arrived home on Saturday.

Mr. William Schoenau of California is a guest at J. S. Milne's this week.

The marriage of Mr. Melvin Gowdy, second son of Mr. Isaac Gowdy of Mildmay, took place on Oct. 4th, to Miss Lulu Kreutziger of Detroit. The young couple will reside in Detroit, where Mr. Gowdy has a lucrative position.

Dr. L. Doering is putting another story on his dental office on Elora Street, which will greatly improve the appearance of the building.

Mr. Ed. Godfrey of Detroit spent a few days here last week.

Mr. E. J. Goetz has purchased a Hardware and Harness business at Liberty, Sask. and gets possession on Nov. 1st. Mr. Fred Arnold will accompany him and take a position as plumber in the new store.

Witter & Co's. Saw-mill was totally destroyed by fire on Sunday afternoon. The fire alarm was given, and in short time the engine and hose were at work and soon had the fire under control.

This week it is our sad duty to record the death of Mr. James Scott Milne, which took place on Monday afternoon. Mr. Milne was 68 years of age, and was born near the town of Elora. Mr. Milne taught school for a few years in Howick, and then went to the States where he became a prominent business man. He had an interest in retail stores in Buffalo and Batavia, N. Y. He retired from business five years ago and moved to Mildmay. He was a man who travelled a great deal, would spend the summer here and the winter in Florida. He was an Elder in Mildmay Presbyterian church and will be greatly missed in the church. The funeral will take place on Thursday afternoon at two o'clock to the Balaclava cemetery.

WESTFORD

Miss Annie Murray of Chepstow, who has been visiting friends here for the past week, returned to her home Sunday.

Mr. J. Fitzmaurice of Bracebridge and his two children visited at Mr. D. Murray's last week.

Mrs. E. Kelley of Walkerton spent a few days last week with friends here.

Mr. Patrick Manly of Port Huron is visiting his sister, Mrs. Jas. Collson.

Mr. and Mrs. George Reinhart and Mr. Harry Dosman motored to our burg one day last week.

PINKERTON

(Intended for last week.)

Mrs. Simpson and son of Brooklyn, N. Y., spent a few days last week the guest of her uncle, Mr. D. Pinkerton. Mrs. Simpson is a former Pinkerton girl and has been spending the summer with her parents, Mr. and Mrs. Robt. Geary of Niagara Falls.

Mrs. R. D. Pitcher of Toronto visited at Mr. Adam Reid's the first of the week.

Mrs. (Rev.) Gale is visiting in Alma.

Miss Marie Pinkerton of Walkerton H. S. Sundayed at her home here.

The ladies of the Red Cross are this week mailing twenty boxes of cake, candy and other treats and gifts for Christmas, to the soldier boys who have gone from here, viz—Capt. John Reid, Sergt. Andrew Bayne, Frank Pinkerton, Jerry Desmond, Andrew Calhum, Elmer Gregg, Samuel Rayburn, George Stewart, John Wolfe, John McAfee, Edgar McAfee, Gordon Pinkerton, Gordon Garland, Edgar Garland, Henry Campbell, Edgar Campbell, Frank Sawyer, Lorne Reid, John Nicholl and William Bell.

OTTER CREEK

Mr. and Mrs. Frank Smith spent Sunday at Mr. Jacob Miller's.

Mrs. John O. Miller of Buffalo was visiting her niece, Mrs. Philip Gress.

Mr. Albert Knechtel of Hanover was a business visitor out here last week.

Mr. and Mrs. George Smith of Ayton were visiting at Mr. and Mrs. John Hogg's.

Mr. and Mrs. Wm. Klein of Mildmay were visiting Mrs. David Bell on Sunday.

Mr. Simon Mockle and Miss Carrie Mockle and Mr. and Mrs. Wm. Polfuss were visiting Mr. Henry Wolfe who is very seriously ill.

Mr. Edward Fenner made a business trip to Molcke on Thursday.

The Rawleigh man passed around this way.

Mr. and Mrs. Zuber of Walkerton were visiting Mr. and Mrs. Steinhagen Sunday last.

Mr. and Mrs. Charles Jasper of Mildmay, Mr. Gordon, Miss Beatrice Dickison and Mr. and Mrs. Charlie Schmidt were visiting Thomas Jasper's Sunday.

Mr. Clarence Pfeffer of Alsfeldt was visiting Wm. Dickison's.

Mr. Wm. Hill and friends were visiting Arthur Pletsch's.

Miss Jennie Hopf was a visitor on the fourteenth.

Mr. Thos. Smith was a business visitor at John Hill's, Tuesday.

Mr. David Gress made a business visit to Hanover.

SOLWAY

Mr. and Mrs. Jas. Welsch from Dornoch spent the week-end at the home of the latter's sister, Mrs. E. P. O'Connor.

Mr. and Mrs. Alex Knoll were in Chepstow on Sunday attending the funeral of their niece.

Pte. P. H. Michell's name appeared in the casualty list of wounded on Friday. He was born in Walkerton and is a nephew of Mr. Thos. Michell here.

The party given by Mrs. Deitrich at her home here on Friday was much enjoyed by all present.

Mr. Louis Gateman has rented Mr. E. O'Connor's farm on the 4th. con. Mr. Tony Kocher, who now occupies it, has purchased a farm near Hessen and will move there about the end of the month.

Mrs. John McCallum is visiting friends in Toronto.

Mr. and Mrs. J. Ashley from the South Line spent Sunday at the home of the latter's brother Mr. John Stroeder.

Mr. Pat and Miss Margaret Quirk attended the reception of their cousin in Walkerton last Tuesday.

CARGILL

Mr. and Mrs. Henry Addis of Walkerton spent Thursday with Mr. and Mrs. Henry Bester.

Mr. W. D. Cargill M. P. P. was in Toronto on Thursday with a deputation in the interests of Dr. Clapp of Mildmay for the County Court Clerkship.

Mrs. E. Hardaker left on Wednesday for her home in Flint, Mich. after a few weeks' visit with her daughter, Mrs. Geo. Schnurr.

Mr. Roy Sparling G. T. R. operator of Goderich, spent the week-end with his parents, Mr. and Mrs. Henry Sparling.

Miss L. Selling Sundayed in Mildmay.

Mrs. John Clark visited with friends at Port Elgin for a few days the first of the week.

Mr. and Mrs. James Hardaker and family returned on Saturday after an extended visit with friends in Windsor but we regret the accident which happened to their little daughter.

Mr. James O'Donnell of Stratford, is visiting with his sister, Mrs. John Clancy.

Mr. and Mrs. Thos. Abell, Mr. and Mrs. A. J. and Harold Ross of Wingham, motored to the burg on Sunday and visited with friends.

Mr. and Mrs. A. Rosseau, formerly of the Simcoe House, Edengrove, but now of the Mansion House, Clifford, Sundayed at J. D. Schnett's.

Mr. and Mrs. John Wardlaw of Walkerton, visited with Mr. and Mrs. Bester on Sunday.

Mrs. A. Powers and Miss Mary O'Connel Sundayed at Mr. Hugh Ferguson's, North Brant.

Mrs. Martin Bester left on Tuesday on a short vacation with her parents in Lucan.

Dr. and Mrs. Bricker entertained a number of their friends to a card party on Monday evening and all enjoyed their hospitality.

"Sunny Jim", our genial friend at the Grove, must have been looking over his glasses by last week's budget, as we are positive he is a better judge of the ladies than that. Had it been so, one wouldn't expect him to say a word as we never "squealed" on him last summer. You are never too old to learn?

Mr. J. T. Clancy was in the County Town on Saturday.

A number of our young folks and a few of the middle aged ones attended the "Hop" at Simon Smith's on Monday evening.

SCHOOL REPORT

G. M. Keeling,
Teacher.

FORMOSA

The people of Formosa and neighborhood paid a whole hearted tribute to their popular village physician, Dr. McCue, who is leaving for the Front, in the form of a magnificent banquet which was served at Oppermann's Hotel in his honor on Monday evening. The tables fairly groaned with the feast fit for a king which had been prepared by the capable hostess and served by the ladies of the village. About forty-five people in all were seated at the tables. After full justice had been done to all the good things, the company adjourned to the Hall, where Mr. E. O. Kuntz, reeve of Culross tp. took the chair and introduced a short toast list. "Our King and Country" was proposed by Rev. Father Brohmann and responded to by Warden McNab; "The Village of Formosa" was coupled with the names of Messrs B. Beingessner and Chris. Weller. "Our Boys at the Front" was proposed by Dr. Ferguson of Teeswater and responded to by Mr. John Rowland of Walkerton. "Our Guest" was happily proposed Dr. H. H. Sinclair, after which Mr. John T. Rittinger presented to the guest of the evening, a nicely worded address, expressive of the high regard in which he is held by the people of Formosa, at the same time wishing him Godspeed and a safe return. Along with the address the Doctor was handed a handsome gold watch as a token of esteem and high regard. Dr. McCue feelingly thanked the good people for their kindness to him. Music and songs were provided by Messrs Isadore Gfroerer, Frank Heisz and Alphonse Zettel. Dr. McCue is leaving at once to join the Army Medical Corps at London. Mrs. McCue and the children will remain in Formosa for the present.

Fall Clearing Sale of
WALL PAPER

All of my 1916 Wall Paper must be cleared out in the next 30 days to make room for next season's goods which are now coming in.—There is a large assortment of high grade Wall Paper that will be on sale at very low prices.

LETTER FROM MR. J. ROWLAND

Editor Telescope,
Walkerton.

Dear Sir:—

Reading the Telescope of last week, I notice that some kind friend of mine, intimated that I have my eyes on political honors. I can assure the gentleman that he does not know Jack Rowland yet. It is true I stated at Chepstow, that I would like to be in a position of authority when the boys come back from the front, and if so, I would do my very best to see that they would get what was due them. I believe that the conservatives of South Bruce are satisfied with their member, W. D. Cargill, M. P. P. and the longer the gentleman is known the better he is loved by them and that the Conservatives as well as the Reformers, speak in the highest terms of praise of their member.

It is also true that I never took the platform until after the war broke out and whatever I may have said or done, it was always from an honest motive, and if I hit hard at any time, I hope it will bring forth good fruit. Any man who would either by his silence or his talk, try to make political capital out of our boys who are gone to the front, that man is not a Britisher. There are times when it is necessary to speak plainly and we ought to know where we are at in this war.

I intend to continue doing as I have done in my humble way, and a kind word or a small daisy sent to the boys as an emblem of love is better than a large bouquet of roses given at the time they may have given up their lives in order that we may live.

Yours truly,
John Rowland.

Four Signallers Off

The four Walkerton boys who are leaving for Overseas with the Divisional Signalling Corps, Ottawa, were given an official farewell by the Town on Friday night at the Town Hall. Five-dollar gold pieces were presented to each of the boys by His Worship Mayor Lippert and appropriate speeches were made by Mr. H. M. Ley, Mrs. Wisser, Regent of the Daughters of the Empire, Rev. R. Perdue, Major John Henderson and others. The four signallers were:—Ralph Glave, John Rowland, Clayton Freeman and Wilfred Freeman. And a fine manly lot of boys they were, who will prove worthy representatives of the old town at the Front. Sapper Stewart Forbes, a stalwart young American, who was here as the guest of Sapper John Rowland, was also presented with a five-dollar gold piece at the same time by a friend. The boys were due back in Ottawa on Monday and by this time they may be on their way Overseas.

CARD OF THANKS

The family of the late Joseph Carbert wish to express their sincere thanks to their friends and neighbours for many kindnesses shown in their recent bereavement.

COURT OF REVISION

Township Of Brant, 1916.

Notice is hereby given that a Court of Revision will be held pursuant to to the Ontario's Voter's Lists Act, by his honour the Judge of the County Court of Bruce at the Township Hall, on the 16th day of November, 1916, at 2 o'clock p. m., to hear and determine complaints of errors and omissions in the voters' list of the Municipality of Brant for 1916.

M. A. McCallum,
Clerk of Brant Tp.

Nov. 9 and 16.

LIGHTNING STRIKES SPIRE

Terrific Electric Storm Wrought Havoc At Formosa—Beautiful Church Narrowly Escaped Destruction—Formosa Power Co. Are Heavy Losers.

The R. C. Church at Formosa, one of the finest structures of its kind in the Province, narrowly escaped destruction last Thursday night when the severest electric storm in years swept over this district. One lightning bolt struck the peak of the spire towering some 85 feet above the hill-top. It passed through the tower and on to the basement where its force was still great enough to move a large foundation stone. Another bolt struck the village lighting system, smashing transformers, burning out all the lights in the village and falling by a narrow margin of wrecking the power plant. In the black darkness into which the village was plunged, it was seen that the church spire had commenced to burn at the first point of contact with the lightning and an attempt was made to get Mildmay by phone. It was then found that the telephone system was also out of commission. It was four hours before a driver could get to Mildmay, summon the fire brigade and get the fire engine at work on the job. In the meantime, by means of a chemical extinguisher, the fire was kept confined to the spire, making slow headway until it reached down possibly thirty feet from the top.

The heavy metal cross on the spire, as it fell, glanced off the roof and struck the ground about twenty-five feet out, fortunately not hitting any of the crowd a few feet away. Striking the roof it started a very small blaze which a dipperful of water might have extinguished at the time but before it could be got out, it had burned a hole in the roof several feet across. In the meantime all the fixtures, seats and furniture had been removed from the church. The firemen had no great difficulty in extinguishing the blaze. The loss which was due largely to water, will amount to a couple of thousand dollars and is covered by insurance.

The following report made by Mr. John Pelter to the Walkerton Electric Light Co. gives an accurate account of the damage done to electrical equipment by the lightning —

The lightning struck the spire of the Formosa Church setting it on fire. Below the steeple it buckled out part of a brick wall and passed to the ground on the east side of the Church, actually moving a foundation stone in doing so. The indirect effect of this discharge was very great. In the vestry of the church it blew off the heavy cast iron door of the service box which was locked, smashing it to pieces. Every fuse in the box was blown and the switch was melted and burned. The transformer on the pole near the church had its top blown off and broken. The cutouts were destroyed. At this corner four wires were melted off. Both primary wires became white hot for nearly two blocks and at the next transformer was very badly damaged and had to be replaced. All fuse blocks here were destroyed. In the building containing the meter and switches for the church, everything was smashed and had to be replaced. The street light transformer had its top blown off and other damage is not known. Every street light in the village was destroyed. In nearly every house the fuses were blown and in many cases the plugs were welded to the block, so that the block had to be replaced with a new one. Had this wiring not been first class in every way, it is certain that fires would have resulted. The discharge passed over the lines to Walkerton powerhouse. The lightning arrester at the sub-station received the full force of this and probably saved a very costly burnout at the power house, as it turned out a very large part of the discharge to the ground. In doing so the arrester was blown to pieces and will have to be replaced. The rest of the discharge struck the machine in the power house which at the time was delivering 300 h. p. bringing it to a dead stop. The arresters in the power house were badly damaged and had to be replaced. It will take the Formosa Electrical Co. nearly a year of revenue to make up the loss. If this discharge had struck here instead of Formosa, it is probable that the loss to the Company would have been many times as great.

The damage was not confined to the church and lighting system. Plaster was knocked from the walls of the Convent, also at Opperman's hotel, and Gregor Benninger's store. Many windows were also broken.

The damage sustained by the Formosa Electric Light Co. will amount to about five hundred dollars, and the Walkerton Electric Light Co, one hundred dollars.

The Walkerton Co. had their men on the job quickly and had the house lighting restored by Monday night, and the street-lighting going on Tuesday night.

50 cents a pair, best value ever offered in khaki all wool worsted sox. No lumps, easy fitting. G. T. Rourke, Men's Wear.

Successful Dance

The young ladies of the K. K. K. Club gave an enjoyable masquerade dance in the Town Hall on Friday night with the object of raising money to buy Christmas presents for the boys of "A" Co 160th Batt'n. There was a good attendance of young folks and the gallery was well filled with spectators. The neat sum of $15 was realized.

+ + +

No Appointment Yet

It is expected that the appointment of County Court Clerk will be made by the Provincial Government this week. Friends of both Dr. Clapp of Mildmay and C. E. Start of Tara profess confidence that their own favorite will get the job. A few weeks ago it was understood Dr. Clapp was willing to accept a division of the three vacant offices but now since the fight has waxed warm, it is all, or none.

+ + +

Charlie Bryce Away

Charlie Bryce of the 222nd Batt. C. E. F. of Winnipeg was here last week on a last visit to his old home before leaving for Overseas. On Thursday night, Charlie was presented with a five dollar gold piece by Messrs John Rowland and Rev. R. Perdue, president and secretary respectively of the local Preparedness League, on behalf of the town of Walkerton. Charlie left on Friday to join his Battalion at Montreal.

+ + +

A Novel Social

A Conundrum Social, given by the Ladies Association of the Methodist Church on Thursday night was quite a novel affair. Supper was served from a menu which certainly had everybody guessing. A few of the choice dishes were:—Old Maid's Delight, Hymns of the Skipper, Printers' Horror, Little Bit Goes a Long Way, Women of Grit etc. The weather was bad interfering very much with the attendance.

+ + +

Ray Hyslop A Hero

"Ray sure was a hero and he was always ready to go into a danger spot. It was a sniper's bullet which got him and he did not live a minute after being hit." Thus writes Ray's chum, Corp. Tom Eaves, of the 8th Batt'n. C. E. F. to Mrs. Thos. Hyslop regarding her son who was killed in action. Tom, who is an English boy who enlisted at Edmonton, has since won a Military Medal for taking command of his platoon in a tight position after all the officers and non-coms had been hit. He is at present in the Hospital and says that if he survives this war, he will visit Walkerton on his way back to Edmonton.

+ + +

Removing To Hespeler

Walkerton is losing a live and popular citizen this week in the person of Norman Walford, G. T. R. agent, who has been transferred to Hespeler. Norman was born here, grew up in the old town, played football on the 1912 championship team, and has had a part in the various activities of the town. The Hespeler appointment, which is a good one, is made doubly desirable by the fact that Hespeler is Mrs. Walford's old home, her father being Principal of the Public School in that town. Mr. and Mrs. Walford take the best wishes of all Walkerton people with them to their new home.

WILSON LEADING

(Special wire to Walkerton Telescope.)

New York, Nov. 8—2 p. m. —The latest returns of yesterday's voting appear to indicate the re-election of President Wilson. Hughes' majorities in the east being offset by majorities piled up for Wilson in the west. Both sides claim victory but the actual figures on the latest returns give Wilson 232 and Hughes 212 electoral votes with 87 in doubt. The doubtful states are—California, Delaware, Idaho, Indiana, Kansas, Minnesota, New Hampshire, New Mexico, Oregon, Washington, West Virginia and Wyoming. The returns from these states are coming in slowly but so far they appear generally to favour Wilson.

NEWS ABOUT TOWN

News About Town page 5.

Council meets Monday night.

Mr. F. J. Fraser is indisposed this week.

Mrs. Stauffer is visiting friends in Paisley.

There were no cases for Division Court last Thursday.

Mr. and Mrs. G. S. Schwindt spent Sunday with friends at Kitchener.

See the selection of new suitings and overcoatings at S. A. Rife & Co's.

Mr. James Hutton of Carrick, arrived home Tuesday, from a trip to the West.

Regal on your shoes means quality in them. Sold at Ramsey's Shoe Store.

Mr. Hugh McKillop was taken to the Hospital for Epileptics at Woodstock this week.

Mr. David Pinkerton, one of the old residents of Enniskillen, is reported to be very low.

Finnan Haddie—Extra thick, meaty fish. We know you will enjoy them. Goode & McKay.

Harvard brown, the leading colour in women's fine shoes, in stock at Ramsey's Shoe Store.

Mrs. K. M. Taylor and children are leaving about the 15th inst. to make their home at Belleville.

Life-buoy rubbers are made with leather inner heels and counters. Sold at Ramsey's Shoe Store.

Mrs. Frank Latchford and daughter Miss Emma left Saturday on a visit to Toronto, Oshawa and Guelph

Lieut. Harold Patterson was home from London this week. He has not yet received his discharge papers.

Mr. A. E. Sherrington has had word from his friend, Mr. John Connell that he is back in Florida for the winter.

AWARDED D. S. O.

LIEUT. ERNIE REID D. S. O.

Son of Mr. and Mrs. Adam Reid of Pinkerton, who was killed in action on September 16th., 1916.]

A meeting of the Brant Farmer's Club will be held at Mr. Walter Rowand's on Tuesday evening, November 14th.

Mr. H. G. Hunter will represent the Walkerton Public Library Board at the Library Institute at Stratford this week.

Bandsmen Jack Clark and Louis Siegfried who were rejected from the 160th have joined the 153rd band at St. Thomas.

Mr. James Whitehead has been back at his office the past week after his serious illness and is beginning to feel himself again.

Mrs. (Rev.) J. W. Sanderson was called to West Toronto this week owing to the illness of her daughter, Mrs. Walton.

Rev. Thos. Wilson received word from his son, Sergt. Mel Wilson, that he has been transfered to the Machine Gun Section of his Battalion.

Start the day right with a cup of our Special Blend Coffee and everything will go smoothly. The best on the market. Try it. Goode & McKay.

Comparing our lives to a journey by land, and again to a sea voyage, Rev. Thos. Wilson drew some thoughtful comparisons at Knox Church the last two Sundays.

Three nephews of Mrs. Bonnyman, of Walkerton, all Finlaysons, are in khaki. Two enlisted in Scotland and one in Australia. By a strange coincidence, all three met at Salonika.

Rev. C. W. Cosens delivered a powerful message on the influence of the bible on Sunday morning. He demonstrated from history that greatness survived only in those nations where the bible had a place.

Corporal James Henderson who was rejected from the 160th, has been transferred from the Special service Company at London to the Canadian Scottish Borderers at Windsor. Corp. Henderson visited friends here on Tuesday.

Indian Summer.

For the best farm shoes go to Ramsey's Shoe Store.

Mr. Wm. McLellan of Toronto was a week-end visitor here.

Mrs. Leslie of Guelph is visiting her daughter, Mrs. H. J. Bean.

Miss La France and Miss Jarvis spent Sunday with friends at Cargill.

Mr. and Mrs P. Bremner left Monday morning to spend a few days in Toronto.

Have you tried "Calaco"—It is making a "Hit" at the leading grocery. Goode & McKay.

Miss Reta Hauck of Southampton spent Friday and Saturday with Miss Grace Henderson.

Life-buoy rubbers wear longer and keep their appearance till worn out. Sold at Ramsey's Shoe Store.

Children's Aid Officials have inspected a number of sites proposed as suitable for the new Children's Shelter this week.

The removal from town of the "two Normans," Messrs. Walford and Hiscox, will be a hard hit for the Baptist Choir, both of these young men being valued members.

Miss Zeta Black of Clifford was a week-end visitor at Mr. W. H. McFarlane's. She favored the Knox Church congregation with a beautiful solo on Sunday morning.

Mr. and Mrs. E. Bennett returned from their wedding trip on Saturday and spent Sunday with the latter's parents in Carrick, leaving for their future home in Owen Sound on Monday.

Rev. D. McLennan, Children's Aid Inspector, was in Owen Sound this week and while there he inspected the Children's Shelter with a view to getting ideas for the proposed new Shelter.

Photographs for Christmas—the very thing. The inexpensive solution of the Xmas. gift problem. No friends disappointed—all equally favored—if you give photographs.—The Fraser Studio, Walkerton.

Walkerton was inky darkness most of Thursday night as a result of the lightning striking the transmission lines at Formosa. The discharge passed over the lines to the Walkerton power house, and though stopped by the lightning arrester, brought the plant here to a full stop and did some small damage.

Funeral service for the late Joseph Carbert was conducted at the Methodist Church on Thursday afternoon by Rev. C. W. Cosens, assisted by Rev. J. W. Sanderson. The remains were interred in the Walkerton Cemetery, the following friends acting as pall-bearers:—M. G. Dippel, W. G. Seale, W. M. Shaw, John Leggett, E. H. Sheffield, E. W. Garner.

A Walkerton parent caused some excitement on Wednesday last by starting in to manhandle a teacher. The affair threatened for several days to reach the police court. The parent, it seems, objected to the practice of the teacher of keeping his boy in after four o'clock, claiming that he had no legal right to do so. On Wednesday afternoon he called at the school to see what was detaining the boy. Finding he could not get the teacher's permission to let him go he motioned through the doorway to the boy to come out. When the teacher stepped in between, the parent took hold of him and gave him a shove that knocked him over. The Public School Trustees took a hand in the matter, backing up the teacher and insisting upon an apology. Fortunately the matter was amicably settled.

Little Girl Scalded

Audrey, the 7 year old daughter of Mr. Albert Fennell, was very badly scalded on Sunday morning when her mother accidentally dropped a tea-kettle full of boiling water which she was lifting from the stove. The little girl's right leg, the full length, was very badly scalded.

Arrested A Deserter

Corp. James Henderson, who is doing special service duty at London, was sent up on Tuesday by the military authorities to find Pte. Jack Lumley, a deserter from the 160th Batt'n. Corp. Henderson located Lumley at the home of his sister near Flesherton and brought him to Walkerton. He is now behind the bars waiting to be taken to London for trial.

+ + +

Red Cross Committee

At a meeting of the Red Cross Campaign Committee held on Monday night, Mr. H. G. Hunter was appointed secretary-treasurer in succession to the late K. M. Taylor. Some $1400 was reported paid in as a result of the Trafalgar Day canvass, and it is hoped that the balance will be paid in without delay so that the Committee may wind up their finances.

+ + +

A Baker Heir

A Walkerton lady, Mrs. Stevens Sr. is a member of the Baker family, which is endeavouring to recover property in the heart of Philadelphia valued at many millions of dollars. The Toronto and Detroit Baker heirs have organized to put up a legal battle for their rights. Mrs. Stevens is very closely related to the origional Bakers. In fact an attempt was made a few years ago by Lawyer S. H. McKay, formerly of this town, to have her claim recognized by the Courts.

+ + +

Recruiting Campaign Launched

The Commanding officers of this military District have apparently became sick and tired of waiting for Ottawa to start something in the recruiting line and are taking the matter into their own hands. At a meeting of Commanding Officers held in Col. Shannon's office at London on Monday, each of the Battalions which are being recruited was allowed recruiting ground in this Military Division. Bruce County was alloted to the Army Service Corps, A. M. C. and the two Batteries, who along with the 292nd Can. Scottish Borderers (Essex) will look for recruits in Bruce. The Scottish Borderers have already sent their pipe band up into Bruce. Recruiting will be carried on, not by public meetings which, it is felt, have served their usefulness, but by sending out squads of men in uniform.

+ + +

Losing Another Citizen

It appears now that we are to lose both of the "two Normans." It was made public on Friday that Norman Walford, G. T. R. agent, had been removed to Hespeler. We understand it is probable that Norman Hiscox, the C. P. R. agent, will also be leaving. Norman has been offered a despatcher's position at Toronto, and has gone to the city to try the new berth for a couple of weeks. In the meantime his position will be kept open for him in case he decides to remain here. Mr. Hiscox has been C. P. R. agent here for five or six years. By his uniform courtesy and good service he has made himself "solid" with the business public as well as being well-liked as a citizen. It has been remarked that Walkerton has been hard-hit in the loss of young men by death and by removal from town the past few months.

+ + +

A "Leak" Discovered

For some months Mr. N. Hiscox, C. P. R. Agent, has been missing small sums from his till, and it was only the past week that the culprits were discovered. They proved to be three young boys, belonging to respectable parents, who displayed ingenuity worthy of a better cause. Two clues, either of which would have been sufficient, were discovered. One was a chip off the handle of an ivory pen-knife, which was discovered under the cash drawer of the Dominion Express Office after the youngsters had attempted to open the till, and the other was the abundance of spending money which the boys were displaying. It appears that they were accustomed to enter the Station by means of a window, and they only took small sums at a time in order to avoid detection. It was also discovered that they had a key to a business office in town and frequently stole postage stamps from the office and sold them. Magistrate Tolton allowed the boys to go free, with a severe warning as they are all under 12 years of age, their parents refunding twenty dollars of the stolen funds. The boys are all bright, and have good homes, and it is hoped that after this lesson they will grow up to be the good citizens that they ought to be.

BORN

LAY—At the Bruce County Hospital, Walkerton, on Wednesday, Nov. 8, 1916, to Mr. and Mrs. H. M. Ley, a daughter.

HOSSFELD—In Carrick, on Saturday, Nov. 4th, to Mr. and Mrs. William Hossfeld, a son.

ECKENSWEILER—In Brant, on Nov. 7th, to Mr. and Mrs. Louis Eckensweiler, a son.

HARBERICH—In Walkerton, on Nov. 7th, to Mr. and Mrs. Val. Harberich, a daughter.

THE FALL ASSIZES ON

Several Interesting Cases Up For Trial At The Court House This Week Before Sir John Boyd.

The Fall Assizes opened at the Court House here on Tuesday at 2 p. m., Sir John Boyd presiding.

In opening the Court, His Lordship congratulated the County of Bruce on its generous support of patriotic work, and referred to Bruce's noble contribution of her sons. "While we are sitting quietly in this room using our efforts towards justice, the boys at the Front are doing the same thing but at a great personal sacrifice." His Lordship spoke feelingly, the tears coursing down his cheeks as he spoke.

His Lordship briefly outlined the work before the Court to the Grand Jury and then proceeded with the case of Young vs. Spofford, which occupied the whole of the first sitting.

Mr. H. G. Tucker K. C., of Owen Sound, is appearing for the Crown.

Anderson vs. Forrester

An action for slander contained in certain letters written about the plaintiff in business matters, after the examination of the defendant for discovery the parties came to a settlement whereby a payment for $150.00—court costs was entered.—

There were three non-jury cases:

Young vs. Spofford

The plaintiff has a judgment of $3000 against the defendant whose auto ran down and killed the plaintiff's husband. The defendant has among other children, a son for whom he bought a store and a stock of goods from H. B. Putnam of Paisley. Under said judgment, the plaintiff had the Sheriff seize said stock of goods as being the property of the defendant, Spofford the elder. On the application of the Sheriff an Interpleader issue was ordered to determine the ownership of the stock of goods. N. L. McKinnon of Guelph for the plaintiff, and C. L. Dunbar assisted by Mr. Leo Goetz for the defendants. Judgment was given in favor of the plaintiff. An interesting point in connection with the above case is that since entering the action the plaintiff has changed her name by another marriage.

Cole vs Celestal

Was an action to set aside an agreement made between father and son. It is contended that the defendant had the advantage of his father in the agreement. P. A. Malcolm and Robertson, Plaintiff, and Otto Klein for the defendant.

Steinhoff vs Steinhoff

Is an action for a declaration that a farm in Bruce township, though in the name of a brother, was legally the property of the plaintiff, the deed in the first place having been taken in the brother's name because the plaintiff was an infant.

King vs Dainty

Frank Dainty, an employee of the Hydro Electric Commission of Ontario, is said to have attempted to make away with a quantity of copper wire, part of which had been taken down when the Chesley system was replaced by the Hydro, and some of the wire was stock in use by the Commission on their new Chesley line. The prisoner alleged that he found the wire and thought he owned it and the grand jury agreeing with his view of the finder being the owner brought in "no bill" against him.

King vs Holmes

W. T. Holmes, an egg and butter buyer of Wiarton, is charged with raising money from the Harris Abattoir Co of Toronto by sending in two shipping bills, purporting to have shipped butter and eggs to the Company whereas it was not the truth. It is said that the prisoner has since repaid the Abattoir Co. the money obtained on said shipping bills, but the Grand Trunk R. R. Co. are anxious to stamp out such attempts to raise money on fake freight bills.

King vs King

In the month of March last, a prisoner who had escaped from the prison farm at Guelph, found his way up to the township of Amabel. He was taken in for the night by a farmer named Gurgrich and while the husband went out to the barn after supper to feed the cattle for the night, the prisoner made an assault on the farmer's wife. The prisoner is now undergoing a twelve-year term for bigamy and is likely to be brought up here for trial on a true bill which the grand jury brought in against him.

His Father Died

Mr. N. C. McKay was bereaved by the death of his father, which occurred at Strathburn, Pictou County, Nova Scotia, last Wednesday, Nov. 1st. The late Mr. McKay was in his 88th year and had been poorly for about a year and a half. On receiving word of his father's illness, Mr. McKay left immediately for Nova Scotia but did not reach the old home until after death had come.

CURRENT COMMENT

CUNNING CONSTANTINE.

Greece's autonomy as a nation is guaranteed by Britain, France and Russia, and all her interests lie in their direction. Turkey and Bulgaria, allied with Germany, are her ancient enemies. There is nothing in common between Greece and Turkey, of which she was so long a vassal. Bulgaria has in the present war [illegible] her territory. Under these circumstances one would naturally think that Greece's sympathies would be with the allies, and no doubt the majority of the nation does sympathize with them. But the King, carried away by his German wife and German influences, has arrayed himself in opposition to the allies, even though they seek only Greece's benefit. Ever since they landed at Saloniki by invitation of the Greek Government, the King has been plotting against them. In this he has been aided by a section of the Greek army.

Recently, to check the designs of the King, the allies found it necessary to take control of the Greek [illegible] and since then, learning that he was preparing to take action of a military nature against them, they placed a number of troops in Athens to watch him and see that he did no mischief. This brought out angry demonstrations against the allied troops, and it was feared that there might be bloodshed. So far that has been averted.

Gen. Sarrail made the discovery that the King was laying up a store of warlike material at Larissa, in Thessaly, with the evident intention of striking a blow at the allies while they were engaged with the Bulgarians. The King protests that he had no such intentions, and there the matter rests at present. Venizelos is at the head of a provisional Government, situated at Saloniki, and seeking recognition from the allies. Possibly they may grant the request. But at the same time it would be necessary to get rid of the King. Why he has not been got rid of before is somewhat unexplainable.

WISHING AND GETTING.

An Old Man's Realized Day Dream and the Moral It Teaches.

They had started in the most primitive way, the man and his wife, back in the little log house, but they were dreaming of the day when they would own a farm of their own and not have to work so hard. After a time their hard toil was rewarded and they owned a farm. Then it seemed desirable to add to this tract, and they worked a little harder. A new house seemed a necessary accompaniment to the large farm; so the work could not stop.

A son came to the age when he must be educated and have his chance in life, and they toiled on. All the time the old man dreamed of the days ahead when he could sit back and take life easy. Somehow the days did not come, or he did not recognize them when they came, for he kept on working until he had grown old and worn. Then his health failed, and he had to stop work.

The son for whom they had given precious years out of their lives now showed his gratitude by his gentle, unfailing love and care. It seemed to others that the goal had been reached—that the old man could now enjoy life, surrounded as he was by every comfort and attention. But he was quiet and sad, sitting with head bowed on his toil worn hands.

A neighbor, stopping in for a little visit, asked, "How are you getting along, grandpa?" Then the secret of all his sadness burst forth as he answered earnestly, "Oh, if I could only get out and work!"

What queer things our dreams are after all!

BUSY BEES IN WINTER.

How They Generate Heat to Keep the Colony Warm.

The bee upholds his reputation for industry throughout the winter months as well as during the summer. Being susceptible to cold, the bee must turn to his colony for warmth. Communism, which in bees is so highly developed in the storing of food and caring for the young, is also the basis for the heating system.

It was found by experiment that only the shell of the cluster made by the bees in cold weather is compact. This is formed by one or several layers of bees all closely [illegible] with their heads inward, [illegible]. This arrangement [illegible] for conservation of the heat [illegible] position [illegible] going on.

It is here that the heat is generated. And the more [illegible] when we are cold. The bees are [illegible] in place of [illegible] to be [illegible] of [illegible] the body from side to side [illegible] of the colony [illegible] ature. In one [illegible] when a bee had been [illegible] with his wings [illegible] minutes, the thermometer [illegible] him [illegible] half a [illegible] Weekly.

◆◆◆

Common sense is very uncommon.—Horace Greeley.

What a woman realizes [illegible] ting fat she hates to see things go to waist.

"Is this a free translation?" asked a customer in the book store. "No, sir," replied the clerk, "it will cost you a dollar fifty."—Boston Transcript.

A multitude of people are either born great or acquire greatness, compared with those who have greatness thrust upon them.

HER HUMBLE LOVER

It was true that he had not spoken a word to her in the drawing room at the rectory, but she was not offended; she knew that he had refrained from addressing her because he desired to avoid any reference to their meeting on the beach. With the delicacy of a gentleman he had so behaved as to spare her any embarrassment. Signa quite understood it, and was in no way offended; she knew that he had read her uncle and aunt at a glance, and it made her errand all the easier.

Still she approached the great, huge place slowly, scarcely heeding Archie's chatter as he ran by her side, occasionally turning off to chase a butterfly or pick a flower.

They reached the broad terrace with its moss-grown flight of steps, and Archie ran up them, calling to her to be quick.

"Perhaps he'll be gone," he said, apprehensively.

But he had not gone. The big door, with its panels of worm-eaten oak, was ajar, and with a strange feeling of mingled awe and curiosity Signa entered the hall.

Hector Warren had opened one of the shutters, and the light streamed into the vast space, discovering the massive beams of oak and walnut, the exquisite carving, in which the gilt—pure gold—still shone; a line of portraits, all the Delameres since the race obtained the name, looked darkly down on the two intruders—women in silks and satins, men in armor and tunic, with sword and with parchment roll, there they were, half-obscured by the dust, worth a king's ransom as works of art, and yet left to the moth by the young man who had inherited their name and their grandeur.

From the roof, all carved and gilded, depended a score of tattered flags, and on the gallery still shone, for all the dust, a great shield emblazoned with the Delamere coat of arms.

Signa had been in many an ancient palace in romantic Italy, and visited many a German castle and famous Swiss chalet, but she had never felt such a sensation as she felt now. She tried to laugh, but the laugh died away on her lips. The vast place seemed like a church, and instinctively she glanced toward the east for the altar; but though there was no altar, there was a magnificent painted window, which she knew must be of priceless value.

She tried to laugh, but she could only manage a smile.

"Here we are at last, Archie," she said; but Archie was too excited to answer in the same strain.

"Isn't it grand, Signa?" he said. "I shouldn't like to sleep here!"

Signa laughed and walked toward the staircase, that, large enough to admit of a coach and four being drawn up to it, ran up to the foot of the painted window, and thence round to numberless corridors.

"I don't know where to find Mr. Warren," she said, half aloud. "We might wander about for hours, Archie. The place is like a cathedral!"

"Suppose we shout?" suggested Archie; but Signa shook her head. It seemed like desecration.

"No—no," she said. "He said he wanted the library; that must—it ought to be on the ground floor. Let us try," and she opened the door leading from the hall, and entered a long, lofty room. It was the dining room—a banquet hall we should call it now. The dust of numbers of years rested as a falling veil upon the scene, yet its magnificence still made itself felt. Stained windows, exquisite carvings, magnificent pictures, and furniture which a connoisseur would have pronounced unique, struck Signa with a sense of awe and delight. Upon the long table stood an immense epergne of bronze, filled with flowers long since faded, and beside a chair lay a bouquet dropped by some fair hand, now perhaps turned to dust.

"This is the dining room," she said. "We shall never find the library, Archie!"

"Never mind. Let us go on till we do. Isn't it jolly, Signa?"

"Jolly isn't the word for it, Archie," she said, trying to speak lightly. "How can a man leave all this to dust and decay?"

Archie didn't reply to such a physiological question, but slipped his hand from hers, and scudded to a door at the end of the room, and, pulling it ajar, ran in.

Signa followed, and then stood silent and motionless.

They had found the library at last.

Before them was a room, not so large as the dining-hall, but much more elaborately fitted and furnished. The four sides were lined with books, the light coming from above through a dome of painted glass. Luxurious chairs were placed at [illegible] writing tables, portfolios six feet high were placed in stands built to receive them. It was an apartment fit for a palace. But it was not the grandeur that arrested Signa's attention.

It was the presence of a human being. [illegible] sat in a chair near the [illegible] table [illegible] and papers which apparently had failed to interest him, for he sat with his head resting on his hand, a frown between his brows, and his eyes fixed dreamily upon the painted roof.

As Signa stood looking at him, she felt half guilty of spying upon him, so weary and [illegible] was the expression of the handsome face, so [illegible] to the present, so intent on the past. He might have been one of the figures in armor [illegible] to break the silence by [illegible] hesitation, but the [illegible] and the [illegible].

"Here he is!" said Archie, triumphantly.

"Hush!" said Signa, reproachfully; and she would have retreated, but the boy's voice, light as it was, reached the dreamer, and, raising his head, he looked up and saw them.

Without a start, but with a smiling air of surprise, he rose and approached them, dropping his book upon the table, and flinging his cigar on the grate.

"This is a surprise," he said, lightly. "I have been dreaming! Well, Archie, and how are you?" and he laid his hand on the boy's head.

"I'm quite well," said Archie, airily. "What are you doing? Reading?"

"Reading a little, thinking much," he answered, fixing his eyes on Signa.

"We couldn't find the library for ever so long," said Archie. "What a big place it is! Aren't you afraid to sit here all alone?"

"No," he replied, still stroking the boy's hair. "What do you think there is here to harm me? All places are alike to him with a good conscience—or a bad one," he added, with a curious curl of the lips. As he spoke he drew the chair forward and dusted it with the duster which lay on the table. "Won't you sit down?" he said to Signa. "It is," as Mrs. Podswell said, 'fearfully dusty,' but I think if you sit here," and he places the chair, "you will be on an island of comparative cleanliness, surrounded by an ocean of dust."

Signa sat down.

"After all, it is clean dust," she said. "But I am afraid we have disturbed you," she went on, her color coming and going a little as she approached her mission.

"Disturbed," he echoed, in a significant tone which repudiated the idea emphatically. "If I were going to say that I am deeply grateful to you—and Archie—for putting in an appearance, I should speak the simple truth only. I was getting terribly bored with my own society. Thinking is your amusement, and it is one I am rather too much given to."

"You mean looking back?" said Signa.

He nodded.

"Yes, looking back; the vainest and most useless of operations. 'Ah! if I had but done this, or I had left that alone!' Bah!" and he laughed, with a touch of sadness in the laugh. "What waste of time it is! This is just the place for dreaming," and he looked round the book lined room.

Signa watched his face; there was still a vague expression of melancholy in the dark eyes, and she found herself wondering what he had been looking back upon, and what sort of a past his had been.

But she checked the speculation, remembering her errand.

"I have come with a message," she said, looking up at him as he leaned against the table, his dark eyes fixed upon her face with an intent gaze.

"A message?" he said, with a faint smile.

"Yes," said Signa. "From my aunt. She will be glad if you will dine with them to-morrow."

Not a word of excuse. Simply the plain invitation. He noticed and fully understood it and admired the direct, truthful way in which she had put it. He noticed also that she said "with them" instead of "with us."

For a moment he stood silent, his eyes fixed on the ground, then he looked up at her with an inquiry in his glance.

"It is very kind of Mrs. Podswell," he said. "Do you think—" he stopped and laughed softly, with quiet amusement.

"Do I think what?" asked Signa.

"I wonder whether you will be offended if I should ask you the question that trembled on my lips?" he said, slowly.

Signa laughed.

"Had you not better try?" she said.

"I will! I was going to ask you if you thought they really wished me to come?"

Signa colored.

"Isn't that generally understood?" she said.

"I am answered," he responded, smilingly. "I see. Will you thank Mrs. Podswell very much, and assure her that I should only be too delighted, but—but—will you help me with an excuse? I can't say that I am otherwise engaged, because I am not, and she should know it. I have no grandmother on a sick bed, or business demanding an instant journey into a far country. Will you help me?"

"No," said Signa, laughing softly. "Besides, you misunderstood me. They really wish you to accept, and to dine."

"That alters the state of things," he said, instantly. "Then I shall be only too delighted, and it is really very kind of Mrs. Podswell to take compassion upon a stranger and an unknown waif that has floated to her hospitable shores."

Signa smiled at this unintentionally high-flown acceptance.

"Then I will tell her," she said, rising; "they dine at six o'clock, and you will meet some people."

He bowed.

"I shall be very pleased," he said.

"How jolly!" exclaimed Archie from the top of the steps, where he had perched with a large folio of plates on his knee; "that is if they let me come in to dessert. They do sometimes if the bishop isn't there."

"And why not when the bishop is there?" asked Hector Warren, smiling up at him.

"Because I once trod on his gouty toe, and he can't bear me ever since," replied Archie, with perfect equanimity. "I hope they'll let me to-morrow, because you're going to be there."

"Thanks, very much. Suppose I enter into a little conspiracy with you, Archie?"

"I don't know what you mean," he said, calmly.

"Let us imagine that, just at dessert-time, you were passing outside the open door, and I saw you, and I said, 'Dear me, is that my young friend Archie? Kindly permit him to join us at the festive almonds and raisins, Mrs. Podswell!' How would that be?"

Archie laughed in his quaint, old-fashioned way.

"I think you are very clever," he said, admiringly. "You keep a sharp lookout for me, and if you don't see me I'll give a soft whistle."

Hector Warren laughed.

"I don't think I would venture on the whistle, Archie," he said. "It might lead to a suspicion that the whole thing had been arranged."

"I see," mused Archie. "Perhaps I might mew like a cat; I can do that very well."

"You might venture so far," admitted Hector Warren. "Have you got a nice book up there?"

"Yes, pretty fair," said Archie.

"Then will you wait while I show Miss Grenville the picture gallery?"

Archie nodded from his lofty perch.

"I'll wait," he said. "I suppose I can look at any books I like. You will take care of her?" he added, gravely.

"Every care, I assure you," replied Hector Warren, gravely. "I promise to return her to you without a broken limb."

"Very well, then," said Archie, with an air of being satisfied.

Signa stood smilingly looking on while this negotiation was being conducted; then she said, as he took up the bunch of keys, "But I think we must be going back, Mr. Warren."

"Do not say that," he pleaded. "Let us take a look at the picture gallery before you go; it is well worth seeing."

"I am all curiosity," said Signa; "but I am afraid that we have interrupted and disturbed you."

He smiled, and it was a sufficient answer.

"Take care of the dust," he said, as he opened a door opposite that by which he had entered. "It is not so thick here, excepting in the carvings. This is the long corridor to the picture gallery; there is a door here which leads to the dining-room, and another passage which twines all round the house."

Signa looked at him with a smile of surprise on her face.

"How do I know?" he said, putting her question into words. "Because I have been exploring the place during the short time I have been here, and have gained a vast amount of information from a plan and guide to this building which I found on the centre table in the library; I will show it to you when we get back. This is the door of the picture-gallery," he added, as he opened a tall door with painted panels. "I have been here before this morning and opened the windows."

Signa uttered an exclamation of surprise and admiration. It was a splendid apartment, richly decorated in the most exquisite taste, and still [illegible] and unspoiled, [illegible] than coating of dust. The contents of the room were priceless, and [illegible] man in his sane senses could have allowed such a collection of treasures to remain neglected and uncared for, amazed Signa.

"It is a handsome place, isn't it?" he said, quietly.

"It is magnificent," said Signa; "simply magnificent. The place is a palace! It is difficult for me to realize that it can be so neglected and deserted!"

He shrugged his shoulders.

"It is not the first palace that has passed a fool for [illegible]," he remarked, quietly, and he walked [illegible] thoughtfully, as she [illegible] her eyes rapidly over the pictures.

"Some of them, I feel sure, are masterpieces," she said. "To think of them being hidden away like this! What can possess Lord Delamere?"

He smiled gravely.

"Lord Delamere has been possessed by evil spirits, many and various," he said, in a low voice. "Amongst them they have driven him from his home, and made him a wanderer upon the face of the earth. But you are an artist, I see," he said, more lightly, yet earnestly, "there is no mistaking the expression in the critical eye. If you will make a promise, I will have this gallery properly cleaned—you know I have Lord Delamere's permission."

"What promise?" she asked, looking over her shoulder at him.

"That you will come here now and again and spend half an hour with the pictures," he said, respectfully, pleadingly.

Signa flushed.

"I will come if I may," she said, simply.

"That is a bargain," he said. "See, now, here is the ballroom. It was not a bad idea to open it on to the picture gallery. I wonder how many a young couple have wandered here to look at the pictures, reflected in each other's eyes?"

Signa laughed, then she clasped her hands in a genuine girlish gesture of admiration and delight.

"Ah, I don't know which is best!" she exclaimed, looking from the splendid salon to the picture-gallery.

"Designed by Luigi Barri, frescoes by Boucher, carvings by Grinling Gibbons,' so says the guide," said Hector Warren. "Yes, it is a fine room."

"Imagine it filled with guests, with music floating in the perfumed air, with laughter and gay chatter echoing in the galleries; fancy the place lit up and dazzling in all its glory of blue and gold! Oh! I wish I could wave a magic wand and restore the Northwell Grange to its old glory! If I were master——"

"Or mistress?" he said, softly.

"Or mistress," she said, her eyes growing deeper and more rapt, "how proud I should be of it! Even as I am," and she laughed, "an insignificant nonentity, I would like to see the place full of life and happiness."

"Would you?" he said, with a strange smile on his face as he leaned against a pillar and looked over at her, flushed with the faint excitement called up by the theme.

She laughed and recovered herself.

"Yes, but if wishes were horses, beggars would ride. I'm afraid Lord Delamere will not come back and restore the house of his forefathers, because Signa Grenville has a fancy for seeing it free from dust and full of life."

He did not reply, and in silence he followed her to the hall.

"What wonderful faces they have," she said, looking round at the portraits.

"Wonderful!" he said, half resting on a table and swinging the keys on his finger, his eyes fixed on her face, and wholly indifferent to the portraits. "As how?"

"Why," said Signa, "they are all either extremely handsome or extremely ugly. There is no mediocrity."

"There is none in the unhappy family," he said. "They are all said to have been particularly good-looking or particularly plain, as you say, and they carried the rule to their moral qualities. 'Good or evil, pure and simple, should have been the Delamere motto."

Signa listened with interest.

"Did you read that in the guide," she asked.

"Oh, I have heard Delamere say much the same thing," he said carelessly.

(To be continued.)

Combination Cooker and Heater

The most efficient and economical stove made.

¶ Will burn coal, wood, coke, corn cobs or anything burnable.
¶ Fitted with Duplex Grate, Hot Blast Tube and Screw Dampers.
¶ Will hold fire over night, cook, boil and bake equal to the largest range.
¶ Has a fine oven of heavy steel sheets closely riveted together. Body of polished steel.
¶ If your dealer has not a sample for your inspection, send $21 direct to us and we will pre-pay freight to your nearest railroad station.

HAMILTON STOVE & HEATER CO., LIMITED
Hamilton, Ont. Canada's Oldest Stove Makers

Hun Trenches Were to Last

Along many miles of the western front, as it was till the end of June, it is now possible to stand at one's ease in the middle of No Man's Land and observe the difference between a German front trench on the one hand and a French or British front trench on the other. The first point to be noticed is that the allies' wire is only cut across by [illegible] lanes or passages at convenient intervals, while the German wire lies in a tangled mess on the ground. Then, the allies support their barbed wire chiefly with wooden stakes; the Germans on it with iron. Next, our parapet [illegible] of its strength than the German to visible sandbags.

Inside the first trenches the differences are greater. The allied trench looks, in every way, [illegible]. The German trench looks like the work of [illegible] [illegible] a sort of camping-out, with some [illegible] provisions for [illegible] and [illegible]. Most of the dugouts are just roughly shored [illegible] with [illegible] enough [illegible] to hold the [illegible] [illegible] feet [illegible] pieces of plank and a couple of other pieces nailed across [illegible] the floor

is on the trench level, or say. Bathrooms [illegible]. Lighting is done with candles, [illegible] a two feet high mirror [illegible].

The German [illegible] is like one huge [illegible] village but of wood, and strung out about a mile or more long. Of course, the rooms are all underground. [illegible] At the foot of the stairs a tunnel corridor runs straight forward, for anything up to 20 yards, and from it open rooms and smaller [illegible] on each side. In some cases a second staircase, or two staircases, lead to a lower floor, which may be 30 feet or 40 feet below the trench level.

All these staircases, passages and rooms are, in the best specimens, completely lined with wood, and as fully strengthened with it as the entrance staircase already described. In one typical dugout each section of a platoon had its allotted place for sleeping and working, its own place [illegible] and a [illegible] operating room. A third, near Mametz, was designed to house a whole company of 291 men, with the needful kitchens, provision and munition store rooms, a well, a forge, riveted with sheets of cast iron, an engine-room, and a motor-room. Many of the captured dugouts were thus lighted by electricity.

In the officers' quarters there have been found full-length mirrors, comfortable bedsteads, cushioned armchairs and some pictures. One room is lined with glazed sanitary wall-paper, and the present English occupant is convinced by circumstantial evidence that his predecessor lived there with his wife and child. Clearly there was no expectation of an early move.

Other German trench works show the same lavish use of labor as the dugouts. In the old German front trench south of La Boisselle an entrance like that of a dugout leads to a flight of 24 stairs, all wood finished. At their foot a landing three feet square opens on its farther side upon a nearly vertical shaft. Descending this by a ladder of [illegible] rungs you find a second landing like the first, opening on a continuation of the shaft. Down this ladder and stairs [illegible] a gallery [illegible] three feet wide and about five feet high, cut through pure, hard chalk. It ends in a blank wall. This is right underneath a huge crater which had evidently been held [illegible] British [illegible] at the moment of the advance in July, nothing remained [illegible] for the Germans to do but to bring the necessary tons of high explosive to the end of their tunnel, and blow the mine under [illegible] of the old crater. [illegible] part of the machinery [illegible] of the excavated chalk to the surface.

German trench work is, therefore, more elaborate than the British, but that does not mean that it is better. No doubt the size and the overhead strength of German dugouts keep [illegible] [illegible] — London Times.

Sore Corns Go!

Absolutely Painless

No cutting, no plasters or pads to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of Putnam's Corn Extractor to-day.

BIRD TRAGEDIES.

The Feathered Creatures Often Bring Themselves to Destruction.

Birds and other wild creatures, like human beings, are often the victims of peculiar and unusual accidents. Sea gulls and shore birds, which obtain much of their food along the ocean surf, are sometimes caught by [illegible]. Large gulls have been observed flying away with [illegible] hanging to their [illegible]. [illegible] unable to escape from the [illegible] grip of clams.

The late Dr. John D. [illegible], of West Chester, [illegible] a kingfisher on the bank of a creek. The bird, although alive, was exhausted and died soon after it was liberated. This kingfisher had evidently attempted to make a meal of a fresh water mussel, and the hard shells closed upon the bird's bill and it was held a helpless prisoner, unable to fly [illegible] of the [illegible] raised its head above water.

A robin at West Chester was so confused when it saw its reflection in a window pane that it [illegible] striking the glass in [illegible] to [illegible] a supposed [illegible].

A man at [illegible] was rowing a boat at a [illegible] when a flying wild duck, unable to see the boat coming toward it, struck the man with full force on the back of his head. The man was knocked forward in a dazed condition, and the bird which weighed some three pounds, fell dead with a broken neck.

Rails, coots and woodcock are often killed by flying against wires of telephone and telegraph lines.

One day as David Prichard, of Scranton, was making a cast for a trout in the Broadhead, a swallow darted at his fly and was hooked by the wing.

Last summer I saw an old purple marten pull one of his young, which was almost large enough to fly from the nest and throw it on the ground. Other martens about the box at the time saw this, but showed no resentment, nor did they make any outcry as is usually done when their young by accident fall from the boxes. This poor little marten, which had been so badly treated by its father, was picked up, and its legs were found to be paralyzed, owing to the fact that fine string—probably carried by the birds into the box as a part of the nest—was tangled so tightly about the legs as to have cut off practically all circulation. It would seem that Mr. Purple Marten and his forty odd relatives who had homes and young in the same box, realized that this crippled youngster would never be able to provide for itself, and it was unanimously agreed that it should die, and the blue-coated father was the executioner.

Johnny Roche's Tower.

Standing on the banks of the river Awbeg, between Mallow and Fermoy, County Cork, Ireland, is a remarkable edifice known as "Johnny Roche's Tower." The whole tower was built by the labor of one man, who subsequently resided in it. This individual, who received no education whatever, also erected a mill, constructing the water wheel after a special design of his own. Long before the introduction of the bicycle he went about the country in a wheeled vehicle of his own construction propelled by foot power. His last feat was to build his tomb in the middle of the river bed. John Roche died, but was not interred in the strange burying place which he selected for himself, his less original relatives deeming such a mode of sepulture unchristian. — London Strand Magazine.

Minard's Liniment Cures Garget in Cows.

They Meant Well.

A postal correspondent sends the following extracts from letters that have recently been addressed to the officials:

"Dear Sir,—My husband has been gone at the crystal palace and got a four days furlong and has now gone to the [illegible]."

"Dear Sir, I am his grandfather and grandmother. He was born and brought up in this house in answer to your letter."

"Dear Sir,—You have changed my little boy into a little girl, will it make any difference in the future?"

"Dear Sir,—I have not received no pay since my husband gone from nowhere."

Another correspondent who had a grievance replied: "In previous correspondence with your office I am always described as 'Mrs.' you would form a different opinion if you saw my whiskers."—Manchester Guardian.

Disgusted Scots.

(New York Sun.)

Correspondents on the western front see some great exhibitions of courage on the part of Sir Douglas Haig's men, some of them rather amusing. One writer sends the following to his paper in London:

"The angriest man I have seen since the first morning of the fight was a Scotsman who was so disgusted that he had difficulty in finding words to express himself at having got a bullet through his leg before the real fun began. It was another Scotsman who regretted that the enemy ran instead of stopping to have it out, because, he said, when you can use your bayonet 'it makes it so much cheaper — an admirable phrase.'"

BETTER THAN SPANKING

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her today if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Officers' Training School.

The Defence Minister of Australia has decided to establish a Central School of Instruction for selected candidates for commissions in the Australian Imperial Force. The school, which will be in the neighborhood of the Royal Military College at Duntroon, will have 400 candidates, and will be under the supervision of the staff of the Military College. It has also been decided to establish a non-commissioned officers' school in each district, and no non-commissioned officer will be permitted to embark with the Australian Imperial Forces until he has qualified at one of these schools. Candidates for commissions will also be required to pass through the non-commissioned officers' school.

Minard's Liniment Cures Colds, Etc.

Made a Social Outcast.

In court circles in England it is a serious matter to incur royal displeasure. The man or woman who does so intentionally ceases to be recognized by His Majesty, which means social extinction. The offender's name is struck out of the visiting list of every person who is anybody in society, and should the offender be a man he is politely informed that his resignation from his club or clubs would not be out of place. No man or woman of social repute will in future know him, and if he is in the army or navy he has no option but to resign, for he will find himself cut dead by every one of his brother officers.—London M. A. P.

THE HIDDEN HIDE.

(Judge.)

Little Bobby was sent to the bathroom and told to take a thorough bath, after having played close to Mother Earth all day.

"How are you getting along?" called his mother.

"Pretty well," said Bobby, [illegible]. "I'm about [illegible] down to my [illegible]."

The Bread Problem is not a problem in the home where Shredded Wheat is known. The whole wheat grain is the real staff of life, and you have it in Shredded Wheat Biscuit prepared in a digestible form. It contains more real body-building material than meat or eggs, is more easily digested, and costs much less. The food for the up-and-coming man who does things with hand or brain—for the kiddies that need a well-balanced food for study or play—for the housewife who must save herself from kitchen drudgery. Delicious for breakfast or any meal, with milk or cream.

— THE — RUSSIANS

(By Donald Durand, in Chicago Sunday Tribune.)

I want to give my impressions of the real Russian as I know him in war and in peace. The real Russian is not a warrior, even though there are types of born fighters found here and there, such as the Cossacks, who are the product of the steppes, the Urals, and the Caucasus mountains. Like our cowboys, their fighting ability is the result of their environment. Environment makes a man's temperamental characteristics, but his real character depends more on heredity.

The Cossacks have a mixture of the fighting Hun and Tartar blood, which came into Russian with the Mongolian invasion under Tamerlane and other plunderers. The Chinese wall, which was built to keep these wild warriors out of China, did away with the necessity of the Chinese making military preparations to defend themselves, so that after centuries of peace they became unused to arms. This lack of military exercise is now proving disastrous to China.

We often read in history of this or that warlike people, but we forget that situations produce a warlike people out of a peace loving people, just as situations produce peace loving people out of a warlike people, as, for instance, in case of the American Indians.

What kind of people are the real Russians?

The vastness of the territory they occupy, which is so difficult to conquer owing to the severity of the winters, the traditional agricultural instinct of the Slavic people, and the love of tranquility on the part of the Slavs, make them men of peace. Every one who knows the real Russian will tell you he is gentle and amiable, hospitable and generous, kind and courteous.

The Russian is slow, even slower than the Spaniard, for the Spaniard is at least active in speech. The Slav never hurries; he cannot be hurried. But when he does move he moves along like a bear and cannot be stopped. The low inertia governs him. He is hard to set into motion, but hard to stop when once started.

Who is the real Slavic Russian? Is he the man we see on the streets of Petrograd, Moscow, or Odessa? No, it is the plain moujik, the peasant, who is born and raised out in the open country on black bread and sour milk, caviar and fish.

The cities have a great population of people with much oriental blood in their veins owing to the inroads of the eastern hoards, which almost submerged the southeastern part of Russia and flooded the cities with semi-orientals. It is only in the country that we find the pure Slavic Russian. He is tall and fair. I like him. A good heart usually beats behind his coarse hand, which is more prone to give than to take. He often goes out into the field to gather flowers for the crude vase which stands under the invariable ikon in his simple log cabin. This is the material out of which the soldier of Russia is made.

The great Russian army is composed of men who are as natural and simple as children. These big fellows still like toys and musical instruments. I have seen them when they first donned their uniforms and drilled on the Champ Mars. I have seen them wounded on the battlefield, and, finally I have seen them in the hospital, where I myself tied bandages to their wounds and said cheerful things to them. Yes, I have seen them die and have held the hand of one brave fellow who passed away. He made no fuss, but simply stretched out his big hand to me, saying, "I'm dying, good-bye." Russians may not be born warriors, but they know how to die.

As I have often looked down from my hotel window in various parts of European Russia during the last year and have seen the great religious processions of devout people following sacred ikons carried by bishops chanting their weird, holy songs, I have invariably said to myself: "This is not a warlike people; their melancholy dispositions, they sorrowful music, their sad faces, all indicate their love of peace, but they will gladly give up their lives for their convictions, for their country and God."

Evidently the Russians feel that the people of the Central powers whom they took into their land as friends and granted the greatest commercial advantages, have unfortunately proven untrue. Although no true Slav ever liked a Teuton and although a German is in all the Slavonic languages called a stupid person ("Nemetz"), and although it is a traditional fact that all children of Slavonian parentage dislike the German language, still the Slavs of Russia have been kinder to the Germans than any other people of the world.

It is evident that the Russians did not want the war, for they do not like to fight and will not fight until they have no alternative. Genealogists have often asserted that it is the brunette and not the blonde type that has fighting qualities. This would prove to be so in Russia. The dark Cossack is the natural warrior, while the blonde peasant does not like to fight. The Russian peasant is a good patriot, and is willing to fight only in defence of his country. The Cossack, on the other hand, is inclined to fight from love of combat and desire for personal glorification.

The new young Russian army now in the field, composed principally of the sons of peasants from Siberia, is, in my opinion, the finest army that was ever brought together in the history of the world. It is a well trained army, and although these youths are not aggressive, the very size of the army is such that it can move with almost uniform strength all along the front and overcome the tactics of concentrated movements on vital strategic positions.

The new young Russian army has been taught to sing patriotic songs. It has been trained in gymnastic exercises. It has been drilled to arms. It is well clothed and adequately supplied with ammunition. We can be certain that Russia is now prepared for war.

Hindenburg said, "This is a war of nerves," and if he is right Russia is certain to be heard from.

Will the exercise of Russia in the art of war become a menace to Europe? I think not. I am convinced that the Russian people will have a greater voice in the government after peace is restored. They do not want more territory and they will never wage a war of conquest. Militarism and conquest are foreign to the Slav temperament, and there exists no situation of national defence which would demand additional territory. Russia is a land of tillers of the soil who love peace and abhor war. She is still in the agricultural stage of her development. Her commercial activities will begin after this war.

We have nothing to fear from Russia. We have, on the other hand, a most wonderful opportunity strongly to bind her to us through the peaceful ties of trade. Her enormous market is now open to us. Will we take advantage of the opportunity?

Our former ambassador, Glice, called attention to the fact that Russia is the greatest market in the world. In this one nation are 200,000,000 temperate zone people who consume similar products to people in the United States. We are spending millions in the difficult development of the South American market of sub tropical and tropical peoples numbering not even 75,000,000, who are half clad and who need comparatively little of our manufactured products.

Russia needs us, for she wants our tools, our machinery, and other manufactured products. Her ports are open to our goods, but we must not forget that the basis of permanent commercial relations is reciprocity.

"America and Russia have always been good friends, and there is absolutely no reason why they should not be eternally friendly," said Count Witte to me only a few days before he died.

Trench Paper Shows Humor

(Montreal Star.)

One of the cleverest trench magazines printed is "The Vics' Patrol," issued "Somewhere in France," by the 24t Battalion, under Lieut.-Col. J. A. Gunn. Written under the guns and dealing with the grim work of war, it manages to sparkle with good humor and genuine fun. Their motto is Kipling:

"I have written the tale of our life,
"For a sheltered people's mirth,
"In jesting guise, but ye are wise,
"And ye know what the jest is worth."

Kipling provides also the subject of a clever parody by A. S. T., as follows:

"WITH THE USUAL APOLOGIES TO RUDYARD."

"When the last of the trenches is taken,
"And the last of our comrades has died,
"And the whiz-bang is only a memory,
"We shall rest as at eventide.
"We shall rest, and as 'Kip' says, we'll need it,
"And sleep in real beds once more,
"Knowing real sheets and warm blankets,
"And—believe us!—we'll leave them no more.

"We shall dream of wiring and digging,
"And trenches and bath mats and gas,
"As well as of officers wigging
"When late on parade (silly ass!);
"And the glory will be the awakening,
"Which will not be at 6 a. m.,
"But along about eleven or midday,
"We'll turn over and snooze once again."

Here is another choice selection:

"EUCLID IN THE ARMY.

"A dug-out is that which, if inhabited by any given number of men, contains room for less than half that number.

"An adjutant is that which has no heart of gratitude.

"Any two whiz-bangs together will cause a newcomer to duck.

"Any number of army biscuits are together worth less than one sound tooth.

"A major has the shortest temper between two meals.

"No one may wear more than one gas helmet on the same head.

"Sergeants who swear in the same manner are equal to one another."

"QUOTH THE Q. M. S.

"Yesterday
"Captain Armour
"Gave me

I thank you.

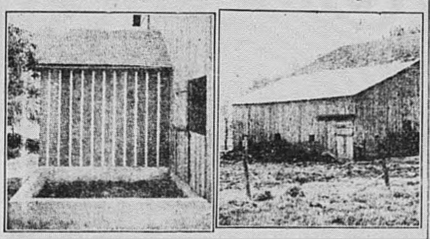
"Little Fritzie went to war;
John Bull shot off a five point four;
When he's registered the hits
John Bull picked up the bits of Fritz.
"Q. M. S."

WHY NOT BUILD THAT MANURE PIT---NOW?

Under Average Conditions Farmyard Manure is Worth $2 Per Ton By Allowing the Manure to Lie Around the Yard in a Loose Heap for Several Months Its Value May Be Reduced by as Much as $1 Are You Losing or Saving That $1?



Throwing the manure out of the stable window and letting it lie there exposed to the weather is an exceedingly wasteful practice. When manure is not spread on the land as soon as removed from the stable, it should be stored in a properly constructed manure pit.

The cheapest way to handle farmyard manure, considering both economy in labor and the conservation of the fertilizing elements, is either to let it accumulate in deep boxes under the feet of the cattle where it is made until it is time to haul it out on to the field (taking care that plenty of bedding is used to absorb all the liquid portion), or to haul it out to the fields and spread it as soon as it is made. The man who is fattening steers will probably find it best to follow the first method or a combination of the two, and the dairyman will usually find it best to use the latter method.

It sometimes happens, however, that for some reason or another the manure has to be removed from the stable, and it is not possible to spread it right away. When this is the case the practice on too many farms is to throw it out of the stable window and let it lie in the yard, just as it has fallen in a loose heap, where through fermentation and leaching it loses the greater part of the fertilizing elements it had when first made. In an experiment carried on in the States to find how much fertility, in dollars and cents was lost in this way, it was found that a ton of horse manure that had $2.80 worth of fertilizing constituents in it when it was made had only $1.06 worth at the end of five months after being allowed to lie in a loose pile exposed to the weather. In another experiment a certain quantity of manure was allowed to lie in a loose heap exposed to the leaching action of the rain, and an equal quantity of the same manure was kept in a manure pit in a firm compacted mass, the floor of the pit being made of cement, so that none of the fertilizing elements could leach away. After a certain time the two piles were analyzed and it was found that the loose pile only yielded 7 1-2 tons of manure, while the pile that was kept compact and moist yielded 10 tons of manure. The loose pile, moreover, only contained 64 pounds of nitrogen, while the compact pile contained 108 pounds of nitrogen. That is to say that in the loose pile there was a loss of $6.40 worth of fertility. This, coupled with the fact that a horse, steer or a milch cow will produce from $20 to $25 worth of manure a year, and that if this manure is not properly taken care of much as 1-2 or 2-3 of the fertilizing value of the manure will be lost, emphasizes the advisability of making a proper manure pile, so that the unavoidable loss of the elements of fertility that the manure contains may be reduced to a minimum.

In making a manure pit the chief thing is to have it water-tight. We have seen many good manure pits, with the floor made only of well-rammed clay. A pit made of stones is excellent, and can be made very cheaply on farms where stones are abundant. Concrete will, however, make an ideal pit, and its durability will, in the long run, more than make up for the initial expenditure.

Having the pit just outside the stable window, as shown in the illustrations, is very convenient though where several stables have to be cleaned it will probably be better to have the pit entirely removed from any of the buildings.

The main thing in making a manure pile is to keep it compact and moist. If the manure is allowed to lie in a loose heap the temperature will rise and considerable of the nitrogen, which the manure contains, will be lost in the form of gas as ammonia. The secret of making good manure is the same as that of making good silage—to keep the air out. When the manure is taken to the pile it should be carefully spread, so that the top of the pile will always be level. After spreading it should be tramped down as much as possible to keep the air out. If there is a drain in the floor of the manure pit which empties into a cistern to catch the liquid manure, it is not necessary to have the pile covered. In fact, it is an advantage to have it uncovered, as the rain will keep the pile moist and prevent the manure from heating to any considerable extent.

Although it is not necessary to have a cistern in connection with the manure pit, it is a decided advantage, and to have a pump in connection with it, so that the liquid manure every now and then can be sprayed over the pile. The presence of large quantities of water in the manure heap holds the temperature down, displaces air, and in this way checks the activities of those organisms which change the organic nitrogen of the manure into gaseous ammonia. For this reason the moist cow and pig manure are not so subject to fermentation as is that of horse and sheep which contains less water. This explains the soundness of the practice followed by experienced farmers, of mixing the manure from the various classes of live stock when it is necessary to store it.

The manure pit shown in the illustration is made of concrete. It is perhaps more elaborate than many farmers would care to build, but if many milch cows are kept or many steers fattened during the winter, and if the manure has to be kept in a pile a pit of this kind will pay for itself many times over in the course of a few years. The mixture should consist of one part of cement to two and one-half parts of sand and four parts of stones. The footings of the pit should be carried below the frost line to prevent heaving and possible cracking of the cement. The pit is 2 ft. 8in. deep and 24 ft. long by 19 ft. wide. It would be suitable where ten or twelve head of cattle are kept.

It will be found convenient not to make the pile higher than about 3 feet and a safe rule to follow is to provide 50 square feet of pit area for each animal kept.

The floor of the pit has a slope of one-quarter inch to a foot towards a gutter, which drains into a cistern. The liquid portion of the manure collects in the cistern and can be pumped out and spread on the land directly with a liquid manure spreader or pumped back on the pile again. The best method is to pump it over the manure pile again as this will aid materially in keeping down the temperature of the pile. If the manure does not remain long in the pit and if sufficient bedding is used the cistern can be dispensed with.

—Canadian Countryman.

HEALTH RULES

The greatest blessing in this world is good health. Without it wealth is unavailing and fame becomes a delusion. Every person who possesses it should guard it as a precious jewel. All this goes without saying, and yet thousands of persons habitually disregard the rules by which health may be protected and sickness conquered. Of course, in the case of serious illness the advice of a physician should be sought immediately, but the best physicians tell their patients to avoid sickness by taking good care of themselves. Dr. Charles E. Barker, who served as physical adviser to President Taft, has been telling the Chautauquas "How to Live a Hundred Years," and while the title smacks of the sensational, there is a great deal of common sense in what he says about the things which people may do to preserve a healthful physical condition. His views about diet, exercise and keeping free from worry are well worth having in mind constantly. Here are some of the suggestions which he makes:

In getting and keeping the body in a state of perfect health, attention must be paid to at least four things: Elimination of impurities from the system, diet, the mental condition and regular exercise.

There are four organs of elimination, the lungs, skin, intestines and kidneys.

Five minutes of breathing exercises should be taken each day to keep the chest expansion up to normal.

The pores of the skin should be kept open, either by exercise or a daily dry friction bath with flesh brushes, or fibrous mitts.

Underwear, especially in the winter, clogs the pores of the skin and to offset this a friction bath is very helpful.

The third organ of elimination, the intestines, has much to do with health or disease. [illegible] is a very prevalent disease. Intestinal sluggishness or constipation shortens life many years and leads to many other serious ailments.

But it is entirely unnecessary and can in nine cases out of ten, be cured by proper diet. Exercise each morning the muscles of the abdomen, don't eat meat and eggs until cured, but partake freely of cereals, green vegetables and fruit, and drink from six to eight glasses of water each day, including two glasses of hot water with a little table salt dissolved in the water taken before breakfast.

In the second place the diet plays a big part in the matter of health and disease.

By studying the habits of the Bulgarians who live much longer on the average than any other race of civilized people, Dr. Metchnikoff, who is the greatest authority in the world on prolonging life, gives as his conclusion that meat should never be eaten but once a day and that sparingly; that the bulk of the diet should consist of green vegetables, fruit and cereals, and that the habit of drinking some buttermilk each day will do much to keep one well and lengthen life.

Another thing, one should by will power learn to chew the food slowly. Most of the stomach troubles come from the habit of eating rapidly.

Third, cheerfulness and contentment will do much to lengthen life.

Many people bring on disease and shorten their lives by years by getting into the habit of worrying.

This, like any other habit, can be changed by any man or woman who will use determination and will power and learn to always look on the bright side of life.

Last, but not least, get into the habit of taking some kind of regular systematic exercise each day; not the kind of exercise taught years ago, which develops merely the arms and limbs, but that kind which brings into play the muscles of the abdomen and waist. Any system of home exercises, if taken moderately every day, will do wonders in keeping the body in a state of magnificent vitality, but most people are too lazy to do this.

The best time to exercise is the first thing in the morning, but it can be done before the other meals of the day or before retiring at night.—Rochester Times.

Success is a cocktail composed of equal parts of backbone and cheek.

The berry season is over, but that doesn't effect the undertaker's business.

Fascinating sports hats are seen this fall in lovely fawn and tan shades, enhanced in a very new form of trimming. The crown, which varies in shape, is beautifully embroidered, the design forming a landscape. Pastel shades and other colors are introduced to make the scenes more realistic.

NORTHEAST PASSAGE.

Only Two Expeditions Succeeded in Getting Through It.

Most attempts of European countries to find a comparatively short passage from the Atlantic to oriental countries were by way of the northwest passage north of America, because, after the first tries the northeast passage, north of Europe and Asia, and in [illegible] having most Arctic [illegible] failing, they concentrated attention upon the northwest passage as promising more favorable.

Practically all the Arctic researches from Sir John Ross to Sir John Franklin were fitted out mainly to find the northwest passage. The passage was found during the search for the lost party of Sir John Franklin, but it was never traversed by a ship till Amundsen took his little Gjoa through it in August, 1905.

The attempts to make the northeast passage began with the Dutch navigator Barentz in 1595, whose party was the first to spend the dark winter in the Arctic in most great cold and extreme misery. The only achievement of the northeast passage prior to Vilkitski's success in 1914-15 was by Baron A. E. Nordenskjold, who sailed from Tromso with his Swedish expedition in June, 1878, triumphed over the great obstacle of Cape Cheliuskin and was within 120 miles of Bering Strait when winter closed upon him. He entered Bering Strait in July, 1879, thirteen months after the time he sailed.—Cyrus C. Adams.

Conscription

(St. John, N. B., Telegraph.)

Before conscription of man power in Canada there should come, if such were possible, conscription of thought. If the whole attitude of the public mind were properly directed there would be no need for the compulsion of young men to the colors. The voluntary system, confined to the mere recruiting of men falls down. Let it be carried into the daily life of every citizen, man and woman, rich and poor alike, and it becomes a triumphant moving force. The rudder, represented by the brains of our leaders, directs the ship, but the motive power is supplied by the rushing winds which fill the sails, and can be compared to the spirit of the people. Canada has not yet poured out the Pentecostal gift which will fill our young men with a vision of glory and of ultimate gain in sacrifice.

Civilian advocates of conscription would compel young men of military age to make the supreme sacrifice, but unless they have sons at the front, what have they done or what are they preparing to do that really hurts?

No, it is not among the impecunious that the slackers, so called, are found, but among young men of a better class who are getting along, a little in the world and see some hope of rising above the mass. Their foothold in business perhaps or in their profession is not a firm one, and they have not yet been made to realize that service under arms for their king and country is an advancement rather than a retrograde step. The public has not yet made it clear that positions of preferment will be closed to the men who have not done their part. These are the very men who should be serving in the ranks, as usually they leave something besides the bare soldier's pay and allowance. The head of or a partner in a paying business can much better afford to go than the driver of his delivery wagon or his married bookkeeper. Conscription would get these men, the advocates say, yet is it not the better way to turn their own inclinations towards enlistment by arousing the public consciousness to the point where young men and any man under 45 is a young man for purposes of enlistment—must feel that to succeed in life they must don the khaki.

Family by family—for hundreds of young men with brothers on the firing line are burning with patriotic zeal—must rightly find their highest duty at home. The men of to-day should be honored, and for the family which fails there should be no place in the newer and greater Canada, founded on the sacrifice of those who have answered the call. Right now the mother of two or three sons, none of whom has made any move to enlist, should be made to feel that she should be wearing crape, deep and heavy, rather than the mother next door whose only son perhaps has fallen on the field of honor. The father with ambitions for his sons should be made to feel that their best chance is on the field beneath the banner of righteousness and of victory rather than in the college cloister or in apprenticeship to trade or business. If young women should remove from the ranks of eligible suitors those not in khaki clad then much will have been accomplished in securing this public recognition that award of life and death for Canada and for the British Empire, for humanity at large is being waged.

They caught this spirit in England, but not until after months of war, Zeppelin raids at their very doors, the slaying of women and children by bombardment of defenceless coast towns, the sight of wounded filling the streets, mourning in every home in some villages when battalions representative of those sections were wiped out—all these brought home the seriousness of the struggle to the motherland and made enlistments about seven per cent. of the population before it was necessary to apply conscription to bring in a class of which fortunately we have few representatives in Canada.

The great middle class in the old country gave freely of their men under the voluntary system and the laborers held back. Here it has been the other way around, and when the public intelligence grasps this fact and these young men whose chief task now is getting along in the world realize what is expected of them, then one will hear less about conscription. A more vigorous government leadership, the development of the halting, half-baked registration scheme, more fire and dash and inspiration in the utterances of the members of the Cabinet, for almost without exception they have been as dumb as oysters or as dry as dust, a more complete and realistic report of what the Canadians are actually doing at the front, consistency and continuity in the authorization of battalions, their quartering and despatch to the front, and, above all, a more general public recognition of returned soldiers should help to lessen the necessity of conscription.

We are all apt to sneer at luck, especially if it comes to other people.

The Joy of Home Leave

(By a Private in the London Daily Mail.)

"You're wanted at company office," said the orderly, with a broad grin. And immediately my heart began to thump madly and my face flushed and a smile came into my eyes. I tried to look as if I didn't care, but I couldn't [illegible]

I felt as every [illegible] when he is told "You're for [illegible]."

THE GREAT CHANGE.

Only once before in my life have I been so happy. Try to imagine it—from standing in a trench, dodging trench mortars and minenwerfers to a sunlit, empty English road; from standing on sentry, worn out and so tired that snipers' bullets have no fear, to a luxurious bed, with warm, soft clothes and no "stand-to"; from cold tea and jam full of earth and white bread made brown by clayey fingers, to silver and serviettes and sweet, fond womenfolk to attend you; from the middle of death and the life of beasts to home. Oh! but you cannot imagine it! Nor could I. I could only think about it and smile and smile, and reflect on this most wonderful truth in the world's greatest war—the shift in a day from the environs of death to all that spells Heaven.

In its own inimitable way the army exasperated even the thousand or so happiest soldiers alive. At the coast town, while we were buying tea and sandwiches at the coffee-stall on the quay, officials began shouting, "Hurry up now, or you'll miss the boat," and, leaving the tea I had just bought, I hastened off. Lined up farther along we learned the boat was not timed to go for four hours, and we were not allowed to leave to buy more food! Again, at Victoria, when we waited in long queues to change our French money at the bureaux, we were told, after maybe one-tenth of us had been dealt with, that there was no more money! Not an English penny had we to procure a meal, a wash, send a telegram, or pay an omnibus fare. Fortunately I contrived to change mine at the booking office, but they must have known we were coming—they must have had a rough idea of the amount of money we should want to exchange, yet the great majority of us had to leave the bureaux run by the War Office and get our notes changed as best we might. But it was here, too, that I found the noble spirit of the new England.

SOME KINDNESS.

As we stood in the queue a man with white hair, immaculately dressed and carrying an "A B C" railway guide, came along. In a second he was busy telling the men the times and station for Glasgow, Newport, Birmingham, York; how to get to St. Pancras, Euston, King's Cross, the quickest, cheapest way. He was so helpful, so quick, so kind, so affable! And he had hurried from his office to do this, to give the lads a lift. "Good old Blighty!" said someone, huskily.

* * * *

And now I began to taste real joys I rang a friend up on a telephone. "Is that So-and-so?" I said. I could hear the familiar, calm, strong voice, and then, as I said, This is ——," as if I had been saying, as in the old days, "See you at the club," I felt the little moment of silence and surprise as the news sank in.

Next I walked to the taxicab ranks and looked at them. Any one of them I could have to carry this old rifle, accursed equipment, these poor old feet that had been slogging along for four months. I nodded to one and it gurgled and whirred and sidled up. I flung in my rifle, said "Euston," clambered in and sank back. Oh, but it was heavenly! This after carrying planks when waist deep in water; this after carrying ninety pounds of equipment to and fro for an age. And it was just taking me—nobody else in the world—whither I chose it should go. Aladdin never commanded his wonderful lamp with more delight than I my first taxicab.

THE TELLING.

At Euston I left my kit and washed and was shaved. Delicious warm water—heaps of it, and then to lie back and feel the keen blade running softly over my face! Ah, but men are luxurious beasts! Then to the buffet with tolerable clean fingers and brushed hair—not for four months had my hair known a brush—to eat the buffet ham that once was so tasteless and that now was delicious. And then by tube to my friend's office. Great joy that, too, to talk about trenches, and the grim humor of dodging mortars and falling over one's own feet so doing, and to laugh over it, and to tell what wonderful, glorious lads are those out yonder.

But all these joys, great as they were, were as nought compared with meeting one who would rather return to France in my stead than I should go.

* * * *

But now, if I must say what is most wonderful about leave, I should reply it is the speed with which one ceases to notice domestic comforts. After the first day baths and easy-chairs and the rest were commonplace. The joy of sleep in bed lingered longest. The comfort and culture of twenty years is not easily stamped out by a few months' hardship, and I would assure my friends in France that they will have no difficulty in curbing their tongues. I only swore once, I think, before women though my friends tell me I am a little blunter than I used to be. Maybe.

* * * *

I am lying on a hillside watching the sea lazily roll itself up a sandy beach. The sea is asleep in the warm sunlight, and the wind that sighs in the sparse trees is too loving to do more than kiss the waters into ripples. No sign, no thought of the war that is just across these waves. Ah! for peace and leave eternal!

The woman who claims to know the most about how to raise children usually has none of her own to practice on.—Los Angeles Times.

BURDOCK BLOOD BITTERS CURED DYSPEPSIA.

Unless the stomach is kept in good shape your food will not digest properly but will cause a rising and souring of food, a feeling of rawness in the stomach, pains in the stomach or a feeling as if a heavy weight were lying there.

Burdock Blood Bitters cannot be surpassed as a cure for dyspepsia and all its allied troubles.

Mr. James R. Burns, Balmoral, N.S., writes: "About two years ago I was badly troubled with dyspepsia, and could not get any relief. I tried most everything, not even the doctors seeming to do me any good. One day a friend told me to try Burdock Blood Bitters, as he had seen it advertised. I did so, and by the time the first bottle was gone I felt better, and after taking three bottles I was completely cured. I highly recommend it to all sufferers from dyspepsia."

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

TORONTO.—Both retail and wholesale trade continues active. Indications point to a continuance of present conditions for the rest of the year. An active retail business is passing in drygoods, boots and shoes, millinery, hats and caps and groceries. Drygoods are moving out as fast as they can be secured, and prices keep getting firmer. The fall payments were more than usually good, with Monday and Tuesday of this week being especially good days. Leather prices were raised from 6 to 8 per cent at the beginning of the week, and sole leather is particularly firm. Payments are reported to be good.

MONTREAL.—Wholesalers are busy in sorting orders, and spring orders now being sent in by travellers are in fair volume, even in the face of advancing prices. Prices for some lines of drygoods have been withdrawn for future delivery. Groceries are fairly active. Retailers report that business is good in practically every line, and country trade is measuring up fairly well. The prospect for the Christmas trade is very bright. Some wholesalers say collections might be improved, but they are generally reported to be good.

OTTAWA.—Both wholesale and retail trade is active. There is a strong demand for seasonable lines of drygoods, and woollens especially are scarce and higher. The volume of orders for winter trade is reported to be satisfactory, and spring orders are being taken that ensure a lively business.

HAMILTON—The autumn trade is keeping well up to the expectations of those who anticipated an active distribution of goods, and this week's business measures up to the best of the preceding weeks this fall. The movement of labor from country to city is relieving to some extent a situation that is still acute. Drygoods, boots and shoes, and groceries are active, and in consideration of the present situation, men's wear is very active, and some wholesalers report these lines are better than women's goods. Prices for Ontario wheat are still rising, going to high levels for the season this week. Millers did not do a great deal of buying of Northern wheat on account of the rising tendency on Western markets.

LONDON.—Retailers and wholesalers alike are well satisfied with the autumn trade they have experienced thus far. There is a general feeling of confidence among wholesalers and jobbers, and orders are being received in good quantities. Money is fairly plentiful, and payments are reported to be quite good.

WINNIPEG.—Unfavorable weather is interfering with the threshing of a large part of the grain yield throughout the West. The business situation continues to be quite good, and there is an active distribution of goods for winter needs, while spring orders are coming in, in good quantities. Money seems to be fairly plentiful, but unless the weather improve rapidly, threshing of much of the grain crop will have to be held over until next year, and this will make the Western farmer short of money.

CALGARY—The labor problem in connection with threshing is worse than earlier in the season, and with only a minor portion of the work done help is very scarce. The yield measured up better in most districts than was thought possible two months ago. Business generally is fairly active, especially for clothing, boots and shoes and groceries.

VANCOUVER.—Mercantile business is good. Mining and lumbering are showing rapid progress among the industries. Ship-building is being pushed expeditiously. Money is fairly plentiful and collections are moderately good.

QUEBEC.—Business continues satisfactory. Wholesalers are satisfied with the turnover at the season. Among the retailers dry goods report favorably. Industrial conditions are unchanged, manufacturers in all lines are busy. Activity is prevalent in the grocery and provision trade. City and country collections as a rule are fair.

Johnny Obeyed.

The schoolmaster possessed a very short temper and became extremely irritable when not obeyed at once.

He was hearing the reading lesson, and Johnny was getting along famously until he came to the word "barque," when he halted.

"B—b—b—ba—" stuttered Johnny.

The master sharply said:

"Barque, boy; barque."

Johnny glared at the master with a look of perplexity on his face, and the master's temper rose.

"Barque, boy; barque," he roared.

Then Johnny, with a pitiful expression on his face, replied:

"Bow—wow—wow—wow!"

Nearly Lost Little Girl from DYSENTERY

She Was Cured By Using DR. FOWLER'S Extract of Wild Strawberry.

Dysentery manifests itself with varying degrees of intensity, but in well marked cases the attack is commonly preceded by loss of appetite, and some amount of diarrhoea, which gradually increases in severity, and is accompanied with griping pains in the abdomen. The discharges from the bowels succeed each other with great frequency, and the matter passed from the bowels, which at first resemble those of ordinary diarrhoea, soon change their character, becoming scanty, mucous or slimy, and subsequently mixed with, or consisting wholly of, blood.

Never neglect what at first appears to be a slight attack of diarrhoea or dysentery may set in. Cure the first symptoms by the use of Dr. Fowler's Extract of Wild Strawberry.

Mrs. John Peterson, Radville, Sask., writes: "I cannot speak too highly for Dr. Fowler's Extract of Wild Strawberry. I nearly lost my little girl, aged three years. I took her to the doctor, and he told me her temperature was 104, and forbid me taking her out to our home, six miles from town, but I was forced to go on account of leaving my small baby home. We managed to get her home, but the fever did not go any lower, and we thought we would lose her sure, as she was so bad with dysentery she even passed blood. A neighbor came in and brought Dr. Fowler's Extract of Wild Strawberry, and told me to give her a few doses. This we did, and the next day she took a change for the better, but it was quite a time before she was on her feet again. I do believe if it had not been for 'Dr. Fowler's,' my little one would have died."

The genuine "Dr. Fowler's" is manufactured only by the T. Milburn Co., Limited, Toronto, Ont. Price, 35 cents.

SHALL we tackle cheers Borden and Hearst?" asked a man in the front row of the Ward Six Conservative Association in Toronto. "Don't chance it," came back the reply in a whisper, followed by, "We will close this meeting with the National Anthem" from the chair. Thus is the story of the downfall of Toryism being told.

+ + +

EVERY time you send an order to the mail order house, instead of buying from the local merchant, you help to increase your own burden of taxation and help to pay city taxes: you assist in the movement of population from the town to the city; you give your own town a knock which comes back at you later in the way of bad times, high taxes and decreasing population. Then you find fault with the conditions your own action helped to create and move to the city yourself. Stay at home, work at home whenever you can, buy at home and have a home.

+ + +

OLD Country newspapers are carrying advertisements of oleomargarine at 11 cents and 24 cents a pound, made from choicest nuts and milk. If this is allowed to be sold in Britain, it would not seem to be bad for the Canadian consumer, and it is not much more than half the price of butter. If all that is printed about oleomargarine as it is manufactured and sold in Britain is true, the least the Dominion Government could do would be to make some inquiries into the subject and have the prohibition of the manufacture and sale here removed, if these are correct.—Stratford Beacon.

+ + +

A LIVELY incident is reported on good authority to have taken place on the train between Harriston and Mount Forest on Saturday week. A farmer was somewhat loudly boasting of the prosperity of his calling in these war times with their big prices. "Just let this war continue a while longer and we farmers will be on our feet!" At this point a little woman who had been listening arose in her wrath, and swish! bang! biff! baff! came down her umbrella on the devoted head of the farmer. "I have two boys at the front," she remarked, "and I just couldn't stand that kind of talk any longer." There was no more of it there.

IT is no longer necessary for the man who forgets to kneel down when he goes to church to smear his Sunday trousers with dust before returning home to his beloved. But here and there in country places and in mission chapels men still kneel in reverent meekness while engaged in public worship. There are reluctant to give up the forms and postures which were indispensable in the days when their own strong character were formed. Many smile at these old fellows, but they admire and sympathize while they are amused. But all the people understand that in the great spiritual fishing grounds, the stubborn old fellow with the dusty trousers is the most likely to catch fish.—Port Rowan News.

+ + +

THE merchants of Huntsville have done a sensible trick. They have tied up in knots, metaphorically speaking, of course, the housewives who will have no consideration for delivery boys. There as elsewhere the practice of rushing down town on Saturday nights after tea with pt and ordering a few groceries here, a little meat next door, and a box of matches at another place and having deliveries from all, had reached such a stage as to become an abomination. The merchants had to stop it and they have done so. Now, all orders for delivery must be placed in sufficient time to permit the messenger to complete his work before six o'clock. The new order has been in effect a short time and already housewives have discovered that it is just as easy to do their delivery shopping earlier as it was before up to ten o'clock at night. Huntsville's example is worth following in other places where the any old time practice is the order.

• • •

ALTHOUGH many extra demands were made on the Town Council this year, it was spared being asked for any direct contributions to the Patriotic and Red Cross Funds. We believe that another year the Council should be asked to contribute a large portion of the amount required. The moral obligation to give is equal upon all citizens, and yet this year's experience shows that a good many people who are able to give, contribute nothing. The only way these citizens can be got at is through the local taxes and we believe the Council should use this means of making every citizen a contributor according to his means. This would not remove the privilege of personal giving and of course a great many people will continue to give generously, no matter whether the Council contributes for them or not. With the municipal finances in the good shape they are in, the town council could afford to contribute liberally to both Patriotic Fund and Red Cross next year and still keep the taxes within reasonable bounds.

+ + +

THE Owen Sound Times asks the very sensible question: "Why should the rural school be designed by its number in the same way that convicts are recorded in penitentiaries?" Then it proceeds: "This is a question that has been asked different times and gives rise to the suggestion that every rural school should have a designating name which would represent the neighbourhood in which it was located. A few of the school-houses throughout the country sections have received this designation, but really has no distinctive application. For instance, take Brown's school-house in Sarawak. Without any suggestion of reflection on the persons after whom it was named it would really lose its distinction by the fact that families move and people lose sight of the origin of the school family names in the natural course of events. Every school-house should be the centre of a community and that community should have a name just as every village has its name." The idea is worth consideration by our friends in the rural districts.

+ + +

NO less than ten Overseas units are quartered in this District for the coming winter. A large number of recruits are badly needed to complete these units and there is need of a more ready response if these units are not to be unnecessarily held back from Overseas. The units are:—

118th Batt'n, Waterloo County, quartered at London, present strength 581.

122nd Battalion, Muskoka, quartered at Galt, present strength 771.

149th Battalion, Lambton, quartered at London, present strength 731.

153rd Battalion, Wellington, quartered at St. Thomas, present strength 792.

186th Battalion, Kent, quartered at Chatham, present strength 678.

241st Battalion, Essex, quartered at Windsor, present strength 158.

A. M. C. Training Depot No 1, Middlesex, quartered at London, present strength 125, number required 212. Drafts are constantly called for from this Depot.

63rd Depot Battery, quartered at London, 300 men required.

64th Depot Battery, quartered at Guelph, 300 men required.

C. A. Dental, Detachment, London, present strength 17.

+ + +

FEW, if any, municipalities in Ontario have their municipal finances in as good shape as the town of Walkerton. The report of the Ontario Bureau of Industries shows that no town of the size, has so small a debenture debt ($44,000). And the town has assets worth several times this amount, represented by a sewerage system, a good waterworks plant, a commodious Town Hall, many miles of granolithic sidewalks, and other lesser assets. The present Town Council also has its finances in good shape, considering everything, and has managed to keep the tax rate down to a point which is equalled by few other places. Two extraordinary expenditures alone, the fixing of the Town Hall ($1500) and grants to the 160th Battalion ($1138) meant nearly 1½ mills in taxes and yet the Council has kept the rate within reasonable bounds. For the town's good financial showing a good deal of credit is of course due to the Town Finance Minister. Reeve Alex McNab has had charge of the town's finances for several years and his good work has already brought forth fruit. Alex's middle name is Careful, and without being parsimonious he has certainly been a champion husbander of the Town's resources.

+ + +

WHY is it that all over Canada the great bulk of voluntary giving is being done by the people living in towns and cities? Is it because they are any more patriotic than farmers? We cannot believe it. Possibly it is because the rural sections are lacking in organization and leadership. At any rate we cannot dispute the fact. Take the Trafalgar Day Canvass for instance. Possibly Walkerton, which had just come through the throes of a joint Patriotic and Canadian Red Cross Canvass, made the poorest showing of the Bruce towns on Trafalgar Day. Compare Walkerton with the Township that gave most of all—Greenock. Greenock expects to contribute 1 mill by taxation, $1800. Walkerton contributed $1400 by personal canvass, or more than 2 mills. And what shall we say of Kincardine which contributed over $3500 or possibly four mills. Kincardine gave $1.50 a head, a good many towns did even better. Greenock our most generous township, will give 60c per head. When one considers that the farmers are doing better now financially than they have done for years, and that a great proportion of town dwellers are harassed to make ends meet under present conditions, we could wish that the voluntary givings were better proportioned.

THE HIGH SCHOOL REPORT

Standing Of The Students At Walkerton H. S. For The Month Of October.

Below are given the results of the weekly examinations held during October. The names in the various classes are given in order of merit. For honors 75 per cent is required, for pass 60 per cent, these percentages being the standard on the aggregate for all Departmental and Matriculation Examinations. When figures are given, they denote percentage.

FORM I.

Subjects:—Mathematics, Geography Grammar, History, Science.

Honors:—F. Garner, S. Grenzebach, S. Bremmer.

Pass:—J. Norrish, C. McNab, H. Thompson, M. Pinkerton, F. Young, L. Hergott, I. Moore, N. Shaw, A. Condy, G. Henderson, G. Ellis, S. Reichenbach, F. Brockelbank, G. Van Horne, L. Elder, C. Attwood, L. Wallace, G. Lambertus, J. Kenny, E. Geisler, A. Chisholm, W. Inglis, N. McCarter.

Below Pass:—F. Meagher, A. Waechter, A. Lambertus, E. South, J. Bruder, L. Bryce.

FORM 2.

Subjects:— Grammar, Arithmetic, Art, Geography, Algebra.

Pass:—W. Ramsey, N. Lay, F. Myles, G. Young, L. Yack, A. Weiler, N. Pinkerton, W. Pulfuss, M. Kenny, E. Lindsay, M. Bonnyman, L. Bilger.

Below Pass:—B. Farewell, E. Stevens, I. Wisser, T. Queen, C. Wilton, A. Reinhart, E. Ramsey, V. Eidt, F. Scherrer, G. Hilbert, B. Moore, E. Milhausen, S. Taggart, H. Irwin, J. Michell, M. Chisholm, M. Wilson, S. Brockelbank, D. Kenny, H. Johnston, W. Small.

FORM 3.

Subjects:— Science, Composition, Geometry, Literature, History.

Honors:—F. Taylor, W. Wilson, A. Tolton, L. Bilger, A. Pinkney.

Pass:—A. Garland, G. Seigner, E. Bilger, A. McCool, L. McConnell, G. Lewis, O. Pfohl, M. Chalmers, J. Chalmers, L. Bette, M. Forsythe.

Below Pass:—M. Baechler, B. McCool.

Special Course:—E. Glave 62, V. Tovell 59, C. Tovell 56, C. Cargill 44.

FORM 4.

General Subjects:—History, Zoology, Botany, Latin.

Special Subjects:—German, Algebra.

Honors:—C. Fortune.

Pass:—S. Bush, M. Weiler, M. Green, J. Wells.

Below Pass:—C. Thornburn.

German:—S. Bush 56, C. Fortune 53, M. Weiler 46.

Algebra:—J. Wells 81, M. Green 58.

A few days ago some young boys from the village took a stroll out into the country, taking rifles, and hunting for something to shoot. Not finding any rabbits or squirrels, they proceeded to have some fun with a cat, which they tied onto a fence. When the owner found it he counted many bullet holes in it. It may have been fun for the boys, but not for the poor cat. The case will be reported to the Society for Prevention of Cruelty to Animals and after the perpetrators of the inhuman act have spent a term in jail they will likely have a little kinder feeling for domestic animals.—Streetsville Review.

Mr. and Mrs John Butchart of Eden Grove arrived home recently from an enjoyable visit to the West. They went as far west as Empress, Alberta, visiting relatives and friends at intervening points. At Pense, Sask., they visited at Mr. George Wilson's formerly of the Grove. In Manitoba they visited Mrs. Butchart's sister, Mrs. Andrew Watson at Elgin, Man. and her brother, Mr. Thos. Alexander, near Deloraine. They state that the black rust was responsible for great destruction in Manitoba. Their son, Ernie, is farming in a good district at Alsask, Sask. Crops were good there but a great deal will not be harvested at all owing to the bad weather. Potatoes are a good crop at most points through the West.

WHEN TO STOP ADVERTISING

An English journal requested a number of its largest advertisers to give their opinions concerning the best time to stop advertising, and the following replies were received:

When the population ceases to multiply, and the generations that crowd on after you and never heard of you stop coming on.

When you have convinced everybody whose life will touch yours that you have better goods and lower prices than they can get anywhere else.

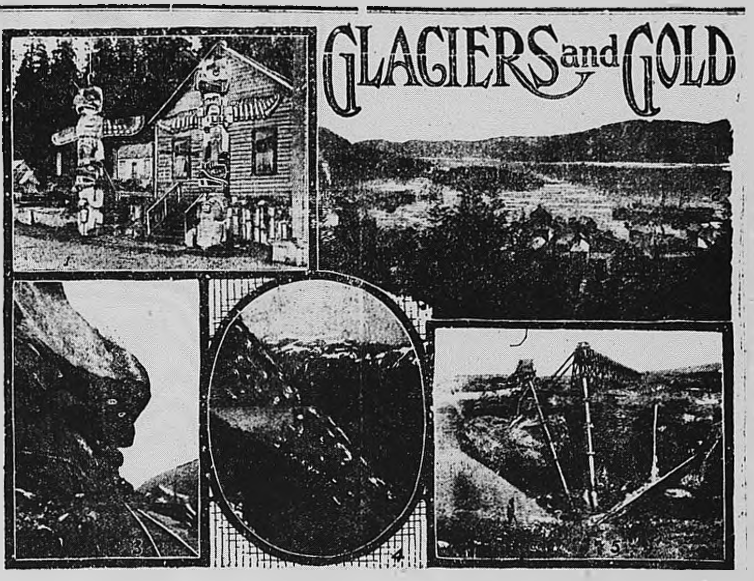
When you stop making fortunes right in your sight solely through the direct use of the mighty agent.

When you can forget the works of the shrewdest and most successful men concerning the main cause of their prosperity.

When younger and fresher houses in your line cease starting up and using the newspapers in telling the people how much better they can do for them than you can.

When you would rather have your own way and fail than take advice and win.

GLACIERS and GOLD



(1) Totem Poles. (2) Wrangell, Alaska. (3) Hanging Rock. (4) Near Glacier, Alaska. (5) Hydraulic Lift at work below Discovery, Glacier Creek.

ATTU ISLAND, Alaska, is farther west of San Francisco than that city is west of Eastport, Maine. To the average American or Canadian the very name is synonymous with gold and glaciers, but of the country itself he knows less than of any other spot on the continent. He doesn't realize that Alaska contains fiords equal to those of Norway, that Alaska contains more than two hundred immense and unmatched glaciers, some of them near neighbors to active volcanoes, such as Wrangell, whose smoking summit forms the eastern end of a chain of living and dead lava peaks a thousand miles long. Nor does he realize the climatic variations that are to be found in Alaska, where the coldest month of Sitka is no colder than that of St. Louis, the warmest months of San Francisco and Juneau are of identical record; and yet Point Barrow, on its northern fringe, is 300 miles within the Arctic Circle and has no sun for forty days out of every year.

Leaving Vancouver in a comfortable Canadian Pacific "Princess" steamer, the traveller wakes next morning to his first view of the typical and wonderfully beautiful scenery of the solemn fiord country. Seymour Narrows ushers him into smooth, island-dotted waters that lead to Alert Bay, where he may see fifty-foot totem poles and a modern hospital by the cedar lodges of the Kwatiutls.

At evening time Queen Charlotte Sound is reached and for the first and only occasion during the trip the vessel rides open water while the whale spouts in the offing and the basking shark lies in the last sunshine.

River Inlet, Namu, Bella Bella, Milbank Sound, Finlayson Channel, they all slip by in the night as the ship steams northward. Morning brings Swanson Bay, where there is an immense mill turning Douglas firs into paper pulp.

At the mouth of the Skeena a fleet of salmon boats is encountered and passengers leave for many points on the river, which is navigable for 180 miles.

Cape Fox marks the southern point of Alaska and soon Ketchikan is reached, a modern town solidly planted on the most difficult of hilly ground. Copper has made Ketchikan, but the tourist will perhaps be more interested in the vanishing Indian with his woven baskets than in the advancing miner.

Wrangell Narrows is a fascinating and pulseless shadowland, where the vessel goes too slowly through the widening channel to break the reflection of the midnight sun in the solemn northern waters. At the end of the passage glaciers are sighted for the first time. These huge and awe-inspiring ice are characteristic of Alaska. In Sumdum Bay a hundred or more may be seen along the walls. The scenery is of the wildest description and the plunging bergs keep the fiord roaring like some vast foundry of the gods. Farther north, the Taku Glacier stretches a mile wide along Taku Bay, the largest of forty-five ice streams emptying their gorgeous colored bergs in the path of the steamer.

At the bottom of a sheer 3,000 foot mountain, Juneau has ensconced itself as the capital of Alaska, and is a well built city, although there couldn't be found a naturally level spot on which to place a single large building. The townspeople are up-to-date, phenomenally healthy and entirely sane despite the rush created part of the district and its present dependence on gold mining.

After leaving Juneau there is an all day trip up Lynn Canal to Skagway, the end of the journey and the best-known town in Alaska. In the wild days of '98 Skagway was the door through which all trail-hitters struck for the gold fields, taking the line of the present White Pass & Yukon Railway. The Canadian Pacific steamers remain long enough for the passengers to take the road as far as White Pass, or up to White Horse, if a sufficient number wish to explore the dizzy peaks, the terrific gorges and sounding glaciers of the north country. The round trip from Vancouver lasts nine days.

Three Special New Victor Dance Records

TROT THREE STEP TANGO

Lively, Tuneful Selections—Enjoyable both to those who dance, and to those who "sit out."

Our Inventor's Adviser sent upon request. Marion & Marion, New York Life Bldg, Montreal; and Washington, D.C., U.S.A.

HEALTHIEST ONE IN THE FAMILY

No Sign Of Dropsy And Kidney Trouble Since Taking "FRUIT-A-TIVES"

HATTIE WARREN

Port Robinson, Ont., July 8th, 1915.

"We have used "Fruit-a-tives" in our house for over three years and have always found them a good medicine. *Our little girl, Hattie, was troubled with Kidney Disease.* The Doctor said she was threatened with Dropsy. Her limbs and body were all swollen and we began to think she could not live. Finally, we decided to try "Fruit-a-tives". *She began to show improvement after we had given her a few tablets.* In a short time, the swelling had all gone down and her flesh began to look more natural. Now she is the *healthiest one in the family* and has no signs of the old ailment. We can not say too much for "Fruit-a-tives" and would never be without them".

WILLIAM WARREN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Richard A. Schuett

Contractor in Painting and Decorating

No Jobs too large or small. All First Class Mechanics. Real Graining—close imitation of natural wood my specialty.

GIBSON ST. WALKERTON, ONT

POETS' CORNER

THE "ISTS"

Mother is a suffragist—
She states the fact with pride;
A motorist is father,
And travels far and wide:
Big sister Julia laughs at care
An optimist is she,
While Brother Will's a Socialist—
He's for Equality.
Wee sister's a somnambulist—
She walks 'round in her sleep;
And Cousin Nell's a futurist—
Her pictures make you weep.
My Uncle Jim's a pessimist,
Whose croaking never ceases;
And Uncle Ike's a specialist
In brain and nerve diseases.
I guess I'm 'bout in all the list;
But when I'm grown I'll write my name
"Ted Jones, a farmist."

News About Town

Christmas falls on Monday this year.

Easy on the butter, kids! It is 40 cents a lb.

Only about six weeks more until Christmas.

For good printing, ring up 48, Telescope Job Dep't.

In 1858 Walkerton had a population of 175 and a bi-weekly mail service.

The influence of a man does not depend upon his position, but upon his character.

An Owen Sound man claims to have been enjoying ripe strawberries fresh from his garden since July.

Mr. and Mrs. H. Lamont of Lovat received word of the death of their second son, Lewis H. Lamont, at Willowbrook, Sask.

Who was it said "Hitch your waggon to a star"? "Oh, some motorist who didn't want to lend another a little gasoline, probably!"

Sunday was Educational Anniversary at the Methodist Church. Rev. Lloyd Smith, one of the most promising younger men in the church, presented the claims of Victoria University at the evening service. The subscriptions for Education exceeded last year's by fifty per cent.

The Formosa Mutual Fire Insurance Co., is nearing the end of another year's business, and the policy holders will be glad to know that the Company's losses have been lower than usual, and the number of policies issued has increased materially over former years. This Company is becoming one of the safest insurance mediums in Ontario.

The seed grain situation in the west is beginning to attract some attention. In many parts of Manitoba and Saskatchewan this year's crop was almost a total failure. Beyond doubt there will be some applications to parliament for wheat from farmers deserving of help, but it now transpires that of the $11,000,000 loaned to the farmers in the shape of seed grain, fodder and other supplies in 1911 only $2,500,000 has been repaid. In the meantime a lien remains on the land and two year's interest is added for default.

From week to week questions political and otherwise, of the utmost importance to the farmer are coming to the front. These questions are in many instances permitted to pass without comment by some newspapers for political reasons. That old and reliable friend of the farmer, The Weekly Sun, does not allow any questions affecting the farmer or his family to pass without comment. You may not always agree with opinion, but the Sun being free from party or political control gives its readers an unbiased opinion on all questions. These opinions are always worth reading, while the Sun's market reports have long been considered most reliable from the farmer's standpoint. Are you reading this exponent of your interests? If not, you are missing many good things each week. You will find the Sun instructive and profitable reading. (Advt.)

Oil At Flesherton

Flesherton is having a miniature oil boom. A local well-driller claimed to have found evidence of oil in a deep drilling he had made, and submitted samples for a test, which indicated the genuineness of his discovery. Little was thought of the alleged discovery at first, but individual residents quietly secured options on a large area in the vicinity. A rumor that Oklahoma experts will begin drilling at an early date has been circulated.

+ + +

Appointed Judge

Mr. John M. McNamara K.C. an old Walkerton boy, has been elevated to the Bench. A despatch from Ottawa on Friday announced his appointment as County Judge of Renfrew. Mr. McNamara who is a prominent lawyer of North Bay, is a brother of Mr. L. A. McNamara, Collector of Customs. Immediately on graduating from Osgoode Hall about thirty years ago, he hung up his shingle in that embryonic town and grew up with the place. He gives up a very large law practice but will no doubt welcome the more reposeful life of the Bench. The appointment will mean his removal from North Bay to the town of Pembroke.

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF $500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

Mr. Robert E. Cummings of Toronto was here on Thursday attending the funeral of the late Joseph Carbert.

The leading Catholic paper of France recently published a list of the priests and religious killed in the war. It contained 1,250 names.

The Bentinck council will meet at Lamlash on Saturday, for the purpose of finally passing by-law and signing agreement for the installment of the hydro electric light in Elmwood.

Guy Bros. played here to a pretty good house last Wednesday night. This old time minstrel company keeps up a pretty even standard of entertainment from year to year. The Guys report the show business good throughout the country just now.

One day a keeper of an insane asylum was out walking with a number of harmless inmates and the party met a pedestrian not far from the railway tracks. The traveller asked one of the lunatics, "Where does this railway go to?" The lunatic surveyed him scornfully for a moment, then replied: "Nowhere. We keep it here for trains to run on."

+ + +

Back On Duty

Mr. C. W. Cryderman received a cablegram from his son, Wilbur, last week stating that he was back on duty in the hospital at Salonika after his three months' illness with dysentery.

+ + +

Incendiary At Paisley

A proclamation issued by Reeve Ballachey of Paisley prevented any serious pranks on Hallowe'en but some one out of spite set fire to Mr. Ballachey's summer house, causing a loss of $1,000. A determined effort will be made to discover the culprit.

Some Apple Tree

An apple tree in Norfolk County is 128 years old according to the Port Rowan News. The News says the tree is possibly 75 ft. high, is 12 ft. 4 in. in circumference as high up from the ground as a man can reach. It is a healthy tree and had a lot of apples on it this year.

+ + +

Teeswater's New Industry

Teeswater's new lime industry will soon be going full swing. The Toronto Plaster Co. is building three kilns with a capacity of ten tons each. The buildings will be 40 ft. by 88 ft. and the kilns 40 ft. high. The Hydrated Lime, which will be manufactured, is ordinary bulk or quick lime slacked by the addition of water to a powder. Should the plant turn out as anticipated, more kilns will be added, and Teeswater will have a plant with a capacity to control the hydrate lime market in Canada.

+ + +

Sportsmen And Booze

How is the new Ontario Temperance Act going to affect transients going north for shooting this fall? In the past they have each been able to carry at least one "hipper," besides a trunkful of joy water, if they so desired. Prohibition has done away with all this, however. It is claimed that the new act will not allow any person to carry one single "wee drap" into the north woods, let alone a large quantity. Police Magistrate Denison, of Toronto, claims that it is a violation of the law to carry any bottle that contains a greater amount of "live stuff" than regulation 2½ per cent.

CARGILL RED CROSS

The following is the list of contributions collected here by Messrs. Clancy and Ziegler for the Red Cross Fund, and they wish to thank their donators for their generous spirit and if they have overlooked any it is not too late and the funds will be welcomed by the ladies who are worthy of it as the work they have done since organizing is to be commended. The list represents only that part of the village in Brant township and is a great showing for our small burg which is always ready to do its bit. The last four donations are from farmers of Brant who recognized the cause and who responded without solicitation.

Jno. Clancy $25.00; M. D. Ziegler 15.00; Harvey Grice 15.00; Wm. Mathews 11.00; R. A. Fowlie 11.30; George Sferr 10.00; J. T. Clancy 10.00; F. F. Baledon 7.50; Chas. Kyle 6.00; J. W. Raeburn 5.00, Rev. Mrs. Almack 5.00; Mrs. Powers 5.00; C. W. Keeling 5.00; E. A. Ruttle 4.00; Miss G. Keeling 4.00; Public School Pupils 4.25; Mrs. M. Bell 3.00; I. Chambers 3.00; G. F. Saunders 3.00; Mrs. E. D. Baillie 2.00; J. D. Schuett 2.00; A. J. Hanmore 2.00; Wm. Meyer 2.00; Geo. Schrum 2.00; F. L. Martin 2.00; Mrs. C. Hamilton 2.00; Miss F. Newman 1.00; Frank Massel 1.00; Dr. Bricher 1.00; Jas. Napper 1.00; Rev. J. H. Homer 1.00; F. H. Smith 1.00; M. A. Bester 1.00; F. McWhinney 1.00; Thos Mahoney 1.00; Phil Sparling 1.00; Jno. McKinnon 1.00; Walter Hunzinger 1.00; F. Hoph 1.00; J. H. Brawn 1.00; Geo. Welsford 1.00; Robt. Loughleen 1.00; Wm. Monahan 1.00; Sam Cargill 1.00; G. Streeter 1.00; E. Massel 1.00; J. Montgomery 1.00; H. Sutter 1.00; O. A. Hogeland 1.00; Jas. Alexander 1.00; Mrs. Alex Thompson 1.00; John Cowing 1.00; Oswald Clancy 1.00; W. G. Reaburn 1.00; Jos. Reich 50c; C. Hetsler 50c; W. Hawn 50c; E. Young 50c; D. E. Crawford 50c; Jos. Schambach 50c; Miss M. Herrahan 50c; B. Neil 50c; Oliver Taylor 50c; Gilbert Hettrick $25.00; Thos. Chisholm 20.00; Henry Young 3.00; J. A. Garland 9.00; Total $251.55.

"MADE IN CANADA"

**The 1917 Ford Touring Car
$495.00**
f. o. b., Ford, Ontario

You don't need extravagant claims to justify your choice when you buy a Ford.

The new model five-passenger Touring Car at $495 is standard automobile value. We don't need to make "claims" when offering you this car. We show you the car itself and give reasons.

The quality, the price and the service it gives make satisfaction sure. You can always depend on the Ford.

Let us show you the new model today—

Liesemer & Kalbfleisch
Opposite Queens Hotel . Walkerton

THE CANADIAN BANK OF COMMERCE

SIR EDMUND WALKER, C.V.O., LL.D., D.C.L., President
JOHN AIRD, General Manager. H. V. F. JONES, Ass't General Manager

CAPITAL, $15,000,000 RESERVE FUND, $13,500,000

FARMERS' BUSINESS

The Canadian Bank of Commerce extends to Farmers every facility for the transaction of their banking business, including the discount and collection of sales notes. Blank sales notes are supplied free of charge on application.

H. M. LAY, Manager Walkerton Branch.

**PURITY
FLOUR**

Milled especially for particular home cooks – those who want:

"More Bread and Better Bread"

AN EVIL HERITAGE

"With the greatest pleasure," and Mr. Hibbert executed three elaborate bows towards both ladies, one, as he explained, in the name of Doctor Hibbert, one in the name of Judge Hibbert, and one in the name of His Reverence Chaplain Hibbert. "To be sure," he found it necessary to explain, "when I say that I am a doctor I don't mean much more than that I keep a stock of sticking-plaster and of arnica, to which the inhabitants of every shade of color have a tolerable free access, and when I told you that there was a species of half-clergyman on the island, I was only laying claim to the very doubtful honor of being the person to whom delicate cases of conscience are most usually submitted. In justice to the West Indian Government I feel bound to add that all this is only a temporary arrangement, though it has been going on for seven years or so. And, upon my word, I am not sure that I don't prefer reigning without ministers. Don't you think I am right, Miss Berrincott?"

During the whole of the meal His Majesty's humor remained at the same happy pitch. He seemed completely to have lost sight of the eccentricity of his own outward appearance. From the first mouthful to the last his possible resemblance to such things as either giraffes or broomsticks did not once cross his mind, although by a strange irony of fate, he had never come so near looking like a caricature as now in his eagerness and vivacity.

Soon after dinner the trio set out for the Rabaceas hut. The fact of its being a trio was one which weighed considerably on Miss McCrie's mind, and the problem of how to convert it into a pair occupied her without ceasing. Since the great question which, as she felt certain, was trembling on Mr. Hibbert's lips could not, in common decency, be spoken in her presence, it stood to reason that she must be in the way. How, therefore get out of it with the least possible delay? Up to a certain point gooseberries are useful, but after that they become a bore.

It was not until the Carib father and son had been carefully passed in review, together with various features of their dwelling which were new to Marian, that Miss McCrie at last caught sight of a possibility. They were slowly retracing their footsteps, for the sun was oppressive, and no one felt inclined for a longer walk, when all at once she discovered that she had left her pocket handkerchief in the hut of the Rabaceas and must positively go back for it. She was careful, too, to choose her moment for the discovery. The conversation had chanced to turn upon Jess Collins, whose engagement was now proclaimed—or perhaps the fact of its having turned that way was to be ascribed, not so much to chance, as to certain adroit manoeuvres of the wily old maid.

"I must positively ride over and see how my fever-patients are progressing," she observed as they walked along between the straggly double row of huts which called itself a village. Small niggers with strips of various colored shirts streaming like pennons behind them in the wind formed all the living decoration there was to be seen. It was the hot time of the day and nobody was either at work or on the way. Tufts of aromatic grasses scented the air, and beside every second hut the family linen—mostly scarlet or orange in hue—was drying upon the spikes of some low prickly plant, making the stiff green leaves look as though they had burst into monstrous and gorgeous blossoms.

"I wish I could ride over with you," said Marian. "I should like to see Jess again. I shall always feel grateful to her; I can't help fancying that—that I have learned something from Jess."

"I wonder if they are really as happy as they look," remarked Mr. Hibbert, reflectively.

"Of course they are," put in Marian. "Jess explained it all to me. She is happy, not only at being happy, but also at making another person happy, which I am sure must be the greatest happiness of all. I don't think one ought ever to lose the chance of making people happy when one can."

It was at this juncture that Miss McCrie made the discovery about her handkerchief. Needless to say that Mr. Hibbert offered to go back for it; equally needless to recount how Miss McCrie insisted that nobody but herself could have a chance of discovering the missing article. In fact, she was almost ready to swear as to the spot on which she had deposited it, although, oddly enough, it was not possible to describe the position to anyone else. The matter ended by her begging the two others to go on slowly, while she promised to overtake them with the least possible delay.

By this time they were past the last houses of the village, and the road lay between two stretches of pasture-land. At about a hundred paces from the village a bread-fruit tree stood by the road-side, with heavy branches that bent so far earthwards as to form a sort of big green tent which afforded complete protection from the sun. When Marian and Mr. Hibbert, who had resumed their slow progress, reached this point, the former stood still.

"Had we not better wait for Miss McCrie here?" she asked, peering into the cool twilight under the branches.

Mr. Hibbert looked at her without answering. He was asking himself whether it were to be taken as a good symptom or the reverse; was it because she was afraid of Miss McCrie not overtaking them quickly enough, or because she enjoyed the idea of sitting with him under a bread-fruit tree that she had accepted the dumb invitation of this particular tree? Ridiculous question! Of course the former, all the symptoms were good to-day. It was but a doubt that momentarily crossed his mind.

Pushing aside a branch that hung inconveniently low, he held it back for Marian to pass. One big root bulging out of the earth formed a seat ready-made for her, as she acknowledged with childish delight. Here she sat down, while Mr. Hibbert leant against the trunk beside her.

Marian pulled off her hat, and likewise put her head back against the tree-stem. Though the day was not yet ended it had been a long one already, and she was beginning to feel the need of a short rest. Her convalescence had, indeed, thanks to the invigorating air of Cane Hill, progressed marvellously, but, for all that, there came moments in which she became aware that the full measure of her strength was not yet regained, and this moment under the bread-fruit tree happened to be one of these. A sort of pleasant languor seemed to be stealing into her veins and agreeably numbing her senses. It was a comfort that Mr. Hibbert, too, did not seem inclined for conversation. In the position in which he stood she could not see his face, else it is likely that the agreeable languor would have been dispersed even more rapidly than, in fact, it was. Mr. Hibbert's eyes were shining and his breath coming fast, and he was silent, not because he had nothing to say, but because he had too much to say and was struggling with himself as to how to say it. If ever he was to put his happiness to the test, this was the moment for doing so; the conviction had come upon him suddenly and irresistibly. If here on now—that is, here in the heart of his own kingdom, and now in this moment of undisturbed privacy—he had not the courage to ask the great question, that question would remain for ever unasked, of that he has certain.

There passed three or four minutes during which he did nothing but attempt to regulate his breath, and, oddly enough, also to steady his hand. In passing through the village he had plucked off a cactus blossom from a bush beside a hut, and had been twirling it between his fingers ever since. The fancy now pursued him that the cactus blossom was not a cactus blossom at all, but a dice-cup, and that he was about to cast a die upon which every thing depended. In spite of all he could do, his fingers trembled piteously as they twirled the flower. A feeling of buoyancy had borne him so far, but now that the moment had come, trepidation had the upper hand. Was it not better to go on hoping—and doubting, than to stake everything upon one throw?

"Is that really so?" he asked at last, following his own train of thought.

"Is what really so?"

Mr. Hibbert started slightly. He was not aware of having spoken aloud, and now he recognized that the die was already set rolling and could not be stopped.

"Do you really think that to make another person happy is in itself a happiness—a great happiness, as you just now declared?"

"Yes, I think so, or I would not have said it."

"Do you remember the history I told you, when we were sitting in the forest on the day of the picnic?"

"Of course I remember it. I don't think I shall ever forget it."

The cactus blossom whisked round faster and faster between Mr. Hibbert's fingers.

"If that is really so," he said with a steadiness which surprised himself, "do you think you could make up your mind to make the 'bony Johnnie' happy?"

"The 'bony Johnnie'? But surely that is yourself? Was not that the name which that horrid Baby gave you?"

"Yes, it is myself."

"But then—"

She broke off in bewilderment, and looked questioningly into his face. What she saw there could not fail to disperse the remains of that pleasant langor afore-mentioned. Not that she exactly understood what was coming; surely it was not possible—?

But, after all, it was possible, as Marian had to believe when Mr. Hibbert, losing all control over himself, told her in terms of unmistakable passion that he loved her; that until she crossed his path he had thought to have lost the faculty of loving a woman, but that she had taught him otherwise; that, embittered by his early experiences, he had intended to remain cut off from the world and from society for ever, but that the sight of her face had sufficed to melt the bitterness about his heart, and to give him new courage, and awake new hopes.

"You can never love me as I love you," he said with a humility which sat strangely upon him; "of course I know that; but I am not mistaken, I cannot be mistaken in believing that I am more to you than a friend,—that—that, in a word, I am something to you."

Marian had listened to him immovable, and very nearly open-mouthed. There is always something a little terrifying about the first declaration of love which a woman hears, more especially if it be unexpected. Mr. Hibbert had been so distinctly classified in her mind as an elderly gentleman and one who had given up all thoughts of matrimony, that it would probably have surprised her less if Jeremiah had sunk on his knees any day at Cane Hill and loudly declared that he loved her, "so true."

"I am something to you, am I not?" questioned Mr. Hibbert, eagerly, as she did not speak.

"It is all a mistake," said Marian, having, with an effort, collected a few stray particles of presence of mind. "Of course, you are something to me, a very dear friend, but—"

"Nothing more? Do not say that!" he interrupted almost violently. "It is not true, it cannot be true. I implore of you to think before you speak, you don't know what you are doing. Consider a little before you say your next word—consider what it signifies to me. I am more to you than a friend, am I not?"

His excitement was so contagious that Marian felt herself seized by a nervous trembling, but all she could do was to repeat mechanically—

"It was a mistake; you are a friend to me; it was all a mistake."

He turned very pale at her words, but he would not yet give in. No happiness is easily relinquished and when this happiness is a forlorn hope it is often fought for beyond what is due to either common sense or manly dignity.

"Think again," he persisted, eagerly. "After all it may be you who are mistaken; you are so young, scarcely more than a child—very likely it is only that you do not clearly understand your own feelings. And I do not ask for much, only that you should give me the right to try and make you happy; I believe I can do it. You could not have spoken to me as you did that day when I came back with your father, if I were not more to you than a mere friend."

Marian said with her hands tightly clasped in her lap staring straight in front of her. She could not bear to look at Mr. Hibbert. The haggard, scraggy man, pleading his cause in breathless words was so piteous a sight that a compassion which was almost pain took possession of her, making the hot tears well up slowly to her eyes.

"In the forest I was sorry for you," she said, almost in a whisper; "and when you brought back father I was grateful to you—that was how it happened. It was all my fault. Mr. Hibbert, I don't dare to ask you to forgive me."

"I don't believe that there is anything to forgive. I still believe that you do not understand yourself."

Marian pressed her hands more tightly together, and one hot drop rolled off her lashes and fell upon the back of her right hand with a sting like fire. Was it quite impossible to get him to believe that matters really stood thus and not otherwise?

"If I could only convince you——"

"There is only one thing that could convince me," he said, doggedly. "That is if you were to tell me that you loved another man."

Marian's first impulse was indignantly to raise her head. Her lips moved, but no word came.

"You must love another man," he pursued jealously watching her face. "It is not possible that you could have been blind to a love such as mine, unless you yourself had been absorbed by love—for another man. Is it so?"

Was it so? Oh, surely not. And yet, how was it that of all the men she knew in the world, the vision of only one single face rose before her mind's eye at this moment? She seemed to see close before her the eager eyes, the long, clean sweep of the jaw, the muscles of the sun-tanned throat, which had always seemed to her so suggestive of strength. Her fingers strained against each other, and her thoughts began to grow confused.

"Is it so?" repeated Mr. Hibbert's voice beside her. "Be merciful enough to let me hear the truth."

"I suppose it must be so," she said, slowly, not knowing exactly that she said it, but feeling only that, guilty as she was towards this man, she had no right to conceal anything from him.

After she had spoken Marian sat there motionless, lost in wonder at herself. All sorts of things were beginning slowly, very slowly, to become clear to her: things out of the near distance and things out of the far past. And yet it did not feel like a discovery; she seemed to have known it all along. The difference was only that until now she had fought against the admission, and that now, unawares, she had been surprised off her guard. She was not aware of any distress at the thought of having betrayed herself to Mr. Hibbert; it would be more true to say that for the moment she had forgotten that such a person as Mr. Hibbert existed.

The sight of a short, spare figure under a sun umbrella coming briskly along the road was the first thing that aroused Marian's attention.

"There is Miss McCrie!" and with a feeling of relief, she rose quickly from her seat on the tree-root.

Mr. Hibbert said nothing, but passed his hand over his eyes like a man who awakes out of a dream. He still held the cactus blossom between his fingers, but the red cup was sadly crushed and faded. The die was fallen and fallen on the wrong side.

"You are looking for us, Miss McCrie, are you not?" said Marian, stepping out from under the green tent. "Here we are!"

CHAPTER XXV.

The homeward sail was a very much quieter affair than the sail in the morning had been. Miss McCrie felt thoroughly puzzled. A dozen times at least she had been on the point of turning to Marian and saying, "Well?" But something in the look which the girl had given her on stepping from out of the shade of the bread-fruit-tree, and something, too, in the strange transformation of Mr. Hibbert's manner, had laid a weight upon her tongue.

There could be no doubt, too, that Marian was tired, and not inclined for conversation. Possibly also the darkening of the sky; and the massing black clouds on the horizon, may have had a depressing effect upon her—thus, at least, Miss McCrie argued, while casting about for reasons to account for the girl's silence. The brilliant day had ended in a gloomy evening. There was something distinctly threatening both in the whistle of the wind and the color of the clouds. The boat, which in the morning had rocked as gently as a cradle upon the transparent blue waves, now began to plunge like an ill-broken horse.

It was not till after dark that they reached Cane Hill.

"I wonder if the mail has come," said Miss McCrie, as they drew up with a jerk.

As Marian descended from the buggy, she saw that some one was standing in the open doorway. It was not until she had mounted the grassy slope that, somewhat to her surprise, she recognized her father.

"Captain Berrincott!" exclaimed Miss McCrie, recovering her spirits at sight of a new guest. "You are come to supper, I hope?"

"I have come to fetch my daughter," replied the Captain, talking even more rapidly than was his wont. "How long will your packing take, Marian? There is not over-much time to lose."

"Fetch your daughter?" Miss McCrie repeated the words in a sort of stony consternation. "But not to-day, Captain, surely? Has anything happened?"

(To be continued.)

Tell a girl she is a vision of loveliness, but never say she is a sight to behold.—Detroit Journal.

"Oh, papa!" exclaimed the sweet young thing, "I got something in my eye this afternoon while out walking." "Did it have wings or trousers, dear?" asked wise papa.—Yonkers Statesman.

SUNDAY SCHOOL LESSON

November 5, 1915. Lesson VI.

Shipwrecked on Melita.—Acts 27: 39—28: 10.

Commentary.—I. The shipwreck and the escape (vs. 39-44). 39. When it was day—The morning light was eagerly looked for and welcomed after the night of uncertainty and distress. Knew not the land—The sailors, some of them at least, must have been to the island of Melita before, but the ship was driven to an unfamiliar part of the shore, hence they were unable to recognize it. Discovered a certain creek with a shore—"Perceived a certain bay with a beach."—R. V. They were minded .... to thrust in the ship—The purpose of the sailors was to run the ship upon the beach, and thus they would be able to reach the shore. 40. Taken up the anchors—Four anchors had been let down from the stern of the boat that it might be saved from being driven on the rocks which the sailors feared were only a short distance ahead of them. These anchors were cast off and left in the sea, for they would be of no further use, since the ship would certainly be wrecked. Loosed the rudder bands—The ancient rudders were simply two large paddles, one on either side of the stern. These had been raised out of the water and fastened in place when the anchors were let down from the stern of the ship. Now they were untied and used to steer the boat toward the beach. Hoisted up the mainsail—"Hoisting up the foresail."—R. V. The sailors wished the ship to be driven as close to the shore as possible, and therefore hoisted the sail to catch the wind. 41. Where two seas met—This is one of the features of the narrative by which this locality can almost certainly be identified. The little island of Salmonetta forms with the Maltese coast near Saint Paul's Bay exactly such a position as is here described. From the sea at a little distance, it appears as though the land were all continuous, and the current between the island and the main land is only discovered on a nearer approach. This current by its deposits has raised a sand bank where its force is broken by the opposing sea, and into this bank, just at the place where the current meets the sea waves, was the ship driven, the force of the water preventing the vessel from reaching the beach beyond.—Cam. Bib. The hinder part was broken—The bow of the boat was firmly fixed in the soft clay and the stern was exposed to the violence of the storm, hence it was being broken in pieces.

42. The soldiers' counsel was to kill the prisoners—The Roman soldiers were responsible for the safe keeping of the prisoners committed to them. If a prisoner should escape, his keeper forfeited his life. It seemed to the soldiers a risk to let their prisoners make their way to the shore as they might be able, for they would be inclined to escape from their keepers. If the soldiers should kill their prisoners, their own lives would be safe as far as the Roman government was concerned. 43. Centurion, willing to save Paul—The centurion was Julius. The Greek word means more than a passive willingness; it indicates an active desire. Julius had been favorable to Paul and had a high opinion of him, therefore he kept the soldiers from carrying out their plan and the lives of all the prisoners were spared. They which could swim—Soldiers, prisoners and sailors were divided into two classes, those who could swim and those who could not. The swimmers were to go first, that they might have the water free from obstructions and that they might be in a position to aid those who were unable to swim. Since Paul had been much about the sea and had been in three shipwrecks already, it is natural to suppose that he was able to swim. 44. Some on boards—Some of those who could not swim used planks to keep them from sinking. Broken pieces of the ship—The fragments of the ship which was being broken in pieces by the storm. So it came to pass—Paul was divinely assured that no life would be lost, and the promise was fulfilled. The other two portions of the promise were also fulfilled, that they should be cast upon an island, and that the ship would be lost.

II. A cordial reception (vs. 1, 2). 1. Knew that the island was called Melita—The sailors did not recognize the island at dawn. When they went ashore, they either recognized it or the inhabitants informed them that it was Melita. During the fourteen days' storm the ship had been driven about six hundred miles westward to the island now called Malta. It lies sixty miles south of Sicily. 2. The barbarous people—The inhabitants were spoken of as barbarians, not because they were savage or uncivilized, but because they did not speak the Greek or the Roman language. They were of Phenician ancestry. Shewed us no little kindness—The people were by no means barbarous in the sense in which we use the term. They were kind to the shipwrecked company. Their kindness was shown in making the sufferers as comfortable as possible. The storm continued and the season of the year was late enough for chilly weather.

III. Paul bitten by a viper (vs. 3-6). 3. Paul had gathered a bundle of sticks—The apostle was ready to do what was necessary to be done, and did not shrink from lowly service. He could gather brushwood for the fire with as good grace as he could comfort the frightened sailors and his fellow passengers. A viper—This animal is very poisonous and its bite is generally fatal. It was doubtless torpid from the cold, and became active when it was brought under the influence of the heat. 4. Saw the venomous beast—The natives were watching the strangers closely and quickly noticed the viper hanging from Paul's hand. They knew the deadly nature of the animal and expected to see Paul die in a few minutes. Vengeance suffereth not to live—The inhabitants of Melita came at once to the conclusion that Paul, the prisoner, was a murderer and deserved death. Although he had reached land safely, retribution or justice was pursuing him, and he must pay the penalty for his crime. 5. Shook off the beast—The idea conveyed is that Paul was self-composed in what he did, and that the beast was no cause of alarm to him.—Cam. Bib. 6. They looked when he should have swollen—The natives were looking for the usual results of a viper's bite, a speedy swelling and sudden death. Saw no harm—"Beheld nothing amiss."—R. V. Paul's condition was unchanged. The viper's bite did him no injury. Said that he was a god—The people were quickly changed in their opinion of Paul. They decided that he must be a supernatural being to be unharmed by the bite of the viper.

IV. The father of Publius healed (vs. 7-10). God's providence was marvelous on this journey. Paul was in touch with God and received from him instruction, encouragement, protection and power. Those who came in contact with him were directed toward his God. He and some of his companions were received into the home of the chief man of the island, Publius, and there the apostle was given a work to do. The father of the chief was seriously ill. Paul went to the sick man, prayed and laid his hands upon him, and he was healed. This marvellous cure resulted in the healing of many others who came to Paul. The people showed much respect for him and his company, and when the time came for him to move on toward Rome, the inhabitants of Melita gave them many things necessary for their journey.

Questions.—Where was Melita? Why did Paul desire the ship's company to take food? How long had they remained fasting? What effect did Paul's cheerful spirit have upon them? Describe the wreck and the escape. What predictions of Paul's were fulfilled? How did the people on the island receive those who had suffered shipwreck? Why did the people decide that Paul was a god? Who was Publius? What miracles did Paul perform?

PRACTICAL SURVEY.

Topic.—Christian activity.

I. Brought Paul into prominence.
II. Brought reward for kindness.

I. Brought Paul into prominence. The keynote in this section of Paul's history was sounded in God's promise to him, "Thou must stand before Caesar." Apparent hindrances to that plan had no real effect in delaying its consummation. The contrary winds, the multiplied landings, the transfer from ship to ship, the boisterous sea, the utter shipwreck and the enforced wintering in Malta were all tributary to the fulfilment of a gracious and far-reaching design. Paul had no option but to go forward to meet those circumstances. The traits of his strong character were brought to view in times of danger. In this account of real experience the personality of the apostle appears with great vividness, revealing a great soul in a great crisis. He had faith in God's promise to him, however unlikely of accomplishment it might seem. That God's will would be accomplished was enough for Paul. From the beginning of the voyage the singular influence of Paul's character was felt by all who were in company with him. When the landing was made and God designed to introduce his apostle to the inhabitants of Malta, he permitted an apparent evil to befall him which Paul overcame according to Christ's promise, thereby making an impression on all who witnessed the event. It was a two-fold testimony in favor of Paul as the servant of God, first by preventing any personal harm to him and then by enabling him to assist and heal others. This incident was the means of awakening the attention of the islanders to the gospel. It was a standing testimony of God's care over his faithful servant. It was Paul's vital union with Christ that gave him his rare opportunities and his uncommon experience. Paul's demeanor amid the varied scenes of this period proved the reality and power of divine grace. Honors paid to him and his associates were virtually paid to his Lord. Paul was foremost in service on land, as he had been at sea. He showed by practical example that it was never beneath true dignity to stoop to any useful service. His helpfulness was businesslike as well as religious. His unselfishness was exhibited in devotion to others rather than to himself. He taught and healed in the name of Christ. It was the mission of Christianity to heal both body and soul. Paul lost no opportunity of making the gospel known. Publius had command of the island with all its resources, yet a trouble had entered his household which neither power nor wealth could overcome. He was as impotent to secure relief from disease which threatened his father's life as was the poorest or weakest inhabitant of the island.

II. Brought reward for kindness. Amid all the perplexities of Paul's career the purpose of God, vital, intelligent and unconquerable, was being carried out, sometimes by deliverance from trial and sometimes by patient endurance. This portion of history clearly illustrates the province of the human in the execution of the divine plans. Publius befriended Paul and was in return himself abundantly blessed. The obscure governor of Malta, because of his connection with Christianity, has a record in the sacred book. He lodged a few Christians and treated them with courtesy. He received as a recompense the restoration of his father's health. The conduct of the Maltese manifested the good in heathenism. The miracles performed through Paul manifested the power of Christianity. The joy which came to the shipwrecked company because of their escape from death at sea was followed by the depressing consciousness of utter loss of all their possessions. Their reception at Malta made it possible for them to escape death from starvation. The people of Malta began with simple, unaffected kindness. When occasion arose, the superstition of their hearts became evident. As heathen they had a conviction of the retributive justice of God. They made religious deductions from ordinary facts. The insufficient creed of natural religion is seen in their extremes of judgment, first declaring Paul a criminal and then a god. Their decisions were not based upon any knowledge of Paul's character or religion, but upon the events of his sudden danger and his marvelous escape. His continued work among them proved educative. Error in belief was corrected. Faith in Christ was established. T. R. A.

THE CONSCRIPT FATHER.

(On Going to the War.)

The busy thoughts that issued bright
From smithies of my brain,
Still serve as weapons in the fight,
Though I myself be slain.

The love I laid up in your breast
Knows neither moth nor rust,
But bears an ample interest,
Though I myself be dust.

And that dear soul, wherein we trace
Our common love, will learn
With you the duties of his race,
Though I no more return.

And so, unto the worst inured,
I go where thousands go,
My love and hope alike secured,
To pay the debt I owe.
—Cloudesley Brereton, in Westminster Gazette.

◆

Nell—How sympathetic Mrs. Dash always is. Belle—Yes, that woman is never happy unless she is feeling sorry for someone.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

COMFORT ONE ANOTHER.

"Comfort one another,
For the way is often dreary,
And the feet are often weary,
And the heart is very sad.
There is heavy burden bearing,
When it seems that none are caring,
And we half forget that ever we
were glad.

"Comfort one another,
With the hand-clasp close and tender,
With the sweetness love can render,
And the look of friendly eyes.
Do not wait with grace unspoken,
While life's daily bread is broken—
Gentle speech is oft like manna from
the skies."

A NEW AND LIVING WAY.

Cain went out from the presence of the Lord. Your iniquities have separated between you and your God, and your sins have hid his face from you. Without holiness no man shall see the Lord.

I am the way, and the truth, and the life; no man cometh unto the Father, but by me. Our Saviour Jesus Christ, . . . hath abolished death, and hath brought life and immortality to light through the gospel.

The way into the holiest of all was not yet made manifest, while as the first tabernacle was yet standing. He is our peace, who hath made both one, and hath broken down the middle wall of partition between us. The vail of the temple was rent in twain from the top to the bottom.

Straight is the gate, and narrow is the way, which leadeth unto life, and few there be that find it. Thou wilt show me the path of life; in thy presence is fulness of joy; at thy right hand there are pleasures for evermore.

FIRE.

Fire is a master, a servant, an element of the earth, a prerogative of man, an attribute of God. All the lower animals, with their splendid instincts, cannot make a fire, for, if they could, the world long ago would have been burned up because of cruelty.

Fire is the centre of the earth, burning mountains, boiling cascades, give proof of this. Fire in the political world. "Is it an insurrection," said the French Queen to her husband. "It is a revolution, and we must hasten to the shore, disguised as fisher folk, and make our escape to England, the land of refuge." Fire in the business world: it is a warfare, keen, clever, unsparing. Everyone wants to get there before the other fellow. Fire in the religious world. "I came to cast fire upon the earth. I bring not peace, but a sword. I came to set a mother against her daughter." It is volcanic, disturbing, revolutionary, it hurts, separates, shatters; "a man's foes shall be they of his own house."

Look at slavery. In the time of Christ, but few men were free, and when He proclaimed the worth of man, and said, "If the Son shall make you free, ye shall be free indeed." He sent a fire through the heart of the slave owner, who said, "If this man's doctrine prevails, our craft will be ruined."

Our Lord did not head a political party to fight the tyrants, but He kindled a fire, which ultimately brought the oppressors to naught. When He taught that the humblest and poorest child was a child of God, it was the death warrant of despotism.

There are things waiting for this fire to touch, piles of wealth, temples of pleasure, dens of infamy. He has taught that wealth is a peril, and He lived up to His teaching. The house of wealth is [illegible] fuel waiting for the fire. "Thou shalt love thy neighbor as thyself," there is a fire that cannot be put out. His action on man is violent. Stormy wind fulfils His word. Who can stand before His cold? There are wreckers on every shore gathering up the fragments and the bottom of the sea is richer than the land.

There was a fire the other day in "Society," and a flutter among the [illegible]. A lady of title renounced the world, sold her estate and jewels, discharged her servants, made provision for her [illegible] necessities, spent her money in a hospital and orphanage in a poor village in Ireland. She herself occupies a cottage on five shillings a week, cooks her own food, and makes her own bed. What is this but Christ?

"A fire goeth before Him, and it is very tempestuous round about. Who will not fear Thee and have Thee in reverence. Our God is a consuming fire."

"Swifter than torrent, tempest, light,
I fly to my serene abode,
And on the last and holiest height,
Find rest and joy in God."
H. T. Miller.

◆

Chats With the Doctor

BY A PHYSICIAN

OUT OF DOORS.

A great many people have made [illegible] ideas of what constitutes getting plenty of fresh air. A short walk every morning seems to many of them quite to fulfil the prescription. Whereas in reality for it to be properly carried out the patient should be actually exposed to fresh and moving air for every hour of the day and night.

The curative properties of such fresh and moving air are two-fold. First, the lungs obtain at each inspiration a supply of new air, from which no oxygen has been withdrawn, and which is unpolluted by the exhalations from themselves, or the lungs of other people. Secondly, and by many experts this is considered the more important of the two, constantly moving air keeps the surface of the skin constantly stimulated, and the nerves both braced and soothed. It is not only the pollution of the air in a "stuffy" room which makes it depressing and unhealthy; it is its stagnation as well.

Now it is open to all of us to obtain really fresh air, if we care to take the small amount of trouble necessary. First we must get into the habit of keeping all windows open. This is really purely a matter of habit. After the first week or so the body will completely accustom itself to the slightly lower temperature, and the improvement in the action of the heart and lungs with the consequent better circulation, will more than balance the absence of stuffy warmth. Not that the warmth of a fire is bad; on the contrary, an open fire in cold weather is an actual aid to health, as it creates draught in the room and carries away foul air up the chimney, as well as maintaining the bodily heat while the body is inactive. But the warmth which merely results from the pent-up and unchanged air of the exhalations from the lungs and bodies of several people for hours on end is an unhealthy and unnatural warmth. Secondly, brisk exercise out of doors should be taken for as long a time as is possible every day. Almost everyone, however hard worked, can get in a certain amount of walking daily. If the work is sedentary, office or factory work, it is good to walk all or part of the way to it in the morning. In this way the lungs are cleansed and the circulation started off well before the body has to settle down to its day long idleness. Where housework is the chief occupation—one which tires the muscles and makes walking seem a fatigue rather than a rest—all such work as sewing and mending should be taken out to garden or park, and done out of doors rather than in. All mere minding of children should, of course, be done out of doors whenever possible, for the sake of the children as well as of the adult.

The one step which will seem rather a startling one to many readers is that of sleeping out of doors. And yet it is only a very few people who would find this really impossible, if they set themselves to find out a way to contrive it. Very few of us nowadays are without some little piece of garden, backyard, or even balcony, and all these are quite excellent for the purpose of sleeping out. A roof provides very good sleeping quarters, where a flat leaded stretch is accessible, it is worth while to take a good deal of pains to make the sleeping accommodation really comfortable and convenient, and the difference in the feeling on waking out of doors from waking indoors will soon make the trouble seem insignificant. A waterproof cover should be provided for the bed, and some sort of shelter for the head, in case of rain during the night. The best thing is a light sort of awning, stretched over the whole bed, without sides, and this can often be arranged between a couple of trees, or from chimney to roof. At a pinch, an old, large umbrella tied securely to the head of the bed will provide adequate protection from all but the heaviest rain. It is well, where possible, to have the bed fairly near some shelter, so that at actual need it can be run inside. That is easily done if the bedstead has efficient castors, or it can be mounted on a set of little wheels. Most people have a tendency to pile on the bedclothes when sleeping out of doors, having some idea that it is bound to be colder, but this they will soon find to be a mistake. The same amount of bedclothes as are used indoors will be found quite enough, and these should be light as well as warm, if restful sleep is to be ensured. Heavy bedclothes are apt to cramp the relaxed limbs during sleep, and to hamper the free movements of the involuntary muscles.

FALLING HAIR.

I get so many letters from correspondents who are concerned over the rapid thinning of their hair, often accompanied by more or less dandruff, that a short summary of the routine treatment which I have found most generally helpful in these cases may not be amiss. In the first place, then, I advise the person suffering from this condition to rub into the scalp an equal mixture of olive oil and ordinary paraffin, as used for lamps. The next day this may be washed off with warm water and soap, and from then on, every evening, the following lotion should be rubbed well into the scalp, and the hair subsequently well brushed, glycerine one ounce; carbolic acid, two drachms; water to sixteen ounces. If necessary, the paraffin and oil application may be repeated at the end of a fortnight, though often this is not necessary. In any case the lotion should be applied for many weeks, possibly months, and the scalp should be well massaged with the finger-tips whilst applying it.

CAUSE AND CURE OF CORNS.

In almost every case corns are due to pressure of narrow or ill-fitting boots or shoes and their cure in nearly every case is easily effected by removing this cause. It is quite unusual, owing to the stupid footwear into which children's feet are commonly cramped to see an adult foot in which the toes are in their proper position. Naturally pressure is constantly being exercised at many points where in the natural foot proper provision for the avoidance of pressure is made. The first thing to do, therefore, where corns already exist, is at once to give up the boots or shoes which are responsible for the trouble, and to wear only widely made boots, especially constructed to fit the foot as shown by an outline of the naked foot, drawn round it while standing on a sheet of paper. The material of which the boots are made should also be very soft and flexible, canvas is better than leather.

Where the toes overlap or are crowded together a fresh piece of cotton wool may be placed between them every morning. The actual corns themselves may be treated with a little salicylic ointment twice daily, and any hard, horny part may be cut away.

◆

Why Boys and Girls Go Wrong

At a recent sociological conference Dr. Samuel Z. Batten, of Philadelphia, gave a lecture on "Why Boys and Girls Go Wrong." He said that the number of delinquents is increasing—possible because there are more laws and the meshes of the law are drawn closer, and because the age of delinquency is moving lower and lower. This is a problem which does not affect the city alone, but the difficulties are in some respects greater in the town, especially in the opportunity for the selection of associates. It is a problem which interests all because no man's boy is safe until every man's boy is safe.

There are four factors which enter into the making of life—heredity, environment, individual will and divine grace. Boys and girls do not go wrong because of indifference or partiality on the part of God. That a single one should be an outcast is contrary to God's will. Personal choice, or individual will, accounts for much in the making of life, but not all. Behind this is the question of why one chooses the good or evil. Motives determine choice and one needs to get at that which determines the motives, or ideals. Heredity does not contain the whole explanation. There is no such thing as a criminal class. Human nature is a constant quantity and nature intended all to have a fair start. The depraved man is an abnormal man; crime and vice are contrary to human nature. Life is largely determined by environment. No man is fore-ordained to go to the rubbish heap. Delinquents are for the most part good stuff, badly handled. Experiment has proven that a child brought up in a non-human world would not manifest one moral trait; nothing in environment serves to bring them out. Victor Hugo said: "Society stands in the docket beside every criminal there." Wrong handling is chiefly responsible for wrong lives.

Environmetn must be analyzed to find the responsible parties. The first elemtn is early home life. Where ever there is life there is reaction, and the first two years of life determine, more than any other much longer period, the temperament and character of the child. A second element is suggestion. The things we see and hear suggest certain lines of conduct, the good picture inspires to lofty aspiration and the sordid one to evil. Outbreaks in delinquency can often be traced to harmful moving pictures, which ought to have city, state and federal censorship. Everything in the world about us is affecting us in some way, either consciously or subconsciously. The fact that the subconscious so often comes up into the conscious mind and makes itself known to us accounts for a good many things and determines in large part our consciousness and motives.

Early associates are an important determining element. We are made to be social and are bound to have friendships—a fact of which parents are extremely neglectful. Children tend to become like that which they admire. Through neglect, too, the child often slips away and escapes from the parent absorbed in other things.

Besides parental neglect we have also civil neglect. Failure to provide better recreational facilities shows especial remissness. An investigation of a large number of cases of children brought before the Juvenile Court showed that 54 per cent. were there because of perverted play instincts. Recreation to-day has been commercialized, and it is practically impossible to have any recreation without paying for it. All of the land has been stolen for various purposes, and no room has been left for the child. Every boy and girl is entitled to a chance to play.

There are definite things to be done. First of all comes the need for a revaluation of the home, and for an emphasis on parental responsibility which will make the training of children the most important thing in life. Parents should make serious attempts to create a right home atmosphere through music, games and other devices. The situation demands earnest study of the influence and agencies which are warping life that we may know our community. We must set ourselves to develop influences for good. "A well-supervised playground within half a mile of every home" should be a slogan. Social rooms are important. Each community ought to be studied for its needs. New ideas are what is needed to divert the mind into wholesale channels. One aspect of what should be done is the importance of having children carefully studied to discover their needs. Almost every incorrigible child is physically defective and will yield to treatment which will make of him a normal human being.

Oh, what times are these! What morals!—Cicero.

Sillicus—It's hard to tell when a woman is in love. Cynicus—That's right. You never know whether it's her heart or her liver that's out of order.

Plain, good intention, which is as easily discovered at the first view as fraud is surely detected at the last, is, let me say, of no mean force in the government of mankind.—Burke.

A Sluggish Liver
CAUSES LOTS OF TROUBLE.

Unless the liver is working properly you may look forward to a great many troubles arising, such as constipation, severe headaches, bilious headaches, sick headaches, jaundice, sick stomach, etc.

Mrs. J. Shellsworth, 227 Albemarle St., Halifax, N.S., writes: "I take pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad I would have severe headaches, but after using a couple of vials of your pills I have not been bothered with the headaches any more."

Milburn's Laxa-Liver Pills are, without a doubt, the best liver regulator on the market to-day. Twenty-five years of a reputation should surely prove this.

Milburn's Laxa-Liver Pills are 25 cents per vial, 5 vials for $1.00; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Heart Palpitated
Would Have to Sit Up in Bed.
FELT AS IF SMOTHERING.

Mrs. Francis Madore, Alma, P.E.I., writes: "My heart was in such a bad condition I could not stand any excitement, and at times when I would be talking my heart would palpitate so that I would feel like falling. At night, when I would go to bed and be lying down for a while, I would have to sit up for ten or fifteen minutes, as I would feel as though I was smothering. I read in the daily paper of a lady who had been in the same condition as I was, and was cured by using Milburn's Heart and Nerve Pills, so I bought a box, and they did me so much good, my husband got another, and before I had used half of the second box I was completely cured. I feel as though I can never say enough in favor of your Heart and Nerve Pills."

Milburn's Heart and Nerve Pills are composed of the very best heart and nerve tonics and stimulants known to medical science, and are for sale at all dealers, or will be mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

Price, 50 cents per box, or 3 boxes for $1.25

FARM AND GARDEN

FAT OR A FUTURE?

(Prairie Farm and Home.)

From east to west, Canada is full of young draughters whose parents for generations back have been drawn from the prize-winning scions of stock of the best blood. Yet, if we follow the life history of this progeny we find that it fails to develop the quality of the progenitors—nor in any small percentage of cases either. Why is this? Surely it cannot be in every case due to a failure to transmit those special qualities for one generation more. Rather we imagine that the fault lies in the treatment which the youngsters receive after they are born.

The care of the growing colt has been a favorite subject for writers in agricultural papers and over and over again we read the same old recommendations, old rules of thumb set forth with an assurance that one might suppose it unsafe to in anywise question the statements. Too many otherwise first class stockmen inherit, as it were, these rules and follow them as a matter of course. Generally they can manage to keep the colt "thrifty." A colt that is thrifty will also be "growthy." But whether the thrifty will grow into a big coarse slob, chunky enough as to body, but common in its underpinning, inferior as to feet, and indifferent in its way of handling both of whether it will be developed into a big, upstanding, virile horse, with symmetry, soundness and strength in its underpinning and efficiency in power depends fully as much upon the skill and watchfulness of its caretaker as it does upon its ancestral heritage of desirable horse quality.

This may appear a broad statement, but it is one based upon considerable experience and careful observation of facts—facts indeed which are visible everywhere.

At any of the fairs, which has just been stated may be observed by any who look. In the first place, it will be seen that the dams are usually fat. If they are not they are then unusually good milkers and the colts are as hog fat as the owner can well get them forward. Many of them will be seen to be so loaded with adipose tissue that their naturally slender forms have taken on the solid look of a lot of miniature but finished draughters. From the point of view of the exhibitor this is an essentail element; generally the fattest gets the first place, for we still have a number of horse judges who retain the theory that we must have more and more size in the load-puller. Under their inspection the biggest colt if he should also be the fattest, is pretty sure of a the red ribbon. Sometimes a good judge of horses, gifted with a little bit of real horse sense, will place the youngster at the rear where he belongs and tell the disappointed owner that he is spoiling his colt, and that it will disappoint him later.

There are many physiological reasons for this. To begin with, colts, especially those bred with qualities of nerve, blood and bone strongly developed, do not take naturally to the accumulation of superfluous fat at the time of life when they are making their most rapid growth. When they do so, it is certain evidence that they are being greatly over-nourished. This means that an extra heavy tax is placed upon the digestive organs, which, while still immature, are becoming accustomed to a constant oversupply of rich food, a situation often lasting until a long delayed weaning time. Then when the food is suddenly taken away, the colt suffers from a severe shock. Unaccustomed to digesting the poorer or coarser foods, the organs are incapable of nourishing the body properly, or even of maintaining functional activity and efficiency, and the "pot belly" condition rapidly develops.

Exercise is another phase of the same question which seems to be little understood. Fat colts never take, or get, enough. In winter time few colts get enough. But if you are going to make a show animal out of the son or daughter of the prize winner you must let the colt have enough of it every day. His digestive organs require it, his nervous organization requires it, his circulatory system requires it and last but not least his under-pinning requires it. Exercise develops the vital organs of the colt, while fat makes them sluggish. It will give an efficiency to his circulatory system, sending the blood to his toes in a constant and strong stream, making for strong, sound growth.

The lesson is very plain. Fat overloads the limbs, while at the same time making the colt too sluggish to exercise them. Thin colts never have their limbs overloaded, and they use them more, promoting circulation to the limbs, and making them grow stronger, springier and truer to the type which made their ancestors valuable for the kind of unerpinning they had.

EXERCISE AND FEED WISELY.

Keep the fat off the growing colt. Do not let it become emaciated for lack of nourishment, but never let it become fat. Keeping the fat off, and the stomach from becoming overloaded will encourage the colt to display more spirit, to take more exercise, and to grow in quality and strength, with breadth and strength of foot, cleaner and finer bone, springier ankle and better action. Style and carriage will develop, not in a load of fat on chest and shoulder, but in finer, cleaner, more attractive way. When weaning time comes he will take the shock of parting with its mother's milk more kindly and feel the loss less.

Remember that what old country horsemen call a "slender" colt will propably grow tall while he is young, will develop springiness of gait and quality of limb, and when older will broaden out and fill up into a real draughter, which will command admiration and the long price of other horsemen, finally bringing in money and reflecting credit upon the owner.

THE SHADOW OF BROKEN HEALTH

Can Be Quickly Dispelled Through the Use of Dr. Williams Pink Pills.

When the shadow of poor health follows your life; when hope begins to fade and friends look serious then is the time you should remember that thousands just as hopeless have been cured and restored to the sunshine of health by the use of Dr. Williams' Pink Pills. These pills actually make new, rich blood which brings a glow of health to anaemic cheeks; cures indigestion; headaches and backaches, drives out the stinging pains of rheumatism and neuralgia, strengthens the nerves and relieves as no other medicine can do the aches and pains from which womenfolk alone suffer. In any emergency of poor health give Dr. Williams' Pink Pills a fair trial and they will not disappoint you. Here is a case that will bring hope to many a weary sufferer. Mrs. E. C. Taylor, Ascot avenue, Toronto, says: "A few years ago I was so run down with anaemia that I could scarcely walk about the house, and was not able to leave it. I had no color; my appetite was poor and I was constantly troubled with headaches, dizzy spells and general disinclination to move about or do anything. I tried manu medicines, but none of them helped me, and my friends thought I was in a decline. One day a friend who was in to see me asked if I had tried Dr. Williams' Pink Pills. I had heard of this medicine often, but had not used it, so I determined to give it a trial. I certainly got a pleasant surprise, for after using two boxes I could feel an improvement in my condition. Continuing the use of these pills I began to regain my health, the headaches and dizzy spells were disappearing, and I began to gain in weight. People began enquiring what I was taking and I was not slow to give Dr. Williams' Pink Pills the credit. I took the pills for less than two months, and completely regained my old time health and strength. I hope my experience may convince some doubting person as to the great merit of Dr. Williams' Pink Pills as I certainly have cause to be a firm champion of them."

You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Italy's War Declaration

The sudden action of Roumania has robbed the Italian declaration of war upon Germany of half its value in the eyes of the world. It was not an "empty gesture," as Berlin too promptly asserted. Rather it was but the prelude to something so vastly more absorbing that the prelude has been lost sight of entirely. And yet the Italian action has a value of its own, outside the military field, where it is quite, as Berlin says, an empty thing, because it merely gives a legal form to a condition long existing.

It is interesting to recall the relation of Roumania to Italy. The most deeply rooted sentiment in the Roumanian mind is that their race is Latin, Roman, as their name signifies. Paris and Rome have been the cultural sources of Bucharest, despite the Hohenzollern sovereign. Indeed, it is to Napoleon III. that Roumania, like Italy, owes its liberation and unity in no small measure. The voice of Rome, then, has had an immediate echo, and we can see what a powerful weapon in German hands the failure of Italy to make her gesture was in the critical days of last summer. But having recognized the relation between Italian and Roumanian action, it remains to examine the case which is purely Italian.

The reasons for Italy's previous failure to declare war upon Germany have remained obscure. They have provoked much bitter comment in Paris, London and Petrograd, and they have never been satisfactorily explained in Rome. The usual explanation has been that German control of Italian finance had been so complete and Italian funds so generally diverted to Berlin that nothing short of a financial collapse would follow hostilities, between Rome and Berlin. But this has hardly seemed convincing.

There have also been numerous fantastic stories; one of the most familiar was the assertion that a secret article in the Triple Alliance bound Austria and Germany to support the House of Savoy against an internal revolution. Arguing that the publication of such a document would have obvious perils for the Italian Crown. It has been asserted that the Italian sovereign has exercised a deciding influence in preventing Italy from doing that which she has done now.

These speculations may now be dismissed, because Italy has taken the final step. What is significant is that this step marks the final collapse of the whole edifice which Bismarck erected in the years when he guided German foreign policy, the edifice which he handed over to the present Emperor when William II. began his momentous career. Thirty-five years have passed since Bismark pushed France into Tunis and thus provoked a bitter quarrel between the two great Latin nations.

It is a full generation since first Crispi and then his sovereign went to Berlin and the celebrated bargain was made by which Italy turned her back upon her ally of Magenta and Solferino and became after a fashion one of the guarantors of German possession in France's Irredenta, Alsace-Lorraine, the bargain which for a full 30 years prevented the completion of the work of achieving Italian unity; and Bismark had long been in his grave before France and Italy at last perceived the folly of playing the German game.

It was not until the Kaiser made his first memorable venture in world affairs, that of Tangier, that the change began. Nor was the change speedily completed. As recently as the Tripolition War, Italian warships seized the French steamships Manouba and Carthage and a sharp message from Poincare, then President of the Council and now President of the Republic, unchained new bitterness in Rome.

Yet if one were to fix a date it would be fair to say that the German gesture at Tangier, the eruption of the Kaiser into the Mediterranean and the subsequent conference at Algeciras marked the coming of Italy's deliverance from Germany. In that conference Italy sided not with Germany, but with France and Britain. From that conference Germany emerged actually defeated, having suffered a loss of prestige, which was the first evidence to the world that German statesmanship had fallen into weaker hands than those of the Iron Chancellor.

Three years later the Bosnian episode opened a real breach between Italy and her allies, because it revealed the full extent of Austrian purpose in the Balkans. When Italy attacked Turkey in the Tripolitan war Austria massed troops on the Trentine frontier, and many Germans, notably Bernhardi, advocated a German attack upon Italy. After this moment there was no real belief in Germany that Italy would stand with the Central Powers. And as Italy moved away from the Triple Alliance and Britain moved toward the Franco-Russian alliance German supremacy on the Continent, achieved by Bismarck, became involved and doomed.

It is not fair to blame those who came after Bismarck solely, or perhaps chiefly, for the present catastrophe. When in 1866 Bismarck declined to permit his Italian ally to take the Trentino, thus leaving the door into Italy in Austrian hands, he made it impossible for a permanent settlement between Hapsburg and Savoy. Until she had become master in her own house Italy was bound to look forward to a new war, and all arrangements with Austria were bound to be temporary. In the same way, by permitting the annexation of Alsace-Lorraine, Bismarck made inevitable another Franco-German war.

At bottom the present war is only one more of the wars like those of the nineteenth century in which peoples long separated by arbitrary frontiers sought unity and liberty. In the beginning we have Serbia looking over her own frontiers to the millions of Serbs under Hapsburg rule, wholly comparable in position and condition to those Italians dwelling under the rule of the same house in the last century. We have the French, with eyes and hearts concentrated on the still determined to complete the great work of liberation begun a century ago. To-day it is the same emotion them in 1870. We have the Italians two million French citizens torn from that actually dominates the Roumanian policy, and it is to rescue three Roumanians from Hungarian rule that Roumania will fight.

Germany and Austria, together with their Turkish ally, have denied the right of nationality and the freedom of choice of peoples. Austria is the great anachronism founded upon the idea of superior race. So far as legal rights are concerned, the case between Austria and Serbia is a case in which all the law is with Vienna. But so it was in the case of Italy, in the case of Germany before 1866. The Triple Alliance was bound to collapse because it was based on a condition which Italy could never permanently endure. The Balkan situation was destined to produce the deluge because th Serbs were just as sure to seek unity as were the Italians a century before. Frenchmen might imagine that they had forgotten Alsace-Lorraine and Germanys might regard the question as settled, but all history demonstrated the fallacy of such conceptions.

There will be no promise of permanent peace in Europe until all races are liberated. If Italy determines to anex Slav Dalmatia, to construct Greek territory in Albania and the Aegean Sea, if Russia denies Poland liberty and unity, there will be other wars. But the real promise for the future in the great war is that the Roumanian, the Italian, the Frenchman and the Southern Slav will regain national unity, and this will be a real gain for world peace and a hopeful redrawing of the map of Europe.—New York Tribune.

FOR FAMILY OF TWO.

One Plump Chicken Furnishes Four Good Meals.

A family of two is often hard pressed for variety, while left-overs from average cuts are simply nightmares. Two sisters (one an invalid) treat a large plump chicken thus: Remove with a sharp knife one wing and one side of the breast.

Do not use the bony part of the wing, but put that aside; you thus obtain two portions. Take your choice now if you will serve chicken en casserole, fricassee of chicken and rice, steamed chicken with macaroni, or chicken en papillotte. Then you have the legs and pickings from the carcase to dispose of. Serve these as a souffle, croquettes, or a chicken and macaroni pie, or en casserole (using different flavoring and making the gravy into a thick sauce); or you may use the meat as a mince with which to stuff tomatoes, or cabbage or lettuce, or serve it in a little pan with a poached egg and some spinach, or let it appear in the centre of an omelette. Let us say that you choose—

THE DISHES.

Dish 1—Steamed chicken and semolina (one wing, one side of breast).

Dish 2—Chicken en casserole (one wing, one side of breast).

Dish 3—Chicken and macaroni pie (one leg).

Dish 4—Mince with egg and spinach (one leg and all pickings).

If you do not need large portions you will find you can obtain the four dishes from one large, plump bird, and then there is the carcass with which to make clear broth, with rice and vegetables or white soup. Managing thus, there need be no lack of variety, and every dish is made of one cooked meat.

If Strength Declines As Age Advances Follow This Suggestion

So many women grow old before their time, perhaps your wife or sister. A little while ago, buoyant, full of vigor and activity she enjoyed life and imparted pleasure to the whole family; but now in a few short years she has faded and lost color and strength. She is just ready to develop some disease that will further weaken and debilitate. You remember how it began, failure of appetite, tired in the morning, found housework burdensome, always nervous and a little irritable. It's a shame to let her go down hill further when you can build her up so quickly with Ferrozone. The change this nourishing tonic makes in a weak woman is surprising. It gives great zest for food, increases appetite and digestion enormously. The blood gets richer and stronger and adds new life to every organ in the body. A rebuilding process works through the entire system. The first week will show an improvement, and a month or two will fatten up the thinnest, most run-down women you can think of. Take Ferrozone for lost color, for nervousness, for weakness—use it when run-down and feeling poorly—it will do you more lasting good, keep you in better health, than anything else. Just as good for men and children, too, because Ferrozone is harmless and safe. 50c per box or six for $2.50, at all dealers, or direct by mail from the Catarrhozone Co., Kingston, Ont.

COMBLES AND THIEPVAL.

The perfect co-operation of the French and British south and north of the strongly fortified position of Combles has resulted in the capture of that place and of Thiepval by the Allied forces. Upward of thirty-five so-called villages have been carried in the offensive that began in July. The Germans had been in possession of them nearly two years, and most of them were strategically important. Such villages as Combles, dominating a district, has been elaborately fortified by underground cement works, from which it was impossible to drive the occupants by artillery fire. It could be done only by charging infantry that was well supplied with bombs.

Trenches flush with the ground can be shattered by artillery, and infantry with a screen of gas cloud thrown out then go in and finish the business; but to take an underground Gibraltar like Combles of the crossroads, which has been called the key to Peronne (the objective of the present offensive), positions to the north, south and east must be seized before success is assured. Thus previous to the capture of Combles the British carried Ginchy and Morval on the northwest and northeast and the French forced their way to Fregicourt on the east, cutting the road to Sailisel. Thereupon the British rushed Combles, and the bombing of the underground works began. The capture of Combles by the nutcracker method is only less important than would be the taking of Peronne, six miles to the south.

The "Big Push," as Tommy Atkins calls the offensive on the Somme, makes slow progress measured by the mile. But when a place like Combles, with its one narrow gauge road and converging high roads, falls we may be sure that the German Central Staff knows what the gain means. Was it a month ago that Contalmaison fell into the hands of the British?—Contalmaison is only eight miles west of Combles. The exact time doesn't matter. What does matter is that Combles is much nearer the Belgian frontier, so much nearer Maubeuge and Mons of painful memory, but of those days when the French and British were outnumbered and inferior in artillery of all kinds, especially machine guns.

Presently, if General Joffre's plans work out right, Peronne will be under the French flag once more. Perhaps fifty miles away, as the crow flies, is the frontier of Belgium. Between are many battlefields on which the Allies were worsted early in the war. Peronne is a railway centre and strategically of considerable value. But Peronne will resist the nutcrackers stoutly. The loss of it by the Germans would be a severe blow to their prestige, which in the west has had some hard knocks of late. Swiftly as the "Big Push" moves the lesser objectives merge into the great objective. The plan is intricate and the execution of it requires iron resolution that disregards sacrifices. It is only a dull intelligence that does not see that if the gains continue the Germans will have to shorten their line or it will break.

CHILDHOOD AILMENTS

Childhood ailments in most cases come through some derangement of the stomach or bowels. Baby's Own Tablets have been proved by thousands of mothers to be the greatest medicine known for the cure of these ailments, simply because they regulate th bowels and sweeten the stomach. Concerning them, Mrs. Napoleon Lambert, St. Ignace, Que., writes: "Baby's Own Tablets are an excellent medicine for childhood ailments and I am well pleased with their use." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THE POULTRY WORLD

CHOOSING A BREED.

Beginners are often at a loss as to what variety of poultry to take up, and are often confused by the many of claims made by breeders in advertisements as to the merits of the different breeds, and in some cases they take up a breed that in marking, shape or color does not appeal to them. All tastes are to vary; they are not alike, yet the claims made by some breeders have caused beginners to take up a breed because of its great producing power. When the would-be poultry-keeper realizes that there is not one best breed in the world, and that all breeds have good qualities, then taste will be more to take up the fowls of their fancy.

No one breed possesses all the good qualities. [illegible] all of the popular breeds are good producers when properly handled, and [illegible] they are money-makers. Taking the country through from ocean to ocean, the Barred Plymouth Rocks still retain their popularity, and are perhaps the leaders in numbers. It is [illegible] a favorite with the [illegible] farmer, and justly so, they being hardy, good growers and good egg producers of large brown eggs. That they have kept to the front all these years is due to good utility qualities. They are beautiful to look at, and are among the largest classes at the poultry exhibits throughout the country. Cocks weigh nine and a half pounds, cockerels eight pounds, hens seven and a half pounds, and pullets six pounds. These weights hold good for the white, buff, silvery-pencilled, partridge and Columbian, and in these varieties the poultry-keeper can surely make a choice in color.

For those who admire a fowl with curves, a breed that is one of the best layers of brown-shelled eggs, although not, as a rule, as deep in color as the Plymouth Rocks, the Wyandottes will fill the bill. They are hardy, quick growers, and when young make good broilers, and at the different laying contests they have proved to be good layers. At present the White Wyandotte is the most popular, and are shown in greater number at the poultry shows, although many are taking up the Silver, Golden, Buff, Black, Partridge, silver-pencilled or Columbian, all having good utility qualities. The weights are: Cock, eight and a half pounds; cockerels, seven and a half pounds; hen, six and a half pounds; pullets, five and a half pounds.

Rhode Island Reds is another breed that for a number of years has taken hold of the public fancy. They, too, have the same good utility qualities as is to be found in the Plymouth Rocks and Wyandottes; they are good growers, hardy, yellow skin, making them the ideal market fowl, for at present the yellow-skinned fowl is the one that will command the highest price in the best markets. They are good egg-producers of brown-shelled hen fruit, make good mothers yet are not hard to break off broodiness when the proper methods are used. In many sections they make the largest class in the poultry show. The weight of the Rhode Island Reds are: Cock, eight pounds; cockerel, seven and a half pounds; hen, six and a half pounds; pullet, five pounds.

In the Asiatic class can be found the Light and Dark Brahmas, Buff, Partridge, White and Black Cochins, and Black and White Leghorns. The Light Brahma is the most popular at present in this class, and if more realized what a good utility fowl it was, larger numbers would be seen in the poultry-keeper's yard. When handled right, they are good layers of brown eggs, and due to their weight are good market fowl. Cocks weigh twelve pounds, cockerel eleven pounds, hen nine and a half pounds, pullet eight pounds.

In the Mediterranean class, which composes the Leghorns, Minorcas, Spanish, Blue Andalusians and Anconas, the single-comb White Leghorn has the call. They are a good commercial fowl, hardy, and mature quickly when given proper care. Minorcas are good layers of large white eggs, and beautiful as exhibition fowls. Anconas are becoming more popular each year. They, like the Leghorns, are good layers, hardy and a profitable fowl to keep.

In the English class the Buff Orpingtons lead in popular favor. They, too, are good layers, large in size and a good all-around fowl, with a fine-grained meat that is not found in some of the lighter breeds, such as leghorns, etc.

There are many others breeds, all having their good points, and profitable when handled in the right manner, but the breeds outlined are at present most in popular favor. The beginner has quite a number to choose from, and the shape and color of the fowls has but little to do with their productiveness. It largely depends on the breeder behind the variety as to how productive the flock is in regard to egg production. The experiment station, the laying contests and progressive breeders have found that many of the leading breeds are good egg-producers, and some strains in the same variety are better than others. So in choosing a breed, the beginner can, with a measure of safety, secure the one that is most pleasing to the eye. That some breeds are better in one thing than others it without question a fact, the same as in the different strains of the same variety, and that is the point to consider in purchasing stock, chicks or eggs for hatching, that the beginner should carefully consider when starting a flock.

The Woodshed Test.

A city man, familiar with life in the country, used the "woodshed test" to determine whether it is safe to lend a farmer money. If he finds a good stock of wood on hand, with plenty of it split and neatly piled and some split very fine, so that it will kindle easily, he concludes that the man is forehanded, looks out for his wife's comfort, does not spend his rainy days at the store, and is a good risk. If the woodshed shows shiftlessness he refuses to lend.—Youth's Companion.

$1,000 REWARD!!

For a Case of Incurable Constipation.

To any person who cannot be cured of Constipation by Dr. Hamilton's Pills, the above reward will be paid. No medicine gives such lasting satisfaction or gives such marvellous cures as Dr. Hamilton's Pills. Relief instantly follows their use. That blinding headache goes forever, that feverish feeling in the skin is soothed away, biliousness and stomach disorders are stopped.

Don't be nervous about using Dr. Hamilton's Pills; they are mild enough for a child to use, yet certain and effective in action, in the most chronic cases. Get a 25c box to-day; they bring and keep robust good health.

* * *

QUICK CLEANING.

Some Aids When Time is the Great Question.

Sometimes the lace at the neck of a gown becomes soiled when there is no opportunity to have it cleaned or when it must be worn in so short a time that the lace cannot be washed and dried in time. Quite soiled lace may be freshened wonderfully by laying it over some white paper and sprinkling it freely with talcum powder and rubbing it gently with a clean soft cloth. A handkerchief will do. The powder will sift through and then the lace may be turned and rubbed on the other side. When the powder becomes soiled throw it away and sift on some fresh powder. A [illegible] chiffon waist with georgette collar, cuffs and vest, which really seemed soiled beyond hope was made presentable in this way for an occasion that demanded such a waist.

If time permits lace at the neck and sleeves may be washed without being removed from the gown by folding a Turkish towel and holding it under the lace right up to the dress material. Then dip a small brush (a vegetable brush is about right, and such a brush should be kept in the bathroom) in warm water and rub lightly over white soap. Rub the lace gently so that you will not break the threads. Turn the towel or move it until a clean portion comes under the lace every few moments. After you have covered the lace with the soapsuds then dip the brush in clear water and go over carefully again. Usually that will clean the lace, but if it is much soiled you may have to cover it again. Care must be taken not to get much water on the brush, or it will run back on the dress material. When the lace looks clean spread out the waist or gown on the bed and let the lace dry over the towel. If it is carefully pulled out when wet it will not need any pressing.

* * *

NEWS TO HER.

(Rochester Times)

A traveling man one night found himself obliged to remain in a small town on account of a washout on the railroad caused by the heavy rain, which still coming down in torrents. The traveling man turned to the waitress with:

"This certainly looks like the Flood."

"The what?"

"The Flood. You've read about the Flood, and the ark landing on Mount Ararat, surely."

"Gee! Mister," she returned. "I ain't seen a paper for three days."

National War Saving

Campaign of British Government is Planned on Broad Basis.

An interesting set of pamphlets are now in use in the National War Savings campaign in the United Kingdom. The campaign started with the inauguration last spring of a national organizing committee for war savings with Right Hon. G. N. Barnes, a prominent Labor member of the House of Commons, as chairman. The committee was appointed by the treasury department.

The pamphlets before us show that the campaign is being conducted on a broad basis. One pamphlet is being used in the elementary schools, another is an appeal to organized labor, while a third is addressed to the housewife. Full details to show how war savings certificates can be secured by very small periodical deposits are given.

CO-OPERATIVE SAVING.

Again, the public are instructed by pamphlet how war savings associations can be formed. Says this pamphlet, "In practice it will be found that an association is most readily formed by persons who are already co-operating in some way. For example, by a trade union or branch, a friendly society or branch, people attending the same place of worship; employees engaged in the same office, shop, factory, or warehouse, the residents in some defined locality, such as a village or the ward of a town, a club of any kind, a school."

School children are appealed to in simple language as the following paragraph, taking from a pamphlet being used in the elementary schools, will show: "We have to win the war, and this cannot be done without money—so much money that the help of every man, woman and child is needed. By saving as much money as we can and lending it to the nation, we are helping to feed and clothe our soldiers and sailors, and to supply them with guns and shells. They are giving their lives for us; surely we can lend our money for them."

PENNY A LESSON.

A pamphlet entitled "War Savings in the Home" contains a definite plan of campaign. In part this reads as follows:

"Meat and margarine: Every household might give up meat for at least one day in the week and in any case use it only once a day. Margarine, too, might be used instead of butter. It's nutritious qualities are excellent.

"Home baking: Baking done at home saves several shillings a week in a moderate household, and relieves the pressure on the bakers who are short-handed both for baking and delivery. Almost every polytechnic is now giving demonstration lessons for a penny a lesson."

ORGANIZED LABOR.

Co-operation has been secured between the war savings committee and the trades union congress. The parliamentary committee of the latter has addressed a letter to the secretaries of affiliated unions asking for their support in the war savings campaign. Amongst others the letter is signed by H. Gosling and C. W. Bowerman, respectively chairman and secretary of the parliamentary committee, and by Will Thorne.

On the back of this pamphlet is a personal appeal by Right Hon. George N. Barnes, the first paragraph of which reads as follows:

"A million of our fellow members have gone to the war, risking health and prospects, and even life itself, for our cause. Every hour we waste and every shilling we mis-spend lessens the support which we might give them. Money is needed to purchase munitions and supplies. We must contribute all we can to the money required."

THE CERTIFICATES.

The war savings certificate, the low-denomination government security with which the campaign is being conducted, cost fifteen shillings and sixpence each, or $3.77 when the sovereign is at $4.86. Under the model schemes for establishing war savings banks, deposits as low as a penny can be made. At the end of five years the certificates can be cashed for £1, and for proportionately lower amounts at the end of shorter periods. Withdrawals, however, can be made at any time. The certificates are free from income tax, but no individual may hold more than 500 certificates.

CARE FOR ITS HELP

C.P.R. Cafeteria at Windsor Station Building.

For the convenience of the employees, of whom there are nearly 2,000 in the Windsor Station buildings, the Canadian Pacific Railway has recently set up a cafeteria luncheon at 15 cents in a large apartment which will accommodate 251 persons at a sitting. Judging by the attendance, it is bound to be one of the most popular features the company has put its hand to. There are hundreds of girls, especially, who have not time to go home, or who, if they do go home, are greatly pressed for time. With this service at their disposal they will save car fare; they will get a thoroughly satisfying luncheon; and they can have the comfort of the lounge room in connection on wet or cold days a lounge room which contains a piano, magazines and papers and in which the employees can rest for the balance of their lunch hour. The arrangement is four to a table; all the appointments are harmonious; there is an air of quiet dignity about the place. Mr. W. A. Cooper, manager of the sleeping and dining car department, said that this was in accordance with the well-known policy of the Canadian Pacific of taking care of its employees. The people in the offices constituted quite a little city in themselves. Many could not go home with convenience. This lunch room would meet the wants of many. Of course, there would still be the 20-cent luncheon upstairs, and the regular dining room, in which you could have what you wanted and pay for the same as much as you liked; but this was strictly for the employees, male and female, who would prefer to have their luncheon inside the building to going to restaurants—those of them who were in the habit of going to restaurants.

* * *

When a woman realizes she is getting fat she hates to see things go to waist.

WIT AND HUMOR

UP-TO-DATE.

(Lampoon)

"Is this hotel run on the European plan?"

"What do you mean, sir?"

"Furious charges, trouble over borders, and no quarter given."

INCREDIBLE.

(Boston Transcript)

First Girl—Katharine doesn't understand baseball at all.

Second Girl—She doesn't?

First Girl—No. Why, the other day she went to a game and fell in love with the umpire.

LESS CROWDED.

(Life)

Lillie—Were you at the lecture last evening?

Gillis—Yes.

Willis—Wasn't that awful!? The idea of 2,000 people jammed and squeezed into that little hall.

Gillis—On the contrary, I thought it was quite a relief after being out on the municipal golf-links all afternoon.

THE RIGHT BAIT.

(Rochester Times)

A preacher, accompanied by two charming young ladies, stood entranced by the beauties of a passing stream.

A fisherman, happening by, and mistaking his occupation, said:

"Ketchin' many, pard?"

"I am a fisher of men," replied the preacher, with dignity.

"Well, you sure have the right bait," replied the fisherman, with an admiring glance at the girls.

JUVENILE LOGIC.

(Exchange)

It was at a private entertainment, and a lady had just risen from the piano.

"Would you like to be able to sing and play as I do, dear?" she queried of a little five-year-old miss.

"No, ma'am," was the unexpected reply.

"And why not?" asked the lady.

"'Cause," explained the small observer, "I wouldn't like to have people say such horrid things about me."

FULL HEADS AND EMPTY.

(Pearson's Weekly)

The Laird—Well, Sandy, you are getting very bent. Why don't you stand straight up like me, man?

Sandy—Eh, man, do ye see that field o' corn over theme

The Laird—I do.

Sandy—A' weel, ye'll notice that the full heads hang down an' the empty ones stand up.

TACTFUL SARGENT.

(Exchange)

At a party one evening a very pretty young girl said to him: "Oh, Mr. Sargent, I saw your latest painting and kissed it because it was so much like you."

"And did it kiss you in return?" asked the artist, gravely.

"Why, no, of course not!" was the astonished reply.

"Then," said Mr. Sargent, smilingly, "it was not like me."

DEATH PARTED THEM.

(Rochester Times)

A weaver (the English midlands) who had evidently got tired of married life, was one day taking a walk with his wife. Suddenly he espied a dead dog lying in the middle of the road. When they came close to it he said to his wife:

"Nah, Mary, thee stand on that side and I'll stay on this."

Having taken up their respective positions the husband said:

"Nah, lass, when I got wed to thee I promised th' parson nowst but death ud part us, and I'm off."

Then Mary fainted.

NEWS TO HER.

(Rochester Times)

A traveling man one night found himself obliged to remain in a small town on account of a washout on the railroad caused by the heavy rain, which still coming down in torrents. The traveling man turned to the waitress with:

"This certainly looks like the Flood."

"The what?"

"The Flood. You've read about the Flood, and the ark landing on Mount Ararat, surely."

"Gee! Mister," she returned. "I ain't seen a paper for three days."

A DESPERATE CHANCE.

(Exchange)

The prisoner, up on a criminal charge, was asked by the court if he had yet secured an attorney.

"No; I haven't any money," was the reply.

"Then the court will appoint one," said the judge. "Now, there are Mr. Smith, Mr. Brown and Mr. Green," pointing to the young attorneys waiting briefless and breathless, for something to turn up, "and Mr. Alexander is out in the corridor."

The prisoner eyed the budding attorneys and, after a critical survey, said: "Well, I guess I'll take Mr. Alexander."

ALL THE DIFFERENCE.

(Exchange)

Little Willie felt indisposed, and the family doctor ordered him to take a powder.

"Come on, dear," said mother, coaxingly, when the powder arrived, "take this; it will make you quite well at once."

"Don't want to," wailed Willie, backing away from the teaspoon. "Don't want no medicine."

"Oh, Willie," mother said, reproachfully, as she drew the small boy near to her, "you've never heard me complain about a little powder, have you?"

"No, an' neither would I," was young William's startling reply, "if I could just put it on my face as you do. But I have to swallow it."

TAKING A CHANCE.

(Rochester Times)

Andy Donaldson, a well-known character of Glasgow, lay on his deathbed.

"I canna' leave ye thus, Nancy," the old Scotsman wailed. "Ye're owner auld to work, an' ye couldna' live in the workhouse. Gin I dee, ye maun marry anither man, wha'll keep ye in comfort in yer auld age."

"Nay, nay, Andy," answered the good spouse. "I couldna marry anither man, for whit wull I dae wi' two husbands in heaven."

Andy pondered over this, but suddenly his face brightened.

"I ha'e it, Nancy!" he cried. "Ye ken auld John Clemmens? He's a kind man, but he's no' a member o' the kirk. He likes ye, Nancy, an' gin ye'll marry him, 'twill be a' the same in heaven. John's no' a Christian, and he's no' likely to get there."

FIRST AID.

(Exchange)

She took a course of first aid to the injured, and, after long and anxious waiting, the street accident she had earnestly wished for took place.

It was a bicycle accident, the man had broken his leg; she confiscated the walking stick of a passerby and broke it in three pieces of splints; she blushingly took off her underskirt for bandages and she was enthusiastically cheered by the crowd. When all was completed she summoned a cab and took her patient to the hospital.

"Who bandaged this limb so creditably?" inquired the surgeon.

"I did," she blushingly replied.

"Well, it is most beautifully done," said the surgeon, "but you have, I see, made one little mistake."

She felt terribly self-conscious.

"You have bandaged the wrong leg," he said quietly.

THE PARSON'S MISTAKE.

(Rochester Times)

At a military church service during the South African War some recruits were listening to the chaplain in church saying "Let them slay the Boers as Joshua smote the Egyptians," when a recruit whispered to a companion:

"Say, Bill, the old bloke is a bit off; doesn't he know it was Kitchener who swiped the Egyptians?"

THE ARCHDEACON'S RETORT.

(Exchange)

A popular archdeacon, while out one day with his dog and gun, met a parishioner.

"I hope," said the archdeacon, "you attend church regularly and read your Bible."

"I do read my Bible," replied the parishioner, and added, in a severe tone, "but I nowhere find that the apostles went out shooting."

"No," said the archdeacon; "the shooting was very bad in Palestine, so they went fishing instead."

Twinges of Lumbago

Poisons left in the blood by deranged kidneys cause rheumatism, lumbago, backache and bodily pains.

Lasting cure is only obtainable when the activity of the kidneys is restored.

This is best accomplished by Dr. Chase's Kidney-Liver Pills, because of their combined action on liver, kidneys and bowels. The system is cleansed, the blood purified and the pains and aches disappear.

One pill a dose, 25 cts. a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Kidney-Liver Pills

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commission—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada, who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

GLAMIS

Miss Emma Howson left on Saturday to visit Toronto and Georgetown friends.

Mr. John McIntyre of Edmonton, Alberta, is here on a visit to his parents, Mr. and Mrs. J. C. McIntyre.

Mr. Jack Downey returned from the West on Wednesday.

Miss Vera Dogg visited friends here last week.

Miss Katie McKinnon returned to Chicago, on Friday.

Mrs. James Thompson visited at Mr. C. Garland, Pinkerton last week.

Mrs. Thos. H. Purdy has returned from an extended visit with Toronto friends.

Mrs. Owen Webb has been on the sick list.

Mrs. Keith and Miss Louise returned from Toronto last week.

Miss Belle Shipley, teacher S. S. No 11, Kincardine, is boarding at L. N. McLean's.

Mrs. Woodstock left on Saturday to spend a few weeks with Mrs. Pearson, 5th con Kincardine.

Mr. Wm. Atkins returned to Toronto on Monday after spending a month at W. J. Graham's.

Pte. Clyde McKeeman of the Motor Cycle Corps, London, spent a few holidays at his home.

Mr. George Swalwell of Ripley visited his son Albert last week and called on old friends in the burg. All are pleased to see Mr. Swallwell so hale and hearty.

Rev. Mr. Echer of Lydonville, N. Y. arrived here on Saturday and will conduct a series of special services in F. M. Church. All are invited to attend.

The Ladies Missionary Society of St. Pauls Church are holding their Thank Offering Meeting on Tuesday of this week. The Ladies' Mission Circle of the Baptist Church are holding their Thank Offering meeting on Friday evening of this week. Further particulars next week.

Mr. and Mrs. J. B. McCormick and Mrs. Kirchen attended the funeral of his niece, Miss McCormick of Bervie last week.

Misses Minnie Howson, and Reta McKinnon were visitors at Mr. J. B. Fischer's, Paisley, on Saturday.

Miss Lila Cunningham, librarian of the Glamis Public Library, has been appointed the delegate to attend the Public Library Institute in Stratford this week.

The news of the death of Mr. Lewis Lamont, near Melville, Sask., was learned with deep regret by his many friends here. To the bereaved ones heartfelt sympathy is extended.

Mr. and Mrs. J. D. Robertson spent Monday in Walkerton.

EDEN GROVE

No wonder, even the hog put up a squeal when the railroads raised the rates on live stock It will be the merchants' turn after December 1st when the general advance is made.

Some of the business men treated the boys to something good to eat on Hallowe'en night instead of letting them loose. So everything passed off quietly in the Grove.

The McKeeman family motored to Paisley Wednesday evening, enjoying the evening with their northern friends.

Rev. Mr. Almack preached an educational sermon Sunday morning which was much appreciated by the large number present.

Mrs. Weichman of Chesley called on friends in town last week.

Guy Fawkes Day coming on Sunday this year, the local Orangemen did not hold a celebration.

Miss Viola Kerry, Walkerton, spent the week-end at her home here.

Mr. O'Reilly shipped a car of hogs and lambs last week.

Messrs R. Gregg and Leslie Gutland of Paisley called on friends here, Sunday.

Quite a number of friends of the late Lieut. Ernie Reid attended the memorial service held at Pinkerton on Sunday afternoon.

Messrs A. McKeeman and Dan Cassidy acted as jurymen at Walkerton this week.

The hook and ladder company were busy Thursday night after the fowl supper, putting up the ladder and hooking the chicken and cake.

Mr. and Mrs. Rosseau, Clifford, called on Grove friends Saturday.

Sunny Jim says there is no hog about him. He never squeals. It was an error in the print.

Mr. John Seiler attended the Quarterly Board meeting at Cargill on Monday evening.

Miss Rebecca Thompson is the guest of her cousin Miss Lily Alexander this week.

The fowl supper under the auspices of the Eden Grove Red Cross Society on Thursday evening was well attended notwithstanding the storm. On Friday evening another supper was served. After each a very pleasant time was enjoyed by all present in games, dancing, etc. Quite a nice sum was raised for the good cause.

Mr. W. J. McKeeman of Glamis was the guest of his brother here last week.

The latest excitement on the town line is an overflowing well on the farm of Mr. Wm Dalgarno, the water flowing to a heighth of over 7 feet.

Mr. John Killen purchased a fine new cook stove named "Britannia". Now John can play the violin while the tea kettle sings "Rule Britannia".

The members of the Epworth League enjoyed Wednesday evening at the home of Miss Della Reid. This Thursday evening they will meet at the home of Miss Jessie Alexander.

Quarterly Meeting will be held Sunday morning in the Methodist church commencing at 10.30 a. m. Sunday School at 9.30a. m. All welcome.

Mrs. Connors visited Walkerton friends last week.

Miss Mattie Desmond, graduate nurse of Toronto is visiting at her home here.

Mr. John Killen represented the local Orangemen at the supper in Cargill on Monday evening.

SOUTH LINE

The threshing on the South Line is over for this year.

Mrs. Lines and daughter, Florence, left for their home in Swift Current Wednesday last.

Mrs. McPhail has returned from Manchester, Ohio, and is visiting her daughter, Mrs. S. Kirstine.

We have new neighbors on the line in the persons of Mr. and Mrs. J. Lowe and family who moved in from Walkerton last week.

S. S. NO. 4, BRANT.

Sr. IV.—Gracie Kirstine, Robert Woods, Sybilla Schwandt.

Jr. IV.—Ralph Metcalfe, Eva Tanner, Lola Tanner.

Jr. III.—Ruth Krueger, Belva Tanner, Lillie Litt, Minnie Schwand, Viola Lippert.

Sr. II.—Wilfred Keip, Morgan Woods.

Jr. II.—Edith Smith, Grace Kirstine, Esther Schwandt, Allen Tanner, Elmer Woods, Earl Litt, Oscar Tanner, Beulah Woods.

Sr. Pt.—Clinton Lippert, Burns Kirstine.

Jr. Pt.—Josephine Litt, Hughie Kirstine, Joseph Litt.

"A" Pt.—Elmer Fritz, Lorne Keip, Roy Tanner.

Jean Hamilton,
Teacher.

CARGILL

Messrs. W. D. Cargill M. P. P. and W. H. Ziegler spent a few days in Toronto the first of the week.

Mr. Sam Cargill spent the week-end with friends in Southampton.

Alderman Jos. Lawson of Guelph was in the village on Monday.

Mr. C. W. Keeling was a visitor in Listowel on Friday.

Mr Joseph Clancy returned home on Tuesday from the Bruce Co. Hospital much improved in health.

Mrs. W. D. Cargill and Miss Phyliss Cargill left on Tuesday for a visit to Toronto.

Those who attended the fowl supper given by the Eden Grove Red Cross Ladies on Thursday evening last cannot speak too highly of the well laden tables and some were so pleased they returned the next evening and enjoyed another repast. You can't keep the crowd away when there is a good feed on.

A large number from here attended the memorial services for Lieut. E. Reid at Pinkerton last Sunday.

Garland L. O. L. 856 celebrated Guy Fawkes' Day by having a fowl supper and card party for its members and their wives. The annual shooting match was not held this year.

Mr. Arthur Curtis visited Hamilton last week and enlisted in the 123rd Battalion. This is Arthur's second attempt, he having served six months in Bermuda on garrison duty.

Mrs. Wm. Cameron was in the County Town on Tuesday.

Help the Red Cross by coming to hear the gifted lecturer and entertainer, Miss Lottie Tillotson, in the Foresters Hall, Cargill, Saturday night, Nov. 11th. at 8 p. m. Admission 25 and 15 cents.

PINKERTON

The young peoples Society held a very pleasant social at the Manse on Wednesday evening last.

A memorial service was held in the Presbyterian Church here on Sunday last for the late Lieut. A. E. Reid. A very large congregation listened to an appropriate address by Rev. Mr. Gale.

The many friends of Pte. Edgar Campbell of the 160th, are sorry to hear of his severe sickness of pneumonia at Halifax. We hope for a speedy recovery.

A number from here attended the supper and dance at Eden Grove last week.

Mrs. Alf Fildis spent a few days at the home of Mr. George Fildis.

Mrs. (Rev.) Gale returned from Alton on Saturday.

At the regular meeting of the Red Cross Society here last Thursday the members of the Society sent the following motion of sympathy to Mr. and Mrs. Adam Reid:—Moved by Mrs. Bain, seconded by Mrs. Horrell that "We, the members of the Pinkerton Branch of the Red Cross Society, desire to express to Mr. and Mrs. Adam Reid and family our sincere sorrow for the loss they have sustained in the death of the late Lieut. A. E. Reid, who was killed in France on Sept. 17th while leading a party of volunteers who went out to bring in wounded comrades. Lieut. Reid considered as a civilian was a model for all young men and his heroic death was in keeping with his life.

HANOVER

"Bob" Lauderkin who went overseas with a Toronto regiment has been awarded another "stripe" and is now a sergt.

Information has reached Mrs. James Petty 2nd con., Normanby, that her brother Arthur Gadd, son of the late Thos. Gadd, of Normanby, has been wounded in the great Somme battle. Arthur enlisted with a Vancouver Battalion, where he has been residing and has been at the front 3 months.

William Voegtle, brother of Mrs. Hamel of Hanover, died at Rochester last week at the age of 61 years. He was only ill a short time. He leaves a wife, two sons and two daughters to mourn his death.

Hanover has given $2800 to the British Red Cross Fund already and will try to make it $3,000.

The 147th Batt. has been quarantined at Amherst N. S. on account of a mild outbreak of dyptheria. Lieut.-Col. McFarland wired that there were absolutely no dangerous cases, and he expected the quarantine to be raised in a few days.

The 147th Battalion is still quarantined for diphtheria at Amherst, N. S. There were ten cases at first, but both officers and men assure their friends at home that the cases are slight and there is no fear of any serious trouble. Meanwhile the Greys are finding their strict quarantine tedious, though the Amherst people are kindness itself to them.

MILDMAY

The collections for the British Red Cross in this township now amount to over $800 and the returns are not all in.

Dr. Meyer, an eminent surgeon of Buffalo, made a professional visit to Mildmay last week.

Mr. and Mrs. Herman Jutzke returned home last week from their trip to the West.

Mr. Stuart Thompson is taking a course in the Business College at Stratford

The Ladies of the Union Jack Knitting Club, held a sale of home made baking on Saturday, proceeds are to go towards buying the Xmas treats for our boys overseas.

Mr. Albert Hundt, who recently returned from Alberta, went to Guelph last week to undergo an operation. He is very ill and but slight hopes are held out for his recovery.

Mr. Kalbfleisch of Milverton spent a few days last week with his son Mr. E. V. Kalbfleisch.

Mr. George Yost left last week for Hanover, where he has secured a position in Knechtel's factory.

Mr. McLean of the Merchants Bank Staff was moved to Wallaceburg last week.

Mr. H. Young of Stratford is the new accountant in the Merchants Bank.

Miss Marie Sneider is spending a week with friends at Stratford.

Mrs. Mel Pletsch is spending a week with friends at Waterloo.

Mrs. H. Patton is visiting friends in Elmira this week.

Miss Stella Duffy is spending a few days with friends in Guelph.

The Mildmay Fire Brigade received a call on Thursday night to take the fire engine to Formosa to help extinguish the fire in the church, which was struck by lightning during the severe electrical storm. After a bit of jangling the Department decided to take the engine out. It was taken up by relays of teams. Mr. Ed. Kalbfleisch towed the hose-reel up with his car and soon the engine was pumping water on the flames, which no doubt would have completely destroyed the church.

Mr. Charles Buhlmann has taken over the bus business from Mr. Henry Schmidt, getting possession on Nov. 6th. Mr. Buhlmann will now meet all trains and convey travellers to his hotel, the Commercial.

Mr. Mitchell B. A. of Victoria College Toronto, treated his congregation on Sunday last to two splendid well delivered sermons on Education. A collection in aid of the Educational work of the Methodist Church was taken and good sums were secured. Rev. Mr. Cozens of Walkerton will conduct the service next Sabbath.

Mr. Wm. F. Wendt went to Stratford on Thursday as delegate to the Library Convention held in that city. He is to represent the Mildmay Library.

On Monday evening the monthly meeting of the Carrick Branch of the Bruce Preparedness League was attended by a splendid crowd. Mr. James Thompson acted as chairman. Mr. Jack Fields, Miss Lilian Mann gave a recitation. In fact the evening was enjoyed by everyone.

FALL ASSIZES

Concluded Before Sir John Boyd Here Thursday Noon

Fall Assizes was concluded before John Boyd here Thursday noon.

The Court waited for the arrival of the noon train bringing John Henry Day from the Hamilton Asylum, charged with a criminal assault on a married woman living near Hepworth. When the prisoner arrived, His Lordship found that the papers brought by the Constable from the Superintendent of the Asylum were not sufficient evidence of his sanity. Rather than delay the Court any longer, the prisoner was sent along to the penitentiary and will be brought back again for trial here at the next court. Day is a thick-set burly fellow, who appears to be immensely powerful. He claims to be 58 years old, although he looks fully twenty years younger.

The case of Cole vs Cole, an action to set aside an agreement between father and son, on the ground that the son had the advantage of his father in the agreement, was settled by drafting a new agreement, without costs. P. A. Malcolm and D. Robertson K. C. for the plaintiff, Otto Klein for the defendant.

Steinhoff vs Steinhoff, an action to secure a declaration that a farm in Bruce Township, though in the name of a brother, was legally the property of the plaintiff, was settled by the parties coming together.

W. T. Holmes, a Wiarton egg buyer, charged with issuing false freight bills, was allowed to go on suspended sentence, his counsel being permitted to present a stated case before the Court at Toronto.

TOWN COUNCIL MEETS

No Estimates For Walkerton Received From Hydro Commission Yet - Council Must Act Within Next Two Weeks If By-Laws To Be Submitted At New Years.

The Town Council held its regular monthly meeting on Monday night at 8 o'clock.

Members present were:—Mayor Lippert, Reeve McNab, Couns. Douglas Lettner, Russel, McCarter, Pitsch.

A letter was read from Mr. C. H. Robinson, manager of the Bell Telephone Co. declining the Council's request for an extra phone extension free of charge at the Town Hall.

Town Treasurer Collins reported that he had invested the consolidated debentures in War Loans as instructed. There was only one consolidated debenture left and he asked the Council to pass a by-law authorizing him to use sinking funds to take over this debenture.

John McKinnon, Steward of the Fire Department sent in a list of the equipment on hand.

A recommendation was read from the Board of Health that several clauses be added to the Sanitary By-law regarding the cleaning of closets, and also that the work be not started until 9 p. m. in winter months and 10 p. m. in summer months.

Mr. Robert Russell wrote the Council that he was assessed for $700 and taxed on $750. The error was adjusted.

Made It $1500 Even

Mr. H. G. Hunter, Sec-treas. of the Trafalgar Day Committee, reported that $1401.00 had been collected by private subscription. Printing and other expenses amounted to $29.80. He suggested that the Council contribute sixty-odd dollars to bring Walkerton's net contribution up to $1500—Granted.

A number of bills were passed, including one of $81.55 for 4 flags for Town Hall, purchased from T. Eaton Co. of Toronto.

Boilers In Good Shape

Can. Casualty Boiler Insurance Co. reported that their inspector, Mr. Hall, had inspected both boilers at the Water works Pumping Station and reported favorably as to the condition of both boilers.

John A Hartman asked for remittance of business tax for 1916, claiming he was not in business here during the past year—Remitted.

No Word From Hydro

Mayor Lippert asked the Clerk if any word had been received from the Hydro Engineer Mr. James, who was to have had hydro figures for Walkerton ready.

Mr. Collins stated he had received no word.

If the matter is not dealt with soon, it will be too late for the January elections, as the by-law requires to be advertised 30 days beforehand.

Both the Mayor and Mr. Collins stated they would write about the matter.

Caretaker R. K. Sutton of the Cemetery, asked permission to remove certain small evergreen trees at the back of the cemetery and plant them along the front. His request was referred to the Cemetery Committee with power to act.

Peddlers Must Pay

A by-law was passed requiring all hawkers and peddlers to take out a licence in Walkerton, the fee varying from $10 for a push cart or satchel to $30 with a team.

Permanent Roads Needed

Coun. Lettner said he wished again to remind the Council of the advisability of doing something in a permanent way regarding the roads of the town. The Council had been going along year after year spending money on the roads with nothing to show for it. He advocated getting a road expert to come in and look over the town streets and get estimates on the cost of permanent roads to be paid for by debentures.

Coun. Russell said it would run up a lot of expense bringing in an engineer and then the Council would do nothing. Why not submit a by-law to the people for a certain amount to be spent on permanent roads and let the people express their opinion in this way.?

Mayor Lippert said nobody would support such a by-law. The people would want to know exactly what the money would be spent for. The matter could not be looked into in a few days or weeks. If the Council would interview some of the towns regarding the cost of roadways on the local improvement plan, they would get some big figures that would open their eyes.

Poll Tax $5.

A by-law was passed fixing the poll tax at $5. In case of non-payment delinquents will be liable to a penalty of $5 or go to gaol and still be liable for the $5 poll-tax.

160th Badges

C. A. Fox has 160th Batt'n Collar Badges made into a handsome brooch finished in gold plate at 50c. Mailed postage free to any point.

+ + +

Merchants Managership

It was rumored this week that Mr. Wright, manager of the Mildmay Branch of the Merchants Bank, would be appointed to the vacant managership here. We are assured that the report is without foundation, and that no word of any appointment has been received here yet.

+ + +

Walkerton Boy Missing

Pte. Herbert Jarvis, a Walkerton boy, son of Mr. Joseph Jarvis, West Ward, is reported to be missing. Herb enlisted at Ottawa last year and has been in the trenches for several months. He was a printer, learning the trade at the Herald under Mr. L. H. McNamara.

+ + +

Everybody Come!

Everybody recognizes that the Christmas Fair is a good thing for Walkerton and the surrounding country and that it has big possibilities ahead of it. It is up to everybody to get behind the Christmas Fair and boost. You can make a start by attending the reorganization meeting called by the President, Mr. Robert Goode for Friday night. Make it a point to come!

+ + +

Vic Bell A Prisoner

The many friends in town of Signaller Victor Bell will be glad to learn that he is still in the land of the living. Vic was reported missing last month but a telegram to his parents at Godrich on Thursday announced that he is a prisoner of war at Dulmen Germany. A second telegram received on Sunday states now that the news of his being a prisoner in Germany is "unofficial."

+ + +

Dead Of Gunshot Wounds

Mrs. Timothy Hanley of Chepstow has received particulars of the death of Corporal William Hanley in a kind letter from Nursing Sister Kathleen Holmes, nurse in charge at the Hospital at the Somme, where this brave soldier boy died of wounds. The Nurse writes that he came in very severely wounded. It was found that an operation was his only chance but he was then so severely wounded that his life was very doubtful. He passed peacefully away the same day, Sept. 3rd. His wound was gunshot in the abdomen. He was buried in a little cemetery, nicely kept, about ten minutes from the Hospital. The nurse has ordered a photograph of the grave which will be sent to the parents in due time.

+ + +

A Ridiculous Demand

As a sequel to the Formosa Church fire we understand that the Mildmay Fire Dept. is demanding $1,000 as remuneration for their help on that occasion, and declined to accept an offer of $500 from the people of Formosa parish. Formosa people are naturally grateful for the service which the Mildmay brigade performed in saving their church and are not disposed to haggle over the matter but it is doubtful if they will consent to pay so high for a good turn which one might reasonably expect from a good neighbour. The suggestion made by the Mildmay brigade is that each of the four insurance companies involved put up $200 and the parish $200. But as the insurance companies are not legally obliged to remunerate the fire-fighters, they will not stand for anything unreasonable. The Formosa people are inclined to deal generously with the firemen but if the fire-fighters show themselves too greedy, they may land "in the soup."

+ + +

Cargill Bowling Club

The last meeting of the Bowling Club was held on Monday evening when the year's business was closed and a good margin of cash for the coming season. On account of Sec.-treas. Clancy removing to Walkerton, Jas. A. Alexander Jr. was appointed in his stead. After business the following resolution moved by Mr. W. D. Cargill M. P. P. and seconded by Mr. Geo. Sties, was unanimously carried:

That we, the members of the Cargill Bowling Club, learn with pleasure of the promotion of our esteemed friend and fellow bowler, James T. Clancy, and while congratulating him upon his promotion, it is with very sincere regret that we view his departure hence. To his never failing interest and courtesy as well as efficient services as Secretary of the Club, must be attributed much of the success which has been attained. While sorry to lose his companionship and smiling countenance from our Green, he departs with the good will and the best wishes of each and all of us for success in his new field. It is hereby resolved that the resolution be inscribed in the minute book of the Club, and a copy of same furnished to our departing friend. Signed on behalf of the Club. Jno. Clancy, Hon. President; U. W. Keeling, President; Jas. Alexander, Secretary.

NEWS ABOUT TOWN

News About Town on Page 5.

Mr. H. G. Hunter took a business trip to Toronto this week.

Mrs. Wright of Hanover spent Sunday at Mr. A. S. Royce's.

Ontario Liberals will meet at Toronto on Friday November 24th.

Mrs. Geo. Rausch of Detroit is visiting her mother, Mrs. Glintz, McGiven St.

Walter Todd, an old pioneer of Kincardine Tp. died on Saturday in his 97th year.

Pte. J. W. Haug of Tiverton was reported dead from wounds in Monday's Casualty List.

Mrs. K. M. Taylor and family left for their new home at Belleville Monday morning.

Suitings up to date for Xmas holidays, made to your measure to fit, at low prices at Woodman & Co's.

Mr. Sandy George has bought a little Shetland pony for his children, at Toronto, to be delivered this week.

Shirts, collars, sweater coats, ties, hockey caps and wool underwear for the Xmas trade at Woodman & Co's.

A hunting party composed of Chris. Kolpine, Jack McNeil, and Hugh Bell spent Monday near Gorrie and brought home eight nice hare.

Silk mufflers and scarfs, souvenir handkerchiefs, caps, hats and gloves for Christmas at Woodman & Co, next to Vogan's Hardware.

As usual we are paying cash for produce. We want your eggs, butter, potatoes, onions, fowl and other lines of produce. Goode & McKay.

Miss Emma Latchford returned on Friday from a visit to Toronto and Oshawa. Mrs. Latchford remained over at Guelph to visit friends.

Mr. McEwen, bookkeeper at the Rattan, has rented Mr. Robert Smith's house on Victoria St. recently vacated by Mr. N. A. Walford.

The atmosphere in our store is quite "Crisp" these days. A lot of fresh biscuits just came in. Going out at regular prices. Goode & McKay.

Practically the first snow of the season fell early Tuesday morning. This was followed by a fall of three or four inches on Wednesday morning.

The Ladies Association of the Methodist Church are giving a shower for the Soldier Boys at the Front at Mr. Thomas Cunningham's Wednesday night.

Rev. C. W. Cosens took charge of Sacramental Service at Mildmay Methodist Church on Sunday. His work here was taken by Mr. Singleton, a theological student of Victoria University.

Inspector Jas. M. White laid charges against Wm. Becker and Wm. Bruce of Port Elgin last week for being drunk in a public place. They were fined $10 and costs each by Magistrates Chapman and Crowe.

Mr. R. E. Truax M. P. received an enquiry this week from an outside firm regarding the Saddlery Hardware building. Mr. Truax turned the matter over to the officials of the local company who will get in touch.

Township Clerk McCallum of Brant has posted the list of complaints to come up before the Court of Revision of the Voters List on Saturday. Fifty-four names have been handed in to be added, and 28 to be struck off.

Kolpin and Ernst, local agents for International Safe Co., delivered Home Safes to the following last week:—Rev. J. H. Grenzenbach, John George, Louis Voelsing, George Rossfeld, Fred Voigt of Brant. It is better to be safe than sorry. Buy one today.

The utmost in photographs! The success of this studio is undoubtedly due to the fact that we have never made portraits to meet a price. Quality first, then the cost plus a fair profit, have been the only considerations. It does happen though that our prices are very reasonable. The Fraser Studio.

In the appointment of Dr. R. E. Clapp of Mildmay to the County Clerkship, another old Conservative candidate has been rewarded. He contested South Bruce for the Legislature on three separate occasions and sat for one term in the Local House. It was largely through the efforts of his friends who put up a strenuous fight, that the Doctor's claims were successfully pressed. We understand that he will not take up residence in Walkerton until Spring.

Mr. J. B. Campbell of Chesley was here on Monday, calling on old friends. At present he is conducting a C. O. F. campaign for new members at Hanover with very good success. Both of Mr. Campbell's fine young sons are now on their way to the Front. Arthur has been given a commission as lieutenant in the Royal Flying Corps and has orders to report at Montreal on Saturday. Hardie, the younger boy, left a few days ago for the East with his unit, the 76th Battalion.

Mrs. Crompton, Gibson St., has sold her residence to Mr. Duncan K. Smith of Brant.

Get one of those nice rubber coats for the cold rainy weather at cut prices at Woodman & Co's.

Mr. Fred Goswin had the misfortune to break a bone in his right wrist on Thursday night. He was cranking Mr. David Traill's car when it back-fired.

Dr. Helen McMurchy, acting Provincial Inspector, inspected the County Gaol here on Tuesday. She also visited the Hospital and the House of Refuge. She expressed herself as being well satisfied with conditions as she found them here. She left Tuesday night for Kincardine.

Young Ladies Will Meet

The young ladies of the Town who are interested in a Soldiers' Aid Tea Room are requested to attend a meeting in the Town Hall on Saturday afternoon at 3.30. Important business will be discussed.

+ + +

Creditors Draw A Blank

The estate of Mrs. Gardiner, milliner, has been wound up by the Assignee Mr. James Whitehead, and a statement issued to the creditors. Barely enough was realized from the sale of the stock to meet the rent and winding up expenses, the creditors getting nothing.

+ + +

Major Lamb Landed

Mr. James A. Lamb received a letter on Monday from his son, Major Walter Lamb of the 170th Battalion, stating that he had arrived safely at Liverpool. This letter surely beats the record for time as the Major only left Halifax on Nov. 1st. He writes that he sailed on the Mauretania, sister ship of the ill fated Lusitania, with 3,200 soldiers on board beside the crew. They made the trip in less than six days.

+ + +

Tramp Sent Down

Chief Ferguson arrested a tramp on Sunday morning whom he found wandering around behind the stores in a suspicious manner. The fellow proved to be a Polack, named Peter Benin, who has been tramping this part of the country for several years. When arrested he appeared to be in a half starved condition and had been making a meal out of raw turnips, the remains of which were found in his pockets. Benin was sent down for three months by Magistrate Tolton on a vagrancy charge and will have food and shelter for the winter under Gaoler McKechnie's direction.

+ + +

District Library Institute

The interest that is being taken by local Library Boards in the methods of organization and management of Public Libraries is a hopeful sign. Practically every library in Bruce was represented at the District Library Institute held at Stratford last week. Experts were present to lead in the discussion of Library problems. Mr. John Clancy of Cargill, who takes a deep interest in library matters, was appointed one of the Executive Committee of four members for the coming year. Among the delegates present from this county were:—John Clancy, Cargill; H. G. Hunter, Walkerton; Miss L. Cunningham, Glamis; S. T. Stewart, Pinkerton; W. T. Wendt, Mildmay.

+ + +

Former Cargill Lady

Mrs. Geo. Childs of Brant was called to Detroit on the 8th inst. owing to the death of her sister, Mrs. Elizabeth Ridley, a former highly respected resident of Cargill. Mrs. Ridley, who was a daughter of the late Anthony Robinson of Cargill, was in her fifty-ninth year. She had been suffering the past three years from diabetes but had only been confined to her room a week when the end came. Besides her sorrowing husband, she leaves a family of five sons and one daughter, and six grandchildren. Others from this section who attended the funeral at Detroit last Thursday were a brother and sister, Mr. Jos. Robinson and Miss Esther Robinson of Hanover.

New G. T. R. Agent

Mr. Norman Walford's successor as G. T. R. Agent will be Mr. Jim Clancy, who has been agent at his home town of Cargill the past nine years. Everybody for miles around knows the genial Jim and everybody has a good word for him. Besides being a courteous and obliging agent, he has been a popular citizen and a good man for Cargill. In his spare time he is the hustling secretary of the Cargill Bowling Club and has all the men from sixteen to ninety years out on the Green. Walkerton is glad to get Jim but we know those Cargill folks will miss him.

Harrison—Fletcher

A very pretty wedding was solemnized at St. Peter's church, Toronto, on Tuesday morning, November 7th, when Mr. Linus Harrison, formerly of Walkerton, was united in marriage to Miss Annie Fletcher, youngest daughter of Mr. and Mrs. Henry Fletcher, of Toronto. Rev. Father Carey officiated. The bride wore a travelling costume of navy blue gabardine trimmed with real lace, with hat to match, and corsage bouquet of white roses and lily of the valley. The bride was attended by Miss Frankie Beislen, who wore a dress of bronze green chiffon trimmed with chiffon velvet, and hat to match; she carried a bouquet of pink roses. Mr. William O'Malley of Buffalo, son of Mr. John O'Malley, Walkerton, was best man. After a wedding breakfast at the home of the bride's mother, the happy couple left for Buffalo and other points. On their return they will reside at the Morley Apartments, Toronto.

+ + +

Death Of David Pinkerton

Mr. David Pinkerton, an old and well-known resident of Enniskillen, passed away at his home at 5 a. m. Monday in his 67th year. Mr. Pinkerton had been poorly since sustaining a stroke on May 26th, last, while driving home from Walkerton. He was a son of the late Henry Pinkerton, one of the first settlers in the Greenock bush, and has lived practically all his life in the neighborhood where his father settled. He was a man of quiet disposition, good to his family and a kind and obliging neighbor. Besides his sorrowing widow, he leaves a family of eight children, Mrs. (Aggie) Ross resides at Regina, Mrs. (Ida) Draper of Queensville, Ontario; Miss Mary of Toronto; and the others at home are—Eliza, Pearl, Willie, John and Nelson. Mr. Pinkerton was one of a large family of whom only one elder brother survives in the person of Mr. Wm. Pinkerton of Michigan. The latter suffered a paralytic about the same time as his brother, and also has been very poorly of late.

A Remarkable Woman

An entertainment was given at the Town Hall on Friday night by Miss Lettie L. Tillotson of Hawaii, under the auspices of the Woman's Institute. Miss Tillotson is an educated Hawaiian lady who might charitably be described as past the first bloom of youth. Her memorized description of the beautiful Hawaiian Islands, the customs and characteristics of the people, was rather interesting, but her best work really is done off the stage. It is as a financier that she excells. Three months ago Miss Tillotson toured this part of the country, tying up a local organization in every town along the line to an iron-bound "50-50" contract with a $100 penalty clause attached to operate in case the local organization did not carry out the agreement. Cries of distress emanating from nearby towns where she gave her entertainment reaching the next town ahead, the audiences have not been as large as the Committees anticipated. Here the Woman's Institute who made the engagement with the laudable object of giving the citizens a treat and at the same time raising money for the Red Cross, found themselves out of pocket on the venture, owing to the reports which reached the public beforehand from other places. Some of the Institute Members, rather than allow Miss Lettie to get their perfectly good coin, decided at the last minute to stay at home and donate their admission fee to the Women's Institute which of course helped the finances some. Miss Tillotson thoroughly believes in advertising (when she writes her own press notices). Here is the report of the Walkerton entertainment which she was good enough to dispatch by messenger to the Telescope the next morning after her recital here.—

"Lettie L. Tillotson gave one of the most refined and instructive entertainments for the Women's Institute that has ever been given in Walkerton. Those who failed to hear her missed much. Miss Tillotson is a globe traveller, a lady of world wide experience and refined instincts, every word that she says is instructive, her discriptions are graphic and vivid. We do not have entertainments enough of this kind. Everyone who heard her were delighted. The proceeds were for Patriotic purposes.

"Lady of world-wide experience" is right.

160TH AT WHITLEY CAMP

After a Rather Rough Voyage Across the Atlantic—Boys are Comfortably Settled at Camp 35 Miles from Old London — Monday Brought Big Raft of Letters.

Letters from the boys of the 160th poured on Monday's British mail, telling of the voyage across the Big Pond to Liverpool, and the trip to Whitley Camp, Surrey, England, where the Battalion is now quartered.

The letters state that the Battalion sailed from Halifax on H. M. S. Metagama, with two thousand soldiers on board. At Halifax Lt.-Col. Weir was appointed Commanding Officer of all the troops on board and Capt. Roy Whitehead, ship adjutant. As luck would have it, the boys struck a bit of heavy weather and as a result, a good many of the Battalion including Col. Weir and Capt. Whitehead were seasick all the way across. As they drew near to the Old Land, the British torpedo boat destroyers, the terror of the lurking submarine, raced out to meet them. One of the boys wrote to his Dad that it was an affecting sight to see these powerful warriors, symbolic of Britain's protecting arm, coming out to meet them. In the Irish Channel again it was very rough and there was some evidence of shipwreck. The Metagama passed close to a steamer which, having shifted its cargo, lay half on its side and had been abandoned by its crew. Arriving in England the boys had a nine hour's train journey through lovely England to to their camp at Whitley Camp, Surrey County. Whitley Camp is about 35 miles southwest of Old London and 10 miles from Bramshott Camp, Hants. The camp has paved roads and is well provided with small shacks. The boys have five blankets each and write that they are able to keep comfortable in spite of the constantly rainy weather. 10,000 Canadian troops are encamped at Whitley. Some of the boys mention in their letters that they expect the 160th to be broken up, a fate which happens practically every regiment shortly after it arrives in England.

Extracts from a couple of letters home give a good idea of the Battalion's experience:—

Lieut. Herb Henderson, assistant adjutant, writes his father:—Arrived O. K. after a very pleasant trip. Had two storms on the way, one out at sea and one in the English Channel. It looked bad for a while but we pulled through safely. Between storms and submarines it made the journey rather exciting at times. The trip from London to Halifax was uneventful but rather interesting. We got out two or three times on the way for exercise. Just had a few minutes at Halifax and what we saw of it was not to our liking. Was not at all sick on the way over and did not miss a meal. Col. Weir and Roy Whitehead were sick all the way over. The trip from Liverpool to this camp which is about 35 miles south of London, took us about 9 hours. England is certainly a beautiful country and I am sure one could find plenty to see if he had the time. The weather is the only drawback. To-day, just now, is fine, just like a Canadian autumn day but one hour from now it may be raining pitchforks. We expect to get six days leave this week. I will probably go to Scotland. No one seems to be going to Ireland so I will leave that until Christmas time.

Your affectionate son,
Herb.

Sergt. Walter Eidt writes his father, Mr. Nicholas Eidt from Whitely Camp, Surrey Camp, England:—

Arrived here last Saturday after just 11 days travelling. We had a wonderful trip, one I am not liable to forget. We were two days and two nights on the train before we arrived in Halifax. I hope you received the cards I sent enroute there. We boarded the H. M. T. "Metagama" and were ten days making Liverpool. It certainly was fine on the boat. We had rough weather for several days but I enjoyed it and can say I wasn't seasick at all. We came south by rail to this new camp which is about 30 miles west of London. The scenery that met our eyes on the way down was very beautiful. Farms are all laid out like immense gardens but the cities are a crowded net work of red brick houses and railway yards. I saw Norm Hibbert and Geo. Sillers before we were here 24 hours. It's great to meet anyone from home over here. Their weather is very unsettled. It rains every ten minutes for 4 days a week, but we are all in huts with 5 blankets for each man and we don't mind it. We were out in the country this morning for a route march. Their roads are very fine here and good to march on. We may be moved to Bramshott very soon. Love to all.

Walter.

BORN

JONES—In Walkerton, on Tuesday, November 15th, to Mr. and Mrs. Paul Jones, a daughter.

CURRENT COMMENT

The United States may not be living up to the neutrality laws, but the House of Lords might as well keep quiet until the Presidential election is over.

◆

King Haaken VII. of Norway, who is now being threatened by Germany, is a brother-in-law of King George. In 1896 he married H. R. H. Princess Maud, daughter of King Edward VII. He is pro-ally and popular.

◆

The United States Bureau of Education is endeavoring to establish a new one. It is this: "No promotions unless you learn English." The aliens in the United States do not learn English readily. They are rather inclined to live in groups. There are said to be 200,000 people in Chicago ignorant of the English language. The Bureau believes that these foreigners could learn the language were it made to pay them.

◆

Donora, a town in the State of Pennsylvania, and Centralia, a town in the State of Washington, have agreed to exchange school superintendents for a season. Each man argues that travel to and fro and residence in a new environment will be broadening. We might try something like that in Hamilton. For instance, the Spec and Herald might exchange editors for a few weeks.

◆

Old country newspapers are carrying advertisements of home made oleomargerine at 14 cents and 24 cents a pound, made from choice nuts and milk. Could Canadian families buy margerine at these prices, the high cost of living problem would be partially solved. The Dominion Government should lose no time in abolishing the law preventing its manufacture and importation into this country. The law benefits nobody.

◆

Approximately 225,000 war horses have been sold at East St. Louis since the war began. The total sum paid for the horses is about $40,000,000. About 7,000 mules have been sold for a total of $995,000. The Italian Government recently has made a contract for 3,000 horses to be filled in 20 days. British, French and Belgian buyers and agents for the United States army are taking a total of 2,000 horses a week. Are there no horses in Canada for sale? What is Sir Adam Beck doing? The Canadian farmers ought to get some of this trade.

◆

The fate of Roumania in this struggle should not be viewed with indifference by us. King Ferdinand's wife, Queen Marie, is the daughter of the late Duke of Saxe-Coburg and Gotha, better known in England as the Duke of Edinburgh, the second son of Queen Victoria, and is a cousin of King George V. and Emperor William. Her sympathies and interests have always been English rather than German, and it is said that her influence was no small factor in inducing King Ferdinand to assent to the popular desire to enter the war on the side of the Allies. Queen Marie is the mother of six children, the eldest, Crown Prince Charles, being twenty-three; Princess Elizabeth, twenty-two; Princess Marie, seventeen; Prince Nicholas, thirteen; Princess Ileana, eight; and Princess Mircia, four, comprise the other juvenile inhabitants of the royal palace in Bucharest. Princess Elizabeth has been mentioned as a possible bride of the Prince of Wales, although Princess Yolanda of Italy seems now to be the favorite for that position. Princess Elizabeth is now in the uniform of a nurse.

◆

IRELAND FEEDS BRITAIN.

Whatever unrest and trouble may be the lot of Ireland it is reassuring to be told that she is doing her share in supplying Great Britain with food during these war times. Mr. T. P. Gill, secretary of the Irish Department of Agriculture, addressing an agricultural meeting at Antrim, said that Ireland must be pronounced one of the most rapidly progressive agricultural countries in the world, and was the chief exporter of food to Great Britain. She supplied four-ninths of the cattle and beef which Great Britain imported from all countries in the world added together. She furnished one-fourth of the total pig products imported, more than one-half of the poultry, one-fourth of the eggs and one-seventh of the butter. The Irish farmer in spite of the many difficulties he had to contend with, including shortage of labor, made a spirited and special effort to do his part as a food producer during the war. He had increased the area of ploughed land this year by 3.1 per cent. over that of last year. He had preserved his breeding animals in spite of the temptation of high prices, so that although he exported greater numbers of fat cattle to feed the army and the British population, on the 1st of June of this year he actually held at home, as the basis of further production, 12,000 more cattle, 164,000 more sheep, 85,000 more pigs, 384,000 more poultry and 38,000 more horses than on the 1st of June last year. The area under flax this year had been increased by 28,000 acres. This is a record of which Ireland may well be proud. It shows that the land laws introduced by the Liberals into that country have so helped the farmers that they are able not only to feed Ireland, but a large part of Britain. Well done, Ireland.

HER HUMBLE LOVER

"And he?" she said, with interest, "does the rule apply to him? And which is he—good or evil?"

He was silent for a moment; then, as he was about to speak, Signa held up her hand.

"Stop!" she said with a smile. "They used to say that I had the gift of reading character in faces; let me see if I can read the present Lord Delamere's in his portrait."

And she went along the line till she came to the end.

With an exclamation of surprise she stopped.

"Why, there was no portrait of him! There is the place left but there is no portrait!"

And she turned and looked at Hector Warren.

He shrugged his shoulders and smiled.

"Perhaps he has inherited the ugly face, and was too vain to have it painted and placed in the rank and file," he said lightly.

"Perhaps so," said Signa, laughing thoughtfully. "But I feel just a little disappointed."

CHAPTER VI.

It is the evening of the dinner-party, and Signa sits at ease beside the open window of her little room, putting on her black gloves and listening absently to the hub and buzz of conversation that floats upward from the dining room. From her window she had watched with amused interest the arrival of the guests as the carriages drove round the drive, and deposited their occupants just below where she was sitting.

First came the modest brougham of the doctor and his wife; then the chaise of Captain Jenks and his son; the third to arrive was of a different order, a great barouche, drawn by a pair of huge chestnuts, came thundering over the gravel; and Signa, looking out, could see by the immense coat of arms lozenged on the carriage that it belonged to some one of importance. Presently she heard a gentleman's voice giving some orders to the powdered footman who had descended to open the door, and the man's respectful "Yes, Sir Frederick."

Who "Sir Frederick" might be she did not know, but she remembered Mr. Podswell's remark that he liked to meet new people, and concluded that he was of some consequence. A few minutes later a pair of dark roans came up the drive, harnessed to a neat brougham of Morgan's build, altogether a tasteful and fashionable turn-out, that attracted Signa's attention and excited her interest, which increased as she caught sight of an elaborate dress inside the carriage.

She heard an old woman's voice, thin, but clear as crystal, and heard the servant answer her as "My lady."

"Lady Rockwell, the terrible!" thought Signa, with a smile. One or two other carriages arrived—heavy, lumbering landaus, smacking a vast respectability and solid wealth; then all was still outside, the servants hurried up and down the hall, and she knew that dinner had commenced.

It was time for her to dress then, and she went to the wardrobe and turned over the few dresses she possessed. They were all black, of course, and some heavy with crape. She chose one that was composed of a soft grenadine—a grenadine that had been woven in the East, and was as unlike the ordinary grenadine one buys in Oxford street as an Indian shawl is unlike a sack. It had been one of poor Jack Grenville's last presents to her; he had picked it up in Cairo, and she had kept it by her, little thinking that she should not wear it until the giver was lying asleep in his last slumber. She took it out with a sigh—a gentle sigh that was as full of love as unreasoning grief, and put it on over a soft cashmere, leaving the white neck and arms to gleam like ivory through the filmy, weblike tissue of the dress. Then she looked through the modest contents of her jewel case, but closed it again, and took a white rose from a vase, and put it where her brooch would have gone; and so, without any other ornament save a pair of bangles, which had been bought in Cairo with the dress, she had finished her toilet.

The tiny glass gave back only a portion of her tall, supple figure, and she did not study even so much or so little of it carefully. There was not much vanity in Signa; she must have known that she was beautiful, and that in no small degree, but the knowledge did not haunt her as it does smaller minds. She forgot it altogether for the most part, and valued her loveliness as a small matter of accident. To-night, if she had known it, that loveliness is, as the rector would have termed it, "really extraordinary"; for the keen, sweet air of the sea has brought a touch of color to her oval face, that was so pale and ivory-like when she first came, and the prospect of a little amusement has bestowed a subtle light on the dark eyes that renders them as dangerous as the beacons that shine on the coast outside Northwell Bar.

But she is not conscious of, or thinking of coming triumphs; she is simply leaning back with quiet, calm patience, waiting for the maid who is to come and tell her that the ladies have gone into the drawing-room, and smiling with amusement at the reflection that she who, as Jack Grenville's daughter, had been used to the society of the highest in the land, should be scarcely good enough for Aunt Podswell's country guests. Here again a smaller mind would have felt and shown resentment at being excluded from the dining room, but Signa only felt amused and highly gratified. She could imagine a dinner party at a country rectory quite distinctly enough to prevent her longing to be one of it.

One other thought she had—it was of Hector Warren; she had not heard or seen him. Had he come or had he resented the cool insolence of the tardy invitation and stopped away?—as they certainly deserved that he should.

A faint thrill of hope—too faint to raise a blush—agitated her, at the thought. She would like to see him again, she thought. And why not? It was only natural. Since her father died, and she had come to this place, who, beside Archie, had spoken a kind, sympathetic word to her saving the handsome, distinguished stranger? With a warm gratitude she recalled the scene of yesterday—his close, devoted attention, the respectful tone of his voice, when he addressed her, the kind glow of sympathy in his magnificent eyes; she recalled them all and—yes, she was not so foolish as to be afraid of admitting to herself that she should like to see him again.

A knock sets her thoughts flying like a flock of wood-pigeons, and she opens the door to find—not Mary, but Archie—Archie, with a disappointed face and a lack lustre eye.

"Isn't it a beastly shame?" he says, flinging himself half way on the bed.

"What's a beastly shame?" asks Signa. "Won't they give you any more almonds and raisins, Archie?"

"More!" he exclaims, with intense indignation. "I haven't had any. Mamma left word that I was not to go in to dessert, and—and, Signa, I shouldn't have thought Mr. Warren was a story-teller, should you."

"He did not strike me as being a particularly untruthful person, Archie," said Signa.

"Ah! I'm afraid he is, though," says Archie, with a strong sense of wrong in his voice. "Didn't you tell me, the other day, no lady or gentleman ever broke their promise?"

"I have a faint recollection of expressing such a sentiment," says Signa, with a smile. "Are you going to turn and crush me by proving that the sentiment is false, dear?"

"I don't know. All I can say is, Mr. Warren hasn't kept his promise. I got away from Jane, and crept down the stairs, just as the dessert wine was being taken in, and I passed the door three times; but he never took any notice. Then I waited and mewed—oh, quite loud! But he never took any notice of that; and when I mewed again, papa said, 'Drive that cat away, Mary!' and I came up-stairs. It's a beastly shame, isn't it, Signa? I thought he'd have kept his promise like a gentleman."

"Perhaps he didn't hear you. Did you see him?"

Archie shakes his head, and kneels on the chair at her dressing-table, to ransack her jewel-box.

"No, I couldn't see him. I expect he was behind the door somewhere. I saw Sir Frederic—him that papa says is so rich and so proud."

"So proud, is he?" says Signa, amused; "and what is his other name?"

"Blyte—Sir Frederic Blyte," replies Archie. "He is—oh, so rich indeed! and that land you see over there"—and he points across the bay—"is his. He's young and fair, with a big yellow mustache. I don't like it so well as Mr. Warren's, but Sir Frederic is very fond of it."

"Oh?" laughingly.

"Yes," says Archie, shrewdly. "He is always pulling it and twisting it up, like this, and he always talks about 'my place, and my land, and my people,' like—like one of the kings in the English History."

Signa laughs, and Archie, encouraged, goes on:

"Papa says he's the principal person in this part of the county, now that Lord Delamere never comes, and the Grange's shut up. I suppose if Lord Delamere came, Sir Frederic wouldn't like it. Then I saw Lady Rookwell—'old Rook,' papa calls her when she's gone; that's because she's got sharp eyes and a nose like a bird."

"That will do, Archie," says Signa, with a shake of the head.

"But it's true. Well, I won't say it if you don't like, Signa dear, but she is like a bird, and she speaks sharp and quick like, and she doesn't care what she says. One day I heard her ask papa why he preached the same sermons year after year, and he didn't know what to say."

"That was decidedly rude," says Signa, repressing a smile.

"Wasn't it? But papa does, you know. Then there was Captain Jenks. I heard him growling because Mary upset some wine on his back. And there was young Mr. Jenks, with such a big bunch of flowers in his coat! and I saw him wink at Mary, Signa dear."

"I think not. You must be mistaken," says Signa.

"Then he must have got a crumb in his eye," suggests Archie.

"That is more likely," assents Signa.

"Then there was Dr. Plumbe and Mrs. Plumbe, with a big cap on—like Mary's, only with more lace on it. Dr. Plumbe has got a red face, and he drinks a good deal of wine with papa after the ladies have gone——"

"Upon consideration, Archie, I rather think your mamma is wise in declining to permit you to join in dessert," says Signa, significantly.

"But I didn't see Mr. Warren," Archie sums up, with a sigh, "and when I do I shall tell him that he hasn't kept his promise."

"Will you come down now, if you please, miss?" says Mary, appearing at the open door.

"Good-night, Archie," says Signa, stooping and kissing him. "Perhaps you will sleep better for your abstinence from the deleterious sweets of dessert."

"What big words you use!" he says, laughing. "You think I don't understand 'em, but I do. Kiss me again, Signa. I say, how beautiful you look to-night! More like a princess than ever!" and he regards her with wide open eyes of childish awe and admiration. "Signa, don't let young Mr. Jenks wink at you, will you?"

"Not if I can prevent him, certainly not," says Signa, going to the door.

"And Signa, promise me you will come in and kiss me, as usual. I shall keep awake for you."

"I promise—and, unlike Mr. Warren, I will keep it," she says, with a smile. "Good-night, and be a good boy."

"Good-night," he says, and he follows her to the top of the staircase, looking after her over the banisters, wistfully.

Signa descends the stairs slowly, and Mary, waiting to open the drawing-room door, looks at her with a woman's critical appreciation, and wonders how they will "take" this beautiful young creature who is about to swim into their midst, the picture of youthful loveliness.

"Your flower is falling, miss," she whispers, earnestly, and she whips a pin from some mysterious hiding place, to readjust the blossoms—a thing she would not dream of doing for her mistress; but Signa's beauty and loveliness, and loving care of Archie, have won Mary's heart long ago.

"Thank you, Mary," says Signa, in her sweet voice, never sweeter or gentler than when she speaks to her inferiors, and Mary is fully repaid; she is also encouraged to add, hurriedly:

"What a lovely dress, miss! Lor'"—touching it reverently—"it is like a cobweb!"

"I am glad you like it," says Signa, smiling, and not by any means offended. "I am fond of it, too."

Mary courtesies and opens the door, and Signa enters.

So calmly and quietly that for a moment the three ladies scarcely notice her entrance. Signa looks round. Mrs. Podswell is at the tea-table, an old lady with palpable paint and powder, and a very nice but also palpable front, is seated, half asleep, in a chair by the window. Signa guesses that it is the terrible Lady Rookwell. And the doctor's wife is talking to Mrs. Podswell, and smiling with all her teeth, like the good-natured soul she is. Signa looks around, standing motionless for a moment, then she goes up to the tea table.

"Shall I help you?" she says.

Her voice, low as it is, rouses the sleeper, and her ladyship swings round with a start and a stare.

"Hem!" she says. "Who's this?"

Aunt Podswell coughs and signs as usual.

"My niece, Miss Grenville—Lady Rookwell. If you remember, I told you——"

"Yes, I know," cuts in her ladyship, abruptly, still staring at Signa, who seems totally unconscious of her gaze, and is apparently absorbed with the tea things. "I know; but you didn't say 'them'; we didn't expect—is the child deaf?"

"Deaf?" echoes Aunt Podswell, nervously. "No, dear Lady Rookwell."

"No? Then I'd better not finish what I was going to say. I hate vain people too much to help to make one. Send her to me."

Aunt Podswell nods and smiles in a weak, feeble kind of way at Signa.

"Lady Rookwell wishes to speak to you, my dear."

Signa, with a mischievous impulse, looks round from Mrs. Plumbe to her old ladyship as if she did not know where to go to.

Her ladyship chuckles.

"Very nice—very nicely done; and serves me right. Quite serves me right, my dear! I am an awfully proud old thing, but, like most bullies, I know when I have met my master. Amelia, introduce me to the young lady in proper form, since that is what she wants."

Aunt Podswell snorts indignant anger at Signa. Signa standing with a teacup in her hand, as calm and serene as a queen.

"Signa, Lady Rookwell," she stammers, awkwardly. "Lady Rookwell, this is my—my husband's niece."

"You have no cause to be ashamed of her, my dear Amelia," says the awful old lady. "Now, come and sit by me, my dear; your aunt can pour out the tea. And so your name is Grenville, is it?"

Signa seats herself beside the fierce-looking old countess, and inclines her head.

"Then why you must be Jack Grenville's daughter!" exclaims Lady Rookwell. "Handsome Jack! yes, yes, I know, my dear; forgive me," she says, quickly, as Signa's face pales; she the old lady gets her hand on the gauze-covered arm affectionately. "I know my stupid tongue always runs away with me. But I didn't mean to hurt you or awake sad thoughts. And you are Signa Grenville! I should have known it if I had met you anywhere. Why didn't you dine with us, eh?" and the sharp eyes seem to cleave through Signa's innocent bosom.

"Will you have cream in your tea, dear Lady Rookwell," murmurs Mrs. Podswell, hurriedly.

"Eh, my dear?" reiterates the terrible old lady, taking no more notice of poor Mrs. Podswell than if she had not spoken. "Hem! I understand. Strange! Some people have no gumption. If you had been amongst us, the meal would have been a little lighter—and more cheerful. Good heavens! Some people would give anything to have you sit at their dinner-table."

"I did not care to come," said Signa, taking pity on poor Mrs. Podswell, now crimson and half choking with mortification.

"Hem! Ah! Very nicely put. Bring me a cup of tea, my dear. I want to talk to you."

Aunt Podswell hands her with a glance of mingled dislike and deference. If she could but have guessed that Lady Rookwell would have taken to the girl as she has done, she would have had her to dinner; but there was no counting on the terrible old woman. Signa carried the cup of tea to her ladyship.

"Sit down," she says. "How long have you been here? I wish I'd known it, I'd have called. You can't talk about your father just now. No—no; I know. But you will be able some day, and then I'll tell you about him. The most charming and wonderful man I ever met; I'd have run away with him if he'd asked me; so would have the girls I know."

Aunt Podswell opens her eyes and ears.

"But there, I won't talk about him. Poor Jack!" and the old lady sighs and dabs a lace pocket-handkerchief against her eyes almost fiercely. "Never mind. But, great heavens! how like you are to him! And you have buried yourself here!"

Signa glances at her aunt, who has turned almost livid with vexation.

"Hem!" says her ladyship. "Ah, I see! Never mind. Bless my soul, what fools people are!" she continues, in a voice which she flattered herself was quite inaudible, but which Aunt Podswell could hear with awful distinctness. "Talked to me about the girl as if she was a commonplace sort of governess! And here she is like a pearl or a princess!"

"Will you take some more tea?" says Signa, feeling for her aunt, and wishing to stop her ladyship's soliloquy.

"No," says her ladyship, brusquely. "The men will be here presently, and I like a cup then. You must come over and see me. I live at the great, gaunt house across the bay. You will be bored to death and glad to get away again, but come all the same. Great heavens! Jack Grenville's daughter! In this hole!"

HUMOR FROM THE OLD LAND

My first is a proposition; my second is an invitation; my third is a bore, and my whole is a swindle. In-come-tax.

Prudent Swain: If I were to steal a kiss would it scare you so that you would scream? Timid Maiden: I couldn't. Fright always makes me dumb.

Cis: See if you can find the man in this picture puzzle, aunt. Spinster Aunt: It's useless for me to attempt it. I've been trying to find a man for thirty-two years.

Tommy: Teacher, may I go out to sneeze? Teacher: That is unnecessary, Tommy. You can sneeze in here without disturbing anybody. Tommy: I expect you never heard me sneeze.

"Did your grandfather live to a green old age?" was the query put by a girl to a young fellow. "Well, I should think so. He was swindled three times after he was seventy!" replied her sweetheart.

Mrs. Newed (sobbing): Oh, John! The cat has eaten all the angel cake I baked this morning. Boo-hooo! Newed (consolingly): Well, don't cry, dear! I'll buy you another cat to-morrow.

Little Boy (during his evening lessons at home, to his father): Papa, where's the source of the Volga? Father: I don't know. Little Boy: You don't know? And to think that to-morrow may be punished for your ignorance!

"Then this," asked the rejected suitor, "is absolutely final?" "Quite!" was the calm reply. "Shall I return your letters?" "Yes, please," answered the young man. "There's some very good material in them I can use again."

"My time," said Mr. Dustin Stax, "is very valuable." "That's what makes me doubt the benefit of vast wealth," replied the easy-going acquaintance. "It's bad enough to be bothered by the wasting of a few pounds, without being worried into illness every time you lose five minutes."

"How's your son, Uncle Mose?" "He's doin' right well, sah. You'd be surprised to see him, sah." "I suppose he's got over all his childish tricks. Probably he'd consider robbing an orchard pretty small business now?" "Yes, indeed he would, sah. He wouldn't rob nuttin' smaller den a bank now, sah."

Little Johnny, having in his possession a couple of bantam hens, which laid very small eggs, suddenly hit upon a [illegible] fowl run, Johnny's father was surprised to find an ostrich egg tied to one of the beams, and above it a card with the words: "Keep your eye on this and do your best."

In a country school, while a class of boys were being examined on the play of Julius Caesar, one of the boys was asked what an orator was. The boy replied: "An orator is a man who makes speeches." The inspector then said: "I make speeches, and I am not an orator." The boy then replied: "A man that makes good speeches."

Dressed in the latest motor-cycling costume, with goggles all complete, the motor cyclist gaily toot-tooted his way by Regent's Park towards the Zoo. Suddenly he dismounted, and said to an urchin: "I say, my boy, am I right for the Zoo?" "You may be all right if they have a spare cage, but you'd ha' stood a far better chance if you'd had a tail."

"Officer," said a stranger in a city of the wild west, "I want you to arrest those two men over there for forcing me into a game of poker with them and then swindling me." "Y'r asking too much, stranger," replied the policeman. "I can't arrest them gents. One's th' honored mayor of this 'ere city, an' th' other's th' chief of perlice."

There are many kinds of celebrity. When Haydon, the painter, visited Stratford, he held forth about Shakespeare to some rustics he met in a wayside inn. They told him that Stratford then contained "another wonderful fellow, one John Cooper." "Why, what has he done?" "Why, zur, I'll tell 'ee. He's lived ninety years in this here town, man and boy, and never had the toothache."

KEEPS CHILDREN WELL MAKES THEM ROBUST

HERE IS GOOD ADVICE FOR THE HEAD OF EVERY FAMILY.

Rapid growth, work at home and in the school-room, are sure to tax the strength of every child, and often prove the beginning of a chain of weakness that lasts through life.

Give your sons and daughters a fighting chance. Give them good home surroundings, fortify them with education — but above all else do everything possible to insure for them perfect health in years to come.

In no way can you destroy weakness and build up health so surely as with Ferrozone. It's the concentrated nourishment in Ferrozone that enables it to do so much good. It contains the very elements that are needful in building up bone and sinew, in vitalizing and strengthening the blood. The appetite Ferozone brings will gladden any parent's heart, and when color, spirits, vim and energy increase day by day then you know what grand work Ferrozone is doing. Because it makes and keeps you healthy, because it is pleasant, harmless and sure to do enormous good—you and your children should use Ferrozone every day. Sold by all dealers in 50c. boxes, six for $2.50, or direct by mail from the Catarrhozone Co., Kingston, Ont.

A SOBER ENGLAND.

Improvement Has Been Achieved by Resolute War Methods.

"Fifty per cent. less public drunkenness and disorder than before the war" is one of the results of the resolute methods applied by England to the regulation of the drink problem nearly a year ago.

The Central Liquor Control Board, of which Lord d'Abernon is chairman, took over the control of Great Britain's liquor problem on May 15, 1915.

Designed to affect areas such as munition centres and seaports, it has gradually extended its scope of operation until 25,000,000 people are directly affected by its decisions. The board [illegible] point of absolutely closing saloons which it considers their existence prejudicial to the interests of national productiveness.

At present saloons may sell intoxicating liquors only between the hours of noon and 2.30 p.m. and 6.30 and 9.30 p.m. on week days, and on Sundays between 1 and 3 p.m. and 6 and 9 p.m. Limited hours are prescribed also for the sale of bottled liquors for consumption off the premises; the prohibition of selling liquors on credit and the absolute stoppage of treating in saloons, clubs, or any other places.

In addition to the diminution of drunkenness and disorders, Lord d'Abernon said one of the most satisfactory results is the increased efficiency and productiveness on workers in munition areas. Continuing, he said:

"A bright side of the picture is the gratifying readiness with which the public has shown itself willing to assist in seeing that all should conform to the drastic regulations of the last nine months. You may attribute this truly remarkable attitude to the public's belief that the restrictions are in reality war necessities and their willingness in a great crisis to subserve personal convenience to national efficiency.

"Among the public at large it is remarkable also there is widespread and practically general approval of such provisions as that prohibition treating.

"Regarding the restriction of hours, more divergence of opinion exists. The board has sought to confine the consumption of alcohol to those hours which conflicted least with the working day and which coincided best with ordinary meal hours.

"If you ask my general conclusion I should say that the period has been too brief for any final opinion to be expressed, but that there can be no doubt that there is ample ground for belief that a vast improvement has been achieved. The drop in public intemperance and of convictions resulting from it which occurred in each area, directly the orders were put in force, has been steadily maintained up to date. It is often said, 'Men cannot be made sober by Act of Parliament.' My belief is that under a really effective system of regulation three fourths of the drunkenness which prevailed before the war would never exist again."

THE HOUSE FOR GIFTS.

THE FIRST FLAMING MAPLE ON THE HILLTOP.

Lone sentinel that signallest thine own
Which yet stand verdant. "Summer flown.
The winter cometh. Be ye warned of me!
Put from thee what belongeth not to thee,
Each forest tree and shrub, but first thy dress
Dye deep in autumn's glowing loveliness
And stand before God's mandate to destroy,
Riotous with the purple tints of joy,
That all who look upon thee may well know
The best of life's things come when these things go."

Thus, too, old age that creepeth on apace
Saith unto mortals: "Yet a little space
And ye shall perish. Be ye warned of me!
Put from thee what belongeth not to thee.
Each soul in flesh entangled; first, thy brow
Smooth from its wrinkles even as mine is now
And stand before God's summons to be gone,
Glad and serene, for all who look upon
To ponder and within their hearts well knew
The best of God's gifts comes when life's gifts go."

The Horseshoe Legend.

Here is an explanation of the old horseshoe superstition: St. Dunstan was a skilled farrier. One day while at work in his forge the devil entered in disguise and requested Dunstan to shoe his "single hoof." The saint, although he recognized his malign customer, acceded, but caused him so much pain during the operation that Satan begged him to desist. This St. Dunstan did, but only after he had made the evil one promise that neither he nor any of the lesser evil spirits, his servants, would ever molest the inmates of a house where the horseshoe was displayed.

Washing White Things.

If you can keep your white silk gloves and white silk waist from the light and sunshine while they are drying after being washed they will stay white so much longer. It is exposure to light that helps to turn them yellow. A white waist may be rolled in a Turkish towel until it is ready to be ironed. Gloves may be washed at night and dried in the dark. If this is not feasible, they may be dried in a closet or other dark place. Waists may be treated the same way if one does not wish to roll in a towel. If you wish to keep gloves and waists white, you must also remember to wash them before they become very much soiled and be sure to use a good, fine white soap in washing them and to rinse out every bit of the soap before drying them.

Minard's Liniment Co., Limited.

Sirs,—I have used your MINARD'S LINIMENT for the past 25 years and whilst I have occasionally used other liniments I can safely say that I have never used any equal to yours.

If rubbed between the hands and inhaled frequently, it will never fail to cure cold in the head in 24 hours. It is also the best for bruises, sprains, etc.

Yours truly,
J. G. LESLIE.
Dartmouth.

TO FRANCE.

Sister of ours! who kept the world in cheer,
Whose eyes were beautiful, whose lips were sweet,
When at thy rich-carved door thou late did'st hear
The wasting tread of the Invader's feet—

That ancient enemy who had returned
to plunder what expressed the soul of three,
The fires, some thought were dead, all brightly burned,
And thou did'st pledge thine all for Liberty!

France! the world knows from History's blood-dipped pen
What rich thoughts, what great deeds were thine of yore;
And Fame will tell how they stout-hearted men
These trying years, the brunt of battle bore—

How Germany lies buried at Verdun,
How Freedom there a glorious battle won!

—Alexander Louis Fraser.

◆

An African Myth.

Kilimanjaro, where General Smuts is marching from victory to victory, is believed by the natives to be crowned with silver, and on this ground has been identified with the "silver mountain," which Aristotle supposed to be the source of the Nile. It was discovered by some missionaries of the British Church Missionary Society in 1848. A revolt of mountain tribes against Teutonic tyranny took place in 1892, which resulted in a disastrous defeat of the German forces and the death of Baron Bulow. After that the Kaiser insisted on the withdrawal of all British missionaries from Kilimanjaro, the pretext being that their presence encouraged rebellion and diminished German prestige.

"Meat Prices Will Not Come Down" is the cheerful news from the Department of Agriculture. Meat prices will not worry the man or woman who knows that a Shredded Wheat Biscuit will supply more real body-building nutriment than beefsteak or eggs and at much less cost. Shredded Wheat remains the same price, the same high quality, supplying all the nutriment a man needs for a half-day's work. Two shredded wheat biscuits with peaches and cream or other fruits make a complete, nourishing meal at a cost of not over five cents.
Made in Canada

Economy General in England; Workers Indulge in Jewels

London.—Now that England is putting all of herself into the war, the serious effort of all classes to aid by the strictest economy may be observed on every hand.

In the words of an expert at the Treasury: "Englishmen, especially the working classes, ordinarily regard strict economy as a mean thing to practice, but the belief gradually is taking hold of them that victory cannot be attained unless the civilians left behind carry out the full duty of saving their money and placing it at the disposal of the Government for the prosecution of the conflict."

The part being played by the working classes in this national economy stands out prominently in the everyday life. During the first twelve weeks of the sale of the Government's war saving certificates working people paid into the treasury $11,655,000 or an average of $970,000 weekly. The purchasers ranged from munition workers and farm hands to servant girls and tea-shop waitresses. The certificates yield interest at 5 per cent., compounded for five years, being purchased at about $3.72 (fifteen shillings and six pence) and entitling the owner at the expiration of the five years to $4.57 (a pound).

In addition to that sum the working classes are responsible for a large share of the total of $200,565,000 that has been paid through the post office and trustee savings banks for portions of the 4½ per cent. war loan. Then again they have had a share in the $100,000,000 worth of post office exchequer bonds purchased during eighteen weeks up to May 31 last.

CONDITIONS FORM A PARADOX.

Yet conditions here are paradoxical. Perhaps no such situation ever existed in any country before. While large numbers of people, either through depreciation in their trades or an increase in prices and taxation, are no farther from the margin of subsistence than they were in peace time, others are being employed on a scale hitherto unknown and therefore have larger incomes than ever.

These include women, boys and elderly men; and women in receipt of separation allowances through the services of their sons or soldier husbands, as well as old age pensioners. Families whose normal wage-earners are enjoying no increase have surplus incomes through the combined efforts of the several members.

That is why the shops in London are in many instances doing better than for many years. These include the diamond and jewelry mart in Hatton Gardens, where a big boom is in progress as a result of the new custom of the munition workers in investing their surplus incomes in such adornments. It is a new ration of the distribution of wealth that England is now enjoying, and thousands of homes are enjoying comforts and even slight luxuries that they never before possessed or hoped to possess.

The working classes seem to have more pleasure in life and more pride. The world war has brought them their opportunity, and it is as a result of this unexpected chance that they are able to hand over such liberal sums toward paying for the war.

The totals mentioned as showing the participation of the working classes, though reflecting their spirit to aid, give but the slightest idea of how the war has revealed another thing the tremendous investing reserve of the population. The latter point is illustrated by the fact that the English have raised since the beginning of the war by loans of various kinds in the United Kingdom alone a total of $9,265,000,000.

The war's cost to Britain during the current year alone is reckoned at almost as large a sum as that total, or at $8,000,000. The problem of grasping the significance of so vast a sum is, of course, almost impossible for the average man. A faint idea of its meaning, however, may be gained by comparing it with the fact that the total value of the exports of the United States last year was $3,500,000,000, perhaps the largest in the nation's history.

The manner in which the National War Savings committee has organized and is conducting the task of saving is in keeping with the tradition of British thoroughness. It is a revelation. The committee, under the chairmanship of the Right Hon. G. N. Barnes, a well known labor member of parliament, includes active business men and economists and financial experts of recognized ability.

One of the supreme tasks of the committee has been to see that the country strikes the golden mean in the matter of paying for the war out of her $75,000,000,000 of accumulated wealth, through selling back securities representing investments in neutral countries, and by tapping the income of the people.

500 COMMITTEES AT WORK.

Five hundred local central committees, branches of the larger organization, have been organized throughout the country and are working with the sympathetic support of the local authorities. The latter include schools and colleges, churches and religious associations of all kinds, trade unions, men's brotherhoods, women's societies and federations, friendly societies, co-operative societies and similar bodies.

It is the influence and practical assistance of all of these organizations throughout the United Kingdom that has managed to roll up so many millions sterling toward paying for the conflict.

Something of the tremendous task in saving confronting the United Kingdom was indicated to the associated press by a financial expert of recognized ability.

"By his budget for the current fiscal year, from the end of March last to the first of next April, the chancellor of the exchequer arranged to raise by taxation 500 millions sterling," he said. "According to the requirements of the war that left thirteen hundred millions to be found in some other way. That other way is saving. We can best attain our end in this way by refraining from buying things which we can safely do without, thus liberating labor, machinery and capital and rendering it available for the purposes of the government in prosecuting the war.

"We reckon that, the flower of our industrial manhood having gone into the army and navy, all those that are left behind are likewise needed for the purpose of winning the war. Our feeling is that we have no right to ask them to work for us in the production of things with which we can easily do without. So that by systematic saving in this respect we shall be increasing our export trade, by means of which we obtain the sinews of war at this time.

"It has been truly said that every shilling spent unnecessarily on ourselves is given to Germany and every shilling saved strengthens the cause for which we are fighting. Because everything from abroad used here aids in increasing our debt to foreign nations and thus impairing our financial position, we are making a particular effort to save on articles from abroad. We firmly believe that by systematic saving we can shorten the war.

REVENUES STAGGERING IN BULK

"The incentive of the people as a whole to save is also explained by the tremendous figures of the national revenue and expenditures. The national revenue for the year ending March 31, 1916, was $1,683,835,000. This sum was $550,365,000 more than the revenue for 1914-15, and by far the largest sum ever paid into the treasury in any single year in the nation's history, the increase being due to the new sources of taxation discovered by Reginald McKenna, Chancellor of the Exchequer. But the expenditure chargeable against the revenue was $7,795,790,000, a sum which is exactly five millions in excess of the expenditure chargeable in the year 1914-15. There will be a similar excess of expenditure over income in the current year; the demands being made on the treasury are, in fact, greater than they have ever been."

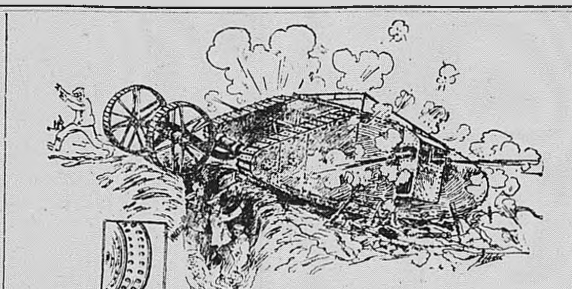
The Government's very latest expedient for raising revenue is the war extra treasury certificate, issued under a special act by the lords commissioners of the treasury, in amounts of one, five and ten thousand pounds—roughly, $5,000, $25,000 and $50,000, respectively.

These certificates run for two years from the date of issue at the price, for the time being, of 90 per cent. They are in effect treasury bills, so that the price represents a discount rate of 5 per cent. per annum. The investment return on the capital invested is correspondingly higher, being a trifle over 5½ per cent. per annum reckoned at simple interest added at the end of two years.

At the present moment, just after the first of the new certificates have been issued, it looks as though they might be a competitor of the successful twelve months' treasury bill, and also of the new exchequer bonds.

No better illustration of the genuine concern of every portion of the population to aid in the movement for national economy is to be found than the plan, recently formulated, of asking for subscriptions to enable each child in the London County Council schools and the Church of England schools to start a savings bank account with a shilling. So successful has the movement been that officials of the Government have given the subject in several instances individual attention. The Chancellor of the Exchequer and Mrs. Reginald McKenna recently presented bank books, each credited with a shilling, to 400 school children in the Surrey villages of Alton-on-the-Hill and Tadworth. Others are now following the Chancellor's example in different portions of the country.

The spirit of the children was shown in Liverpool, where, by collecting and selling medicine bottles, they raised money to purchase an ambulance for the Red Cross Society.



One of the British "Tanks" in action. The drawing is from an actual photograph of the traveling armored land forts that have been so effective for the British on the Somme front. The caterpiller wheels and moveable guide wheels permit the tank to cross trenches and shell craters, crush wire entanglements, etc. Large toothed wheels, covered with armor (a section of the wheel is shown in inset) operate a continuous track.

WHEN YOU ARE PLANNING A NEW BARN

Fresh Air and Abundance of Light Essentials Beware of Dampness Pian of Horse Stable to Accomodate Fifteen Head.

On many farms the stabling accommodation of the live stock in the winter does not receive the consideration it deserves. No one would think of keeping dairy cattle out of doors all winter, but many farmers—especially in the West, keep their horses out all winter long and allow them to rustle pretty well for themselves. Although horses can stand a great deal of cold, and if they have the shelter of a few trees and receive sufficient food they will come through the winter fairly well, it is better to keep them in during the night. In the day it does no harm—good in fact—to let them stretch their legs in a field or a large paddock.

The stable where the animals are kept at night must be well ventilated and well lighted. Sometimes we find horses that have been allowed out all day stabled at night in a small barn without windows or any kind of ventilation, and with a tightly fitting door. The natural result is that the moisture from the breath and bodies of the animals condenses, and the walls and ceiling of the stable become coated with frost. The horses get heated up when confined in such close quarters, and the air becomes vitiated, through being breathed over and over again, and disease and sickness follow in the natural course of events.

The building in which horses are kept need not be warm in fact, if it is too warm there is danger of them getting cold when turned out during the day time but it must be dry and free from draughts. Horses cannot be expected to work well in the summer if they are kept confined in a dark, damp, evil-smelling stable.

Fresh air ranks with sunlight as one of the prime necessities in any building for housing live stock. Foul air is certain to cause disease. A stable lacking in proper ventilation is neither sanitary nor comfortable. Even dairy cattle can stand cold, but no class of stock will thrive in damp, badly ventilated quarters.

SYSTEM OF VENTILATION.

The first thing to decide upon then, when one is planning a stable is the system of ventilation. In a good system of ventilation no animal should be in a direct draft, but at the same time no animal should be in a corner where the fresh air does not circulate, or from which the foul air is not carried off. The currents of air should be all in one direction—that is away from the cold walls and towards the outlets.

There are two systems of ventilation the King and the Rutherford systems. In the King system the fresh air comes in at the ceiling and the foul air goes out at the floor. In the Rutherford system the fresh air comes in at the door and the foul air goes out at the ceiling.

Although the King system provides a somewhat warmer stable, the air is not so pure as in the Rutherford system, so that, everything considered, the latter is to be preferred. In this system the fresh air is brought in through a number of small openings and so distributed that it will diffuse throughout all parts of the stable. Usually one outlet is provided for every four inlets.

Eight square inches of inlet should be allowed for each cow and ten or twelve square inches for each horse. It is not advisable to make the inlets larger than six by eight inches. They should be placed along the walls so that they will distribute the fresh air as far as possible through the entire stable. The currents of air should be all in one direction—towards the outlets. It is best, therefore, to have the outlets in the centre of the building and flues extending up through the loft above the roof.

The air breathed by animals contains a considerable quantity of moisture. If this moist-laden air is kept too long in contact with a cold wall or ceiling, the moisture will be deposited, and unless the walls are particularly well insulated, will freeze. For this reason the construction of the walls is important. It is impossible almost to prevent hoar frost from forming on walls—especially if they are formed of straw or concrete—unless there is a dead air space between the inner and outer walls.

It is always advisable no matter what material is used to build the walls, to have the inner walls lined with wood.

The outlets should be not less than sixteen inches in diameter—twenty-four inches for preference. The flues should be built of two ply lumber with tar paper between to make them as airtight and warm as possible. They should have as few angles and turns as possible, and be carried above the ridge in the form of a cupola. It is better to have the sides of the cupola open rather than covered with slats, and if its roof is carried well over the walls there is not much danger of snow or rain beating in the open sides.

The stable whose plan is given in the illustration is intended primarily for housing horses, but it can be adapted for keeping both horses and cattle by changing a few of the interior fittings. It is forty feet long by thirty feet wide.

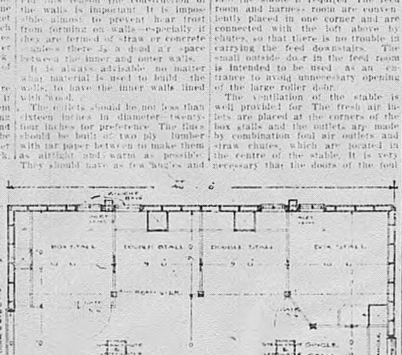
There are three single stalls and three double stalls and three loose boxes, so that it will accommodate fifteen horses if two horses are kept in each of the loose boxes.

The double stalls are nine feet wide, wide enough to allow a division to be put in if single stalls are preferred. The three single stalls are five feet wide, and two of the box stalls are ten feet six inches by twelve feet, the third being ten feet by ten feet. All stalls and boxes are equipped with mangers connected by a chute to the loft above, thus saving much labor in feeding hay.

Down the centre is a driveway so that a wagon can be driven right into the stable if required. The feed room and harness room are conveniently placed in one corner and are connected with the loft above by chutes, so that there is no trouble in carrying the feed downstairs. The small outside door in the feed room is intended to be used as an entrance to avoid unnecessary opening of the large roller door.

The ventilation of the stable is well provided for. The fresh air inlets are placed at the corners of the box stalls and the outlets are made by combination foul air outlets and straw chutes, which are located in the centre of the stable. It is very necessary that the doors of the foul air outlets which open into the loft be kept firmly closed when they are not being used as straw chutes, or the ventilation system will not work to best advantage.

—Canadian Countryman.



BOOKS WORTH WHILE

THE WRACK OF THE STORM.—By Maurice Maeterlinck (McClelland, Goodchild & Stewart, Toronto).

In this soul-searching book Maeterlinck is seen as he has never appeared before: as a grief-ridden patriot whose heart is riven, whose spirit is overwhelmed by (to use his own words) "the beast from over the Rhine." The great Belgian has seen the floodtide of German savagery at its worst. He has penned those deeds his eyes have photographed; in the white-heat of his great inspiration and mind were they committed to paper, and there they glow, and always shall glow as the harshest indictment Germany will be called on to answer. If by nothing else than this book alone, Germany will stand before the bar of humanity for years to come as the world's thug.

Many a lover of fine books has conscientiously tried to read Maeterlinck, only to give up in the attempt; feeling, as they did so, that the Belgian's great genius was "too much for them." Whether one has to be a "highbrow" to truly appreciate his books is a debatable point; but such a requirement is not called for in the reading of his latest work. There is a thread of gold running through all its pages; and when the book has been laid down—terrible as this war has appeared to most of us—one feels a new sense of coldness and numbness that such tragedy could overtake a people as it did the Belgians. And as much as the world thinks it knows of Belgium in this war, it knows nothing till it reads Maeterlinck in this—the great dirge and epic of the master mind. Anyone can read "The Wrack of the Storm". It is simple, beautiful and terrible. Yet Maeterlinck's bent is always as it was: he treats things in the same mystic, fatalistic way so characteristic of his writings, but in doing so he glorifies the dead as to make death a beautiful transition. There is much comfort in the pages of this book for the mothers who, perhaps, like mothers will, wonder if their boys, now dead, won salvation, too, when they fell. Maeterlinck will lighten their heavy hearts. He will show them death as he has caught its vision.

There is hatred, too, in this book, and in justifying its presence, the author says in the preface: "I tried to lift myself above the fray; but the higher I rose, the more I saw of the madness and the horror of it, of the justice of one cause and the infamy of the other. It is possible that one day, when time has wearied remembrance and restored the ruins, wise men will tell us that we were mistaken and that our standpoint was not lofty enough; but they will say it because they will no longer know what we know, nor will they have seen what we have seen."

It might be said that the book is a compilation of all that Maeterlinck has written since the outbreak of the war; and there is no aspect or feature thereof he appears to have left untouched.

In "After the Victory" he strikes a stern note of warning against any blameworthy pity weakening the retributory justice to be inflicted on Germany by the Allies. . . . "from the depths of the most fearful injustice Justice is best perceived. . . . This is the moment, therefore, for us to frame our inexorable resolution. We are face to face with reality now; let us look at it well and pronounce our sentence; for this is the moment when we hold the proofs in our hands, when the elements of crime are hot before us and shout out the truth that soon will fade from our memory."

Maeterlinck condemns Germany as a whole. He will not believe her people are the victims of a feudal caste. "If eighty million innocent people select and support a monstrous king, those eighty million innocent people merely expose the inherent falseness and superficiality of their innocence; and it is the monster they maintain at their head who stands for all that is true in their nature, he represents their eternal aspirations which lie far deeper than their apparent and transient virtues."

The author says the unconscious and the sub-conscious are impervious to all agencies for good; so that, if forgiven of this carnival of terror, the German spirit, with its unvarying elements, will remain absolutely the same, and given the chance, even a thousand years hence, would perform with the same black infamy the black drama she is enacting now.

It is a soft and winning portrait he sketches of his beloved King Albert. "Of all the heroes of this stupendous war one assuredly of the most unsullied—is the great young king of my little country. He had the wonderful good fortune to realize and bestow a conscience in one of those dread hours of tragedy and perplexity when the best of consciences waver."

Commenting on the rare heroism of his countrymen, the author says: "Since the days of the great martyrs men have never suffered death more simply for a simple ideal."

One notable essay of the volume is "The Dead Do Not Die." This is a wonderful bit of writing, and gives one a totally different conception of our common end. As for this war's grim and daily exactions of our noblest manhood Maeterlinck says: "All this heroism poured out on every side does not leave our planet; and the reason why the courage of our fighters seems so general and yet so extraordinary is that all the might of the dead has passed into the survivors virtue goes out of every man who falls while performing a deed of glory; and that virtue drops down upon us; and nothing of him is lost and nothing evaporates in the shock of a premature end. He gives us in one solitary and mighty stroke what he would have given us in a long life of duty and love. Death does not injure life; it is powerless against it. Life's aggregate never changes. What death takes from those who fall enters into those who are left standing. The number of lamps grow less, but the flame rises higher."

Writing in a similar strain "In Memoriam" the great Belgian says: "Those who die for their country should not be numbered with the dead. We must call them by another name. They have nothing in common with those who end in their beds a life that is worn out, a life almost always too long and useless this death on the field of battle, in the clash of glory, becomes more gracious than birth and exhales a beauty greater than that of love. They are not beneath the earth in the depths of their tombs; they lie deep in our hearts, where all that they once were will continue to live to act; and they live in us even as we die in them."

Maeterlinck is perhaps at his best where, in a simple vein, he writes "On the Death of a Little Soldier," who, in pre-war days, was a boxing master at Nice, one Raymond Bon by name. It is a touching tribute Maeterlinck pays, and it fits, as he himself says, every hero who has fallen in this struggle.

His warm and genuine tribute for their support must indeed be gratifying to the Entente Allies, especially England of which he writes: "As for you English, you had to come to our assistance, that is to say, to send us the troops which you had ready under arms; but nothing compelled you either, after the first useless engagements, to devote yourselves with unparalleled ardor and self-sacrifice, to hurl into the mortal and stupendous battle the whole of your youth, the fairest upon earth, and all your riches, the most prodigious in this world, nor to conjure up from your soil, by a miracle which was thought impossible, in fewer months than the years that would have seemed needful, the most gallant, determined and tenacious armies that have yet been marshalled in this war. Nothing compelled you, save the spirit of emulation, the same love of duty, the same passion for justice, the same idolatry of the given word which, that it may be sure of doing all that it promised, performs far more than it would have dared to promise."

In "Rereading Thucydides," the author has given some inspiring messages. Then there is his article on Edith Cavell, wherein he writes with solemn pride of the noble nurse. Telling of her death he writes: "Destiny left nothing undone for the purest glory to emerge from the deepest shadow. In the depths of that shadow it concentrated all imaginable hatred, horror, villainy, cowardice and infamy, so that all pity, all innocent courage and mercy, all well-being and all sweet charity might shine forth above it, as though to show us how low men may sink and how high a woman can rise."

There are many other beautiful essays and papers relative to the war in this book, which want of space precludes from honorable mention. In a word, however, the "Wrack of the Storm" is a book that will enrich the simplest and the ripest minds alike. No war student can afford to be without it. Every book-lover is the poorer if he does not read it. Already have Paris and London given it the cachet of a classic.

The heavy cordings and deep flounce of chiffon cloth are interesting details of this wrap, which is developed in blue faille silk.

Fliers Need Iron Nerve

To be an aviator in the French army [illegible] as the human being can be. To ascertain if the would-be aviator has the requisite iron nerve he is subjected to a complicated system of tests both of his physique and psychology. He must show that sudden shocks don't throw his nerves out of gear, he must show the quickest response to stimuli, but show that he makes only the proper response; he must be able to show not the slightest tremor when a revolver is fired unexpectedly a few inches from his ear. Some account of the system of testing applicants for the aviation corps is given in an article in the October issue of the Popular Scientific Monthly, which says:

"The war aviator must be so constituted that the sudden menace of danger, of shells bursting about him, of machine gun bullets raining about him will find him calm and collected. He must face a crisis [illegible] ability to escape with a whole skin.

"Polo players, lion tamers, big game hunters proved to be the best aviators in the early days of the flying machine, simply because they were so constituted that they were not appalled by danger. Indeed they courted perils. Men of this rare type are hard to find. Besides every [illegible] with the dare devil spirit does not necessarily constitute the ideal aviator. Even timid business men have their moments of reckless daring. What is wanted is the stuff which Daniel Boones and Shackletons are made.

"But in addition to the dare devil spirit, has the prospective aviator muscular and nervous endurance? After clutching for an hour the control levers of a speedy monoplane, is his hand firm or does it tremble? After witnessing a terrible accident, is his heart beat, his 'cardiac rhythm', unaltered? Moreover, are his nervous and muscular systems so well balanced and so nicely correlated that his hands promptly obey every external command.

"These important questions must be answered in his favor if he hopes to get a job as a pilot with the French [illegible] do not want dare devils to drive their machines, if they are dare devils, and nothing more.

"For the purpose of finding out just how favorably each applicant can answer these difficult questions—and he cannot answer them with his lips—the French war department employs an ingenious testing machine. Psychologists have known and have employed what is called the d'Arsonval chronometer for many years. But it is unlikely that the delicate mechanism has ever been put to such an interesting task.

"One part of it tests the pulse beat. Another determines the tremor of the nerves. Another apparatus discovers the ability or the inability of the applicant to withstand fatigue. After he has undergone several simple examinations the candidate is seated in a chair and the final supreme test is applied.

"How would most men act if a revolver were discharged unexpectedly behind their ears? The answer is simple. They would leap into the air; their heart beat would probably double; they would [illegible] and tremble as if they had the palsy. In so doing they would promptly disqualify themselves as aviators in the French army.

"In testing the possibilities of an aviator various contrivances are attached to the body, all having a definite purpose. Tubes lead from these devices to a slowly rotating cylinder, on which paper is wrapped. These terminate in points which record the slightest variation in his physique.

"When the clockwork is started, and he is gently wondering what the queer apparatus is all about, a deafening explosion takes place a foot behind him. The record made at that moment on the revolving paper determines whether or not he is to become a French aviator. If his heartbeat, his respiration and his arm nerves and muscles show no undue excitement on the paper cylinder, he goes to work. But if the stylus actuated by the pulse beat dances about the rotating sheet he is disqualified. It is only natural that his reflex nervous system should respond in some way to this sudden impulse, but the man who tests him knows how wide a variation from normal may be tolerated.

"Next in importance to the revolver shot test is that which ascertains the candidate's promptness in acting upon an external command. For instance he is told to press an electric button when he feels a light touch on his left ear-lobe, or when he sees a light flash. His quickness in acting upon these sensations determines whether or not he could meet the sudden contingencies which occur in the air—in a word, whether or not he could handle his 'plane over a roaring battlefield without losing any part of his nerve."

A debutante frock is here shown in which silk net and fringed taffeta are cleverly combined, the latter arranged in deep flounces allowing the net to show.

Some Humor Frae Scotia

"Did you ever see a company of women perfectly silent?" "Yes, once. Somebody had asked which of those present was the eldest."

"Yes, sir, one hour's uninterrupted reading each evening would make you—." "Uninterrupted? Where do you think my wife spends her evenings?"

"Willie, have you said your prayers yet?" his nurse asked him one evening, as he slipped into bed. "Golly, yes," he answered. "Why, I'm five weeks ahead."

Tommy—We're going to move soon. Sammy—How do you know? Tommy—How do I know? Didn't me mother lemme break a winder t'other day and didn't say nothin'?

Lady—I'm worried about my complexion, doctor. Look at my face? Doctor—You'll have to diet! Lady—I never thought of that. What color would suit me best, do you think?

Mistress (engaging servant)—I hope you have nice print dresses, and I expect you always to wear caps. Mary—Yes, mum. I'm very particular to wear caps. I shouldn't like to be taken for one of the family.

"It is the duty of everyone to make at least one person happy during the week," said a Sunday-school teacher. "Yes," said Bobbie. "That's right. What did you do?" "I went to see my aunt, and she was happy when I went home."

"What's up, Bill? You look scared." "Should think so. Been a big explosion at our house." "Much damage?" "Damage! Why, my father and mother was blown right out of the window. The neighbors they say that it's the first time they've been seen to leave the house together for fifteen years."

A local reverend, meeting one of his parishioners the other Sunday morning coming from the "club" a little the worse for wear, accosted him sharply thus: "George, don't you know where all drunkards are bound to go?" "Wey, aye, sor," replied George, respectfully touching his cap. "Wherelvor they get the best beer!"

Principal—You gave me to understand, Mr. Meecher, that sickness was responsible for your absence last Saturday. Odd that I should see you getting into the Leopardstown train at Harcourt street, and you didn't appear to be very sick, either." "Not at that time, perhaps, sir," replied Meecher, bravely; "but, oh, dear! you should ha' seen me after the last race."

The employer of a Polish girl who has learned quickly to speak English tells of her attempted mastery of the telephone. After its use was explained to her, she was eager to answer every call. A ring came, and she jumped to the 'phone. "Hello," came from the receiver. "Hello," answered the girl, flushed with pride at being able to give the proper answer. "Who is this?" continued the voice. "I don't know," exclaimed the maid. "I can't see you."

A young exquisite, who thought that an eyeglass would improve his appearance, went into an optician's, but was a long time trying to find one to suit him. None of them would do; they were either too strong or too weak for his sight. At length he found one that was just right, and inquired the price. Surprised at the selection he had made, the optician, looking at him in blank astonishment ventured to ask what number of glass he would like for the frame he had picked out.

In a certain old-fashioned country bank the clerks have a quaint habit of speaking of one another as "officers" of the bank. A new waiter, fresh from Ireland, was recently taken on at the restaurant they all favored. To him a clerk said on his first morning: "Pat, have any of the other officers been here yet this morning?" "Sure, sor," was the demure reply, while Pat's eyes twinkled, "it was hardly three minutes ago that wan av thim went out of the place with his sword behind his ear!"

"Got a bad toothache, have you?" said the cheerful one, meeting a pal with a swollen face and a morose expression. "Tell you what I did last time I had that kind of trouble." "Going to tell me you had the beastly thing out, I suppose," mumbled the sufferer, sulkily. "Nothing of the kind, sonny. I just went home and let my little missus make a terrific fuss of me, and begad, sir, in a little while she'd kissed all the pain away." "Sounds a good scheme," returned he of the raging molar, more hopefully. "Will your wife be at home now, do you think?"

A rosy-cheeked youngster, dressed in his best clothes, entered the village post office and carefully laid a huge slice of iced cake on the counter. "With my sister, the bride's compliments, and will you please eat as much as you can?" he said. The postmistress smiled delightedly. "How very kind of the bride to remember me," she cried. "Did she know of my weakness for wedding cake?" "She did," answered the youngster, coldly, "and she thought she'd send yer a bit of it this afternoon just to take the edge off yer appetite before she posted any boxes off to her friends."

A teacher in a small village school near Edinburgh was taking his class in a mental arithmetic lesson. After "tables" had been repeated, he commenced giving a series of mental sums, and presently asked an intelligent little Scot: "How many marbles would you get if I gave twenty to be divided between you and Johnny McGregor?" After a moment's hesitation, the youngster answered: "I canna tell, sir." "How's that?" "Weel, sir," said he, "ye see, it's accordin'. If ye gie 'em when we's both here, we'd hae ten each; but if ye gie 'em tae Johnny when I wasna present, I'd only get aboot five; while if ye gie 'em tae me tae share oot when Johnny wasna here, I dinna ken whether he'd hae ony at a'."—Glasgow Citizen.

NOT HIS IDEA OF IT.

(Rochester Times.)

For the first time in his life the unintellectual man had been lured in to a museum. Among the scientific treasures shown him by his intellectual friend was a case full of stuffed birds. There was one specimen that rather interested him. He asked what it was, and was told that it was a cassowary.

"I have heard of the cassowary," said the unintellectual man, "but this is not my idea of it."

"Perhaps not," said his friend, "but it is God's idea."

Until I truly loved I was alone.
Mrs. Norton.

Had Severe Cold ON HER LUNGS.

RAISED PHLEGM AND BLOOD.

Never neglect what at first seems to be but a slight cold. You think perhaps you are strong enough to fight it off, but colds are not so easily fought off in this northern climate, and if they are not attended to at once will sooner or later develop into some serious lung trouble such as bronchitis, pneumonia, and perhaps that dreadful disease, consumption.

Miss Kasye McDonald, Sydney Mines, N.S., writes: "Last winter I contracted a severe cold, and it settled on my lungs. I would cough and raise phlegm and blood. I had the cough for a month, and had medicine from the doctor, but it did not seem to do me any good. I really thought I had consumption.

My friends advised me to use Dr. Wood's Norway Pine Syrup, which I did, and it gave me great relief. I am very glad I used 'Dr. Wood's,' and would recommend it to every one."

You can procure Dr. Wood's Norway Pine Syrup from any druggist or dealer, but be sure and get "Dr. Wood's," when you ask for it as there are a number of imitations on the market, which some dealers may try to palm off on you as the genuine.

See that it is put up in a yellow wrapper; three pine trees is the trade mark; price 25c. and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

Toronto.—The volume of autumn trade has been satisfactory for wholesalers and retailers in practically every branch of mercantile business. The principal drawback to business is a difficulty in securing goods. Most manufacturers are booked up with orders and are unable to make deliveries in time. Labor shortage and scarcity of raw materials are joint causes. The feeling universally expressed is that fall payments have been very well met. Drygoods, wholesalers assert that the week's business is considerably better tha nfor the same period last year. Groceries, boots and shoes, and hardware lines are all seasonably active. Spring orders are coming in large quantities.

Montreal.—Wholesale trade is generally healthy. Drygoods jobbers and wholesalers say that there is a strong demand for winter lines, and that delivery is impeded by postponed shipments or orders from the mills. Grocery lines are fairly active. The leather market is strong, and there is a scarcity of raw material. Country trade is reported to be good, and payments are satisfactory.

Ottawa.—Prices of commodities are firm and numerous advances have been made. Drygoods, millinery, hats and caps, and boots and shoes have been experiencing a lively trade. Groceries are fairly active.

Hamilton—Trade conditions are very good. Sales of seasonable autumn commodities in dry goods and boots and shoes are said to be brisk. The labor movement from country to city has relieved the labor situation to a slight extent. Grocery lines are fairly active. Country produce still maintains very high levels, and the consumption does not appear to be greatly affected by the present prices. Recent rains have aided farmers in their fall plowing and much-belated work is being rushed. Collections are generally good.

London.—Business is maintaining the pace set earlier in the fall, and indications point to a continuance of the present activity. Drummers are bringing in large orders for spring delivery, and wholesalers are busy with sorting orders. Drygoods are particularly active. Groceries, boots and shoes and hardware lines are reported to be quite active.

Winnipeg.—Wholesale firms in the west are experiencing a better autumn trade than ever before in their history. Cold weather has given marked stimulus to the dry goods trade. Drugs are higher, on account of the embargo placed on many articles by Great Britain. Paints and hardware have been advanced.

Calgary.—Mercantile trade is quite active, and with the high prices now being obtained for farm produce of all kinds, country trade is fairly good. The cold weather of the last two weeks has brought greater activity to the dry goods merchants. Groceries are high, and prices promise to go higher in the near future.

Vancouver.—Industrial and business activity is continuing to be very satisfactory. Remittances are reported to be fairly good.

Quebec.—Wholesalers and retailers in various lines are satisfied with the volume of business done at the season. The demand is steady and good prices are realized. City and country collections are fair.

What makes Jinks so proud of his ancestors? I never heard any of them did anything." "That's exactly the point. So many persons' ancestors did do things which got them into trouble with the police."—Richmond Times-Dispatch.

Had Weak and Dizzy Spells.

WAS CURED BY MILBURN'S HEART AND NERVE PILLS.

Mrs. J. S. Nicholls, Listowel, Ont., writes: "I was weak and run down, my heart would palpitate, and I would take weak and dizzy spells. A friend advised me to take your Heart and Nerve Pills, so I started at once, and found that I felt much stronger, and my heart was ever so much better in a short time. I cannot praise your medicine too highly for it has done me a world of good. My husband has also been bothered with heart trouble ever since childhood, and finds quick relief by using your valuable pills."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally known as the very best remedy for all troubles arising from the heart or nerves.

Milburn's Heart and Nerve Pills are 50c. per box, 3 boxes for $1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

IT'S a mighty smart man who can always keep to the windward side of the ash sifter.

+ + +

A woman who can be a member of a church choir for ten years and never had a squabble, would make a fine wife for any man.

+ + +

WILSON'S platform of "Peace, Preparedness and Prosperity," might as well read "Putty, Paste and Penpoints."—Guelph Mercury.

+ + +

THE Farmer's Advocate puts it up to farmers this way: "If you sell all your cows and pigs this fall when grain is scarce, what will you do for cows and pigs next fall, when grain may be plentiful?"

+ + +

TOO many dailies seem to have no other mission than to be a sale catalogue of a department store bent on throttling the retail trade of a district, a province or half a continent—Simcoe Reformer.

+ + +

THE Walkerton Telescope refers to Harold Jarvis as the "veteran" soloist. We generally regard a veteran as wearing a war medal and whiskers—so when the Detroit warbler gets up in the wilds of Bruce again, the Telescope man would be well advised to be under the back shed.—Guelph Mercury.

+ + +

THE Guelph Herald says that the plan adopted in that city of having the police collect the poll tax and paying them 15 per cent. of all they collect, is working out well. City Treasurer Rose reports that $1,110 has already been paid in to his office and the collection is only a little more than half completed. The largest amount previously collected in any one year was a little over $700.

+ + +

EDITORIALLY the Owen Sound Advertiser makes a plain, reasonable statement which in passing is worth noting. It says "if a good newspaper is not an asset to a town, neither is a good council; and if a good newspaper is an asset to a town, it is then clearly the duty of every citizen, interested in his town, to co-operate with the editor of the paper so that as far as accuracy, reliability and infallible truth are concerned, that paper will be all that can be desired. Co-operation is the key of success, it is as essential to harmony and sympathetic understanding; and is an integral factor in the production of a good newspaper—as it is an integral factor in the maintenance of a good council."

+ + +

When the history of the great war is written, one of the finest chapters will be dedicated to the heroism of "France's soldier priests." Serving as private or military chaplain to troops, they have shed fresh lustre on the glory of France. When the war broke out, France needed men to place against the strong and numerous German forces, and as the French regular troops and reserves were not sufficient to cope with the invading Teutonic hordes, the French War Office had to call for volunteers. The Archbishop of Paris endorsed the appeal of the War Office and urged the young priests who could be spared from their clerical duties in the different parishes throughout France to join the forces. Thousands offered their services as army chaplains, others joined the rank and file of the army, and to-day there are more than 20,000 priests on the battlefield, either fighting or giving the last rites of the Catholic Church to the dying in the hospitals or on the field of honour. Many have sacrificed their lives for their country, others have been taken prisoners, and are now doing their benevolent work in the prison camps in Germany. Many heroic deeds on the battlefields have been reported, and many a wounded French and German soldier has been carried on the back of a "soldier priest" to a place of safety.

+ + +

INCREASING signs of weakness are betraying themselves in the Ontario government. It seems to be absolutely impossible for them to have any firmly fixed policy on anything. The difference is all the more noticeable when contrasted with the firmness of Sir James Whitney. There is something almost pathetic in the wreck of the Conservative Party and organization in this province. Governments come and governments go—and the going of the Conservative government in Ontario is rapid. Nowhere is the "Wobble" greater than on the prohibition issue. The most skillful prophet could not forecast what the members of the government will think about it the week after next. During the South West Toronto campaign, the shout of the government was against prohibition. The Prime Minister himself, although he has steadied since then, gave his endorsation to a wine-and-beer license candidate. The Toronto News backed the boat still more and Lucas made his famous "ear to the ground" speech, in which he associated his "friend Ferguson." Now there is another turn of the wheel. Ferguson himself declares "the temperance act is here to stay without varying one jot or tittle until the war ends." People naturally ask, "What will the government say next?" If there is anything the public likes in a government it is firmness and courage. The Hearst government is neither firm nor courageous, and their break-up is coming with a rush.

+ + +

THE report that the Dominion Government will be asked to make good any deficit resulting from the operations of the Canadian Patriotic Fund in 1917 is wholly without foundation. On the contrary, preparations are under way for the greatest series of campaigns that the Fund has yet set in motion it being the desire of the Executive Committee that in the latter days of January local campaigns be held in all parts of the country where provision has not already been made. Through these campaigns it is hoped to place the Fund in a position to meet all claims upon it in 1917. In order to second the efforts of the supporters of the Fund in each district by educating the public to the claims upon it, liberal use will be made of newspaper space. The work of the Fund grows with the growth of our armies. There is no escaping from this result, and in consequence the Fund has to call upon the people of Canada to supply, through one channel or another, the sum of thirteen and a half million dollars in 1917. It is an immense sum, yet every cent of it must be raised if Canada is to keep her pledge to the families of the men who are fighting her battles—the pledge that these families will be looked after, will be kept from want, will be maintained in a position of comfort at least equal to that which they enjoyed when the bread winners were at home. That pledge must be kept. By one means or another, the thirteen and a half million must be forthcoming. There may be difference of opinion as to what sources of revenue should be tapped, but not a whisper is to be heard, the Dominion over, against the maintenance of the Fund until its work is accomplished—until the war is ended and the soldier lays down his rifle to take his place again at the head of his family. The proportion which Ontario is to be asked to contribute is six million dollars, being practically the amount which it is estimated will be paid out to the dependents of Ontario soldiers. This means that there can be no decrease in subscriptions from any source but that on the contrary, from certain districts and classes there should be a substantial increase. It is pointed out by the officials of the Fund that the argument that the whole sum required should be raised by Federal taxation is unsound in several particulars. For one thing, the Dominion would have to treat every person on the same basis, whereas the Fund discriminates between those who need and those who do not need. Non-discrimination would cause an increase in cost of about seven million dollars. For another thing, the burden, if the Fund were supported by the proceeds of debentures, would fall largely on the soldiers when they return, instead of wholly on those who stay at home. The honorary secretary, Sir Herbert Ames, has spent the past month in the Canadian West, in the interests of the Fund, and he reports an extraordinary keen determination to support the Fund at the cost of any necessary financial sacrifice.

Walkerton Public School

(Omitted last week)

Class I.

Sr. Primer—Jack Symon, Emma Leake, Edith Long, Walter Monk, Willie Fennell, Clarence Boelhow, Florence McCarter, Arthur Whitehead, Allie Leake, Audrey Fennell, Billie Johnston, Geo. McGregor.

Mid. Primer—Herbert Dietz, Marjorie Bell, Jack McDougall, Percy Nutting, Arthur Bolden, Milton Ramsay, Ernest Nutting.

Jr. Primer—Garnet Van Horne, Dorothy Ernest, Alex. Shaw, Henry Taylor, Mildred Silver, Marjorie Taylor, Helen Reichenbach, Eddie La Porte, Lennox Winters, Milne Harrison, Wilbur Hampson, Clayton Riehl, Franklin Spieran, Eldon Knechtlar.

A. D. Thompson,
Teacher.

Grade II.

First Class—Honors—E. Dietsche, S. Cumming, V. Bell, H. Bush, M. Playter, T. McEwen, R. Hunter, H. George, L. Searle, M. Appel, H. Ernest.

Pass—M. Shaw, G. Wallace.

Primer—Honors—Sheila Taylor, E. Taylor, E. Watt, M. Jones, M. Fraid, A. Kearney, G. Schwindt, D. Lancaster.

Pass—M. Hunt, P. Webb, L. White, M. Pletsch, J. George.

W. Thompson,
Teacher.

Pte. Frank Boyle, a popular young Paisley soldier, who enlisted with the 71st was killed in action. Pte. Boyle came of a splendid fighting stock. His grandfather, the late John Stewart, of Paisley, was out with William Lyon McKenzie in '37.

Letters From Overseas

Walkerton Boys write Home of Their Experiences at the Front—Interesting Letter on Conditions in England.

AN INTERESTING LETTER

The following letter from a Walkerton boy, Corp. Wilfred Yack, contains a good deal of out-of-the-ordinary information which Telescope readers should find most interesting:—

On Active Service,
France 20, 10, 16.

Dear Parents:—

At present we have "some" place for headquarters, and to tell the truth my imagination never pictured anything to compare with what I have seen since coming to this portion of France. From the outside all you can see is a few bricks, the remains of what used to be trees, and rifles and other equipment smashed to atoms. After surveying this for some time you suddenly discover an opening in the ground with a flight of steps and down you go about forty feet through the solid white rock. Of course it begins to get rather dark, but with the help of a candle you find your way through a long winding passage about two feet long and seven feet in height, which slopes gradually downward and leads to the different apartments. The rooms are well boarded and even papered, and when I say that I have slept on a spring bed for the first time in many months I am not exaggerating in the least. I can't send you a spring bed very well but I will enclose a sample of two of the wall paper. Every part has two or three outlets and is well provided with shelves, tables, hooks for hanging clothes on and many other little things which tend to make this almost as comfortable as any home above ground. Now the place alone must be at least fifty or sixty yards in length and there are places similar and even better than this all around this spot, so you may judge what an awful task it was to root Fritz out at all. Many of these underground houses are still occupied by the Germans but they are beyond their fighting stage—enough said. I fear that if Fritz were able to return, he would be rather indignant at the manner in which we have taken possession, and perhaps he might even drop a few souvenirs to share up among us, but he never will, that's certain. Now there are many more very interesting objects in this neighborhood and half the time I imagine that I am some millionaire tourist viewing the scenery. Yes, I have a very powerful imagination. Well, I have given you the one side of the picture; the other I will not attempt. It is beyond all description. So much for our home. I suppose the weather will not be very pleasant for several months now, and to-day everything is very wet and muddy especially down the line. Having no intention of writing a history of the war, I guess I had better ring off talking about myself.

It is certainly good of you all to fix up that little parcel for me, and everything will be very welcome and appreciated I can assure you. You often ask me what I would like you to send. Well, a good nice not too large fountain pen and some ink tablets would be just O.K. You see a 17-inch shell hit my other pen and put it out of action.

By the way give my best regards to all who enquire for me.

Your loving son,
Wilfrid.
12080, 11th Bde., M. G. Coy.,
B. E. F., France.

LETTER FROM GUS

Earl Forsythe, has received a nice letter from Mr. Gus Jenkins, which will be read with interest by his many old friends here.—

Dear Earl:

I expect you will think me an awful cat keeping you so long waiting for a letter, but have been rather a sick boy since I got your last letter and haven't felt a bit like writing to anybody, as you can well imagine, after ten months in hospital with the after effects of spinal meningitis, but am a little better now, and have been discharged from the army, but took my discharge in this country as I thought it would be nice to be at home for a while after five years away.

Well, how are you getting along without the Savoy to cheer you up eh! Don't suppose you miss it (or me) much, do you? Golly I often wish I were back at little old Walkerton, there's usually somebody there to talk to even if there's nothing much else to do, and here there is absolutely nobody now, everybody I know has joined the army, and left me in the lurch, and with everybody else in khaki, one feels such an outsider to be wandering about in civies, still, it cannot be helped, and I have the satisfaction of knowing that it is not my fault, as I did try anyway, and that is more than some people I know can say.

How is Norval (commonly called Tough) getting along these days? Has he got any thinner lately? I expect he will be mad at me as I know that I owe him a letter and have ever so long, but cheero! tell him I will write to him very shortly, will you?

Give my love to Tommy Reichenbach and all the rest of them and tell them all that I hope to see them all in Spring, with luck, although I may join the army again, if I am fit by the Spring, (which I hope to be) and then le bon Dieu alone knows whether I shall ever see any of you again or not.

Remember me kindly to all the grown ups, also Sandy McCarter to whom please convey my sincere sympathy re Reg. I have been intending to write him for ever so long. Fred Henniger, Bobby Gibson etc, not to mention Frank, by the by, you might ask him what the annual subscription is for the Telescope delivered in England, will you? I should like to have it, as it would keep me in touch with all my Brant and Bruce friends, and I don't want to drop them all as you can imagine, certainly I had some awful good times in Walkerton and the vicinity.

Gus.

+ + +

LETTER FROM ENGLAND

Mr. Thos. Dixon had a letter from a friend in England which gives a good idea of local conditions there in the agricultural districts at the present time.

Lilburn Cottage,
West Lilburn,
Alnwick,
Yorkshire
October 24th, 1916.

My Dear Sir,

We have had very unsettled weather all summer and has continued up to this time. The harvest was late and has only been finished in this district during the past few days, but in later districts much of the corn is still out, standing as there are seldom more than two dry days together. Corn crops were fairly good but I hear that the yield is not good and all kinds of grain is very high. Wheat and barley up to 65d. per quarter, oats 39d. Cattle and sheep also continue at high prices. Great numbers of annual cast ewes have made over 80d. each for breeding purposes in other parts of the country. Fat cattle and sheep are not quite so dear as they were early in the year. The turnip crop is a great failure in many parts but in this part they are fairly good. Potatoes are a great failure in this country as well as in other parts. In all my experience I never saw potatoes go to the bad as they have done this season. They appeared to grow well up to a certain time then something came over them and the leaves fell off and left the stems bare just as the tubers were only half formed, and many plants have no tubers on them. The potatoes are not so bad in Scotland but very high in price. I have just ordered four tons from East Lothian where the finest potatoes are grown, at £12 per ton R. carriage over that. Last year I got them for £5.

I hope Elliott has not come to grief at the Front, as so many are doing. A great number of young men from round here have fallen lately, and the cry is for more men to go to fill their places. I serve on the Local Tribunal to enquire into and hear appeals from those that are called up for service and decide whether they can be done without or otherwise. It is a thankless office as it is impossible to serve all parties. I fail to see how farmers are going to do next year as all the young men are to be called up and there are not older men to take their places. I fear the war is a long way from being ended. No doubt Germany is becoming weaker and feeling the strain very much now but they cannot give up till they are thoroughly beaten. The Germans have not been so successful with their Zeppelins as formerly, having lost three near London lately. The last one brought down was near where my late brother Walter's family reside, but they were in bed and asleep at the time and did not see it. You will see pictures of it in the Sphere. I see that the wheat crops in the Canadian West are disappointing which is unfortunate for both them and us. I expect that there is still much of last year's crop available for export. My apples this season is almost a complete failure as I have only two trees with about half a crop. In fact, my garden has done badly all round this year all for want of sunshine. You in Canada appear to have had an extra amount of it. We are now approaching winter which I dread as I feel and bear cold so much.

Electricity On The Farm

The first farmer in Grey County to put in an electrical equipment and the first to tap the Eugenia system for a farm power load is Mr. Thos. J. Mercer of Markdale. He has wired for lighting his own house, his mother's residence, two large barns, pump house, blacksmith shop, two drive sheds and one hog pen. With a half horsepower motor he can run the washing machine, the churn or a cream separator. An electric iron is a blessing to the women folk. A half horsepower power does the pumping with ease, but will probably be exchanged for a 2 horse power motor which can be used for various other power purposes. A 10 horsepower motor is intended to do the heavy power work on the farm. It is mounted on skids and can be drawn from place to place for use in cutting corn, sawing wood or chopping grain.

GIRLS WANTED

For Office work to fill the places of men who have gone or are going to the Front. Young women can render the country real service by preparing to take positions in banks and business offices. Special Courses of training in Book keeping, Shorthand and all other Commercial subjects now in progress. Students admitted any time. Illustrated catalogue free.

POETS' CORNER

THOSE TIGHT-WAD CHAPS

Old tight-wad sat in his easy chair,
On his face was a smile of glee;
Oh, I don't care what comes or goes,
For I have lots of money, said he.

I own my houses and own my farms,
My land from debt is free,
So what takes place in other lands
Makes no odds to me.

They say the Belgians are in distress
And there's the Red Cross Society,
But I did nothing to start this fuss
So they'll get no chink from me.

They say they are asking for money
and men
To keep this country free
But I pay my taxes every year,
That's all they will get from me.

Some are lonely and some are sad
And some sick there may be:
But I'll not lend them a helping hand,
I have no time, says he.

So old tight-wad went to bed
As happy as could be,
And he dreamed the world was made
of gold
And he owned it all, did he.

But we would warn these tight-wad
chaps
That there will come a day,
When they must leave their houses
and lands,
And they cannot then say nay.

So we would advise them to loosen up,
And help their fellowman,
And while they are living on this earth
Do all the good they can.

News About Town

Michigan has gone dry by 70,000 majority.

Mr. W. D. Bell of Chesley attended the Assizes here last week.

Judge Greig again reserved decision on the Keake drain for a month.

Teeswater folks are sending a barrel of apple butter to their town boys in the 160th Batt'n.

Mr John R. Shaw, manager of the Canada Furniture Manufacturers, Ltd. was a week-end visitor in town.

Prov. Inspector W. F. Miller of the Inland Revenue Dept. was here last Thursday on his semi-annual visit.

Alexander S. Smith M. P. P. of Moosomin, Sask., a native of Kincardine, died on Friday, aged 18 years.

Dr Lackner, of Kitchener was married at Kincardine on Nov. 7th to Mrs. M. H. Ballard, daughter of Rev. D. B. and Mrs. McRae of that town.

Mr. H. E. Yeomans, a Mount Forest merchant, discovered something was destroying his celery and other toothsome stock in the cellar of his store: suspected rats: set a trap and caught a muskrat.

Mr. Amos Hoover, who was called to Oshawa about a month ago owing to the serious illness of a sister, returned home on Thursday. His sister suffered a slight stroke of paralysis but is now greatly improved. Mr. Hoover states that Oshawa is progressing wonderfully. The new McLaughlin and Goodrich factories there are among the largest in Canada. He also visited friends at Stouffville, Markham and Toronto.

Mayor Little of Owen Sound received the following telegram from Col. McFarland:—"Battalion out of Quarantine to-day. All well and in good spirits." Other advices received by wire by relatives of men in training with the 147th, Battalion in Amherst say that the battalion has been released from its quarantine and are now engaging in their usual training and past-times. Major Dobie says that the "invalids" were afflicted with the queerest kind of diphtheria he ever saw, and apparently it was either not this dread disease at all or some exceptionally mild form of it, for not one of the patients were seriously ill with it. Notwithstanding it will be a relief for the townsfolk to know that the battalion is again "in circulation."

+ + +

An Old Timer

A Chepstow resident who refuses to grow old is Thomas Stapleton. Mr. Stapleton came into the bush at the age of 9 before there was a roadway at all at Chepstow. He was his widowed mother's eldest lad and he drove a cow all the way from Goderich via Kincardine, the trip from Kincardine to Chepstow taking three days. He saw a good deal of the hardships of former days but is still hale and hardy. For the past eighteen years he has been one of Pat Murray's faithfuls out at the Swamp.

+ + +

Presented With Club Bag

A Citizens' meeting was held at the Town Hall on Friday night to say good-bye to Mr. Norman Walford, G. T. R. agent, prior to his leaving for Hespeler. Ex-Mayor R. H. McKay took the chair and called upon a number of citizens including Messrs. John Rowland, Prin. Morgan, Rev. G. C. Rock and others who voiced the general regret that is felt at Norman's departure from the town, and wished him every success and prosperity. A very handsome club bag was presented to Mr. Walford, by Mr. John Rowland on behalf of a large number of citizens.

98 From Knox Church

No less than 98 young men of Knox Church Congregation have volunteered for Empire Service and already four of these sacrificed their lives on the field of battle. This is surely a record to be proud of. The young people of the congregation are arranging at present to send a Christmas parcel to every soldier on the Honor Roll.

+ + +

Shell Buried Walkerton Boy

Charles McKay, a former Walkerton boy, who has been doing his bit at the Front, had a memorable experience recently when a German shell completely buried him. He fared better than the men who came to his rescue, one of them being killed while engaged in digging him out. Charlie spent a month in the hospital as a result of the experience but is again on the firing line. His parents, Mr. and Mrs. D. C. McKay, are now living in Toronto.

+ + +

Doctor's Fatal Carelessness

Mrs. Moir, wife of Rev. D. A. Moir, a former pastor of Walkerton Methodist Church, passed away at her home in St. Catherines last Thursday. Her death was caused in a peculiar way. Two years ago she was operated upon for appendicitis and the physician left a small pair of pincers in the wound where it was sewn up. This finally becoming apparent by pain another operation was performed and the instrument was discovered. It had however so badly worked its way in that death resulted. The late Mrs. Moir was 51 years old and leaves no children.

+ + +

Down In Florida

Mr. William Hacker, formerly of Walkerton and Mildmay, writes to a friend in town from Florida that he enjoyed his first summer in that sunny clime, not missing a single night on account of heat. He has planted 700 orange trees which are doing well so far and has built a comfortable house on his fruit farm. The oranges and grapefruit are not as large as last year but around Auburndale, in the Lakeland District, where Mr. Hacker is located, they are a fairly good crop. There are now 200 miles of asphalt road in the county and a hard surfaced road all the way to Tampa and also to Jacksonville.

+ + +

A Fine Record

Thirty-five years ago on Wednesday last the Northern Business College of Owen Sound was established by its present principal, Mr. C. A. Fleming. During that time, no less than 8,000 students have been in attendance and hundred of graduates are holding responsible positions to day throughout the length and breadth of North America as well as in Great Britain, Australia, China and Japan. The school has always kept abreast of the times in its methods and to-day has a system modern in every respect. The College has expanded from time to time to meet its growing needs and to-day offers its students accommodation equal to the best in Canada.

+ + +

Party All Missing

Mr. Adam Reid of Pinkerton expects to have particulars shortly regarding the death of his son. Lieut. A. E. Reid D. S. O., who was first reported missing on Sept. 17th, and later reported Killed in Action on the same date. His brother, Capt. J. A. Reid, who is at the Front in connection with the A. M. C., is investigating the matter, and will no doubt have further information soon. It appears from a letter written by Lieut. Reid shortly before his death, that he had committed himself to a hazardous enterprise which required long and careful planning. He spoke of having three plucky fellows under him and these no doubt were to share in the expedition, which had to do with the clearing of an important and difficult bit of German trench. The raid was carried out successfully and the party returned to their own lines. It was then that Lieut. Reid learned that some of his men were left behind wounded, and taking six of his men, he went back after them. According to Capt. Reid's latest letter, not one of the seven had since been heard of. Further information is no doubt in the hands of the authorities now, judging by the cable which announced that Lieut. Reid had been killed in action and particulars are expected from his brother, Capt. Reid.

+ + +

Twelve Great Serials in 1917

Some of these are story-groups like those inimitable stories of pioneer life in the New Brunswick wilderness in which Theodore Roberts shows himself a master. There will be serials for girls, serials for boys, serials that hold the rapt attention of all readers of either sex and all ages. And the fiction is only a corner of The Companion. It is brimful and running over with all manner of good things. There's not a better $2.25 worth of periodical reading anywhere. Send for the Forecast for 1917, which discloses some of the delightful secrets of the new volume.

New subscribers for 1917 who send $2.25 now will receive all the issues for the remaining weeks of 1916 free; also The Companion Home Calendar for 1917.

Our offer includes:

1. The Youth's Companion—52 issues in 1917.
2. All remaining November and December issues of The Companion free.
3. The Companion Home Calendar for 1917.

WALKERTON IN 1886

Old Copy Of The Telescope Gives Interesting Glimpse Of This Town Thirty Years Ago.

Mr. Sam Vogan came across an interesting old copy of the Telescope, one day recently. It was a special Northern Fair edition published on October 7th, 1886, by the late Mr. Jabez Stevens.

Practically every merchant and business man in the town had his advertisement in the special edition, but of these only a mere handful are now doing business in Walkerton:—S. W. Vogan, R. E. Truax & Co., C. Fox, McCrum & Co., D. Traill, J. G. Hibbert. Other Walkerton business men at that time were:—E. D. Ayers, drygoods and groceries; J. Lee & Son, general store; Geo. Rife & Son, music warerooms, Hamilton & Guggisberg, general store, Walkerton Felt Factory, S. F. Taylor & Son, Felt Factory; Reynolds Bros., drygoods; Campbell, the Taylor, C. Rettleburn, boots and shoes; R. H. McKay, fanning mill factory; Robinson, Richardson & Co., Central Grocery; H. A. Hevill, stoves and tinware; A. B. Kaiser, jewelry; H. A. Wilson, druggist; E. Steinbaugh, grocer; Louis Wisser, merchant taylor; W. J. Nickle, furniture manufacturer; Sheffield Bros., drygoods and millinery; R. B. Clement, flour mill; Kennedy and and Bunston, woollen Fisher & Fulford, Walkerton foundry.

The report of the opening of the Fall Show says there were 5000 entries in all and predicted a big crowd. At that time the Fair lasted a whole week! Robert Gowanlock was the president, Albert Sherrington, vice president, and Jacob Seegmiller, secretary.

A few local news items are here reproduced:—

The old Methodist Church has been sold to Mr. Peltz for eleven hundred dollars. It is to be turned into a broom factory.

The business at the Walkerton station is larger this season than it has been for the last five years. There has been a decided increase in outward and inward freight as well as in passenger business. This speaks well for Walkerton.

Mr. M. McNamara has been appointed Electric Light Inspector for Walkerton District. Those having electric lights on their premises will require to procure a certificate from the Inspector, otherwise their insurance will be invalidated.

The store of Messrs. Hamilton & Guggisburg will be lighted with electric light. The store will be kept open day and night during exhibition week. An extra staff of hands has been engaged so that visitors may depend upon being promptly served.

The By-law offering $5000 to Mr. Anderson to establish a chair factory is to be submitted to the electors in November.

The first snowfall of the season on Friday, Oct. 1st.

Mr. Sherrington the Vice President of the "Northern" brought in last week a potato which turned the scale at 3 lbs. 2 oz.

Dr. Wheatly of Mildmay died on Monday last.

The firm of Messrs. R. Truax & Co. as the people are well aware, employ a great number of hands and quite a number are musically inclined and are organized into a band under the title of Truax Co's Band. It was formerly known as the Citizen's Band, but nearly all the bandsmen are employees of R. Truax & Co., and the firm have always taken a lively interest in the band.

Will Serve Six Months

A young man, named Roy Metcalf, was brought down from Wiarton on Saturday to serve a six months' term at the County Gaol for raising money under false pretences. Metcalf, who claims he is a commercial traveller hailing from Kitchener, issued two cheques for $10 each on banks where he had no funds. When he was arrested at Hamilton, he claimed that he was a member of the Dufferin Co. Batt. and was waiting to be outfitted.

CARRICK COUNCIL

Mildmay, Nov. 6, 1916.

Carrick Council met this day pursuant to adjournment. All the members present. The Reeve in the chair. The minutes of last meeting were read and adopted.

FINANCE REPORT.

The following accounts were referred to the Finance Committee and recommended to be paid.

G. G. Baninger, ½ cost railing Formosa sidewalk	$95 58
Deutinger & Beingessner, ½ cost painting railing at Formosa	3 56
H. Heimbecker, ½ cost tile culvert on Howick townline	4 00
Wm. Polfuss rep bridge con 12	10 20
H.L. Weber, putting in tile culvert at Ambleside	4 00
Wm. Reuber, rep bridge con 10	2 00
R. Renber, 172 yds gravel ...	12 04
Wm. Goll, cleaning culvert	2 00
Mildmay Gazette, tax receipts	6 00
Gore Fire Insur. Co., insurance on town	20 00
Tp. of Howick, ½ cost culvert on townline	4 02
C. Wendt, bal account watches for soldiers	15 00
P. Lobsinger, rep to grate	50
J. Flemming, ½ ch gvl Culr 1 ...	1 16
J. Palm, 203 yds gvl and 2183 ft concrete walk	112 01
J. Vogan, rep culvert con 2	1 00
L. Helar, 27 yds gravel	1 89
J. F. Schnett, pictures of King and Queen for Hall	3 88
A. Herbrich, 9 yds gravel	63
Geo. Schwalm & Son, lumber account	10 35
J. Polfuss, bal gravel account	4 15
A. Rehhoph, hauling tile and lumber and rep 2 culvert	4 50
V. Fischer, 143 lds gravel	8 58
J. Hoffarth, tile for culvert ...	2 26
Liesemer & Co., hardware acc't	23 23
Merchants Bank, repayment of Loan and Interest ...	1850 77
B. Goetz, damage to buggy by obstruction on road	3 00
M. Pilsinger 1 mtg., 1½ dy R&B	6 75
L. Doering, 1 mtg., 1 dy R&B ..	5 10
J. Montag, 1 mtg., ½ dy R&B.	3 75
A. Lewis, 1 mtg., 1 day R&B..	5 00
C. Wagner, 1 mtg., 1½ dys R&B.	6 25
STATUTE LABOR COMMUTATION	
W. Clubine, 285½ hrs work ...	19 95
N. Kreitz, 25 hrs	3 75
G. Schnurr, 130 hrs	19 50
H. Weber, 33½ hrs	5 02
P. Kreitz, 33½ hrs	5 02
J. Hutten, 73 hrs with team ...	21 90
F. Lobsinger, 33 hrs	9 90
J. Weller, 8½ hrs	1 35
G. Schwalm, 38½ hrs	11 55

By-law No. 11 was read a first time.

Montag—Lewis—That by-law No. 11 be now read a second and third time and finally passed.—Carried.

Doering—Wagner—That this council do now adjourn to meet again on Friday the fifteenth of December next for the transaction of general business.—Carried.

BRANT TP. COUNCIL

Brant Council met as per adjournment on the 6th of Nov. Members all present. Minutes of last meeting read and adopted.

Nesbitt—Weir—That this Council grant 1500.00 towards the British Red Cross society along with donation of $1.00 from Mrs. Wm. Kerry Jr.—Carried.

Rowand—Johnston—That By-law No 89 A. D. 1916, a By law authorizing the signing of the contract between the municipality of Brant and the Hydro Electric Power commission of Ontario, be now read the usual number of times, signed and sealed.

Rowand—Weir—The Municipal Council of the Township of Brant having passed a By-law authorizing the signing of the agreement with the Hydro Electric Power commission and having provided funds for the construction of the system we hereby request the commission to perform the construction work necessary for equiping the Hamlet of Elmwood with a distribution system for lighting, Power, street lights etc.—Carried.

Rowand—Gregg—That By-law No. 91 A D, 1916, a By-law extending the action of the act for the control of weeds in the Municipality be now read, 1st 2nd 3rd time. Passed, signed and sealed.—Carried.

Gregg—Rowand—That the Reeve and Clerk issue Orders on the Treasurer for all accounts passed at this meeting of Council.—Carried

F. W. Fisher, grant	$75 75
W. J. McNally, presentation to Brant Soldiers	5 00
Dave Mauer, 36 yds gravel and right of way	5 00
John Monk, 81 yds gravel	8 10
Chas Parker, 58 " "	5 80
Vincent Hammone, 178 " "	17 80

AN EVIL HERITAGE

"Not to-day exactly, but I have come to give her warning. We must positively be off by next mail. Not that anything has happened exactly, but I have had another talk with Ritchie, and we have both come to the conclusion that the only chance for the new machinery is either he or I going home to see about it, and as he understands boiling sugar, and I don't, of course I must go."

By this time they had mounted the rickety staircase and entered the huge drawing-room, where one petroleum lamp was flickering in the draught. Marian had not yet spoken a word since she descended from the buggy. Her father's announcement had taken her so much by surprise that she could not yet be sure of whether she felt glad or not. Arrived in the drawing-room, she sat down dead-tired on the nearest chair, and waited to hear what more there was to come. Miss McCrie also had sat down, while the Captain stumped up and down, according to his wont in critical moments, and continued to talk in the same rapid tone, which had in it something of irritation, and which matched the look of worry on his face. "It is just as though a sort of poison had got into his veins." Marian's words on that first evening in the nutmeg dell came back to Miss McCrie's mind as she watched the Captain. Miss McCrie knew what that poison was far better than did Marian; she recognized the symptoms of that great "Sugar Fever," with which the poor Captain likewise had been infected.

His talk, as he now feverishly paced the floor, was all of sugar; what Mr. Ritchie had said, and what was to be expected of the new machinery, and what were the prospects of the season. A deep depression came over Marian as she listened, and even Miss McCrie was silent, but so engrossed was the Captain in his theme that he never noticed how the conversation had grown to be a monologue.

It was in the midst of a dissertation on the merits of the new portable railway that the captain suddenly stood still and struck his forehead.

"Yet gods and little fishes! I declare I have forgotten to give you my second piece of news. Did I tell you that Bernard was come?"

"Bernard!" It was Marian who spoke, starting from her chair. Miss McCrie, not knowing who Bernard was, looked inquiringly from father to daughter.

Marian had sat down again almost in the same instant that she had stood up. As she put up her hands to feel if her cheeks were very hot, she was intensely grateful to the petroleum lamp for burning so dimly. And yet, in spite of her terror of betraying herself, she could not resist saying:

"Is Bernard really come, father?"

"Yes, he is really come. The idea of my forgetting to tell you! He has got some business over here, it seems, and so ran over with the mail, without any warning. Never was so astonished in my life as when he walked in upon me this afternoon."

"But who is Bernard?" asked Miss McCrie, looking at Marian.

It was the captain who answered.

"Haven't I explained? Why, Bernard is my nephew, of course, Marian's cousin."

"Oh, Marian's cousin," repeated Miss McCrie, meditatively. "And where is this cousin now?"

"At Lot 13. But he is coming over here to-morrow to dig about among your registers. It seems that there is some ridiculous story afloat as to his father's second marriage not having been quite on the square; something about a screw being loose about the date of the first Mrs. Simon's death. Evidently a trick for squeezing money, invented by that fellow Silkworth."

"I always thought that Mr. Silkworth was rather a dangerous person," said Miss McCrie. "Please tell your nephew that he is welcome to dig among my registers. I hope and trust that he will find there what he wants."

"He can't well help doing that, surely; for not to find it, that is to say, to find that Silkworth was right and that the first Mrs. Simon hadn't died until after the second one had been married, would mean—let me see, what would it mean, exactly?"

"It could only mean that the marriage was invalid."

"Bless me, yes; and the estate?"

"If it is entailed, it would of course pass on to the next heir."

The captain stood for a minute plunged in deep thought; then angrily shook his head.

"It's impossible. Those sort of things don't happen in real life."

It had only at this moment struck him that he was the next heir. So bewildering were the reflections evoked by this thought that he lost no further time in beating a retreat.

"On Wednesday, then," were his last words to Marian. "Mind you lose no time with your boxes. The mail goes on Thursday."

Marian had not spoken since she asked her father whether Bernard had really come. It was not until Miss McCrie had twice told her that she ought to go to bed that her rigid attitude relaxed and she slowly rose from her chair. The candle in the big bedroom had been lit and good-night had already been said when the little lady lingering with her own light in her hand, remarked almost hesitatingly.

"You never told me that you had a cousin called Bernard?"

"Didn't I? No, I suppose I didn't. Well, you will see him to-morrow."

"And so will I!" a glad voice cried out within her.

"I remember poor Caroline Berrincott quite well," went on Miss McCrie, still lingering, "though I fancy I must have been on one of the other islands at the time of her death."

"Ah, really?" said Marian, absently, being obviously absorbed in some other train of thought.

Evidently, there were going to be no confidences made to-night.

"One more good night," said Miss McCrie, resigning herself to the situation. "I mustn't forget that I have a hard day before me, considering that I have promised to break in Tanner Junior's new mare for him, and want to make the beginning to-morrow, weather premitting. Dear me, aren't those drops on the roof already?"

As Miss McCrie walked through the draughty passages to her bedroom shading her candle with her hand, her mind was very busy. She almost thought that she had found a solution for the riddle of the afternoon.

Marian, left to herself began by retreating behind the mosquito curtains, in order to be out of reach of the bats, and then laid herself down in her clothes, not to sleep, but to try and think. It was no easy task, for the day's events might well have sufficed for a month. Yet as she laid with her face buried in the pillows, she remembered only one of these events. Mr. Hibbert's declaration and the prospect of her own immediate departure were not engrossing her then, she thought of nothing but of the news concerning Bernard, this danger threatening him after her discovery of the other day she could no longer doubt that the danger actually existed—and of how to avert it. The marriage declared invalid—the estate passed on to the next heir—these things would happen should Mr. Silkworth's assertion prove itself to have been well-founded. Bernard to give up Thornton? Marian tried to picture to herself what Raymond would look like living in lodgings or wearing a shabby coat. By the pain which the thought gave her she would have understood that she loved her cousin, even had her eyes not already been opened to the truth. There was no more attempt at self-deception. Since she had spoken to Mr. Hibbert the words which killed hope in his heart for ever, everything had become clear to her own eyes. The danger which threatened Bernard must be averted, but how? how? how? The question pursued her during the whole of the live-long night; even the shutters seemed to be creaking out the ominous word as they swayed in the wind, and even the baby bats squeaked a succession of shrill "hows" from their nests between the rafters.

Next morning before breakfast, when not more than a few stray drops of rain had fallen, Miss McCrie's attention was already absorbed by Tanner Junior's mare. There was no time to lose, as obviously it was settling into a wet day, and the consequence was that when Marian looked out of the window of the dining-room whither she had repaired in order to take a look at the old register which had puzzled her the other day, the first sight which met her eye, was that of a vicious-looking brown horse, ridden by Miss McCrie, and bouncing backwards and forwards in its vain endeavors to unhorse that lady. From a respectful distance Jeremias was watching the struggle, and above his shoulders Di's broad countenance loomed duskily, while a smell of singed milk, coming from some back region, spoke of duties neglected in favor of pleasure.

As Marian came down stairs she had been wondering whether she would be able to secure a quiet moment for the examination of her registers. The question was answered now; nothing could have been more not only in the dining-room, but, in point of fact, in the house; and as, moreover, breakfast was nearly an hour late that morning, there could be no doubt that neither time nor opportunity were wanting for ever so exhaustive a scrutiny of the old green volumes on the shelf. It was still with them she was busied when Miss McCrie at last entered the dining-room, tired but triumphant, with her whip in two pieces, and her hat smashed in.

"The rest of that beast's education must stand over till another day," she remarked, dropping on to the nearest chair. "It's all up with the weather to-day," and even as she spoke a perfect cloud of rain-drops was carried into the room by a gust of wind. "Goodness, gracious, Miss Berrincott! I am afraid you must have passed a very indifferent night; do you know that you are literally as white as a sheet?"

It was quite true. Marian, who at Miss McCrie's entrance had turned quickly from the shelf on the wall, and was now standing in the full light, displayed a face of an almost ashen pallor. The sleepless night was plainly visible in the blue shadows about the temples, while a nervous twitching at the corners of the mouth betrayed some more deeply seated cause of distress. At Miss McCrie's remark her hands went up to her face with some appearance of confusion.

"No, it is quite true," she stammered, evidently commanding her voice with difficulty. "I was not able to sleep."

"Why, I do believe that you have been tidying up my shelves for me," chattered on Miss McCrie. "This is true Christian charity, more especially, as a quite brand-new Inspector is coming to turn them over this week."

"The shelves?" repeated Marian, with a touch of sharpness, "I haven't been near the shelves at all. I—I have been looking out of the window the whole time."

And then she bit her lip, for it was the first deliberate lie she had told in her life.

CHAPTER XXVI.

The Royal mail steamer Stella had had an exceptionally fine passage for the time of the year, and yet, despite dancing and athletic sports, which had come in for more than their full share of attention, the young lady passengers of the Stella were dissatisfied. Not because of any dearth of victims on whom to practice either smiles or glances, but because among the [illegible] there was one individual. [illegible] the black prince of indifference the most pointed arrows glanced harmlessly. This could only be either because he was dense or because he was already engaged. But even this was no explanation, for none of the young ladies on board had ever heard of a young man's density enduring beyond a certain point, and, even supposing he was already engaged, was that any reason for foregoing one of those harmless little steamer flirtations which from time immemorial have been counted among the surest remedies for the tediousness of a long voyage? Partly because he was good-looking, but more distinctly because he was callous, Bernard had become an object of universal attention before the end of the first week.

The only person not aware of it was Bernard himself, and this for the reason that he was too deeply plunged in his own thoughts. This fortnight at sea was like a short respite in the midst of a long continued turmoil, like a glimpse taken into the future from off the top of a loftily planted watch-tower. What he saw there was somehow not exactly what he had expected to see. Strain his imagination as he might he could not conjure up before his mind's eye any picture of domestic bliss in which Sybil played the chief part. He could see her in a hundred attitudes, but never doing anything but looking beautiful. "But I will teach her," he said to himself; "I will teach her to take interest in that which interests me. I will discuss my projects with her. we must have a part in each other's lives; we must——"

And once more he would turn away with his thought unfinished, confronted by a vision of Sybil's beautiful serene, and impassive face.

It was beginning to be clear to him that his expectations with regard to love had been pitched several degrees too high. That came from all the nonsense that those poet-fellows were for ever talking and writing about the "tender passion." Even supposing the chosen object to be not free of imperfections, he had always understood that love was blind; why then, was he able to see things which he would rather not have seen?

There is such a thing as being triumphant without being satisfied. The prize which Bernard had striven for was his, or as good as his; was it possible that, now that it had not been worth the struggle? A suspicion, a very faint suspicion that this creature who was so glorious and queenly to look at was dangerously apt to reveal herself as the most commonplace of women crossed and recrossed his mind. "I am a fraud;" the words which Sybil had spoken of herself not a year ago started up to confront him at all sorts of moments. Of course they were nonsense, but he wished they had not this unpleasant trick of haunting him.

Once in sight of West Indian shores sentimental reflections turned to practical surmises. Instead of speculating upon Sybil's capabilities of affection, he began to wonder which would be the quickest way of obtaining the document he was in search of. The most obvious thing was to consult his Uncle James, and as, moreover, Bernard was not above enjoying the surprise which his unexpected appearance could not fail to create, the result was that that same afternoon, Captain Berrincott had the opportunity—though in a state of considerable flurry—of welcoming his nephew to Lot 13. When the first brunt of explanations had somewhat subsided the Captain began to answer questions as well as to ask them.

"Want to know what I am doing with these collars? Getting them ready for packing, neither more nor less than that. I tell you what, my boy, if you hurry up about this registry business there is no reason why we should not travel home together. The mail goes on Thursday; you can be done by then, can't you?"

"Surely you have got more chance of answering that question than I have. What do you imagine my first step ought to be? I suppose I shall have to drive into town to-morrow?"

"I suppose so. No, stop a bit, I was forgetting Miss McCrie; she's your man, I fancy, and Sane Hill is quite a short ride from here."

It was accordingly settled that on the following day Bernard was to ride over to Cane Hill and search the registers, and Captain, meanwhile, going over to warn Marian of the impending departures, with the result that has already been shown.

When the next morning broke wet and lowering Bernard put off his excursion to the afternoon, but when the afternoon brought no lifting of the clouds, nor any cessation in the drip upon the roof, it became evident that if the Thursday mail was still to enter into Bernard's calculations, there must be no more regard taken to the weather. It was in the midst of a perfect hurricane of wind and rain that Bernard mounted the Captain's pony at the conclusion of the midday meal.

"I've got an idea," said the Captain at the last moment. "If you spend the night at Cane Hill as I fancy you will, is there any reason why you should not bring Marian over in the morning? It would save me the trip."

"No reason that I know of, except want of confidence in your nephew. Good-bye Uncle James, and to-morrow at this time expect me back with both Marian and the certificate."

Bernard had been riding for half an hour, and was approaching Cane Hill, when upon the miry and deserted road the figure of another rider became visible. It was a lean and long-legged man, mounted upon far too small a horse, whose head was, likewise, turned in the direction of Cane Hill. With a genuine sigh of relief, Bernard pressed on his pony; for Solomon's resources of conversation had been exhausted at least ten minutes ago, and that comical figure in advance appeared to hold out some prospect of shortening the remainder of the distance. The mere sight of the scraggy legs, all but touching the ground, had raised Bernard's spirits enormously.

"Vile day, is it not?" he began, in his cheeriest tone of voice, as soon as the two ponies were abreast.

The stranger scanned him slowly from head to foot with a chilly blue eye, after which he assented to the remark concerning the weather in a tone that was at least as chilly.

"I quite expected to be the only traveller on the road to-day."

"So did I," replied the long-legged stranger, ungraciously.

Another man who was not as sure as Bernard invariably felt of being always welcome, might possibly have taken this as a hint, but if it had been intended as such it failed of its effect.

"Not the sort of day to choose for a pleasure excursion, hey?" he laughed. "Your business must be at least as pressing as mine."

(To be continued.)

ACCOMMODATED.

(Rochester Times.)

Bystander—I suppose you would like to take a ride without worrying about tires and the like?

Motorosit (fixing a puncture)—You bet I would.

Bystander—Well, here's a car ticket.

SUNDAY SCHOOL LESSON

Lesson VII. Nov. 12, 1916.

World's Temperance Sunday—Rom. 14: 12-23.

Commentary.—I. Christian temperance (vs. 13-21). 13. Judge this rather—We are called upon to consider well what our attitude toward others should be, and to regulate our conduct in harmony with the preceding verses. We are accountable to God for our course in life, but that very responsibility places us under obligation to act in such a way that we shall not lead others astray by our opinions or actions. Stumblingblock—A proper regard for others will move one to avoid every word and act that would have a tendency to cause them to stumble or hinder them in the way to heaven. "Love is a higher principle than liberty, and self-denial a nobler joy that self-indulgence." 14. I know—Paul speaks with positive assurance. Nothing unclean of itself—Reference is made here to articles of food, as is shewn by the following verse. Peter's vision on the housetop indicated that distinctions in meat had been put away (Acts 10: 15). To him that esteemeth, etc.—The conscience of a weak brother may declare to him that a certain kind of food is forbidden, and he should not violate his conscience by eating it. "Mistaken conscience calls for correction by better light, but never by violation." 15. Be grieved with thy meat—If one's course is knowingly a grief to another, that course should be altered, for a stumbling-block is being placed in a weak brother's way. Not charitably—It is not fulfilling the law of love when a Christian knowingly does things which his brother believes to be a wrong. Destroy him not—The Christian is to be a help, and not a hindrance, to others in the way of life. If his course, in itself lawful, is a hindrance to weaker Christians he should change it rather than discourage them. "If Christ gave up his life for them, we can certainly give up our petty rights for them."—Torrey. 16. Your good—That which you esteem to be right and which, in itself, is right. Evil spoken of—Be right and do right, but try to act that your course will also appear to be right. The good that persons do is often in large part destroyed by their failure to shun the very appearance of evil.

17. The kingdom of God—The essence of true religion in its inward and its outward elements. Is not meat and drink—The kingdom does not inhere in distinctions in food and drink. Righteousness—A condition of moral uprightness and integrity which is produced by divine power. Peace—The accompaniment of the change by which one is pardoned and regenerated. Joy in the Holy Ghost—This joy comes as a result of the work of grace wrought in the heart by the Holy Spirit. These gifts are infinitely superior to the rights one may have with regard to eating and drinking. 18. These things—Righteousness, peace and joy in the Holy Ghost. Approved of men—Not only has he consciousness that he is acceptable to God, but men also recognize that he is right in heart and life. 19. Which make for peace—Instead of contending for non-essentials and for what we may call our rights, let us obey the law of love and practice righteousness. Edify another—Let it be our effort to build up one another in righteousness and truth. 20. Destroy not the work of God—The work of grace in a human heart constitutes that person God's workmanship, which must not be injured by insisting upon one's liberty in eating and drinking. It is evil—Although all things are pure from evil in themselves, yet there is evil to the man that eats with damage to his brother.—Whedon. 21. It is good—It is right and honorable. Neither to eat flesh, nor to drink wine, etc.—No one has a right to make use of a privilege which will bring moral or spiritual loss to another. The use of strong drink is forbidden by the scriptures, both because of its injury to the drinker and its influence upon others. In perfect agreement with the injunctions of scripture, with respect to strong drink, are the demands of right reason. Any one who is observant, and studies the relation of the liquor habit to family life, business, morality and religion, must reach the conclusion that indulgence in intoxicants is wicked and destructive. There are those who claim that they have a right to drink, and it is wholly their own affair, but their influence is telling injuriously upon others, and thus both the drinker is injured and those who follow his example. Then also it must be admitted that he who uses intoxicants is doing an injury to those who are dependent upon him, not only by his example, but by robbing them.

II. Faith and conduct (vs. 22, 23). 22. Hast thou faith—The possession of faith is in reality not questioned, as the Revised Version proves. The existence of faith in the person addressed is freely granted. The faith here mentioned is justifying faith, and it leads its possessor to have clear and settled convictions regarding his personal conduct. Have it to thyself before God—Thou hast a right persuasion concerning thy Christian liberty; and I advise thee to hold that persuasion steadfastly with respect to thyself in the sight of God.—Clarke. Now what stronger, clearer faith than hast in Christ alone, by which thou seest that these scruples are no proper part of Christianity, so have it to thyself and God as to hurt nobody else.—Whedon. Happy is he, etc.—He who has justifying faith and sees clearly what duty is, is happy in acting in harmony with his convictions. His conduct is in full accord with his faith and his conscience. He does not condemn himself for doing what he is certain is right. 23. He that doubteth—He who is weak in his faith, and consequently, weak in his convictions of duty and privilege, is damned—Is condemned. Whatsoever is not of faith is sin—The Christian's life is one of faith. It is by faith that he retains the divine favor, for without faith it is impossible to please God. He who takes a course that to him is doubtful is bringing condemnation upon himself.

III. Helpfulness to others (vs. 1-3). 1. Strong—In this passage some Christians are classed as strong and others as weak. The strong are they whose faith in God and whose perception of duty and privilege lead them to settled and definite convictions. They are conscientious, and yet they do not allow mere notions or non-essentials to have the weight of law or conviction of duty. Ought to bear the infirmities of the weak—It is the Christian's duty to be charitable and to exercise forbearance. The strong can not brush away with a word the scruples from the minds of the weak. They are to bear with the weak and lovingly help them into a richer experience in grace. The strong will grow in grace by being helpful to the weak. Not to please ourselves—The temptation will come to the strong to go forward in their Christian lives and in the affairs of the church without heeding the wishes and scruples of the weak, but the exhortation is to avoid that course. We are to resist the temptation. For his good to edification—The Christian is urged to help build up his neighbor in faith and love. 3. Christ pleased not Himself—The apostle adds force to his exhortation by presenting the example of Christ. As it is written—The quotation is from Psa. 69.9. The apostle in making use of this quotation proves to us that Christ is referred to in the passage cited.

Questions.—Who wrote this epistle? To what class of Christians did he write it? What subjects are treated in this lesson? To whom is every one accountable? In what respects is the exercise of Christian charity recommended? What kind of judging is forbidden? What kind is urged? What regard is to be paid to the conscience of another? What elements of the kingdom of God are mentioned? What law of abstinence is here taught? What bearing has this lesson upon temperance?

PRACTICAL SURVEY.

Topic.—Applied Christianity.

I. Revealing personal godliness.
II. Imitating Christ's example.

I. Revealing personal godliness. Christianity projects a personal kingdom, whose subjects are governed in their entire life by the power it attributes and applies to the inner nature. Its service involves a personal relation between master and servant. It includes all activities and relationships within its sphere. It is the prerogative of the spiritual nature of man that it is capable of apprehending and voluntarily accepting and obeying the perfect will of God. Paul taught that the spirit in which certain actions are performed or self-denial practised, rather than the things themselves, constitutes real Christian living. Christianity puts all things into their proper relations, giving prominence to those things which are of superior importance. It bases every duty upon a divine foundation. It is satisfied with no standard but that of love. It does not attain its ideal when certain decrees have been obeyed, but only when certain experiences have been evoked. A merely legal system which be complete with formally correct conduct, but a vital religion demands a godly character. Among the Roman Christians, there was great strife about small matters. Paul was compelled to meet it. Differences of opinion respecting festivals to be observed and of abstinence from foods were certain to arise in communities composed of Jews of every sect and Gentiles of every race. There were wide differences in temperaments and attainments among converts. Antagonistic parties were formed, the legal and the spiritual, or the conservative and the liberal, or as Paul distinguished them, the strong and the weak. Each refused liberty to the other. A recognition of the Lord's authority, a desire to execute the Lord's will, and a confession of his goodness characterized both parties. While there was good in each, there was the manifestation of evil on both sides. A spirit of uncharitableness was evident in the judgment of both. Paul labored to show that in connection with their differences there were glorious possibilities of maintaining a Christian spirit and of growing up into Christlikeness. His teaching was clear and decisive. The members of Christ's kingdom were urged to keep its laws with a view to their own moral perfection and the ultimate moral perfection of the world. Paul appealed to honor, conscience and brotherly feeling in a way equivalent to a command. He set forth a general principle, making it the duty of every Christian scrupulously to avoid all things which had a tendency to lead others to sin and to please others for their good and their edification, thus promoting their spiritual and eternal good, by bearing with their infirmities, acknowledging their excellencies and seeking their good, such duties were fulfilled. Paul maintained that no man had sufficient knowledge of the mind of the Master to determine the standard of action, and not sufficient knowledge of the mind of others to determine the motive of action.

II. Imitating Christ's example. Paul [illegible] none to suffer bondage, nor did he permit their liberty in Christ to be harmful to their brethren and so become a reproach before the world. He made his position clear by distinguishing between what was fundamental in religion and what was temporary. He endeavored to engage them in the higher affairs of the kingdom in order that petty details might sink into their rightful insignificance. He laid down three principles sufficient to meet any differences between them as Christian brethren, the law of Christian charity, of self-denial and of Christian helpfulness. He urged that the strong should prove their strength by gentleness, and their liberty by self-sacrifice. He made the example of Christ an example to them, teaching that the Christian life should not be merely an abstinence from evil, but a positive doing of what was good; and, further, that making others happy was one of the best manifestations of true piety and closest imitation of Christ's example of loving service. Paul would have all men remember that they are members of one great family and should act as such, referring their judgment of one another with the thought of a higher judgment before which all must pass.

T. R. A.

COULD NOT BE DISTURBED.

(Exchange.)

Although Jed Hoover was the laziest man in town, he always had strength to hold a book or magazine in his hand. It was only in emergencies that the neighbors called upon him for help. One hot day in July, when the clouds threatened rain, a farmer hurried to his shack and asked him to "rake after" the last load of hay.

Jed hesitated a minute, and then his eye fell upon a pile of old magazines that were stacked in a corner of the sagging piazza.

"Well, now, I'd like to help out," was the reply, "but I'll have to refuse ye this time. I'm a little behind with my reading."

◆

"The pen is mightier than the sword!" remarked the earnest citizen. "That used to be the case," replied Mr. Chuggins, as he wiped his hands on his hip pockets; "but what counts now is a money-wrench or a pair of pliers."—Washington Star.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

THE LIMITS OF LOVE.

He might have reared a palace at a word,
Who sometimes had not where to lay his head,
Time was when He who nourished crowds with bread
Would not one meal unto Himself afford,
He healed another's scratch; His own side bled,
Side, feet and hands with cruel piercing gored,
Twelve legions girded with angelic sword
Stood at His beck, the scorned and buffeted.
Oh, wonderful, the wonders left undone,
And scarce less wonderful than those He wrought!
Oh, self-restraint, surpassing human thought,
To have all power, yet be as having none!
Oh self-denying love that thought alone
For needs of others, never for its own!

—Exchange.

NEVER MAN SPAKE LIKE THIS.

Thou art fairer than the children of men: grace is poured into thy lips: therefore God hath blessed thee forever. The Lord God hath given me the tongue of the learned, that I should know how to speak a word in season to him that is weary. His mouth is most sweet: yea, he is altogether lovely. This is my beloved, and this is my friend.

All bear him witness, and wondered at the gracious words which proceeded out of his mouth. He taught them as one having authority, and not as the scribes.

Let the word of Christ dwell in you richly in all wisdom. The sword of the Spirit . . . is the word of God. The word of God is quick and powerful, and sharper than any two-edged sword. The weapons of our warfare are not carnal, but mighty through God to the pulling down of strongholds; casting down imaginations, and every high thing that exalteth itself against the knowledge of God and bringing into captivity every thought to be the obedience of Christ.

DISCOVERED.

So the new country is not undiscovered. One traveller returned out of the timeless region into the time limit. He returned to the place where they measure life by the day. He was away three days only. Some say he went to Hades, to pay the debt which we owed, but he could not find the proper authority to receive the money. Some say He went to sleep in a new, clean bedchamber, where never man yet laid. He had to go away in this fashion, in order to make known His wonderful spiritual presence.

Some say He went away to do the work of a miner, to sap the foundation of the temple, that it might topple over according to His purpose, having accomplished the end for which it was created. It was a ministration of death and condemnation; it made nothing perfect, only it brought in a better hope.

His death was not a semblance; it was sure enough; they plugged up His ears and nostrils with wax; they filled His mouth with spices; then closed the teeth and composed the lips. It was death sure enough.

Then the silent, mysterious messenger came and rolled the great, round millstone away, breaking the seals, leaving one to watch for the coming of Mary, into whose ears the first brief Gospel sermon was preached to a congregation of one. "He is not here; come see the place where He lay."

The vision widens as I calmly wait;
I hear the voices coming through the gate;
The veil grows thin by constant spirit speech;
I stretch my hand beyond accustomed reach,
And vibrant spirits cluster round my head,
Loved and lost and counted 'mong the dead.

An American poet says "Our saddest thought of the dead is the thought of their unovertakableness. They have gone before, and we cannot overtake them. But if our sister will think a little faster, she will discover that we can overtake if we travel by the spirit railway, whose engine driver is never weary and never sleepy, and the amusing part of the study is that this is the real, substantial, ever abiding habit of the visual nerve of immortal man.

I overtake thee in meridian race;
I mark thy steps, maintain thy steady pace;
There is a want in thine exalted home;
I come to add completeness to thy crown.

There is oneness in the upward path,
A unity is found, not found on earth;
The crested waves upon the flowing tide
Float me, land me at Thy perfect side.

Proclaim the marriage feast in lasting home
Angels bury bones of last to come,
Overtakedness is found no more,
They drink no tears along the golden shore.

—J. T. Miller.

The Moth and The Flame

Before the war she was a typist in the city, earning perhaps twenty-five shillings a week and living at home. It was rather a humdrum existence, but she was fairly contented with it. She had a few girl friends who used to accompany her in the evenings to the "Monkey Parade," and being a smart-looking girl, with a ready tongue and a fascinating way, it was not long before she had a considerable circle of office-boy admirers, with whom she took strolls in the quiet roads branching off from the "Monkey Parade." So far beyond the flirtation that abounds in the suburbs she hadn't done anything too terrible. But then the war came.

* * *

Khaki rather turned her young head. Tom and Fred and Archie all started to wear it. They went off to their training centres. So did hundreds more. But it wasn't very long before their place was taken by a new attraction. As she came home at night from the dingy office in the city she encountered many a young "sub." They were irresistible to her. She thought of them day and night. Soon she had a dozen or so on her walking-out list. And they had money to spend—lots of it.

* * *

She saw visions of joy to come. She had to smarten up her appearance to make it worthy of her escorts. She began to make up her baby face. These improvements cost money, and she hadn't much of that to spare after her people had taken their share for her keep. So far she hadn't thought much about anything mercenary. She accepted chocolates and drinks and tickets for the pictures or a dance as a matter of course. But mixing now with fellows who had plenty, while she had little, she couldn't see why they shouldn't buy her hats and gloves and boots. And if these items, why not her costumes? One step led to another. She was more in the west than before. Her hours were later. Her appearance didn't please her good mother. She declared she looked "fast." There were scenes. Finally she left home altogether. She wasn't stranded. Far from it. A handsome young "sub" set her up in a dainty flat in Bloomsbury.

* * *

At the same time that she left home she threw up her work in the city. War might be a tragedy for some people, but for her it was the greatest time of her short life. Why worry? She was living a lady's life now. The best of everything. Lovely clothes, heaps of amusement, grand dinners, do as she liked. Her officer lover was doing the thing handsomely. And he wasn't the only pebble on the beach. He came to see her when he could get away for a brief spell from his training. Those were perfectly glorious times. But when he was away she enjoyed herself almost as much.

* * *

She rose about mid-day, spent an hour or more reading her daily batch of love-letters, and replying to those that were worth while. After lunch there was probably a joy ride with some boy, arranged the night before; tea at some riverside resort. Then back to the flat to dress for the evening. Dinner at a slap-up restaurant, a box at the latest revue; supper somewhere, on to the night club, and eventually home and, anon, sleep.

* * *

Her real boy has gone to the front, but he still keeps on the convenient little flat for her. She won't be sorry when he comes back—if he ever does. But, meanwhile, everything is very jolly. Her admirers are many. There isn't any worry as to cash. She has quite a respectable banking account. Sometimes people talk about the war. She thinks they take it all far too seriously. She doesn't know much about it. "We shall win it, of course, but don't talk about the silly old war," she purrs to her companion. "Where are you going to take me to-night?"

* * *

There are thousands like her. While most men and an enormous number of women are giving up all they have, making sacrifices such as have never before been dreamt of in this country; doing noble, unselfish work that England may win, and that her war-scarred heroes may have succor and comfort, there exists at the same time a vast class of idle, pleasure-seeking women and girls, of whom the type I have sketched is but one.—C. P. S. in The Empire.

Chats With the Doctor

BY A PHYSICIAN

HOW TO GET SLEEP.

Short of real, complete insomnia, there are many stages of sleeplessness, any of which are capable of giving a great deal of discomfort to their victims. Only the sufferer knows the dreary feeling with which the day is dragged through after a night half spent in tossing about broad awake, the brain working feverishly and the body restless. It is dangerous in the extreme to have resort to drugs to remedy such a condition. There are few easier ways in which to acquire a "drug habit," and, at the best, most of the narcotics so used require to be taken in ever-increasing doses to produce their effect.

The first thing to do in a case of sleeplessness of this kind is to get the general health into as good a state as possible. Digestive disturbance is at the bottom of a good percentage of cases, and where the digestion is good the sleep is usually good also. Exercise in the open air is beneficial, and, where possible, a short walk should be taken almost immediately before going to bed, to get the bodily mechanism working smoothly.

A heavy meal should not be taken late in the evening. Usually the best arrangement of meals is that of a fairly good meal at seven or eight, with a walk after it, and some such thing as a glass of hot milk or cocoa with a biscuit, on going to bed. The digestive organs must not be given a heavy task just when the body and brain call for rest, on the other hand hunger will effectually prevent sleep. Some people, particularly those with bad circulations, find a few minutes spent in physical exercise of some kind very helpful just before going to bed.

The bed and bedding should be comfortable, but not luxurious. The bed itself should be a spring mattress, with sufficient light bedclothes, preferable one or two good blankets, and an eiderdown quilt. Heavy bedclothes from the investment can be expected. Again, those lacking experience cannot hope to make good the first year, or even make the net income the second year, that the poultry-raiser of several years' experience can accomplish. One cannot gain the practical experience from the press alone—good as the advice may seem—but must solve the different problems as they arise for themselves, although from the press to-day the solid foundation in poultry culture is laid down correctly.

The beginner must learn to use his own judgment as to condition, etc., on the plant he operates. One may have a wet soil with low conditions. Another a high or dry one, as one is in another a cold one. Market conditions differ. One breed may be suited to one locality, another to a different one. These are some of the problems to be solved, and must be found to be correct, or the practical results will not be obtained. Often the wrong system of poultry operation is installed, and one must not think that all systems are good, as in all lines there are poor ones as well as the good.

Too many beginners have a hobby to ride when first starting. A poultry hobby is a good thing, but when confined to building or brooding or theories in the construction of incubators away from the beaten paths of those who have made good one is apt to find one's self on the wrong side of the ledger. How is one to know? Is the beginner's question. Only by studying conditions, and by careful reading of the press, picking the grain from the chaff.

Start in a slow way and work up, feeling each year the way carefully. Avoid past mistakes, for mistakes will be made. They are far less costly when operating on a small scale than on a large one. It is an undisputed fact that the majority of successful poultry raisers, both large and small, have started in a small way and gradually worked up the ladder. It is impossible for any one to know the poultry business in a year and anyone investing a large sum at the beginning is almost certain to have a loss, at least during the first year of operation. The safe rule for the average beginner is to start slowly, and as success comes increase the poultry operations. If one finds that the 200 fowls paid a profit past all expenses, then with the same care and attention, double that number can safely be kept.

The profit of any poultry operation is not in the number of fowls kept, but in their producing powers. Many a small breeder is making more money from the smaller plant than his brother poultry-keeper with the larger one, with heavy overhanging expenses attached to it. After all, profit from hens lies wholly with the operator, and as in all other lines of business, there are different grades of operators, this largely accounts for the different statements as to poultry profits.

A few things to remember in starting, if a living is to be the objective point in keeping poultry, are: Select a good location, as to ground conditions, markets, etc. Choose good foundation stock. Build well, though this need not be expensive; but poorly constructed buildings are a loss in the long run and false economy. Start slowly and work up gradually. Have enough cash on hand to carry the poultry operations for at least two years. Don't purchase a place with too small acreage. At least five acres should be purchased, although many successful poultry plants are operated on three. It takes more care to keep the land in condition. Free range for growing stock is essential in the long run. Rather have too much room than too little. Study carefully the incubator and brooding systems. This is one of the main items in the business. Study the poultry situation at least a year before commencing. Visit the leading poultry operations that have been in the business for at least five or six years. One can learn a good deal by visiting the successful poultry keepers, and will be less liable to make mistakes in poultry house construction. Carefully entering the business in a safe and sane way will do much toward the success of the venture.

◆

Every man has some good in him, but we can't always coax it out.

Widower McGurk—'Tis a big price to pay for a coffin'. Undertaker O'Brine—A big price! And many's the married man wud pay twice as much for th' same privilege, and jump at th' chance!—Life.

The Kentuckian who was bitten by a moccasin and cured himself by drinking a quart of corn whiskey is now doing a thriving business pointing out the place where the snake was last seen.—Macon Telegraph.

Many Women Suffer From Pains in the Back.

When the back begins to ache it is a sure sign that there is something radically wrong with the kidneys.

What you want is a kidney medicine Doan's Kidney Pills are not a cure-all, but a medicine for the kidneys only.

Mrs. L. Melanson, Plympton, N.S. writes: "I am sending you this testimonial, telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills bear the trade mark of a Maple Leaf and are put up in an oblong grey box. See that you get "Doan's" when you ask for them.

Price 50c. a box, 3 for $1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

Sick Headache and Biliousness CURED BY MILBURN'S LAXA-LIVER PILLS.

Mrs. Willard Tower, Hillsboro, N.B., writes: "I have suffered something awful with sick headache. At times I would become bilious, and would have severe pains in my stomach after eating, and have a bad taste in my mouth every morning. I told some of my friends about it and I was advised to use Milburn's Laxa-Liver Pills. This I did and and they cured me."

When the liver becomes sluggish and inactive, the bowels become constipated, the tongue becomes coated, the stomach foul and sick and bilious headaches occur.

Milburn's Laxa-Liver Pills clean the foul coated tongue and stomach and banish the disagreeable headaches.

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Lantic Sugar

is packed by automatic machinery in strong white cotton bags and cartons at the refinery.

This is far safer and more sanitary than sugar packed by hand in a weak paper bag which breaks at a touch. No hand touches LANTIC SUGAR until you open it yourself. *Just cut off the corner of the carton* and pour out the sugar as you need it.

2 and 5-lb Cartons
10 and 20-lb Bags

Scientific Odds and Ends.

Chicago has a barber shop where patrons shave themselves. The implements are hired by patrons.

X-rays are now used by dentists to determine whether or not root canals have been properly filled.

A bronze paint has been made which will act as a conductor of electricity, serving in the place of lightning rods.

Simultaneous tests are being made of the air of Chicago, St. Louis, Pittsburg and Cincinnati to determine which is "the smokiest city."

A motorcycle with side car attachment fitted out for fire department services, with axes, extinguishers and other similar apparatus, has been adopted by several municipalities for quick response to fire calls.

Approximately 1,000,000 barrels of lime are prepared in the vicinity of Rockland, Maine, annually.

In the construction of a California home, the pipes of an organ are hidden in the grill work of the room, so that only the console is visible, and this may be drawn about the room to any convenient location.

A small pocket light has no battery. The current is generated by a small dynamo concealed in the handle and worked by one finger.

A WOMAN'S MESSAGE

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address, Mrs. M. Summers, Box 8, Windsor, Ontario.

NO TANKS!

There has been a stir in Hun-land from
East Prussia to Alsace;
It has travelled o'er the Fatherland at
truly magic pace;
And the cause of all the trouble which
has stirred the German ranks
Is the Tanks.

The Tanks are little animals of thirty
feet in length,
And their diet of machine guns helps to
keep them up to strength.
They are very keen on fighting, and
they're always up to pranks,
Are the Tanks.

They can eat up any mansion just as
easy as you please;
They love the taste of dug-outs, and they
simply dote on trees.
They roll down all the craters, they can
walk up all the banks,
Can the Tanks.

Their names are nothing striking—they're
as modest as can be;
They're simply labelled "Creme de
Menthe," or maybe, "Wait and
See;"
But they never think of turning tail—
they're beautifully Manx,
Are the Tanks.

They move along like caterpillars spoiling
for a fight;
And though they're low, of impudence
they really are the height.
You get no "change" from them, except
in "marks"—not pounds or francs;
Oh, Tanks!

So the Germans who for two whole years
had thought they had a "Slam,"
Will soon be back in Hamburg, or Wiesbaden, or Potsdam;
But before that comes to pass you'll
hear from out their shattered ranks:
"No 'Tanks!'"

—David Rose, in English Exchange.

Corns Drop Out INSTANT RELIEF

Paint on **Putnam's Corn Extractor** to-night, and corns feel better in the morning. Magical the way "**Putnam's**" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "**Putnam's" Extractor to-day.**

Is Old Age Hereditary?

It is interesting to note that the centenarian Mrs. Arthur Mozley, who so recently celebrated her hundred and first birthday, spent her venerable birthday under felicitous circumstances in fairly good health, and in the society of her friends, by all of whom she was warmly congratulated, and was made happy by many gifts and congratulations.

It seems that Mrs. Mozley's grandmother was also a centenarian, she being the widow of the late Rev. Arthur Mozley, who, as will be remembered by many of our readers, held livings in London and Devonshire, and who died some twenty-three years ago at Cheltenham.

The fact that two almost direct descendants of the same family have reached a centenarian age would seem to point to the inference that centenarianism is hereditary.

Certainly observation favors the idea that ordinarily longevity is hereditary.

What a comforting thought for those who are able to trace their ancestors back through long years!

RELAX FIVE MINUTES.

For Beauty and Health Girl Workers Should Find Time.

Can you relax absolutely five minutes at a time, three times a day? If you can, it will go a long way toward making and keeping you beautiful, says a writer. Last week I stood on the street corner downtown, watching the girls going home. The shops were closing, it was the time of day when all classes are mingled together, all in a rush homewards. A few late shoppers were scurrying along—you could see in their eyes plans for a hastily gotten-up dinner—salesgirls were anxious to get away from business, more fortunately provided-for women were hastening uptown to dress for dinner. And every face was lined and pale, drawn from the strain of the day, whether it had been work or pleasure.

Jeannette rode home with me—Jeannette works in a large store, as head stenographer. She looked as tired as the others. "Rest," she scoffed, when I asked her whether she couldn't relax during the day. "Rest? Where? From 8.30 till noon, not a chance with all my work. At noon, between lunch and the shopping I always have to do, my hour is gone; from then till closing I'm busy." She thought the argument settled.

However, most days could stand five minutes taken off the shopping. And every day she could throw herself on the bed for the same period before eating supper. And she would find a wonderful improvement in her looks. For the thing that pulls most girls down is nervous strain. Frequently this is the result of a physical strain—and unfortunately most of the physical strain of work is unavoidable. And here is where the five minutes' rest will serve to quiet tensed nerves, to relax tired muscles. Most large shops have rest rooms with big chairs and couches where the girls can snatch five minutes' rest. Some shops even have "relief periods" of half an hour during the day. All working places should have.

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commissions—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

FEAR OF DEATH.

Terror of the End Still Haunts Men and Women.

The statement has been made that the present generation is suffering from a hysterical fear of death, and that this explains the reluctance of some to enter the war. We doubt whether one age or one country differs from another in its view of death. Certainly it cannot be maintained that modern civilization and its comforts have increased the fear of death. It was in the Elizabethan age, the age of heroes, as we regard it, that the prayer against "battle, murder and sudden death" was framed. In this comfortable, prosaic age, it is no uncommon thing to hear a man or woman express a preference for sudden death to any other—death itself being inevitable.

Bacon says that men fear death as children fear to go into the dark, and that they fear, not so much death as the stroke of death. There is no passion in the mind of man, he says, but it mates and masters the fear of death. "Revenge triumphs over death; love slights it; honor aspireth to it; grief flieth to it." Bacon must have seen men and women facing death cheerfully in the discharge of the most common duties of life.

Men fear death to-day no more than they did a thousand years ago, but they are more reluctant to destroy life. Capital punishment, once inflicted for a trifling theft, is now reserved for murder. We have a higher sense than our ancestors of the sacredness of life. The modern movement against war is the result, not of an abject clinging to life, but of a strong repugnance of taking the life of another. When Ruskin considers the calling of a soldier, he says that he is honored, not because he is eager to slay, but because he is willing to die.

If reluctance to take life is merely a kind of modern or new-world sentimentalism, what shall we say of the general abhorrence of suicide or of infanticide? Is sanitary science merely a form of hysteria? Surely an increased regard for the sacredness of life is a sign of advanced civilization. Our own lives are given to us in trust, and may be laid down only for some cause that is greater than life itself. It is not recklessness of life that needs to be cultivated, but a deep and abiding sense of duty.

Modern civilization may also diminish the passion of hatred, and that is surely an unmixed benefit. Of all the calamities of war, hatred is the worst—worse than the destruction of property or the loss of life. Hatred is hysterical. To the extent that it is diminished, men grow in strength of mind and heart.

RHEUMATISM IN THE BLOOD

It Can Only Be Cured by Thoroughly Enriching the Blood Supply.

Not so long ago rheumatism was looked upon as a pain in the muscles or joints brought on by exposure to dampness or bad weather. Now doctors know that it is rooted in the blood and while exposure may start the pain, nothing but the removal of the poisonous acid from the blood will cure the trouble. It is a waste of both time and money to try to cure rheumatism with liniments, poultices or anything that only goes skin deep. Rubbing lotions into the skin may give temporary relief, but it actually helps to circulate the poisonous acid more freely, and thus in the end increases the trouble, and perhaps leaves the sufferer permanently crippled. The one cure, the only cure, for rheumatism is to drive the acid which causes the trouble out of the blood. To do this no other remedy can equal Dr. Williams' Pink Pills, which actually make new blood, sweep out the poisonous acid, loosen the stiffened, aching joints, and bring good health and comfort. Heere is the proof: Mr. Joseph Crouse, of Ninevah, N.S., says: "For several years I was severely afflicted with rheumatism. The trouble seemed to locate in all the joints in my body, and my suffering at times was most intense, and the disease greatly interfered with my activity. I doctored steadily for a long time, but the trouble was obstinate and did not yield in the least to the doctors' treatment. One day a friend told me of some cures of rheumatism by the use of Dr. Williams' Pink Pills, and strongly advised me to try them. I did so, and to my great surprise, eight boxes completely cured me of the trouble, and I was as supple, active and free from pain as ever I had been in my life. Better still, I have never felt a symptom of the trouble since."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

FIRST TRAIN OPERATED TORONTO TO MONTREAL SIXTY YEARS AGO TO-DAY

Montreal, Oct. 27.—This is the sixtieth anniversary of the inauguration of railroad communication between the cities of Montreal and Toronto. On October 27th, 1856, the Grand Trunk operated its first through train between these two important Canadian centres.

Toronto and Montreal had been dependent for their communication upon the St. Lawrence waterway and the stage routes, and after the close of navigation each year intercourse was maintained with great difficulty. The Grand Trunk Railway Company was incorporated in 1852, to build a railroad between the cities, the undertaking being looked upon as one of great national importance. The first section from Montreal to Brockville, 125 miles, was completed in November, 1855, and it was on the 27th of October of the following year that the second section from Brockville to Toronto was thrown open, joining up the two principal centres.

The company had promised the people of Canada that it would provide these new facilities for travel during the winter of 1855, and it accomplished its pledge, in spite of many difficulties. The general manager of the road in his report to the directors in the following year said, "Notwithstanding all these obstacles, the trains were enabled to run with a regularity which was not surpassed, and in the majority of cases not equalled, by any railroad on the continent."

The first train to operate over the Toronto-Montreal line was the forerunner of The International Limited of to-day. It represented the last word in railroad equipment, although it only consisted of three first-class and three second-class coaches. The operating schedule was a fast one for those days. The eastbound train left Toronto at 7.00 a. m., and the westbound train left Montreal at 7.30 a. m., and the running time was fourteen hours between the two cities, as against the seven and one-half hours of The International Limited of to-day.

The first train from Toronto was greeted on arrival in Montreal by thousands of visitors from all parts of Canada and the United States. There were military parades, trade and society processions, torchlight marches, fireworks and dancing.

The Mayors of Boston, Cleveland and Portland, and representatives of the city of Chicago congratulated the Mayors of Montreal and Toronto, and the proceedings were graced by the Governor General of Canada. The Point St. Charles shops of the Grand Trunk were turned into a great banquet hall, with seating accommodation for 4,400 guests, and every table was crowded. Speeches were made by the Governor-General, the Governor of the State of Maine and other notabilities. The Mayor of Montreal alluded with pride to the fact that the Grand Trunk possessed 819 miles of railroad; to-day the Grand Trunk System comprises 8,115 miles of road. Montreal newspapers, in describing the banquet hall, said that the table cloth was close upon one mile in length.

One of the ceremonies in connection with the opening of the line was a visit to the Victoria Bridge, then under course of construction, with two abutments and nine piers out of twenty-four already built. Barges, scamboats and sleighs in the winter served to move passenger and freight traffic across the St. Lawrence to join up with the railroad line to the Atlantic seaboard. The company's officials were looking forward with confidence to the new traffic which the steamship Great Eastern planned in connection with the through booking arrangements of the Grand Trunk, would bring to the line.

Five months after the opening of the road between Toronto and Montreal night trains were added to the schedule, and railway history gives many complimentary accounts of the excellence of the accommodation provided. The first sleeping coach ever made for any railroad in the world was built at Hamilton, Ont.

The Grand Trunk is justly proud today of the fact that it was Canada's pioneer railroad and takes especial pride in the fact that it has led the way in a very large number of the most important improvements in connection with railroad transportation, and that it is pursuing the same progressive policy in initiating or adopting all modern devices making for the safety and comfort of its patrons.

ROYAL YEAST CAKES MAKE PERFECT BREAD

Your Autumn Cold.

Take it in time.
Hold up that cold.
It is easy to prevent.
Corral the first sneeze.
Slap yourself briskly on the back.
On the back between the shoulders is the place.

The exercise stimulates circulation and prevents congestion.

If you can, take a drink of hot water immediately and repeat every half-hour during the day.

Many severe illnesses have their foundation in a cold, which, if taken in time, can readily be prevented by simple means.

HE DIDN'T HAVE TO.

(Judge.)

"Does your husband ever tell you, when he stays out late at night, that it was because somebody gave an interesting talk at the club?"

"No."

"How interesting! Doesn't he ever give you any excuse at all or make any explanation?"

"Never. He works on a morning newspaper."

Wonderful Bilious Remedy Actually Prevents Attacks

There are two great causes of biliousness: they are constipation and defective liver action.

When Dr. Hamilton's Pills are taken, they not only correct constipated bowels, but act upon the liver as well.

Quite unlike ordinary medicines which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally uses Dr. Hamilton's Pills will ever suffer from the headache, bad stomach or bilious complaint. Get a 25c box to-day.

INTERVIEW WITH THE HON. J. D. HAZEN, K. C., MINISTER OF MARINE AND FISHERIES AND NAVAL SERVICE

Canadians have won undying fame upon the battlefields of Flanders and France. An equal opportunity for distinction upon sea is now offered. A Canadian Naval Overseas Division, which will be attached to the Grand Fleet, is being organized and five thousand men are being called for. The new force will be as distinctly Canadian as are the four divisions now fighting on the Somme. There will be Canadian rate of pay, Canadian separation allowance and assistance from the Canadian Patriotic Fund. The sailors from the Dominion will wear a special Canadian badge, no matter where or in what unit of the navy they are serving. The organization and maintenance of the division is under the direction of Hon. J. D. Hazen, Minister of Naval Service, who is taking an enthusiastic personal interest in the matter and is making a special plea for recruits for this service.

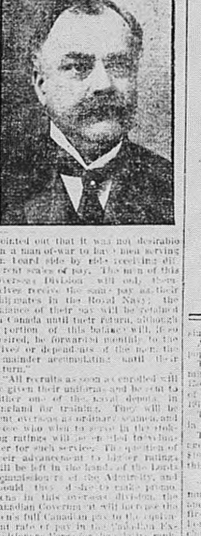
"When war first broke out," explained Mr. Hazen, "the Canadian Government asked the British authorities how we could best help, and suggested raising recruits for the navy, as well as a land force. At that time all naval reserves had been called out, and the Admiralty had a surplus of men. We were informed that they needed no men for the navy, and we could best serve the interests of the Empire by raising land forces. All our efforts were accordingly so directed.

"Since then the naval building programme has been greatly accelerated. The many new ships which have been put in service have had to be manned and there has been an increasing call for sailors. In addition when conscription came into force in the United Kingdom, recruiting for the navy stopped. New channels to supply the necessary men had to be found. To-day the Imperial Navy, which has swept the seas, bottled up the German fleet in the Kiel Canal and has guarded the whole of the Empire, requires men. The navy at all costs must be maintained at full fighting strength."

As soon as Canada was made aware of the change in the situation in regard to the navy we offered to form an oversea division of the Royal Naval Canadian Volunteer Reserve and lend them to the Admiralty for service in the Imperial Navy. The Admiralty were pleased to accept the offer and asked if possible that five thousand men be sent, of which two thousand would be required by the end of the present year."

"Every recruit Canada gives to this force will mean the saving of one soldier for the British army, for if the necessary men are not secured conscripts at present serving in the army will have to be transferred to the navy."

Explaining the arrangements for pay, Mr. Hazen said: "The pay of men in the Imperial Navy is very much less than that in force in the Canadian navy, and consequently the Dominion Government decided that in order to put the Overseas Division of the Royal Naval Canadian Volunteer Reserve on the same footing as the Canadian Expeditionary Force, they would give them similar pay. However, it was pointed out that it was not desirable on a man-of-war to have men serving on board side by side receiving different scales of pay. The men of this Overseas Division will only themselves receive the same pay as their shipmates in the Royal Navy; the balance of their pay will be retained in Canada until their return, although a portion of this balance will, if so desired, be forwarded monthly to the wives or dependents of the men, the remainder accumulating until their return."



"All recruits as soon as enrolled will be given their uniforms and be sent to either one of the naval depots in England for training. They will be sent overseas as ordinary seamen, and those who wish to serve in the stoking ratings will be entitled to volunteer for such service. The question of their advancement to higher ratings will be left in the hands of the Lords Commissioners of the Admiralty, and should they decide to make promotions in this overseas division, the Canadian Government will increase the men's full Canadian pay to the equivalent rate of pay in the Canadian Expeditionary Force for the relative rank.

"The Dominion has been divided into six areas for recruiting purposes, each area being in charge of a chief recruiting officer, who by permission of the Department of Militia and Defence will be allowed to utilize the militia recruiting machinery, and it is hoped that by this means the whole of the Dominion will be reached."

TORONTO FAT STOCK SHOW

Farmers who have choice stock to market shortly would do well to enter in Toronto Fat Stock Show, Union Stock Yards, Toronto, December 8th and 9th, 1916, and secure some of the big premiums offered, in addition to market price of their animals. This show has been coming to the front very rapidly, and carries the best and largest exhibition of fat butcher stock in Canada, and this year promises to be better than ever.

Best Liniment of All Destroys Every Pain But Never Burns

"How thankful we are to get hold of such a wonderful household remedy as Nerviline," writes Mrs. E. P. Lamontagne from her home near Wetaskawin, Alberta. "In this far-away section, far away from a doctor or druggist, every family needs a good supply of liniment. Nerviline is the best of all. It destroys every pain, but never burns. We use Nerviline in a score of ways. If it's rheumatism, aching back, pain in the side, sciatica or stiff neck, you can laugh at them if you have lots of Nerviline handy. For earache, toothache or cramps I don't think anything could act more quickly. For a general all-round pain remedy I can think of nothing more valuable and speedy to cure than Nerviline."

The above letter is convincing—it tells how reliable and trusty this old-time remedy is. Nerviline for forty years has been a household word in Canada. Scarcely a home in Canada you can find without Nerviline. Every community has its living examples of the wonderful curative properties of Nerviline which will cure pains and aches anywhere in the joints or muscles. It's penetrating, soothing, warming and safe for young and old to use. Get the large 50c family size bottle; it's the most economical. Small trial size 25c at any dealer's anywhere.

Trade Briefs.

Newfoundland's output of copper ore increased from 2,000 tons in 1914 to approximately 15,000 tons during the past year. Most of the ore was purchased by dealers in the United States.

Since the outbreak of the European war American goods have been substituted for those which Newfoundland previously imported from Great Britain. Newfoundland's markets are now favorable to all lines of American products.

Chemnitz is the centre of Germany's machine tool trade and has just experienced its most prosperous year, one firm declaring a 16 per cent. dividend and setting aside $60,000 for the dependents of those who serve in the army.

Tanning extracts are needed in Holland.

An artificial fertilizer has been produced in Spain by securing a potassium compound from sea water.

American cotton goods have become popular in Ceylon.

The 1916-17 sugar crop in Santo Domingo is estimated at approximately 120,000 bags, which will be an increase of 15 per cent. over the crop of 1915-1916.

There is a market for cottonseed oil in Argentina.

Through the efforts of consular agents at Barcelona, Spain, orders for $100,000 worth of goods were placed in this country.

"Did the burglars upset your home much?" "Terribly. When I entered and saw everything upside down my first thought was that Jim had come home unexpectedly and changed his clothes."—Detroit Free Press.

IF YOUR THROAT IS HUSKY CATARRH MAY BE STARTING

A weak or irritated throat is the first step towards Catarrh. Everything depends on your remedy. A cough mixture slips quickly over the weak spots, drops into the stomach and does little but harm digestion. It's altogether different with Catarrhozone—it cures because it gets right at the trouble. You inhale Catarrhozone, breathe in the vapor of healing balsams that strengthen and restore the weak throat tissues. You'll never have colds or coughs. Throat trouble and Catarrh will disappear with the use of Catarrhozone. Get the large dollar outfit which includes the inhaler; it lasts two months and is guaranteed to cure. Smaller sizes 25c and 50c, sold everywhere.

NOT CROWDED.

This Old World Has Room for Many More People.

There are on this globe about 1,500,000,000 inhabitants. Most of us, who lack the sense of proportion, at the mention of this big number are apt to speak of the "over-population" of the world. Yet, if we spare a few moments' thought, we shall better know what this represents. There is in my study-room a geographic globe about fifteen inches in diameter. On that sphere there is marked a little spot about the size of the point of a pencil—at any rate, so small as to make it impossible to write the initials of its name—Lake Champlain—upon it. Yet whenever Lake Champlain freezes over there is good standing-room for every one of all the inhabitants of the earth, and then this lake would be considerably less crowded than some of the busy streets of New York. Indeed, strange as it may sound, every one, young and old, would find about one square yard to stand upon. Nay, more, if the very young and the very old would please to stand aside on the shores of the lake, the remainder of the total inhabitants of the world could arrange a skating party where there would be less crowding than is seen on a busy winter day on the skating pond in New York's Central Park.

Sketching this picture is like visualizing the great tragedy of the human race—the few people of this earth do not begin to realize their immense opportunities and their unused resources; meanwhile, they have the insane feeling that the world is "over-populated." All our science, our religion, our art have not given us common sense enough to learn how to use them to live comfortably and happily—we, this mere handful of inhabitants on this immense world of ours. Nor does it look as if we were going to get to our senses before many generations to come so long as we keep on muddling and blundering; as long as greed and vanity, lust for power, the main inheritance of the aims and thoughts of the past, together with some of our time-honored traditions, keep us in the cold, relentless grip of by-gone ages. On the other hand, there is that undeniable possibility that those of the nations which may feel peacefully inclined and trust to luck by remaining unarmed, are liable at the most unexpected time to be at the mercy of the wild beast which lurks around, as the atavism of the primitive instincts of our race.—From "Renewing the Earth from Air," by L. H. Baekeland, in the November Scribner.

WIT AND HUMOR

HISTORIC.

(Louisville Courier-Journal)

"We are going on a long motoring trip."

"What's your objective point?"

"Norfolk, Va."

"Well, you ought to enjoy motoring in that section. I have heard a great deal of Hampton Roads."

FAILED TO WORK.

(Life)

Clerk—"Now, see here, little girl, I can't spend the whole day showing you penny toys. Do you want the earth with a little red fence around it for one cent?"

Little Girl—"Let me see it."

HEADED FOR IT.

(Exchange)

They had lost their way in their new and expensive car.

"There's a sign, dear," she said to her husband, who got out of the car and flashed his flashlight on the board. "Are we on the right road?" she asked.

He read: "To the poorhouse."

"Yes," he answered. "We're on the right road and we didn't know it."

ONE CHANGE.

(Puck)

"Does your husband love you as well as he did when you were first married?"

"He claims to, but he doesn't make such a fuss about it."

CLEVER KITTY.

(Boston Transcript)

"Kitty is such a resourceful girl."

"Is she?"

"Why, the other day when she'd left her reticule at home she powdered her nose with a marshmallow."

VALUABLE EXPLANATIONS.

(Judge)

Mrs. Fry—I don't see how you can tolerate a husband who stays out every night. Why don't you divorce him?

Mrs. Sharp—I would, my dear, but you have no idea what dandy movie scenarios his explanations make. I sell every one of them.

HUBBY KNEW.

(Baltimore American)

Theorist—Our housewives ought to be encouraged to make their own bread. The home-made articles would not be so liable to go up.

Practical Friend—No, if it's all like the kind my wife tried to make, it would be too heavy to do any rising.

FIXING HIS STATUS.

(Detroit Free Press)

"What sort of a man is he?"

"He's the kind that wants beefsteak and potatoes for breakfast."

HIS MISTAKE.

(Puck)

"Novel dinner conceit of Dasher's, wasn't it, to place a card bearing his most recent vers libres beside each plate?"

"Oh, I thought that was the menu."

AN EXPLORER.

(Baltimore American)

"Father," said the small boy, "what's an explorer?"

"An explorer, my son, is a man who discovers some place that nobody wants to go to, and that he wouldn't be able to find, anyhow."

MODERATE.

(Washington Star)

"I assume," said the slightly cynical person, "that you think it's up to you to save the country?"

"No, sir," replied Senator Sorghum; "I take it for granted that this strong and resourceful nation will always save itself. All I ask is to continue flourishing and taking the credit."

ADHERING TO ORDERS.

(Exchange.)

Doctor (to Mrs. Perkins, whose husband is ill)—Has he had any lucid intervals?

Mrs. Perkins (with dignity)—'Es 'ad nothing except what you ordered, doctor.

HE DIDN'T HAVE TO.

(Judge.)

"Does your husband ever tell you, when he stays out late at night, that it was because somebody gave an interesting talk at the club?"

"No."

"How interesting! Doesn't he ever give you any excuse at all or make any explanation?"

"Never. He works on a morning newspaper."

IN THE TOILS OF THE LAW.

(Exchange.)

"I have almost starved to learn," said the struggling student, the first day he hung out his shingle.

"And now you must also learn to starve," replied the old attorney, who remembered the echoing emptiness of his earliest office.

A BIT MIXED.

(Rochester Times)

One day a new pupil in a music settlement school came home and asked, [illegible] "Teacher wants to know."

[illegible]

AS A WARNING.

(Puck)

The assistant—"I have here a poem from a man serving a five years' term in [illegible]."

The Editor—"Print it with a foot-note explaining the circumstances. It may serve as a warning to other poets."

ONLY HALF AS BAD.

(Boston Transcript)

[illegible]

"Not at all. It's only half as bad. She can't sing while she's playing the cornet."

A BIRTHDAY.

She's six to-day! She climbed my knee
[illegible]

You're six to-day! Come kiss your dad
[illegible]

News of the Week Collected by Staff of Live Correspondents

OTTER CREEK

Mr. and Mrs. George Smith of Ayton were visiting at Mr. David Gress's on Sunday.

Mrs. Louis Wolfe and son Clifford were visiting at Henry Wolfe's on Sunday.

Miss Melvina Gress of Brantford returned home from Brantford.

Born—To Mr. and Mrs. William Hossfeld, a daughter.

Rev and Mrs. Thomas Wilson of Walkerton were attending the Carrick Bible Union held at Mr. James Hutton's on Tuesday night.

Miss Ada Grenzenbach and Miss Sybra Grenzenbach of Walkerton, and Miss Emma Filsinger of Ayton were visiting at Mr. Philip Gress's.

It is reported professor Hicks, the Weather Prophet died. Who will take charge of the weather now?

Mr. John Hogg purchased a handsome new piano from Mr. Geo. Smith of Ayton.

Mr. South has his mill nicely repaired and is in good running order again.

Mr. Alfred Weber is on the sick list.

Miss Olive Gress spent Sunday in Alsfeld.

Foxes are making their appearance again in the swamps. Quite a number have been caught in the neighboring swamps.

Mr. Russel Hutton arrived home from London Hospital last week.

PINKERTON

Miss Myrtle Garland spent a few days in Paisley.

Mrs. Albert Pinkerton is visiting her sister, Mrs. (Rev.) Walker in Owen Sound.

Mr. and Mrs. Amsey Gregg and Mrs. Powley spent Tuesday at Mrs. McAtee's on the 15th con.

Rev. Mr. Hilts of Chesley gave a lecture illustrated with limelight views in the Forester's Hall last Friday evening in aid of the Red Cross Society. The lecture and views were very interesting and instructive and a nice little sum of money was realized for the society.

The Pinkerton Red Cross shipped to the Head Office in Toronto the following articles:—8 pillowcovers, 17 surgical shirts, 152 handkerchiefs, 2 wash rags, 10 suits pyjamas, 31 pairs socks, 3 pillows, 2 old blankets, 2 old sheets for hospital use, 2 quilts. These articles were all made since August 15th.

RIVERSDALE

Mr. and Mrs. P. J. Beninger of Ayton, visited Mr. L. Beninger's a few days last week.

Miss Eva Beninger spent Sunday in Ayton and was accompanied home by her brother, Cleo.

Mr. Archie Campbell of Westford visited Mr. J. W. Dietrich on Saturday.

Mr. Mosack and family moved to Formosa last Friday. They will be very much missed by their many friends here.

Mr. and Mrs. Schurbach visited at A. Dietrich's on Sunday.

Mrs. and Mr. J. Hergott moved to Wingham to live with their daughter, Mrs. J. Lockridge for the winter.

Mr. Bert Chatrean has returned home after spending the summer, butter-making in Walkerton.

The following report is based on examinations held during October and on general class work. The names are in order of merit. The average daily attendance for October was 41.

Sr. IV.—Honours—Helen Dietrich, Frank O'Hagan.

Pass—James Petteplace, Marion Petteplace.

Jr. IV.—Ellen Moore, Lilyan Hoffman.

Sr. III.—Honours—Marley Petteplace, Eugene O'Hagan.

Pass—Erma McDonald, Joseph Cassidy, Everett McDonald.

Jr. III.—Honours—Alex. Chatrean, Florence Dietrich.

Pass—Norman Hoffman, Thompson Leys, Murdock McKinnon, Josephine Beninger.

Jr. II.—Wilfred Moore, Hannah Lamont, Mary Moore, Albert Dietrich, Richie Casceagnette, Florence Mosack.

Sr. I.—Agnes Moore, Florence Brown, Kelvin Lamont, Marjorie Cassidy, Rena Moore, Kathryn Petteplace, Tom Moore, Willie O'Hagan.

Jr. I.—Dora Leys, Emily Casceagnette, Sherman Beninger, James Cassidy, Jimmie Caskanette, Mattie Mosack.

Sr. Primary—Florence Beninger, George Dietrich, Archie McKinnon.

Jr. Primary—Barney Petteplace, Edna O'Hagan, Harold Cassady, Willie Moore.

J. A. Dietrich,
Teacher.

EAST BRUCE

Mrs. Geo. Locking of Emo is visiting her parents, Mr. and Mrs. G. Hoone.

We are sorry to report that Mr. Annes is not improving as fast as her many friends would like.

Tax collector Kippon was around. Taxes are sky high. Lot 26, con. 9 pays for taxes $97.47 which is the highest tax for any hundred acre farm in the township.

Miss A. Rankin spent the week-end visiting friends on the 6th.

Wheat buyers are rolling round. It is funny they didn't come to buy when wheat was cheap, but farmers seem to want to wait to see if it won't go to a "fair" price before sell. They look for $2.25 or $2.50 a bushel.

Mr. Harold Nelson is engaged with Geo. McKay.

Mr. and Mrs. Joe Foster spent Sunday with friends at Cargill.

HANOVER

Walter Lines bought back his race horse "Billy Sims" from Henry Litt of Guelph. "Billy" has a mark of 18½.

Lieut. Claude Kormann, son of Mr. and Mrs F. X. Kormann of Hanover, will take a commission in the second Grey Battalion, the 248th. Lieut. Kormann is in town at present endeavouring to secure recruits.

The ladies of the I. O. D. E. took in $28 at their Red Cross concert. Rev. Mr. Hilts of Chesley gave an interesting lecture on "Florence Nightingale," and showed war pictures. Mr. Frost contributed a solo, Miss Dorothy Armstrong an instrumental solo, Miss Loesing sang, Miss Irene Witchan gave a reading and Leo Hills gave a recitation.

There was a fairly large attendance at the annual meeting of the Hanover Horticultural Society held on Tuesday evening of last week. The report showed that the society had spent $120.11 in beautifying Hanover this past year. More particulars of the work done by the society will be printed next week. The officers elected were as follows: Pres.—Mr. Dan Loesing, 1st. Vice Pres.—Mr. J. A. Magee, 2nd Vice Pres.—Mr. H. H. Engel, Secretary—Miss Florence Kirchner, Board of Directors—Mrs. W. H. Mulligan, Miss Hahn, Mrs. J. Helwig, Mr. Tisdale, Mrs. Frank Frost, Mr. J. H. Adams, Mr. R. A. Richardson, Mr. Herman Greutzner, Mr. Chas. Opperthauser; Auditors—Dr. Staples and Mr. M. S. Armstrong.

SOLWAY

Mrs. M. Thompson accompanied by Miss Jessie Coates visited at the home of Mr. Frank Hammond near Pinkerton, on Tuesday.

Misses Birdie McGinnity and Elizabeth O'Connor spent the week-end at Mr. Jas. Weber's near Dornoch.

Mrs. C. Chard and son Elgin from Sask. spent a few days last week at the home of the former's cousin, Mrs. B. Michell here.

Mr. George Ernest left last week for Detroit where he has taken a position.

Mr. and Mrs. E. J. O'Connor spent a few days last week with relatives near Dornoch.

Mrs. Alex Coates from Walkerton, spent the week-end at the home of Mr. and Mrs. Thos. Coates.

FORMOSA

Miss Bertha Weber has been laid up the past week with a severe cold but is now recovering.

Mrs. (Dr.) McCue and her three children are all on the sick list, the children having the measles.

Mr. Henry Mosack, the landlord at Riversdale, has come to Formosa to retire.

EDEN GROVE

News around the Grove is something like the Morphine this week, very scarce.

Miss Mae Fordyce was a visitor in Paisley, Monday.

Lieut. Gordon Connell of the 160th, gladened the hearts of several of his old friends here on Monday, by sending them interesting letters of their trip overseas. Gordon along with the others evidently enjoyed the journey to Witley Camp, England. Being a railroad man he naturally looks into of the little Teapot Engines and lobster can cars in England.

Miss Frances Seiler, Walkerton enjoyed the week-end at her home King St. East.

Mr. Richard Connors arrived home last week sporting a gold headed cane and a sprained ankle, having injured while at work at Port Colbourne.

Church service Sunday morning at 11 o'clock. We notice there is still room for a few more. Everybody welcome.

We understand Mr. Clancy the genial G. T. R. Agent, Cargill, has been promoted to the Walkerton agency. His many friends here will be pleased to hear of his good success, but feel sorry to lose such a good neighbour, for Jimmy always took a deep interest in all the social events in the Grove.

We hear Abby is on his road home from the West. My! Somebody is wearing the smile that will not come off.

Mr. Ed. Hadley had the misfortune of having his hand badly injured Saturday while unloading logs. Guess Ed. thought the Germans had got him.

Mr. Len O'Reilly sandbyed with Mildmay and Clifford friends.

The small Boy and the Snowman are looming up.

That young fellow with horse and rig better wait until after dark before trying to steal fowl. He better train with our Hook and Ladder Co. for a while.

Monday started the winter's sleighing, and a few were out.

Messrs Wm. Todd, W. Fair, and R. Bailey of Palmerston, spent Sunday at their homes in the Grove.

A number from here took in the Red Cross Entertainment at Cargill, Saturday evening.

This weather makes a fellow wonder what he will get for Christmas.

Mr. and Mrs. H. Pearson and son spent Sunday with Cargill friends.

The Epworth League will meet at the Parsonage, Cargill, Thursday evening. A good turn out is desired.

John must think there are going to be a lot of geese plucked this year. He is getting a great stock of cutters.

Miss Mattie Desmond returned to Toronto, Saturday.

Jack Frost got on the first Saturday night but didn't do much damage.

Rev. W. Almack was in town, Friday, making pastoral calls.

What's matter Jimmy Circus coming? Not a load of coal for the Grove.

MILDMAY

Mrs Seraphine Kunkel left last week for her home in Aneroid, Sask., after spending the past couple of months with relatives here and at Walkerton.

Mr. Bert Tatoons of Hanover was visiting friends in town last week.

A very enjoyable Euchre party was held at the home of Miss Mary Guthmen last Wednesday night.

Mrs. Reba Swahn of Harriston visited friends here on Sunday.

Rev. H. R. Moyer, who has been the pastor of the Mildmay and Walkerton Lutheran Churches for the past five years has accepted a call to the Lutheran pastorage at New Hamburg, and will leave for that charge on Jan. 1st next.

Miss Lillie Schling of Cargill spent Sunday in town.

Mr. H. L. Willoughby, Principal of Walkerton Public School, was a visitor in town on Sunday.

Miss Soitzler of Cargill was the guest of Miss Sarah Fischer on Sunday.

Rev. J. S. Burn and Mrs. Burn are attending the funeral of Mrs. Burn's father at Crediton this week.

Mr. Fred Deutchman and Mr. Edgar Peppler of Hanover spent Sunday evening in town.

Mr. John Juergens has purchased a 1917 Ford touring car from Kalbfleisch and Liesmer this week.

Mr. George Eggart and Miss Alma Snelder motored to Rostock on Sunday and spent the day with friends.

Miss Annie Shrank of Clifford was a visitor in town on Sunday.

GLAMIS

Miss Dewar of Tiverton was the guest of Miss Flossie McLennan over the week-end.

Miss Mable Stewart has returned home from visiting her brother Rev. J. W. Stewart of Drew.

Miss Lexy Fraser leaves this week for Winnipeg Man., where she will meet her fiance, Mr. Stewart of Welwyn, Saskatchewan. They will be married in Winnipeg on Thursday. Her friends here join in wishing them much joy and happiness.

Mr. J. H. and Miss McIntyre visited Mr. and Mrs. Alex Kippon 2nd con. Bruce, Tiverton on Sunday.

Miss Cora Purdy has been visiting friends near Teeswater.

Rev. J. W. Stewart of Drew spent a couple of days with his parents, Mr. and Mrs. W. T. Stewart, 14th con.

Mrs. C. McDermid received a telegram last week stating that her son Pte. D. McDermid had been wounded on Oct. 8th gun shot wounds in the hand. The telegram also stated he had returned to regimental duty a few days later. All hope the wound will not be serious.

Miss Margaret Campbell of Harriston paid a short visit here last week.

Mr. Alex Carr 14th con, Greenock and Miss Ida Sawyer, Toronto formerly of 10th con. Greenock, were united in marriage last Wednesday evening. Hearty congratulations are extended.

Miss Florence Webb has returned home from Paisley.

Mr. McCauley visited his parents in Tara on Saturday.

Mrs. N. D. McLeod and Miss Martin of Paisley were guests of Miss Fraser last week.

Miss Margaret Currie is visiting Kincardine friends.

On Tuesday evening last the Women's Missionary Association of St. Paul's Church held their Thank Offering Meeting. Rev. Mr. Mason of Harriston, formerly of Pinkerton was the speaker for the evening giving a splendid address. Mr. McCauley, pastor of the Baptist Church, gave a short address. The choir rendered two Anthems and Mr. D. A. C. McLennan a solo. All being well rendered. Lunch was served in the basement and a social hour spent together. The singing of the National Anthem brought the meeting to a close.

On Friday evening the Ladies Mission Circle of the Baptist Church held their annual Thank Offering Meeting. Although the weather was very unfavorable a goodly number attended. Rev. Mr. Buckborough, a former pastor here, now stationed at Port Elgin, was the main speaker for the evening and delivered a fine address. The local clergymen, Revs. Mr. Keith, Mr. Dr. Mills, and Mr. McCauley all gave short addresses, very suitable for the occasion. Duets by Miss Campbell and Mr. D. A. C. McLennan, Miss McIntyre and Mrs. J. R. McLennan. A Ladies Quartette by Misses F. McLennan, D. Cronin, L. and L. Cunningham. The program throughout proved very beneficial to all.

CARGILL

Mr. John Clancy attended the Public Library Convention in Stratford on Thursday.

Mr. John Cameron of Providence Bay is here on an extended visit to his uncle, Wm. Cameron.

Rev. J. Lions Homer spent Tuesday in London.

The Ladies Patriotic League shipped the Xmas boxes to the 160th boys on Tuesday.

A number of letters were received on Monday from the Cargill boys and as this was the first news since they landed contentment reigned.

Don't forget the box social at Dunkeld school tomorrow night. A good time is in store for you.

Mr. Jas. T. Clancy, who for the past nine and a half years has been the genial station agent, has been promoted to the Walkerton agency and leaves for that point on Tuesday, 21st. Our best wishes go with him and we hope he may often pay a visit to his old burg.

Notice to Creditors

In The Supreme Court Of Ontario. In The Matter Of Perry Ell, A Lunatic.

PURSUANT to the order of the Supreme Court made in this matter, creditors of Perry Ell of the Town of Walkerton in the County of Bruce are required, on or before the 20th day of December, 1916, to send by post, prepaid, to John Henderson of Walkerton, the Committee of the person and estate of the said Perry Ell, their christian names and surnames, addresses and descriptions, and full particulars of their claims, a statement of their securities and the nature of the securities, if any, held by them, or in default thereof they will be peremptorily excluded from the benefit of the proceedings under said order.

Every creditor holding any security is to produce the same before me, at my chambers in the Court House at Walkerton, on the 21st day December, 1916, at ten o'clock in the forenoon, being the time appointed for adjudication of claims.

Dated this 17th day of November, 1916.

Messrs. Robertson & McNab,
Solicitors for Committee.

160TH AT BRAMSHOTT

Bruce Boys are Comfortable in Their New Quarters—Expected That the 160th Will be Broken Up—Interesting Letter From Walter Eidt.

The 160th Batt'n is now at Bramshott Camp, England, having moved there from Wittley Camp on Monday, Nov. 6th. According to letters received from the boys, there is a great deal of talk about the 160th being broken up and everybody expects it. The boys are comfortable at Bramshott, which is a different place from what it was a year or so ago. The officers' huts have many conveniences which include electric lights.

Some extracts from a letter written home by Sergt. Walter Eidt follow, which will be read with interest:—

We have been in this camp a week to-night but are under orders to move to Bramshott Monday morning (Nov. 6th). Bramshott is 8 miles west of Wittley and we will be in heavy marching order. This is a first-rate camp, almost 60,000 Canadians here, but there is no ground for training areas, so we go to Block A1 at Bramshott, which is right next to Brigade Headquarters. There is quite a lot of talk of the 160th being broken up. I suppose it will come sooner or later. We saw two Batt'ns broken up just a day or so ago. They "fall in" the men alphabetically and say, "First hundred right turn!" They go to one unit. The second hundred goes to some other unit and so on. They expect to issue six day passes as soon as we get to Bramshott. Haven't decided where to go yet but would like to go to Ireland and Scotland. Funniest weather here I ever saw. It will rain for 15 minutes, then the sun will come out for a while and then it pours again. I have seen more rainbows in four days than you would see in Canada in four years. The first thing we saw here when we got on the quay was one of the dinky trains. You should have heard the boys laugh and kid the Englishmen about them being "twice as big over 'ome." The trains can certainly go for all their smallness though. In the Northern part there is little to be seen but crowded cities one town overlapping another. Farther south the scenery is very beautiful. Everything is kept so neat and clean. We stopped off at Birmingham for half an hour. Of course we have some trouble figuring out how much a bob, a tanner, or half a crown amounts to.

CHRISTMAS FAIR

Will be Held at Walkerton on Wednesday, December 20th,

The annual organization meeting of the Christmas Fair was held at the Town Hall on Friday night. It was enthusiastically decided to go ahead with the Fair this year. Directors were elected and canvassers appointed to solicit subscriptions for prize-money.

Officers were named as follows:—

President—Robt. Goode, Vice-President—Coun. A. McCarter, Sec-treas.—N. C. McKay.

Directors:—R. M. Player, A. O'Neil, J. H. Hunter, J. E. McGregor, Coun. Russell, John Mielhausen, John Earnest, O. E. Klein, Chas. Stephan, John Vogt, L. A. Eedy, J. A. Wesley, F. X. Schnurr.

Auditors:—O. E. Klein, L. A. Eedy.

It was decided to charge a small entry fee to all exhibitors.

Wednesday, December 20th, was fixed as the date for the Christmas Fair.

PATRIOTIC FUND AND RED CROSS CANVAS MAY 1916

A number of subscribers to this fund have as yet made no payments to the Treasurer. The expectation was that these would be monthly or at any rate quarterly. Will those who are behind in their payments kindly pay them in to the credit of the Treasurer at the Canadian Bank of Commerce, before the end of November.

BORN

FREIBERGER—In Walkerton, on Tuesday, Nov. 14th, to Mr. and Mrs. David Freiberger, a son.

SPROAT—At "Elmslea," Milton, Ont. on Friday, Nov. 17th, to Mr. and Mrs. Adam D. Sproat (nee Nora O'Connor of Walkerton), a daughter.

LIDDLE—In Walkerton, on Nov. 21st, to Mr. and Mrs. Tom Liddle, a daughter.

FREIBERGER—At Otter Creek, on Nov. 19th, to Mr. and Mrs. Isadore Freiberger, a daughter.

+ + +

MARRIED

WOEFLE—NEEDHAM—At the Rectory, Walkerton, on Friday, Nov. 17th, by Rev. R. Perdue, Miss Ellen Needham of Pinkerton, to Mr. Thomas D. Woeflle of Greenock.

Brant Preparedness League

A meeting of the Brant Tp. Branch of the Bruce Preparedness League will be held at the Township Hall on Tuesday, November 28th, at 2.30 p.m. All the members from every polling division are urged to be present as important business is to be done.

+ + +

Big Auction Sale

The valuable stock of registered cattle, French Canadian horses, and farm implements, on the farm of the late H. H. Miller Ex-M. P., is to be offered for sale by public auction at Hanover on Thursday, December 14th. The late Mr. Miller kept only high grade stock and the sale should attract wide attention. A full stock list appears on page 1 of this week's Telescope.

+ + +

His Finger Caught

Mr. August Procanow of Otter Creek, seriously injured the middle finger of his left hand while running a gasoline chopper on Tuesday morning. The gearing of the chopper had been heating, and when he put in his hand to oil the gear, his finger got caught. The flesh was stripped off along the finger and the finger badly split at the first joint, making a nasty wound.

+ + +

Won Military Cross

A former Walkertonian, Lieut. S. G. Freeborn of the 18th Battery, Winnipeg, has been gazetted for the Military Cross. Lieut. Freeborn was assistant to Mr. N. C. McKay at the Agriculture Office here for about a year in 1913. He afterwards completed his course at the O. A. C. and enlisted in the West a year ago. Freeborn made many friends here who are glad to learn of his winning distinction.

+ + +

Baseballer Throws Bombs

Lieut. James Linton, who was among the Canadians recently awarded the Military Cross, is a former Teeswater young man, and a cousin of Mr. D. McKechnie of Walkerton. Lieut. Linton, who is the son of a Presbyterian minister, enlisted as a private but was promoted at the Front. His experience as a baseball pitcher at Varsity is said to have helped him to win distinction as a bomb thrower.

+ + +

Culross Cuts Grant

We understand that the Culross Council has at last agreed to give a paltry $300 to the British Red Cross, thereby cutting last year's donation in two. We cannot believe that the ratepayers of Culross will be proud of the parsimonious part their Council is taking at the hour of the Empire's great need. Reeve Kuntz was strong for repeating last year's grant, but only one Councillor, would support him.

+ + +

Help For The Belgians

A very eloquent appeal for assistance to the stricken Belgians was delivered at Methodist and Presbyterian churches here on Sunday by Rev. (Capt.) Menafer, of the British Brotherhood. It was planned to canvass the town for subscriptions to the Belgium Fund on Monday but the Captain's plans were changed. It is expected that he will return in December to speak in some of the Churches and also give his illustrated talk on his experiences at the Front on a week night. He also has some interesting war films which will be shown at Movieland.

+ + +

Teeswater Mother Anxious

Mrs. P. C. Scott, of Teeswater, has three sons at the front. Dan went over with the first contingent and was wounded a year ago. Strange to say since he was in the hospital no word has been heard of him, although every effort has been made to trace him. Up to that time he wrote regularly every two weeks. The other two boys, Peter and Stewart, were with the 100th, but at the time of leaving, Stewart was laid up with pleurisy. He has now gone over to the Highlanders, and is on his way to Windsor. Mrs. Scott lost her husband about the time of the outbreak of war. Sitting at the table he seemed to choke and expired in a few minutes.

+ + +

Something At Last?

A dispatch from London on Saturday stated that the appointment of a District Recruiting Officer for Western Ontario was expected within a few days to be followed by a systematic campaign for men in all the eleven Counties of Military District No 1. It is proposed to have recruiting officers and assisting squads of men in every municipality who will make a thorough canvass of every eligible man in their district and find out definitely whether he is, or is not, ready to offer himself in the Empire's interest. The results of these canvassers will be tabulated and careful note made of all those who absolutely refuse to enlist. It is also hoped that some method can be worked out for accurately determining just how many and what men are absolutely needed in the business in which they are engaged and those who can be spared.

NEWS ABOUT TOWN

Local news on page 4.

Miss Huether is visiting in Toronto.

Suits and overcoats at S. A. Rife's.

Next Sunday will be Tuberculosis Sunday

C. P. R. Town Ticket Office at Hunter's.

Miss Vera Duncan is visiting friends at Toronto

Christmas Fair, Wednesday, December 20th.

County Council meets Monday. December 4th.

Fur lined caps at low prices at Woodman & Co's.

The Telescope wants the news from every sideline each week.

The Ontario Reform Association meets at Toronto on Friday.

Nice toques and hockey caps at reduced prices at Woodman & Co's.

Get the new Arrow Collar, Berwick. Cut to fit. G. T. Rourke, Men's wear.

Pte. James Murray of the A. M. C. London, was a visitor here this week.

Mrs Stauffer left last week on an extended visit to Toronto and Peterboro.

We sell the "Popular Brooms" light weight and easy to handle.—Goode & McKay.

Mr. James Clancy assumes his new duties as G. T. R. Agent here on Monday next.

Capt. (Dr.) McCue, of the A. M. C., London, spent the week-end with his family at Formosa.

One of those large silk scarfs makes a nice Xmas present. We have them at Woodman & Co's.

Mrs. W. H. Shaw left on Monday to visit her sister, Miss Ruth Robertson, at Richmond, Virginia.

Mr. John Scanlan of Brant, was called to Toronto this week owing to the serious illness of his son, Frank.

Pte. Sam Truax of the S. S. Company, Stratford spent Sunday with his parents, Mr. and Mrs. S. Truax.

We have a nice assortment of tweeds and worsteds to choose from for your Xmas suit at Woodman & Co's.

Mrs. Ewart (nee Fairservice) leaves today to sail from Montreal to England to join her husband, Lieut. Ewart.

Don't forget to write to the boys overseas. A letter from home is the thing that gladdens the hearts of our absent soldier boys.

Car of salt unloaded this week. Fine salt in barrels also fine and coarse in sacks as usual at regular prices.—Goode & McKay.

The convenience of Goode & McKay's Meat department is worthy of a test—send a messenger or use the phone, we do the rest.—Goode & McKay.

The Ladies of St. Thomas' Church will hold their Annual Bazaar of fancy work, home-made cooking, candy etc. on Thursday, December 7th at three o'clock.

Mrs. Peter Scanlan and Miss Nellie, and Mrs. John Connors of Eden Grove attended the funeral of their cousin, Mr. James Conway, at Alliston on Monday.

Mr. Norman Walford's infant daughter was taken very ill shortly after going to Hespeler, being threatened with pneumonia, but is now recovering.

Mr. Erbrooke Norrish of Ottawa, visited his mother here last week. Mr. Norrish who is an engineer in the Civil Service at Ottawa, was just returning from a business trip to Chicago.

Jam, pickle and honey Shower for Soldiers' Convalescent Home, Toronto, Monday afternoon, November 27th at the town hall. Any information wanted, telephone Mrs. J. Rowland, Mrs. Jas. Whitehead or Mrs. Ralph Kreuger.

Private George Gould of Saskatoon, a grandson of Mrs. Gould, Walkerton was reported wounded in last week's Casualty lists. His father, Mr. W. S. Gould, formerly County Clerk of Bruce, is also at the Front as Sergeant with a Western Battalion.

Mrs. Reifer, McGivern St., who has been in the County Hospital, recovering from a fracture of the arm and other injuries occasioned by a fall at her home a month ago, is leaving to make her home with her daughter, Mrs. J. W. Lamb at Lindsay.

Mr. Wm. Patterson returned this week from spending a month at his farm near Aylmer. Mr. Patterson says that the farmers in that rich dairy section are badly put to it to feed this year but are getting an exceptionally high price for their milk at the Aylmer condenser.

Dr. Thos O'Hagan, who is among the Canadian officers awarded the Military Cross, is no relation to Dr. Thos. O'Hagan of Bruce County, but he is known indirectly to many Walkerton people through references to him in Major Fraser's letters, he being a great friend of the Doctor.

Mr. Earl Pinkney of Brant, returned home this week from a three month's trip to the West.

R. E. Truax M. P. will attend the meeting of the Ontario Reform Association at Toronto on Friday.

Mr. W. Henning, tailor of S. A. Rife's staff moved his household effects here from Hanover this week and is occupying Mr. Frank Schnurr's new house on Gibson St.

Shot A Porcupine

Leo Yack got a porcupine while out hunting in Foster's swamp on Saturday. It is over two years since one of these prickly fellows has been seen in this part of the country.

+ + +

Engagement Announced

Mr. and Mrs. James Seaburn announce the engagement of their only daughter, Edna Elizabeth, to Mr. Alfred Helm, the marriage to take place early in December.

+ + +

Green Cut Bone.

Now is the time to feed your hens green cut bone, when the price of eggs is high. Nothing better to make them lay. For sale at Wingefelder & Krueger's.

+ + +

Woeflle—Needham

Mr. Thomas D. Woeflle of Greenock and Miss Ellen Needham of Pinkerton were quietly married at St. Thomas Rectory on Friday evening, by Rev. R. Perdue. The happy couple will live on the groom's farm in Greenock.

+ + +

Curlers Organize

The Walkerton Curling Club has reorganized for the coming season with the following officers:—President, A. P. Sieveright, Vice-pres., E. McConnell; Sec-treas., E. H. Leeson; Managing Committee, the above officers and H. M. Lay, F. W. Lippert, G. T. Rourke and A. Collins.

+ + +

Decorated By The King

Capt. Charles Kilmer, grandson of Mr. N. Crawford, who won the Distinguished Service Order for gallantry at the Front, at the same time losing a leg, received his decoration from the King at Buckingham Palace on Saturday. Capt. Kilmer is expected home at Toronto shortly.

+ + +

Engagement Announced

Mr. and Mrs. Wm. Van Horne of Walkerton, announce the engagement of their second daughter, Elizabeth L., to Mr. William Benjamin Beatty B. A., D. L. S., eldest son of Mr. and Mrs. William Beatty of Sarnia and nephew of Prof. Samuel Beatty of the School of Applied Science, Toronto University, the marriage to take place on Wednesday, Dec. 27.

+ + +

New Children's Shelter

The Children's Aid Society has taken an option on some vacant property at the south end of Gibson St. owned by Mr. John Dilger. In case the deal goes through, the Society will erect a Children's Shelter on the property which comprises six town lots, three of which face on the Street. The Society has $1,000 funds available, from the County Council, to build and furnish a shelter.

+ + +

Curio from Salonika

Mr. C. W. Cryderman received some interesting war souvenirs on Tuesday from his son, Sergt. Wilbur Cryderman of the University Hospital, Salonika. They included one of the steel arrows dropped by the Zeppelins, a very wicked-looking implement about four inches long, also a cross-section from the propeller of a biplane and a number of trinkets made from a Zeppelin captured at Salonika in May last.

+ + +

Municipal Pot Boils

Stirring times are promised at the coming Municipal elections. Coun. Russell informed the Telescope yesterday that he would be a candidate for Reeve against all comers. Coun. Russell has "stood on his own bottom" the past year. He says he is going to try to "clean up the ring" at the Council. With Couns. Douglas and Lettner also likely candidates for the reeveship, it will mean some changes at the Council next year, because all three certainly can't be elected.

+ + +

Fighting In The Ranks

Instances are being reported in the daily press of the Canadian officers who, being unable to obtain appointments, are going to the Front as privates. These men are highly to be commended, and it would be a good thing if others would follow their example. They would find themselves in good company in the ranks with some of Canada's finest young manhood. At least one Walkerton officer Lieut. Elliot Dixon, has gone to the Front as a private. A noted instance is that of Major "Feather" Aylesworth, a well known Toronto lawyer, the brilliant son of Sir Allen Aylesworth, who is fighting as a private in France.

Reciprocity!

How many of your friends have given you photographs of themselves and received none of you in return? Why not discharge these obligations? Portraits are our specialty, the kind that breathes your own personality, the kind your friends will appreciate and value and you will be proud to give. The Fraser Studio, Walkerton.

+ + +

Outlook Promising

Judging by the reception which the Christmas Fair canvassers have received, the Fair is going to be a bigger success than ever this year. The Christmas Fair is becoming more popular every year and the canvassers hear the opinion expressed on all sides that if the Northern Fair and Christmas Fair would join forces, they would have one big agricultural show which would be a credit to Walkerton and to Bruce County. The government grant of $300 and a Town grant of a smaller amount back of it, would give a good start towards financing a big united Fair.

+ + +

The Noble Red Man

A despatch from Ottawa indicates that in the present big struggle the Canadian Red man is certainly doing his bit. No less than twelve hundred Indians have enlisted in the Empire's service. Of these, 65 are in Bruce County Battalion, hailing from Cape Croker where the entire male population between the ages of 21 and 65 years is only 108. Indians at the front have proven themselves excellent riflemen and possess great powers of endurance. To the war funds last year the Indians contributed over $7,000, while Indian women have knitted a great many socks, mufflers and other comforts. It is a noteworthy fact that the first man from Brant County to fall at Langemarck was Lieutenant Cameron Brant, a great-great-grand son of Joseph Brant, the famous Indian who rendered such service to the British in 1770.

+ + +

Soldiers' Aid Reorganizes

The young ladies of the Soldiers' Aid met for reorganization on Friday afternoon and made plans for the coming season. It was decided that whatever funds were raised would be devoted to our boys at the Front. When the Tea Room was first organized two years ago, the arrangement made was to divide the proceeds monthly between the I. O. D. E. and the Red Cross. But so many boys from our town and vicinity have since gone to the Front, that it has now been decided to spend the money direct. The members decided to try to get the rooms formerly occupied by the Soldiers' Club, but it has been found that they are not available, and other quarters will have to be secured. The young ladies are entering heartily into the enterprise and hope that in view of the ever-increasing needs of the situation that the public will patronize them very liberally this season as heretofore. Officers were elected as follows:—Pres., Miss Rowland; 1st Vice Pres., Miss Oberle; Sec.-treas., Miss Benter.

+ + +

Town Council and Hydro

When one considers that Hydro was the issue most discussed at the last municipal elections and that Mayor Lippert, in appealing to the electorate for a third term, gave the people of Walkerton a solemn pledge to give them an opportunity to vote on Hydro, it seems scarcely possible that the year is almost gone and that the people have yet no figures or estimates regarding the cost of installing hydro in Walkerton before them. Yet such is the fact. Furthermore, if the figures are not forthcoming immediately and an Enabling By-law passed by the Town Council within the next week, it will be too late to submit the matter to the electors at the January elections. The by-law requires to be advertised for three successive weeks before being voted upon, the first publication to be at least thirty days before the voting day. We are not impugning the good faith of the Mayor and Council. But we do say that the gentlemen would have done better not to allow such an important matter to drag along until the eleventh hour. And we would further point out that if the Mayor and Council honestly wish to keep faith with the citizens of Walkerton, it will be necessary for them to take decisive action at once. The question at the present moment is not whether Hydro would be better or worse for Walkerton than our present lighting and power system. That is a matter on which we are yet in the dark. But the Town Council owes it to the citizens to give them light on this important matter in the form of a proposition from the Hydro Electric Power Commission of Ontario. Then it will be for the people to weigh the Hydro proposition and to say by their votes whether they will accept it or whether they will have none of it. The citizens do not expect the Council to decide this important question for them but they have a right to expect Mayor Lippert to redeem his pledged word and give them an opportunity of making a choice, for hydro or against hydro.

LIEUT. LESLIE YOUNG

Killed in Action in France—Brilliant Young Student Sacrificed His Earthly All on the Altar of His Country's Good

A message that came over the wires on Saturday morning brought the War home very closely to a good many Walkerton people. It was to the effect that Lieut. Leslie Young, son of Mr. and Mrs. Henry Young of Cargill, had been killed in action. By some oversight no official telegram was sent to the parents, the first word being a telegram of condolence from the Premier, Sir Robert Borden. About the same time the name appeared in the Casualty lists in the daily press. Les Young attended the High School here up to two or three years ago and was a general favorite. Jovial, wholesouled "Les" was a lovable chap and he possessed ability which gave promise of a brilliant career. After leaving High School, he settled with Lt-Col. W. T. McMullen's law-firm at Woodstock. Last year he took a Commission in the 71st. Batt'n. After arriving in England, he was transferred to the 50th Battalion and at the time of his death, he was second in command of "C" Co. of that unit.

Les. had the soul of a poet and wrote some very good verse. Some lines on Lieut.-Col. Southerland, published in the Telescope a few months ago were much admired. There is no doubt in the minds of those who knew Lieut. Young, that the fine soldierly qualities which he attributed to his Commanding Officer in these verses, were the expression of the fine ideals of the gallant young soldier-poet which were reflected in his daily life.

Oysters

Fresh every week direct from the beds. Solid meat at 60c a quart.—Wingefelder & Krueger.

AN EVIL HERITAGE

instead of replying to his question, the stranger continued to scrutinize Bernard's face with a puzzled frown on his own.

"It seems to me that we have met before?" he observed at last, meditatively.

"Indeed? I am not aware of the pleasure of an acquaintance. My name is Berrincott."

"Berrincott?" The stranger started so violently that Bernard half expected to see him lose his seat. As he turned his scared face toward him Bernard noted that it had grown several degrees paler.

"Then you are Bernard?" he asked, in a quick, breathless tone.

"Yes, I am Bernard."

"Excuse my seeming familiarity. I am beginning to understand. You are the nephew of Captain Berrincott, I presume, and the cousin of Miss Berrincott."

"That is exactly what I am."

"And it was you who saw them off in February on board the [illegible]."

"It was I. Does that explain the familiarity of my face?"

"I believe it does." And the stranger gave Bernard another very keen glance in which something like suspicion seemed for a moment to shine. Then with an effort he appeared to recollect himself, and there followed an introduction.

"I understand then that your cousin is still at Cane Hill," remarked Mr. Hibbert presently.

"Yes, but on the eve of departure. I have pledged myself to bring her over to Lot 13 to-morrow. It is high time, you know, since Uncle James is intending to sail by the Thursday mail."

Again Mr. Hibbert started nervously. "By the Thursday mail? Captain Berrincott? Are you sure you are making no mistake?"

"None whatever. It's something connected with the purchase of machinery which is making him hurry up his departure. And I am delighted with the arrangement," added Bernard, gaily, "since it assures me pleasant travelling companions for the voyage home—always supposing that I can clear off my business before Thursday. Uncle James can't help being entertaining, and Marian, as possibly you have found out already, is an excellent little girl in her way when once you get to know her."

Mr. Hibbert did not reply immediately. Something in Bernard's words seemed to have astonished him beyond measure.

"You intend therefore to travel home in the same ship with your relations?" he asked, after a [illegible] ning his companion's youthful figure with a disapproving eye.

"Of course I do," said Bernard, who from that moment forward had to bear the chief brunt of the conversation, seeing that Mr. Hibbert had relapsed into a meditative mood.

At the door of Cane Hill the dripping travellers were received by Miss McCrie, in her most hospitable frame of mind.

"This is first rate, two guests, when I had only been looking for one. You are Mr. Berrincott, of course; I know all about you already; you have come over on business. Bless me, and Mr. Hibbert! What can I serve your majesty with to-day?"

"Business matters, too," explained Mr. Hibbert, somewhat hurriedly. "It's about that new Inspector. You see I had about half-a-dozen [illegible] waiting to be filled up, and as I didn't feel sure of trusting any one with them; I thought it simplest to come over myself."

"Far simplest," agreed Miss McCrie, with apparent gravity. "Curious, is it not," she added, reflectively, "that neither of us should have thought of the schedules yesterday?"

"Very curious, but our time was so short, you know."

"So it was." "Surely he is not coming to repeat his offer," was her inward reflection, "and yet he looks as though he were here with some fixed purpose."

Miss McCrie turned to Bernard.

"And now, Mr. Berrincott, take your choice between the drawing-room and the dining-room; in the former you will find Miss Berrincott waiting to welcome you, in the latter the old registry books are lying ready to be inspected. I have had them dusted and laid out on the table."

"Pleasure first, business afterwards is the motto of all frivolous and sensible people," said Bernard, with a light-hearted laugh. "Is this the way to the drawing-room?"

"It is. And how about you, Mr. Hibbert? Is business or pleasure to have the pas?"

"I am going upstairs," said Mr. Hibbert, whose eyes remained fastened on Bernard almost as though he were afraid of losing sight of him as he pressed up the rickety steps.

As her cousin entered, Marian rose, and a wave of vivid color rushed up to her very hair-roots. While she came forward with eyes overflowing with gladness and hands outstretched, Mr. Hibbert stood rigid beside the door, so engrossed in observation that he had even overlooked the necessity of a conventional greeting. Miss McCrie likewise stood aside and was likewise observing, but without being able to come to any very definite conclusion.

"Is not this giving pleasure rather too marked a precedence over business?" she inquired a little hesitatingly, as Bernard, after the first greetings had passed, looked round for a seat.

"By Jove, yes! I suppose I ought to be taking the bull by the horns. I shall enjoy a talk with my little cousin all the more for having cleared off the registers. I don't suppose it will take me ten minutes." Bernard was on the point of turning away when some impulse moved him to take Marian's hand again.

"You wish me good-luck, do you not?" he asked, looking into her eyes.

Afterwards it struck him as strange that she should only have smiled in reply, a happy, it might almost be called a triumphant smile. Of course he knew exactly what he was going to find downstairs, but still he could not help thinking that it would have been more becoming in Marian to have shown a little seemly anxiety at this crisis.

And meantime Mr. Hibbert still stood by the door, gazing with all his eyes and making mental notes.

CHAPTER XXVII.

Within five minutes of the moment when he quitted the drawing-room of Cane Hill, Bernard was standing alone in the dining-room, gazing at the pile of dark green volumes on the table, and, greatly to his annoyance, aware of a certain hesitation in approaching them. It was only now when he found himself within touch of the decision of his fate, that his mind was crossed by the somewhat aggravating question as to what could have induced Mr. Silkworth to select this particular form of trick in preference to any other.

Meanwhile, Miss McCrie, having installed her client at his post, had slowly remounted the stairs. For a minute she had hesitated as to whether this was advisable or not—indeed, it was against her principles in general to disturb a tete-a-tete of any sort, so long as the participants were of different sexes and of tolerably [illegible] ages; but she did not think she could have been mistaken as to the meaning of that imploring gaze which Marian had sent after [illegible] she left the room with Mr. Berrincott. Things at this juncture could "bear a bit of clearing up," as Miss McCrie put it to herself. It was quite possible that Mr. Berrincott might yet turn out not to be the right man; the only thing beyond all doubt was that Mr. Hibbert was the wrong one.

It was evident, too, by his attitude and expression, that the unhappy [illegible] knew this himself. Was [illegible], indeed, the same man whose [illegible] had infected both Miss McCrie and Marian not longer ago than yesterday? The light in his eye was [illegible] the expression about his [illegible] had soured unpleasantly. And yet, despite the despair which had visibly settled on him, it was with a look of distinct hostility that he viewed his hostess' entrance. Was it on a forlorn hope that he had come over? Miss McCrie almost thought it must be so, and in her anxiety to please everybody felt for once in her life thoroughly driven into a corner. What between Marian's imploring eyes and Mr. Hibbert's lowering brow the poor little lady was at her wit's end. To stay or not to stay? Who could answer that question?

At this critical juncture she had an idea. Turning to one of the Chippendale cabinets, she took out of it an old sandalwood box, in which for several decades past she had treasured all the Christmas cards sent to her by friends [illegible] home.

"Oh, Miss Berrincott," she briskly began, placing the box on the table beside her, "you know that you promised to tell me the names of all the English flowers, and now you are going to-morrow, and I don't know one yet."

She seated [herself] triumphantly as she spoke, for in this way she would be enabled to stay and yet not to stay. Considering that Marian and Mr. Hibbert were established at the far end of the long room, she verily thought she had hit upon an extremely neat solution of the difficulty. But Mr. Hibbert did not seem to be of this opinion.

"If you write down the names, my dear," she added, hurriedly, at sight of his darkening face, "if only you will write what they are. I used to know them long ago, you know, but have forgotten them almost all."

"No, no, I will write them," said Marian, grasping at the chance. "It is no trouble at all."

And so it came about that during the next half hour Miss McCrie's old Christmas cards played a very much more important part than their dogs-eared corners and faded colors would have appeared to fit them for. The [illegible] looking holly berries and [illegible], whose tints had been given [illegible] by the all-penetrating tropical [illegible], now that they [illegible] from their long seclusion, [illegible] their eyes and staring [illegible] where [illegible] looked at at [illegible], they could not possibly be [illegible].

[illegible] Marian these bleached [illegible] of English flowers were a true [illegible]; they saved her from the [illegible] of talking and of being [illegible], of which it was hard to say [illegible] the most oppressive. Mr. Hibbert was entirely unmanageable; [illegible] had sat down a few paces from her, with something distinctly defiant in his attitude, watching her suspiciously from under his down-drawn brows, and breaking silence, when he [illegible], by some casual question thrown [illegible] with regard to her cousin.

"You have known him since you [illegible] a child, have you not?"

"Yes," said Marian, hesitatingly. [illegible] And just at that [illegible] Miss McCrie came up with a [illegible] in her hand.

[illegible] said Marian, with a sigh [illegible] she took up the pencil. [illegible]

"[illegible] known him since you were [illegible]," returned Mr. Hibbert, as Miss McCrie retreated. [illegible]

[illegible]

boundless, thus, a bunch of white jasmine saved her from the necessity of replying to an unpleasantly pointed remark of Mr. Hibbert's, and a big red [illegible] came in most conveniently for filling up a more than usually awkward pause. The occasional scraps of reminiscences that were apt to step up in the old maid's mind, in connection with buttercups or dog-roses, did their best in tiding over Marian's difficulties, as well as trying Mr. Hibbert's patience.

By degrees, as minute after minute passed, the strain from which Marian had been suffering relaxed, or rather [illegible] exchanged for another. Both Mr. Hibbert's eyes and his questions [illegible] their power of annoying [illegible]; her answers became absent and indifferent, and he himself began to disappear for her, while her eager and impatient gaze was for ever travelling the long room and seeking the open doorway.

"The hunt downstairs seems to be requiring rather more than ten minutes," observed Mr. Hibbert, rather sharply, having failed to elicit a response to two previous remarks.

At the very moment that he said it, he saw a new expression on Marian's face, and looked quickly towards the door. Bernard was entering; there was a joyful smile on his lips, and yet his eyes had a dazed look in them, as of a man who has had a fright. He crossed the room quite soberly to where Marian was sitting, but after that his calmness gave way.

"It is all right," he said, taking hold of her hand, more because he felt the necessity of giving some vent to his emotion than because it was her hand more than it was any one else's, and at the same time answering the unspoken words on her lips, for "Is it all right?" was exactly what she had wanted to say, although she had not been successful in doing so.

The storm of congratulations that followed emanated entirely from Miss McCrie. Mr. Hibbert sat in the background and said nothing, and Marian only smiled that same happy smile that had puzzled Bernard when he turned to leave the drawing-room.

"And yet it has been a narrow shave," talked on Bernard, growing voluble as the nearness of the peril he had escaped began to lose some of its first sense of alarm. "Silkworth was right about the year—though how it comes to be '59 beats my comprehension even now—but of course he was wrong about the day; June 29, instead of June 30, which, seeing that my father was married on June 29, makes the difference of the whole world to me. And yet I am puzzled; only nine days' interval—my father cannot have been aware that his first wife had been alive so lately."

Bernard broke off abruptly and threw a glance of inquiry towards Mr. Hibbert. He had been aware of his presence before, but not distinctly, his mind being too deeply saturated with one chief thought to let such details as fellow mortals appear of importance just at first.

"Perhaps you would prefer having a quiet talk with your cousin," put in Miss McCrie, observing the glance. "You must have so much to say to her." And she began to gather up her cards, looking in some alarm at Mr. Hibbert.

Mr. Hibbert, however, appeared either not to have heard or not to have understood. He remained sitting where he was, in a sort of dogged silence, immovable except for his eyes, which passed continually from Marian to Bernard, and from Bernard back again to Marian.

But Bernard had already recovered from his momentary fit of reserve.

"Nothing that the whole world may not hear," he readily replied. "Don't move, please, on my account. And oh, by-the-bye, Miss McCrie, perhaps you can tell me which will be the quickest way to despatch the telegram? I have had written out in my pocket-book for a week past."

"Which telegram?" asked Marian, speaking for the first time.

"The telegram to Mr. Durrant. I promised to wire 'All right' as soon as I had seen the registers."

"Mr. Durrant?" repeated Marian, with a vague sense of alarm at her heart. "Why does Mr. Durrant need to be told?"

"Because—hang it all! I don't care who knows that I am happy; secrets never were in my line—because Mr. Durrant is Sybil's father, and because Sybil and I are conditionally engaged; conditionally that it is until to-day, but unconditionally from the moment that the telegram reaches the Monastery. You wish me joy, my little cousin, do you not? I want you and Sybil to be fond of each other." And he bent to take her hand. But Marian snatched it away and stood up suddenly from her chair.

"Is Sybil that girl in the cream-colored dress whom you spoke to that evening in the carriage?" she asked, looking him straight in the face and growing rather pale.

"That evening when you took your first jaunt? Yes, that was Sybil."

"And if the dates in the register book had not been right you would not have married her?"

"I could not have married her, that is to say. Her father would not have given his consent."

"You mean that she would not have married you," returned Marian, with a sharpness which sat strangely upon her. "Oh, what have I done?" and she cast a bewildered look about her, but, meeting the astonished eyes fixed upon her, appeared to recollect herself. "No, I did not mean that." And on an irresistible impulse she added, "But I do not think I can be fond of her."

"You cannot mean that, Marian," said Bernard, indignantly, while Miss McCrie came to the rescue with a second storm of congratulations.

Mr. Hibbert again said nothing, but was sitting a little more bent forward in his chair, and if any one had taken the trouble to observe him, it [illegible] have been seen that he was [illegible] breathing.

"Of course I don't mean that," said Marian, with an excited laugh. "I only meant that I don't think I could be fond of a girl who marries you only because you have got Thornton, and who would give you up if you lost it. That's what I meant, Bernard, don't you understand?"

She was beginning to feel the ground under her feet again, and her color had come back—rather more [illegible] perhaps, than was quite necessary, but anything was better than looking dejected and pale, she told herself desperately. Whatever happened, Bernard must not guess.

And he did not guess. His attention had, for a moment been arrested by her unusual manner, but already he was back again at his own [illegible] glad, of so simple an explanation of the puzzle.

(To be continued.)

SUNDAY SCHOOL LESSON

Lesson VIII.—November 19, 1916.

From Melita to Rome.—Acts 28: 11-31.

Commentary.—I. Paul's journey from Melita to Rome (vs. 11-16). 11. After three months—The season dangerous to navigation was past. The three months after the shipwreck ended about the first of February. A ship of Alexandria—Melita was on the direct route from Alexandria to Rome. This ship was engaged in carrying grain, and had wintered at Melita, the stormy season having arrived before the ship reached its destination. Sign was Castor and Pollux—A carved image of Castor and Pollux was placed at the bow of the ship to distinguish it from other ships. In modern times boats are given names to distinguish them. Mythology makes Castor and Pollux twin sons of Jupiter. 12. Syracuse—A city on the southeastern coast of Sicily, eighty miles north of Melita. Three days—This delay was probably for unloading and loading freight, and waiting for a favorable wind. 13. Fetched a compass—They sailed in a winding course. It is thought that this was because the wind was unfavorable. Rhegium—A city on the west coast of the shore of Italy. South wind blew—It carried the ship in the desired direction. The course lay through the narrow and dangerous passage between Scylla, a projecting rock on the Italian side, and Charybdis, a rock and whirlpool on the coast of Sicily. This passage was particularly dangerous to ancient navigators. A strong current sweeps through this narrow passage. Modern sailors have more knowledge and better control of their ships. Puteoli—A city on the Bay of Naples. It was the ancient port of Rome. 14. We found brethren—It is evident from this that during the thirty-one years after the crucifixion of Christ the gospel had made its way rapidly. It must have been gratifying to Paul to meet Christians there, and their fellowship during seven days must have been mutually refreshing.

15. From thence—From Rome. The brethren heard of us—Paul and his company tarried seven days at Puteoli, and during that time word was carried to Rome of their coming. Came to meet us—Genuine Christian love and fellowship were prompting the brethren at Rome to give Paul a hearty greeting. As far as Appii forum—This was a market-place on the Appian way, 43 miles from Rome. The three taverns—A village thirty-three miles from the city. It appears that different companies of the brethren came out to welcome Paul, some meeting him at the former place and some at the latter. He thanked God, and took courage—It was an encouragement to Paul in the midst of the trial through which he was passing to receive the loving greetings of his fellow Christians. 16. The centurion delivered the prisoners—After a voyage full of danger the centurion gave his prisoners over to the proper officers in Rome. He had fulfilled his commission. Was suffered—Was permitted. To dwell by himself with a soldier that kept him—The centurion, Julius, may have spoken favorably of Paul and used his influence to gain this privilege for him.

II. Discourses to the Jews (vs. 17-29). 17. After three days—This length of time was probably occupied in resting after the tedious journey and in becoming settled in the new quarters. Paul called the chief of the Jews together—The apostle had a twofold purpose in this. He desired to acquaint the leading Jews of Rome with the history of his arrest and appeal to Caesar. He further wished to declare to them the gospel of Christ, giving the good news to them before preaching to the Gentiles. Men and brethren—Paul addressed the Jews respectfully and affectionately, as his own people. Into the hands of the Romans—The history which is thus briefly summed up is contained in Acts 21-26. Paul uses care not to charge the Jews of Jerusalem severely. 18. No cause of death in me—Lysias did not consider Paul guilty of crime and the Sanhedrin to whom he presented him took no action against him, but fell to contending among themselves. Felix, Festus and Agrippa, in turn, decided that he was not a criminal. 19. I was constrained to appeal unto Caesar, he would be returned to Jerusalem, and plots would be formed to take his life. 20. For the hope of Israel I am bound—Paul had been many years engaged in preaching the Messiahship of Jesus. The hope of Israel was the coming Messiah.

21. Neither . . . spake any harm of thee—The Jews listened courteously to Paul and informed him that they had not received from the Jerusalem Jews any charges or accusations against him. There had not been sufficient time for letters to reach Rome after Paul sailed, for he left Caesarea near the close of the navigation season and reached Rome immediately after the season opened in the spring. 22. This sect . . . is spoken against—The Jews had heard of Christians, but had heard them reproached and opposed. They desired to hear from Paul's own lips the doctrines which he held. 23. Came many . . . into his lodging—A day was appointed for Paul to preach to the Jews, and they came to his place. He was not free to go to them, but he was free to receive those who came to him. Persuading them concerning Jesus—Paul improved well the occasion in preaching Jesus to his fellow Jews. He showed from the law and from the prophets that Jesus was the Christ, occupying the whole day in his preaching. 24. Some believed . . . some believed not—As is usually the case, there was a division among the hearers of the gospel. Some were convinced that the Messiah had come, and others rejected the truth. 25-29. When the hearers were divided in their belief, Paul applied the words of Isa. 6: 9, 10, to them, and announced that he would turn to the Gentiles, who would receive his message. The Jews left him and reasoned among themselves.

III. A two years' ministry at Rome (vs. 30, 31). 30. Two whole years—Evidently his case had not reached the emperor until the expiration of that time. His own hired house—Paul probably was not able to earn his living by tent making, and friends must have contributed means for it. Received all that came in—He [illegible] all who were [illegible]. Thus the [illegible] while he was wearing [illegible] his Master's [illegible] the unsearchable riches of Christ. 31. Preaching the kingdom of God—It is worthy [illegible] that during the four and a half years that Paul was a prisoner at Caesarea, on the voyage to Rome and at Rome he was not without [illegible]. He had the privilege of preaching the gospel of the kingdom.

Questions.—Give the leading events that took place on the island of Melita. Describe the journey to Rome. How was Paul guarded? Whom did he call together? What reason did he give for being in chains? How did the Jews reply? Where did Paul dwell in Rome? What gospel work did he do? What epistles did he write?

PRACTICAL SURVEY.

Topic.—Arrival at Rome.

I. Paul's gratitude.

II. Paul's opportunity for service.

I. Paul's gratitude. Bearing such marks of lifelong conflict, worn with trial and care and suffering, having escaped one kind of affliction and on his way to another, Paul met with considerate kindness, which greatly comforted and cheered him. He had endured for three years incessant conflicts with his hard-hearted countrymen, a pitiless storm of hatred and persecution and false accusation raging constantly against him, trial succeeding trial, yet bringing no respite from injustice, weary prison hours at Caesarea, serious tempest at sea, and shipwreck, with the labors and anxieties of that terrific voyage, and the threats of the soldiers to take his life, followed by the hardships of a winter at Malta. In the hour of his deliverance and assured safe arrival at Rome, Paul remembered to thank God for it all. Nothing could more effectually cheer him than the vivid realization of God's care for him. Paul thanked God for his past deliverances, for the honor put upon him in that he had been suffered to labor and to endure hardships and persecution for Christ's sake, and especially because God had put it into the heart of his people to show kindness to his servant. He was grateful for the sympathy the gospel had excited, for the zeal the gospel had awakened, for the triumphs the gospel had gained, for the consolation that, notwithstanding all obstacles, Christianity had succeeded in planting itself even in Rome. In that stronghold of Satan there was a chosen band not ashamed to confess faith in Christ, not ashamed of Paul, his prisoner, a band of men to whom Paul's arrival gave joy. Paul found himself at home among them. Their presence was like a bright gleam of sunshine upon the apostle's way. He, the greatest of the apostles, found joy in the friendship of Christians.

II. Paul's opportunity for service. Paul's purpose had been set to visit the imperial city since an early period in his ministry. He recognized in Rome the great heart of the world, and was eager to take it for Christ. He knew that he had received the Gospel in trust for his fellow-men, and he sought to meet the responsibility in the most effective way. Though he went to Rome as an Ambassador in bonds, Paul reached the court to which he was commissioned by Christ, charged with a message from the King of Kings. In all the events of his life he recognized the guiding hand of the Lord. With Paul there was no weakening or failure of faith, no shifting of his convictions, no changing of his message. Rome was a heathen city which needed the gospel, and that was enough for Paul. He made God's promise a spur to effort rather than an excuse for delay. He knew the value of Rome as a strategic point. Jerusalem and Rome were the centres from which went out the world's transforming forces. Paul's appeal to Caesar gives an instance of the service rendered by the enemies of the gospel through its thorough establishment. The strong arm of paganism afforded Paul refuge from the murderous intent of the Jews. His diligence and promptness in his new sphere displayed the abounding zeal with which he used his opportunity. Despite the weariness of his journey by sea and land, Paul allowed only three days to pass before calling his countrymen together. Forgiving all the wrongs and injustice and violence which had marked his life, Paul once more laid before them the blessed news of the kingdom of God and exhorted them to enter it. With the wisdom and fulness of mature experience, Paul presented Christianity to them. A part believed, a part blasphemed, a few were converted. In the household of Caesar some were found who became obedient to the faith. The historical record of the great apostle closes with a picture of him fully and earnestly engaged in the loved work of his life even under the limitations of captivity.

T. R. A.

FIGHT WITH DEVILFISH

There will soon be placed on exhibition in the Museum of Natural History a replica of a devilfish measuring more than fifty feet in length, the result of a trip by Russell J. Coles to the Gulf of Mexico for the purpose of obtaining a fine specimen of this monster for the museum. Mr. Coles equipped, financed and took personal charge of the expedition. He tells of his experiences in the current number of the Museum Journal, in an article entitled "My Fight With the Devilfish."

It is a story of peril and excitement, in which six men in a motor boat were tossed about the waters of the Gulf by the fish, often in imminent danger of being upset, and in which the manoeuvres of battle commonly threw the entire weight of boat and men on the back of the enemy and almost wholly out of the water.

The devilfish is the largest of the family of rays. In previous encounters Mr. Coles had found that sharks or rays sometimes continue fighting long after both brain and heart have been pierced by lance and bullet, and that death was instantaneous only when the spinal cord was severed just back of the brain. He had formerly accomplished this by means of a sharp whale lance, but he felt that a more effective weapon would be required to master the devilfish, and so had designed and forged a huge lance more than three times as heavy as a whale lance, which he called a "spade lance."

He learned that the manta, which is the name of the species found in the Gulf of Mexico, had been known to tow a 100-ton vessel far out to sea; that in another hunt in which were engaged eight boats lashed together, the crew had to cut the rope and let the animal escape, and he found many authentic records of failure to capture a devilfish after it had been harpooned, lanced and shot with rifles of heavy calibre.

Having decided that the attack must be maintained at close range in order to make the spade lance effective, he had his harpoon [illegible] long and [illegible] to it a drogue, more than three times as large as the largest one known to be used on whales. A drogue is a device of heavy planks to which the free end of the harpoon rope is fastened. Its resistance as it is dragged through the water wrenches the harpoon so severely in the flesh that the fish is soon brought up short.

"We had run down the full length of Captiva Island," Mr. Coles writes of the day of the great catch, "when there came suddenly a most terrific shock, which threw the four of us who were standing to our hands and knees. Running at full speed the boat has met the head of a manta rising to the surface and coming toward us at moderate speed. Our speed carried the boat up over the high part of the back of the manta. Two great black fins were flung madly into the air, almost meeting over our heads and deluging us with many gallons of water. Then the two fins crashed down on the surface of the sea with a noise that could have been heard for miles.

"Just as the boat was sliding from the back of the creature, another huge manta rushed up from below, striking full on our port bow with sufficient force to spin the boat around until its direction was almost reversed. At one time all four of the great pectoral fins were towering above us. First the bow and then the stern of the [illegible] was highest as it was pitched from side to side. The engineer kept going at full speed, but the propeller blades were not catching the water and for a short distance we were carried upon the broad backs of the two monster devils of the sea. Scarcely a word was spoken until, in a wild upheaval of the two manta beneath us, the boat was flung from their backs and was turning over, when I shouted 'High side,' which order was instantly obeyed, two of the men except for an arm and leg, throwing themselves entirely out of the boat.

"These two mantas appeared to have lost all fear of the boat and its occupants. The first was a female about fifteen feet in width. I was about to attack it, when I spied, nearly a mile away, the largest manta I have ever seen. I ran the boat down to it. It was fully twenty-four feet in width and must have weighed not less than 12,000 pounds. I was uncertain as to its gender, and as I had only 1,500 pounds of plaster of paris, not enough to cast such a huge beast. But the principal drawback was that we could not tow such a monster with the little launch, and there was no other boat in sight.

"The first manta we had encountered was swimming near the surface, with her [illegible] almost touching her. [illegible] I decided to attack, I gave the word as she quartered across our bow. Charlie, the man with the [illegible], and I drove our harpoon deep into her broad back. [illegible] and ahead with a great splash. [illegible] drogue was snatched under it threw water high in the air, and the shock was so great that it brought the manta to the surface with an awkward, wheeling sidewise leap like a wheel turning over. Before it all reached the perpendicular we saw an embryo manta tossed high in the air.

"Seeing the wounded female, now on the surface, charged down on us at top speed. I was forced to strike instantly, and there was not sufficient time to clear up the line attached to the lance handle, so that the point of the spade lance was slightly deflected, missing the vital spot by a few inches. The creature's head struck the bottom of the boat, breaking the lance handle short off against the side. By years of work with the lance I had such confidence in my ability to place it where I desired that I had not thought it necessary to provide more than one spade lance. Now my fish was very much alive and fighting mad, and I was without a spade lance. Danger was much increased, for the fight had to be carried on with an old-fashioned whale lance.

"As the wounded fish kept plunging below and then throwing herself half out of the water, making short rushes and violent blows, I quickly realized that the safest place for the boat was on the fish's back, and I directed accordingly. Charlie kept the slack of the harpoon hauled in and the line showed the direction in which the fish was travelling under the water. Capt. Jack McCann, the helmsman, attended so well to his job that not once in more than half a dozen rushes did the devilfish reach the surface without finding our boat on her back. Each time I drove the lance through her heart or brain one or more times. After the fight she showed twenty-three such wounds.

"Through all the fight the male mate of the wounded manta kept near us. Three times he nearly capsized us by pushing the boat from the back of the female. Once, when we had been nearly capsized by a heavy blow from the head of the male and when the female was fighting most violently and the boat was almost filled with water, the youngest member of the crew, Luther Dixon, thinking that the end for all of us was near, tried to force a harpoon into my hand as he screamed: 'Iron the big bull and let's all go to hell in tow of a team of devils.'

"Before striking the female manta I had looked at my watch and called out the time, and when the big fish raised her head for the last time against the side of the boat, gave a loud, harsh bark and died, I again pulled out the watch and asked, 'How long?' Not one of the men placed the time of the fight at less than two hours. When I told them that it had taken only twenty-two minutes [illegible] wanted to see if the watch had stopped.

"We made the fish fast to our stern and headed for Blind Pass, less than a mile away. From there I looked back out to sea and saw a red looking patch of about two acres in extent on the surface of the water which had been made by the blood of the manta. This blood had evidently gathered many fishes, for I saw hovering over and continually plunging into the blood-stained water a flock of about thirty pelicans."—From the New York World.

Many a man doesn't get things coming his way, because he never has the right kind of bait.

Marvin: I have never seen such an extraordinary variety of wedding presents as they have.—Dubonnet: Yes. The bride says they have enough left over of her bridge prizes to last [illegible] the test of their married life.—Judge.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

WE SHOULDN'T WORRY.

O heart of mine, we shouldn't
Worry so!
What we've missed of calm we couldn't
Have, you know!
What we've met of stormy pain
And sorrow's driving rain,
We can better meet again,
If it blow.

We have erred in that dark hour,
We have known;
When the tears fell with the shower
All alone—
Were not shine and shower blent
As the gracious Master meant?
Let us temper our content
With His own.

For we know not every morrow
Can be sad,
So forgetting all the sorrow
We have had,
Let us fold away our fears,
And put by our foolish tears,
And through all the coming years
Just be glad.

—James Whitcomb Riley.

FORGIVE ALL MY SINS.

"Come now, and let us reason together, saith the Lord; though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool."

Be of good cheer; thy sins be forgiven thee. I, even I, am he that blotteth out thy transgressions for mine own sake, and will not remember thy sins.

The Son of man hath power on earth to forgive sins. In whom we have redemption through his blood, the forgiveness of sins, according to the riches of his grace. Not by works of righteousness which we have done, but according to his mercy he saved us, by the washing of regeneration, and renewing of the Holy Ghost; which he shed on us abundantly through Jesus Christ our Saviour. Having forgiven you all trespasses; blotting out the handwriting of ordinances that was against us, which was contrary to us, and took it out of the way, nailing it to his cross.

CONSCIOUSNESS.

Am I in being; do I desire my well being? This brings me to ask, What is consciousness? It is knowledge of what passes in one's own mind; it is immediate knowledge of facts, the power of knowing one's own thought. I am aware, I perceive, I know. Human consciousness is a most astounding fact. Yesterday I was not, to-morrow I shall not be. In the brief interval of earthly life I have become aware of myself. The past, the present, the future have become part of my own personal consciousness. I, who so recently came upon the scene, sit in judgment upon all I see or hear or feel or know. This is a marvel. I know that I enjoy the mystery of substantial freedom. How does this marvellous consciousness become, and will it end?

Then we are asked to consider the doctrine of sub-consciousness. "Sub" means under, large, undefinable, unsurveyable; it means a lumber-room, which we seldom enter, and even then you don't bring much away. It is the main hatchway which leads to the hold of the ship which carries the cargo of life. Very little of this is brought up during the voyage. Deep then calleth upon man, and then what marvels of memory. This leads us to the doctrine of super-consciousness. Here we find the eternal sea, with no shore. This is the great universe, of which we are to know something in the future. This universe is high and infinite, and dominates all things, beings, powers and prince, politics. Here is the path to destiny, reward, and crowning glory. How did I get my consciousness? From what high source is man's consciousness sustained? Bergson affirms that conscious life on the globe can be accounted for only by assuming a grand super-consciousness, over and above, and at the heart of the universe. This is none other than the Lord God Almighty. He is the Father of human spirits, and in Him we live and move, and have our being. The grand conclusion leaves the spirit of man in vital touch with the Spirit of God in an eternal relationship set in the midst of an infinite universe.

Am I in touch and in tune with the Infinite? There is much to discourage and pull down in this life, but, let future smile or frown, let people be hard, and times bad, yet may I stand erect, and tap the vital energy, put myself in contact with this over-spirit, and lesser spirits, and neither fire, nor flood, nor disease, nor poverty nor war can block up my way, nor cut me off from vital intercourse with the fountain of life and healing. "When I am weak, then am I strong."

H. T. Miller.

PROBLEMS OF THE DISABLED

Britain Advised to Follow Canada's Plan

In Caring for and Teaching the Wounded.

The London Daily Chronicle, the leading Liberal journal of the Imperial Capital, [illegible]

[illegible]

Had Pneumonia

DR. WOOD'S NORWAY PINE SYRUP CURED HIM.

A cough is an early symptom of pneumonia. It is at first frequent and hacking, and is accompanied with a little tough, colorless expectoration, which soon, however, becomes more copious and of a rusty red color, the lungs become congested and the bronchial tubes filled with phlegm making it hard for the sufferer to breathe. Males are more commonly attacked than females, and a previous attack seems to give a special liability to another.

On the first sign of a cold or cough you should get a bottle of Dr. Wood's Norway Pine Syrup and thus prevent the cold from developing into some serious lung trouble.

Mrs. E. Charles, North Toronto, Ont., writes: "Two years ago my husband had a very bad attack of pneumonia, and the doctors said he was getting consumption. A friend came in to see me and told me to get Dr. Wood's Norway Pine Syrup. I got three bottles, and they seemed to quite clear his chest of the phlegm, and now he is fine and well.

I shall never be without it in the house as it is a very valuable medicine."

Dr. Wood's Norway Pine Syrup is put up in a yellow wrapper; three pine trees the trade mark; price 25c. and 50c.

The genuine is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

system which has been established by the Dominion Government.

By an order in Council dated June 30, 1915, the Canadian Government formed a Military Hospitals and Convalescent Homes Commission. The Commission has learnt much by experience, and is to-day undoubtedly working on right lines. At first, the general idea was that convalescent homes, where discharged soldiers would spend a short time for rest and refreshment, would be the chief requirement, and scores of houses and hundreds of workers were placed at the disposal of the Commission. But this idea was soon dispelled when it was found that the treatment of the disabled soldiers was a more serious and lengthy business. Months or even weeks spent in the atmosphere of such a home would tend to injure rather than strengthen the physical and moral fibre. Let us hear what Mr. J. S. McLennan, a member of the Commission, has to say on this subject in his introduction to the Commission's special bulletin.

"The supply of comforts which in many cases were luxurious, the relaxation of discipline, the treating of men as one treats a civilian patient in the interval between illness and the resuming of ordinary occupation, which might do no harm if the experience was to be counted in days, are most seriously detrimental to the best interests of the men when extended over the prolonged periods which have been found unavoidable. The first conception of the homes was that they were places of relaxation; the right one which experience has taught us to realize is that they are places of rehabilitation. In other words, we are changing as rapidly as may be our convalescent homes into hospital schools, where the interests of the men, their time will be fully occupied, their physical restoration made as perfect as possible, and, from the beginning, the bad effects of illness obviated by employment.

"These are golden words which those who are responsible for our wounded veterans will do well to remember.

"What I wish especially to emphasize is that at all these hospitals, schools are held where training of an elementary and [illegible] character is given in English, French, mechanical drawing, arithmetic, wood-carving, etc. These classes are open to all inmates, whether they are able to return to their former occupations or not. But from these homes and hospitals, the men who are not so able can be sent on, after they have been pensioned and discharged, to technical institutions, etc., where they can be taught new occupations which their disablement does not prevent them from following. And that is not all, for employment is practically assured to them by the Provincial Commissions under the Federal Military Hospitals Commission which have charged themselves with the duty of finding work and wages for the returning veterans.

I should add, that the men in the homes and hospitals are fully maintained and that their pay continues. The whole system, which I have sketched in the barest outline, is quite admirable, and fully realizes the object of the Military Hospitals Commission which Mr. McLennan defines in these words:

"The aim of the Commission is to do its best for the physical and economic well-being of the man, and to bring to bear on him such influences that he may perform for his country a service not less important than those of the firing line, namely, that, instead of being an idle charge on the State, he becomes a shining example to the young of self-dependence, of courage, and perseverance in overcoming disabilities."

It would be an excellent thing if we had a system similar to this, and based on the same sound principles, established in these islands.

Australia's Stony Desert.

The great stony desert of North Australia was discovered by Capt. Sturt, an Australian explorer in 1845. It is north of the River Darling, and is about 300 miles long and 100 broad, consisting of sandy dunes or ridges, plateau, but never adorned it owing to creeks, gives the country a sterile appearance. These ridges were probably formed by the joint effect of winds and a gradually retiring sea. According to Capt. Sturt, these waters were gradually lost by evaporation or earth for some underground sea. The only vegetation, growing scantily, is prickly acacias in full bloom, all of stunted growth. Water is scarce except in the creeks which are sheltered, and this is generally brackish. Few travellers care to traverse this inhospitable desert.

A man might take a lesson from the humble egg, which is never spoiled by success.

HAD WEAK HEART

COULD NOT WORK COULD NOT SLEEP.

Many women are kept in a state of fear of death, become weak, worn and miserable and are unable to attend to their household, social or business duties, on account of the unnatural action of the heart.

To all such sufferers Milburn's Heart and Nerve Pills give prompt and permanent relief.

Mrs. J. Day, 234 John Street South, Hamilton, Ont., writes: "I was so run down with a weak heart I could not even sweep the floor, nor could I sleep at night. I was so awfully sick sometimes I had to stay in bed all day as I was so weak. I used three and a half boxes of Milburn's Heart and Nerve Pills and I am a cured woman to-day, and as strong as anyone could be. I am doing my own housework, even my own washing. I doctored for over two years, but got no help until I used your pills."

Milburn's Heart and Nerve Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

BRITAIN'S FORESIGHT SAVES WORLD FROM BIG INCREASE IN THE PRICE OF RUBBER PRODUCTS

FINANCING AND FOSTERING OF RUBBER PLANTATIONS IN HER COLONIES NOW PROVING A BOON TO THE CONSUMER IN KEEPING PRICES DOWN.

To-day South America is producing about the same quantity of crude rubber and it constitutes only 23 per cent. of the world's supply. While the United States uses about 50 per cent. of the rubber of the world, over 75 per cent. of the crude rubber is marketed and controlled by Great Britain.

In 1910 the demand for rubber began to increase materially. The world's production, both wild and plantation, for that year was 70,500 tons, and the cost three dollars a pound. The estimated crude rubber to be used in 1916, based on previous years, will be approximately 202,000 tons, [illegible] varied uses, yet the price is now between 60 and 70 cents a pound—just about half what it was at the beginning of the war.

Such conditions are in a measure a godsend to the consumer—to the man who walks and wears rubbers and overshoes, as well as to the man who uses the rubber for his motor car tires. And the rubber-wearing individual can thank the British Government for this. While Britain has just given a single order for 2,000,000 pairs of hip length rubber boots for her soldiers, taking 11,000,000 pounds of rubber, and other materials, still the price is kept down by that mysterious force known as "government control."

In the meantime that other staple—leather—has increased in price since the war started, until to-day a single cow hide is worth as much as was paid for the whole cow a few years ago. This is due in a large measure to the quantities of leather used for the army, the cutting off of the European supply, which came largely from Russia, and other quickly recognized factors, including the fact that there is no "government control" concerned.

With leather up and rubber down it is naturally following that rubber is fast becoming a substitute for leather. With winter and the slushy weather setting in the man in moderate circumstances finds an opportunity to save the costly leather of his boots so quickly ruined by water, and particularly snow water, by wearing rubbers and overshoes, that, thanks to the British Government, cost little or no more than formerly.

Whatever increase there may be in the cost of rubber goods—slight as it is, is due solely to the chemicals and fabrics which enter into the manufacture and also the higher prices paid to labor. So it would appear that this winter—thanks to Britain's foresight—the patriotic man will wear humble goloshes to save the costly leather of his shoes.

The beneficial results accruing to the sagacity and farsightedness of the British Government in its promotion of the rubber industry and its subsequent "friendly" cornering of the crude rubber market are just now making themselves manifest in the manufacturing end of the industry. With other staple products soaring in price, and the consumer faced on every side with an augmented cost of raw materials, it is gratifying to know that one article of common use, at least, is not only not increasing in price, but has decreased even under the extreme pressure of war orders.

When Great Britain began the fostering and financing of rubber plantations in 1894, the rubber world did not stand agog, but smiled cynically. South America—Brazil, to be exact—was then producing practically all of the world's supply, and the rubber, crude indeed, that was coming from the wild trees of that country, was considered quite enough. Great Britain foresaw conditions, however, and aided the establishing of plantations in her tropical colonies, with the result that when the motor industry and affiliated and allied manufactories demanded an increased supply Great Britain was there with the product.

Many a man loses what little reputation he has gambling for a bigger one.

Are We Downhearted—NO!

THE desolation and hardships of war, and the worst of winter weather, cannot damp the spirits of our Canadians when the Christmas boxes arrive from "home".

As you plan the parcel for HIM who is dear to you, don't forget that Gillette shaving equipment is just as keenly appreciated on active service as are sweaters, mitts and "eats". If he already has a

Gillette Safety Razor

send him a generous supply of Gillette Blades, for probably he is sharing the razor with his pals who are not so fortunate.

Clean shaving is in high favor among our troops—because it is sanitary—because it makes the dressing of face wounds easier—*but most of all because of its bracing effect.* The Gillette is best for the job—and the man who has one is most popular in his platoon.

Whatever else you put in his Christmas box, be sure there's a Gillette Safety Razor or a supply of Blades. You can buy from your Hardware Dealer, Druggist, Jeweler or Men's Wear Dealer—"Bulldogs" at $5.00—Pocket Editions at $5.00 and $6.00—Combination Sets at $6.50 up.

Gillette Safety Razor Co. of Canada, Limited
Office and Factory—THE GILLETTE BLDG., MONTREAL. 217

"Kissing the Book."

When did "kissing the book" come to be recognized as a part of the English oath? Master William Thorpe, a priest, who was tried for heresy before the archbishop of Canterbury in 1407, has in an account of his examination related a conversation between a "man of law" and a "master of divinity" on the subject of oaths. The man of law spoke of a witness merely laying his hand on the book, whereupon the master of divinity said, "He that chargeth him to lay his hand thus upon the book, touching it and swearing by it, and kissing it, promising in this form to do this thing, will say and witness that he that toucheth thus a book and kisseth it hath sworn upon that book." So the practice is at least 500 years old.

"Kissing the book" must have been a familiar practice in Shakespeare's day, for in "The Tempest" there is more than one jocular reference to it. "Swear by this bottle how thou camest hither," says Stephano to Trinculo. "Here, kiss the book," offering him his bottle of sack. There is also legal proof that the practice was well known in the seventeenth century.—London Opinion.

No More Corns
Cure Guaranteed
Never known to fail; acts without pain in 24 hours. Is soothing, healing; takes the sting right out. No remedy so quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c per bottle.

QUEER LIVELIHOODS.

Curious and Weird Ways Some People Earn a Living.

As a watcher of corpses a Jew stated in court recently that he sometimes earned as much as $10 a week. His business was to remain by the side of dying or dead Jews till their burial, "tips" from the relatives often amounting to this sum.

It reminds the writer of the business of the funeral tout against which protests were made some time ago in the Provinces. There is a large business done by undertakers' touts and runners who, as soon as the blinds intimating a death in the house, are down, rush off to the undertaker in order that he may secure the order for the funeral. Instances have been known of these touts proving so smart in their work that the undertaker and his assistant have been in the house asking for the order for the funeral within a few minutes of the breath being out of the person's body. The funeral tout has all sorts of people in his confidence—barbers, grocers, little shopkeepers, etc., upon whom he waits daily to receive reports of persons who are ill and likely to die.

Equally gruesome is the trade of the "sham faker," who prepares beggars in order to make them look pitiable objects. That it is easier to be crippled than it is to work is the maxim upon which this particular trade is established and this individual fakes people who wish to be lame, halt or blind in order to arouse the sympathy of the public. Needless to say he does not advertise his business, but he exists all the same, chiefly in London.—Tit-Bits.

Be Bright, Well, Strong, Restore Youthful Looks!

Let your fight for better health begin now! Before you feel any warning of physical collapse, cleanse and strengthen and build up your system. The one remedy for that tired, droopy feeling is Dr. Hamilton's Pills, the acknowledged king of all tonic medicines. Thousands of men and women in the late years of life retain their youthful looks and feeling simply because they regulate their system with this old reliable family remedy. Nothing so good for the bowels, stomach or kidneys. Cures headaches, prevents biliousness, stops aching pains in the back and limbs. Get a 25c box of Dr. Hamilton's Pills to-day.

Killed in Action.

Thou art gone and I cannot recall thee,
I gave thee with heart all aflame;
—Though dreading what might befall thee—
For God's glory and Germany's shame.

Thou art gone and thy feet unfaltering
Echo still in my grief-stricken heart;
Thou did'st go all fearfulness spurning,
In the battle to play a man's part.

Thou are gone, and the love that I gave thee
Is drowned in thy blood on the plain;
All my agonized prayers could not save thee,
They have numbered thee with the slain.

Thou art gone and with patience I wait thee,
For I know I shall see thee again;
With pride and pain did I dedicate thee,
And I know thou died'st not in vain.

For the blood of the slain will still bring healing,
To the nation thee sought to relieve;
And my tears in the sunshine revealing
A rainbow of promise. Why grieve?

Rockfield, P. Q.

PTOMAINES.

What the Housewife Should Do to Prevent Them.

The hot and often muggy days of summer seem just the time to develop in certain foods definite bacteria which cause symptoms of pain, chilliness, subnormal temperature and thirst. These may continue for a somewhat extended period and are particularly dangerous because the after effects of the poisoning are often severe.

Ordinary colic or intestinal fermentation is not the true poisoning, which is due to fermentation or imperfect digestion.

There are certain foods especially susceptible to the development of ptomaines, such as meat, game, fish and milk or its products, shellfish and particularly clams are possibly the most common cause.

But the development of ptomaines (which, by the way, means "derived from a dead body") is not due to any qualities in the foods themselves, but to lack of care in handling them. Some persons think that contact with tin or galvanized surfaces is the cause, as in ice cream. This has not been definitely settled. The chief and accepted cause is change of temperature in food products before they are used and careless storage either on the part of dealer or housewife.

In spite of all that has been said on the subject of care of the refrigerator, sanitary handling and cleanliness many of us are not 100 per cent. rigorous in the way we treat foods before they reach our table. Probably the reason why shellfish are most frequently the cause is because these are very seldom subjected to complete refrigeration, but are allowed to stand about in bags in whatever temperature happens to prevail.

In order to prevent the development and danger from ptomaines we must first oversee and insist on state and municipal strictness in all handling of food products, particularly milk. The second step is to handle food when it is within our own four walls that our own home conditions cannot encourage this poisoning.

Food left lying even a half hour on the kitchen table, a refrigerator which registers above 50, unclean utensils—any one of these may be the cause of the ptomaine developing. Especially with all canned goods and canned and smoked meats should we exercise the greatest care. Remove the contents from a can as soon as it is opened. Place at once in refrigerator, or, better, allow the can to stay in the refrigerator some hours before it is opened.

It is worth noting that the bacteria that develop the ptomaines do not always develop putridity or decay—that is, we can eat a food in a high state of preservation and still be subject to ptomaines. Scrupulous care and as perfect refrigeration all the way from the time the food was first handled until the last are the only preventives.

PILES CURED at HOME By New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

The Ballad of the Saint.

The Little Cherubs whispered,
"What strange, new soul is this
Who cometh with a robe besmirched
Unto the Place of Bliss?"
Then spake the Eldest Angel,
"The robe he wears is fair—
The groping fingers of the poor
Have held and blessed him there."

The Little Cherubs whispered,
"Who comes to be our guest
With dust about his garment's hem
And stains upon his breast?"
Then spake the Eldest Angel,
"Most lovely is the stain—
The tears of those he comforted,
Who may not weep again."

The Little Cherubs whispered,
"What strange, new soul is he
Who cometh with a burden here
And bears it tenderly?"
Then spake the Eldest Angel,
"He bears his life's award—
The burden of men's broken hearts,
To place before the Lord.

"The dust upon his garment's hem—
My lips shall bow to it;
The stains upon the breast of him
Are gems thrice exquisite.
Oh, little foolish Cherubs,
What truth is this yet miss?—
There comes no saint to Paradise
Who does not come like this."

—Theodosia J. Garrison, in Everybody's.

HISTORY IN A CAP.

What the National Headdress for War in Montenegro Tells.

The round cap, or "kapa," worn by Montenegrin soldiers is a history of their country in miniature. The people of Montenegro, indeed, have a saying that "kapa" talks, and they are not far wrong. It is the national headdress for war, and it is the same for prince and peasant. In color it is a vivid crimson, but it has a deep black border, which only leaves a small crown of the foundation color visible.

The black border is a sign of mourning for the terrible battle of Kossovo, when the old Montenegrin and Serb empires were overthrown by the Turks and their armies annihilated. The red crown signifies "the field of blood" of the same great fight.

On the red crown, in one corner, are five semicircles in gold. These have a double significance. They symbolize first the five centuries that have elapsed since Kossovo was fought, and, secondly, the five colors of the rainbow, the sign of hope that one day the glories of the old Montenegrin empire will be restored.

Furthermore, the different insignia of army rank are worn on the rim of the kapa, from the different combinations or crossed swords of the officer to the simple lead star of the corporal. Again, the Montenegrin soldier wears his medals, if he possess any, on the front of the cap instead of his tunic, as with the soldiers of all other nations.

Chloride-of-lime will remove mildew, but care must be taken not to have solution so strong that it will burn the goods. A heaping tablespoonful of the lime added to pail of water is sufficient.

Bilious Headache

The liver gets sluggish, the bowels constipated and then comes the bilious spell with headache and stomach troubles.

Dr. Chase's Kidney-Liver Pills relieve this condition most promptly and thoroughly by reason of their combined action on liver, kidneys and bowels.

One pill a dose, 25 cts. a box, all dealers.

ANCIENT SIGNALS.

Various Methods That Were Employed to Transmit Messages.

Considering the amount of thought and attention bestowed on the art of war by the ancients, says the United Service Magazine, it is strange that so little information regarding the methods of transmitting orders among their armies and fleets should have filtered down to modern times. For, as the Greek historian Polybius, who lived in the second century, B. C., very justly observed "opportunity is of great advantage in all things, but especially in war; and among the several things which have been invented to enable man to seize it, nothing can be more conducive to that end that signals."

The earliest recorded means of conveying intelligence rapidly over great distances was by the human voice. Thus, when the King of Persia invaded Greece (480 B. C.) he is stated to have posted sentinels at suitable distances apart, the whole way from Susa to Athens, by which means news could be transmitted at the rate of 450 miles in 48 hours.

According to Caesar, the same method was in use among the Gauls, who, he tells us, when desirous of transmitting important intelligence, or in need of help, shouted the news from place to place; and that thus the massacre of the Romans in Orleans, at sunrise was known at Auvergne, 120 miles away, between 8 and 9 o'clock the same evening.

Obviously, such a method would be liable to interruption by weather. But, as human life was little accounted among the ancients, the normal line of shouters would, doubtless, be supplanted when need arose.

A proposal is said to have been made to Alexander the Great (356-322 B. C.) by a native of Sidon for establishing an "infallible method" of communication between Greece and his remote conquests in India within the space of five days. The king, however, regarding the proposer as an impostor, declined even to consider it, the fate of many a valuable suggestion in our own times.

Another method, which originated in the mists of antiquity, was by means of pigeons. It is related by Pliny that when the city of Modena was besieged by Antony he sought to prevent all communication with the outside world by drawing lines around it and stretching nets across the river. Decimus Brutus (d. 43 B. C.) who was in charge of the defense, was able to laugh at these precautions by using pigeons, to whose feet letters were fastened, which duly reached their destinations. "Of what use were Antony's intrenchments and sentinels, and of what service were all the nets he spread," asked Pliny, "when the new courier took his route through the air?"

Eggs in Different Ways.

One [illegible] of eggs.
Different ways may be utilized.
Try baked eggs after the following fashion:

Put a round piece of stale bread and a bit of butter in the bottom of individual bakers.

Stand the bakers in boiling water; bake in a moderate oven for eight minutes and see how good they taste!

Delicious steamed omelet is made of three eggs, three tablespoons of milk, butter the size of a walnut, and a pinch of salt.

The milk, salt and butter are heated in the double boiler, the beaten yolks are added, then the whites are folded in.

THE DOOR TO HEALTH

Is Through the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

The blood is responsible for the health of the body. If it is good, disease cannot exist. If it is bad, the door is shut against good health, disease is bound to appear in one form or another. One person may be seized with rheumatism or sciatica, another with anaemia, indigestion, heart palpitation, headaches or backaches, unstrung nerves, or any of the many other forms of ailment that comes when the blood is weak and watery. There is just one certain, speedy cure—Dr. Williams' Pink Pills. They make new, rich blood, and this good blood strengthens the whole system and brings good health and happiness. Thousands owe their present good health, some life, itself, to the pills. Miss Devina Lalliberti, St. Jerome, Que., says: "Last year I seemed gradually to grow weak and run down. I did not sleep well, had a poor appetite, and grew pale and generally languid. I consulted a doctor who told me I was anaemic, and gave me a tonic. This I took faithfully for some time, but it did not help me, and I appeared to be growing worse, and finally I was hardly able to go about the house and almost wholly incapacitated for work. While in this condition a friend advised me to try Dr. Williams' Pink Pills, and I got several boxes. It was not long after I began their use when I could see an improvement, which just manifested itself in an improved appetite and better rest at night. From this on the improvement was rapid and I was not long in regaining perfect health. I think Dr. Williams' Pink Pills are a real blessing for all weak girls."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

THE BRITISH WAR.

How Interned Germans Are Used by John Bull.

An exceedingly interesting White Paper is published by the Foreign Office containing reports by American Embassy officials on their visits of inspection to various internment camps in the United Kingdom. In all 21 camps were visited between March and July in the present year by these independent investigators. Their reports are very detailed, and the inspection appears to have been thorough and exhaustive. It is highly gratifying to find that, with only one exception, the reports are unreservedly appreciative. The exception relates to a camp in the Isle of Man, in which 20,583 persons are accommodated. The very magnitude of this camp probably explains the defects in the sanitary arrangements of the hospitals to which the American officials call attention; but they report that the whole tone of the camp is much better than at the time of a previous visit paid four months earlier, in January, 1916, that the prisoners "seem much more contented," and that in the kitchens and food there was nothing to criticise. As for the other reports, commendation of the conditions and the abundance and quality of the food is almost unqualified.

"Great neatness and cleanliness and the general good health of the men" are the features of one camp. Of another "no criticism can be made, and the prisoners appreciate their comfort and good treatment." "The general feeling of the camp was excellent" is the verdict of a third. Of another "the interned officers looked in good health and seemed contented. They have ample opportunity for exercise and the situation of the house, in a romantic valley among the Welsh mountains, is fine and healthy."

Other reports are epitomized in such terms as these: "No criticism of any kind to be made"; "everything in excellent condition." Of a camp in the Channel Islands, "A model of its kind, and the men appeared to be in extraordinarily good physical condition." In regard to Donington Hall camp, about the alleged luxuries of which a vast amount of rubbish has been published in some disreputable newspapers, the American visitors write:

"The system of taking walks in the surrounding country has lately been inaugurated, and on every fine day about twenty-five officers go for a walk lasting from one to two hours, accompanied by an officer and an orderly of the guard. On the day of our visit one of us went out with the walking party, and enjoyed a pleasant walk through beautiful country."

There may be an outcry at this measure of relative liberty from the same persons who made themselves ridiculous about Donington Hall. If so, it will not be heeded, for we are convinced that the action of the authorities in this matter, as in the humane and generous treatment of other prisoners of war of every condition, whether military or civilian, will be approved by the solid good sense of the British people.

Compassionate treatment of prisoners of war has for centuries been a British characteristic. At the best the condition of prisoners of war is a hard one, and it is the duty of a civilized state calling itself Christian to mitigate their irksome lot by every means in its power. Whatever the enemy may do or not do, it is not for us to imitate his bad example. Let it suffice that our own duty is being performed in the right spirit by the commandants of the internment camps in Great Britain and Ireland. In so acting they are maintaining a noble British tradition of which we have a right to be proud.—London Chronicle.

NOW IS THE TIME

to send your Zam-Buk to your soldier friend at the front. With the coming of cold weather, the men in the trenches all suffer, more or less, with chapped hands, cold cracks, chilblains and cold sores, and the soldier who has some Zam-Buk on hand to apply immediately any of these painful ailments make their appearance, will be saved hours of suffering.

Pte. F. Westfield of "C" Company, 3rd Worcester Regiment, writes: "We wish our friends would send us out more Zam-Buk. It is splendid for sore hands, cold cracks, cold sores, etc."

Nothing ends pain and heals so quickly as Zam-Buk, and being germicidal, it prevents blood poisoning.

50c. box, 3 for $1.25, all druggists or Zam-Buk Co., Toronto.

201 Hallam Building, Toronto.

Leggings of the Marines.

The stout leggings worn by members of the United States marine corps are not a purely decorative adjunct to their very natty uniforms, as popularly supposed by civilians, but are a protection for the men against tropical diseases while in foreign service, naval surgeons say. Many of the most dangerous tropical diseases are transmitted by the bites of insects. Among these are malaria, yellow fever, bubonic plague, hookworm, elephantiasis and tropical ulcer. Fleas and mosquitoes are the prime carriers, and they make their first attack upon the ankles, thence working their way over the whole body. The leggings worn by the United States marines afford splendid protection to the ankles against fleas, mosquitoes and infected dirt.

CANADIANS
WANTED FOR THE
ROYAL NAVY
Two thousand Canadians are wanted for the Royal Naval Canadian Volunteer Reserve towards manning the new ships of the Imperial Royal Navy. Immediate overseas service. Only men of good character and good physical shape accepted.
Pay $1.10 Minimum per day—Free Kit
$20.00 per Month Separation Allowance
Apply to the nearest Naval Recruiting Station, or to the Dept. of Naval Service,
OTTAWA.

DANGER OF ORATORY.
(Washington Star)

"Do you pay much attention to the art of oratory?"

"I do not," replied Senator Sorghum. "I don't want to be too good an orator. There is danger of not being able to tell whether people are applauding what you say or the way you say it."

EXTREMES WILL MEET.
(Louisville Courier-Journal)

"[illegible] you will ever own a car?"

"Why not? The controlling circumstances are bound to meet."

"What do you mean?"

"Autos keep coming down and I keep saving up."

CANDID.
(Boston Transcript)

"So you think that we were made for each other, do you?" she said.

"Yes," he replied; "I'm heavily in debt, and you've got all kinds of money."

TOMMY'S PROOF.
(Puck)

Tommy—Why don't baby talk, papa?

Papa—He can't talk yet, my boy. Young babies never do.

Tommy—Oh, yes, they do. Job did. My Sunday-school teacher read to me out of the Bible how Job cursed the day he was born!

A POSSIBLE DANGER.
(Washington Star)

"Do you think our republic is in danger?"

"Certainly not," replied Senator Sorghum. "It is reasonably safe now. All I say is that I shudder to think of what may befall it if I should happen not be re-elected."

NATURALLY FITTED.
(Washington Star)

"The American Indian has proved his ability to excel in some of our national pastimes."

"Yes," replied Miss Cayenne; "I should think that the way he naturally toes in would give him peculiar facility in golf and modern dancing."

THEN HE QUIT.
(Baltimore American)

He—"I believe in every man's standing on his own feet."

She—"I wish you would carry that belief into your dancing."

HIS OFFENSE.
(Washington Star)

"What became of that tenderfoot who said he didn't know how to play poker?" asked Broncho Bob.

"Lynched," replied Piute Pete.

"Fer winnin'?"

"No. Fur lyin'."

QUITE CORRECT.
(Washington Star)

"You say you owe your success in business almost entirely to early rising?"

"Yes. I'm a manufacturer of alarm clocks."

A LUCKY MAN.
(Courier-Journal)

"Blacksmiths seem to have a reputation for honesty."

"Deservedly so; but due party, perhaps, to the nature of the business. Nobody encumbers a blacksmith with trust funds. There is nothing to adulterate in his line. Compared with some of us, a blacksmith has few temptations to resist."

ALL VERY BUSY.
(London Opinion)

At a house party at a nobleman's country house a guest said to the little daughter of the host:

"Your oldest brother is at the front, of course?"

"Oh, yes; he's got the Victoria Cross," she answered.

"And your second brother—how about him?"

"He's at the front too. He's been twice wounded."

"And is your youngest brother, the 17-year-old Harold, also in the trenches?"

She shook her head.

"No," she said. "He's minding India."

KEEPING IT IN THE FAMILY.
(London Tit-Bits)

A lady had the misfortune to lose her season ticket for the railway. On the same evening she had a call from two boys, the elder of whom at once handed her the lost ticket. The lady, delighted at prompt return of her property, offered the boy a shilling for his trouble. The lad refused to accept it, telling the lady he was a Boy Scout, and that no member is allowed to accept any return for a service rendered.

Just as the coin was about to be placed back in the purse of the lady, the boy, looking up into her face, suddenly blurted out:

"But my wee brither's no' a Scout."

The youthful orator came down from the platform at the close of his address and spoke to a certain man who lingered in his seat. "I want to thank you," he said, "for the close attention you paid to my remarks. Your upturned face was an inspiration to me. I am sure you never changed your earnest attitude during my lecture." "No," said the man; "I have a stiff neck."

A cabman found a dead cat in his cab, and in his anger he was going to throw it on the street, when he saw a policeman coming along. Then the following conversation took place: Constable: What is this you are up to now? Cabby (holding up the cat): Look here, this is how I am insulted. What am I to do with it? Constable: Take it to the police station, and if it is not claimed in six months, it will become your own property.

"How did you recognize the young man you were after when he was so cleverly disguised?" we asked the great detective. "Very simple," he replied. "I recognized his voice." "But you said he was sitting all alone in a restaurant when you made the arrest. Was he talking to himself? If not, how did you recognize his voice?" We thought we had him there, but the great detective smiled a superior sort of smile, and said: "Quite elementary, my dear Watson. I heard him eating soup."

Every cloud has a silver lining. The people who stutter have time to think twice before they speak.

EDITORIAL COMMENT

THE Telescope would again remind the public that items mailed or sent to this newspaper must be signed, not for publication but as a guarantee for their correctness.

+ + +

PROVINCIAL Winter Fair will be held at Guelph from Friday Dec. 1st, to the 8th. All entries must be made before November 15th. Are you planning to attend? Let the boys go if only for a day. They will never forget it. !

+ + +

TEN cent bread and 2.50 wheat before Christmas is freely predicted in Winnipeg following two d ller cash wheat and the big British government orders on the local exchange. Vigorous protests are again heard, favoring the government commandeering all grain and flour and regulating the maximum price.

+ + +

SHOULD men or firms be permitted in these war times to become millionaires by being among the successful tenderers for war supplies? They have a perfect right we concede, to a good margin but when so many are so generously giving and sacrificing to aid in support of the tremendous financial outgo should not the government have a say in what might be called a reasonable profit?

+ + +

THE one great worry of the Conservative leaders at the present time is the attitude that Sir Sam Hughes will take during the next few months. If he is "knocked" by the Conservatives he may "open up" on his former friends and cause a sensation that will make the one caused by his dismissal look like a peanut to an elephant. The Tory press is lying low waiting for developments. There is a good chance that the scrap will be worth watching.

+ + +

MR. R. J. PETTYPIECE, ex-M. P. P., of Forest has written an open letter to Premier Hearst, asking him at this time of unprecedented trial, when thousands of our people are dispensing with many of the ordinary comforts of life and often with actual necessities, in order to provide medical and hospital aid and other requirements for our soldiers at the front, to dispense for the time at least with Government House and turn it into a home for invalided soldiers returning from the battlefields.

+ + +

A GOOD many thousands of dollars have been spent on the Streets of Walkerton year after year, fixing and patching, and what have we to show for it? If some of this money had been spent systematically in laying out a permanent system of roads, we should have something tangible to show for it. Some good permanent roadway is this Municipality's greatest need to-day. With labor scarce and wages high, the wisdom of starting to work on permanent roadways just now is doubtful, but it is something we have to look forward to as soon as present conditions change. Walkerton needs the roads badly and what is more the town's finances are in fine shape to handle the project.

+ + +

THE recent action of the French Government in officially designating a commission for developing the use of agricultural machinery among the farmers of France will be interesting news for the implement manufacturers of this country. Heretofore the French peasant has ignored the advances being made in perfecting farm machinery, but the shortage of labour has emphasized the need. It is estimated that for the invaded and devasted districts of France alone there will be needed 2,000 motor tractors in addition to the 200 already available, 110,000 ploughs, 50,000 harrows, 22,000 planters and 15,000 reapers. The Allied Trade Compact will probably favor Canadian manufacturers in their business with France.

+ + +

AN incident illustrative of Imperial rivalries occurred during the recent display of the films of the Battle of the Somme in various movie theatres at Toronto. As those who saw the pictures are aware they deal with incidents of the first few days of the great offensive in July last, when the regiments engaged were nearly all English—a fact which caused some heart-burning among spectators of other nationalities who did not quite understand the situation. A Cockney soldier, who had returned from overseas, happened to be present in one theatre, and, swollen with pride at the achievements of his fellow countrymen as shown on the screen, called out to another group of soldiers: "Where are the Canadians now?" "Holding back the Germans while you fellows get your photographs taken," was the quick response.—Saturday Night.

PLANS have been approved in Petrograd for the construction of 25,000 miles of railway and an ambitious system of canals, the work to be finished in five years.

+ + +

MARGARINE is used in the British army and is coming into much more general use in the Mother Country. Necessarily so. Butter now sells over there at from sixty to seventy cents a pound, a price which comparatively few can afford to pay.

+ + +

"LET me see some of your black kid gloves," said a lady to a shop assistant. "These are not the latest style, are they?" she asked when the gloves were produced. "Yes, madam," replied the shopman. "We have had them in stock only two days." "I didn't think they were, because the fashion paper says black kids have tan stitches, and vice versa. I see the tan stitches but not the vice versa." The shopman explained that vice versa was French for seven buttons, so she bought three pairs.

+ + +

THE police in Toronto are going after the potato kings there and prosecutions are liable to be instituted at any time for alleged combinations in restraint of trade. Detectives are at present very busy there gathering evidence concerning the manipulations of the potato dealers. Last week 110 cars of potatoes were in the railway yards in Toronto and the railways were threatening to put an embargo on future deliveries if the situation were not changed quickly. The Crown Attorney has the matter in charge at present and the city police are collecting the evidence to be used. Mayor Church of Toronto stated that the Federal and Provincial authorities had refused to take up the matter and it had then been placed in the hands of the police. And the public are the goats.

+ + +

ONE would suppose that it had now become unnecessary to keep up the pretence that Liberal papers which had criticized many of the words and works of Sir Sam Hughes were merely actuated by partizan motives. The Conservative Government and party have now passed on him the severest and most sweeping censure of all by dismissing him from office. He did not earn this dismissal in a moment, but by his actions and words over a long period of time. The action of the Government is now dismissing him justifies those public journals which criticized his follies as he proceeded from bad to worse. Those journals only were partizan in this matter which shut their eyes to all his follies as long as he was in office, in the mistaken notion that they were helping their party by doing so. —Toronto Star.

+ + +

NO business man, professional man or manufacturer in any town should allow a newspaper published in his town to go without his name and business being mentioned. This applies to all kinds of businesses but does not mean that you should have a whole or half or even a quarter of page ad. in every issue of the paper, but it means that your name should be mentioned if you only use a two line space. A stranger picking up a newspaper should be able to tell just what business is represented in a town by looking at the business mentioned in the paper. The man who does not advertise his business does an injustice to himself and to his town. He is the man who expects free boosting from his town. The man who insists on sharing the business that comes to town but refuses to advertise his business is not a valuable addition to any town. The life of any town depends upon the live wide-awake and liberal advertising business men.—Exchange.

+ + +

SAID a clergyman in a pulpit in one of the Eastern Townships of Quebec, a year ago: "The Canadian who comes out of this war richer than he went into it, will have cause to be ashamed of himself." The speaker had more in his mind than army contractors and their profits. He was thinking of the sacrifices—financial as well as personal that are inevitably imposed in time of war on every good citizen. In the time of such a world cataclysm to the real patriot nothing can be normal. He must view every act as it will help to hinder the winning of the war, and he is bound to spare no effort, to save no money if thereby the cause is advanced. When nearly four hundred thousand Canadians are so impressed by the gravity of the call that comes to them that they have offered to risk the loss of limbs, of health, of life itself, what good citizens can hesitate to meet all righteous demands made in the same cause on his pocket-book? Let us confess that these demands are heavy; yet if Canadians were to give only their surplus earnings in, say 1916, these demands would be more than satisfied. Of all these calls, none is more important than that of the Canadian Patriotic Fund. This is the Fund that guarantees to the mothers, wives and children of our soldiers freedom from all danger of privation while their breadwinner is away. To make this provision for the dependents of Ontario's soldiers in 1917 will cost at least six million dollars, of which four millions must be raised by personal contributions of patriotic citizens. Let every man whose profits or income have been increased since August 4th, 1914, consider well if he will not have reason to be ashamed of himself if this great Fund is unable to fulfil its mission, and he at the same time is able to count himself the richer for the war?

Our Soldiers' Letters

Walkerton Boys Write Home of Their Experiences on the Firing Line in France. . . . . . .

LETTER FROM ED. EIDT

Somewhere in France,
Oct. 28th, 1916.

Dear Father:—

I have not had a chance to write for a time, but will just write these few lines to let you know I am well, and hope you are all the same at home; the rest of the boys are all well too.

I have not had a letter from home for quite a while now, but I am expecting one on to-day's mail.

We are back in billets in the City for a few days' rest after spending two weeks in and out of the trenches. It has been raining all the time, with a chill wind, and we have been having a pretty stiff time of it. The roads are just a sheet of slippery mud, and the trenches are knee deep with sticky red clay. It is misery to the very last degree in there, wet and plastered with for days at a time. A spell in the trenches these days taxes a man's endurance to the utmost, and by the time they reach their billets the men are almost dead beat. There is very heavy fighting on this front, guns roaring and shells bursting all the time, day and night without ceasing. Thousands of heavy guns, set some miles back of our lines are continually pounding the German front line and positions behind it with shells of every calibre, and the enemy is sending back his Jack Johnsons, coal boxes, and whizz bangs by the hundred, but our artillery and air services have Fritz's completely beaten. A German plane very seldom appears above our lines, whereas our planes are sailing above us continually and our Canadian and British artillery have a correct range on every position of the enemy and can blow the positions to pieces with a few well placed shells. It is only in the front line trenches that the intensity of a bombardment can be fully realized, shells coming both ways and exploding, sending jagged pieces of shrapnel of all sizes from the size of a marble to bits weighing three or four pounds, all round us. Several of us have had our clothes torn by shrapnel, but weren't lucky enough to get a good "blighty." A rifle shot is very seldom heard around here except an occasional sniper; most of the sniping is done with whizz-bangs, an eighteen pound shell, and Fritz is certainly handy at using them. A party is at work on some job in the trenches or out in No Man's Land, and if they are spotted in the light of the flares, the whizz bangs will come by the dozen.

The trenches here are hurriedly dug affairs not like the solid sand bag trenches of Belgium, each man digs a little cave in the side of the trench, just big enough to sit in as a protection against the rain and cold wind. The Germans have pretty good dug-outs, some of them twenty feet underground and well buttressed with heavy timbers, absolutely bomb proof. They must have thought they were staying there for the duration of the war. Our fellows are using them to advantage now.

The country for miles here is torn by shells, the roads ploughed up, and Towns and Villages in ruin, nothing but a pile of brick and timber, the trees are dead and lifeless, and torn by shrapnel. There's line after line of old trenches, where the British had entrenched, and advanced again, until they now hold their present lines, about five or six hundred yards apart.

In all, the place is the picture of the most utter desolation that could ever be conceived. But I am confident that the "Big Push" is now being launched against the Hun, and that the Germans will soon be out of France for good, and they will never come back.

I hear that the 160th has left Canada for England, so I may see Walter some time soon. I would just like to step in home to-night. I am afraid there wouldn't be much eats left in the house.

The letter I was expecting arrived to-night, and was glad to hear from home, and know you are all well. I would certainly like to go out shooting with Victor.

I see Thanksgiving Day is over again, we were not aware of it here at all, we have completely lost track of days and dates. I never know whether it is Monday or Saturday here.

Well, you must write often to me as it is the only thing we have to look forward to, and get some snap-shots taken, so that I can keep them in my case, because I lost all my little keep-sakes and snap-shots when our billets were burned back in Belgium.

Ed.

FROM JACK WILSON

The following letters were written by a former Walkerton boy, Jack Wilson, son of T. H. Wilson of Toronto, to his uncle Mr. T. H. Wilson, of Brant.

France, Oct. 8th, 1916.

Dear Uncle Tom:—

Well here I am again as large as life and feeling fine, after about five days hard offensive fighting. We are in a part of the line that prisoners are very common, in fact there are large numbers pass through here every day. We are expecting ten days leave after our next trip in, so I am wishing myself D. V. the best of luck as I am anxious to see old Ireland. I had the experience of jumping the bags which I hope not to see again, it is very unhealthy.

Was glad to hear that the crops over there are extra good on an average. I suppose you will be curious to know how crops are handled here. Well, they seem to have extraordinary good crops but a very poor way of harvesting same. They have a crude threshing machine, run by tread-power. They take the head of a sheaf and hold it till all the heads are cut off, then throw away the straw, and save it for making straw roofs. I think they are called thatched roofs. I saw one Deering Binder and a Massy-Harris and several reapers, but most of the grain is cut with a cradle or scythe.

I was just talking to Walter Allen, Charlie Allen's son. He has been out here for about 20 months and still knocking around. I was also talking to Alfred Julton about three hours before we made our charge and have not seen him since. I suppose he will feel anxious about me until he learns of my safety.

Will be glad to get that tobacco as it is Bon for the trenches. I have had a good many parcels go astray and hope yours won't meet the same fate.

Well I must close for this time. Will drop you a letter when I get out again as we probably go up in a few days.

Oct. 11th.—Just a few lines to let you know that I was not able to get this letter off before going up the line, so I am back safe again. I was held at Bde. H. D.R.R.S. as relieve Signaller, so was in a fairly safe part of the line. We will probably go in again very soon. They sure work us boys hard out here, but it takes it all to beat the Huns. Am waiting anxiously for that tobacco as I have been out of good smoking and chewing for some time. Will drop another line when we get out again.

Oct. 18th.—You will think this is a continued story but I was unable to get this off before we went up again. We are out now for a few weeks rest so will be able to catch up with my sleep as we were worked very hard this last month.

I think we are entitled to a good long rest, but the army is not out here for a picnic. We just plug along until we get picked off, then we are "Napoo."

I will write more in a few days when we get settled.

Am well, Write soon,
Jack.

News About Town

Mr. Thomas Cunningham who was taken suddenly ill last week, is able to be around again.

Fire caused $200 damage to the new Public Library at Teeswater last week. The blaze started in the furnace room where some kindling wood had been left too close to the furnace.

Mr. W. H. McLean, of Glengowan, recently sold eight pigs weighing 1940 lbs. for $193.25. These were less than six months old. Mr. S. Winch, Elora road north sold nine pigs lately that weighed 253½ lbs. each, and the bunch were exchanged for $243 in money. Next!—Paisley Advocate.

Mrs. Ann McGillvary of Port Elgin, celebrated her 90th birthday last Sunday. Mrs. McGillvary enjoys good health and takes pleasure in assisting in work of making garments and knitting for soldiers.

"Best Camp in England"

Lieut. J. C. McDonald of the 160th Batt'n writes his father, Wm. McDonald M. P. P. of Chesley from Whitley Camp, England:—"We are in the best Camp in England and lucky to be billeted here. There are 22,000 Canadians here and quite a bunch in every battalion are from Bruce. Bobby Rowland, Doc Zinn and I are in one bedroom together. There are twelve officers to each hut."

+ + +

Millions Tied Up

Millions of dollars of unclaimed rentals are reported to be lying in a Trust Company's vault at Philadelphia, belonging to the Baker estate, in which Mrs. Stevens Sr., as reported in the Telescope two weeks ago is interested. This money is said to be tied up for the lack of accredited heirs. When Jacob Baker died a bachelor 130 years ago, leaving an estate in the heart of Philadelphia, the property had been leased for 99 years. To-day there are no less than 10,000 descendants of whom 600 live in Toronto. The recent organization of the heirs is for the purpose of having the U. S. government take the necessary steps to have the property given a proper title, and the immense toll of rents now resting in the Trust Company's vaults assigned to the heirs. Mrs. Stevens of Walkerton is closely related to the original Baker.

NOTED MUSICIAN OF MONTREAL

Advises The Use Of "FRUIT-A-TIVES", The Famous Fruit Medicine.

MR. ROSENBURG

580 Casgrain St., Montreal.
April 20th, 1915.

"In my opinion, no other medicine in the world is so curative for *Constipation and Indigestion* as "Fruit-a-tives". I was a sufferer from these complaints for five years, and my sedentary occupation, Music, brought about a kind of Intestinal Paralysis—with *nasty Headaches*, belching gas, drowsiness after eating, and Pain in the Back. I tried pills and medicines of physicians, but nothing helped me. Then I was induced to try "Fruit-a-tives", and now for six months I have been entirely well.

I advise any one who suffers from that horrible trouble—Chronic Constipation with the resultant indigestion, *to try "Fruit-a-tives"*, and you will be agreeably surprised at the great benefit you will receive". A. ROSENBURG.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Schnurr, Miss Luella Misch, Miss Matilda St. Marie.

POETS' CORNER

TELEGRAPHY

On-the-Side in the Toronto News.

"The wireless is a wonder,
It is, upon my life,
And still it hasn't anything
On Mary Anne, my wife."
So spoke Hosea Smalley
While eating with his knife.

"She hesitates to scold me
When company is here,
But she can telegraph her thoughts
Most awful loud and clear."
And Mr. Smalley used his fork
To scratch his upper ear.

"Her lips she bites a trifle,
Perhaps she winks at me,
Or lifts an eyebrow, or looks mad,
None cleverer than she."
Thus, Mr. Smalley, "sooping" up
A saucerful of tea.

"I guess my table manners
Oft put her in a flutter,
She merely telegraphs to me.
No word she dares to utter."
And Mr. Smalley reached four feet
To get a stab of butter.

Clean, smokeless and odorless oven means perfect cooking and baking. This is assured by ventilation and the nickel-coated non-rust steel lining in

8,000 Students Trained for Business

Northern Business College

OWEN SOUND, ONT.

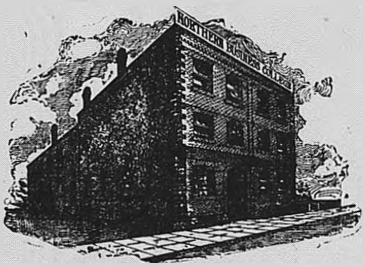
A School with a Record of Useful Service

On November 1st, 1881, the Northern Business College was established by the present Principal, C. A. Fleming, at Owen Sound, and its record of 35 years of faithful training of young men and women for business life is unparalled in Canada. Since the opening over 8,000 students have been in attendance and each year the sphere of usefulness is extended. Graduates are occupying responsible positions in the commercial life of every important business centre of Canada and the United States, while men and women in every walk of life have found the instruction received at the Northern Business College an asset and an advantage.

From a school started in a very small way 35 years ago, the Northern Business College grew rapidly until it is recognized as a leader in the Dominion. Each year the courses of study have been revised and every approved modern method of business included. The school is equipped with the latest appliances and systems, with which the student is made familiar. It has always been the policy of the Northern Business College to be abreast of the times; that is to teach the student exactly what he or she would have to do in an up-to-date office.

Principal C. A. Fleming, who personally directs the courses of instruction, is a Fellow of the Institute of Chartered Accountants and is known throughout Canada as one of the leading men in the profession. He is author of eight standard business works, used in scores of schools and thousands of offices throughout the Dominion. Every student benefits by his wide business experience. He has been particular in his selection of teachers and has surrounded himself with a staff of experienced specialists, each experienced not only in teaching but in office work. The instruction at the Northern Business College is "the best," and to it is credited the splendid success of the students of the institution for over a third of a century. No other school in Canada has at the head of its Faculty a Fellow of the Institute of Chartered Accountants, and is assisted by instructors of as wide experience.

The management of the Northern Business College many years ago realized the need of first-class accommodation and proper environment in order to do the best work. The three storey building has been fitted up expressly for school purposes and has one-third of an acre of floor space, eighteen rooms lighted by sixty windows, on a quiet street within two minutes' walk of the Business Section. The steam heating is extra good, and ventilation is secured by electric exhaust fans which keep fresh air constantly in the rooms. With the latest sanitary arrangements, including sanitary oiled floors, the Business College premises are unequalled in Canada. There is plenty of room for proper grading and classification and the accommodation is such that students can do their best work. It is the best building and equipment that enterprise can suggest and capital obtain.



Special War-time Course for Young Women

Young women may "do their bit" by preparing for positions in offices, banks, etc., and thus be in a position to take the place of any young man who is willing to go to the front. Such a training may be obtained at the Northern Business College, Owen Sound, where a special War-Time course of study has been arranged to enable young women to prepare quickly for office work. A thorough training is given every business pursuit, and actual practice in the required duties. Many young women are now in attendance and there seems to be no limit to the opportunities for young women in filling positions in offices at the present time. The school is open the year round and the students may enter any day as the instruction is largely individual.

Preparatory Course

This is a special course of study for those whose early education has been neglected, and includes Reading, Arithmetic (from the simplest principles to advanced work), Spelling and Meaning of words, Composition and Correspondence, Measurements.

Approved by Chartered Accountants

The Institute of Chartered Accountants of Ontario recognized the excellence of work of the Northern Business College, and admitted it into affiliation. In other words the thorough courses of instruction of the N. B. C. have the approval of the Institute of Chartered Accountants.

Courses of Study

Business Course:

Under the supervision of a Chartered Accountant, the education offered in this department is peculiar, in that it is intended for every class of business for man and woman. Some may have the impression that the Business Course at the Northern Business College is simply to train Bookkeepers. Were this true there would be little use in its existence. The work is broad and practical; to enable the student, no matter what business or profession he intends following—Farming, Manufacturing, Teaching, Selling, etc., etc.,—to grasp every business opportunity, to transact all business intelligently, to have confidence in your own ability, and to gain a knowledge of the principles of business law and practice; to secure you from fraud and imposition.

The following subjects are included in this course:—

Bookkeeping.—including Business Practice, Loose-Leaf Systems, Cost and Joint Stock Accounting, Bill and Charge Systems.
Rapid Calculation
Commercial Arithmetic
Banking and Finance
Correspondence and Salesmanship
Commercial Law
Bonds and Debentures
Mensuration
Manufacturing and Cost Systems
Joint Stock Company Work and Cost Accounting
Spelling
Writing
Adding Machine Practice
Counterfeit Money
Forgery and Disputed Handwriting

Stenographer's Course:

The special course for stenographers embraces the following subjects:—

Shorthand (Isaac Pitman System)
Writing
Rapid Arithmetic
Spelling
Typewriting—Touch System, including Billing and Manifolding.
Correspondence and Salesmanship, including Letter Writing, Punctuation, Filing, Follow-up Systems and Indexes, Letter Copying, (Press and Rapid Roller).
Practical Office Work—Adding Machine, (Burroughs' and American) Beck Duplicator, Mimeograph, Rotary Neostyle, Dictating Machine, etc., Remington Wahl Adding Typewriter, Billing and Statement Work.

CURRENT COMMENT

London suffragettes are "demonstrating" once more because of Viscount Grey's treatment of Venizelos. We don't like the treatment he is getting ourselves.

For a long time Germany held a bigger bag of British prisoners than Britain held of German prisoners. Now it is the other way, and if Germany does not treat her British prisoners properly, Britain has the remedy in her own hands.

The Deutschland has arrived at New London, Conn., on its second trip across the Atlantic. We will now hear a lot of jubilation in the U. S. press over its feat. But what about the Americans sent to the bottom of the sea by another German submarine? One would think that there would be little welcome for such a vessel.

Two noted doctors have declared at the Ohio Medical Association that nurses make the best kind of wives. Both of these physicians declared that trained nurses must know the details of housekeeping, are good cooks and understand the value of keeping things spotlessly clean. They find there is a great demand for nurses, not that there is an increase of sickness, but because so many of the good ones get married. But even this could not account for the high cost of living.

The negro emigration from the south to the north is a fact, says the Chicago Tribune. At the negro conference in Washington last week it was said that 500,000 of the race had already left the south and were employed in other parts of the country. The shortage of labor caused by immigration stoppage is one reason for the exodus. Another is the great number of strikes and other industrial disturbances in the north. It is asserted that there is work now in the north for at least 2,000,000 negroes if they can be induced to change their residence. That they are leaving their former homes in large numbers is shown by the news that the Montgomery, Ala., city council has passed an ordinance punishing by fine and imprisonment those who induce any laborer to leave the city. Perhaps the negroes are also anxious to get away from the lynching zone.

Facts for the Curious.

A Vienna physician having discovered that a remedy for infectious intestinal orders can be produced from red cabbages, a factory for its production is being built.

To lessen the smoke and gas in tunnels, Swiss railroads are equipping their locomotive stacks with lids to be closed when a tunnel is entered, steam being exhausted beneath the engine.

The ten countries with the largest populations are, in the order named, China, India, Russia, the United States, Germany, Japan, the United Kingdom, France, Italy and Austria.

A shortage in heels is reported from several shoe factories, one of which has more than 20,000 pairs of footwear complete except for this part. The dye shortage also affects this industry, and is largely responsible for the prevailing light-tinted leathers used for women's shoes.

The artichoke, which originally came from Barbary, is not a botanical species, but a variety of the thistle, which grows spontaneously all along the African coast of the Mediterranean from Morocco to Palestine.

Silver disks or blank coins manufactured in the United States will be received at the national mint at Peru from individuals holding government permits, and will be coined into pieces valued at 1 sol each (48.6 cents) up to the amount of 500,000 sols.

A flash of lightning lights up the ground for one-millionth of a second, yet it seems to us to last ever so much longer. What happens is that the impression remains in the retina of the eye for about one-eighth of a second, or 124,000 times longer than the flash lasts.

The celebrated Fragonard panels of the Morgan collection, lately sold to a dealer for, it is believed, $1,250,000, had their inception, it is said, in the lavish expenditure of the Countess du Barry. They were designed for her [illegible] its want of trees, except along the [illegible] a dispute between the painter and the King's favorite. Mme. du Barry, notwithstanding her lowly origin, was extremely critical in matters of art, and was dissatisfied with these pictures, which are among the greatest prizes of the connoisseurs of to-day.

Blotted Out "Lord Penn."

The first book of any kind published in Philadelphia was Atkin's Almanack for the year 1686. It was an unpaged pamphlet of ten leaves, only two copies of which are now known to be in existence. The first copy of the Almanack printed was sent to Colonel Markham, Penn's deputy, who reported to the council that the book had erroneously declared Pennsylvania to have been founded by "Lord Penn." The council disapproved such a high sounding title and directed the author and printer (William Bradford) to "forthwith and effectually blott out ye words 'Lord Penn.'" This had the effect of rendering the whole edition and the abolition of the obnoxious words.

"Every man should study himself," remarked the Wise Guy. "Yes, and even at that a fellow never knows half as much about himself as some woman knows about him," added the Simple Mug.

HER HUMBLE LOVER

Here, fortunately for Signa and Mrs. Podswell, the door opened, and the gentlemen came in, straggling and hesitating, as usual, with the regulation smile upon their faces.

For the life of her, Signa could not help looking up with an expectant glance. But her eyes fell, and something in her heart dropped also. The tall, stalwart figure was not amongst them. Hector Warren had not come.

A long, pompous-looking gentleman, with a yellow mustache, which helped Signa identify him as Sir Frederic, came first, his hands thrust into his pockets, a consequential air about his whole person. Archie's description had been so graphic that Signa could almost fancy this gawky individual talking about "my lands" and "my people." Sir Frederic yawns behind his hand and looks around the room; then, suddenly the yawn dies away, and he stares at the unexpected apparition of a beautiful girl with a sheepish blush.

CHAPTER VII.

"Hem," snaps Lady Rookwell, with a dry chuckle, "number one brought down at the first shot. Come here, Sir Frederic, here is somebody you'd like to know"; and Sir Frederic, blushing still more furiously, moves his long and important person across the room.

"My dear," says Lady Rookwell, her sharp eyes fixed with a sarcastic, unmerciful smile upon the bashful Sir Frederic's inflamed countenance, "this is Sir Frederic Blyte, commonly known in these parts as Sir Frederic the Great——"

"He! he!" grins the doctor.

"I say—come, you know," expostulates Sir Frederic. "Really—you know, eh——"

"Sir Frederic the Great," repeats Lady Rookwell, showing her admirably made set of teeth. "Because he is the greatest—I should also say the longest—man in the county. Aren't you, Sir Frederic?"

"'Pon my word," stammers the great man, half-vexed, half-pleased, as Lady Rookwell had intended him to be.

"And this, Sir Frederic, is Miss Grenville—what's your other name, my dear—I didn't catch it."

"Signa," says Signa, very much amused.

"How do you spell it?" demands her ladyship.

Signa spells it.

"Oh, there's a 'g' in it, is there? Then what on earth do you call it 'Seenah' for?"

"It is an Italian name," says Signa.

Lady Rookwell grunts.

"Oh, I see. I don't understand Italian, and I don't want to; but I dare say Sir Frederic does, eh?" and she grins mischievously at her victim.

"Er—not very well. I've been in Italy."

"So has every other fo—fellow," snaps her terrible ladyship.

"You haven't introduced us yet, Lady Rookwell," says Sir Frederic, reddening angrily.

"And I'm not going to be hurried," retorts her ladyship, delighted at having "roused" him. "If you can't wait my time you had better go away."

Sir Frederic bows with his hand upon his heart, and Lady Rookwell, accepting his submission, resumes.

"The daughter of an old friend of mine—I knew him and fell in love with him when you were squalling in your cradle, Sir Frederic. Now you know each other."

"I trust that Miss Grenville will permit me to continue the acquaintance so pleasantly begun," says Sir Frederic, politely, but with a recovery of his pompous air.

"Bah!" snaps her ladyship; "fine speeches are thrown away on this young lady, Sir Frederic. She has heard 'em all, haven't you, my dear?"

"I shall be very glad to listen to any of Sir Frederic's, Lady Rookwell," say Signa, pleasantly, feeling for her victim.

Her ladyship nods with approval.

"Nicely turned, my dear, very nicely. Now, Sir Frederic, sit down and coil your long legs under your chair and amuse us."

Mentally wishing the terrible old lady to the deuce, Sir Frederic nevertheless obeys, so far as sitting down goes, and attempts that most difficult of all feats—to be "amusing" to order.

"Do you like this part of the country, Miss Grenville?" he asks.

"I haven't seen much of it," says Signa; "I have only been here a few days."

"Ah," he says. "We must show you our lions. Have you—ah—been across the bay yet?"

Signa replies in the negative.

"Really! All the pretty part lies that way. I—ah—have a place over there. I dare say you have heard of it—Blyte Park, you know."

"I don't think I have," says Signa.

"Indeed!" he exclaims, with an air of surprise and disappointment. "I hope Mrs. Podswell will bring you to see it. My mother lives there—keeps house, you know. I should like to show you round my land. Although I say it, I think you'll find rather a jolly place; I rather go in for keeping it up, you know, look after my people and—ah—that sort of thing."

It is as much as Signa can do to refrain from smiling; Archie's imitation was really excellent.

"I shall be very glad," she murmurs, vaguely.

"Yes," he resumes, stroking his moustache with immense satisfaction. "My idea is that when a man has a—ah—place, he ought to do his duty by it. My mother will be awfully pleased to see you. I'll ask Mrs. Podswell to bring you over."

"I am afraid my aunt will scarcely be well enough," says Signa.

"Tea?" says Capt. Jenks, in a voice loud enough to drown all the rest. "No, thank you, Mrs. Podswell. Never drink tea, especially after dinner and the rectory claret. Begging your pardon, I don't reckon it a drink fit for a man—good enough for women—they like it and it suits 'em. Oh, yes! When I was in command of the Arethusa——"

"Oh, dear!" exclaims Lady Rookwell, quite audibly. "Now he's going to shout out that anecdote about his tiresome ship. I wish he was on board of her now!"

"So do I, my lady!" retorts the captain, in the same tone, and not at all offended; he and Lady Rookwell are old friends. "You might be in a worse place than on deck of a man-o'-war."

"I dare say," says her ladyship, sardonically, "though it doesn't seem possible!"

Before the captain can find a retort, and while the rest are laughing, the door opens, and Mary, scarcely audible in the merriment, says, "Mr. Warren."

Signa catches the name, and looks up with a sudden thrill.

A silence falls upon the company. The rector changes color and forces a feeble smile; and Aunt Podswell nearly drops the tea-cup she is holding. With his calm smile, Hector Warren comes across the room toward her. He is in evening dress—his crush hat under his arm—his whole appearance so distinguished looking, that even Signa feels surprised and startled. What is the vague something about him that seems to dwarf all the other men in the room—that makes Sir Frederic look more gawky than before, and his clothes ill-cut and countrified; while Mr. Jenks, besides the tall, graceful figure appears to have grown more vulgar and commonplace.

With the easiest deference he makes his apologies, and Signa hears the low, musical voice murmuring something about business, having detained him, his annoyance, and disappointment, and so on. Aunt Podswell, with her nerves all abroad, stammers that it isn't of any consequence, and with a bow he leaves her and comes up to the rector. The rest of the company watch him with the most intense and almost open curiosity—a curiosity which deepens as he approaches Signa, and bends over the hand which she extends him.

"I am sorry I am so late, Miss Grenville," he says, as respectfully and earnestly as he had addressed Mrs. Podswell, the hostess, herself.

"Better late than—ahem!—never," says the rector, with the air of making a most original remark. "No serious business, I hope."

Hector Warren shakes his head with a smile.

"Oh, no," he says, and the rector, feeling that he has been rebuffed, colors, and takes to his heels.

"Let me take your cup," says Hector Warren. "Shall I get you some more tea?"

"No, thanks," says Signa, as she gives him her cup, and Sir Frederic feels a pang of regret that he hadn't thought of bestowing this little attention.

Hector Warren takes the cup to the table and comes back, standing before Signa and the other two as if he were quite unconscious that every eye in the room was either openly or covertly regarding him.

"And where is my friend Archie?" he asks, with a smile.

"In bed," says Signa, "whither he has gone with the most poignant disappointment. If you value your peace of mind, it would be well for you to avoid him for a few days. He has dreadful things to say to you respecting the solemnity of a gentleman's promise," and she laughs softly.

"Poor Archie! And was he really deprived of his almonds and raisins? I am very sorry. If I had thought they depended so entirely upon me, I would——"

"Have neglected most important business and been here?" says Signa, with a smile.

He is not at all embarrassed, though Lady Rookwell shows all her teeth in an appalling grin.

"Yes," he says, "a promise is a promise, and sacred. I shall plead guilty, and throw myself on Archie's mercy."

"It will be the best course," says Signa.

He stands for a moment, wondering whether the long-legged gentleman will rise and give him a chance of taking his chair, but Sir Frederic is too overcome by the distinguished presence and easy manners of the stranger to move, and sits with an uneasy sense of inferiority.

"Hem," says Lady Rookwell. "Introductions are out of fashion, but you may present your friend, my dear."

"Mr. Warren—Lady Rookwell—Lady Rookwell, Mr. Warren," says Signa.

Lady Rookwell's sharp eyes fix themselves upon him like needles.

"Warren, Warren," she says, "are you of the Norfolk Warrens?"

"I think not," he says.

"Hem! I used to know some Warrens in Bedfordshire. Perhaps you are of that family?"

"I am afraid I cannot claim kinship with any of the proper Warrens," he says, with a smile that puzzles Lady Rookwell.

"Ah, well," she says, "it doesn't matter. And are you staying here?"

"For a time," he says.

This beautifully vague reply staggers her ladyship, and she turns her shoulder to him.

Signa detects a faint smile of amusement in his eyes, and she wonders whether Lady Rookwell will return to the attack; but her ladyship knows when she is beaten, and talks to Sir Frederic.

Then somebody mentions the word music, and Mrs. Podswell comes across the room to Signa.

"Have you any music with you, Signa?" she says, awkwardly.

Signa shakes her head.

"No," she says, "I have not."

"Perhaps Miss Grenville can play without music?" hazards Sir Frederic, with a blush.

Lady Rookwell looks inquiringly at her.

"Of course she can," she says, and Signa rises without any hesitation and goes to the piano.

Sir Frederic is just about thinking of accompanying her, but before he has made up his mind Hector Warren has reached the piano and opened it. He unscrews the music stool for her, arranges the candles and stands like a willing, eager slave; yes, one who knows how to minister calmly and easily, and all before Sir Frederic has quite made up his mind.

"I wonder what I had better play?" says Signa, almost to herself. "How long it seems since I touched a piano!"

"Play just what you like," he says, leaning forward so that she alone can hear him. "Forget that you are not alone, and please yourself; one of us, at least, will be more than satisfied."

She looks up and catches the latent look of his dark eyes, and her own fall for a moment. Then, without asking him who that one is, she breaks into a Swiss melody, which she has often heard the milk girls singing on their way up the hill at sunset. He, too, has heard and knows it, and as he leans against the piano, his arms folded, his whole mind fixed on her, he thinks a wild thought enough—how sweet it would be if they two could wander through the valley and up the hill.

"Plays like an artist," says Lady Rookwell, with cool, curt decision. "I knew she could. She's her father's daughter. My dear Amelia, you have got a treasure! I wonder whether you know it?"

Mrs. Podswell smiles feebly, and murmurs something about Signa being a "good" girl, which makes Lady Rookwell grin till her teeth become like grave-stones.

"Good!" she echoes, scornfully. "You might as well say Raphael's masterpiece is pretty or nice. I tell you—hem! she'll hear me."

"She has heard every word, unless she is quite deaf," says the captain, with a laugh.

"Ah!" retorts her ladyship, "a little flattery will be a pleasant change for her; you don't give her too much, Amelia, do you?" and she grins again.

"Beautiful, beautiful," murmurs Mrs. Plumbe, meekly, as the Swiss air comes to an end. "Oh, don't let her leave the piano, please! Mr. Podswell, please ask her to play again—or to sing?"

The rector picks his way across the room with a bland smile.

"You play very well, my dear, and with—ahem—admirable expression. Expression in music b——"

"Sing us something," comes in Lady Rookwell's voice.

Signa smiles at the abruptness of the request, and she glances, half-unintentionally, at the handsome, thoughtful face above her.

"Do not sing a note unless you please," he says, in the low voice in which he had spoken previously.

She colors, but shakes her head.

"What does it matter?" she says. "They do not mean to be rude. Will you see if there is anything in the cabinet that I remember?"

He goes down on his knee, much to the amazement of Sir Frederic, who could not have done such a thing for fear of being laughed at, and turns over the portfolio.

"'Come Into the Garden' no. 'The Maid of Athens.' I wonder when this portfolio was opened last?" he says. "I'm afraid there is nothing here——"

"Never mind," she says. "I can remember something. Let me see."

She thinks for a moment, then she sings an old-fashioned ballad so sweetly that, before she knows it, Mrs. Plumbe feels her eyes fill. As for Lady Rookwell, she looks a little more ferocious than usual when her feelings are touched.

There was a murmur of admiration when Signa finishes the song, but not a word from the tall figure beside her. She looks up at him.

"Don't you like it?" she says, with a smile.

He seems to awake from a dream, and with almost a start looks down at her.

"It isn't a question of liking," he answers, his eyes fixed on hers. "Your song will haunt me the night through."

"I hope not," she says, smiling. "And now you must sing for them," she adds.

"And not for you?" he says.

"Oh, for me, too," she assents, with a faint blush.

"How do you know I have any voice?" he says.

She smiles mysteriously, but shakes her head.

"What shall I sing?" he asks.

"The air from 'Carmen,'" she answers at once.

He thinks for a moment with knitted brow, then his face clears.

"Why do you choose that?" he says.

"Because I know that you can sing it," she retorts. "I have heard you. Will you deny it?"

"No," he says. "I plead guilty. I had no idea I was disturbing anyone. I did not know you were near. You mean that night I was trespassing in the Grange gardens?"

"Yes," she says. "Will you sing it now? Shall I play it for you?"

"Oh, I dare not trouble you," he says.

And, to the amazement of the company, he sits down to the piano as calmly and quietly as if every man could play, and with a masterly touch strikes the opening chords, and in a voice which Signa remembers instantly, sings the famous air.

"What a lovely voice!" exclaims Mrs. Plumbe.

"Who is this Mr.—Mr. Warren?" asks Sir Frederic, in a whisper, of Lady Rookwell.

"Who is he?" repeats the old lady. "I don't know, but I can make a guess. A man who sits down and sings like that must either be a music master or an opera singer. He isn't a music master, because they don't walk and talk as he does; therefore he must be the other thing; and what on earth the rector means by admitting a man of that sort to his table I can't imagine."

Sir Frederic shakes his head.

"Depend upon it, you're right. It's rather bad form on the rector's part, you know."

"Very good form, I should say," retorts her ladyship. "If we all of us got somebody at our homes to amuse people as this man is doing it would be to our credit."

"But you said just now——" says the bewildered baronet.

"I said I didn't know what the rector meant, and I don't. I suppose he doesn't know. He'll have an apoplectic fit, and Amelia will faint, when they find out."

"I think," says the baronet, glancing at his watch, "that — Oh, I must be going. Can I order your ladyship's carriage?"

(To be continued.)

Order of the Golden Fleece.

The Order of the Golden Fleece was instituted by Philip the Good, duke of Burgundy, in 1429, on account, it is said, of the profit he made in the wool trade. The original number of knights was thirty-one. At the end of the collar was hung a golden fleece. The order finally became common to all the princes of the house of Austria, and now belongs to both Austria and Spain. In fact, its membership includes royal personages from many lands, and the order is practically as wide as royalty itself.

No, Clarence, you can't open a bank account with a pair of jacks. It isn't according to Hoyle.

HUMAN TELEPHONE.

New Apparatus May Aid Tuberculosis Diagnosis.

Dr. Glover, a French physician, has devised an apparatus for internal diagnosis by which sound waves given out by human organs may be propagated either through the air in the ordinary manner of sound waves or through the bones and tissues of bodies, according to Jacques Boyer in the Scientific American. By means of the apparatus, it is said, the practitioner will be afforded the possibility of an early diagnosis of tuberculosis and a close study of respiratory organs is also practicable.

Describing Dr. Glover's apparatus, the Scientific American says:

"He places a galvanometer in circuit with a microphone, an induction spool primary and a voltaic battery. A voltmeter is attached to measure the electromotive force at the moment of experiment. For a given position of the microphone this apparatus develops a certain intensity, which is indicated by the index of the galvanometer. When the microphone is exposed to the action of the organic sound vibrations, from heart, lungs, etc., its membrane is subject to periodic deformations, which are revealed to the eye of the observer by the galvanometer hand, the quotient of the voltage of the electric source of the resistance of the microphone circuit being kept constant.

"In order to test and check the visual record thus obtained of the patient's internal mechanisms, Dr. Glover has devised a system of two receivers inserted in the secondary coil of the induction spool. This is appropriately used in examining respiration and heart action. It is to be noted also that the galvanometer test is of value when associated with ordinary feeling of the pulse, for it reveals delicacies of the vascular vibrations which would not be sensible to the organs of touch.

"Finally it is a simple enough step to attach a recording needle to the galvanometer, somewhat after the plan adopted for the testing of candidates for the French aviation service, thus obtaining a permanent graphical record which may be studied at leisure under far more favorable conditions than those of the operating room or the clinic."

Good-Bye, Old Backache Nerviline Will Fix You!

Stiffness is Rubbed Right Out: Every Sign of Pain Disappears.

Gee whiz—think of it!

No more stomach dosing necessary to cure your lame back.

Every trace of lameness, every bit of stiffness, every sign of weakness in the back's muscles can be rubbed away for all time to come by good old "Nerviline."

No other liniment can do the work so quickly, can penetrate so deeply, can bring ease and comfort to the back-weary sufferer as Nerviline invariably does.

Backache isn't the only malady Nerviline is quick to cure. For lumbago or sciatica you would go far to find relief so speedy as Nerviline gives. For chronic rheumatism there are pain-destroying properties in Nerviline that give it first rank. The way it limbers up a stiff joint and takes soreness out of strained or rheumatic muscles is simply a wonder.

If you have an ache or a pain anywhere, if you have a sore back, a stiff neck, a stiff joint, a strained muscle—if you have lumbago, congested chest or sore throat, just try Nerviline. Rub it on plentifully—it won't blister, it can't do anything but cure you quickly. The large 50c family size bottle is the most economical, of course, but you can, from any dealer, also get the 25c small size of Nerviline, the king of all pain-relieving remedies.

BLOCKADE TRIPS.

Rubber Onions a Means Used by Enemy to Import Commodity.

Tumbling over the waves on her way back from a "search" came Seascraper's boat. She tied up alongside and her crew scrambled inboard along the boom.

"Bill, here's something to put in your soup," called one of them to a messmate, holding up a large onion.

"Right you are; pitch it here," answered Bill, extending a huge, work-hardened palm. Whizz came the onion, which touched Bill's horny paw, rebounded from it, struck the edge of a table and then went bounding along the mess-deck like a ball.

"Well, I'm blowed!" exclaimed Bill, looking after it with a surprised yet understanding eye. "So that's the latest, is it? Blest if you can ever make sure you've properly overhauled them ships until you've prized open the mouths of the crew and looked down their throats with a telescope."

The alleged "onion" was made of rubber and had been brought back as a curio by one of the search party from the ship that had just been overhauled. All sorts of clever devices are adopted to try to get contraband through the British blockade. The American genius who invented wooden nutmegs gave an idea to would-be blockade runners which they have elaborated and vastly improved.

But hard war experience has taught our patrol service not to accept things as being just what they seem—no matter how guilelessly like them they may appear. In this particular case, when the vessel was boarded many sacks of onions were found among her cargo. Most succulent, oniony onions, too, they looked, and the crew opened the sacks quite confidently. However, when the examining officer picked up one of the onions at random and dropped it on the deck it bounced back into his hand—and the game was up. Except for a few real ones spread carefully at the top of the sacks, the whole of the "onions" were made of rubber. They were undoubtedly on their way to Germany through some neutral port, but the discovery of their real composition meant confiscation, and the wily Hun got none of these "vegetables" for his warbroth.

Long months spent in countering the wiles of clever tricksters have made the crews of our blockading ships the most suspicious people on earth. And not without good cause do they decline to judge by appearances only. Yet with all their astuteness they sometimes come very near to being deceived.

Weak, Nervous Children Quickly Gain Strength Under Following Plan

Nervousness, just like weakness, is a family predisposition. We inherit tendencies to disease just as we inherit physical resemblances. The strain of study, social duties, work at home these all tend to make nervous troubles among children. No wonder that St. Vitus Dance, Epilepsy and constant headaches have become alarmingly common. Pale, nervous, listless young people are met everywhere.

It is nothing short of criminal for parents to neglect signs of weakness in their children. By ignoring the slightest symptom of nervous or mental strain, you may condemn your child to life-long invalidism. If any member of your family complains of headaches, fear of going into dark places, give them that wonderful tonic, "Ferrozone." Strength of body and mind, hardy nerves, ability to study with comfort, all the attributes of health quickly follow the use of Ferrozone. It establishes strength, color, endurance, vim—does this by filling the whole system with nourishment and tissue-forming materials.

It's because we know the enormous good that Ferrozone will do, because we are sure every child and even grown folks will be permanently benefited that we urge you to give it a trial. All dealers sell Ferrozone in 50c. boxes, six for $2.50, or direct by mail from The Catarrhozone Co., Kingston, Ont.

'Tis Ever Thus.

Once lived a man, who says, says he—
I'd like to take a loafing spree.
I'd like to own a big machine
And have a barrel of good green.
I'd make the good old welkin ring
With shrieks of joy, I would by jing.
Not one more cussed tap of work
Would I 'er do. I'd simply shirk.
I'm tired of all this toil and strife,
I'd like to be retired for life.
"All right" said Fate, and filled his hat
With seals of beetle, quick as scat.
That man went out and did the town,
Turned everything all upside down.
He burned up tires and busted gears—
Had all the traffic cops in tears.
He never went to bed at nights—
Feasted where they had white lights.
For just six months he kept it up
And overflowing was his cup.
Then one fine day the Doctor said—
"You're just about as good as dead.
You've got the pip, the runt, the gout—
In fact your system's down and out.
Your diet now will be boiled hay
And carrots sixteen times a day.
Then when you're well go back to work
As fourth assistant shipping clerk.
Do this, or else you'll fill a box—
My fee? About eight hundred rocks."
Years rolled round, the man got well—
Got back his job with Bay and Sell.
He's now just turning ninety-three
And says: "No loafing, thanks; for me."

—C. S. M.

Minard's Liniment Co., Limited.

Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,

W. A. HUTCHINSON.

CURIOUS MEALS.

Elephants Are Gormandizers, and Giraffes Have Queen Tastes.

Elephants, at least captive elephants, have queer tastes, says Pearson's Weekly, in an entertaining article about the peculiarities of four-legged gourmets. One memorable day in 1908 Suffa Culli, the mighty and popular Indian elephant at the zoo, ate his bed. A thirty-six pound truss of straw had been put down on the floor for his comfort, and when the keeper went round in the morning not even the bands of the truss remained.

Suffa Culli followed it up during the day by eating three trusses of hay, weighing 150 pounds. Finally some one brought a number of Christmas puddings into the elephant house. Suffa Culli swallowed 'is pudding without even opening the cardboard box that contained it.

A zoo keeper once kept a tally of the number of hot cross buns an elephant took down. For six hours on end one fine Good Friday it swallowed buns at the rate of 400 an hour!

The average giraffe loves nothing better in the world than a good square meal of flowers. It has not the slightest idea, however, of the difference between artificial and real flowers.

Some years ago when "garden hats" were all the rage the giraffe at the zoo made a day of it. In that glorious twelve hours he accounted for no fewer than seventeen hats, the majority of which were chewed beyond recognition before they could be rescued.

One of the funniest mistakes a giraffe ever made—funny for lookers-on, that is to say—was when a peacock strolled into the paddock. The peacock's tail caught the giraffe's eye, and evidently the animal mistook it for a gigantic and luxuriant species of flower. At any rate, before any one could interfere, down came the giraffe's long neck, and, seizing the peacock by the tail, he hoisted it in mid-air. It was not long before bird and tail said good-bye to each other, and the peacock fluttered away, screaming with indignation. Although a trifle astonished at the proceedings of the newly discovered flower, the giraffe chewed the tail with great gusto.

2 IN 1

$21.00 DELIVERED AT YOUR HOME TOWN

Combination Cooker and Heater

The most efficient and economical stove made

Will burn coal, wood, coke, corn cobs ... anything burnable.

Fitted with Duplex Grate, Hot Blast Tube and Screw Dampers.

Will bake fine, [illegible] and bake equal to the largest range.

Has a fine oven of heavy steel sheets closely riveted together. Body of polished steel.

If your dealer has not a sample for your inspection, send $21 direct to us and we will prepay freight to your nearest railroad station.

THE HOUSE FOR GIFTS.

Minard's Liniment Cures Colds, Etc.

Bungalows.

A bungalow is primarily never more than one storey high. In addition to this, it must be surrounded by verandas, and it must be built of either thatch or tile. The type was introduced into India from Bengal, and it was called a "bangla," or Bengal house, because that was the kind of modest homes the Bengalese erected. It is so well suited to the climate of India that it is generally used by even the better class of British residents. It is so well suited to the climate of India that is generally used by even the better class of British residents. It is also used by the government for the accommodation of travellers along the public roads. Dak bungalows are erected at intervals of about fifteen miles, and here any traveler can get accommodation at 50 cents a day. At the end of twenty-four hours if his room is demanded by some later comer he is compelled to give it up and move on.—Exchange.

Minard's Liniment Cures Diphtheria.

Dresden China.

It is to Frederick Bottger, a native of Saxony—1682—1719—that we owe the secret of making porcelain. It was in 1710 that a lucky accident revealed to Bottger the true nature of the required paste. Having noticed the unusual weight of some hair powder, he inquired what it was made of and found that it was a finely powdered clay from Aue. He forthwith procured some of the clay, made vessels of it, and, to his infinite delight, learned that he had at last found the very material he wanted. In a word, he had made the discovery of porcelain.

A Wonder City of Galicia.

In Galicia there is one of the most remarkable underground cities in the world. It has a population of over 1,000 men, women and children, most of whom have never seen the light of day. It is known as the City of the Salt Mines, and is situated several hundred feet below the earth's surface. There, there is the greatest salt mine in the world, and though it has been mined for many generations, the supply seems inexhaustible. The city has its town hall, church, theatre, and assembly room, all made from the crystallised rock salt. It has long, wide streets and big squares lighted with electricity. There are numerous instances of families in this underground city where not a single individual in three or four generations has seen the sun.

TO TRIFLE WITH CATARRH IS TO RISK CONSUMPTION

Usually it comes with a cold. Being slight, it is neglected—but the seed is sown for a dangerous harvest, perhaps consumption. To cure at once, inhale Catarrhozone. It destroys the germs of Catarrh, clears away mucous, cleanses the passages of the nose and throat. The hacking cough and sneezing cold soon disappear and health is yours again. Nothing known for colds, catarrh and throat trouble that is so curative as Catarrhozone. It cures by a new method that never yet failed. The one dollar outfit includes the inhaler, and is guaranteed to cure. Smaller sizes 25c and 50c; sold everywhere.

Why We Have Two Eyes.

Because we have two eyes, the things we see seem solid and not flat, with the result that we can judge their distance from us with fair correctness. Look through a window at a house across the street with one eye closed and then with the other eye closed. The bars of the window frame will cut across the opposite house in different places. The two fields seen with the eyes separately, although in the main alike differ. When you look at the house with both eyes open the two fields seen by the two eyes are combined and the house across the street assumes depth and relief. Although we see a house with each eye, we see only one house with both eyes. This makes the stereoscope possible—an instrument so designed that the two eyes are made to converge on a single point, and yet to see two different pictures. If these two pictures represent a chair as it would appear to the right and left eyes respectively they are perceived as one solid object.—Popular Science Monthly.

The Device On Turkish Stamps.

The curious symbol in the centre of Turkish stamps, an intricate and mysterious device, is the "toughra," or signature of the sultan. It is said to owe its origin to Sultan Murad I., who was unable to write his name. St. Nicholas quotes from an article on "What Philately Teaches" as follows: "He (Murad I.) signed imperial decrees dipping his fingers in ink and placing them on the documents with three fingers close together and the little finger and thumb extended. In the course of time this was adopted and, so to speak, consecrated as the signature of the sultan. It was also elaborated and arranged to form a written phrase, while preserving in a general way its original form. The toughra contains certain characters which are permanent and minor ones which change. The latter are the names of the sovereign and his father." Mystic significations in course of time have become associated with this toughra.

JUST THE THING FOR LITTLE ONES

Baby's Own Tablets are the best medicine a mother can give her little ones. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; relieve colds and simple fevers, and make teething easy. Concerning them Mrs. Herbert Johnston, Maymont, Sask., writes: "I have used Baby's Own Tablets for the past four years and find them just the thing for babies and young children." They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Effect of Cold On the Senses.

An explorer who took part in an Antarctic expedition states that the most remarkable effect of the cold which he noticed was the loss of sense and touch in the fingers. It was almost complete.

"Suppose you wanted to look for a knife in your kit bag. You would put your hand in and feel round for it, and you would actually have it in your hand and not know. It was the same with everything we handled. We saw that we picked it up and saw that we held the article; we could not feel that we had it."

He added that it was not possible to shave, because the skin became irritated and sore, while if the beard became too long it became moist and then froze into a block. The only thing to do was to keep the beard and moustache clipped close.

Minard's Liniment Cures Distemper.

HAROLD'S AMENDMENT.

(Puck)

Roxanne Rox—Harold, may I ask the clergyman to omit from the marriage service the word "obey"?

Harold Hardup—Certainly, darling. Just tell him to make it "love, honor and supply."

A HOT COME-BACK.

(Boston Transcript)

Miss Royal (triumphantly)—I suppose Jack never told you he once proposed to me.

Jack's Fiancee—No; he told me there were a number of things in his life he was ashamed of, but I didn't ask him what they were."

Ammonia applied two or three times on a fresh cold sore, will cure it.

The Servant Problem—who ever heard of it in the home where the housewife knows Shredded Wheat? In five minutes you can prepare a wholesome, satisfying meal with Shredded Wheat Biscuit without kitchen worry or work. For breakfast heat the Biscuit in the oven to restore crispness and serve with hot milk. For lunch serve with sliced bananas or other fruits. Made in Canada.

Trench Papers of the Poilu

We have nothing [illegible] with [illegible] like the "Trench [illegible]" [illegible]. [illegible]

Very different are the war journals of the French poilu. I have a bundle of them before me. They vary in many respects, in size of sheet, ranging from a plain foolscap sheet of four pages to a six or eight page paper half the size of the Chronicle; in typography, some being printed in the orthodox style, others being but impressions of varying degrees of clearness from gelatine to mimeograph; in content, in crude or finished illustrations, in sentiment, irony and humor; but with all these differences, they have one great characteristic in common—an intense realization of war.

Do you understand me when I say that the French soldier does not shake off all the associations of civilized life and go forth on a bellicose adventure against an enemy? He is not submerged in an orgy of barbarism, but with martial state lives still his inner life, with sense and intelligence unabated—though all is at war with a [illegible] antagonist. It is this fact that [illegible] in the pages of these trench journals, that the [illegible] are directed not merely against the bodies of the sons of [illegible] but against their [illegible] and [illegible], against the pleasures of sense and intellect, against all the charms and joys that make life worth living.

And this joie de vivre, this keen and [illegible] appreciation of the blessings of peace wells up in a queer juxtaposition with the grim realities of warfare in these little journals produced on the battlefield. And let me say a word as to how they are produced. Picture to yourself a company coming off duty. They are quartered in an old shell-riddled barn. Flinging themselves down, they [illegible] satisfy hunger and thirst and then one by one drop off to sleep. All except one man. He squats in a corner of the barn busy at something by the aid of a lighted candle quite against the regulations. He is the editor of a trench journal, such a one as Le [illegible], or Le Rat [illegible], L'Artilleur [illegible], Le [illegible], Le Poilu, to give the names of several that lie before me. Outside the barn the din of shell fire continues. [illegible] He only [illegible] a stray piece of equipment flung at his lighted candle by a comrade, who says the light is shining in his eyes and he wants to sleep. If the aim is good the candle is relighted and the editorial labors continue.

The editor selects the [illegible] for publication from the [illegible] things handed to him by contributors in his sector. Acting as writer, illustrator, designer, printer and publisher, [illegible] out his pages and copies the letterpress in a clear hand and traces the pictures on a frame of gelatine, after which he carefully pulls off the impressions. The edition is necessarily a small one. Fifty copies offer no difficulties, but after that number is reached the impressions become faint and blurred. The circulation cannot be [illegible].

But in not all of these journals of the trenches are the difficulties of production so great. Some of the journals are issued from a small printing press which followed a [illegible] in the company wagon of the camp train. Other journals—again, [illegible] from towns and villages farther removed from the firing line. These are very dignified and professional papers, with halftone illustrations, [illegible] headlines and parodies of popular advertisements. Of these journals every impression is easy to read, and there is no fault [illegible] their circulation. But they do not possess the naivete, the [illegible] of their more elementary contemporaries.

It is difficult to give anything like an adequate idea of the general contents of these journals, all [illegible]

[illegible]

[illegible] banditti. But without attempting to convey with any adequacy of spirit or [illegible], a specimen or two may serve to give an idea of their contents.

The following appears in the Agony column of Le Canard Poilu:

"Lost, on Sunday last, at the Café [illegible] in Paris, by a soldier on leave, a [illegible] of medium build, dark chestnut [illegible]. [illegible] of infantry, section N, Trench X, dugout 2, will be rewarded with a [illegible] loaf."

The following Hard Case from Le Poilu will appeal to readers who are [illegible] enough to remember similar [illegible] diversions which were a popular feature of one of our [illegible] weekly newspapers some years ago:

"If during a lull in the battle of Verdun you run over a paper of the day before yesterday and are struck by this flaring advertisement: 'The [illegible], Nice, Summer, Monte Carlo, [illegible] sports, grand concerts, balls, all kinds of sport, etc., etc.,' what would you call those civilians who are [illegible]?

"If on going into the trench, wading in French mud up to your waist, you read in this same paper an article by a war correspondent who in describing this particular trench calls it 'very comfortable, healthy, and provided with all modern conveniences,' what would you call this journalist?

"If after having been nearly gutted by a German who had missed you and has only thrust a bayonet through your thigh; if, having made him prisoner and brought him back with considerable difficulty and the help of a pal, you learn from the above-mentioned war correspondent that the Germans surrendered without resistance, holding up their hands and crying 'Kamerad!' what sort of a face would you pull in hospital?

"If arriving in hospital near [illegible], where you are going to take a much needed rest, you [illegible] forth on the following morning, after having spent two full and weary years in cleaning yourself, and you hear behind you this amiable reflection from a fellow countrywoman, 'Look, there is a poilu who is quite clean. He hasn't suffered much,' what sort of a face would not give the gentle lady [illegible]?"—William Maas in the London Chronicle.

◆◆◆

"Hefty Annie" and Her Work

The young newcomer to the [illegible] sat up with a start and stared in astonishment while the ground rocked under him.

"Needn't be alarmed, sonny," [illegible] "Hefty Annie" doing a [illegible] at the Boches. Never heard her going [illegible], I s'pose?"

The youngster admitted that he had not.

"Well, you'll soon get used to them here, [illegible] you'll miss 'em if they were [illegible] to sleep. It's fine music, [illegible] music when it's made by our own side, an' damned [illegible] when it's made by the other." Having delivered himself of this terse description of gunfire, the old-timer stretched comfortably back and [illegible] his "fag" with great enjoyment.

"Hefty Annie" lay out of the [illegible] very [illegible] screened from the sharp eyes of the [illegible] from over the barbed-wire [illegible] who were always trying to locate her whereabouts with the sinister motive of compassing her destruction. Official documents, in their cold, unimaginative way, describe her as "Howitzer, 15-inch, mark ——," and so on. But to the more understanding minds of the men who expended much loving care upon her, "Annie" was a creature with a soul, something that could be talked to and had a truly feminine way of exacting little attentions from the male folk around her—not a mere cylinder of steel which alternately labored and slept. But then officialdom, dry as dust and dull of vision, does not understand the psychology of guns as the men who work them do.

"Hefty Annie" was not only "hefty" in herself but she demanded the same useful quality from the "court" over which she queened it with most exacting autocracy. No room there for unmuscular weaklings nor any slow of foot.

When "Annie" started upon her travels she did so in almost royal state. Her train spread over quite a considerable length of roadway. A huge petrol tractor led the van—a strange-looking contraption with rear wheels almost as high as an omnibus' knife-board; then came "Annie" herself in solitary grandeur upon her special carriage and robed in tarpaulins—the scarlet and ermine of her line. After her rolled the "pill-boxes," otherwise the ammunition wagons (so called because the battery humorist had chalked "Pills for the Kaiser" on their dull grey sides); then the "wireless" truck and sundry other vehicles all designed for the specific purpose of ministering to "Annie's" needs. These trundled along at a good pace under the [illegible] of the tractor, which, although a queer-looking affair in itself, was indubitably "hefty" when it came to pulling.

"Somewhere in France" at last, and "Hefty Annie" was settled down to "own a bit of the earth." Deliberately yet carefully, her "subjects" went about the task of erecting her throne. First, they laid the [illegible] and formed the base of it, when all was ready tackles were placed and "Annie" was enthroned with somewhat less pomp, perhaps, but with far greater solicitude for the permanency of her seat than is usually shown towards monarchs. Just what was done would make an interesting story. Doubtless history will tell us all about the matter one day. This narrative, not being history, must stop at arousing curiosity and not go on to satisfy it.

Suffice it, therefore, to say that everything that had to be done was done swiftly, deftly, and correctly, as the work of well-trained hands always is. Its completion found "Hefty Annie" sitting grimly on her seat and poking an ugly round snout contemptuously towards the enemy.

"All ready for action, sir," shouted a subaltern, poking his head into a hole and addressing someone apparently down in the bowels of the earth, who answered:

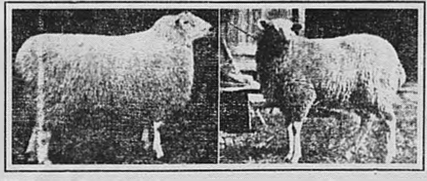
"Right! What's your full range, did you say?"

"Fifteen miles or a bit more, sir," replied the "sub," whereat the subterranean voice rumbled back an expression of great satisfaction.

And so it was that "Hefty Annie" began her reign. At intervals she [illegible] a deep raucous "hoof" that [illegible] its way through her whole [illegible]. Sometimes she did this just once or twice, at others quite a long [illegible]. As "Annie" [illegible] from her iron lips [illegible] of bright yellow flame, from the [illegible] of which was ejected a [illegible] shell that shrieked viciously [illegible] far off that only the [illegible] and in the [illegible] ahead [illegible] the dimmest sight of it.—[illegible] Daily Mail.

WHY EVERY FARMER SHOULD RAISE SHEEP

Just How the Ontario Farmer May Best Make a Start in Establishing a Small, Profitable Flock—Begin With Grade Ewes and Pure Bred Ram.



Many have attained success by using Rams of a large, long wooled breed, as shown at left, but no one ever made profits from the scrub ram depicted on the right.

Considering the [illegible] market for mutton and lamb [illegible]

[illegible] this has a foundation in the recognized demand for a certain commodity, and farmers will be promoting their own interest, if they set about providing the public with it. The reason why most farmers have so long neglected to do this has its foundations in their conservative methods. The average farmer wishes to do as his father did [illegible] to deplore the good old [illegible]. His father "raised" pork and lived on it chiefly, and a very good [illegible] it was, too. The demand of the Canadian market has [illegible] pork and beef, [illegible] conditions of life in Canada are changing. Towns have grown to cities. In [illegible] agricultural districts a different standard of living has been evolved. [illegible]

[illegible]

SHEEP IMPROVE THE SOIL.

[illegible]

[illegible] this line would believe. Again, sheep keep the land clear of weeds, which are an eyesore to every man who loves the land, besides being a source of waste which no good farmer should permit.

Dickens advises, through, that [illegible] the first instance by the expert [illegible]

[illegible] to mate with grade ewes. He must be pure bred.

Of what breed the sire shall be no one can dictate, although each sheep [illegible] will have his own personal [illegible]. [illegible]

[illegible]

HOW TO CHOOSE A [illegible]

[illegible]

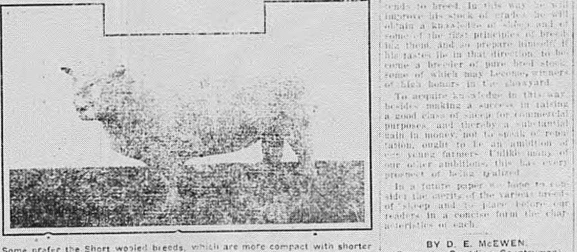
[illegible] known to be pure [illegible] chosen. The lambs are then more likely to inherit the characteristics of the sire.

The buyer will do well to apply to the owner of a well-known flock of whatever breed he decides upon, tell his requirements and obtain a ram suitable for the class of stock he intends to breed. In this way he will improve his stock of grades, he will obtain a knowledge of sheep and of some of the first principles of breeding them, and so prepare himself, if his tastes lie in that direction, to become a breeder of pure bred stock, some of which may become winners of high honors in the showyard.

To acquire knowledge in this way, besides making a success in raising a good class of sheep for commercial purposes, and thereby a substantial gain in money, not to speak of reputation, ought to be an ambition of our young farmers. Unlike many of our other ambitions, this has every prospect of being realized.

In a future paper we hope to consider the merits of the various breeds of sheep and to place before our readers in a concise form the characteristics of each.

BY D. E. McEWEN.
(From the Canadian Countryman)



Some prefer the Short wooled breeds, which are more compact with shorter and finer wool. Three of these can be kept for two of the larger breeds.

THE GREATER DANGER.

(Boston Transcript.)

Wife (at midnight)—Tom, wake up. I hear a burglar. Get up and go down stairs.

Hub—It's probably a mouse, you know, but I'll go down.

Wife—A mouse, mercy! you'll stay right here in this room.

An automobile was found yesterday by Detectives Shirley and Smith on a vacant lot in the east end, for which no owner was found this morning. The car belonged to T. J. Milne, who resides near Toronto. How it came to be there has not yet been ascertained.

Numerous attractive styles in veils are shown for keeping the hair in place. Some are in plain hexagon or fillet meshes, also more elaborate patterns as in the illustration in which a scroll design is featured.

The sailor hat with gracefully drooping brim is shown in the illustration. A combination of black velvet and flesh satin is used, the former serving as a border.

OPULENT RUSSIA

Alexander S. Kara in Chicago Tribune.

[illegible] burg and Dusseldorf [illegible] the butter line, while at Warsaw horse meat has become a [illegible]

One comes to the conclusion after reading over reports and essays written by most cautious and sober Russian economists who cannot be accused of twisting facts and figures for patriotic reasons, [illegible]

[illegible]

[illegible] dissonance in this picture. Among them are those who live on a definite unchangeable income, such as clerks in governmental and public institutions, [illegible], or those who receive pension. In some cases the governmental officials receive extra pay during the war time; the others can easily increase their income in view of the present demand for labor.

What are the causes of the paradoxical phenomena that the Russian people as a whole grow not poorer but richer in spite of the great war, which requires an enormous strain of all forces and resources and disturbs the normal course of the economical life?

One reason may be found in the stupendous amount of money that has come into circulation since the beginning of the war. Of the 30,000,000 rubles that are spent daily on the war by Russia, the larger part remains in the country, for the remuneration of those who supply the army with all its necessities. The money flows in wide torrents over the entire country, increasing the incomes of millions of men who are in position not only to satisfy their needs, but also to swell the banks with their savings. Hence the unprecedented fact that the Ministry of Finances has been able to place on the internal market a series of consecutive loans for billions of rubles—a fact that would appear improbable a few years ago.

Yet this reason would not be sufficient in itself. Wealth consists not of money, but of "necessary, useful and pleasant commodities" which serve for the satisfaction of human needs. Has the amount of such commodities increased in Russia parallel to the increase in the amount of money? In products of such primary importance as bread, eggs, butter, sugar, flax and hemp the export has almost ceased and they are consumed at home. True, a [illegible] for the supply of the army, but the army is a part of the population, with the only distinction that it requires a bigger consumption per person.

At the same time it is noteworthy that the imports have decreased in a yet lesser degree than the exports. The Russian balance of trade, which has [illegible]

Another reason for the sufficiency in Russia's resources is the enormous amount of her reserved supplies, which are at present being utilized. For instance, the temporary cessation of the import of foreign coal, together with the conquest of the Dombrowa coal basin by Germany, have not affected industry to a great extent, but merely caused the more intense utilization of Russia's immense forests for fuel purposes. The destruction of the native forests is undoubtedly a calamity, but it is an indispensable compromise in time of war. One must add another reason for the increase of national efficiency in Russia—a more economical use of consumed commodities. With the rise in prices the dearth in certain commodities (as metals), and the more intense use of others, has [illegible], the population has become more frugal and less wasteful.

How about the lack of labor power and its resultant decrease in the productivity of the country? Undoubtedly the army has absorbed a great amount of working power, which circumstance could not but be reflected on the decrease of the productivity. The Russian economists do not undervalue the significance of this grave fact, but they point out a number of counteracting circumstances. On one hand the [illegible] of labor, which used to be generally low in Russia, has greatly risen since the war. This was conditioned by the spiritual upheaval connected with the war as well as by the heightened [illegible] (a better fed man works better). Another contributing cause for the improved productivity has been the [illegible] beneficiary influence of the great reform—the prohibition of vodka.

Then there are good reasons to believe that before the war Russia, especially her black soil central region, had a surplus of population. One should note also the multiplied participation of women in agriculture, industry, roads of communication, various governmental and public institutions, etc. Finally we must not overlook the large contingent of war captives who are performing at present work in the fields as well as in some branches of industry.

Whether this general prosperity of Russia will endure depends upon the duration of the war. The [illegible] cannot last forever. [illegible] is bound to bring need and suffering for the people. We must bear in mind also that thus far the war has not placed any heavy financial burdens upon the population; the raising of some taxes, and the introduction of a few new taxes, have not been sufficient even for filling up the gap caused by the abolition fo the vodka income. This situation cannot last much longer. If the war is to continue (and there are no indications for a near end of it), the government will be forced to levy new taxes, and the prosperity of the broad strata of the people will evaporate. Whatever the outcome of the war, it will require colossal sources for recuperation, for restoring the devastated provinces, for remitting the enormous foreign loans, etc. The only source for those expenditures will be again the pockets of the people.

Yet the Russian economists are optimistic as to the future. They believe that the creative element in national economy is primarily "man and his productive labor"; if that factor is alive and active, the country will be able to bear the heaviest economical shocks, and even to emerge from them strengthened and revived. As an example may serve the Russo-Japanese war and the revolution which followed it. In less than ten years after those events Russia met the new great war with all the might of her economical and financial equipment.

This is explained by the fact that the revolution and its resultant reconstruction of the order of things introduced a fresh current into the stagnant life of the people, has awakened the dormant national forces, and has elevated the individual and his creative energy. The same consequences may be expected from the present war. The stirred, electrified, rejuvenated nation will prove powerful enough to heal rapidly the sores caused by the war and to astonish the world with its inexhaustible reserve of productive energy.

September Morn.

Old Father Hubbard went to the cupboard
To get him a bottle of beer,
But when he got there the cupboard was bare,
Alas! Prohibition was here.
He went to the tavern to purchase some ale,
But when he got there the place was for sale,
He went to the shop for a bottle of rum,
But when he got there he couldn't get in.
He ordered some whiskey—for use scientific!
They sent him wood spirits; the smell was terrific.
He went to a Vet. to prescribe for a calf.
Some brandy would do—say a pint and a half.
He found on returning the Vet. played him false;
The bottle contained only water and salts.
He went to a doctor for rum for a boil,
But Doc. prescribed sulphur, and sweet castor oil.
He went to a druggist without a prescription.
So couldn't get liquor of any description.
He sought a blind pig as his only resort,
But when it was raided he landed in court.
He went to the farm out at Guelph for a rest;
He thought when released prohibition was best.
He's glad to be freed from King Alcohol's power,
So now he goes thirsty or drinks lemon sour.
—Chatsworth News.

HAD INDIGESTION.

BURDOCK BLOOD BITTERS CURED.

That grand old remedy, Burdock Blood Bitters, has been on the market for over forty years and we claim, without any fear of contradiction, that there is not another medicine on the market to-day that can compare with it for the cure of all disturbances of the stomach.

Mr. [illegible] Fagan, Colborne, Ont., writes: "I am writing to say that I have used your Burdock Blood Bitters. For a long period I suffered with indigestion, and nothing I took ever gave me any relief, only for a short time. I bought several bottles of B. B. B. from our druggist, Mr. Gridley, and can honestly say I can eat or drink anything I want without experiencing any bad after-effects. I may say that it is the only medicine I ever got any relief from."

Burdock Blood Bitters is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

Toronto.—Practically all Toronto wholesalers are more than satisfied with the volume of business which is passing. Retail trade as well is showing remarkable activity. Dry goods lines are still very active, and business is well ahead of the same period of last year. Wholesale grocers report that trade conditions are good. New canned goods are on the market at prices much in advance of those of last year, and the supply is too small to fill all orders. Collections very fair.

Montreal.—Both sorting orders and those for spring delivery indicate a very satisfactory trade outlook. The filling of sorting orders has kept dry goods houses very busy, and spring orders are already coming in considerable volume. Boots and shoes are more active. Leather is scarce and prices are firmer. The harness trade with the West is active and some shipments are going to the United States. Groceries are active with numerous price advances.

Ottawa.—Fall trade continues to be very satisfactory locally and in the surrounding district. Dry goods firms report men's lines are better than would be expected under present conditions. Boots and shoes are moving out freely from retailers' shelves. Sole leather is very high. Groceries are fairly active.

Hamilton.—The business situation is very good. Without exception local industries are running to capacity, and the labor situation is still one that confronts manufacturers with a serious problem. Wages are sufficiently high to allow the public to keep on buying in as great volume as ever, even at the higher prices. Dry goods and boots and shoes are reported to be very active. Grocery lines are experiencing considerable activity, and canned fruits and vegetables will be quite scarce. Remittances are good.

London.—The volume of autumn business is being well maintained. Dry goods are moving out as rapidly as deliveries can be secured, and spring orders are coming in large numbers. Spring orders for boots and shoes are even larger than some dealers like. Groceries are active, with no diminution in business from higher prices.

Winnipeg.—Better weather is being experienced in Manitoba, and more threshing may yet be done. General trade conditions are very healthy. Hardware lines were advanced this week. Dry goods are scarce, and wholesalers are unable to meet all demands. Groceries are being actively distributed.

Calgary.—Business conditions continue good, although bad weather has held up threshing. Commodities for winter use are in demand, and an active trade is being done in dry goods, boots and shoes, and hats and caps. Hardware lines are also reported active, and a fair business is being done in harness.

Vancouver.—Mercantile trade is still very satisfactory to both wholesalers and retailers. Money is fairly plentiful and remittances are generally reported to be good.

Quebec.—Business in general is much about the same as the preceding week. Wholesalers, especially dry goods, report orders ahead of this time a year ago, and the outlook promises well; other lines report favorably. Amongst the retailers dry goods and footwear are in demand. Collections are fairly good.

Blotted Out "Lord Penn."

The first book of any kind published in Philadelphia was Atkin's Almanack for the year 1686. It was an unpaged pamphlet of ten leaves, only two copies of which are now known to be in existence. The first copy of the Almanack printed was sent to Colonel Markham, Penn's deputy, who reported to the council that the book had erroneously declared Pennsylvania to have been founded by "Lord Penn." The council disapproved such a high sounding title and directed the author and printer (William Bradford) to "forthwith and effectually blott out ye words 'Lord Penn.'" This had the effect of recalling the whole edition and the abolition of the obnoxious words.

Speaking much is a sign of vanity; for he that is lavish in words is a niggard in deed.—Sir Walter Raleigh.

FOR
"LIVERISHNESS"
USE
MILBURN'S
LAXA-LIVER PILLS
THEY NEVER FAIL TO DO GOOD.

Mr. J. Shettleworth, Halifax, N.S., writes: "I take pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad I would have severe headaches, but after using a couple of vials of your pills I have not been bothered with the headaches any more."

Milburn's Laxa-Liver Pills clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Milburn's Laxa-Liver Pills are 25c. a vial or 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

CLAMIS

On Tuesday of last week Mrs. J. Cunningham served a ten cent tea in aid of 'The Red Cross Work'. The sum of $9.20 was received.

Rev. D. Allan, of Hamilton, District Elder for the F. M. Church, conducted quarterly services here over the week end.

Mrs. N. C. McFarlane visited friends in Clifford last week.

Mr. and Mrs. A. McKinnon of North Bruce, were Sunday visitors at J. Cunningham's.

Mrs. James Hogg left on Saturday on a visit to relatives in Buffalo.

Miss Emma Kirktown left last week for Toledo, Ohio, where she will enter in training in the hospital there.

Mr. J. H. and Miss S. McIntyre spent last week visiting Kincardine and Tiverton friends.

Miss Lizzie Ferris of Toronto was summoned home this week through the sudden death of her mother.

Miss C. McDonald, of Detroit Mich., and little neice, Miss Margaret Love, visited friends here last week.

Capt. P. McKinnon of the schooner "Sophie", Sarnia, returned home on Saturday night for the winter.

It is our sad duty this week to report the very sudden death of Mrs. Jos. Ferris Sr. who passed away on Sunday night. A fuller account will appear next week.

Messrs. Dan Montgomery, and Jas. McLeod left last week to spend the winter at work in Niagara Falls.

Miss Laura Cunningham spent a few days at Mr. A. McKinnon's, North Bruce, last week.

On Friday evening a number of the young people of this burg were entertained at the home of Mr. and Mrs. Jatch's, (nee Miss Minnie McKinnon) near Armow.

Miss E. H. Hewson returned home from Toronto on Monday.

A Lecture under the Auspices of the Red Cross Workers of Glamis Branch, will be given by the Rev. Thos. Gilmour of Ripley in the Baptist Church on Tuesday evening next. His Lecture is entitled "Great Britain in War Time, a Patriotic Travel Talk" This will be a treat. Let everyone come. Other items of program, proceeds for Red Cross Work. Don't forget the date, Nov. 28th.

Word was received yesterday that Mr. Wm. Hassel, for the past three or four years operator at Harriston, is to succeed G. T. R. Agent Clancy here. Jim leaves for Walkerton Monday.

CARGILL

Corp. James Hamilton of London, spent a few days here last week.

Mrs Geo. Colwell left on Monday on a visit to her parents in Exeter.

Miss Mary O'Connell is on an extended visit with friends in Guelph and Brantford.

Miss Gertrude Kenny left for Guelph on Tuesday where she intends training for a nurse in St. Joseph's Hospital.

Mr James O'Donnell returned to Stratford on Monday after a two week's visit with his sister, Mrs. Jno. Clancy.

Mrs. Monahan spent a few days last week in Paisley with her daughter, Mrs. Bailey.

On Friday the sad news reached here that Lieut. S. L. Young, son of Mr. and Mrs. Henry Young, east of the village had been killed in action. Les, as he was best known, attended Walkerton High School and then entered the law office of W. T. McMullen in Woodstock where he gave every indication of a promising debater. Enlisting with the 71st Batt. under Lt-Col. Sutherland, he shortly obtained his Commission as Lieut. and was stationed in Galt last winter with C. Co. Ptes. Laughleen, Thompson, Spalding and Sawyer of this village were under his command. No particulars have been received as yet but are expected shortly. Letters of condolence have been received from the Duke and Duchess of Devonshire, Premier Borden and others and we extend our deepest sympathy to the family in the loss of their son whose career was most promising.

On Monday evening just before the late train was due, a large number of the business men and citizens of the village journeyed to the station and gave Agent Clancy a real surprise. Immediately on their arrival Mr. W. D. Cargill M. L. A., was voted to the chair and told the object of their gathering. He read an address to Jim Clancy and Mr. Geo. Sitts presented him with a purse of gold, after which the recipient replied, thanking them for the many kindnesses shown him during his term of nine years as agent in his home town. Speeches were given by Messrs Sitts, Ziegler, Fowler, Kyle, Saunders, Schuett and Dr. Bricker, after which all joined in singing "For He's a Jolly Good Fellow." Mr. Clancy leaves the end of this week for his new duties at Walkerton and carries with him our best wishes for every success in the County Town.

OTTER CREEK

An item that appeared in this column last week in regard to a certain party buying a piano is, we learn, not correct.

Mr. Henry Kirstine of Brant was a visitor at Mr. Wm. Polfuss'.

Mr. and Mrs John Hickling were visitors in Elmwood.

Mr. Wm Klein of Mildmay was a visitor at Mr. Henry Steinhagen's.

Mrs. Chas. Wickle of Mildmay was a visitor at Mr. John Fenner's.

Miss Kate Griess returned home from a month's visit at Cedar Creek, Paris, Ayr and Blair.

Miss Mary Bell was a visitor at Mr. John Hogg's.

Everybody come to the box social at Hogg's school on Nov. 24th.

Miss Clara Stemler of Mildmay was a visitor on the fourteenth.

Mr. Thomas Hutton was business visitor in Mildmay.

Misses Susie and Jennie and Mr. John Bell attended the Turnbull— wedding in Walkerton on Wednesday.

MILDMAY

Mr. Ed. Wittich, general merchant of Wallaceburg, was visiting friends here last week.

Mrs. C. E. Anderson and daughter, who have been spending a couple of weeks with Mrs. J. S. Milne, left last week for New York to take passage to England. Mrs. Anderson's son, Milne is in the trenches in France.

Pte. Chas. Gowdy's many friends here will be pleased to learn that he has been pronounced sound again after his recent injury.

Mr. Chas. Wendt made a business trip to Toronto last week.

Miss Emma Farstill intends leaving shortly to spend the winter with relatives in Chicago.

The many friends of Mr. Jacob Fink, will be very sorry to hear that he is very ill, and very slight hopes are held out for his recovery.

Postmaster Kraemer has received notice from the Army Post Office, London, Eng. that they are holding a parcel containing a pair of socks addressed to Pte. Leonard, formerly of Carrick, who was killed in action, and are awaiting instructions from the Knitting Club as to what to do with it. This is another instance showing how carefully the Post Office Authorities see that the parcels reach their correct destination.

Dr. R. E. Clapp is receiving the congratulations of his very many friends here on appointment to the offices of Surrogate Court Clerk, Registrar of the High Court, and Clerk of the County Court of the County of Bruce. Dr. Clapp located in Mildmay in 1879 and has practised his profession here for 37 years, and he has hosts of warm friends who will regret to hear that he is now giving up his practice.

A Box Social in aid of the Red Cross fund will be held in Public School, No. 3, Carrick, on Friday evening Nov 24th. A good evenings entertainment is being provided.

A quiet wedding was solemnized at the home of Mrs. Mary Voigt at Mildmay last Wednesday afternoon, when her second daughter, Miss Martha, was united in matrimony to Mr. Anson Ankerman of Chesley. The ceremony was conducted by Rev. S. M. Hauck of Chesley in the presence of only a few immediate friends. Mr. and Mrs. Ankerman will reside in Chesley.

HANOVER

The death occurred at Cottage Hospital, Toronto, of Margaret Esther Duncan, daughter of Mr. and Mrs. B. E. Duncan of Marshville, Ont., and granddaughter of Mr. and Mrs. James Crispin of the South Line. She was in her second year.

Mr Edward Knechtel, while cranking his big McLaughlin car recently, had his wrist dislocated by the engine back firing. His arm was badly wrenched and he will be deprived of the use of it for some time as a result of the accident.

The Amherst N. S. Daily News to hand reports a minstrel show put on in the Empress Theatre in Amherst by the 147th Minstrels. Lieutenant Juckech of Hanover contributed a solo and also took part in a quartette along with Lt.-Col. McFarland, Major Fleming and Major Dobie.

The 10th anniversity of the building of the Hanover Methodist church was celebrated by appropriate services and by an old-time tea meeting and program on Monday evening. Rev. F. E. Malott B. A., B. D., of Orillia preached both morning and evening on Sunday. The tea meeting was very largely attended. Tea was served from 6 to 8 eight o'clock at the conclusion of which Mr. Frost and his junior chorus made things lively. The feature of the evening's program was an address on "Canadian Citizenship" by Rev. Mr. Malott. Mrs. Armstrong and Mr. J. A. Magee gave a duet, Messrs. Frost and Magee and Misses Dorothy Armstrong and Anna Kuehner contributed a quartette. Mrs. Wm. Ruttle rendered two organ solos. Mr. John Mills and Mr. J. H. Adams read reports of the financial condition of the church. Mr. B. C. Brandon showed what the Epworth League are doing. Mr. S. Peppler read the report of the Sunday School, Mrs. John Bull the Women's Missionary Society and Mrs. W. Mendes the Ladies Aid. Rev. Mr. Jackson made a capital chairman. He made a most appropriate reference to the late H. H. Miller who was always interested in the work of the church, and who, had he lived, would have been one of the most interested attendants at the special services.

SOLWAY

When's that big concert to come off?

Miss Bess Craig is reported on the sick list this week.

Mr. Tony Kocher held an auction sale of his farmstock and implements on Wednesday last. Mr. David Coates proved an efficient and skilful auctioneer, auctioning all the goods in the best possible manner. Mr. Kocher will, in the near future move to his new home near Hepworth.

Threshing in the burg has finished for this year, the last barn being threshed a week ago Monday.

Mr. and Mrs. Oberle of Walkerton spent Sunday in the burg.

Mr. J. Craig came back to his old burg again but not to stay, only for a visit.

Miss E. V. Mitchell left on Wednesday last to take up a position in Toronto.

CHEPSTOW

Following a lengthy absence from the journalistic sphere, ye local reporter has done the come back stunt by resurrecting the editorial quill, and will continue to devote his superfluous energies once more to divulging to the outer world the current episodes connected with our metropolis.

Messrs. J. Wagner, J. Doerr and Ed. Graff, who participated in harvesting operations about Champion, Alta., during the past three months, returned home on Saturday. We understand the boys were favorably impressed with the opportunities of the West and may take up a permanent abode in the Chinook province.

Pte. J. Murray, who is at present attached to the Lambton Battalion, wintering at London, spent the week-end at his home. Jim expresses deep disappointment at his failure to qualify for the coveted journey overseas.

Mr. Malcolm McKinnon of Detroit is spending a few days with his mother.

Messrs. A. Fritz and A. Karcpher left on Monday for Trout Creek where they will be employed in Senator Donnelly's lumber camp during the coming winter.

Mr. R. Clancy who spent the past three months at different points in the West attending business interests, returned home last week.

Mr. Harry Klein, formerly wine clerk at the Market Hotel, Kitchener, is on a few weeks' visit to his mother. Harry's profession has been unusually hard hit through the enactment of prohibition and we understand he is contemplating turning his efforts into a new channel shortly.

We observe that the failure of the Greenock Council to pass upon the Red Cross grant proposed at a meeting of the ratepayers here recently, has evinced widespread criticism throughout the county. It is hoped that the members will redeem their prestige by a prompt sanctioning of the measure and avoid the township becoming the object of finger-pointing as others have become, through their small-heartedness along patriotic lines.

Wonder where all our boys spend Sunday nights. Has the home product lost all its attractiveness?

BORN—On Thursday, Nov. 16th, to Mr. and Mrs. Jos. Zettel, a son.

EDEN GROVE

The young winter caught the little boy with his bells and the big boy with his Belle all right.

Everybody had a good time at the Box Social at Dunkeld, Friday night, enjoying the first sleigh ride of the season besides the excellent program.

Mrs. Allen and Mrs. Fair visited friends in Cargill, Monday.

The death of Lieutenant Leslie Young on the Battle Field caused a deep gloom over our village Saturday, the brave young soldier having at one time attended our Public School was well-known and a general favorite with his many friends in this locality. The school flag was ordered half mast in respect to our hero and former schoolmate. The bereaved family have the sincerest sympathy of the whole community in their sorrow and bereavement.

Mr. Desmond shipped another car of wheat this week.

Rev. and Mrs. Almack of Cargill were the guests of Mr. and Mrs. J. Seiler, King St. East, last week.

Run away last Friday—Mr. Desmond's team walked away, one of our young gentlemen happened along climbing on the sleigh when moving at two miles an hour, stopped them before any serious damage was done.

Miss Myrtle Elder of Cargill is the guest of friends in town.

Church Service, Sunday, S.S. 10 a.m. Service 11 a.m. There is still room for you.

Mr. and Mrs. H. Pearson, of Quality Hill were At Home to a number of gentlemen friends of Mr. James Clancy, Cargill, Thursday evening, prior to his leaving for his new home in Walkerton. A very pleasant evening was enjoyed by all in games, etc. A dainty luncheon was served by the hostess after which congratulations and the good wishes of all present were tendered the honored guest who made a suitable reply, thanking his friends in the Grove for the many delightful evenings he had enjoyed in their company when their next door neighbor, and although like the Lark going a little farther south for the winter, hoped to often meet his old friends in the future.

Just six more weeks, Girls, and Leap Year will be gone. Better make hay while the sun shines.

Miss Gallinger was the guest of Walkerton friends last week.

Times have changed. It used to be the children would sit and listen to mother and father discuss the sermon or Mrs. So and So's new hat, but now it's parents greet the kids with "Well Johnny, who was out to church this fine morning?"

Mr. and Mrs. R. Ferdun spent Sunday at the home of Mr. Emery, Quality Hill.

Miss Jessie Alexander is visiting Walkerton friends this week.

Mrs. Burns, Dunkeld, is the guest of her daughter, Mrs. Cassidy, for a few days.

WESTFORD

Mr. Roy Waldenby has returned to his home after spending a couple of months in the West.

Mrs. D. Murray and Miss Bessie Murray visited friends in Chepstow on Sunday.

Miss Maude McGlynn of Detroit is visiting her brother Mr. J. McGlynn.

Mr. James Murray and Mr. Campbell visited at Mr. Duncan Campbell's one evening last week.

Mr. Albert Dietrich visited at Mr. Louis Reith's on Tuesday evening.

Wedding bells are again ringing in our burg.

Quite a number from here attended the ball at Kinlough on Friday night and all reported a good time.

MAPLE HILL

SCHOOL REPORT

Sr. 4—George Pinkney, Layton Glauser.

Jr. 4.—Pearl Sockel, Cragie Leach, Wilmer Glauser, Ruby McNaughton, Percy McNaughton.

Sr. 3.-Allan Borrell, Lavern Brockelbank, Reuben Hatnock, Mayme Pinkney.

Jr. 3.-Grace Leach, Anna Schilling.

Sr. 2.—Douglas Walker, Graham Pinkney.

Sr. Pt.-Laureen Schilling, Gertrude Hatnock, Audrey Pinkney.

Jr. Pt.—Orrell Pfohl.

(c) Pt.—Emma Fisk, Margaret Fisk.

Ella Teeple,
Teacher.

FORMOSA

The death occurred at his home two miles and a half south of this village, on Thursday, of Joseph Meyer, the well-known thresher. Mr. Meyer had his foot hurt while threshing a couple of months ago and other complaints developing, his condition became gradually worse, until the end came. Mr Meyer was in his fifty-ninth year and leaves to mourn, besides his widow, a family of eleven children, four brothers and one sister. His aged mother is still living, making her home in the village. The funeral took place on Saturday at Formosa.

The matter of settling with the Mildmay firemen for their services in assisting at the Church fire has not yet been adjusted.

The repairs to the Church have been completed with the exception of the top of the tower, which will be left over until spring.

Dr. Kirby of Toronto has taken over Dr. McCue's practice here. The Doctor comes highly recommended. He is not a stranger here, having practised medicine at Chepstow a few years ago.

FOR SALE

Forty-eight acres of good land and buildings, three miles from Walkerton. Apply to F. J. Allardyce, Cargill P. O. 43—15

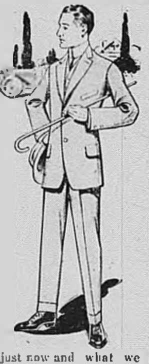
NOTICE

In The Surrogate Court Of The County Of Bruce. In The Matter Of The Guardianship Of The Infant Children Of David Albert Allardyce Deceased.

TAKE NOTICE that I, the undersigned Frederick John Allardyce of the Township of Greenock in the County of Bruce, Yeoman, will after the expiration of twenty days from the publication of this notice apply to the Surrogate Court of the County of Bruce to be appointed Guardian of the person and estate of Albert Edward Allardyce, Emma Victoria Allardyce and John Henry Allardyce, the infant children of the above named David Allardyce.

Dated this fifteenth day of November, A. D. 1916.

Frederick John Allardyce
Per Robertson & McNab,
His Solicitors.



Men's Clothes

When we say Men's Clothes we include, of course, Suits and Overcoats for young men and boys and what we have to say concerns them all.

Everybody knows that the prices for woollens have increased tremendously and as in every other case when prices advance the demand increases because everybody wants to buy at or as near to the old price as possible.

There is a big demand for Suits and Overcoats just now and what we want to emphasize as strongly as possible is—if you need anything in clothes—buy soon.

Men's Overcoats $7.50 to $18.00
Youths' " $5.00 to $8.50
Boys' " $3.50 to $5.00

Classy Sweater Coats

A feature of our showing of Sweater Coats for men and boys is the choice variety of colorings and fast colors too. They come in the best qualities, made from finest quality yarns, knitted soft and elastic, perfectly finished and made to fit.

From $1.75 to $5.00

A Good Collector

A local coal dealer started in on Tuesday to "beat up" a customer who was leaving town and owed him for coal. After he had paid $1 and costs for the privilege, he turned around and proceeded to lay a charge against Mr. Customer of using grossly insulting language. The Accused succeeded in having proceedings stayed on this charge by paying for his "black diamonds."

+ + +

A Legal Fight

Serious trouble has brewed between two Greenock farmers. Michael Diebold had a bag of clover seed taken from his premises. He got a search warrant to search the premises of his neighbour, Joseph Doyle. The search is said to have been fruitless, and Doyle is now suing Diebold in the High Court for malicious prosecution.

+ + +

Municipal Pot

The Municipal race already is taking some strange twists and there is no telling what turn the situation may yet take before Election Day. The prospects all along have been that Warden McNab and A. P. Johnston would be the two aspirants for the Mayoralty. We now understand that Mr. McNab will not be a candidate. The fact that Hydro is to be a big issue, and that the popular Warden would be accused at least of having his hands tied on this issue through his business association, is the probable reason for his decision.

+ + +

Red Cross Reorganizes

The local branch of the Red Cross Society met for reorganization at the Town Hall on Friday evening, Mayor Lippert in the chair. It was decided that $900 of funds on hand be forwarded to the Provincial Treasurer. Officers were elected as follows:—President, Mayor Lippert; Secretary, C. W. Cryderman; Treas., W. A. Burrows, Mgr. Merchants Bank. Executive:—Rev. Wilson, Rev. Cosens, Rev. Grenzenbach, Rev. Perdue, Father Cummings, M. J. Ramsay, Jno. Rowland, Thos. Pye, Jas. Whitehead, S. W. Vogan, A. Johnston, A. Wesley, L. Eedy, A. Sieveright, L. C. Benton, Dr. Sinclair, Dr. Stalker, Dr. Potter, Dr. Farewell, Judge Klein, Judge Greig, W. Shaw, D. Robertson, O. E. Klein, Jos. Morgan, H. M. Lay, Mrs. Skelton, Mrs. Ramsay, Jas. Warren, Miss Truax, Mr. McBurney, H. G. Hunter, Miss Rowland and Miss Benton together with officers of I. O. D. E. Daughters of Empire. The Executive will meet in the Council Chamber Friday evening.

TELESCOPE LETTER BOX

LETTER FROM MAYOR LIPPERT

Editor Telescope,
Walkerton

Dear Sir:—

In your last week's issue, there appears an article in which you set forth that at my last election I made certain pledges with regard to Hydro Electric and that these have not been redeemed by me and as this is a live issue with the ratepayers, I feel it my duty to set forth briefly what has been done during the past year towards endeavoring to bring this matter before the Electors and let your readers decide whether faith has been broken or not.

In the first place I wish to point out that I made no such pledges last Election as you claim in your article. I simply stated that I would endeavor during the coming year to give the ratepayers an opportunity to vote on Hydro. I did not make any solemn pledge that I am aware of.

Further the facts are as follows—In February last shortly after my Election I waited upon the Hydro Electric Commission in Toronto and was told that nothing could be done in the winter time but that when Spring opened up they would take the matter up, and that the Council could in the meantime pass a motion that was handed me, requesting the Hydro Commission to act. This motion was taken up by me with the Council and a motion was passed at the April meeting asking for figures for the delivery of 150 H. P. for the Town of Walkerton, and a copy of this was forwarded to the Commission. A reply was received acknowledging its receipt but that they were busy at the time on some proposition down East and that they would give our case consideration as soon as they possibly could, that there was a great deal of work to be done and that they were short of Engineers.

At the June meeting of Council nothing further having been heard from the Commission, the Clerk was instructed to write, and did write, and I also wrote at the same time asking about the delay. No reply was received at the July meeting and the Clerk was again instructed to write and I was afterwards advised by Mr. Gaby that they received both letters.

On the 11th of August I went to Toronto and interviewed the Commission and particularly saw Mr. Gaby the chief Engineer, he again referred to the great amount of work to be done in other places but promised to send up Mr. James to take up the Walkerton proposition.

Mr. James did come to Walkerton on Sept. 13th, but had not time to go fully into the matter but promised to send up his engineers and promised to have a full report including figures, etc., for the October meeting of Council and asked to have an additional resolution passed by the Council which was done at a special meeting held the following week. Mr. James appeared at the October meeting but did not have any figures as he had been unable at that time to have his engineers go over the ground. He gave a general outline of the scheme and promised to have the figures for the Council at its November meeting, he also stated to the Council that it was not absolutely necessary to have the figures, that the Council could in the meantime go on with passing what is called the Enabling By-law without them. As the figures were not coming in, shortly before the November meeting of Council I telephoned him and he said the proposition was considerably larger than he thought, that they were short of engineers and that he was doing his best and he would get them in as soon as he possibly could, that he would have them in time to be voted on.

The figures were not in at the November meeting and the Clerk was instructed to write the Commission about the delay in forwarding the figures, I also telephoned Mr. James the day following the meeting. He stated that the figures were complete but would first have to be sanctioned by the Commission before being sent out. He stated that the Commission would be busy the following week with delegations about Hydro matters and that he did not think that they would deal with it until the week following. I asked him to send me the latest form of the Enabling By-law, which he did. I then called a special meeting of the Council which was held on Friday evening last and the "Enabling By-law" was passed. I am assured by Mr. James that the figures will be here in sufficient time to give them due publicity for the election.

Now, Mr. Editor, even if I had given the "Solemn Pledge" you speak of in your editorial, I don't see what more I could have done or you could have expected me to do to fulfil that pledge, whether you had any sinister object or not in view.

Your editorial is all the more remarkable in view of the fact that before its issue I had communicated to you personally in the main, the above facts trusting that you will give this letter the same publicity that you gave your editorial.

I am Sir, Yours truly,
Fred W. Lippert,
Mayor.

+ + +

The Telescope in said effect last week:—

(1) Mayor Lippert solemnly pledged himself if re-elected last January to give the people an opportunity to vote on Hydro.

(2) The year is almost gone and the Citizens have nothing yet put before them.

(3) If the Council does not take action AT ONCE, it will be too late to submit a by-law at the January elections.

Everybody knows that the above statements are the plain facts. Mayor Lippert objects that he gave no "solemn pledge". We do not wish to quibble. If the words that Mayor Lippert says himself that he used, uttered by a candidate for re-election upon the public platform, do not constitute a "solemn pledge," what do they constitute?

In view of the fact that this important matter had dragged along all year with nothing apparently accomplished, and that it was NOW or NEVER so far as the 1916 Council was concerned, we believed, and still thoroughly believe, that the Telescope would have been failing in its plain duty as a newspaper if we had neglected to use our very last opportunity to put the matter up to the Council, before it might be too late. The day before going to press, we called Mayor Lippert up on the phone and asked him what about Hydro. He replied that no estimates had been received from the Hydro Commission, that he was going to phone Engineer James the following day, and call a special Council meeting later, but not to use that information in the paper. Was the Telescope to take the view that the Hydro By-law was practically signed, sealed and delivered, and "can" its editorial as a result of the vague assurance received over the phone?

We are glad to have Mayor Lippert use these columns to review the various steps leading up to the submitting of the Hydro Enabling By-law but our good friend's objections to the Telescope's editorial prove on examination to amount to nothing.

We are glad indeed that the Council did take decisive action two days following the publication of our editorial and we heartily congratulate Mayor Lippert on accomplishing what he undertook to do. From the way the way the Mayor and Council have taken hold, we have reason to believe that they will not leave the Hydro By-law like a deserted infant on the Town's doorstep but will see to it that the citizens have all the facts clearly presented to them so that they will be able to vote intelligently on the Hydro Enabling By-law.—EDITOR TELESCOPE.

A Good Prize List

The prize list of the Christmas Fair has been revised and enlarged, the prizes in the animal classes being increased, and a number of prizes added for dairy produce. The directors have arranged for abundant accomodation for the exhibits which will have more space than in former years.

+ + +

Quiet In Brant

The prospects are that there will be no municipal contest in Brant for the coming year. The people are apparently well satisfied with Reeve Spence Nesbitt and the present Council. No big issues have been up during the past years, but the Council has conducted the routine work with good judgment and has seen to it that all the various divisions have had their fair share of road work. "Where would you get a better Council if you hand-picked the township?" is the way a North Brant farmer, who was questioned by the Telescope, put it. "No need for an election contest" seems to be the general feeling throughout Brant.

+ + +

Back From The West

Mr. Duncan McKerracher arrived home on Saturday night from Eyebrow Sask., where he had been looking after, the harvesting on his farm. Mr. McKerracher says they had about a two thirds crop in that section. The early sown wheat on high land was excellent, but the later sown crops were badly struck with rust, making very low grades and some feeds. October weather was exceptionally disappointing. From Sept. 26th to the end of October, there were only five good days for threshing. A good deal of threshing has been in November. Around Medicine Hat and throughout Southern Alberta, Mr. McKerracher found crops excellent. In the towns business shows improvement over last year. Prohibition has made a great hit throughout the West, and even the dispensaries will be voted out in Saskatchewan at New Years. Business men told Mr. McKerracher, they were sorry they did not have Prohibition years ago.

Life-buoy snag proof rubbers wear longer than any others. Sold at Ramsey's Shoe Store.

Misses Joseph and Irene Meir of West Branch Mich. are visiting at the home of Mr. George Eanewein.

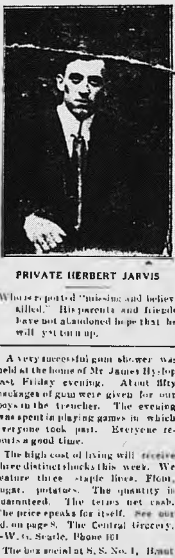
Mr. James White has returned home from an extended visit to his daughter, Mrs. Geo. Hodgins, at Mount Dennis, near Toronto.

The Methodist Church remembered their boys at the Front by sending a Christmas box to eighteen soldiers, valued at twenty-five dollars.

Mr. W. A. Burrows, the new manager of the Merchants Bank, has rented Mr. Ed. Connor's residence on Colborne St., which was recently vacated by Mrs. K. M. Taylor and family.

Rev. Thos. Wilson will give his illustrated Lecture on the Work of John G. Paton among the Cannibals of the South Sea Islands, to the young people of the Bervie Methodist Circuit, next Monday evening Dec. 4th.

Walkerton Soldier Boy



PRIVATE HERBERT JARVIS

Who is reported "missing and believed killed." His parents and friends have not abandoned hope that he will yet turn up.

A very successful gum shower was held at the home of Mr. James Hyslop last Friday evening. About fifty packages of gum were given for our boys in the trenches. The evening was spent in playing games in which everyone took part. Everyone reports a good time.

The high cost of living will receive three distinct shocks this week. We feature three staple lines. Flour, sugar, potatoes. The quantity is guaranteed. The terms net cash. The price speaks for itself. See our ad. on page 8. The Central Grocery.—W. G. Searle, Phone 161.

The box social at S. S. No. 1, Brant and Greenock, the Dunkeld School, on Friday evening of last week, was a genuine success. The total proceeds amounted to $88.65, of which about $80 will be paid to the Red Cross Fund. The Chairman of the evening was Mr. W. D. Cargill, and the auctioneer, Mr. Wes. Abell.

The Presbytery of Bruce will meet in Knox Church, Paisley, on Tuesday Dec. 5th. One item of business will be the resignation of Rev. Mr. Leslie, who has been pastor of Malcolm, Bentick and Crawford Congregations for sixteen years. Mr. Leslie intends retiring from the active work of ministry, leave being granted by the last assembly on account of infirmity.

(Capt.) Dr. Minifie of London, Eng., who spoke in behalf of the Belgium Relief Fund in the local churches two weeks ago, will speak in Knox Church on Sunday morning next under the auspices of the Canadian Brotherhood. Dr. Minifie will also deliver a lecture in the Town Hall on Monday evening on the subject "With the British Fighting Forces in Camp and Field" illustrated with war pictures, exhibited by special permission of the British Government. Admission fee 25c and 15c. On Tuesday he will speak in Movieland theatre, when three reels of moving pictures on the work in Belgium will be shown. The admission to Movieland will be 10c, all of the proceeds to go to the Relief Fund.

News About Town on page 5.

County Council meets next Monday.

Mrs. H. G. Hunter is visiting friends in Toronto.

Irwin Bros. arrived home from the West on Friday.

Mr. and Mrs. Taylor of Chicago are renewing acquaintances in town.

Don't forget Patterson Bros' Special Ten Days' Sale of Stoves and Ranges.

For the best farm shoes made of solid leather to stand hard wear, go to Ramsey's Shoe Store.

Life-buoy rubbers are made with leather inner heels and counters. Sold at Ramsey's Shoe Store.

Mrs. R. B. Ferguson and little granddaughter, Irene Ferguson are spending this week in Stratford.

Mr. Ed. Kelly has bought Mr. Chris. Kolpin's house and four acres, south of the Biscuit Factory, for $1050.

A contest in Carrick is altogether probable at the coming Municipal Elections. We understand that Mr. Con. Schmidt, a former councillor, will oppose the present Reeve.

Mr. and Mrs. R. B. Ferguson and little granddaughter, Irene, are attending graduation exercises at Stratford Hospital, where Miss Annie Ferguson is to be presented with her diploma as graduate nurse.

Mr. Joseph Murray, a well-known Culross farmer, was operated upon for a bad case of appendicitis at the County Hospital on Monday afternoon by Dr. Hall, assisted by Dr. Porter and Dr. Taylor of Hanover.

Mr. W. M. White left for Toronto on Tuesday to take a position for the next four months with the Willys Overland Motor Co. He intends returning to Walkerton and reopening his repair shop in the spring.

Ours may not be the only one best store in town and yet we are offering very attractive values in many different lines in our Grocery and Chinaware departments. Come in and look around and prove our statements. The Central Grocery.—W. G. Searle, Phone 161.

A fourteen-year old boy was brought here last week from Lucknow and committed to the St. John's Industrial School, East Toronto, where he had been a ward before. For the last year he had been working for a farmer, who lately got him a position at a Lucknow store. He was committed on a charge of tapping the till of his last employer.

+ + +

Drafts For Overseas

A despatch from Ottawa on Saturday to the Toronto dailies stated that the Government has definitely abandoned the old system of sending battalions overseas. Drafts will hereafter be sent over as reinforcements and a one of the Battalions already partially recruited will be broken up into drafts.

+ + +

A Serious Charge

Tony Zuber, a West Ward teamster was sent up for trial by Magistrate Tolton on Tuesday, charged with sending a threatening letter to an old and highly respected professional man of town. In the letter which was vagely worded, Zuber said he wanted him to come down to his place at once and "settle". The professional man immediately placed the matter in the hands of Chief Ferguson, who called on Zuber. Zuber said the professional man had taken liberties with his housekeeper and it was up to him to "settle." A charge was immediately laid against Zuber before Police Magistrate Tolton, who on hearing the evidence on Tuesday, decided to send Zuber up for trial before the Judge. In the meantime he was released on $400 bail.

+ + +

Sad News Confirmed

Mr. Henry Young of Cargill received a further telegram from Ottawa on Friday, confirming earlier word that his son, Lieut. Leslie Young had fallen in battle. The wire stated that he was killed instantly on November 11th. Since the first news arrived several letters from "Les." have been received by his parents and by Mrs. E. J. Skelton of Walkerton. He stated that owing to his Capt. being wounded, he had the responsibility on the 3rd inst., of leading his Company into the trenches, and referred to the responsibility he felt for the lives of those 150 men. Fortunately he was able to bring them out again safe on that occasion. One of the men of his Company writing home states that his men thought so much of their gallant young officer that they would "go through Hell for him."

Box Social At Malcolm

A Box Social in aid of the Red Cross will be given at Malcolm Schoolhouse on Friday night, Dec. 1. Admission 15c, ladies bringing boxes free. A good program has been arranged and a good time expected. Everybody invited.

+ + +

Get A Catalogue

If you wish to become a Book-keeper, Stenographer, or Telegraph Operator get the free Catalogue of Stratford Business College, the school which places graduates in splendid positions.

+ + +

Removing To Toronto

Mr. and Mrs. Samuel Truax, who have made their home in Walkerton upwards of forty years, are leaving to make their home in Toronto, where Mr. Truax is going into the flour and feed business. The departure of these estimable citizens is regretted by their many old friends in the town.

+ + +

Arrested A Deserter

County Constable E. Briggs went to Port Elgin on Saturday and arrested a young soldier, named George Welch, who is charged with deserting his battalion at London shortly before it left for Overseas. Welch was lodged in the County Gaol, awaiting the arrival of an officer to take him back to London.

+ + +

Fell Out Of Window

Master John Lay, four year old son of Mr. and Mrs. H. M. Lay had an experience yesterday which he will not likely forget if he lives to be a hundred. John was leaning out of the bath room window when he lost his balance and fell out head-first. He landed head-foremost on the wooden step about fifteen feet below. For a wonder the little chap escaped with some bad bruises.

+ + +

County Debentures Sold

The tenders for the balance of the Bruce County Patriotic debentures amounting to $12,000, which remained on hand after the issue of $90,000 in debentures by the County last year, were opened at the clerk's office here on Tuesday. There were fifteen tenders in all, all but one being above par. The highest, which was accepted, was $12,110. These bonds bear 5½% interest.

+ + +

Moving To Toronto

Mrs. Forbes Clarke and family are moving to Toronto this week where they will make their home in the future. That they will be greatly missed in Walkerton goes without saying. Their departure will leave a vacancy in Knox Church and in their large circle of friends that will be not easily filled. Capt. Ross Clarke, who had looked forward to going overseas as a Company Commander of the 160th, but was stopped at the final medical examination, is, we understand, taking a partnership in his brother's job printing business at Toronto.

+ + +

Further News Received

Mr. Adam Reid had a further telegram from Ottawa on Tuesday, regarding his son, Lieut. A. E. Reid, D. S. O., who was reported missing last month and later reported killed. Tuesday's wire stated that the first telegram was correct in stating that Lieut. Reid was missing but that the second wire was incorrect. This means that the authorities do not know whether or not the young officer met his death in the gallant action for which he was awarded the D.S.O. and his parents are hoping that further and more assuring news may come later on.

+ + +

Daughters Of The Empire

The Daughters of the Empire, at their regular monthly meeting held last week, voted $100 for Y. M. C. A. military work. Plans were discussed for a huge carnival to be held when the weather conditions are favourable. A photograph of the Boys of the 160th Battalion, taken just before they left London for Halifax, has been bought by the Chapter and will be framed and hung in the Armouries. The Daughters of the Empire are very grateful to all who so generously contributed to the shower of jam, pickles and honey for the Soldiers' Convalescent home in Toronto. In all, two hundred and nineteen jars were received.

+ + +

Brant Preparedness League

The Brant Township branch of the Bruce Preparedness League met for business Tuesday night, President Frank Hennie in the chair. All of the nine sub-divisions of the Township were represented. The meeting decided to get 500 of the membership buttons to be sold at probably 25cents each. It was felt that every man, woman and child in the Township should belong to the League. The purchase of a large quantity of yarn to encourage knitting for the soldiers was discussed. Secretary James A. Lamb was instructed to send letters of condolence to Mr. and Mrs. P. McGarity and Mr. and Mrs. H. Young, whose sons have fallen on the Battlefield.

WILL VOTE ON HYDRO

Mayor Lippert Called Special Council Meeting on Friday Night and Arranged to Submit Hydro Enabling By-law at Municipal Elections.

Walkerton will vote on hydro at New Years. Mayor Lippert called a special meeting of the Council on Friday evening and presented for their consideration an Enabling By-law to be voted upon at the Municipal Elections. The Council decided unanimously to give the people a chance to vote on the question: "Are you in favor of obtaining from the Hydro Electric Power Commission of Ontario a supply of electric power?"

Mayor Lippert stated that the estimates of the cost of his installing hydro in Walkerton had not yet arrived, but that Engineer James had assured him over the phone that they were ready, and would come up before the Commission meeting next week to be formally approved. Full information would be available in a short time.

The present vote simply takes a census of public opinion. If the ratepayers vote favourably, a second by-law will have to be submitted to a vote later on, providing the necessary money.

Couns. Douglas and Arscott moved that the By-law be given the necessary readings, which was done by a unanimous vote of the Council, all the members of Council being present except Coun. Pletsch.

Soldiers' Aid

The Soldiers' Aid will open their their new tea room on Wednesday, Dec. 6th. in the rooms formerly occupied by Mrs. Gardiner.

Injured In Runaway

Mr. Andrew Hundt of the 14th con. Carrick, was badly injured last Thursday while bringing a gang plow in from the field on a stone-boat. The team ran away and upset the load. Mr. Hundt was knocked senseless by a blow from the plough, and when he was picked up, it was found that his left shoulder had been dislocated, his forehead cut and his left thigh badly scraped, besides receiving a bad shaking up. Mr. Hundt is doing as well as can be expected.

Died At Gaol

An Indian named Paul Williams was brought down from Cape Croker on Thursday last to serve 30 days in the County Gaol on a vagrancy charge. Williams had been wandering around in a somewhat helpless condition and it was thought that the gaol was the best place for him over winter. The next day after arriving here, he appeared to be quite sick. The doctor was summoned and found him in a bad condition with heart trouble. He passed away early Sunday. Williams was 61 years of age and unmarried. Dr. Porter, Coroner, held an inquest over the remains, the jury bringing a verdict of death from heart trouble.

Visitor From Northern Ontario

Mrs. Walter Kirstine of Matheson, who is visiting her brother, Mr. John T. Lamb, and other relatives around Walkerton is one of those who narrowly escaped with their lives in the great forest fire last summer. Mrs. Kirstine says the country is rapidly recovering from the effects of the big conflagration and will, it is expected, go ahead more rapidly than ever. A number of big companies have been buying up large areas that have been fire swept and many new settlers are coming in. Although their loss has been most discouraging, the settlers up there are not the class of people who give in easily and they are showing the good stuff they are made of. There is considerable dissatisfaction though that the promises made by government officials at the time of the fire, to induce the settlers to return to their land, have not been carried out.

BORN

MORGAN—At the County Hospital, on November 28th, to Mr. and Mrs. Wm. Morgan of Brant, a son.

CARD OF THANKS

Allow us to express our heartfelt thanks to many friends in different parts of the Province, who knew our son Leslie, for their comforting expressions of sympathy in our hour of severe feeling.

Mr. and Mrs Henry Young.

Walkerton Markets

(Revised Wednesday, Nov. 29)

Hay, per ton,	8.00 to	10.00
Oats, per bsh,	65 to	65

Buckwheat "	1.00 to	1.00
Potatoes, per bag,	1.75 to	1.80
Hogs, per cwt,	10.15 to	10.15
Butter, per lb,	38 to	38
Eggs, per doz,	40 to	40

ISSUE NO. 47, 1916

CURRENT COMMENT

A St. John newspaper states that ever since Italy entered the war there has been a steady stream of Italians leaving New Brunswick points on their way to join the ranks of the army. They are going voluntarily.

The Buffalo News says that it is reported that 750,000 sides of sole leather have been sold in the States to Russia, representing a cash value of over $7,000,000. That means an increase in the price of shoes and that Russia intends to continue the fight until victory is won.

New York has a new cab company with 50 new taxicabs, which can be hired for 20 cents the first third of a mile and 10 cents for each succeeding third, or in other words 40 cents for the first mile and 30 cents for each succeeding mile, regardless of the number of passengers. This is below the regular tariff; yet it says it will lower the fare as business increases. And it is doing a big business.

Paderewski, the musical genius, is a Pole, and has interested himself in the welfare of Poland since ever the war began. But he sees no freedom for her in the independence plan proposed by Germany and Austria. "This re-establishing of the Kingdom of Poland," he says, "means only more trouble for my people. It means that another army will be raised, and that there will be more killing and devastating."

Another reason for the high cost of living may be the increased receipts from customs taxation. This year this taxation will be some [illegible] millions larger than it was last year. This money comes out of the pockets of the people.

According to U.S. census of 1912, corrected by the immigration statistics for subsequent years, there are 16,500,000 foreign born residents of the United States, of whom not more than 3,500,000 have been naturalized. This is a large body of people who own allegiance to foreign governments. Most of these speak a foreign language. This is not a pleasant state of affairs for the native American to contemplate.

THE WAR OF WORDS.

Yesterday Bethmann-Hollweg, the German Chancellor, made a speech in which he threw the blame for the war on Sir Edward Grey, the British Foreign Secretary, and declared that Germany was fighting a defensive war against the allies, which seek to crush her. He stated that Britain's desire to destroy her was destined to fail "before our will to live." Of course, [illegible] well enough that the Chancellor knows [illegible] nobody desires to prevent Germany from living. This is only his way of trying to convince the German people that Britain is seeking their destruction. The Kaiser is now on trial, and the circumstances are all against him. The loss of the war would mean his overthrow and the blasting of his hopes to place his foot upon the neck of Europe and rule it with his mailed fist. The German people would live and live more freely were the Hohenzollerns banished from the country. In the meantime the Chancellor feeds the people with lies so as to keep them in hand. Bethmann-Hollweg may boast as he pleases, but the war map is not as satisfactory as it was to the Germans. Verdun was a bad black eye to them, and the retreat in the Dobrudja is another disappointment.

While the Chancellor was thus sporting defence, Gen. Brusiloff was telling a newspaper correspondent that the war was won, and that it was merely speculation as to how much longer would be required before the enemy was convinced that the cause for the sake of which they have drenched Europe in blood was irretrievably lost. Brusiloff declared that the Germans had lost the initiative in Galicia and were now on the defensive.

Premier Asquith was also talking while Bethmann-Hollweg was delivering his speech. The Premier did not make a blood-thirsty speech. He was not clamoring for the life of Germany. He only stipulated that "Our peace must be such as will build up on sure and stable foundations the security of the weak, the liberties of Europe, and a free future for the world." This looks different. But it was exactly the attitude of Britain in this war. She seeks nothing for herself except that the sacrifices of the war should not be made in vain. Mr. Asquith drew attention to the fact that Germany had never accepted that she was prepared to concede anything to the demand of the allies for the reconstruction and independence of Serbia. Germany went to war with the avowed purpose of destroying Serbia, and she still entertains that purpose. The Premier had some warm words to say of Roumania, and declared that Britain wanted to save Greece from herself.

Sir Ernest Shackleton, the antarctic explorer, says that as soon as he rescues his companions marooned in the Ross Sea, he will return to England and enlist. "If the war is not ended when I get back," he said, "I propose to enlist and fight with the British. After the war I may embark again upon exploration tours and try once more to cross the south polar continent." Sir Ernest is no slacker.

Boil a clothesline and it will not kink like a new rope does.

HER HUMBLE LOVER

"Don't be an idiot," says her ladyship, with a grin. "Sit quiet and enjoy a concert for nothing and without the trouble of going to the theatre. Order my carriage! Certainly not! I am enjoying myself."

The song went on to its close, amidst, from this point, profound silence, then arose a murmur of well-bred surprise and excitement.

"Didn't know you'd got a professional," grunts the captain to the amazed and bewildered rector.

"A professional! My dear captain!" exclaims the rector, gasping in horror. "I—assure you; no, no, quite a mistake. Mr. Warren is a friend of Lord Delamere's; he brought a letter of introduction."

The captain shakes his head.

"I dont care about that. I say he's a professional. I don't care. it's nothing to me. I like it."

"But—but," stammers the rector; I think you are mistaken. A friend of Lord Delamere's——"

Signa sat beside the piano in the shadow thrown by the candle-screens, listening to the sweet voice with almost a heart-ache, so perfect was the pleasure, and it was with a smile of thanks that she looked up and greeted him as he left the piano and stood before her.

"Thank you," she says, with a little sigh. "It was all too short. What a wonderful voice you have! Do you know what they are saying?" and her eyes gleamed with amused curiosity.

"What?" he says, looking half over his shoulder at the little group whispering with their heads together.

"They are saying that you are an opera-singer. Is it true?"

He thinks for a moment.

"I wish I could say yes," he says, with a smile. "But it would be of no use. You would know better."

She nods.

"Yes; you sang beautifully, but not as a professional, who makes the most of his best notes. You wasted them."

He laughs.

"I suppose so," he says. "I sing almost entirely by ear, and very incorrectly, as a rule; but to-night I tried my best."

There was a significance in his tone that made Signa's eyes drop.

"How hot it is!" he says. "May we not go out on the verandah?" and he puts his hand on the window and opens it. "Will you not come outside for a breath of fresh air?" he pleads.

Signa hesitates a moment, then she glides out and stands beside him. Before them stretches the bay, with the silver river running down into the sea. There is no moon, but the sky is light, and here and again the stars shine faintly through the warm night. It is a lovely scene, and as Signa stands and looks at it, a vague feeling of peace and happiness steals over her. In her ears still rings the song of the Spanish lover; beside her stands the man [illegible]—who has shown her so much sympathy. It is a strange feeling that pervades her whole being; a feeling of half-fearful, half-painful delight, that she cannot define, and clings to almost desperately, lest it should fade and vanish if she were to ask the reason for its presence.

The soft summer night is a night for love; love's breath mingles in the warm, balmy breeze and floats upward from the lips of the sea; but Signa does not think of love; she is too happy with this vague happiness to think or to analyze.

And the man beside her?

He stands leaning against the back of a chair, which he has tilted to the upper angle, and his eyes are fixed, too, but not on the sea. They rest on a fairer picture even than that which lies below them—on a young girl's beautiful face, on a young girl's lithe, graceful figure. Never in all his life—and what a life it has been—has he who calls himself Hector Warren been moved by woman's loveliness as he has been moved by Signa's. It has struck home to him, when he had concluded that he had no heart to be struck at. The charm of her fresh young presence, her voice, the very sway and movement of her form, have sunk into his innermost soul, and he knows that the passion within him which burns to-night, at this moment, is the last love he will ever experience.

And yet he stands with a sad, almost a tragic shadow on his handsome face.

He longs with all the ardent desire of a nature little used to the check, to take her in his arms and whisper the fierce, hot words, "I love you!" And yet no! Not so would he woo her! Rather would he approach her as the sin-stained devotee creeps to the feet of his patron saint, and kissing the hem of the soft, filmy skirt, whisper, "Signa, look down at me. I am not—not worthy to touch you even as I do. But thou, pure saint, look down at me still. Pity me, for I love thee, and know myself unworthy. Love me a little, Signa, for sweet pity's sake."

This is his temptation, his desire, but he fights against it. His brows knit, his hands clutch the chair in a vise-like grasp.

"How lovely," murmurs Signa, "it is more beautiful now than at sunset. You would have seen the sunset from here—if you had come to dinner. Why did you not?"

He puts his hand to his brow as if to recall himself.

"Why," he says, with a grave smile. "You were not there—I mean—I beg your pardon"—for Signa has turned crimson and moved away slightly—"I beg your pardon! Forgive me, Miss Grenville. I—"

Signa laughs. She recovers herself in a moment.

"That was what Lady Rookwell would call a pretty speech," she says.

"I did not mean it as such," he says. "And I spoke the truth, though I did it rudely and abruptly. You have forgiven me? I did not come because—how let me be careful"—and he smiles—"because I knew that you did not mean to dine, and I felt that—I am going to be candid—that by some word or look I should resent your absence."

"That is rather a worse speech than the first one," says Signa, laughing, but with a strange feeling of delight fluttering like a bird in her bosom. "I must take care not to ask indiscreet questions for the future."

"You can ask none of me that I shall deem indiscreet," he says, bending near her that he may catch the play of the great gray eyes.

"Well, then, I will ask you to sing again?" she says, with a smile.

"We should lose this," he remonstrates, pointing to the scene.

But he moves toward the window, nevertheless, and opens it for her. As they re-enter the room Lady Rookwell was saying something in the epigrammatic way which seemed to afford her listeners—and they were all gathered round her—enjoyable shocks of horror or amazement.

"Oh, dear Lady Rookwell, it cannot be true?" Signa hears Mrs. Plumbe murmur, incredulously.

"But I tell you it is; it's all the talk of the town. Sir Frederic heard it at his club, didn't you? and my nephew heard it at the Rag and Famish. Oh, there is nothing too bad for him—nothing. He is worse than ever now. If it wasn't for his never-failing good luck he would have lost every penny he has got, but he wins instead of loses; he is lucky in everything. This young girl; she was going to be married—indeed, I believe it was the day before the marriage—and he met her, met her coming home from market, very likely had gone to get her wedding things! I don't know anything about foreign ways, and I don't want to. At any rate, he met her, got into conversation with her, and the result was that the bridegroom waited at the church the next morning in vain."

"And—and he really persuaded the girl to go away with him?" asked Mrs. Plumbe.

"Yes. She was very beautiful, it seems; one of the better class of peasants; quite the belle of the village. Yes, he ran away with her, took her away, as I say, the night before the wedding day."

"Really dreadful!" murmurs the rector. "I trust it may not be true!"

"True! It's as true as the sun," says her ladyship, with a grin that denotes there is still more to come. "But I haven't told you the end of it. Of course, the bridegroom—the old lover, you know—wasn't going to sit down calmly and bear such an insult and wrong. I suppose we only bear these things quietly in England; we go to a court of law—if we can; if we can't, we sit down and put up with it. But there is still some pluck in foreigners; this man followed the gay Lothario and overtook him and the false-hearted girl—"

"Yes," says Mrs. Plumbe, eagerly.

"Overtook them on the road, and they fought there and then, with the girl looking on, and two farm laborers as seconds."

"Bless my soul!" murmurs the rector. "And the result? Dear me! This is very dreadful. Were either of them hurt?"

"One of them was killed," says Lady Rookwell, [illegible] with intense enjoyment in the excitement on her audience.

"Which," says the rector, eagerly.

Lady Rookwell looks up, and her eyes takes in the two tall figures standing almost in the centre of the group, for Signa and Hector Warren have paused to listen; Signa with a look of deep, pitying interest, he with a calm, impassive look on his face.

"Which?" she echoes. "Why, of course, the wrong man. It always is. Lord Delamere shot the poor fellow through the heart."

A murmur of horror rises from the group, and Lady Rookwell sums up dramatically.

"Yes, robbed the poor fellow of his bride and then took his life. That is Lord Delamere!"

There is silence for a moment, and then Signa turns to make some comment on the awful story to her companion, and is surprised to see his pale face frowning; and as she looks he fixes his eyes upon the wrinkled face of the old woman and seems about to speak; but suddenly the frown changes to a smile, half sad, half scornful, and he turns to her with a laugh.

"I will sing you that song, now Lady Rookwell has finished her story," he says.

And that is all. Not a word in defence of his absent friend.

CHAPTER VIII.

The evening is over, the guests have gone, and Signa stands before her looking-glass, with a face faintly flushed, and with a curious, dreamy look of happiness in her dark gray eyes. For she feels that the evening has been a triumph for her, and that a change has come over the spirit of her dream, and that the tide of her life has changed. When she had said good-night to Aunt Podswell, that lady, who had not thought her niece good enough to sit down at the table with Lady Rookwell and Sir Frederic Blyte, had actually impressed an icy kiss on the sweet, white forehead, and the rector had held her hand and patted it with a nervous, embarrassed playfulness which spoke volumes.

The worthy couple felt rather ashamed of themselves, but they would not have done so if Signa had not made such a sensation.

But it was not of her triumph, or her uncle and aunt's changed manner that Signa was thinking, but of Hector Warren. As she stood, looking into vacancy rather than at her own beautiful reflection, she recalled his handsome face, with its hundred-and-one fleeting expressions; she heard his voice speaking and ringing in her ears. The sad, grave look of the dark eyes haunted her; there was something strangely fascinating for her in the very bearing and movement of the graceful, distinguished figure. She could not understand why it should be so, but she was conscious that when he spoke to her, something within her went out to meet his words, as it were, that when he touched her, a sharp thrill, half painful, half pleasurable, ran through her.

Love? She never thought of it, and if she had done so, would have laughed at the idea; how could she love a man of whom she knew nothing, of whom she had seen so little?

Then, as she slowly got rid of the gauze dress, there flashed upon her remembrance the awful story which Lady Rookwell had told so dramatically, and the strange expression which had crossed Hector Warren's face as he listened. He had seemed as if half inclined to contradict her, and pronounce the romantic tale a fiction, but he had not done so. Was it true, and did he know that it was true? If it was not true, why did he not speak up in defence of his absent friend?

Signa could not repress a shudder as she recalled the story. That Lord Delamere should rob a man of the girl he loved was bad enough, but that he should afterward kill the man in cold blood was terrible.

The very name of Delamere was growing fearful in her ears. She could picture him standing over the body of the man whom he had robbed of his happiness and his life standing with the cold, impassive look of a heartless man of the world, caring for his own pleasure only, and careless of the cost to himself or others. It was a terrible story, and it made her shudder. For relief she turned to Hector Warren, and recalled the musical voice with which he bade her good-night, the gentle pressure of his hand as he held hers. How was it possible that he could own such a man as the cruel, heartless Lord Delamere for friend?

And so she goes to sleep at last, and in her dreams Hector Warren and Lord Delamere mingle in strange confusion, the one with the sad, gentle smile in his eyes, the other with the hard, cold scowl, as he stands over the man he has robbed and killed.

When she comes down in the morning a little pale, perhaps, but wondrously beautiful in her pallor, her aunt greets her with a stiff smile, and the rector rises and puts a chair for her at the breakfast-table—a courtesy he has omitted until now—and Signa feels that indeed things have changed.

"Well, my dear," he says, with his head on one side, and an affable smile "and how do you feel this morning—not knocked up, I hope, eh?"

"Not at all," says Signa; "I enjoyed myself very much indeed, and enjoyment never knocks me up."

"I am glad of that, very glad," says the rector, rubbing his chin. "Ahem! Yes, it was a pleasant evening, thanks to you and—er—our friend, Mr. Warren."

Signa feels the blood mounting to her face at the sudden mention of his name, but she bends over the coffee-cups and conceals the uncalled-for blush.

"A—er most accomplished gentleman," continued the rector; "quite a gentleman, don't you think, my dear?"

"Quite," assents Signa. "Yes, he played and sang beautifully."

"Lady Rookwell said he was a professional," said Mrs. Podswell, grimly.

Signa shakes her head confidently.

"No, I am sure he is not."

"Ahem—how do you know, my dear?" asks the rector, curiously. "Did he——"

"No, he didn't tell me; at least he admitted that he was not," says Signa, reflecting.

"I wish we knew who he was," remarks Mrs. Podswell, complainingly. "It is very awkward; Lady Rookwell asked a hundred questions about him last night, and I could not answer one scarcely."

"It doesn't matter," says the rector. "I believe he intends leaving the place shortly."

A sudden vague pain strikes Signa, and her head droops; but she recovers herself, and looks up calmly enough a moment afterward.

"And what do you think of Sir Frederic?" asks the rector with a smile.

"Sir Frederic[illegible]," replied Signa, absently. "[illegible]—he was very polite!"

The rector coughs and takes up a note which lies on the table.

"Ahem! he has sent over by one of the grooms an invitation, my dear."

"An invitation?" says Signa. "For Mrs. Podswell, do you mean?"

The rector colors and coughs again.

"I think, my dear," he says awkwardly, "that you might call your aunt by a more affectionate name—ahem!—'Aunt Amelia' would sound better."

Signa smiles and flushes a little.

"Very well," she assents in that calm, quiet way which so awes the rector.

"The invitation is for your aunt and you, my dear," he goes on. "It is—er—rather short notice; but Sir Frederick apologizes, and presses you to take advantage of the fineness of the weather. Would you like to go, my dear?"

Signa looked over at her aunt, inquiringly.

"Oh, don't study me!" says Mrs. Podswell. "I dare say I shall manage it. In fact, we'd better go. Sir Frederic wouldn't like us to refuse."

"You see, Sir Frederic is the most influential man in our part of the country, my dear Signa," explains the rector, deprecatingly, "and he is—ahem!—rather touchy. It is very kind of him to send over so soon after last night, and so early. The groom is waiting for an answer."

"Pray, do not let us offend Sir Frederic," says Signa with a laugh. "The consequences would be too fearful. But what about Archie's lessons?" and she looks over with a smile at Archie, who sits open-eyed, and listening with all his might.

"My dear," said the rector, blandly, "you really must not let your self-imposed duty interfere with your innocent pleasure. It was very kind of you to undertake Archie's education, but of course we understood that it was merely as a pastime for you, and that it was not to be an irksome task. Archie will do very well; we couldn't think of allowing you to consider yourself an ordinary governess."

"Oh, but I can't give up my position as Archie's guide, mentor and friend," says Signa, smiling at the blank look on Archie's face.

"Well, well, murmurs the rector, awkwardly. "We shall see about it; at any rate, Archie can have a holiday to-day, eh, Archie," and he smiles across at the child, who takes no notice of him, but watches Signa's face.

"Signa's a great lady, now Lady Rookwell and Sir Frederic have made friends with her, I suppose," he says, and at this shrewd thrust Signa colors, the rector rubs his chin, and Mrs. Podswell says solemnly:

"Archie, if you have finished your breakfast you can go and play."

"I don't want to go and play if Signa isn't coming," he replies, calmly, and Mrs. Podswell is about to retort angrily, when Signa says in her quiet way:

"Go now, Archie; I will come in a minute or two," and he gets off his chair and goes out obediently.

"What time do we start for the park?" asks Mrs. Podswell.

(To be continued.)

Willie—What's a boob? dad? Crabbe—He's a fellow who goes on a picnic and always manages to sit in the custard pie.—Judge.

BRITISH CONSULAR OFFICE AT NEW YORK CONTROLS IMPORTS OF CRUDE RUBBER TO THE STATES

HOW GREAT BRITAIN PREVENTS ENEMIES FROM GETTING VALUABLE PRODUCT AND AT THE SAME TIME HAS REDUCED THE PRICE OF THIS STAPLE IN CANADA.

Few of those of us who shake our heads and bemoan increasing cost of living know, or appreciate, what Great Britain is doing for us in the way of keeping down the price of at least one staple article—rubber. Few of us realize how completely the British Government has the rubber market under its control and what that control means to us and also to the neutral countries of the world.

Handicapped on every side, baffled by this question and that problem, Great Britain has found a means of keeping her finger on the rubber situation and a way to give Canada crude rubber at a price not only low by comparison, but at half the price paid for it at the outbreak of the war.

The real purport of this is not appreciated until one stops to consider. This is a rubber age. Without rubber thousands of persons would be idle and millions would suffer inconvenience beyond comprehension for no synthetic substance to replace rubber has ever been discovered, in spite of repeated efforts along that line.

Through her foresight Great Britain began in 1897 to finance and subsidize rubber plantations in Ceylon, Sumatra, Java and the Malay States. Previous to that time all rubber had come from South America and Africa and exclusively from the wild trees. To-day that supply continues, but 23 per cent. of the whole and Great Britain controls the market with the rest.

So closely does she guard this privilege that in order to cut off the German supply she refused to admit rubber to the United States at the outbreak of the war, until finally an agreement was reached with American rubber manufacturers, whereby all rubber is shipped to the States through the British consular office at New York. Canada's rubber comes direct, but the Dominion can export none except through the British Consul at New York. With this advantage and with the fact that England is using thousands of tons of rubber to supply her army she has benevolently and patriotically reduced the price from $1.25 to 67 cents a pound, which is a considerable decrease from the price in 1910, when it was three dollars a pound.

The soaring price of leather is fast bringing boots and shoes to the point of luxuries, but Britain has solved the question by giving us rubber the only satisfactory substitute for many leather goods—at a price within the reach of all. To be sure chemicals and fabrics used in rubber manufacture have increased and also the price of labor, but the decrease in the crude rubber price has kept rubber goods, and particularly rubbers and overshoes at about normal.

Here is an opportunity for the patriotic man. The mother country is generously giving us rubber at a reduced price in return for the fact that she must have leather. The approach of winter gives us an opportunity to use more rubber in our footwear, buying at a lower price and at the same time saving on the more costly leather footwear.

BETTER THAN SPANKING

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

ABOUT YOUR GIRL.

At her fingers, neck and arms covered with gaudy jewels, [illegible]

[illegible]

Is she following the fashion set by the [illegible]?

Is she [illegible] meant to display the contour of a shapely figure?

Is her [illegible] face rouged and powdered with the freedom of the [illegible]?

Is she drinking, smoking, and dancing with the giddy abandon [illegible] in an atmosphere of excitement?

Is she [illegible] on Sundays and neglecting the church of her father and mother?

Is the pursuit of pleasure, frivolity and fashion the consuming passion of her heart?

Is she going the pace in a reckless desire to shine in the blazing light of the cabaret and to be known as one of the fast set?

Is she walking the [illegible] path of dalliance with no thought of the journey's dreadful end?

Are her companions lifting her up or dragging her down?

Is she seeking the love of one true man or basking in the sunshine of many without manhood?

Is her modesty a [illegible] mother [illegible] whim of the antiquated?

Is she no longer a comfort to those at home, the comforting delight of her mother and the pride of the family circle?

If this is your daughter are you proud of her? Look at her latest photograph. Then take down the picture of her mother or grandmother.

Which do you like the better? And which do the men of real worth prefer?

Minard's Liniment Cures Garget in Cows.

SNEEZING OMENS.

At One Time a Sneeze Was Regarded as a Death Warrant.

Sneezing from very remote times has been regarded with superstition.

Our forefathers went to bed again if they sneezed while putting on their shoes. A sneeze to the right was deemed lucky; to the left, of evil portent. To sneeze near a burial place was very unlucky.

Tradition has it that sneezing was at first a fatal sign—every human being sneezed but once and then died—but Jacob petitioned the Creator to remove the sneezing ban and succeeded. Thence arose the once universal custom of saluting a sneezer with "God bless you!" or "May you live long!" The custom still obtains in some parts of Europe.

In England not only was a sneezer blessed, but friends raised their hats to him as well. In an old book, "The Code of Conduct," it is directed that [illegible] sneezes so as not to bawl out "God bless you!" but bow to him handsomely. All over the world the sneeze was recognized. Whole nations were made orders to make exclamations when their king sneezed.

Sneezing was believed to be a sure cure for hiccough and was also looked upon as a sign of sanity. If ancient and universal belief goes for anything it is good to sneeze.—London Telegraph.

CHILDREN OF ALL AGES

When [illegible] or the growing child will find prompt relief through the use of Baby's Own Tablets. They are absolutely safe for all children and never fail to banish any of the minor ills from which little ones suffer. Concerning them Mrs. Arthur Smith, Adams, Sask., writes: "I have used Baby's Own Tablets and think they are splendid for children of all ages." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

South American Hats.

Throughout the West Indies, Central and South America the native women make wonderful straw hats. The Dutch island of Curacao, near Venezuela, is famous for the exceptional women's straw hats that are there produced. Porto Rico and Cuba make excellent ones from the leaves of the palm, while Ecuador, Panama, Honduras and Peru are noted for their Panama hats.

While wealthy men have been known to pay as high as $100 for a Panama hat, such prices are decidedly unusual. Hats of the best quality, pliant and flexible so that they may be folded and carried in the pocket without injury, can be purchased for from $2 to $10, depending upon the shrewdness of the buyer and the financial needs of the maker or seller. Women and children, owing to the deftness of their fingers, make the best hats, and but few men are engaged in the industry. No factories exist for their production. As the hats are finished they are either traded to the village storekeeper for [illegible] or [illegible] lots of [illegible] a hundred to the merchants at the port.—W. E. Aughinbaugh in Leslie's.

Minard's Liniment Cures Diphtheria.

ON TIME.

(Boston Transcript.)

"My tailor has promised to have my suit done to-morrow."

"Do you think he'll give it to you on time?"

"Oh, no. I'll have to pay cash."

$21.00
DELIVERED AT YOUR HOME TOWN

Combination Cooker and Heater

The most efficient and economical stove made.

¶ Will burn coal, wood, coke, corn cobs or anything burnable.
¶ Fitted with Duplex Grate, Hot Blast Tube and Screw Dampers.
¶ Will hold fire over night, cook, boil and bake equal to the largest range.
¶ Has a fine oven of heavy steel sheets closely riveted together. Body of polished steel.
¶ If your dealer has not a sample for your inspection, send $21 direct to us and we will prepay freight to your nearest railroad station.

HAMILTON STOVE & HEATER CO., LIMITED
Hamilton, Ont. Canada's Oldest Stove Makers.

A GERMAN ARMY CORPS.

What It Means to Move and Feed and Form in Fighting Line.

In the nonmilitary mind there is only a vague idea as to the space required for an army corps.

According to a German writer, a German army corps consists of 41,000 men, 14,000 horses and 2,400 vehicles, including the cannon. Such a body of men and their belongings on a single road make a procession about thirty miles long.

Even when in fairly close touch with the enemy the length of a corps is about fifteen miles, and when the front detachment becomes engaged in a battle it is five or six hours before the men in the rear get into action to assist them.

An army of ten corps would fight on a front about thirty-seven miles long, and a man who undertook to walk from one wing to the other would require twelve or fourteen hours to do it.

An army corps consumes nearly 300,000 pounds of food a day, about 100,000 pounds for the men and 200,000 pounds for the horses. Even under the most favorable conditions it requires a train of 150 wagons to bring up a day's food.

A Blood-Food Discovered That Entirely Overcomes Anaemic Weakness

Carefully Investigated Reports Establish Truly Wonderful Results.

Heretofore it has often been a hopeless task for a thin-blooded person to gain either strength or weight. Neither food nor medicine in many instances had beneficial effect.

What is practically a perfect blood-food, containing such elements as iron, has at last been produced, and when taken after meals will put new life and vigor into people that have despaired of ever being strong again.

This truly wonder-working treatment consists of taking two small chocolate-coated Ferrozone Tablets at the close of every meal.

This wonderful blood-food supplies nourishment, vim, energy—sends a stream of vigorous, strength-making blood to every nook and corner of the body, makes every muscle and fibre sing with new found life and health.

That gnawing tiredness leaves you—Ferrozone drives it away. Sleepless nights are turned into periods of rest, and you pick up fast. Day by day your appetite improves,—this means more food is transformed to nutriment that will build and energize weak organs. The inclination to worry passes away because Ferrozone imparts nerve—tone and bodily strength that prevents depression.

Think it over—Ferrozone is a wonderful tonic, because it establishes health that lasts. Thousands use it and thereby cleanse and restore the entire system to a perfect condition. You'll feel the uplifting power of Ferrozone in a week,—it's bound to help you if you only give it the chance. Sold by all dealers, 50c a box or six boxes for $2.50; be sure of the name Ferrozone. Forwarded by mail to any address if price is remitted to the Catarrhozone Co., Kingston, Ont.

DELUDES ITS ENEMIES.

Cunning of the Castor Oil Plant in Protecting Its Seeds.

Dressing them up to look like foul tasting bugs, this plant protects her children from hungry birds. If it were not for their disguises the children might be eaten and never have a chance to grow and become big plants. The wise mother plant realizes this, hence the masquerade. It's the castor oil plant.

To the average person anything relating to castor oil is not regarded as much of a delicacy. Birds, however, think otherwise. The seeds of the plant are like candy to them.

So the mother plant schemes to protect them. When she sends them out into the world she clothes them in variegated and fantastic dress until the seeds resemble coccinella beetles.

Now if there is anything birds dislike more than anything else it is a coccinella bettle. As a result they make a wry face when they see the caster oil beans and pass them by.

These seeds are oval and about a half inch long. They grow in spiny capsules, three seeds in each capsule. To show that the castor oil plant is no newcomer on the earth, archaeologists write of finding seeds in tombs of ancient Egyptians.—Philadelphia North American.

A FRIGHTFUL DEATH SUFFOCATED IN ASTHMA ATTACK

Every sufferer from Asthma knows the terror, the abject fear, that overcomes them when struggling for breath. The old-fashioned remedies may relieve, but never cure. Best results come from CATARRHOZONE, which cures Asthma after hope is abandoned. It's because Catarrhozone kills the Asthma germ that it cures. Choking spells and labored breathing are relieved, suffocating sensations and loss of breath are cured. Every trace of Asthma is driven from the system, and even old chronics experience immediate relief and lasting cure. Equally good for Bronchitis, Throat Trouble and Catarrh. The large one dollar outfit includes the inhaler and lasts two months. Sold by all dealers or from The Catarrhozone Company, Kingston, Canada.

Finnish Grammar.

Finnish grammar is of a difficulty absolutely repulsive. None of the other languages of the same group is half so hard. Hungarian—nay, even Turkish, despite the vexatious initial impediment of the Arabic alphabet—is easy in comparison. The syntax is at once provokingly elaborate and perplexingly obscure. It possesses fifteen distinct cases and twenty-four differentiated infinitive forms; but, on the other hand, there is no real distinction between nouns, adjectives, adverbs, prepositions, infinitives and participles, so that the student must not be startled by finding infinitives regularly declined like nouns and nouns taking upon them degrees of comparison like adjectives.

Minard's Liniment Cures Colds, Etc.

NO VULGAR DISPLAY.

(New York Times)

"Congratulations, my boy," said the attorney, "you have inherited a nice little fortune."

"Yes," assented the fortunate youth.

"I suppose you will pay a lot of your debts now?"

"I had thought of it, but I concluded to make no change in my manner of living. I don't want to be accused of vulgar display."

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED—EXPERIENCED COOK-general; no laundry work; wages $25.00; references. Address, 225 Queen street south, Hamilton, Ont.

GIRLS WANTED

Experienced knitters and loopers, also young girls to learn. Clean work and highest wages.

FOR SALE AT A BARGAIN

2 POTTER CYLINDER PRESSES—A half sheet Double Demy and a half sheet Double Royal size. Make us an offer for them. Well suited for a Country Printing Office. Address, Times Printing Company, Hamilton, Ont.

Recipe for Troubles.

Would you like a recipe for the little vexations and annoyances of life that keep the mind uneasy and disturbed? Let us give you one. Slip out in the silence of some starry night and look up at the stars for a minute or two. Get within their influence for a moment. Take in the spirit of their tranquility and peace. Think what they are and where they are, and you will soon lose yourself in the infinity of their being. You will begin to feel God has made this world big enough for you and that the little cares that vex you are only intruders that you should despise and scorn. Just try it, and if it does not cure you, you are not the man you think you are.

Minard's Liniment Cures Distemper.

English and French.

It is truly a graceful speech, the French tongue. Plain, homely things of life, so bald and bare and disheartening in the Anglo-Saxon, are less unlovely in the French. Indeed, the French word for "rags" is so pretty that we have conferred chiffon on one of our daintiest fabrics. But in the grace of the language lies also its weakness. It does not rise to supreme utterances. I have been reading the Bible texts on the tombstones in the little cemetery of Chardonne. "L'Eternal est mon berger" can never rank in loftiness with "The Lord is my shepherd," nor "Que votre coeur ne se trouble point" with "Let not your heart be troubled."

Minard's Liniment Co., Limited.

Gentlemen,—Theodore Dorais, a customer of mine, was completely cured of rheumatism after five years of suffering by the judicious use of MINARD'S LINIMENT.

The above facts can be verified by writing to him, to the parish priest, or any of his neighbors.

A. COTE, Merchant.
St. Isidore, Que., May 12, '98.

Odd and Interesting Facts.

Hamburg has an experimental plant that obtains power from the ebb and flow of North Sea tides.

Russia's population will be 600,000,000 by the end of this century if it maintains its present rate of increase.

To prevent skidding and slipping in damp weather the streets of San Francisco are sanded by a machine mounted on a motor truck.

The net investment of the United States reclamation service at the beginning of the present fiscal year was approximately $100,000,000.

The first sewing machine of which there is authentic record was patented in England in 1755, eighty-one years before the first American machine.

The Egyptian vulture was the chief scavenger of the land of Pharaoh.

Cost of government meat inspection in the United States is said to amount to 4 cents per capita annually.

How a Bird Dresses.

As bird fashions do not change, two suits a year are quite enough for most birds, but they need to take great care of them. Each separate feather must be cleaned and looked over and the useless ones pulled out. These feathers are not packed close together, you know, but lie loose and have places between filled with air. When a bird wants to get warmer he lifts his feathers so that these air spaces may be larger. But if his feathers are tangled or wet and dirty he could not raise them, and soon he could not keep the heat in his little body and would, of course, die.

What is mind? No matter. What is matter? Never mind.—[illegible] Key.

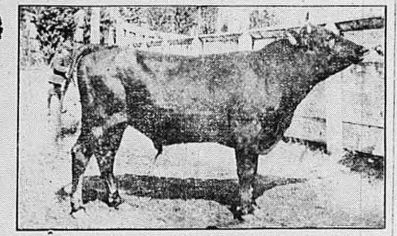
"The White Flour Pinch"—have you felt it? With the advancing price of wheat "the seven-cent loaf is doomed," say the bakers. In its place we have the eight-cent loaf—in many cities only the sixteen-cent loaf. A loaf of white flour bread is not a complete ration. However wholesome and pure, it does not supply all the proteids the human body needs. In **Shredded Wheat Biscuit** you have all the body-building nutriment in the whole wheat grain prepared in a digestible form. It is always the same price, always the same high quality. Eat it for breakfast with milk or cream or with fruits.

Made in Canada

WHAT LIVE STOCK MEANS TO THE LAND

And What a Knowledge of a Few Simple Principles in Breeding and Their Application Mean in the Development of Good Live Stock.

Live stock farming is literally the only possible kind of farming for continued profit—which is the only kind of profit. The use of improved live stock is essential to good farming. The scrub must go. To succeed, the farmer must study the demands of the markets and carefully work out his own plan of supplying those markets with the best he can produce, of whatever is most profitable. The land, it is true, produces only vegetable growth. Animal husbandry is, in one sense, therefore simply providing on the farm, a sort of market for its crops; while in another it is conducting a manufacturing enterprise, in which the domestic animals are the machinery, the crops the raw material, and the animal products the finished goods sold.



Denis Faran—3472—Two-year-old French-Canadian Bull, Champion of Breed at Ottawa. Owned by Arcene Denis, St. Norbert, Quebec.

Humanity demands two great classes of farm products—wheat and animal products. No farm can for long produce wheat alone. The economical maintenance of fertility demands rotation of crops and the growth of clovers or other legumes. These other crops are marketable mainly for the feeding of live stock; and if sold off the farm for that feeding, the profits of feeding and the valuable residual manure alike are lost to the farmer who sells these crops. Finally, there is no economical way of utilizing farm waste growth, stubble, straw or other litter, except by maintaining domestic animals. Logically, then, animal husbandry is the central and vital department of intelligent and profitable farming.

The ancient division of live stock was into horses, cattle, sheep, swine, etc. There were no further distinctions as there are to-day. We now have, of course, divisions of each of these classes into groups, developed with regard to particular, specialized utilities. We have horses which are useful only for heavy draught work; others being "built" for saddle use, others again for fast driving and so forth. Cattle are no longer "just cows." Some are, by bodily conformation and habit, used only as producers of milk, while others, useless in that way, are notably profitabe in the production of beef. In the same way, some kinds of sheep are profitable for wool production, while others are especially noted as mutton types. The same development occurs in the division of hogs into the "fat" or "lard" hog and the "bacon" hog types.

In a state of nature, all animals were so constituted as to use their food solely for body maintenance and race propagation. Domestication, the interference by man in the balance of natural food supply, resulted in adding a surplus of production for man's benefit, in meat, milk and other materials. The controlling idea underneath all of the wonderful development of the breeds of domestic animals has been the maximum of service or utility in the various directions in which the animals are useful to man. More yield per animal, for the foods used, is the object of all breed improvement. Increase in size at maturity, more rapid growth to maturity, a larger proportion of more valuable to less valuable portions of the carcase, better quality of meat, are among the actual improvements gained in remarkable degree in the case of the meat-yielding breeds. In dairy breeds we have gained a phenomenal increase of milk in others, a lengthening of the period of lactation in all. Longer, thicker, finer wool; larger, better fleshed carcases, have been sought and secured in sheep breeding. A large increase in the natural proportion of flesh to bone is typical of the developed breeds of fat hogs; while a deepening and strengthening of the "side" of bacon has been achieved in the bacon breeds of hogs with a propensity to grow fast rather than fat.

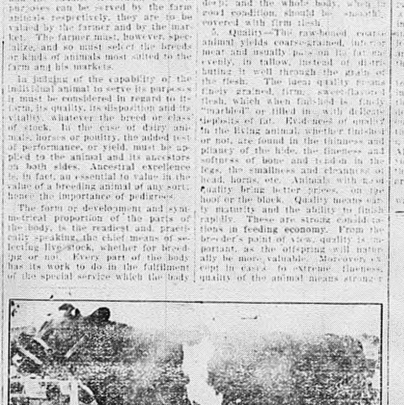
Because the intensification of utilities has necessarily been developed by close attention by a few men of advanced and shrewd ideals, and because most of our farmers have not become acquainted, either with those ideals or with the actual work of breeding placed upon them, the animals on our farms have been inferior and of low utility. It is small wonder that they have so frequently discredited live stock as a means of profit! It is necessary to improve our farm animals and to increase their number as their usefulness and value is thus increased. It is not, however, necessary that only high priced, pedigreed animals be kept. The purchase of a male of the best type and development is the wise first step. The farmer may thus cheaply and rapidly bring his animals to a high and profitable standard of excellence; though he cannot sell them for breeding purposes at high prices.

Every farmer may and should set out to "grade up" or improve his herds and flocks in this way, but he must learn how to do so intelligently. In buying the first breeding male, as well as in the selection and breeding the herd from year to year, and no less in shrewd selling, a good working knowledge of what is best in the various breeds is necessary to success. Each breed has its consistent established standards of excellence, of utility and of beauty for yield of saleable animal products and for breeding qualities. Even pedigreed animals of the same parents differ in the degree of their excellence. According to those standards these differences are differences in value; and external and intelligent discrimination is essential in order to secure the desired improvement of the animals of the farm.

The breeds of domestic animals were each developed for utility in one special direction. The beef breeds of cattle, the two types of hogs and the English breeds of sheep conform to the standards of meat production. Dairy breeds of cattle serve the purpose of milk production to the exclusion of meat yield. Certain breeds of sheep have ben developed along the line of wool yield as their main utility. Horses, valuable only for work, have been bred to the various special purposes of heavy draught, carriage or coach use, fast driving and the saddle. According as their purposes can be served by the farm animals respectively, they are to be valued by the farmer and by the market. The farmer must, however, specialize, and so must select the breeds or kinds of animals most suited to the farm and his markets.

In judging of the capability of the individual animal to serve its purposes it must be considered in regard to its form, its quality, its disposition and its vitality, whatever the breed or class of stock. In the case of dairy animals, horses or poultry, the added test of performance, or yield, must be applied to the animal and its ancestors on both sides. Ancestral excellence is, in fact, an essential to value in the value of a breeding animal of any sort; hence the importance of pedigrees.

The form or development and symmetrical proportion of the parts of the body, is the readiest and practically speaking, the chief means of selecting live stock, whether for breeding or not. Every part of the body has its work to do in the fulfillment of the special service which the body is intended to render. Certain parts only incidental to the life of the meat-producing animals and useless waste at slaughter, are the most valuable in the case of dairy cattle. On the other hand, the wealth of flesh most desirable in beef animals is a sign of uselessness in the dairy animal. In all breeds, evidences of quality, health and vigor are equally important. In the study of form, therefore, the special functions of the animal must be kept in mind.



Escana Beauty 2nd, Grand Champion Female Shorthorn at London. Owned by Mitchell Brothers, Burlington, Ontario

In beef breeds of cattle, and in mutton sheep and hogs, constitution, size, shape, quality and the proportion of valuable to waste parts are the chief points to consider. In dairy cattle, the bodily form must be adapted to a large yield of milk rather than flesh, and spareness of flesh is a good feature. In hogs, again, there are two types. The short, round and fine-boned fat or "lard" hog is radically different in form from the long, slabsided, large-boned "bacon" hog.

All animals of meat-producing breeds must have the following qualities and are useful in proportion to their degree:

1. Constitution.—Breeding animals live long and produce useful offspring according as they are vigorous, rugged and sound in heart and lungs. Animals for slaughter equally require these qualities in order to stand the forced, high feeding necessary for most profitable market finishing. The evidence of constitution is roominess of the chest cavity as seen by depth and width of body between the shoulders and behind the shoulders and forearm.

2. Size.—Undersized or excessively large animals are not desirable for breeding, as they will transmit these defects to their offspring; or for slaughter, because in the first case the increase in weight is likely to be slow in proportion to feed, and in the second case the quality of the carcass is likely to be inferior.

3. Disposition.—Evenness of temperament, or placidity is desirable. Nervous animals waste their tissues by fretting over even small causes, and are therefore wasteful feeders. Breeding animals which are nervous and excitable, not only produce like offspring, but often impair the vitality of the latter before and after birth, thus greatly reducing their value for any purpose. Placidity is observed in the quietness of the animal in action and when handled and in the absence of the glaring eye seen in nervous animals.

4. Proportion of useful to waste parts of the carcass.—A good fat steer will yield only about sixty-two per cent. of its live weight in marketable carcass; a bacon hog about seventy-five per cent. Poor individuals will yield as low as fifty per cent. in beef or sixty per cent. in bacon. Abundant natural flesh and small head, etc., will therefore mean a greater profit by over one-third in favor of the steer of good type when compared with the too prevalent scrub. The evidence of superiority is seen in fullness and solidity of body, in the absence of angles or projecting framework, in the evenness of side, top and bottom contour lines, in the smallness of head and in the shortness of neck. The hindquarters should be broad and deep; and the whole body, when in good condition, should be smoothly covered with firm flesh.

5. Quality.—The raw-boned coarse animal yields coarse-grained, inferior meat and usually puts on its fat unevenly, in tallow, instead of distributing it well through the grain of the flesh. The ideal quality means finely grained, firm, sweet-flavored flesh, which when finished is finely "marbled" or filled in with delicate deposits of fat. Evidences of quality in the living animal, whether finished or not, are found in the thinness and pliancy of the hide, the fineness and softness of hair and bone in the legs, the smallness and cleanness of head, horns, etc. Animals with good quality bring better prices, on the hoof or on the block. Quality also [illegible] maturity and the ability to finish rapidly. These are strong considerations in feeding economy. From the breeder's point of view, quality is important, as the offspring will naturally be more valuable. Moreover, except in dairy, the [illegible] quality of the animal means stronger bone. This may be regarded as similar in importance to the evidences of constitution given above. Animals of over-refinement in bone, etc., may be used with advantage for breeding only with animals of coarseness, as with scrub cattle.

—Canadian Countryman.

SEEVN DAYS IN A "TANK'

Diary of Soldier On the Western Front.

Received by Mr. L. R. Woodcroft, This City.

The following is the diary of an Australian soldier, recording a week's experience with a "tank" on the western front. A copy was received by L. R. Woodcroft, father of Pte. Leo L. Woodcroft, of the 56th, who gave his life on the field of honor last month. It was sent by another son, Joseph Woodcroft, who left here with the 129th:

Monday.—Out first time. Strange sensation. Worse than being in submarine. At first unable to see anything. Imagined a lot. Bullets began to rain like hailstones on a galvanized roof at first, then like a series of hammer blows. Poked through it all unscathed. Suddenly a terrible shell. Thought we were booked through. Look-out said we were astride an enemy trench. Guns raked and swept their trench right and left. Got a peep at frightened Huns. Grimly humorous. They tried to bolt like scared rabbits. Shot down in bunches before reaching their burrows. Machine guns brought forward. Started vicious and monotonous rattle on our "hide." Not the least impression made. Shells began to burst. Moved on and overtook some more frightened Fritzies. Cut their ranks to ribbons with our fire. They ran like men possessed. Officer tried to rally them. Awaited our coming for a while. Our guns began to spit. Off once more. Infantry rounded them up. Survivors surrendered. Tank sickness is as bad as seasickness.

Tuesday.—Off for another cruise. Peppering began at once. Thought going to be drowned in shower of bullets. Silly blighters thought they could rush the tank. Fired at them point blank. Cut down as if a breath from heaven had smitten them. Devilish plucky chaps some of them, for all their madness. Survivors had another try. Guns spat at them venomously. More went down. Rain of bullets resumed. Like hundreds of rivets being hammered into sides. We rushed through. Suddenly a jolt. Our hearts jolted into our mouths in sympathy. Nothing doing. Only some unwonted obstacle. Heavier "strumming" on our keyboard outside, and more regular. Machine guns at it now. Straddled on as though we liked it. A tremendous thud. Whole outfit seemed done for. Nearly jumped out of my skin. Looked at each other and wondered. Still a roof over our heads, thank God.

Wednesday.—Early start. Roughest voyage yet. Waves of fire seemed to break over us. Tremendous crash. Then another. Several others followed at intervals. Silence for a time. Party of Huns came to meet us outside village. Very stout old uniformed gentleman in front. Let fly with machine guns. Tried silly boarding tactics. We laughed. Our guns answered. Fat old gentleman stood open mouthed. Purple with rage. Suppose dignity offended at thought of ugly monster mauling his fellows. Tank bore down with a snort. Old gent started to run. Then flung himself to earth with many signs of surrender.

Thursday.—Half-holiday. Out in afternoon. Rough time. Many times thought it end of all things. Mob of Huns came charging. Bullets pattering all over. Let go at the devils. Wiped them out by dozen. Survivors ran as though devil were after them. Got into village. Passed between two irregular rows of wrecked houses. Hundreds of Huns came rushing up from cellars and from behind ruins to see us. Some had eyes staring out of head. One blighter with a clubbed rifle made a terrible swipe at the tank. Smashed his rifle and made a nasty noise. Hurt himself more than us. Pumped lead into them. Dead and wounded everywhere. Not possible to move further. Pulled up and swept ground with machine-gun fire. Enemy counter-attacked. Met them with heavy fire. They broke into disorderly run. Cut them up terribly. Fled in panic. Back to bed.

Friday.—Early afloat. Usual showers of bullets and few shells on the way. Got right across a trench. Huns dropped rifles and kit and ran. Went along parapet routing out Huns everywhere. Tried to run. Couldn't keep it up under our fire. Threw up sponge. Surrendered in batches. One cheeky chap said he didn't think it fair to fight with such things. We said that was our affair, and we would stand any racket Germany cared to make over it. He said the Kaiser would be angry, and would make us smart for it. Had to laugh. It was comic. He didn't see it. Out for rest of day rounding up more Huns. More talk about unfairness of tanks. Asked one chap if he thought we ought to have got permission of Kaiser before using them. Didn't see the joke. Pretty busy time. Took about 200 prisoners. Killed and wounded as many more. Tired out when through.

Saturday.—On the move before breakfast, which we had in bed of tank! Got busy on enemy trenches. Enemy tried surprise infantry. Yorkshiremen advancing to attack. We tried surprise, too. Ours came off first. We waddled into their ambush. Never was man so frightened. Fled panic-stricken in all directions. Only a few chaps stayed behind and tried to stop us by machine gun fire. Raked them finely. Smashed them to bits and left their machine gun to be picked up by the Yorkshiremen they hoped to surprise.

Sunday.—Good work of frightening Huns continued. Surrendered wholesale. Prisoners scared to death. Some all nerves. Said they were sick of standing up against such things, and wanted peace at any price.

◆

TEACHING ANIMALS.

One Trick at a Time, and Kindness Only and Always.

Almost any kind of pet will be a good deal more interesting if it can perform a few tricks. Of course, some animals are naturally much more intelligent than others, but all creatures can be taught to do something by a patient teacher. The method adopted will naturally vary a good deal according to the pet which it is desired to instruct. A bright dog will be able to learn an endless number of tricks, and many of these can be taught with the greatest of ease.

First of all it is important to realize that animals cannot be frightened into doing that which is required of them. Punishment, even of the mildest description, should be absolutely ruled out. The idea should always be that the trick is done for a reward, which usually takes the form of some dainty. All animals must be taken in hand young, as it is not easy to teach them tricks when they are fully grown, and their habits are formed.

Whatever the trick may be the only way to carry on the instruction is to keep on trying to make the creature understand by word and gesture what is required. Directly the animal shows any sign of understanding a reward should be forthcoming, so that gradually the pet begins to associate the doing of a certain action with something that it likes. Teach only one trick at a time, and never go on with the lessons after the animal is seen to be getting tired. Above all, on no account adopt a threatening attitude, as this entirely defeats the object in view.

Young dogs may be readily taught to salute, and an intelligent mongrel would learn the trick in one lesson. The writer had a small terrier, about four months old, who picked up the trick very quickly. The dog was gently pushed back on his haunches, and his paw was repeatedly put up to his head; at the same time the word "Salute" was said with emphasis. Before long doggy made an attempt to put up his paw, and the effort was at once rewarded with a lump of sugar. Soon the lesson was fully learnt, and now the dog will salute when there is any food about without being ordered to do so.

It is easy to teach the dog to walk upon its hind legs if a small stick is used to help the animal to keep its balance; this is first placed under the forelegs, and the dog is able to walk without any support. Other tricks easily taught are the rolling of a barrel (the article should be of a light description), skipping, and jumping over one's arm.

"The All-Purpose Sugar"

Rails of Steel In Fields of Gold

(W. E. Thompson, in Boston Transcript).

Edmonton, Alberta, Oct. 1.—From Winnipeg to Edmonton, 826 miles, your correspondent has travelled over the main or transcontinental line of the Canadian Northern Railway, without perceiving anything to warrant a notion that the owning company is in a hopeless way financially. The roadbed is good; cars, catering, attendance, excellent; Brandon, Regina, Saskatoon, Battleford, Edmonton, are but the most conspicuous of many well built towns en route. The line traverses the best "lay" of arable in prairie Canada, with substantially no "arid" or otherwise useless land. Its branches tap almost every notably fertile district and "sizeable" town or village on those vast plains. From the Managers I have a statement which did not appear to me precisely modest when first I scanned it, but which inspection and consideration have caused to seem fairly based, viz.: "The C. N. R., with the completion of some short mileage now under construction, will be serving urban centres containing 90 per cent. of the total urban population in Alberta; 97 per cent. of the population of towns and cities in the Province of Saskatchewan, containing each more than 1,000 population; and 97 per cent. of similar points in Manitoba. The C. N. R. has built up over 600 municipalities as market points for neighboring farmers. Its lines traverse not only the flat southerly plains which are now chiefly devoted to production of wheat and other cereals, but also the Central and Northern areas, evidently designed to be the home of mixed farming in Western Canada. Now that the Canadian Northern has its own independent outlets to both Atlantic and Pacific ports, it will be able to develop, both ways, a diversified, well-balanced traffic throughout the year."

It was in providing these outlets, both necessary to relieve C. N. R. prairie lines from costly dependence on the C. P. R., G. T. P.—that the C. N. R. "Big Two," Sir William McKenzie and Sir Donald Mann, with their colleagues, incurred to the Dominion Government sundry huge liabilities, which have somewhat embarrassed both parties to the transactions since the war began, and which have caused a general impression in the Eastern Provinces that the C. N. R. ought to be "nationalized" along with that far more embarrassed G. T. P. R. R. Such was my own opinion before beginning the present tour, which, for the first time, gave me close acquaintance with the C. N. R. situation. It has been a truism in Canada for a decade past that the MacKenzie & Mann prairie lines are better situated than those of any rival to serve the finest regions of Canada's great plains, consequently to profit by their advance for development and population. That being true, why should not the C. N. R. management have resolved to incur even extreme financial risks in pursuit of the policy of appropriating all profit to be legitimately gained by establishing connections with ports on both oceans? It was a case of having built up a vast ramification of essentially profitable inland lines, and then sharing their choice traffic with East and West concerns that would levy on it, and therefore on the C. N. R. Co., for all the traffic would bear. Why hand to them profits that the C. N. R. might keep for its own shareholders? The question whether the well placed inland C. N. R. system was put wrong by endeavors to establish itself on East and West outlets really cannot be answered correctly without considering whether those outlets are or are not so located, graded and secure of future local traffic as to be able to do business so profitably that they must enrich the entire C. N. R. Co. in the long run. And if they are so well situation why should it be held, as it is by some Ottawa critics, that the Canadian Parliament is morally entitled to "throw out" MacKenzie & Mann, inasmuch as they have become embarrassed by the unexpected, incalculable financial stringency of the late three years; to seize on a system singularly well placed by their ability; in short, to foreclose harshly and go to "gobble," for the federal Treasury all profits the projectors planned to get for their concern by giving good railway service?

LOCAL TRAFFIC PROSPECTS.

The C. N. R. eastern extension—from Port Arthur, Ont., on Lake Superior, to Montreal, taps important natural resources which needed naught but convenient transportation for their development. Let speckled trout and tourist traffic be merely mentioned. East of Lake Nepigon the road traverses the southern part of an arable clay belt as large as the States of Massachusetts, Connecticut, Rhode Island, New Jersey and Delaware combined. In this huge area the pioneer settlers' first crop will be pulp-wood, of which 10,000,000 cords, or enough to produce 7,500,000 tons of paper, are estimated tributary to the C. N. R. Revenue to settlers from this crop will pay half cost of clearing the arable land. East of that agricultural district lie uncivilized regions, more or less unprospected until the Sudbury copper deposits are reached, en route to which iron ores so abound that transportation of 143,000,000 tons has been officially estimated as to accrue to the C. N. R. Company. Between Sudbury and Ottawa the road passes through vast stands of the finest pine and other marchantable timber in Ontario; besides opening to exploitation great, known deposits of feldspar, limestone, graphite, and other non-metallic minerals. Ample water-power is available pretty much all along the 1,000 miles between Port Arthur and Montreal. So much for the prospects of local traffic in the C. N. R. Eastern Extension.

THE WESTERN EXTENSION.

The Western Extension parts from the Central System at Edmonton, and is carried through the Yellowhead Pass, which was to have been traversed by the C. P. R. as originally planned by the late Sir Sanford Fleming, the greatest Canadian engineer of his time. That pass he chose for its favorable summit and gradings, as well as from consideration of the eminently fertile nature of the prairie regions through which it must be gradually approached. His scheme was abandoned by the Ottawa Government, and the original C. P. R. line, by reason of proper political considerations, in order that the C. P. R. might serve our southerly prairie districts and to lessen inducements for U. S. Railways to cross the boundary, tap Canada West, and divert traffic to Minneapolis, St. Paul, Chicago, etc.—contrary to Ottawa's primary and governing desire—that of establishing East and West borne Canadian traffic from ocean to ocean. Of late years the C. P. R. Co. has extensively reverted to Sandford Fleming's scheme, by establishing a net of great branches in the highly productive regions south of the North Saskatchewan River, after the C. N. R. had extensively nonopolized them.

From the Yellowstone Park the Western Extension passes down the Thompson and Frazer River valleys, via Kamloops to Vancouver and other important points of the Frazer delta. C. N. R. trains will cross the Straits of Georgia by fast ferries to rails on Vancouver Island, continuing to Victoria, the beautiful B. C. capital, and on 140 miles northward to Alberni (named by an exploring Spanish Admiral of old). Now the Thompson and Frazer valleys are astonishingly fertile, and more and more cultivated intensively. Besides sharing their traffic, the Western Extension serves timber areas officially estimated to contain 30,380,00,000 feet of Douglas Fir, Red Cedar, Hemlock, Spruce, Balsam Fir, White Pine, Mountain and Lodgepole Pine. Moreover, there is en route great diversity of mineral deposits between the Yellowhead Pass and Kamloops, so certify the mineralogists of British Columbia and the Dominion. Copper-gold ores are extensively well defined; coal measures of area still not completely ascertained; magnetite copper, cinnabar, silver, zinc, gelena, molybdenite, kaolin, gypsum, limestone, antimony, mica—all are specified as having been observed en route by the mineralogists. The Fraser delta possesses incalculable quantities of clay suited to all manner of brick making. Moreover, the Western Extension furnishes an easy-grade route for the abundant fishery products of B. C. to the prairie interior, Ontario, Quebec and the Northern and Eastern United States.

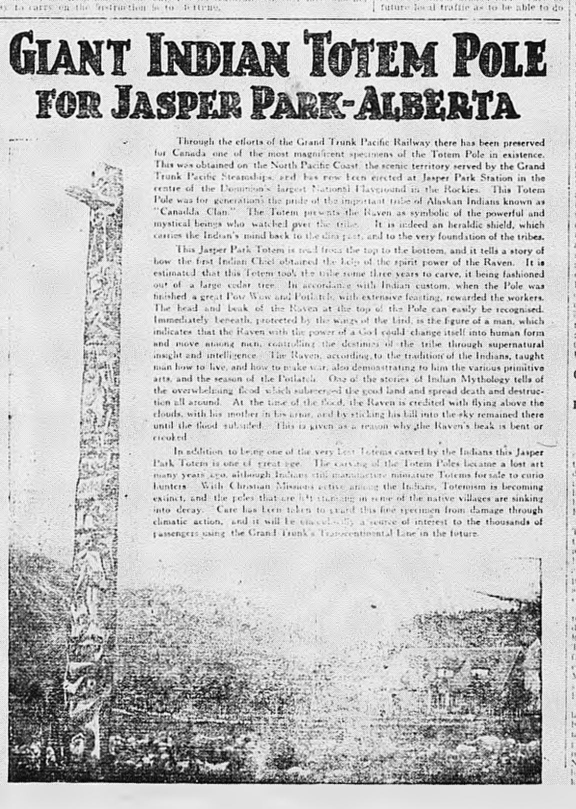
GIANT INDIAN TOTEM POLE FOR JASPER PARK-ALBERTA



Through the efforts of the Grand Trunk Pacific Railway there has been preserved for Canada one of the most magnificent specimens of the Totem Pole in existence. This was obtained on the North Pacific Coast, the scenic territory served by the Grand Trunk Pacific Steamships, and has now been erected at Jasper Park Station in the centre of the Dominion's largest National Playground in the Rockies. This Totem Pole was for generations the pride of the important tribe of Alaskan Indians known as "Canadda Clan." The Totem presents the Raven as symbolic of the powerful and mystical beings who watched over the tribe. It is indeed an heraldic shield, which carries the Indian's mind back to the dim past, and to the very foundation of the tribes.

This Jasper Park Totem is read from the top to the bottom, and it tells a story of how the first Indian Chief obtained the help of the spirit power of the Raven. It is estimated that this Totem took the tribe some three years to carve, it being fashioned out of a large cedar tree. In accordance with Indian custom, when the Pole was finished a great Pow Wow and Potlatch, with extensive feasting, rewarded the workers. The head and beak of the Raven at the top of the Pole can easily be recognised. Immediately beneath, protected by the wings of the bird, is the figure of a man, which indicates that the Raven with the power of a God could change itself into human form and move among men, controlling the destinies of the tribe through supernatural insight and intelligence. The Raven, according to the tradition of the Indians, taught man how to live, and how to make war, also demonstrating to him the various primitive arts, and the season of the Potlatch. One of the stories of Indian Mythology tells of the overwhelming flood which submerged the good land and spread death and destruction all around. At the time of the flood, the Raven is credited with flying above the clouds, with his mother in his arms, and by sticking his bill into the sky remained there until the flood subsided. This is given as a reason why the Raven's beak is bent or crooked.

In addition to being one of the very best Totems carved by the Indians this Jasper Park Totem is one of great age. The carving of the Totem Poles became a lost art many years ago, although Indians still manufacture miniature Totems for sale to curio hunters. With Christian Missions active among the Indians, Totemism is becoming extinct, and the poles that are left standing in some of the native villages are sinking into decay. Care has been taken to guard this fine specimen from climatic action, and it will be viewed as a source of interest to the thousands of passengers using the Grand Trunk's Transcontinental Line in the future.

CALENDAR OF THE TURKS.

Its Oriental Simplicity is Fairly Maddening to Strangers.

The Turks count their day from one sunset to the next sunset, dividing the twenty-four hours into twelve, as we do. This is plain sailing, but, unfortunately sunset does not fall at the same hour day after day, and these ensue horrible complications to the innocent European.

By way presumably of jest the Turkish steamers follow Turkish and their railways Frankish time. Probably many a good man has ended his life in a lunatic asylum after a frantic attempt to reconcile the two. The pampered rich have watches specially constructed with two dials, one showing each time.

Apparently some enterprising Osmanli thought that the Turkish calendar erred on the side of simplicity, and kindly invented a new complication. The Mohammedan year dates from the flight of the prophet in the seventh century. Each year the first month, Maharram, comes eleven days earlier, so the months do not mark the season like ours.

There is one more section for the benefit of the Turkish peasant, who in his rural retreats knows nothing of months. For him the year is composed of two seasons—hidrallis, beginning on May 6, and kassim, beginning Nov. 7—so to him April 20 is the one hundred and sixty-fourth day of kassim.—London Standard.

BRONCHITIS WAS SO BAD

Coughed Every Few Minutes.

DR. WOOD'S NORWAY PINE SYRUP CURED HER.

Bronchitis starts with a short, painful, dry cough, accompanied with a rapid wheezing, and a feeling of oppression or tightness through the chest. At first the expectoration is a light color but as the trouble progresses the phlegm arising from the bronchial tubes becomes of a yellowish or greenish color, and is very often of a stringy nature.

Bronchitis should never be neglected. If it is some serious lung trouble will undoubtedly follow.

Get rid of it by using Dr. Wood's Norway Pine Syrup. This well known remedy has been on the market for the past 25 years.

It cures where others fail.

Mrs. Geo. Lotton, Uxbridge, Ont., writes: "I have had bronchitis so bad I could not lie down at night; and had to cough every few minutes to get my breath. I had a doctor out to see me, but his medicine seemed to do me no good. I sent to the druggist for some good cough mixture, and got Dr. Wood's Norway Pine Syrup. One bottle helped me wonderfully. I stopped coughing, and could lie down, and rest well at night. I cannot praise it too much."

Dr. Wood's Norway Pine Syrup is put up in a yellow wrapper; 3 pine trees the trade mark; price 25c. and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

TORONTO.—With most plants booked up with orders enough to keep them busy well into 1917, there is every prospect that trade conditions will continue to be bright. Drygoods wholesalers are busily engaged in sorting orders, and several firms are making new records with each succeeding week, while all report must more activity than twelve months ago. Grocery lines are quite active. Wholesalers are unable to meet all orders for canned goods on account of decrease in the volume of fruits and vegetables canned. Hardware is still fairly active. Remittances are reported to be good.

MONTREAL.—No material change from last week. Preparations are being made by retailers for the holiday trade, and nuts, raisins, and dried fruits are more active in grocery lines. Boots and shoes are active, with stock moving out rapidly from retailers' shelves, and with manufacturers getting plenty of spring orders at higher prices. City collections are reported to be better than in November, 1915.

OTTAWA.—There is a general feeling of confidence in all mercantile lines. Locally there is an active trade in seasonable commodities, and collections are generally good.

HAMILTON.—Business is becoming more and more active as the Christmas season approaches. With all available labor busily employed, and with wages at higher levels than ever before, trade has suffered no diminuation even at very high prices. Country trade is good with high prices for farm produced explaining the freedom with which money is being spent. Drygoods, boots and shoes, groceries and hardware lines are all reported to be enjoying unwonted activity.

LONDON.—Trade conditions continue to be active in all lines, and, especially in drygoods, shoes, hats, furniture, carpets and groceries. Very large spring orders are being received by wholesalers. Money is quite plentiful, and remittances are reported to be good.

WINNIPEG.—Canadian wheat is now at record prices, and flour and bread advances are inevitable. There is an active distribution of winter commodities, and a scarcity is experienced in woollen, cotton, leather, and canned goods, especially. Textiles of all descriptions are scarce. Retail and wholesale groceries reports that they are experiencing greater activities than they have known for several years.

CALGARY.—Fully 50 per cent. of the wheat crop of the West is still exposed to the elements and with cold weather and snow, threshing is necessarily a slow operation. Threshing returns to date have been very satisfactory. There is satisfactory trade conditions in all lines of business.

VANCOUVER.—Mercantile trade is holding up well, and all industries are fully engaged. Higher prices have been asked for practically all food products.

QUEBEC.—Orders for spring are coming in freely. Wholesale trade as a rule is satisfactory. Provision and groceries are in active demand. Local industries continue busy. Remittances as a rule are fairly satisfactory.

◆

Knew Just How.

Many years ago in Paris, at the first presentation of a tragedy that had for its closing scene the murder of a Swedish King which had taken place nearly half a century earlier, all went well till the murder scene came on, when a very dignified old gentleman in the stage box called out angrily:

"Absurd! They've got it all wrong!"

The manager himself heard this plain-spoken comment, and, being naturally disturbed by so sweeping a condemnation, he sought out the critic and politely begged to know what fault he had to find with it.

"Why, my good sir," cried the old man, with an air of authority, "the whole grouping of the scene is incorrect! You have made them kill the king to the right of the door, whereas we murdered him on the left!"

Visitor (noticing empty cage)—Did your canary die a natural death?
Bobby—Yes'm; the cate ate him.—Boston Transcript.

"I admire the ingenuity of the man who compiled this pocket dictionary." "For what?" "For getting in so many words that nobody would ever have any possible occasion to use."—Pittsburg Post.

PALPITATION OF THE HEART SHORTNESS OF BREATH CURED BY MILBURN'S HEART AND NERVE PILLS.

Mrs. S. Walters, Matapedia, Que., writes: "I wish to let you know how much good I have received by taking your Heart and Nerve Pills. I was suffering from palpitation of the heart and shortness of breath. The trouble with my heart was caused by stomach trouble.

I had tried all kinds of medicine, both patent and doctors', but I found none relieve me like Milburn's Heart and Nerve Pills. I believe anyone suffering like I did should use them. I only used four boxes and I now feel like a different person."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years and have a most wonderful reputation as a remedy for all heart and nerve troubles.

Price 50 cents per box, 3 boxes for $1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WE SEE that Lucknow is talking of organizing a brass band. We had been under the impression that Walkerton was the only town in this part of the country that had no Town Band. In this town when anyone mentions brass band, it is customary to take him aside and boast that twenty-five years ago, Walkerton had two—yes sir—two of the best bands in Ontario. We take so much comfort out of gloating over those good old days that we don't feel the need of a band now.

+ + +

THE largest and most successful annual meeting of the General Reform Association of Ontario which has been held for years was the one of November 24th. Concentration on winning the war, criticism of the government for its failure to handle the war situation adequately or even harmoniously within its own Cabinet and the Nickel question were the principal features of the day's discussion. Mr. E. M. Macdonald, M. P., of Pictou, N. S., Hon. George Graham and Mr. N. W. Rowell were the leading speakers. Mr. W. H. Adams, was re-elected to the position of General Secretary, and Mr. R. E. Truax M. P. of Walkerton, are members of the Executive.

+ + +

THERE is no mistaking Sir Wilfrid Laurier's statesmanlike position in regard to a further extension of the life of the present Parliament. In his address to the conference of Eastern Ontario Liberals held in Ottawa a few days ago, Sir Wilfred spoke distinctly on the matter. He said:—"Some few days ago an important member of the Cabinet, who, it is said, will be Minister of Militia, went direct from his colleagues to Toronto, and declared that the Canadian Parliament would again be asked for another extension of its term. Mr. Meighen also made the same statement in Montreal. Both of these gentlemen said that the responsibility would be placed upon the Liberals, and especially on the leader of the liberal party. Let me say at once that I am not afraid of responsibility. I am not nor ever was. I have been, for 28 years now, leader of this party, and in the course of my career, both in power and in Opposition, both in good and ill fortune, it has been my lot to face many difficult problems religious, national racial and others. Never was I afraid of responsibility. Responsibility I have accepted on every occasion, not with a view to win, but with one object before my eyes, and that the welfare of my country. And this question is not so very difficult—not so difficult as many in the past. And so I say to Mr. Meighen and to Mr. Kemp that the question of responsibility has no terrors to me. When it comes to decide whether the Parliament shall or shall not be extended we shall await the proposal from the Government, we shall await the reasons that they have to put forth, and then we shall be equal to the task of facing our responsibility."

It is evident, Sir Wilfred said, from the way the Government put forth the proposal, that it had not so much in view the interests of the war as the fortunes of the Conservative party. "I discard that view," he declared, "Office is the legitimate aspiration of any party under British institutions but office is not the end—it is the means to the end, and the end is the welfare of Canada our common country. It is in this view that I approach this question among other questions. I am a partisan, we are all partisans, but partisans for an object, and that object is the welfare of our common country. For that object the Liberals of Eastern Ontario met here today, and they will go home to-morrow to further that object so far as they can."

OUR OTTAWA LETTER

His Excellency the Duke of Devonshire Has Some Surprises in Store for Him, Writes H. F. G. . . . .

The Duke of Devonshire will certainly be interested in Canada. His first official duty on reaching Ottawa was to read a bunch of letters between Premier Borden and his thorn in the flesh, Sir Sam, which are as full of surprises as a pumpkin is of seeds. "My word!" one imagines His Excellency saying. "Things do happen here."

Perhaps the Governor-General does not appreciate the surprises inherent in this correspondence to the same extent as we do who have been watching the cat jump for the last two years. For example, Premier Borden's ultimate indignation hinges on the smallest kind of grievance—the tone of Sir Sam's letter. He stands for paper shoes, Ross rifles, spavined chargers, the Bertram Shell Committee, Colonel John Wesley Allison, the fuse contracts, Camp Borden, and a hundred other crimes against the Dominion of Canada and then fires Sir Sam for what? For his offences against the state? No. For an affront to Premier Borden's personal dignity—he doesn't like the tone of Sir Sam's last letter.

True, Premier Borden mentions the fact that Sir Sam has been acting off his own bat, not consulting his colleagues disobeying orders, in fact, but all these misdemeanors pale beside the frank language Sir Sam uses in writing to the head of the Government. Sir Sam may behave like a load of hay for two years—that is to say, take up the whole road—but he mustn't be saucy to the Premier. That is the unforgivable sin. Just for that you'll all get off.

Incidentally Premier Borden is the neatest little stable locker after the horse is stolen now extant on the northern half of the North American continent. Sir Sam's resignation after most of the harm has been done is Premier Borden's latest feat in this direction. But before that we had the excommunication of W. F. Garland, M. P., and A. DeWitt Foster, M. P.—both gentlemen having previously got away with the goods. This is, perhaps, the baldest thing Premier Borden does—making others do penance for his lack of firmness.

Another surprise in Sir Sam's correspondence—a surprise which is in the nature of a rumor confirmed—is the intimation that Premier Borden was nosing around for a way out, either as High Commissioner in London or as Chief Justice of Canada, via Sir Charles Fitzpatrick to be superannuated. Of course Premier Borden denies that he contemplated quitting in the face of the enemy, but the fact that Sir Sam noticed a wistful look in the Premier's eye is worth remembering.

Another surprise to His Excellency, but not much of a surprise to us who have been keeping tab on Ottawa, is the fact to which Sir Sam draws attention in his own artless way—namely, that the Cabinet fairly bristles with leaders. What the Cabinet suffers from is not lack of leaders, but an embarrassment of riches in this respect. Premier Borden is only one leader among many—and a very listless one at that—not even primus inter pares. Sir Sam mentions at least two more—the Honourable Bob, of course, and Sir Thomas White. Sir Thomas seems to be moving rapidly. Sir Sam also mentions Sir George Foster, the Trade Wind, as being too guy for a subordinate. The glimpse Sir Sam's letter gives into the seething vortex of personal rivalries which goes by the name of the Borden Cabinet, is like a peep into Vesuvius. They seem to be united on only one thing—to give their friends, the profiteers, every chance to bleed the people to their last dollar.

Another surprise is the emergence of Sir George Perley. Sir George has in his time been Acting Minister for every one of his colleagues in the Cabinet. They had no fear of leaving him in charge. He was understood to have no personal ambitions, so his colleagues knew him as a safe sort of chairwarmer who would never set the world on fire. Premier Borden felt so sure of him that he made him High Commissioner in London—pro tem. Mark that "pro tem." Premier Borden may not be as aloof from that High Commissionership as he professes. At all events Sir George Perley is still High Commissioner "pro tem," besides being Overseas Minister of Militia, which is going to take up a lot of his time. The "pro tem" job will probably find a good man to handle it presently. Meanwhile, Sir George is Overseas Minister of Militia, a position which he is said to have filled for a year past, and which is now given its real name.

With pardonable cheerfulness Sir Sam points out that Sir George Perley has been responsible for most of the Canadian military management in England for the last twelve months, which is equivalent to saying that Sir George is responsible for a pretty bad mess. Still, who would have thought it of Sir George Perley? That quiet oyster of a man Overseas Minister of Militia and against Sir Sam's say-so. It was like being kicked to death by a beetle.

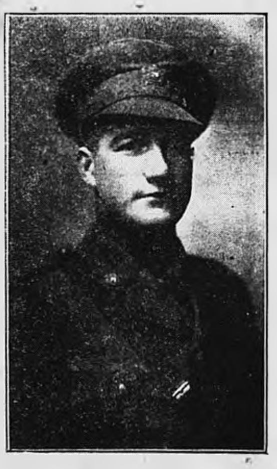
Another surprise is Sir Sam's fatal fondness for Sir Max Aitken. Canada had no idea that this affair of the heart had gone so far. Canada knew of Sir Max as the Canadian Eye Witness at the front who did his Eye-witnessing of battle dangers by proxy of the "Morning Post," thus leaving the Left Eye free to follow Sir Sam on his numerous visits to London and the Right Eye bent on the main chance which Sir Max never loses sight of at any stage of the game. Canada also knew Sir Max as a vicarious writer of books of common praise for Lieutenant-General Sir Sam Hughes, his friend and patron and companion on roller skates.

Canada also knew Sir Max as an expatriated Canadian, somewhat cloudy in his beginnings, who won fame and riches as the midwife of the cement merger and other progeny of the same kind, who became the partner of R. B. Bennett, M. P., in an elevator combine whose object was to give the Northwest farmer another squeeze, and who subsequently took his money over to England, where he bought a Unionist nomination for Parliament and in due time a baronetcy. The career of Sir Max in England is such as to cause the average Canadian to say, "If he can get along, then anybody can." Sir Max is not what you would call the highest type of Canadian. He is a promoter—will promot anything, including himself. Some day he will be caught trying to sell the dear public a milk mine in the moon. Meanwhile he has three valets—one for his necktie, another for his shoes and a third for the rest of his clothes. Working together they dress Sir Max in three minutes, their distinguished employer talking the while to half a dozen reporters and telling them what a great man he is. Not to put too fine a point on it, Sir Max is a bit of a bounder, and in England is known as such. It is difficult to see what dignity Canada would have conferred upon her by making this swanker Overseas Minister of Militia.

However, Sir Sam believed in him as he believed in Allison, under similar circumstances, and was actually grooming him for the job. Naturally Sir Max would have taken it, not so much for what there was in it as a job but for the cachet it gave him as a responsible Canadian statesman. It would have almost made Sir Max respectable, which would have been a good thing for any new companies he might be forming. Sir Max is another conspicuous example of Sir Sam's penchant for picking the wrong kind of friends.

H. F. Gadsby.

'For King and Country'



LIEUT. LESLIE YOUNG

Who Fell in Action on November 11th, 1916

WHAT IS THIS "SPECIAL SERVICE?"

Since 128 men of the 160th battalion have been rejected for overseas service a great many people have been asking "What is this special service to which those who were rejected have been assigned? The Port Elgin Times answers the question.

Well now this cannot be answered in a sentence. The special service takes in a number of various departments.

Perhaps our readers have noticed the past week Pte. Dan Black about town. He wore on his left arm a white badge with black letters "G. M. P." that means "Garrison Military Police," and means that he is a policeman to the soldiers as is the regular policeman to civilians. The military police keep the soldiers from congregating on street corners in the cities where they are quartered, see the soldiers conduct themselves in an orderly way when off duty etc.

But, you say that's not too bad a job. No, it isn't, but when a man enlists for overseas, trains a year, and then finally finds out he is unfit and must do some menial work around camps, the boys say it's hard.

But there are other things which the 128 men of 160th who have been rejected must do. Some of the qualified young men are put into offices of the military headquarters where they do office work; some who were artisans may be put to work in the kitchens and quarters of the soldiers of other battalions who are quartered for the winter, and who, by the way, we may fairly suppose, will have more rejects than the 160th. For have we not heard during the past year as to how the 160th was the finest battalion of men ever got together. But there's the rub! Imagine the feelings of a 160th soldier who enlisted to fight the Hun, and who, for nearly a year was made to believe that he was going to see real fighting, finally land in a mess hall and there scrap with potatoes and dishes.

Then again, some of the rejected, and mind you, a rejected man may have only a very slight thing wrong with him, are ordered to the military hospital and make themselves generally useful to the hospital staff. Others are put in charge of the horses and stables, while others go on the home guard. These are just some of the duties which rejected men may be used for.

Of course this is all useful work, and something which must be done, and by soldiers, but the average rejected man figures it out this way:

"I don't mind doing work of any kind for my own battalion. I don't mind taking my turn for the fellows I enlisted with and trained with, but I am bitterly disappointed in having trained so long expecting to go overseas, and then having finally to do such menial tasks for other battalions."

Some of the rejected men claim they should be given the choice of retiring from the service, they enlisted for overseas fighting and should be discharged.

One of the things which may help to keep young men from enlisting is the sight of a rejected man doing the menial jobs of waiting on the mess of other battalions than his own.

Another thing the authorities might turn over in their minds is the fact that a lot of good men are tied up in the "rejected lot" who are badly needed in other civilian occupations, and who if put back into civilian life would make it easier for some of the young men who are physically fit, to enlist.

The above is some idea of the "special service" to which many of the braw lads of the 160th have been transferred.

It is generally believed, because an occasional soldier was discharged after rejection, that all the rejects had their own choice in the matter, and could come home if they desired. But we understand this is not the case and that all rejects are still under military authority and must carry on the work to which they are assigned.

THE TONIC THAT BRINGS HEALTH

"Fruit-a-tives" Builds Up The Whole System

Those who take "Fruit-a-tives" for the first time, are often astonished at the way *it builds them up and makes them feel better all over.* They may be taking "Fruit-a-tives" for some specific disease, as Constipation, Indigestion, Chronic Headaches or Neuralgia, Kidney or Bladder Trouble, Rheumatism or Pain in the Back. And they find when "Fruit-a-tives" has cured the disease, that they feel better and stronger in every way. This is due to the *wonderful tonic properties* of these famous tablets, made from fruit juices.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

AUCTION SALE

— OF —

Notice to Creditors

In The Supreme Court Of Ontario. In The Matter Of Perry Ell, A Lunatic.

PURSUANT to the order of the Supreme Court made in this matter, creditors of Perry Ell of the Town of Walkerton in the County of Bruce are required, on or before the 28th day of December, 1916, to send by post, prepaid, to John Henderson of Walkerton, the Committee of the person and estate of the said Perry Ell, their christian names and surnames, addresses and descriptions, and full particulars of their claims, a statement of their securities and the nature of the securities, if any, held by them, or in default thereof they will be peremptorily excluded from the benefit of the proceedings under said order.

Every creditor holding any security is to produce the same before me, at my chambers in the Court House at Walkerton, on the 21st day December, 1916, at ten o'clock in the forenoon, being the time appointed for adjudication of claims.

Dated this 17th day of November, 1916.

A. M. Greig,
Local Master at Walkerton,
pro tem.
Messrs. Robertson & McNab,
Solicitors for Committee.

IT'S Remarkable how children out-grow their smocks and frocks, their playthings their childish ways and most of all, their photographs. Only photographs will keep them as they are.
FRASER STUDIO

POETS' CORNER

THE COLONEL

(Written by Lieut. Lee Young.)

A man that can fight, a fighter who's fought,
A man to whom danger to self counts for nought.
A man all the way with a conduct sheet clean,
A man: Colonel Sutherland, that's whom I mean.
As a man and a soldier our Colonel's beloved
And admired by those among whom he has moved;
Admired, beloved, yet regarded with awe,
A man and a soldier, sans blemish or flaw.
A man and a soldier, man stamped on his face;
As a soldier, his record decades won't efface.
Insignificant lowly and humble I feel,
When I look on his manhood, his grey eyes of steel.
To-day Canada's proud of the sons that she bore,
Proud as she is of her heroes of yore,
Proud of the man who will stick with the game.
Proud of the soldier upholding her fame.
In but six of His days, God created all earth,
Saved himself but the seventh to rest from His work,
And while resting from care on the seventh He planned
The man of the stamp of the Sutherland clan:
He moulded and made them and placed them on earth,
And the best of them all leads the SEVENTY-FIRST.

News About Town

County Council meets Monday, December 4th.

Pte. Robert McIntosh, of Kincardine, who had been reported missing, is now reported killed in action.

Forty-four years ago the Walkerton Telescope was $1.25, strictly in advance: $1.50 in three months: $2.00 otherwise.

Chesley High School is to be congratulated on winning all three of the Carter Scholarship awarded for Bruce Country.

The Box Social held at Hogg's School, Carrick, on Friday night was a fine success in every way. $50 was raised for the Red Cross.

A shower for Miss Edna Hasburn was given at the home of Miss Fraser one evening last week by the members of the Methodist Choir.

The Women's Institute will meet at the home of Mrs. Andrew Oberle on Thursday December 7th. Mrs. B. J. Waechter will give a report of the London Convention.

The value of a dollar spent on clothes two years ago has shrunk to seventy-six cents. Judging from the skirts to be seen on Yonge street clothes are shrinking even more rapidly than their value.—Toronto Globe.

The towns of Port Elgin and Southampton will hereafter get their lighting and power at hydro rates from the Saugeen Electric Light and Power Co. All customers will be put on meter. The above announcement appeared in the local papers last week.

Several Alliston people who readily subscribed to the Patriotic Fund have failed to pay, and cannot be persuaded or shamed into doing so. The amount thus outstanding is about $100, and it has been decided to sue unless one more appeal should bring the money.

Here's a new version of Mother Goose, appliable to the high cost of production in a printing office: "Paper and ink, paper and ink; wouldn't the cost of 'em drive one to drink?" Subscribers, however, are saving us from the fate of delirium tremens by cheerfully paying the extra fifty cents a year. It is wonderful the evangelistic potency of a cent a week.—Carlton Place Canadian.

No Stickers On Front

It is contrary to postal law to place Christmas seals or stickers on the face or address side of a letter or any item of mail. There is, however, no objection to these seals or stickers being placed on the back of letters or other articles of mail.

+ + +

Turnbull—McAngus

A quiet wedding took place at the home of Mr. and Mrs. James Gowanlock, East Ward, on Wednesday afternoon, November 22nd, when Miss Vera McAngus and Mr. James P. Turnbull, both of Paisley, were united in the holy bonds of matrimony by Rev. Thos. Wilson, pastor of Knox Church, Walkerton.

+ + +

More Name Changing

Fordwich Record—"H[illegible]nberg Jehosophat" (at least for the present) is the name that the newly arrived son of Mr. and Mrs. D. Schwandt has been blessed with. All will know who the first name is taken after, and as it is likely to cause considerable fun and obscene talk, the cuss word has been supplied in the second name. Of course, we expect that in a few days the "little wee dear" will be given a more palatable and pronounceable calling.

WALKERTON IN 1872

Interesting Sidelights on Life in the County Town Forty-four Years Ago.

An old copy of the Telescope, dated February 8, 1872, handed us by Mr. Con. Reichenbach, gives many interesting sidelights on conditions in Walkerton forty-four years ago.

A prospectus of the Telescope for 1871-72, Joseph Craig, publisher, appears on the front page and gives an outline of this paper's policy under the headings of politics, denominationalism, government by party, local governments, railways, municipal matters, etc. The subscription price was $1.25 strictly in advance: $1.50 in three months: $2.00 otherwise.

The greater part of the issue is taken with the report of the County Council which consisted mostly of routine business.

Hon. Edward Blake sat for the Local House for South Bruce at that time. And the Telescope speaking of the Reform Organization in this Riding says:—

Several counties have not only the organizations complete, but their candidates selected. North Bruce is ahead of South Bruce in this respect. In South Bruce we have a nominal Reform Association, which is only the continued existence of the convention which called out Mr. Blake. The only meeting it had since, a poorly attended meeting called at a day's notice, to arrange a reception to Mr. Blake. This is a rather lame organization to name a candidate, or to go into a contest, if contest there is to be, in the Riding at the approaching election. If, as is almost certain to be the case, Mr. Blake retires from the Local House at the end of the present Dominion Parliament, he ought by all means to be nominated for this Riding in advance of any other Riding doing so. West Durham will always send him a supporter. There is no doubt that the configuration of this Riding will be altered, as we have twelve thousand people more than the average, and several thousand more than some counties which have two members.

Local news was a side issue in town wrinkles in those days, the greater portion of the space being taken up with World news, Parliamentary news and lengthy political editorials, matter which renders now look to the large city daily newspapers for.

A few local news items are herewith reproduced:—

The price of carrying a bushel of wheat from Walkerton to Hamilton is 11 cents. This is a liberal tariff with a vengeance. Walkerton cannot compete with Kincardine, certainly not on equal terms. Quite a large business down in the grain market, notwithstanding this exaction.

Mr. K. McKenzie Q. C., will be in the North Riding of Bruce, by the invitation of the Reform Association, some time at the close of this month, say the 29th. We have no doubt our hyperborean friends will give him a warm reception, notwithstanding the latitude and the season.

A special meeting of the Town Council took place on Thursday last. The principal business done was the passing of a By-law for preventing the Small Pox. The By-law prohibits persons who reside where the Small Pox is known to exist from coming into town, under a penalty not exceeding $40. The Town Constable was instructed to ascertain whether there be any horses in town affected with Glanders, and, if so, to immediately lodge a complaint with the Mayor.

The Hanover Brass Band, assisted by Messrs. Boddy and Collet, gave a concert in the School House of that village which proved a great success.

ELECTED TO EXECUTIVE

R. E. Truax, M. P.

Who has Been Elected a Member of the Executive, Ontario Reform Association.

OUR WESTERN LETTER

Written for the Telescope By an Old Bruce Boy.

We seem to be in for winter in earnest now. It has been snowing and storming for the last two days and is now freezing hard. Threshers are again at a stand still. Most of the grain not threshed is now stacked, but there are still some unfortunates with stooks in the field, your humble servant is among them with some forty acres still to stack. Usually I stook thresh as soon as the sheaves are ready but this year the machine wasn't available and it takes two men a day or two to stack a heavy crop on 80 acres, especially with wet spells and snow interspersed through the fall. We have been asked why the later makes of sulky and gang plows have the oil can holder on the base of the tongue instead of beside the wrench box under the seat as in older makes. The manufacturers say the oil can is put on the tongue so that the farmer can see it and so remember that it is advisable to oil the plow oftener than once in a life time. On the other hand the farmers maintain that the oil can is placed on the tongue through a secret understanding with the oil can manufacturers as it is easily tipped off with the lines and so lost, which brings fresh revenue to the oil can trust. Farmers here are wondering what the coyotte will feed on when winter and deep snow comes and no more mice are available. There has been a grand crop of field mice this year and the coyotte has not been slow in rooting our stooks to get at them. All coyottes shot so far, have been fat and in prime condition. The rabbits are all gone and it is feared that with winter and hunger Mr. Coyotte will visit the flocks and herds and take toll therefrom. One frequently sees here a sight that gives me a severe pain, that is to see a man drawing the manure from his stable and dumping it in a slough or creek to get rid of it. I believe it is easier to keep land in heart than to crop it out and then re-enrich it. No matter how fertile our soil is, constant cropping must impoverish it more or less. All the manure made round this place goes on the land. Some times I get a bit of grain badly lodged from too rank straw, this I try to counteract by heavy sowing, but I usually sow five bushels to the acre. I have sown as high as eight bushels an acre. I have just met with a severe loss, a few weeks ago I was presented with a very fine Alexander cat by a departing neighbour, who wished him to have a good home. He has now found a permanent one. On my way home for dinner I have just found his head about a quarter of mile from here. A coyotte had just made a light repast off the rest of him.

Culross Tp. Council

Town Hall, Teeswater, Nov. 20th.

Council met on above date. Members all present. The minutes of the previous meeting were read and on motion of McPherson and Armstrong were sustained.

McPherson—Donaldson — That a cement tile culvert be put in opposite lots 13, con 14 and 15, and that John Armstrong have the same done—(Carried.)

Armstrong—McPherson—That the finance report as now read be adopted and Orders issued for payment of the accounts, and that we do now adjourn to meet again on December the 15th as per Statue or at the Call of the Reeve.—Carried.

Looks Like Business

"Mr. Herb. Helwig of Neustadt spent last Saturday evening with one of the fair sexes who are inmates of Ye Editor's home, better news later if things develop as anticipated by the way Ye Editor sees it."—Ayton Advance.

CARGILL PEOPLE PRESENT

The Popular G. T. R. Agent With A Purse Of Gold Prior to His Leaving for Walkerton.

The news that the popular G. T. R. agent at Cargill, Mr. James Clancy, had been promoted to the Walkerton agency, was a signal for his host of friends in our neighbouring village to get busy and give him a hearty send-off. Jim says with a grin, that if he had known how fond of him the people were up there, he could not have been paid to leave that dear old Cargill. Below we publish an address presented to him along with a well-filled purse of gold, by the citizens of Cargill.

To Mr. James Clancy,
Agent Grand Trunk Ry.,
Cargill, Ontario.

Dear Jimmy:—We address you thus informally because in thinking of you it is always "Jimmy" and in our hearts also, your memory will be preserved as "Jimmy," as is both right and proper in the case of friends which we all have the honor to be.

Having been born in this vicinity your life has been open to the scrutinies and criticisms of the community and we are glad to be able to say that we have never heard of any of the latter which would reflect in any way upon the honour or integrity of a gentleman.

In pursuit of your occupation it was necessary for you to reside elsewhere for a comparitively short space of time. It is now some nine years since you have returned to the fold, during which time you have been in daily intercourse with the Public as agent of the Grand Trunk Railway at this place—years which have been all too short when weighed in the scales of either our business dealings or social intercourse.

In business your courteous manner, willingness to oblige, and unfailing good humor have proved a great asset for you, as well as a pleasure and joy to those with whom you came in contact.

Socially and as a citizen of the village you have always cheerfully borne your share of any work or other contribution necessary to render successful any project which the citizens entered into, whether for purposes of sport, entertainment or in aid of any of the various Patriotic schemes so prevalent since the advent of the most lamentable war.

For the above mentioned reasons we now learn with the most sincere regret that you have been appointed to another office and will soon leave us to take up the duties thereof.

While regretting your departure it is some consolation to know that your new duties will take you but a short distance from us, in the meantime at any rate; so that we hope to have the pleasure of often renewing the friendship formed during many pleasant years.

We cannot however, allow you to leave us without congratulating you upon your well earned promotion, and expressing the wish that you may have every success at your new post together with health and happiness to enjoy the fruits thereof. And that in due course as your merits become better known to your Chief's still higher steps on the ladder of promotion may become accessible to you.

Your friends could not allow you to leave them without in some way expressing their appreciation of you as a friend and citizen and intended purchasing something which might assist you to remember them in years to come. They have considered it better however, to present you with this purse from the contents of which they desire that you should purchase something which will add to your personal comfort and continually remind you of the many friends you will always find in the little village of Cargill.

Signed on behalf of the citizens of Cargill and vicinity;—Arch. Ziegler, Geo. Sirrs, G. T. Saunders, H. A. Fowlie.

TRAFALGAR DAY FUND

The following corrections are made in Trafalgar Day contributions as published in last week's paper—

10.00—D. McKerracher instead D. McKechnie. D. Trall instead D. Neill.
2.00—Mrs. Dr. Kells instead Mrs. Dr. Shells.
1.00—Mrs. McKerracher, instead Miss McKerracher.
1.00—Mrs J. Krueger instead Mrs Krueger, Miss Lizzie Holm and Miss Sophia Holm—1.00 each.
25c.—M. P. Lowry instead Mr P. Lowry, Miss Maloney instead Miss M. Maloney.

The following additional contributions to Trafalgar Day Fund since publication —1.00, Andrew McLean, James Conners, N. Eidt.—50c, Miss J. Sweeney, C. VonHatten.

AN EVIL HERITAGE

"Oh, that's it, is it? But that's all nonsense, you know, my dear Marian. Of course it's very kind and [illegible], you know, and all that sort of thing, to take up my interests so hotly, but Sybil really would have had no choice in the matter; she could not have married without her father's consent."

"Why not?" asked Marian, with a touch of doggedness. "Does she not like you more than she likes her father?"

Bernard looked surprised, and then shrugged his shoulders.

"Well, well," he laughed, with, for him, almost a trifle of embarrassment, "that is another question altogether, and one which there is no need to discuss here, since all has turned out well, thank God. I will tell you more about Sybil on the way home, for it is clear now that I can sail on Thursday. You must get to understand her, and—to appreciate her," he added, almost a little defiantly, and looking at Marian, as though he meant to say, "Deny, if you dare, that there is anything to appreciate in her."

"There will be no difficulty about a certified copy, will there, Miss McCrie?" and he turned to that lady. "And if there are any other bothers or formalities to go through, the things can be sent after me, but as for myself, no one in their senses, surely, would expect me to miss a mail, of my own free will;" and he smiled irresistibly at everybody all round.

"Which of these two blue flowers is a forget-me-not?" asked Miss McCrie, coming rather quickly across the room and placing herself so that she stood between Marian and Bernard. She was glad that she had done so, for, as Marian silently took up the pencil, Miss McCrie noticed that the girl's fingers were shaking pitiably.

But what neither she nor Marian noticed was that in the flurry of the moment the name was written on the wrong card. And in this way it happened that for many years to come the place of honour in the sandal-wood box was occupied by a usurper, and that until her dying day "Miss Mercury" thought of a blue-bell when she meant a forget-me-not.

CHAPTER XXVIII.

Both Bernard and Mr. Hibbert spent that night at Cane Hill. The steady pour which continued all evening furnished Miss McCrie with a welcome excuse for holding fast these two guests. Not that Mr. Hibbert, in particular, required much holding fast; it was evident that something about Cane Hill still enchained his interest in an unusual degree.

Of course it had not been the schedules nor the impending visit of the new inspector that had brought Mr. Hibbert to the house that afternoon. They had done very well as an excuse, even if a transparent one; the real reason had been an idea which had come to him with the early light that morning, and which had seemed to contain a distant glimmer of hope. He had come over with the intention—neither more nor less—of retracting his declaration of yesterday, not, indeed, of saying to Marian in so many words, "I do not love you," but of saying, "Forget that I have said, 'I love you.' It was a moment of [illegible]ness—who knows? Perhaps it was even a mistake. Let us be friends as we were before."

Mr. Hibbert was not a cunning man by nature, and yet there was a touch of cunning in that suggestion to be thrown out concerning the non-existence of his love. If anything could rouse her it would be that, for, after all, she was a woman. The whole plan was wisely laid; for in this way he would escape from the banishment which is the lot of the unsuccessful lover; and he would be able to watch at a convenient distance for any signs of that successful lover whom he still vaguely and desperately hoped to overcome.

When Bernard named himself his suspicions had been aroused, with the recognition that this was the [illegible] man who had seen off father and daughter in February, these suspicions had grown apace; but it was not until the moment when Marian started from her chair and snatched her hand out of Bernard's that positive certainty came to him. What was vague and distant to the eyes of the man who also got what he wanted, was terribly near and clear to the eyes of jealousy. When Marian said, "Is Sybil that girl in the cream-colored dress, whom you spoke to that evening?" he knew the truth as certainly as though she had said, "I love my cousin Bernard, and none other but him."

Despite the persistent [illegible] the road Cane Hill was singularly [illegible] that evening, not only [illegible] where Miss McCrie had all the petroleum lamps she possessed collected in the drawing-room, in honour of her extra guests—but also [illegible] where Bil and Jeremiah indulged in an abnormal quantity of rum and [illegible] on the strength of the [illegible] which Bernard had been unable to [illegible] distributing as a means of celebrating his engagement, and the nearest substitute that came to hand for the rejoicing of [illegible] at home. And if noise was to be taken as a gauge, the substitute was a very respectable one. The [illegible] Jeremiah who, in his own words, was always "feely and truli glad" when he heard of any person being well or happy, celebrated the occasion by a [illegible] of more [illegible] grotesque [illegible] songs, and Bil, with whom, as the reader scarcely needs to be told, Jeremiah looked forward to being some day in the same way [illegible] young Buccra" hoped to [illegible] "the young lady at home," [illegible] contributed her part to the [illegible] clapping her hands and [illegible] glasses in measure to the [illegible].

Meanwhile, as in the drawing-room Miss McCrie was doing her best to keep the talk going, and was succeeding pretty well. Both Bernard and Marian helped her. Bernard, because he had more to say than he could hope to be done with, to-day; and Marian, because, in the reaction of shame that had come over her at the thought of how nearly she had betrayed her secret that afternoon, she was doing everything that could be done to keep up appearances.

The only person who gave no help to Miss McCrie was Mr. Hibbert. He might as well not have been in the room for any part he took in the conversation. It was about half an hour after supper when he rose and almost slunk out of the door. He could do so with impunity under cover of the lively talk and laughter. Nobody was thinking of him.

Outside in the passage he stood still and turned over the thought in his mind. He was suffering acutely at the collapse of all his hopes; but it was neither his hopes nor their collapse that were occupying him at this moment—it was a torturing curiosity which had got him in its grip. Every word spoken to Bernard that afternoon had sunk into his mind like a stone to the bottom of the water. He had noted his astonishment, his evident bewilderment. Also he knew that an irregularity in a West Indian register was not an impossibility, and it appeared to him ever more and more forcibly that this matter could bear a little more clearing up. What if there were a screw loose about the position of this man who was his rival, whom he hated already with a force of hatred which he had never suspected himself of possessing? A thrill of wild exultation ran through him at the bare thought of such a possibility. The first thing to suggest itself was an examination of the registers downstairs. It was with no more distinct object in his mind than that of satisfying his curiosity that he had stolen from the room, and that he now felt his way down the unlighted staircase. It was not in his nature to step with this catlike tread; he hated himself for doing so; but the passion within him made everything else appear of small importance.

The dining-room was dark, but Mr. Hibbert knew the nooks and corners of Cane Hill, and had soon provided himself with a candle, by the light of which, and with the kitchen concert [illegible] in his ears, he presently sat down to his task, for, being equally familiar with the [illegible] and the given volumes, it had not taken him long to unearth the Death Register of 1829.

He found the entry of the death of Caroline Berrincott without difficulty, and, having carefully read it through, was about to close the volume with a sense of disappointment, when the tallow candle at his elbow, flickering up with a momentary glare, showed him the entry in a taller light than the one in which he had yet seen it. In that moment his attention was arrested by a circumstance which he had not before observed. All the entries on that page, or indeed in that book, were written in ink that had long since faded; the record of Caroline Berrincott's death was no exception to the rule, all but the 2 of the 29 in the column headed Date of Death, which was a distinct shade blacker than the rest. A casual observer would probably not have noticed it. But Mr. Hibbert was no casual observer. He held the volume nearer to the light and looked again. He stooped so low over the page that he came near to singeing his hair. He examined and re-examined and made experiments with his forefinger, and all the time he could hear the sound of laughter about his head, and Jeremiah's latest [illegible] song sounded [illegible] from one of the back regions.

After a time he seemed to have arrived at some conclusion. Had there been anyone in the room to observe his expression as he laid down the volume and raised his head, it would have been seen that he was looking [illegible] much more puzzled than Bernard had looked that afternoon. It seemed to Mr. Hibbert that the register had been tampered with. Some person had quite recently made an alteration in the date of Caroline Berrincott's death. The freshness of the ink as well as the surface of the paper were enough to prove that it was so, only, [illegible] years, when [illegible] up to the 1830 [illegible] at that [illegible]. There was [illegible] one person [illegible] about Mr. Hibbert [illegible] that his interests [illegible] this date, and that was [illegible] Berrincott [illegible]. This [illegible] the reason [illegible] on Mr. Hibbert's face. He [illegible] he hated the man [illegible] something [illegible] and believing him capable of [illegible]. And [illegible] could there [illegible] other explanation?" Mr. Hibbert, [illegible] the excitement of the moment, decided that there could not. He was [illegible] too anxious to jump to a conclusion too doubtful to have [illegible] to lay hands on to weigh things [illegible]. And this was the man [who] was loved by her!

When he rose from his chair the [illegible] had gone from his face and a [illegible] light shone there instead. He had got this man in his power; he could and would destroy his position in the world [illegible]. This was the first [illegible] thought that came to him [illegible].

[illegible] his position he would [illegible] destroying the prospect of [illegible], and in the thought of Bernard's approaching marriage, Mr. Hibbert had, unknown to himself, found a feeble grain of comfort. Perhaps, after all, it would be wiser to let things [illegible]. After all, what [illegible] Bernard [illegible] never in her love, Mr. Hibbert [illegible] in the drawing-room that evening. He did not feel [illegible] he could [illegible] to drive his way [illegible].

[illegible]

About an hour had passed and, to [illegible] of the sound of [illegible] footsteps [illegible] the [illegible] had retired to rest. [illegible] it began to [illegible] to Mr. Hibbert that his only chance for the night was to send himself to sleep. He had not indeed intended to go to bed at all, but walking up and down and listening to the [illegible] became [illegible], and with the candle in his hand he set out along the passages towards the empty drawing-room, in the hopes of discovering some stray magazine—the duller the better—which might act as a sedative for his overstrained nerves.

But the drawing room was not quite empty, as it turned out. He had reached the open door when, to his annoyance, he perceived the faint glimmer of a candle at the far end of the room. Mr. Hibbert was on the point of turning back, when he recognized Marian standing in front of the bookcase, with her back turned to him, and scanning the shelves before her, apparently with something of the same purpose that had brought him here.

The choice of reading was not great at Cane Hill, as Mr. Hibbert knew, and the books when taken down from the shelves were found to be full of marks and underscorings, and with a damp, mouldy smell about them as though for want of airing.

Without reflecting upon the [illegible] sense of what he was doing, he advanced into the room. At sound of his footsteps she turned with a start, but exclaimed immediately, almost with relief—

"Oh, it is you, Mr. Hibbert! I am looking for something to read."

Mr. Hibbert might easily have said "So am I," and thus given the talk a natural turn; but, instead of doing this, he kept his eyes fixed upon her as he advanced up the room, and did not answer immediately. The relief in her voice had hurt him more than any annoyance could have done. He understood perfectly well that it meant that he was of no account. When he had reached the bookcase, he asked:

"Who did you suppose it was?"

"How can I say?" said Marian with a sort of fictitious lightness, a remnant of artificial gaiety of the evening. "It might have been Bil, or Jeremiah, or—"

"Or your cousin Bernard," completed Mr. Hibbert.

"Or my cousin Bernard," she said, after a second's pause, very deliberately. "Why not? I have got what I want. Good-night, Mr. Hibbert," and taking up her candle with one hand, while with the other she reached at random for the handiest volume on the shelf before him, Marian attempted to pass him.

"One moment more, if you please," said Mr. Hibbert, in so incisive a tone that Marian stood still, wondering what was to come next. "You think very highly of your cousin Bernard, do you not?" asked Mr. Hibbert, with a twitch at the corners of his mouth, as of a man who is enjoying some secret but wicked joke.

"Of course I do," said Marian; and her head went up instinctively, for she had guessed at the sneer on his lips without understanding its meaning.

"You believe him to be true, honest, high-minded, incapable of any mean action?"

"Bernard? Good gracious, Mr. Hibbert, what can ever put such a question into your head? Of course Bernard is the soul of honour; he is everything that is noble and nothing that is mean; he is so good, so kind, so [illegible] incapable even of—"

"Of such an action as a forgery, for instance."

The sound of his own words in the big empty room frightened him after he had spoken them. He had not meant to say it; there had been no distinct intention in his mind when he approached Marian. It was only the sight of the flush on her cheek and the fire in her eyes, of the enthusiastic indignation of her manner that had in one instance, and unawares, broken down the last barrier of his self-control. Even for the sake of the purpose which he had in his mind, it was not so easy to hold his tongue as he fancied it would be when he laid his plan down details.

After he had spoken there was a silence. Marian stood immovable, looking into his face, too much astonished for the first moment to be distinctly alarmed. Then the blood in her cheek slowly retreated, and the fire in her eyes died out.

"What do you mean?" she asked, below her breath.

Mr. Hibbert had begun to recover himself. "Nothing I am bound to tell you," he said, aware of a certain savage enjoyment in the torture he was inflicting. "It was against my will that the remark escaped me. Please forget that I have spoken. Mr. Berrincott's doings are no business of mine."

"Do you think that he—"

She did not finish her phrase, but stood looking at him with the flickering candle-light dancing on her ghastly face.

"I have not said what I think, or, would I state, it is not my object to entangle your cousin in discreditables of that sort. If, in spite of my silence, he does not escape them, at least you will be able to accuse me of nothing. And very likely he may not escape them, for there are the other entries."

"Which other entries?" asked Marian, very quickly, and a new look of panic came into her eyes.

"Nothing. I forgot you could not understand. I can only say again, please forget that I have spoken. I am a little off my balance to-day, Miss Berrincott, as perhaps you have observed. It will be more prudent to say good-night." And, without another word, he turned and left her standing where she was.

This time it was she who would have retained him, if she could. She stood there, struggling with herself, until he had almost reached the door. Then she made a step forward.

"Mr. Hibbert!" she said in an eager whisper.

But he appeared not to have heard, for he kept on his way, walking rather more hurriedly than before. The next minute his steps were moving down the passage, and Marian stood alone in the big room, with the [illegible] of black shadow leaping up and down upon the walls, and shooting backwards and forwards across the ceiling.

Though Mr. Hibbert had not secured a stray magazine, he was fortunate enough, on regaining his room, to find an old "Williamstown Trumpet" in the pocket of his coat; and this was particularly lucky, for, viewed as an opiate, nothing could be more satisfactory than one of Mr. Rudd's articles upon the sugar-trade. But the distracted magistrate's nerves must have been quite out of reach of remedies, for not even that excellent gentleman's disquisition upon "The Relative Merits of Coolie and Negro Labour" was dull enough to put him to sleep that night.

(To be continued.)

* * *

The fellow who runs through a fortune has made a friend anxious to act as his pacemaker.

Tommy—Pop, soda water is charged. Tommy's Pop—How do you know that, my son? Tommy—'Cause I just had some down at the drug store, an' it's charged to you.

SUNDAY SCHOOL LESSON

Lesson IX., November 26, 1916. A Living Sacrifice. Romans 12: 1-21.

Commentary. I. Entire consecration (vs. 1, 2). 1. I beseech you—Paul is intensely concerned for the spiritual welfare of the Romans. He feels for them and uses strong entreaty in urging them to take a course that he is thoroughly convinced is right. Therefore—The great doctrine of justification and sanctification by faith had been established. Upon this truth as a basis the apostle urged those to whom he wrote to meet the conditions necessary to the attainment of full salvation. By the mercies of God—The abounding mercy of God was shown in the plan of human redemption. Since God has shown such mercy toward fallen humanity, men ought to consecrate themselves wholly and freely to him. That ye present—As the priests presented sacrifices to God in fulfilment of the Mosaic law, so we are called upon to present our offering to the Lord. Your bodies—The body is the agency through which the spiritual nature operates, and the apostle's exhortation is to the effect that every power and faculty of the being should be wholly presented in sacrifice to God, as our entire being is to be dedicated to him. A living sacrifice—The animals devoted to be sacrificed were deprived of life. They were dead before they were burned or otherwise disposed of. As Christians we are wholly devoted to God as sacrifices while we are living. Our powers of soul and mind and body are to belong to Him and to be employed in His service. Holy—The sacrifice required by the Mosaic law must be without blemish and must be set apart for sacred uses, so the Christian must be wholly consecrated to God and must be made pure in heart through the merits of the atonement. Acceptable—God is pleased with a whole-hearted and complete dedication of our entire being to Him. Such a sacrifice is acceptable to Him. Your reasonable service—The service is not external merely, but is essentially spiritual and hearty. It is also reasonable that we should render to God all our service and that service at its best.

2. Be not conformed to this world—"Be not fashioned according to this world" (R. V.). By the world is meant the spirit and customs of the age that leave out of consideration the claims of God. The world is selfish, proud, sensual, irritable, deceitful and stubborn. The Christian has no right or excuse to be "fashioned according to this world," for the spirit of the world is opposed to the spirit of Christianity. Be ye transformed—The word conformed has reference more to the external than to the internal, yet both ideas are involved, but the word transformed here indicates an inward change. The affections, desires, motives and ambitions are changed. By the renewing of your mind—The mind is not here simply the intellectual faculties, but the will, and that disposition from which all grows.—Alford. That ye may prove—"No one can properly prove, test, or enter into an understanding of the will of God unless he has become renewed by grace that is new, in a holy instinct, can discern, in conflicting cases, the will of God from the will of self or of the world. And on this perception he is to act."—Camb. Bib. He proves the excellence of the divine will by experience. Good—God's will in its very nature is good, springing as it does from Him who is infinite in goodness. Acceptable—God's will is agreeable to those who are "transformed by the 'renewing' of their minds." [illegible]

[illegible] is productive of much harm to the one who is guilty of thinking too highly of himself, and it is also harmful to the work of God. But to think soberly—The special direction to be taken by this sober thinking was the recognition by each Christian of the limits of his own gifts, the variety of the gifts of others, and the position of the individual as only a part of the great community.—Camb. Bib. We should not belittle ourselves on the one hand nor should we sustain ourselves too highly on the other. The measure of faith—As God through his mercy has brought salvation to us as individuals, and we have received His grace and have experience and varying ability in the work of God, we are to be [illegible] sober thinking and a readiness to do the particular work to which he calls us. 4. For as we have many members in one body—A clear and impressive illustration is introduced to show the relation of individual Christians to God and to one another. Each member of the body has its own function, and when each does its part, there result health and strength. 5. One body in Christ—Christians have severally their distinctive qualities and ability to labor, yet each one is a member of Christ's body and all are mutually related. The suffering of one member means loss, or [illegible], to all the other members of Christ's body.

6. Having then gifts differing—The body of Christ, which is his church, is a unit made up of many members. The several members differ in ability and in natural traits. One has ability in one direction and another in another, yet a blessed unity inheres in the body of which they are members. According to grace that is given—God has given grace and ability to all, but the special gifts are bestowed according to his will. The prophecy—This word is used to include either the foretelling of future events or the utterance of divine truth. "Every true preacher is in a true sense a prophet. The New Testament prophet blended and exercised in turn, as grace was given him, these various gifts."—Whedon. According to the proportion of faith—Every prophet is exhorted to exercise his gift according to the measure of grace and light that came to him through faith in Christ. He is not to assume to speak from his own authority or impulse, but as God directs him. 7. Ministry—This includes the secular and manual service connected with the church and pertains to what we speak of as the business side. He that teacheth—Teachers are a class of workers in the church whose duty it is to explain and impress the divine truth. In order for one to be a successful teacher he must put his mind and heart in his work. 8. He that exhorteth—The word has in it the thought of comfort together with that of encouragement as well as exhortation. He that giveth—In noting the various gifts which are here enumerated we see that every member of the body of Christ has the ability bestowed upon him to do something in the church. Every one should be a giver, but God has endowed some with a special gift to acquire property and distribute it to others. With simplicity—With no selfish or unworthy motive. He that ruleth—Let those who are given places of authority in the church exercise the authority faithfully for the good of the cause. He that sheweth mercy, with cheerfulness—To some is intrusted the special gift of relieving those who are in various kinds of distress. Such persons are exhorted to use the gift with gladness, in being kind to others.

II. [illegible] toward others (vs. 9-21). [illegible] the practical [illegible] pertain to the Christian life. Love is the basis of right conduct. Love accords to every person his rights and does even more than is ordinarily regarded as giving to others their rights. Love holds it a privilege to be kind to those who are unkind to him. It is the [illegible]

PRACTICAL SURVEY.

Topic—Christian consecration.

I. Entire in its devotion to God.
II. Fervent in fellowship with men.
III. Faithful in personal discipline.

I. Entire in its devotion to God. This chapter breathes the spirit of the Sermon on the Mount. It is rich and beautiful in practical exhortation. Devotion, fellowship and discipline are its characteristic features. In presenting the general and comprehensive principle of practical Christianity as a spiritual renewal, beginning with the centre and spring of man's being, Paul adopted a manner of gentle and affectionate persuasion toward the Romans. He declared that the presentation to God of themselves was the one great act in which all specific acts of obedience were summed up and involved. His language implied that redemption by his salvation was to be no optional or indifferent matter. He regarded justification as an initial step which must be followed by a "giving up of ourselves to the Lord." Since they only who have obtained mercy could present a living sacrifice, Paul embodied the whole of Christian life in that one master word "sacrifice." Human character and life is treated as something to be formed and fashioned by the personal will under the Spirit of God, the mightiest of all powers of transformation. The foundation of all transformation of character and conduct is shown to be laid down in a renewed mind, from which the inward life passes into outward conduct, where inward consecration is manifested by outward sacrifice, the sacrifice of the whole man in the dedication of himself to God, thus including the activities and energies of the body, soul and spirit. By "the world" is meant everything in it which is antagonistic to the truth or the life of God in the soul of man. It is fallen humanity acting out itself in the human family, moulding and fashioning the framework of society in accordance with its own tendencies. Christianity addresses itself to man as he is, a citizen of the world, having work in the world to do. Instead of unfitting a man for a place in the world, transformation enables him to live in it, appreciate the world as it is and exercise an influence over it.

II. Fervent in fellowship with men. Paul explained how consecration must be manifested in actual life, and how the will of God might be practically proved and how the purposes of divine grace are fulfilled when each bears his brother's burden and joins his brother's song. Paul put upon record the graces and qualifications he deemed necessary to every Christian life. He specified several forms of ministry as of peculiar interest and value. He specified the manner of life which should be displayed among Christians and in their association with the unchristian world. Foremost among his exhortations was the requirement of brotherly love and kindness. These involve all virtue and form the compendium of the moral law. He showed that the mission of Christianity is to enter into and take possession of man's spiritual nature, control and govern his life and shape his social relations. Paul mentioned six features which should characterize the dealings of Christians with others—sincerity, discrimination, generosity, sympathy, humility and peaceableness. He comprehensively surveyed the whole range of human action and conduct. He laid down the Christian principles of civil government and obedience in a picture of life in its length and breadth and in its lights and shadows. Great importance is attached to the exercise of man's faculties. In elevating him Christianity elevates his employment. It is a gospel of renewal. It is a system of doctrines and duties. Piety is a constellation of virtues.

III. Faithful in personal discipline. The will of God is perfect, admitting of no amendment, no censure, no improvement. To attain to it is to reach a moral height, above which nothing towers. Paul described the practical difference which he taught should characterize and distinguish all Christian service. He enumerated duties which the Christian owes to himself, diligence, fervency, zeal, hope, joy, patience and perseverance. He must be ever on the watch against sin, yet never disheartened by its power, distrustful of self but never of God. His religion must not consist merely in abstaining, avoiding and abhorring, but in being, doing and delighting. Christian sacrifice does not consist in a solitary act. It becomes the prevailing habit of life. Consecration may be an act of a moment, but the carrying out of the vow is the work of a lifetime. T. R. A.

An attractive separate bodice is shown here, developed in black chiffon and lace over flesh georgette crepe. The shawl collar, cuffs and three quarter length sleeves, are especially notable.

—THE— Quiet Hour
FOR THOUGHTFUL PEOPLE

THE LIGHT THAT IS FELT.

A tender child of summers three,
Seeking her little bed at night,
Paused on the dark stair timidly.
"Oh, mother, take my hand," said she,
"And then the dark will all be light."

We older children grope our way
From dark behind to dark before;
And only when our hands we lay,
Dear Lord, in Thine, the night is day,
And there is darkness nevermore.

Reach downwards to the sunless days
Wherein our guides are blind as we,
And faith is small and hope delays;
Take Thou the hands of prayer we raise,
And let us feel the light of Thee.

J. G. Whittier.

SAVED BY HIS LIFE.

"And such were some of you: but ye are washed, but ye are sanctified, but ye are justified in the name of the Lord Jesus, and by the Spirit of our God." [illegible]

[illegible]

LIMITATIONS.

[illegible] limit. There is the limit in orders in the church, in the secret society and in earning. We have judges, magistrates, rulers; some are born great, some achieve greatness, some have greatness thrust upon them. Oh! these limitations, and yet,

"Stone walls do not a prison make,
Nor iron bars a cage."

I am a son of the light; the sun keeps my time, the moon keeps watch, the stars invite a worship.

"An undevout astronomer is mad."

My flesh demands my care; I must clothe, feed, protect my body; I must serve my neighbor, for no man liveth unto himself; but there is something more. I am a spirit; herein is my dignity, nobility and worth. It is my privilege to retire from my time limit, and go into the spirit arena and feel myself at home with the highest, most worthy of all ages. There are minds of [illegible] of abilities, [illegible]. I am a spirit, I am from God, I am with God, I am for God. I live and move and have my being from Him. This is my regal endowment; this is the ruling power, where time, and flesh, and sea are no more. Temptations come to this high level; this is the battleground of life; here is conflict, victory or defeat.

Satan tempts, and appeals to flesh and blood and many go under. [illegible] "All this will I give," says the tempter. Speed is a temptation. Think a moment. I count this small, because I have power which transcends all inventions of man. I fly faster than the bird-man. I defy storms, darkness, mountains, oceans. [illegible] I am in Cairo, the Cape, Calcutta, California and back in Colchester before you have time to take off your hat.

This spirit is never hungry or thirsty or weary or in want of sleep. It lives on and on, and if Providence keeps me on earth for twenty hundred years I shall not at the end feel in need of a new soul. There is a spirit in man; here is our worth, our relation, our dignified duty. It is the destiny of man to serve. It is our privilege to touch the Infinite, to speak through the long distance phone, and hail the spirits of just men made perfect, see the angels, talk with Moses and Noah and Enoch and Adam. Nay! We come nearer God! We walk with the Son of Mary. It is glory, dignity and power. The power of the world to come is open us; we have more than the strength of the hills. Men make terrible mistakes when they limit the Holy One of Israel, and thereby limit themselves. They bring small thoughts to big subjects, and if we limit truth, it will revenge itself by limiting us. "Thou thoughtest that I was such an one as thyself, but I will rebuke thee," said the Lord.

"He chose me for His service,
And gave me power to choose
That blessed, perfect freedom
Which I shall never lose.

"Reign over me, Lord Jesus,
Oh, make my heart Thy throne;
It shall be Thine, dear Saviour,
It shall be Thine alone."

H. T. Miller.

CONSTIPATIO
THE COMMONEST ILL

Constipation is one of the commo ills of mankind and one too often all to go unlooked after until some [illegible] complication sets in.

If the bowels are properly looked after there will be no constipation, jaundice, sick or bilious headaches, heartburn, coated tongue, sour stomach, floating specks before the eyes, etc.

Milburn's Laxa-Liver Pills will keep the bowels regular and cure all liver ills.

Mr. Philip McLeod, Tarbot, N.S., writes:—"I suffered from constipation ever since I can remember, and for years had pains in the left side of the back. If I walked across the kitchen floor I would have to sit down and rest. That I think was terrible for a man of 21 years of age. The condition of my system was shown by pimples breaking out on my face. I suffered so much pain and [illegible] in my back I am sure my system was full of poison. Milburn's Laxa-Liver Pills have entirely cured me. I thoroughly recommend them to everybody."

Milburn's Laxa-Liver Pills are 25c. a vial, 5 vials $1.00, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

MAKING A START
The Lone Englishwoman on the Prairie.

(By Mary Mortimer Maxwell, Special Correspondent Daily Express.)

Hamilton, Ontario—The farmer sat on the stump of a birch tree, and I stood amid the wheat stubble. He did not believe in Englishwomen who came over to Canada, and as for my proposition that they should become farmers—well, it simply made him smile.

He admitted that Canada had need of thousands of more women than she already had. Wasn't his own wife sending a "hired girl" at twenty dollars a month, and wasn't every neighbor woman in the same predicament?

"Women are tired of domestic work, and can you blame them?" I said to him. "Thousands of women are now becoming adept agricultural workers over there. Till the war is over they are needed in the Old Country, but afterwards, why can't they come to Canada, and grow up with the country and own land, and work it?"

THOSE CHICKENS.

The farmer began to explain to me that it wasn't "women's work," but the great advantage I had with him was that he possessed imagination, and finally he began, under tactful tutelage, to use the gift.

"Now, this woman who would want me to give her a job would she have any money?" he asked.

"We will say she arrived in your town with only fifteen pounds to her name—that is to say, seventy-five dollars of Canadian money," I said.

"She'd ought to put that seventy-five dollars right away in the bank," he said, decidedly.

"Before she gets a job?" I asked.

"Sure," said the farmer.

"What else should she do?" I asked.

"Look at them chickens getting fat and no cost to me for three months?" he said, and at first I regarded his remark as a digression. "I've got about forty chickens feeding themselves here on the grain that's been dropped about and missed in the harvesting. Three months — August, September and October — them hens can pick up and support themselves and no expense to me."

"Well," I said, "do you mean that Englishwomen could follow the example of hens and live for three months off a harvested wheat field?"

"Sure," he answered. "If I had a capable woman like them you say are working on the English land, I could raise 400 chickens on this field. Why, there's millions of grains of wheat all over this field, but I can't spend my time tending to more chickens, carrying water out to 'em, and hunting the eggs, and my wife's got all she can do, and more, to look after the house, and so I've forty chickens instead of four hundred. Now, suppose your Englishwoman came along and noticed this field and began counting chickens that wasn't hatched and offered to hatch 'em, as you might say, she wouldn't have to go on the next farm and get a job. No, ma'am! All we Canadians ask the Englishwomen to do is to use their gumption, and if they haven't got gumption, don't let 'em come here!"

GUMPTION.

"About that Englishwoman who arrives here with seventy-five dollars," I said. "Just tell me how she'd manage things if she had gumption."

"Well, as I said, first thing she'd put that seventy-five dollars in the bank. Then she'd go to the market and take a look at the farmers' wives that are selling fruit and vegetables, which [illegible] one she liked the looks of, and she'd say to her, 'I'm over from England, and I want a job right away, and I like your looks, and I guess I'll come out to your farm and work for fifteen dollars a month.'

"The farmer's wife would say, 'What will you do for your fifteen dollars?' and the Englishwoman says, 'Anything and everything.' Then the farmer's wife say, 'That means you can't do anything! I've seen your kind before, and I don't want any more of you!' 'But,' says the Englishwoman, 'You try me a week and see, and as you don't believe in me, I'll come for five dollars a month till I prove I'm worth fifteen.'

"That's the kind of talk that makes the farmer's wife sit up and take notice, so she closes with the girl, and off they go to the farm, and the first thing the girl wants when she gets to the farm is an alarm clock—just to show the farmer's wife she intends to get up early. There's nothing pleases us Canadians better than when people from the Old Country make us give 'em alarm clocks. It's what the newspapers call an evidence of good faith.

ON HER OWN.

"Next morning the alarm clock goes off at half-past four, and the Englishwoman gets down to the kitchen about five, and she insists on helping to dress the children, for there's nothing so hard on the farmer's wife as to have to dress the children with one hand and set the breakfast table with the other.

"That there Englishwoman hears the farmer say one day that he can't get a man to help with the haying, and she up and says at the table, 'Let me lend a hand!' and the farmer says, 'Sho'! I don't want any women folks pitchin' hay!' but she doesn't pay any attention to that, and out she goes into the hay field and pitches, and she does it so well the farmer lets her do it for a week, and when the second week's up he tells his wife to pay her three dollars instead of one and a quarter.

"All the time the Englishwoman watches how things are done, and she hangs around the barn and the stable and offers to hitch up the horses, and the farmer lets her try, because he knows she can't do it. But she harnesses and hitches those horses, and she goes out and helps cut the wheat, and when the wheat's all cut she sees a lot of grain lying round wasting on the ground, and she says to the farmer, 'Why can't we raise a lot of chickens on this field?' At the end of that week the farmer tells his wife to pay the girl four dollars.

"Well, that's the way it goes on, and when the Englishwoman's been with the farmer for two years, and he is giving her thirty dollars a month and board and a nice room, she says to him one day, 'I'm going to move on now!'

"Where to?" asks the farmer.

"Out to Saskatchewan," says she, "to take up my own land and be my own farmer, and build a house!"

HOUSEHOLD HINTS.

Stains, Ceiling Soil, Tablecloth Wear and a Pudding Hint.

Take out grass stains with alcohol.

When the ceiling above the gas jet has become blackened, apply a layer of starch and water to it with a piece of clean flannel, let it dry and then brush off lightly, when no marks will remain.

Cut an inch off one side of your tablecloths as soon as they begin to show signs of wear, and hem the raw edges. This will make the folds come in a slightly different place, and they will last for longer than if always folded in the same way.

When lining a basin with paste for a beefsteak pudding, cut a piece of the paste away from the bottom about the size of a 50-cent piece, then put in the meat as usual, and it will be found that the pudding will take an hour less to cook than if lined in the ordinary way.

Odd and Interesting Facts.

Dominica has a boiling lake of unknown depth.

Native girls of New Britain are kept in cages until they marry.

Nine cubic inches of water frozen will measure ten cubic inches.

A bird that cannot fly is the black wood hen of New Zealand.

Eleven grains of radium were produced in the United States last year.

Ice is made use of in a Texas orchard to retard the budding until desired.

Many spiders have poison fangs, but few are dangerous to human beings.

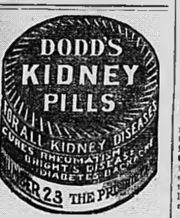
The world's ski jumping record is held by an American, who covered a distance of just under 192 feet.

In Wales the hedgegarlic, or, as it is more commonly called, "Jack-by-the-hedge," is often fried with bacon.

The Mannlicher-Carcano rifle carried by the Italian soldier is six in. longer than the British rifle and four ounces heavier.

Alligators' eggs are eaten by natives in the West Indies and Western Africa. They are similar to a hen's eggs in shape and taste, but larger.

China has the largest bridge in the world, extending five and a quarter miles over an arm of the Yellow Sea, and being supported on 300 stone arches.



Queer Tail of a Bird.

Signal officer of the birds' army corps is the racket tailed humming bird. For his duties nature has equipped him with a pair of purple flags fashioned out of two long and peculiar tail feathers. He wigwags his signals from one tree to another, issues his challenges to battle and courts his mate. When he's not signaling he's sipping honey from the flowers and trying to keep his tail from entangling itself in the briars.

He's a midget of the South American mountains. He has short wings, which he operates at lightning speed. His tail is a combination of two wire-like handles, with a purple tuft of feathers at the end of each. He crosses them near the middle, and sometimes he brings the pair of "rackets" at the end to his head, as though trying to fan himself.

The male birds have a sort of love dance which they engage in during the mating season. Then they play all sorts of tricks with the rackets.—Philadelphia North American.

FARM AND GARDEN

MOTOR TRUCKS AND THE FARM.

This is an era of facilities. Man has accomplished wonderful things in many ways, but none of more importance than the conveniences he has supplied the farmer. Originally the automobile was a luxury, today it is a vehicle of necessity. The tractors followed, and now the auto truck.

A one-ton truck is capable of covering 18 miles in an hour, while with a horse and wagon it is good work to travel four miles in that time. Even the five-ton truck will get over 10 miles in the same time.

Arguments in favor of the auto truck for the farmer are (1) that there is no "baggage smashing," the goods are not re-handled while en route, and, in consequence, arrive at destination in a better condition. The bumps incident to shifting cars on a railroad frequently causes considerable damage.

(2) By auto truck goods can be delivered to the door at destination, which only guarantees delivery in a better condition, but the cost of extra labor is saved, quite an expense in itself.

(3) With auto truck there need be no extra handling and cartage, as is the case when sending by freight. This avoidance of frequent handling and no scheduled time for starting, thus avoiding a rush in packing, which is often accompanied by carelessness. The railroad train must leave at a fixed time. With the auto truck a little delay will not inconvenience anyone.

Rural competition is increasing, and ways and means for increasing the speed and decreasing the cost of delivery are becoming popular among the orchards, market gardens and poultry farms.

The motor car enables its owner to rise later in the morning and yet get to market at the customary time. He is able to gather his tender fruit in the cool of the day and place it in market, or the shipping point, the same afternoon. It moves him closer to the customary market and places him within easy striking distance of other markets.

As now built, the motor truck is capable of traveling over all kinds of roads, and in all kinds of weather, and will overcome any hill. It has become an all year proposition and relieves the tortures of slow and tiresome delivery.

The products are carried more safely and arrive in better condition than when handled in a market wagon. About one third as much time is spent on the road, and one team is dispensed with. Towns that were practically out of reach by team are within easy distance by motor truck.

The number of users of the motor truck for marketing purposes is rapidly increasing, and their success bids fair to make this method the popular one for conveying farm produce to market. As a saver of time and horses it is economical.

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commissions—and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from trappers for cash than any other five firms in Canada.

FARM NEWS AND VIEWS.

It is claimed by a number of experiment stations that salt, to a great extent, will replace potash. Some authorities, however, are not sure of this under all conditions and in all types of soil. The Atlantic County (N. J.) farm demonstrator advises going easy on salt until results are proved. Several reports from Monmouth and Mercer counties (N. J.) say that salt was a benefit to the potato crop, giving the foliage a lighter green color and an increased yield.

Oiling harness is a task that farmers generally put off too long. It is just the work for stormy weather. One quart of neatsfoot oil will be sufficient for double harness. Wash the harness well with soap and water and hang in a warm room overnight to dry. Next day it will be in good condition to receive the oil. Add a little lampblack to the oil to color it; apply with rag or brush, rubbing it well into the leather, and hang in a warm room overnight. Next day rub well with a dry cloth and it will be ready for use. Harness thus treated is much easier to handle and far less liable to cause galls to the horses and will wear much longer.

Never punish a horse for something which he cannot help. It may be your own fault instead of his that he is unruly and unmanageable.

Here is a Maine farmer's method of ridding his premises of rats and mice: "If you sprinkle sulphur on your barn floor and through your corn as you gather it there will not be a rat or mouse to bother. I have done this for years and have never been bothered with rats or mice. I have some old corn in my crib at present, and not a rat or mouse can be found. In stacking hay or oats sprinkle on the ground and a little through each load, and my word for it, rats or mice can't stay there. A pound of sulphur will be sufficient to preserve a large barn corn, and is good for stock and will not hurt the corn or bread."

Some horses have tender necks and shoulders. These may be hardened, and the skin toughened by bathing several times a week with salt water, to which may be added a small amount of vinegar or alum. An oak bark solution, made by boiling a good quantity of oak bark in water makes a good bath and toughens the skin.

There are many remedies for harness galls and sores. Among them may be mentioned, alcohol, one pint, in which are well shaken the whites of two eggs; a solution of nitrate of silver, ten grains to one ounce of water; sugar of lead or sulphate of zinc, 20 grains to an ounce of water; carbolic acid, one part in 15 parts of glycerine. Any simple astringent wash or powder will effect a cure provided the sores are not irritated by friction.

The dairyman will never know where he stands unless he keeps records. Test for butter fat and keep an accurate table of production for each cow. Without any record you can be a long time locating a "star" boarder.

"Nobody likes to walk about in mud and filth while caring for cattle. With a little work and a small expense the cow lot can be made a better place to go into.

Land plaster used freely in the stables will absorb all odors and increase the fertilizing value of the manure.

Every barn, hog house, or pen should have at least four square feet of window space to each animal, and in dairy barns this should be increased to six or eight square feet, says Frederick W. Ives, of Ohio State University. He adds that light is cheaper than food and more beneficial than gallons of germicides.

"Why do they speak of the 'execution' of a painting?" "Because in the natural order of things it's got to be hung."—Baltimore American.

GASOLINE FUMES.

The Gas Given Off by This Popular Fuel Acts Like an Anesthetic.

Gasoline fumes, in addition to being highly inflammable, are also poisonous to the human being. This fact has only recently been discovered by medical authorities and it is possible that the discovery might have the effect of explaining some deaths that have been ascribed as probably due to other causes. The fumes are poisonous under certain conditions and it is well to have these conditions thoroughly understood, else there may be more deaths from these causes. Combined with enough air there is little or no danger, but when a person is subjected to the influence of the fumes in a confined place the chances are that they will be affected in a way that might have fatal results. So far as their investigations have gone the chemists and medical men who have investigated gasoline poisoning have come to the conclusion that its effects are very much like being overcome with an anesthetic. The victim suddenly collapses and becomes unconscious. During the period when consciousness is lost the people behave very much as do people who have been subjected to ether as an anesthetic. Some of them fight and scream and some of them are perfectly still. As in the case of an anesthetic, the recovery is dependent on the individual. It is not often that there are any bad effects from it, however. In a number of cases that have occurred in Montreal, where the discovery of the poisonous nature of the fumes has been made, the victims were able to return to work the next day. In all of these cases, however, restorative measures were commenced immediately on the man being overcome—the victims being men in these cases—so that there is no evidence of what the fumes will do if the person overcome by them is not given immediate attention. That is, there is no positive evidence so far as the Montreal authorities know. There have been cases where deaths occurred which, in light of the discovery that has been made, may safely be assigned to inhaling gasoline fumes. One of these was the case of a man who was painting or cleaning the inside of a gasoline tank and was found dead. Another was the case of a chauffeur who was found dead in a garage where there was no ventilation and where the fumes of gasoline were very strong. It is pointed out that, in view of the universal custom of using gasoline as a cleaning material by women, it would be well to see that the room where it is used is well ventilated with a steady current of fresh air. There is no danger so long as the fumes are not confined—just as there is little or no danger of explosion when the gas is allowed to mingle freely with the air.

No Girl Need Have A Blotched Face

Whether it be in capturing the heart of man, or making her way through the world by the toil of her hands, a charming and pretty face gives any girl a big advantage. Poor complexion and rough, sallow skin are caused by blood disorders. The cure is simple. Just use Dr. Hamilton's Pills—a reliable family remedy that has for years been the foremost blood remedy in America. That ruddy glow will return to the cheeks, the eyes will brighten, appetite will improve, strength and endurance will come because sound health has been established. Get a 25c box of Dr. Hamilton's Pills to-day. Sold everywhere.

Baby's Sleep and Rest.

The baby should sleep alone in its own crib, protected from flies.

Remove all clothing at bedtime and replace by clean, comfortable night-clothes.

If the baby cries when it should be asleep, it is either sick, overfed, hungry or uncomfortable.

Constant jumping or jarring of the baby is likely to hurt its nerves and upset its digestion.

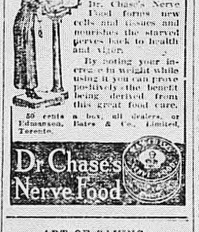
A very young baby during the first three months of its life must have from 16 to 20 hours sleep out of the 24.

Never rock the baby, use pacifiers or comforters to put the baby to sleep. Never let a baby suck a nipple unless he is getting food through it at the proper feeding time.

Never give a baby or children food purchased from pushcarts, hokey pokey, ice-cream wagons, etc. Give only the simplest prescribed foods.

Patent medicines or soothing syrups must never be given to babies. Many deaths of babies and children have been caused by sleeping or soothing medicines.

See that the bedding, diaper and clothing are clean, smooth and unwrinkled; the room should be darkened while the baby sleeps, kept quiet and well ventilated. The windows should always be opened at the top at least six inches, in summer-time wide open.



Note Your Increase In Weight

By making the blood rich and red Dr. Chase's Nerve Food forms new cells and tissues and nourishes the starved nerves back to health and vigor.

ART OF SAVING.

It's Hard to Learn, but Spending Comes Easy.

"It is easy enough to make money," said a business man the other day. "The hard thing to learn is how to save and how to spend it. The first year I was married I was earning three thousand, last year I pulled down four, and this year I am getting away with five. As I've said, it's easy enough to make money—any man with average intelligence can do it—but how in the world are you going to save it? It don't seem to be getting any more pleasure or comfort for the five thousand than I did for three. I am certain I don't put away any more than I did on the smaller salary, and the question that stumps me is, Where does the money go? There is certainly a leak somewhere. The whole trouble lies in the fact that I don't know how to spend it."

This situation is one that many a family faces. All may not be in circumstances as comfortable as those of the man mentioned above, but the situation is practically the same.

Family thrift is almost an unknown quantity in the average American household. Our men are famous for their generosity and most of their wives run their households on the same generous scale. As the income grows larger the demands on it grow bigger, but so gradually does this change take place that it is almost imperceptible. A luxury or two here, a pleasure there, little things which seem of no consequence at the time of their indulgence, but mount up at an alarming rate at the end of a year.

It is quite true that a man might not be able to put his hand on a single tangible thing which he was enjoying with a salary of $5,000 a year that he did not have when his earnings capacity was little more than half this amount. Extravagance creeps upon us so gradually that the inroads it makes upon our incomes are hardly noticed at the time. It is only when we sit down and take account of our mode of existence that we realize we are spending more and getting less for the money.

Every sane man and woman wants to save. They know it is their only insurance against the future. No matter how well matters are going at the present moment, every family stands the chance of facing a rainy day, and if they are wise they wish to be prepared for that dreary occasion. Sickness or loss of position has nothing like the dread for the man and wife who have a comfortable savings account tucked away in some bank as it has for the poor individuals who spend every cent as it comes in, draining the family exchequer to its last cent at the end of each month. Sickness or loss of position to such persons is a disaster, sometimes even a tragedy.

Perhaps you think it is impossible to save on the salary you are earning at present. In many instances, unfortunately, this is true. But, whatever your income, sit down and make out a family budget that shall provide for a certain percentage of savings regularly.

WISE FLORIST.

(Boston Transcript.)

"I ordered some flowers sent to Miss Redbud and I'll be hanged if the florist didn't send them C. O. D."

"Phew! Did she pay for them?"

"She did, and now, deuce take it, I've got to pay her."

Magic "Nerviline" Ends Stiff Neck, Lumbago

Any Curable Muscular or Joint Pain is Instantly Relieved by Nerviline.

GET TRIAL BOTTLE TO-DAY.

You don't have to wait all day to get the kink out of a stiff neck if you rub on Nerviline. And you don't need to go around complaining about lumbago any more. You can rub such things away very quickly with Nerviline. It's the grandest liniment, the quickest to penetrate, the speediest to ease muscular pain of any kind.

One twenty five cent trial bottle of Nerviline will cure any attack of lumbago or lame back. This has been proved a thousand times, just as it was in the case of Mrs. E. J. Graydon, of Caledonia, who writes: "I wouldn't think of going to bed without knowing we had Nerviline in the house. I have used it for twenty-odd years, and appreciate its value as a family remedy more and more every day. If any of the children gets a stiff neck, Nerviline cures quickly. If it is earache, toothache, cold on the chest, sore throat, Nerviline is always my standby. My husband once cured himself of a frightful attack of lumbago by Nerviline, and for a hundred ailments that turn up in a large family Nerviline is by far the best thing to have about you."

WHEN WORK IS PLAY.

The Secret of Contentment is Found in Proper Employment.

A philosopher once said that "no man properly employed was ever miserable." And a more truthful statement was never made.

To be properly employed one must be engaged in a business in which he has faith and confidence and for which he has respect. If he doubts the legitimacy of the business, if he must resort to practices which he feels are questionable, if he isn't proud of his occupation, he is not properly employed. If the work he is given to perform palls upon him, if he feels that he ought to be doing something else, if he envies the other employee his place in the shop or factory, then the work deadens and destroys, and misery follows.

The writers got things balled up when they talked about work and play. Too great a distinction was drawn. Play was pictured as something that gave happiness and work as something which one performed only because he was hungry.

The truth is, it is all play or ought to be, for the man who is properly employed is only engaged in playing. He gets as much delight from it as he formerly got from the childish games or should. Certainly there can be no misery where a man has found his work.

A TALK ON RHEUMATISM

Telling How to Actually Cure This Common and Painful Comedy.

This article is for the man or woman who suffers from rheumatism who wants to be cured, not merely relieved—but actually cured. The most the rheumatic sufferer can hope for in rubbing something on the tender, aching joint, is a little relief. No lotion or liniment ever did or can make a cure. The rheumatic poison is rooted in the blood. Therefore rheumatism can only be cured when this poisonous acid is driven out of the blood. Any doctor will tell you this is true. If you want something that will go right to the root of the trouble in the blood take Dr. Williams' Pink Pills. They make new, rich blood, which drives out the poisonous acid and cures rheumatism to stay cured. The truth of these statements has been proved in thousands of cases throughout Canada, and the following cure is a striking instance. Mr. Henry Smith, St. Jerome, Que., says: "For upwards of a year I was a victim of rheumatism in a most painful form. The trouble was located in my legs and for a long time I was so bad that I could not walk. The sufferings which I endured can only be imagined by those who have been similarly afflicted. Doctors' treatments did not help me and then I began trying other remedies, but with no better results. Finally I was advised to try Dr. Williams' Pink Pills, and although I had begun to lose faith in medicine, I finally decided to give the pills a trial. I am very grateful now that I did so, and after taking eight boxes of the pills the trouble completely disappeared. I was free again from pain and could walk as well as ever I did in my life. I have since taken the pills occasionally as a precautionary measure, and I cannot speak too highly in their favor."

Dr. William's Pink Pills cure all the troubles due to weak, watery blood or broken down nerves. You can get these pills through any dealer in medicine, or by mail postpaid at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

What We Give, We Get

In 1915 and 1916 Ontario contributed more to the Canadian Patriotic Fund than she drew from it, the surplus going to assist those western provinces whose contributions, although exceedingly liberal, did not equal the heavy demands caused by the large enlistment from these provinces. For 1917 the situation will change. The demands from the province on the Fund are estimated to reach six million dollars, and the Committee has decided to ask Ontario to raise that amount—in other words—to make provision only for its own people.

The total represents about one million dollars above the contributions for 1916, and therefore there can be no weariness in well-doing on the part of Ontario's patriotic people so far as the Fund is concerned.

The Daring of British Fliers

As for the way in which British aviators bully the enemy's machines when they can get at them, a few specific examples will illustrate it, says the London Times' correspondent. On Sept. 1 Lieut. —— "encountered a formation of twelve Rolands." Naturally, Lieut. —— got away as fast as he could. Did he? Read this:

"He dived in among them, firing one drum. The formation was broken. Lieut. —— then got under the nearest machine and fired one drum at fifteen yards under the pilot's seat, causing the machine to plunge to earth southeast of Bapaume. Shortly afterwards some more hostile aeroplanes came up in formation. Lieut. —— attacked one, which went down and landed in a gap between two woods. Several other machines were engaged with indecisive results, and, having expended all his ammunition, Lieut. —— returned."

It was careless of Lieut. —— not to have more ammunition about him; but what is one to say of a man like this, who spends a happy day in tackling, first, twelve enemy machines, and then "several" more, diving into them like a hawk into a flight of pigeons, and simply "shooing" them all over the sky?

And that same evening another lieutenant took a hand in the game of fluttering Volscians. The cover which he ran into had only eight birds. He picked out one—doubtless the old cock, though the report does not say so—which "went down in a spin" (you know how a bird does it sometimes), "falling near Bapaume." The neighborhood of Bpaume seems to have been fairly sprinkled with damaged enemy aeroplanes that day.

Another day two officers "encountered six enemy machines near Cambrai." Then follows:

"While he was diving at the hostile patrol leader, three hostile machines dived on the tail of Lieut. A.'s machine. One of the enemy machines was engaged by another pilot, while Lieut. B. engaged another and fired two and a half drums into it as it passed across the tail of his machine. This enemy machine made a vertical dive with a stream of smoke pouring out behind. Lieut. A. turned and opened fire on the third machine with his front gun, firing about twenty rounds at it. The pilot turned and got under the tail, and Lieut. A. also turned and fired another twenty rounds into it, after which it was seen to dive vertically out of control and to turn on its back. The remaining hostile machines dispersed and were seen to land west of Cambrai."

On another occasion one of our machines was attacked by four of the enemy, but, "turning sharply, emptied one drum into the nearest at twenty yards' range," when the enemy turned on its side and fell. The pilot then attacked another machine, which was just above him, firing a drum and a half at close range. The Roland turned a complete cartwheel on its right wing tip, and fell out of control.

These little exploits are only incidents in the regular daily work of our flying men. Their most important job is spotting enemy gun positions, and other things, so that our own guns may get on to them. On one day 132 targets are thus "dealt with." On another day our men go bombing an aerodrome and they see the enemy wheeling all their machines out of the sheds—which they know will be bombed—so our men drop a little lower and bomb the machines in the open. Another time they go for a factory and "a big explosion occurs." Then it is a railway station which "is hit in several places." Or they come down and use their machine-guns on the soldier workers massed about a pithead, or on "the enemy's support lines" or "the second line hostile trenches south of Beaumont Hamel."

One does not wonder that Germans in their trenches hate our aeroplanes. What one does wonder at is that now for two months and more this thing has been going on, and that it is only in bursts, when the protection of bad weather has given the enemy a chance to pull himself together, that the German airmen attempt the initiative at all.

THE HOUSE FOR GIFTS

When in Hamilton do not fail to visit Junor's, the House for Gifts. See our display of China, Art Pottery, Cut Glass and Antique Furniture, Pictures, etc. You will be made welcome.

WIT AND HUMOR

A STREAK OF LUCK.

(Boston Transcript.)

[illegible]

NOT WHAT HE MEANT.

(Judge.)

[illegible]

NAUTICAL ITEM.

(Baltimore American.)

[illegible]

NOT DIFFIDENT.

(Louisville Courier-Journal.)

[illegible]

REALLY CLEVER.

(Detroit Free Press.)

[illegible]

WISE AT LAST.

(Life.)

"What are you going to make of your son Charlie?" I asked.

"Well," replied Charley's father, "I made a doctor of Bob, a lawyer of Ralph, and a minister of Bert, and Joe is a literary man. I think I'll make a laboring man of Charley. I want one of them to have a little money."

CHANGED HIS MIND.

(Birmingham Age-Herald)

"Henry, suppose we call on the new people who have moved in next door."

"Oh, I don't care about meeting them."

"But when their furniture was being carried in I noticed an unusually large and handsome cellaret."

"Ahem! Well, we might drop in for a few minutes, anyway."

HIS LUCK FAILED.

(Boston Transcript.)

Wife (during the spat)—I wasn't anxious to marry you. I refused you six times. Hub—Yes, and then my luck gave out.

JOHNNIE'S MISTAKE.

(Baltimore American.)

"Ma, tigers can't bite people when they don't see 'em, can they?"

"What on earth do you mean, child?"

"I heard pa tell Mr. Smith he was going to find a blind tiger."

WITHOUT HIS BREAKFAST.

(Everybody's Magazine)

Lysander, a New York state farm hand, was telling his troubles to neighbors, and among other things said that the wife of the farmer who employed him was "too darned close for any use."

"This very morning," said he, "she said to me: 'Lysander, do you know how many pancakes you have et this mornin'?' I said, 'No, ma'am, I ain't had no occasion to count 'em.' 'Well,' says she, 'that last one was the twenty-sixth.' And it made me so dodgasted that I jest got up from the table and went to work without my breakfast."

HIS CHOICE.

(Everybody's Magazine)

In the course of this year's campaign in New York city, a young Harvard graduate working for Tammany Hall was making an evening cart-tail speech at Tenth Avenue and Forty-nine street.

"Now," he said, "we come to the tariff. Any tariff to be just and equitable should provide you with a quid pro quo—"

"Friend—" interrupted a begrimed auditor, looking earnestly up into the young orator's face—"Friend if, you don't mind, I'll take a dark beer instead!"

BABY'S QUERY.

(Harper's Magazine)

A pleasure-loving young mother who had, for the first five years of her life, turned over to trained nurses and a governess the care of her only child, was frightened by her physician into giving him some personal attention.

"Dearie," she cried, clasping the child to her breast, "mother is going down South for her darling baby boy's health."

Baby boy gazed at her with big serious eyes. "Mudder," he asked, "are you going to take me wif you?"

DOCTOR'S ORDERS.

(Argonaut)

"Uncle Calhoun," said the owner of the barnyard, as he came upon the old darky late one night, "it can't be good for your rheumatism to be prowling round here in the rain and cold."

"Doctor's orders, sah," the old man answered.

"Doctor's orders? Did he tell you to go prowling round all night?"

"No, sah, not exactly, sah," said Uncle Cal, "but he done ordered me chicken broth."

A Long Lived Eagle.

It has been a tradition from time immemorial that the eagle renews its strength when very old. It mounts aloft until it comes very near the sun, when, scorched by the heat, it throws itself into the sea, whence it emerges full of renewed vigor.

Some have supposed that the passage in Psalms ciii. 5, "Thy youth is renewed like the eagle's," alludes to this old fable. But the more probable fact is that it refers to the strength and vigor which characterizes the eagle even in old age.

A couple of years ago a large specimen of eagle was shot on the fjord by the city of Nakskov, Denmark. Around its neck was fastened a small chain to which was attached a sealed bottle. On opening the bottle a note was found written in Danish, which translated reads as follows: "Caught and again made free by N. and C. Anderson, in the year 1792."

A CLEAN BREAST OF IT.

(Boston Transcript)

Mother (coming from pantry)—Robert, did you pick all the white meat off this chicken?

Bobby—Well, ma, to make a clean breast of it, I did.

HIS MISTAKE.

(Judge)

Hawkins—Baxter's son didn't succeed as a surgeon.

Jenkins—What was the trouble?

Hawkins—Too absent-minded. He operated on one patient for something that another fellow had.

"Smith is one of the most widewake men I know." "I thought you said he was not at all enterprising." "Neither is he. He suffers from insomnia.—Baltimore American.

First Baldhead—Does the elevation of the stage seem necessary to you? Second Baldhead—Yes, since the chorus girls have all taken to wearing long skirts.

"Do you find the life of a commuter pleasant?" "Yes. If you catch your train, you feel relieved, and if you miss it you get a chance to rest a while longer."—Washington Star.

Compare Our Men's Suit & O'coat Values

With any store's in your immediate vicinity or with those of any departmental store.

At no time has the buying power of THIS STORE been so much in evidence as to-day and perhaps in no department is it so marked as among the Clothing. Take a look through our clothing section and you will see rows of wardrobes filled with suits, overcoats and all the wants of men, youths and boys. You will be surprised at the big stock we carry. Bigger stocks, and we believe better stocks than we've ever shown. Compare our prices with others you have in mind and we are positive that when you have seen our stocks and the values we are offering you will want to do your buying here.

These Warm New Boys' Sweater Coats
(Penman's All-wool Quality)

They're here in splendid variety and the best qualities we've ever shown but the important feature is the lowness of price. The good all-wool quality assures comfort and warmth.

These sweaters come in rich shades of khaki, brown, steel grey, silver grey, navy and maroon with either shawl collar or the close buttoning military collar. Sizes 24 to 34. Prices **$1, $1.25, 1.50, $1.75 and $2.00.**

Specially Priced Under-Skirts

Petticoats of fine black Sateen with deep frill **$1.**

Petticoats of heavy Moire, Silk-finished, these are particularly good value at **$2.25**

Both lines have good generous width and well finished.

Cosy New Kimonas at $1.25, 1.50, 2.00, $2.25 & $3.

Made of the new American Paloma Velour, a soft rich material, especially suitable for kimonas. They come in rich flowered patterns and in shades of grey, rose, blue and helio. Cut very roomy and comfy. Sizes 34 to 44. Extra good value at $1.25 to $3.00.

Men's Wool Underwear

You Can't Beat Our Values

Men's heavy ribbed all-wool Underwear, soft and warm and absolutely free of burrs.

This underwear is a special purchase contracted for over a year ago and is worth 50 per cent more money to-day. You will be surprised at the splendid quality, in fact you have never bought better at these prices. Special at 75c, $1, 1.25 & $1.50.

NEIGHBORING VILLAGES & COUNTRYS

News of the Week Collected by Staff of Live Correspon

MILDMAY

Mrs. Geo. Schweitzer and her two sons have returned home from Manitoba, where they spent the past five months.

The ladies of the Sewing Circle of the Sacred Heart Church, assembled at the home of Mr. and Mrs. Thos. Godfrey on Tuesday evening and presented them with a handsome upholstered rocker and a cold meat-fork.

Mr. and Mrs. Alph. Weiler of Woodbridge, visited relatives here last week.

A successful euchre party was held at the home of J. M. Fischer last Tuesday evening.

Miss Vivian Butchart, second daughter of Mr. and Mrs. Ed. Butchart, formerly residents of Mildmay, graduated in the Sick Children's Hospital Toronto, last Friday. She also won the $50 Scholarship.

Mr. Albin Uhrich, who has been home on sick leave for the past two months, has been transferred from the Union Bank at Smith's Falls to Ottawa.

We learn that Mr. Jac. Palm will erect a new brick residence in town next spring.

The next monthly meeting under the Auspices of the Carrick Branch of the Bruce Preparedness League will be held in the Town Hall, Mildmay, on Monday evening, December 4th. The subject to be taken up is "Immigration," and will be discussed by Dr. J. A. Wilson, Dr. L. Doering and J. A. Johnston. A nice program of vocal and instrumental music will also be given. The general public is cordially invited to this meeting, and participate in the discussions.

Liesmer and Kalbfleisch are erecting a garage capable of holding 4 or 5 cars opposite Joe Hesch's blacksmith shop. The cars will be brought down from Walkerton as soon as the building is completed.

Mr. Fred Weiler, grocer who has been running a grocery store next to Helwig Bros. has purchased the building used by Hergott Bros. as a garage this summer. Mr. Weiler will transfer his stock to his new store in the near future.

Mr. Chas. Wendt visited friends in Harriston last Thursday and Friday.

Mr. John Hamel made a business trip to Toronto and vicinity this week. Mr. Hamel reports business booming and has several thousand dollars worth of orders to get out by Christmas.

Mrs. Geo. Lambert visited Harriston friends last week.

Pte. George Weiler received his discharge papers and is now in civilian clothes again. He returned home last week.

CHEPSTOW

Mr. Harry Klein is on a week's visit to his sister, Mrs. F. Kastner at Owen Sound, prior to returning to Kitchener to enter upon a new position.

It is rumored that James Golden who has been in Hamilton for the past few months has answered the country's call and has become attached to a city battalion. By this heroic move Jim indicates his willingness to accept his share of the burden and incidentally duplicates the action of his brother Frank, who is with the troops in England.

We understand that Dr. T. J. Kirby formerly of here, has opened up a medical practice at Formosa. The success which attended his efforts here will no doubt oblige him to extend his activity into our district.

Messrs. Wm. and John Weber have become joint managers of Wm. Coman farm and entered upon their responsible duties on Monday. We understand the agreement calls for an equal division of profits, which as far as we can figure, is on a par with saying that the enterprise should reap for these energetic boys dividends of a veritable gold mine.

Mr. and Mrs. Henry Lippert and child of Toronto, spent a few days of last week with Mr. and Mrs. Geo. Lippert. Harry is at present working on munitions and had the misfortune to develop a serious case of blood-poison in the hand, from which he is at present convalescing.

Mr. and Mrs. Jas. Kritz of Teeswater spent the Sunday with the former's parents, Mr. and Mrs. A. Kritz.

SOLWAY

Mr. Jno. G. Lamberton has purchased a 50 acre farm from Mr. Jno. Bilger near Walkerton.

We are pleased to report that Mrs. B. Craig is able to be around again.

Mr. Alex. Coates of Walkerton, spent Sunday with his parents, Mr. and Mrs. Thos. Coates here.

A meeting of the Brant branch of the Bruce Preparedness League, was held in the Township Hall here on Tuesday.

Mrs. Ben Michell and babe accompanied by Miss Miriam Michell visited at Mr. John Whitehead's Sr. near Walkerton on Wednesday of last week.

Mr. and Mrs. Andrew Lang and Mr. Frank Lang returned from the West recently. We understand that although he liked it very well in the West, Mr. Andrew Lang will purchase a farm in this locality.

Messrs. Henry and Gordon Polman spent Sunday at the home of Mr. Albert Marshall, Walkerton.

VESTA

Miss Bessie Smart has returned from Owen Sound much improved in health.

Mr. Peter McGinity has rented his farm to his son, Percy, and intends moving to Toronto in the Spring.

The Vesta people intend holding prayer meetings in the church this winter.

Mrs. J. Connelly is busy training the young people for the Red Cross Box Social.

Mrs. Ryan Sr., has been on the sick list. We hope ere long to see this esteemed lady in her usual health again.

HANOVER

The home of Mr. and Mrs. S. M. Gateman was bereaved on Tuesday of last week, when the angel of death took away their baby son, Jack Albert, aged 1 year, 10 months and 22 days. The funeral took place on Friday afternoon to the Hanover cemetery. Mr. and Mrs. Gateman have the sympathy of the community.

Jasper Clifton, an employee of the desk factory of the Knechtel Furniture Co., had the three middle fingers of his left hand cut in the rip saw last Friday morning. The ends of two fingers were cut off. Clifton was recently a member of the 160th Bruce Battalion but received his honorable discharge owing to physical unfitness.

PINKERTON

Messrs. Tom and Murdoch Thompson with their sister Susie of Glamis spent Sunday at Mr. D. Pinkerton's.

The village and vicinity were delighted to welcome Pte. Harold Pinkerton home from the front on Saturday on the noon train. Harold enlisted with the 4th Canadian Mounted Rifles in Toronto in the early months of the war and has been at the front for the past 13 months. He received his discharge a couple of months ago, to come back and take a commission in the 160th Battalion, but on reaching Canada found the 160th gone overseas. Harold looks well and has a great many interesting tales to tell.

Mr. Godfrey McKee attended the funeral of a relative in Southampton on Wednesday of last week and the school was closed for the day.

Miss Ella Campbell is visiting friends in Michigan.

Rev. Mr. Howell will speak at the regular services of the Cargill and Pinkerton Presbyterian churches on Sunday next on the Belgium Relief Fund, under the auspices of the Canadian Brotherhood. Rev. Howell is one of the best speakers in the Dominion, endorsed by Premier Hearst and other prominent public men.

GLAMIS

Miss Margaret Cottie returned home from Kincardine on Saturday.

Mr. R. J. Nesbitt is under the Dr.'s care. All wish her a speedy recovery.

Mr. Thomas Robinson, [illegible] West, has purchased Mr. Rich. Needham's farm on 9th con., Kincardine Twp.

The service in the Baptist Church was withdrawn on Sunday morning owing to memorial service for Pte. Wendell Russell, in the Presbyterian Church.

Mrs. Catharine McKinnon spent the past week with her daughter, Mrs. McKinnon of Lucknow.

Tax Collector Kippen for Bruce Twp. was a business caller here on Friday.

On Monday morning, Nov. 20th a gloom was cast over this community when the news of the very sudden and unexpected death of Mrs. Joseph Ferris sr. was made known. The deceased having passed away on Sunday night at the home of her son, James, after a very short illness of less than an hour, death being due to heart failure. The deceased who was in her 71st year, had been a resident here for a good number of years, living 1½ miles west of the village. She was highly respected by everyone. Besides a sorrowing husband she leaves to mourn her loss, four sons, James, Joseph, William and John, and three daughters, Mrs. Alice Dezall, Misses May and Lizzie, all of whom reside here except the latter who is in Toronto. The funeral took place on Tuesday afternoon from her late residence, lot 30, con. 1, Bruce Twp., to Purdy's Cemetery. To the bereaved ones deepest sympathy is extended in their sad affliction.

Mr. Joseph Cunningham attended the Board of Health meeting in Armow on Monday afternoon.

Miss Lizzie Ferris and friend returned to Toronto on Saturday.

Mr. J. H. McIntyre left on Thursday on his return to his home in Edmonton, Alberta.

Mr. Thos. Farquharson of Grandview, Man., is visiting his father Mr. A. Farquharson.

On Wednesday last Mr. and Mrs. Robert Russell received very sad news by an official telegram from Ottawa stating that their youngest son, [illegible] Pte. Wendell Russell had been killed in Action somewhere in France, on Nov. 11th. Wendell was our first young man from here to enlist and has been the first to fall, giving up his life for King and Country. He signed up in Paisley Sept. 24th 1915, with the 71st Batt. and trained in Guelph and Galt. He went overseas May 1st 1916. On Sept. 24th he was wounded. A letter received a short time ago said he had again returned to the trenches, but was not at the firing line. The date of his return to the firing line is not yet known. Wendell was 20 years of age last September. On Sunday morning a memorial service was held in St. Paul's Church for the young soldier, who so nobly did his Bit. To the bereaved family brothers and sisters, heartfelt sympathy is extended. The church was decorated in mourning, the choir being nine young men, friends of Pte. Russell.

EDEN GROVE

The Weather Man seems to still be able to raise the wind alright notwithstanding the high prices of living.

Messrs. Frank O'Reilly and Abbie Seiler have returned from the West and think there's no place like the West, although we noticed they both wore a pleasant smile when returning home.

Now is your time to see the big and little cows, etc. Fare only $2.10 Dec. 1st to 6th to Guelph Winter Fair, good returning Dec. 8th.

The Holley Bros. of Ripley spent the week-end with friends in the Grove.

Mr. and Mrs. Greenway and family of Cargill moved into town this week. Mr. Greenway will work on the railway track.

Messrs. Tees, Desmond and Alex. McKeeman were business visitors to Paisley on Monday.

Rev. Mr. Creighton, Paisley, delivered a very interesting and instructive illustrated lecture in the Methodist Church on Tuesday evening which was greatly enjoyed by the large crowd present. A collection in aid of the Mission Fund was heartily responded to.

P. O'Reily shipped another car of fine Irish canaries Tuesday.

Thos. Birrell & Son loaded a car of flour this week for the county town. The town kiddies will be able to smack their lips over pan cakes and maple syrup now.

A few Pinkerton friends attended the Red Cross meeting held in the Masonic Temple, King St. Thursday afternoon.

Mrs. Todd visited Paisley friends, Monday.

Cheer-up! Indian summer and Santa Claus are on the way.

Miss McCurdy called on Walkerton friends last week.

Miss Mae Fordyce left Tuesday morning for Kincardine.

Something went wrong with our electric plant Monday night, it was so dark you couldn't see your hands behind your back.

The Red Cross Society forwarded each of the 8 Soldier Boys from here a pretty Christmas remembrance last Thursday. We know the young heroes will enjoy the contents of their package which will help cheer their Christmas morn when so far from home.

Mr. and Mrs. A. McKeeman visited Paisley friends, Friday.

Lieut. Harold Pinkerton, who has been overseas for some time, received quite a reception on his return Saturday. Senator J. J. Donnelly, Rev. R. M. Gale and several other prominent men besides a goodly number of the fair sex, extended to him a hearty welcome home. He had a German gun and mask along as souvenirs of the war. Harold is lucky to be so able to return in such good shape.

Miss Jessie Alexander was the guest of Walkerton friends last week.

Mrs. Reynolds of London, who has been spending a couple of months visiting her brother-in-law, "Sunny Jim," returned home Wednesday.

FELL LEADING HIS MEN

Lieut. Les. Young's Body Buried Behind the Enemy Line Which Was Captured in the Attack.

Lieut. S. L. Young, son of Mr. and Mrs. Henry Young of Cargill, who was reported killed in action on Nov. 11th, was hit by a German bullet and killed instantly while gallantly leading his Company of the 46th Batt'n C. E. F. into action. Particulars were received through a brother officer, Lieut. Stan. H. Brocklebank, in a letter received by Mrs. Young the past week. Lieut. Brocklebank writes:—"The sad news of the death in the field of your son will have reached you before this. I was a great pal of his and a brother officer, both in the 71st and 46th Battalions. I would like to express my most sincere sympathy. As an officer he was unsurpassed in efficiency and bravery, which he demonstrated on many occasions and especially at his death when he had charge of A Co. He was leading his men in an attack, he was hit by a bullet, died instantly and now fills a hero's grave behind the line captured. May God comfort you and his many friends. His duty to God, King and Country has been served and we mourn the loss of a good officer and true friend."

His commanding officer, Lt.-Col. H. J. Dawson, writes Mrs. Young:—"It is with very sincere regret that I must write you regarding the death in action of your son, Lieut. S. L. Young, 46th Batt'n, Can. Infantry. I am sure his comrades and friends among the younger officers will tell full particulars of his death. I wish to express to you my admiration of his gallantry and the very profound sorrow with which I learned of the sacrifice which he has been called upon to make. He was with me during the last three months and since he came to France. During that time I had acquired for him a real regard. I always found him reliable, keen to perform his duties and capable. He was liked by his men and held the confidence of his senior officers. I wish to express to you my sincere sympathy."

Another brother officer, Lieut. Lowe, writing Mrs. E. J. Skelton, says:—Leslie was instantly killed by a machine-gun bullet during the advance made by the Canadians on the night of the 10th-11th. I was in the advance not far from him but did not see him get hit and did not know about it till we had driven the Huns out and occupied his trench. It was impossible to carry him back for burial as we buried him behind the captured line. We are arranging to place a cross on the spot. It may please you to know that Leslie was liked by all his fellow officers and being a brave soldier, willing at all times to face the greatest danger.

Capt. Kilmer Home

Capt. Charles E. Kilmer D. S. O., of Toronto, grandson of Mr. N. Crawford, who has been invalided home from the Front, landed at St. John's, N. B., on Tuesday.

TRIBUTE TO LIEUT. LES. YOUNG.

He fell, leading his men to victory:
And some brave comrades bore him to the rear,
Through Death's red lane, and they, the while, could see
The heavens all shell-illumined, and could hear
The booming guns! They wiped his noble face,
And then, uncoffined, gave tired arms surcease
In ground he helped to win, and marked the place
To help Affection, when the morn of Peace
Shall dawn to find her own! Sleep on dear soul!
'Tis more romantic there to take thy rest
Than where thy narrowed kin might visit thee,
The unborn yet, dim-eyed, shall read the roll
Thy plain, white, home church keeps, while unoppressed
Posterity will say: "He died for me!"

MARRIED

Pidman—Wallace—At Toronto, on November 18th, by Rev. A. Logan Greggie, Miss Thusnelda Wallace, daughter of Mr. and Mrs. Joseph Wallace, to Mr. Richard Pidman, only son of Mr. George Pidman, Toronto.

BORN

Kastor—In Brant, on Sunday, Dec. 3rd, to Mr. and Mrs. John Kastor, a daughter.

Kraemer—In Carrick, on Nov. 26th, to Mr. and Mrs. Frank Kraemer, a son.

Schmidt—In Carrick, on Nov. 25th, to Mr. and Mrs. Frank T. Schmidt, a son.

DIED

Newman—In Culross, on Nov. 18th, Miss Patience Newman, in her 67th year.

"ADVERTISING ruined me," said a merchant one day. "How do you figure that out," we asked skeptically. "Why, I let my competitors do it all, and my business went to them.

+ + +

Brant Farmers' Club.

The Annual meeting of the Brant Farmers Club will be held at Mr. W. A. Rowand's on Tuesday evening, December 12th. Ladies welcome.

+ + +

Box Social

Red Cross Box Social at Otter Creek Public School on Wednesday evening, Dec. 27th. Reserve that evening for a good time and a just and worthy cause.

+ + +

Removing to Walkerton

Mr. James Crawford of Brant has sold his farm to his neighbour, Mr. Lang, and will remove to Walkerton shortly. He has taken Mrs. E. C. Clarke's on Colborne St.

+ + +

Buys a Farm

Ex-Coun. Geo. Faust has decided to go farming and has purchased the Parker farm, Town-line Brant and Greenock, Mr. Parker taking Mr. Faust's house in town in part payment.

+ + +

Box Social

A Box Social will be given at S. S. No 2 Brant on Friday night, December 15, the proceeds to go to the Brant Preparedness League. Admission 15c. ladies with boxes free. Mr. Dave Coates will act as auctioneer. Good program has been arranged. 46—47.

+ + +

Had Trench Fever.

Further word has been received from Pte. Leith Russel, son of Coun. Robt. Russel who has been in the Base Hospital in France. Leith writes that he has been suffering from trench fever and blood-poisoning. It is inferred that he had almost recovered at time of writing.

+ + +

Auction Sale

An Auction Sale of Cattle will be held at Chepstow on Thursday, December 14th, commencing at 1 p. m. The list comprises 20 cows, and 10 yearlings. Ten months credit will be given on furnishing approved joint Bankable notes or 7 per cent off for cash. John Wilson, prop. D. C. Cavin, auctioneer.

+ + +

Pidman—Wallace

Miss Thusnelda Wallace, second daughter of Mr. and Mrs. Joseph Wallace of Walkerton was quietly married at Toronto, on November 18th to Mr. Richard Pidman, only son of Mr. Geo. Pidman. The ceremony was performed by Rev. H. Logan Goggie. Mr. and Mrs. Pidman will reside in Toronto.

+ + +

Walkerton Boy Wounded

Mr. Arch Campbell, West Ward, received a telegram on Friday stating that his son, Angus Henry (Harry) Campbell had been admitted to a Boulogne Military Hospital with a gunshot wound. Harry enlisted in the West. A few years ago he was employed in the grist mill here. He was a well known lacrosse player here and was well-liked. His friends here hope to hear news of his recovery soon.

+ + +

Tea Room Opened

One of the busiest spots in town the past week has been the rooms formerly occupied by the Gardiner Millinery, where the young ladies of the Soldiers' Aid, have been getting everything in readiness to open their Tea Room. The new quarters are very attractive and should prove a very inviting spot to the Public. The young ladies deserve everybody's generous support in their worthy efforts to help our own boys at the Front.

+ + +

A Brant Pioneer

Mr. Robert Francis, a highly respected resident of the South Line, Brant, passed away on Friday in his 79th year. Early in the week he had a paralytic stroke which proved fatal. Besides his widow he leaves a large grown-up family. Mr. Francis was a native of England but settled in Brant over fifty years ago. The funeral was held on Monday to Hanover Cemetery, service being conducted by Rev. Mr. Jackson, pastor of Hanover Methodist Church.

+ + +

Constable's Busy Day

With lots of work for everybody, and no time to be idle, it would appear that law and order are very easily maintained these days, judging from the short list of convictions recently posted by Clerk of Peace Thos. Dixon. Some constables are doing their very best to keep the mills of justice going however. We note that a Kincardine man was fined $20 and costs for being drunk, $20 and cost for assault, $20 and cost for assaulting Constable, all on the same day—a case of lightning striking three times in the same place. This chap must be properly impressed with the majesty of the law.

NEWS ABOUT TOWN

News About Town page 5.

Smoke "Pathfinder" at Hunter's.

Read the advertisements. It pays.

Xmas Tags, Cards and Seals at Hunter's.

Miss Maude Stead is visiting friends at Toronto.

Christmas Fair, Wednesday, December 20th.

Get your winter suit and overcoat at S. A. Rife's.

Mr. S. A. Rife was in Toronto on business Tuesday.

Mr. John Rudolph is taking in the Guelph Winter Fair.

Mr. and Mrs. Henry Williams are visiting friends at Galt.

Miss Cooke is spending the week in Detroit and Windsor.

Mr. Justus Holm visited the Guelph Winter Fair on Monday.

You will find many useful and acceptable gifts at Hunter's.

Mr. Gordon Truax of Toronto spent the week-end at his home here.

Miss Jean McLean of Durham is visiting Dr. and Mrs. C. L. Grant.

Mr. and Mrs. Mac. Jones left last week to make their home in Toronto

S. D. Croft, travelling freight agent of the G. T. R. was in town on Thursday.

The McCarter Harness Co. has better goods and sell cheaper than any other in town.

Miss McNally returned on Wednesday from spending a week with friends at Chesley.

Mrs. Ralph Krueger and Miss Oberle are visiting friends at Guelph and Kitchener.

Dr. Lambertus of Pembroke, is visiting his parents, Mr. and Mrs. John Lambertus.

Mr. Thomas J. Halladay of Kilheld, Sask., is expected here on a visit to his old home shortly.

Mr. J. E. Skelton arrived home from a three months' business trip to the West last Thursday.

Miss Hazel Plante of Southampton, has been visiting Miss Mabel Crawford the past week.

Mr. Seraphine Schurter left this week for Chicago to take a position in a printing establishment.

Rev. Thomas Miller of Quaker Hill, near Toronto, visited his sister, Mrs. Joseph Hibbert this week.

Mrs. H. L. Manning and two children of Minneapolis are visiting her parents Mr. and Mrs. D. McKechnie.

Frank Cowle will be here Monday Dec. 11th, to take orders for Hobberlin Suits and Overcoats—Stephan Bros.

A case of alleged blasphemous and grossly insulting language will be up before Magistrate James Tolton to-night.

If hard work is sapping your strength reinforce with "OXO." It gives strength to win, always on sale at Goode & McKay's.

Mrs M. L. Van Horne and children who have been visiting at Mr. Wm. Van Horne's, left Monday for their home in Toronto.

Never had a can of milk or cream returned to us yet. Silver Cow milk and St. Charles evaporated milk are the best brands, on sale at Goode & McKay's.

Mr. Thomas Murray of Clifford, was here over the week-end to see his brother, Joseph Murray, of Culross, who is a patient at the County Hospital.

Stop, think, and figure! Something worth while, this extra profit you make if you confine your order to the leading grocery. The only one price store in Walkerton.—Goode & McKay.

Columbus made an egg stand up on end—but he spoiled the egg! We can remove from our portraits any temporary facial blemish that may be preventing you from having that photograph made to-day, and we do not spoil the likeness. Fraser Studio, Walkerton.

Mr. Hank Irwin, who with his brother, Bob, arrived home from a business trip to the West, says that conditions in Saskatchewan were rather better than he expected to find them. Some farmers had a fair crop while their very next neighbor lost everything through the rust. Farmers who had any crop worth mentioning did fairly well owing to the exceptionally high markets.

Mr. Elias Weiss, who returned home last week from a three months' stay at Fort Saskatchewan, Alta., says that the farmers had a good year in that northern section. Vegetables were especially good. Potatoes were plentiful and of a good size, running as high as 200 bushels to the acre. He brought back two carloads of potatoes bought at 85 cents a bushel, which he disposed of on the track at a good margin of profit at Hamilton and Milverton.

Have you renewed your subscription to the Telescope yet?

A large assortment of sulkers, they are good, at McCarters, price right.

Get one of those silk scarfs at reduced prices, at Woodman & Co's.

Mr. Irwin Zimmer, of Stratford, called on old friends in town Wednesday.

Mr. William Selling arrived home from a two month's visit to the West on Friday.

Fur lined caps for cold weather for autoing or driving make a nice present for Xmas, at Woodman & Co's.

Walkerton merchant's ads, in this week's Telescope are full of good suggestion for the Christmas shpper.

Get some Xmas shirts, collars, gloves hosiery and ties at Woodman & Co's. new store next to Vogan's Hardware.

A good present for your friend is a Trunk, Club-bag, Suit-case to be had at McCarters. Prices and quality right.

Two soldiers came up from London yesterday to take George Welch, the Port Elgin soldier charged with deserting, back to London.

One of those Blue or Black Worsted suitings at the old price for Christmas presents, get it now, made to your measure, at Woodman & Co's.

Candies for the children, candies for the Grown Ups, an assortment of fancy boxes to suit all pockets at the leading grocery.—Goode & McKay.

At all times we pay the highest prices for Turkeys, Geese, Chickens and Ducks. Before disposing of your poultry get in touch with us.—Goode & McKay.

Mr. Thos. Dixon had word that his son, Elliot who was taken ill at the Front with pleurisy, is now at the Ontario Military Hospital at Orpington, England.

It will pay you to call at McCarters and see their large stock of Harness, Blankets, Robes, Whips, Trunks, Club-bags, Suit-cases, on Christmas Fair Day.

Mr. Joseph Murray, who was operated upon at the County Hospital last week for a dangerous attack of appendicitis, is reported to be making excellent progress.

Mr. Charles Prockmow of Clifford has bought from the William's Estate the house and twelve acres of land situated a short distance south of the Biscuit Factory, for $2150. Mr. Prockmow who is a former resident of Carrick, intends making his home here.

Thanks to the interest which Mr. John Rowland is taking in helping the young ladies of the Soldier's Aid, a gay string of multi-colored lights was stretched across Durham St. in front of the Tea Room yesterday. The rooms are being opened Wednesday evening when the members of the County Council will be the guests of Warden McNab at the Tea Room.

+ + +

Strayed

Two young cattle, (gray heifer and red heifer), strayed from Cargill's dump. Suitable reward. Phone or write Wes Abel, R. R. 1, Walkerton.

+ + +

Death At House Of Refuge

The death occurred at House of Refuge on Friday morning of Thomas Blake, a former resident of Eastnor Tp., in his 68th year. Mr. Blake had been an inmate for two years and for over a year had been suffering from cancer of the stomach. He was well liked by everybody. In his suffering, he showed thoughtfulness for others, and always had a pleasant word. He leaves no relatives.

+ + +

Claims Breach Of Contract

Mrs. Hogland, of Michigan, is suing J. Bester, West Ward, in the County Court for breach of contract. Mrs. Hogland claims that Bester, who is a relative, invited her and her husband to come over from Mich. and make their home here. Bester, she claims, said that he would buy a farm and let them live on it. They came over but the farm did not materialize. Robertson & McNab are for the plaintiff, O E. Klein for the defendant.

+ + +

Won Gold Medal

Miss Annie Ferguson, daughter of Chief of Police and Mrs. Ferguson is to be congratulated upon gaining an important honor. Miss Ferguson has graduated from the Stratford Hospital at the head of the 1916 Class of Nurses, thereby winning the coveted gold medal. The diplomas were conferred at a large public gathering in Stratford Opera House on Tuesday night at which Chief Ferguson and his little granddaughter, Irene Ferguson, were present, the latter making a very pretty little flower girl, assisting with the bouquets. Mrs. Ferguson had hoped to be present also but unfortunately was taken ill after arriving at Stratford. She is now improving but is not yet well enough to return home.

Grocers Warned

Convictions are now being registered in Ontario, the penalty being a stiff fine, for provision dealers caught selling other than pure maple syrup. The law now says that telling the customer that the syrup is not absolutely pure will not excuse the grocer who makes the sale. Inspectors are now out, and it may be well for all purveyors to sit up and take notice of the brands of syrup they are passing out.

+ + +

Tagging On Christmas Fair Day

Everybody welcome at drawing of sets of jewelry in Town Hall on Christmas Fair Day, short programme of music from four to five. Everyone drop his little offering in the basket at the door, even children can help with their cents. Every man, woman and child is asked to buy a Preparedness League button and become a member of the League. Remember that the League is to look after returned wounded soldiers, also their families when in trouble. Don't be afraid, do your bit, and don't forget the young ladies of the Soldiers' Aid Tea Room are to serve coffee, tea, sandwiches and cake in the old Council Chamber. Everyone save his change for Christmas Fair Day.

+ + +

Hehn—Raeburn

At High Noon on Tuesday, December 5th, Miss Edna Raeburn, only daughter of Mr. and Mrs. James Raeburn, was united in marriage to Mr. Alfred Hehn, of Walkerton. The bride who was unattended, was given away by her father, the wedding march being played by Mrs. W. McNeil. Rev. C. W. Cosens, pastor of the Methodist Church, performed the ceremony. The bride was prettily gowned in charmeuse satin, and carried a beautiful bouquet of white roses. Among many beautiful presents was a handsome sunburst of pearls, the gift of the groom. Guests were present from Hanover, Ayton, Delhi, and Durham. After a dainty wedding breakfast had been served, Mr. and Mrs. Hehn left on the afternoon train to spend their honeymoon at Niagara Falls and other points. On their return they will make their home in town, Mr. Hehn being engaged in the bakery and confectionery business here. The Telescope unites with their many Walkerton friends in extending all good wishes.

+ + +

Hydro Enabling By-law

The vote which ratepayers of Walkerton will take on Hydro, Monday January 1st, is just a preliminary skirmish. The real contest will come later on. We believe that citizens have everything to gain and nothing to lose by supporting the by-law, no matter whether they are in favour of actually bringing Hydro to Walkerton or not. It usually takes two parties to make a bargain but the Walkerton Power Co., having had everything its own way, has been in the happy position of being able to dictate rates. The passing of the Hydro Enabling By-law will strengthen the Town's hands in dealing with the Power Co. If the Hydro Enabling by-law carries, Walkerton will for the first time have a choice—and it will then be up to the Walkerton Power Co. to make its most attractive proposition. We do not know yet what form the Hydro Electric Power Commission's proposal will take. In any case the proposition would have to be voted upon at a later date before anything could be done. If the Hydro Enabling By-law is beaten on January 1st it will be a mandate to the Walkerton Electric Light and Power Co. to go ahead and charge what it likes. The public will have absolutely no hold on the Company and certainly Hydro will not be in a hurry to look this way again.

+ + +

Fifth Anniversary

Five years ago I bought and took possession of the Saugeen Valley Flour Mills and the following year I completely remodeled the mill equipping it with the best and most up-to-date new machinery for the manufacture of the best grades of Family and Pastry Flour from No 1 Manitoba and Ont. wheat. My favorite brand, Royal Blend Family Flour, is milled for quality and color, NOT bleached, Bread made from Royal Blend has the natural creamy color and flavor that is not found in the tasteless dead white, unhealthy flour. Bring your wheat and get Royal Blend Family flour, Bran and Shorts in exchange. Figure out the saving compared with selling your wheat and buying flour bran and shorts. About two months ago I completed my new cement Bulkhead and metal flume which has fully doubled my power. This enables me better than ever to give you quick service in chopping and oat rolling at the old price 5c. per cwt. You will always find a good stock of bran, shorts and low grades, at close prices. Thanking my customers for their very liberal patronage in the past and trust by courteous treatment and good work to receive the same in the future. Royal Blend Family flour is sold by Mr. J. N. Shefter, Mildmay and at all stores at Walkerton. Every bag guaranteed, highest price paid for wheat at my mill.—J. W. South, Saugeen Valley Flour Mills.

BRUCE COUNTY COUNCIL

Is Considering the Question of Joining the Good Roads Movement at its December Session.

Bruce County Council is in the midst of its December Session at the County Buildings as we go to press. The business of the Session consists principally of clearing the odds and ends of the year's business and passing accounts. The most important item of business is the consideration of the Good Roads by-law. At 4. p. m. Wednesday the by-law had not yet come to a vote but the indications seem to favor the by-law carrying. This requires a two-third vote of the Council, representing fifty per cent or more of the total County Assessment.

The Special Committee, composed of Reeves Anderson, Hunter and Cass, appointed last June to report re Good Roads, presented its report Wednesday morning, presenting the usual by-law for consideration, and suggesting in a rough outline the chief roads through the County, which might be brought under the Good Roads System.

What the Committee have in mind is to establish a thorough system of good roads throughout the County within the next ten to fifteen years. This would be done by a special tax rate of 1½ mills which would raise $12,000 annually, the government adding 40 per cent or $28,000. The government would also pay 20 per cent of the upkeep on all the roads included in the scheme from the moment it came into force.

In presenting the Committee's report, Reeve Anderson said that a County road system could not be built in a day. Ten or fifteen years would be required. By getting the scheme under way now, employment would be ready for the men returning from the war. Statute labour would be commuted. The Townships, he pointed out, would save $10,000 a year in statute labour on the County roads.

Reeve Douglas saw a big saving in the expense of keeping the roads in repair. It cost very much less to repair good roads than bad ones.

Reeve Ballachey thought the larger the area brought under one individual roads scheme the better. After a while it would be enlarged to a Provincial rather than a County basis. The present way of doing things was most expensive.

Reeve (Black Dan) McDonald of Kinloss opposed the by-law. He claimed that it was no advantage to get the government's assistance as it was our own money the government was paying out.

Boldly stealing the enemy's fire, Reeve James E. Cass claimed that was the reason he wanted to see the County linked up with the Good Roads system. Other Counties were getting our money. Bruce should get busy and get its share.

Great praise was given the Special Committee by Reeve Brown of Chesley, for the thorough way they had gone into the question. He made a strong appeal for the by-law, emphasizing the importance of providing employment after the war.

Their Majesties' Sympathy

"The King commands me to assure you of the true sympathy of His Majesty and the Queen in your sorrow." The above kind message was received by Mr. Timothy Hanley of Chepstow last week, from the private secretary of King George V. in reference to the death at the Front of Corp. Will Hanley.

+ + +

H. C. of L. Did It

The admission of two Bruce Township to the House of Refuge this week, brings to notice a rather pathetic case. Two unmarried brothers and a sister lived happily together on the old homestead until they were too old to work. They then sold the farm for about five thousand dollars. At first the three of them could almost, but not quite make ends meet on the interest. That was twenty years ago. As the cost of living kept increasing and all three continued year after year to live on "borrowed time," their money became altogether insufficient. One of the brothers volunteered to go to the House of Refuge in order that the other two might live more comfortably. Later on the sister died. On Friday last the remaining brother also presented himself at the House of Refuge. He is ninety-three years of age. His brother is ninety-six. Both are intelligent, well-informed men. Neither had any bad or wasteful habits. The gradually diminishing value of a dollar together with their extreme longevity are outstanding reasons why these two old brothers are where they are to-day.

AN EVIL HERITAGE

CHAPTER XXIX.

It was early on the morning after Bernard's coming to Cane Hill that a rather timid knock was heard at the door of Marian's room. She looked up from the box she was packing, just in time to see Miss McCrie enter.

"That knock wasn't at all like you," said Marian, surprised.

"I dare say not. I'm not feeling at all like myself, if it comes to that;" and, as her hostess kissed her, Marian saw that her eyes were wet. "I have come to help you, if I can; or, if I can't, merely to look on," continued Miss McCrie. "We have only got the forenoon, you know, as you will have to be off immediately after luncheon; and, somehow, I feel as if I had so much to say to you still. Would you prefer me to go away?" she humbly inquired.

"Oh, no; please stay," said Marian, eagerly, and then broke off and bent still lower over her box, as though she were trying to settle what she was to say next.

There passed several minutes, during which Miss McCrie sat still, blinking her eyelids rather hard, and wistfully watching Marian's movements, with her mouth very tight shut and the sharp little corners drawn down as low as they would go.

"Mr. Hibbert has got a fair morning for his journey," she observed at last, wondering a little at Marian's silence.

Marian raised her head quickly.

"Mr. Hibbert! Is he gone?"

"Yes; at peep of day."

"Back to Cassacon?"

"I suppose so. I don't think he has got any more business at St. Clare."

Again Marian bent over her box; but this time she was only throwing the handkerchiefs and gloves about by way of having something to keep her fingers busy. After a time, she looked up at the window.

"Then you say it is fair? I had not noticed that it was not raining. Couldn't we take a turn outside? I can finish my packing afterwards."

The suggestion exactly met Miss McCrie's views; and presently Marian and her friend emerged from the house together.

"It is almost like England," said Marian, drawing her wrap closer round her.

The rain had indeed ceased, but the sun was not shining. To judge from the grey sky, there was more rain to come. The leaves of the mango trees were dripping with wet, and Marian was thankful that she had put on stout boots.

"Where shall we walk?" asked Miss McCrie.

"I don't care. Wherever there are no people. Oh, yes, I do care," said Marian, in the same breath; "let us walk in the nutmeg dell."

"It would be the best for a farewell walk, of course," said Miss McCrie, trying to speak bravely. "But it will be terribly wet."

"Never mind. I want to walk in the nutmeg dell;" and Marian drew her in that direction with a vehemence which in her was unusual.

The long grass had been beaten down by the rain into a moist tangle, and lay over the path in a confused network. The beautiful bamboos were not quite as beautiful as usual, for those tiny leaflets are made to float and quiver, and to-day they hung downwards almost heavily, and almost motionless, partly because they were fringed with beads of moisture, and partly because the air was quite still—the first still day that Marian had experienced since she came to St. Clare. She had often thought what a blessing it would be if the eternal wind were to go to rest for once; but now that the moment had come, she did not like it. The further they went up the valley, the more oppressive did the air seem to become.

"Tell me, Miss McCrie," she began, when they were well out of sight of the house—"tell me this. Is it true that there are more entries than one of a death, for instance, or a marriage? I don't understand these things at all, and I should like to know."

Miss McCrie looked startled, but answered without hesitation:

"Of course there are; there is the entry in the Pamphlet Book in town, and there is the Parish Register, and——"

"So it is not a lie," said Marian, between her teeth; "I thought it was. [illegible] thought the entry in your register [illegible] the only one."

"[illegible] me, no! Each act is in [illegible] distinct times." And as she s[illegible] felt Marian's fingers tightening on her arm.

"Do you mean to say," asked Marian, after a minute, "that if there was any mistake, or—or doubt about a death, for instance, it could be proved by the other registers?"

"Of course it could, most easily." They were in sight of the nutmeg trees by this time; the dark glossy leaves looked as though they had been newly varnished.

"It will be too wet to sit down," said Miss McCrie, as they drew nearer to the mighty trunks. She would have stood still, but Marian still pressed forward.

"I do not want to sit down, but I have something to say to you, and I think I can say it more easily here, where we have spoken so often. I don't know how to begin, I have been so foolish, and I am so frightened. Oh, Miss McCrie, dear Miss McCrie, save him for me; I am sure you can save him for me, if you want."

And before Miss McCrie had quite understood what was happening, Marian was sobbing upon her shoulder.

For the first minute or two the little woman instinctively held her tongue, and only gently stroked the brown hair that lay so close to her cheek. To see this girl in a passion of grief, or indeed in a passion of any sort, was so strange to her, that she had even some difficulty in believing [illegible] evidence [illegible] ard that I [illegible] when [illegible] der [illegible] ave

By degrees the sobs subsided, and Marian looked up.

It had been a hurricane, but hurricanes are naturally short. Her breast was indeed still heaving convulsively, and her lips moved with a helpless twitch, but already the poise of her head and the determined gesture with which she passed her handkerchief across her eyes showed that she was beginning to regain the mastery over herself.

There passed several minutes, during which Miss McCrie said nothing more, but only held Marian's hand. It was Marian who spoke first.

"I am better now," she said, with lips that scarcely trembled. "I can breathe. I will explain, and you will see that I am not mad. It is the register of Caroline Berricott's death which is at the bottom of it all. That day when I was alone in the house, the day you went over to Filagree village, I found out in the register that she had died on June 30, and I knew for certain that Uncle Simon's second marriage had been on June 29—of the same year, of course, I mean. It puzzled me dreadfully, but it was only when father was here on Monday evening that I began to believe in there being something wrong. And next morning, while you were busy with that horse outside, I went to the dining room to look again; I hoped so dreadfully that there might still be some mistake."

"I see," said Miss McCrie, as Marian broke off. She was holding the girls hand between her own two, staring all the time straight up the valley, as though she were watching some distant object.

"And you saw that there was no mistake?"

"Not the shadow of one. I looked again and again, and when I saw that she really had died on June 30, and when I thought of Bernard losing everything in the world—I suppose I was mad at the moment, but I——"

"You changed the 3 into a 2? Yes, I see."

Marian looked at her in alarm. "How did you guess? Will other people guess as quickly?"

"Only the people who have got a clue. But how did you manage it?"

"It was very easy," said Marian, in a subdued voice. "I had a very sharp knife, and it was only the lower part of the 3 that had to be scratched out." She checked herself as though struck by a thought. "You have not asked me why I did it; it must all seem strange to you."

Miss McCrie smiled a little, though her face wore an anxious frown.

"I think I understand why you did it," and she pressed Marian's hand more tightly. "It is not very difficult to understand." And after an instant's pause she added quickly, "I also was fond of some one long ago."

In words Marian made no answer, but she raised the little lady's hand and kissed it. At that moment it scarcely seemed to her strange that Miss McCrie should know.

"I would do much more for him," she said, and her voice tremoled passionately. "In the first moment yesterday I thought I repented what I had done; but that was all nonsense. Of course I would have done just the same for him even if I had known that he was engaged to marry another girl. I hope it is not wrong, but I cannot love him less because he cannot love me?"

Miss McCrie was still looking thoughtfully in front of her.

"Of course this is a forgery," she said, following her own train of thought. "I know it is forgery. I wish now that I had not done it, not because it is forgery, but because it has all been a failure, and because I see now how foolish I was to imagine that everything would rest on that one entry. I have done Bernard no good—and if it was only that, but I may have done him a great harm. It never came into my head that he could be suspected—but Mr. Hibbert suspects him; he has found out already. I must save him. Oh, dear Miss McCrie," and once more her calmness began to give way, "is there any other way to save him except giving myself up to the police?"

She was clinging to Miss McCrie's arm, for the feeling of terror had come over her again.

Miss McCrie began by taking her in her arms, and kissing her. It was the easiest thing to do, and, besides, it gave her time to think, for, despite her natural coolness, the little lady was for once thoroughly perplexed and even a little flurried. The question was undoubtedly a serious one, more serious than Marian herself knew.

"Police, indeed!" she said, with an energetic little sniff, as soon as she had sufficiently collected her thoughts. "Of course there are plenty of other ways. Leave it all to me, my dear child. You trust me, do you not? I promise that you shall be safe."

"But it is not I; it is Bernard I am afraid for."

"You needn't be. He shall be as safe as yourself."

"But how? What can you do?"

"All sorts of things," said Miss McCrie, vaguely but decisively. "I have got the registers in my charge, you know, so, of course, a great deal depends upon me."

"Do you mean that you are going to help Bernard to keep his name and his fortune?"

Miss McCrie considered a moment. "I can't do that exactly, even if I wanted, to, because I have got no power over the other registers, and the matter, being once stirred up, is certain to come to daylight, but I am sure I can prevent any discovery being made in these entries."

Marian sighed heavily. "I suppose I must be content with this. But if he is to be poor, will you at least swear that he will not be suspected?"

"I swear it," said Miss McCrie, as unblushingly as though she knew exactly what her next step was going to be, whereas the only thing that stood firm in her mind was her fixed determination, at any price and by any means to shield Marian from the consequences of her rash act. To allay this alarm, which was of the character of a panic, and to send her away in peace of mind, was obviously the first thing to do, else that threat concerning the police might verily be carried out. So sharp a spur was the thought of this danger that Miss McCrie was not only to clear her brow of the anxious frown that had lain upon it, but even to talk and laugh almost gaily, making light of Marian's fears with an air of conviction which could not fail to quiet them. She kept on in the same strain while they retraced their steps up the valley, leaving the family confessional behind them.

"Say nothing to your cousin as yet," she whispered hurriedly, as they reached the house. "Leave him in his belief for the present. If the truth has to come out, it must not be at this moment."

Marian looked at her inquiringly, and would have asked more, but there were steps on the stairs, and privacy was at an end for the present.

Nor did the forenoon bring any opportunity for further confidences, for Marian had the packing to do, and Miss McCrie had the guest to entertain. The day being fair, even though dull, Bernard was anxious to do the distance on horseback. It had therefore been settled that the boxes should go on the buggy, while Marian and her cousin, with Jeremias as guide, were to follow another road, which, because of the wider curve it made, would afford Bernard a somewhat more satisfactory glimpse of tropical scenery. Miss McCrie had been rather doubtful about this latter part of the plan.

"I don't know about the Dry River," she remarked. "The rain has not been long, but it has been heavy; it is quite possible that it may be flooded. It all depends on the lake in the hills; when once that reaches a certain height, it has no choice but to overflow into the river bed. What do you think, Jeremias? Will the Dry River be possible?"

But Jeremias, quite contrary to his habit, seemed to have no opinion in the matter. He had been late in bringing the mule and pony round, and now that repeated messages to the stables had had their effect, it seemed quite evident that he had come straight from deep slumber. Indeed, to judge from his razed look and the way his head had of sinking forward on his chest while he stood at the animals' heads, there was some reason to suppose that he was not quite awake yet.

"Too much rum," said Miss McCrie to herself. She knew the symptoms well; indeed, after last night's festivities, she might have foreseen them. Had there been another guide at hand she would have replaced Jeremias, but there was none, and probably it was of no consequence. This was the sleepy stage, but Jeremias knew the road so entirely by heart that he could show the way just as well in his sleep as out of it.

There were no more questions asked about the Dry River, and presently both travellers were in their saddles. Miss McCrie's eyelids were blinking hard as she watched the figures moving away on the road, but she managed to keep a reassuring smile on her lips as long as there was any danger of Marian looking back, and her handkerchief waved frantically all the time.

"Do not forget!" Marian had whispered into her ear under cover of the farewell embrace.

She stood on the doorstep until the riders had disappeared, then the smile died out, and she turned abruptly back into the house. The handkerchief went straight into her pocket—not up to her eyes. She had no time for crying.

"All safe so far," she reflected, sitting down on the first chair she came across. "The question now is what to do next?"

CHAPTER XXX.

The first minutes after Bernard and Marian had left Cane Hill passed in almost complete silence, Bernard discreetly holding his tongue in order not to disturb the pangs of parting, from which his little cousin was evidently suffering. Once or twice he made an attempt to draw Jeremias into conversation, but his advances were met by short and sullen answers, so totally at variance with his usual smiling volubility that Marian's attention was at last aroused.

"Leave him alone, Bernard," she entreated, looking back at the negro in some alarm. "I don't know what is the matter with him to-day. He looks most dangerous."

"I am quite ready to leave him alone, if you will talk to me, but I hate solitary rides."

"You can talk to me now, I have got over the worst. I think; "Well," and she forced herself to smile almost cheerfully, "what shall we talk about?"

"How can you ask? Of course I can only talk of one thing."

"To be sure!" and Marian's face grew hard for a moment.

"I wonder if she has got my cable message by this time? I suppose she must have. Oh, Marian," said Bernard, flushing with pleasure, "just try and picture to yourself the scene at the Monastery; the telegraph boy appearing in the house, Mr. Durrant sending for Sybil, making her the announcement; Sybil's delight and excitement——"

"Can she be excited?" asked Marian, and then bit her lip for having said it. She had only seen Sybil once, but the impression then received was very clear.

Bernard looked annoyed, but went on talking all the faster. As Marian rode beside him, listening to his comments upon the events of the past weeks, and his surmises on those of the immediate future, her sensations began to grow more and more mixed. A feeling of intense discomfort was uppermost. Bernard had left Cane Hill under the belief that nothing was wanted to the crowning of his errand but the certified copy that was to be despatched to England as soon as all formalities had been fulfilled. To Marian it was little short of agony to note the triumphant light in his eye and the joyous smile on his lips, and to know all the time that this man, who thought himself so fortunate and wealthy, was in reality nameless and poor, and would soon be known as such in the eyes of the world. At least she supposed it would be so; her worst fears were indeed quieted, but she saw no hope for the success of the original scheme.

Regulations have been adopted for the disinfection of imported hides into the States. The U. S. Treasury Department and the Department of Agriculture are working jointly to bar all hides that have not been properly disinfected.

SUNDAY SCHOOL LESSON

LESSON X.

December 3, 1916.

Jesus Christ the first and the last.—Revelation 1: 1-20.

Commentary.—I. The Revelation described (vs. 1-3). 1. The Revelation—The word in the Greek signifies the uncovering of that which was hidden. The book is an unfolding of what was to take place in the future. of Jesus Christ—It is here said this revelation, or discovery of hidden things was given by God to Jesus Christ; that Christ gave it to his angel, and that the angel showed it to John, and that John sent it to the churches. Thus we find it came from God to Christ, from Christ to the angel, from the angel to John, and from John to the church. It is properly, therefore, the revelation of God, sent by these various agents to his servants at large: and this is the proper title of the book.—Clarke. must shortly come to pass—The prophecies which were about to be given were certain to have their fulfilment, and their fulfilment was to begin in a short time. by his angel—An angelic being was commissioned to bear the message to John. his servant John—By some it is questioned whether this was the Apostle John or not, but from the first century it has been held that it was he, and there can be no reasonable doubt that the writer of the Revelation was the "disciple whom Jesus loved." 2. who bare record—John recorded in this book the messages which were brought to him from God. 3. blessed—A beautiful and solemn warning to his readers, both of his own and subsequent ages. At the same time it expresses his own solemn reverence for his own work. Blessing and woe are dependent on the spirit in which the truths of this book are read and reduced to practice.—Whedon. he that readeth, and they that hear—One person reads publicly and the congregation listens.

II. The introduction (vs. 4-8). 4. to the seven churches which are in Asia—The message from Jesus Christ by John is addressed definitely to the seven churches of Asia. By Asia is meant the extreme western part of Asia Minor governed by a Roman proconsul. The names of the seven churches are given in v. 11. grace.... and peace—Paul used a similar form of greeting in the epistles which he wrote to seven different churches. from him—From Jehovah. is..was..to come—Eternity of existence is here declared; He now exists, he existed in the past, and he will exist forever. seven Spirits—This term must certainly mean the Holy Ghost, as it stands between the names of the Father and the Son; moreover, seven stands for completeness and indicates to us the various offices and works of the Holy Spirit. 5. from Jesus Christ—Grace and peace flow from the Father, the Son and the Spirit. the faithful witness—The testimony of Jesus is true and faithful. No part of it can fail of fulfilment. the first begotten of the dead—"The firstborn of the dead."—R. V. It is true that Lazarus and others were raised from the dead, but they were raised to die again; Jesus arose from the dead to live forever. prince of the kings of the earth—A lofty tribute is paid to Christ. He is high above all earthly power and authority. "I will make him my first-born, higher than the kings of the earth." (Psa. 89:27). unto him that loved us."—R. V. Here begins one of the loftiest ascriptions of honor and praise to Christ to be found anywhere in the scriptures. The degree of his love is not expressed, nor can it be expressed in human language. It was his love for us that led him to do what is declared in the following clauses, washed us from our sins—This implies both that he made an atonement for our sins and that the efficacy of the atonement has been realized by individual believers in the washing away of personal sins in the blood of Christ. 6. made us Kings and priests—Christ has made his followers a kingdom, to be priests unto God. The kingdom is spiritual, but none the less real.

7. Behold—The raptured vision of the sacred writer saw the coming of the Lord so clearly that it seemed all but realized. With cloud—See Acts 1: 9-11. Every eye shall see him—His coming will be visible to every member of the race. They also which pierced him—Not only the righteous shall see him, but also those who were responsible for putting him to death. Shall wail because of him—It is he that tells us that all tribes of the earth must mourn, either now for the woe our sins caused him, or then for the woe they will cause us.—Cam. Bib. 8. I am—The Lord God is now speaking. Alpha and Omega—These are the first and the last letters of the Greek alphabet. They express "the "beginning and the ending." In this verse the eternity of God is made emphatic as in v. 4, and his power is declared under the expression, "The Almighty."

III. A vision of Jesus (vs. 9-20.) 9-16. John gives briefly his circumstances when the visions came to him. He was banished to Patmos, a small island in the Aegean Sea not far from the west coast of Asia Minor, because of his devotion to Jesus. It is thought that he was banished by the Emperor Domitian, though some suppose it was Nero. He received from Jesus the command to write messages from him to the churches in Ephesus, Smyrna, Pergamos, Thyatira, Sardis, Philadelphia and Laodicea. In the description of Christ which John gives there is an enlargement of that given by the evangelists of his appearance at the transfiguration. 17. I fell at his feet as dead—John was overcome by the brightness and glory of Christ's person and by the sound of his voice, which was like "the sound of many waters." His right hand—The right hand is indicative of power and authority, but when Christ laid his right hand upon John, he expressed his love for him and thus encouraged him. Fear not—There are many occasions in life when the divinely uttered "Fear not" brings deep and blessed assurance. I am the first and the last—This expression denotes Christ's eternity of existence. 18. Liveth.... was dead—He assures his servant that the doctrine which he had been preaching was true. Christ used this expression and the one before it and the one after it in describing itself. Alive for evermore—Jesus was not to suffer death again. Have the keys of hell and of death—In rising from the dead he conquered death and unlocked the abode of the dead. The dead shall rise again. 19. Write—The apostle here received his commission. He is to record what he then saw regarding his own times, and what should be in the future. 20. 20. Seven stars—See v. 16. Angels of the seven churches—Scholars differ in their views regarding the angels of the churches. Some hold the view that they are the guardian angels of the several churches. Others that they are the personified spirits of the churches. A third view is that they represent the pastors of the several churches. The last view seems reasonable.

Questions.—Who wrote the Book of Revelations? Under what circumstances was it written? What blessings is pronounced in the third verse? To whom were the messages sent? What is meant by the expression, "I am Alpha and Omega"? Describe the appearance of Christ as he appeared to John. What effect had his appearance upon the apostle? In what terms does Jesus describe himself? What do the seven stars and the seven candlesticks represent?

PRACTICAL SURVEY.

Topic.—Revelation.

I. A vision.
II. A touch.
III. A word.

I. A vision. Here in outline is a wonderful sketch of how God reveals his truth. This sacred book is called the Revelation to express its origin, its nature, its object, its subject and its design. It is the word of the living God given by divine inspiration and invested with divine authority. It is not made up of conjecture, but of certainties. We are given the manner and purpose of this revelation. It consists of Old Testament ideas spiritually combined with New Testament narratives. The resurrection of Christ is a fundamental conception of the whole book. After a few years of personal absence from earth, with unabated love for our fallen race, Christ communicated with the apostle John for the good of all coming generations. The beloved apostle in his mature life, while in exile because of the storm of persecution against him for the testimony of the truth, received the revelation from Christ concerning himself and his church upon earth. Shut in as he was from all Christian converse, John was better fitted for converse with Christ, and to receive instruction from his divine Master. Before the eyes of the soul the Lord Jesus Christ was evidently set forth. Christ was as real to him as any of his fellow men. John saw him, not as the despised and rejected of men, but in might and majesty. The vision showed John that the ideas which he and others had cherished concerning Christ were imperfect. It was when his heart was uplifted to God in religious rapture and ecstacy that the vision burst upon him. The voice he heard was admonitory of the sacredness and importance of what he was about to hear and see. In the trying time then before his people it was more than ever needful that they should rightly regard him. John needed fresh knowledge or old truths brought home with renewed power. The churches were highly honored of God as objects of his redemptive purpose. John was pressed to give expression to the love for his Lord with which his soul was filled to overflowing. Before his mind there arose a vision of what he and his fellow believers had been, and what the grand mission of Christ had accomplished in the way of putting away of sin from their souls. The thought of the sovereignty of Christ and his love so immeasurably great and unchangeably constant made his heart glow with noblest joy. Looking beneath the symbols of the vision we learn their meaning. The golden girdled garment told of royal majesty and authority; the hoary hair, of profound wisdom; the eyes, of searching intelligence; the feet, of resistless strength; the voice, of all commanding might. The seven stars, grasped in his right hand, told of power and purpose. The two-edged sword signified that soul penetrating word by which the secrets of all hearts should be made known and by which all adversaries should be slain. The countenance told of divine majesty.

II. A touch. Christ's ministry on earth was to remove fear, a lack of trust in the personal care of the great Father. The fact of John's being overcome by the vision was the occasion for a fresh display of divine tenderness in a touch of love. With the right hand of the Lord he was strengthened and revived. There was in that touch an assurance of divine regard, notwithstanding the apostle's sense of his own unworthiness.

III. A word. The whole strength of the comforting assurance which was spoken to John, lay in the identity between Jesus whom he had known and the Christ whom he beheld. It was a marvellously comprehensive revelation of the glory of the Lord. The glorified Christ, the self existent and independent One, must necessarily be the author and upholder of all created existence. The great Redeemer's sway is over the whole race. He is to be worshipped as Lord. The vision of Christ in his glory completes and justifies the history of Christ in his humiliation. It required an apocalypse to reveal the vast empire and masterhood of Christ. Centuries cannot give antiquity to his atonement. Time cannot wear out its virtues. At the Lord's coming the one thought of all will be concerning their relation to him. His coming will be the great crisis of the world.

The woman who says her face is her fortune is apt to admire her own cheek.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

ONE BEAUTIFUL AND PERFECT WHOLE.

Somewhere there writeth, in this
world of ours,
For one lone soul another lonely
soul,
Each choosing each through all the
weary hours,
And meeting, strangely, at one sudden goal.
Then blend they, like green leaves
with golden glowers,
Into one beautiful and perfect whole;
And life's long night is ended, and the
way
Lies open onward to eternal day.

—Edwin Arnold.

PUT ON THE ARMOR OF LIGHT.

Put ...... on the Lord Jesus Christ. That I may win Christ, and be found in him, not having mine own righteousness, which is of the law, but that which is through the faith of Christ, the righteousness which is of God by faith.—The righteousness of God which is by faith of Jesus Christ unto all and upon all them that believe.

He hath covered me with the robe of righteousness.—I will go in the strength of the Lord God: I will make mention of thy righteousness, even of thine only.

Ye were sometimes darkness, but now are ye light in the Lord: walk as children of light. Have no fellowship with the unfruitful works of darkness, but rather reprove them. All things that are reproved are made manifest by the light: for whatsoever doth make manifest is light. Awake thou that sleepest, and rise from the dead, and Christ shall give thee light. See then that ye walk circumspectly.

THE HIGHEST ORDER.

The worldly man engages in agitations, perils and pains in camp and court and mart, whence so many quarrels, passions and dangers and fatal enterprises. Men plunge into dangerous occupations, and think they are in the pursuit of happiness. Call one out of the crowd and ask, are you able to go into your own room and remain at rest and quietly think? The man will give you a strange look. Inquire into the reason of all diversion and excitement, and you find that self-love is craving for food, that the soul dislikes repose; it walks on a rough road and sleeps in a troubled bed. The very soul of all amusement is to divert the man from thinking of himself, to push away the chance of ever asking the question: Whence, or what, or whither?

They eat and are hungry, drink and are thirsty, gather substance, but find it does not fit; in the midst of plenty they are in need. Many want to be great, to add ship to ship, house to house; after a while they discover a great distance between matter and mind. Then they reach out and find a greater, nay, an infinite, distance between matter and love.

All worldly greatness sinks into nothing when men investigate the majesty of mind; this greatness is rarely visible to kings, rich men, and indeed all whose heart is set on things below. The men of genius have their empire, their victory, brilliancy, but the saints pass by worldly greatness, mental greatness; they are seen of God, of angels and spirits of just men made perfect.

Jesus Christ, without property, or science, is great in His order of holiness. He did not reign as a king. He was humble, patient, holy, terrible to devils, without sin. It would have been useless to Jesus Christ to accomplish the offer of king. He did well to come in the splendor of His own order. Some men admire carnal greatness. All bodies, the firmament, the stars, earth and all their possessions, are not so much worth as the smallest emotion of love. Try the rocks and you get no Rock of Ages from them. From all bodies together you could not draw forth the smallest thought; from all bodies and minds we could not extract an emotion of true love; it is impossible, love being of another order.

In the old land the Order of the Garter is the highest. If you have not that, your stockings will ruffle round your legs and your gait will be unseemly. The Order of the Garter has not come to Canada; we have some others, but they are not much.

What do you say to the order of holiness? It is cheap, beautiful, lasting. It is for women; "bring your wives"; they carry the palm; they touch the highest distinction. How horrid to have an order without women—it is a shame. We have devout and honorable women not a few; woman, wife and mother are the crown of all creation.

"Her 'prentice hand she tried on man,
And then she made the lasses, O."

—Woman is the Sabbath of man.

H. T. Miller.

U. S. Boys in Ally Forces

The death of Norman Prince, resulting from injuries received on the battlefield of France, is a new reminder of the fashion in which America is represented in the world's struggle. In recent years three young men, Chapman, Rockwell and Prince, have given their lives in the struggle for what many Americans, most Americans of the revolutionary strain, believe to be principles which are American, and to defeat what they conceive to be a clear and deliberate effort to undermine the whole structure of democracy in the world.

There is no more splendid page in contemporary American life than that which is supplied by the scores of young men who have volunteered for service in France, either with the French colors or with those ambulance corps whose work will remain a permanent bond of sympathy between two great democracies. These young men have gone to the front in the spirit and temper of the Crusaders; they have gone with an eager but a comprehending desire to serve the cause and the principles which they deem most worth while in this world.

Those who have met these American boys, for many of them are only boys, either in France or on the journeys to and from this country, have been impressed with their spirit, their devotion, and above all the point of view which they have as to the issues of the struggle now going forward and the meaning of this struggle to Americans. If one desired a complete statement of what the German thing means in Europe to-day it could not be better expressed for him than in the simple, veracious, modest words of these boys, who have faced German shells, seen German brutality and known the beastliness, as well as the inhumanity, which marks Teutonic methods.

In a sense, it is a little thing, this contribution of America. We have given but a few lives, we are risking the lives of bu ta few hundred of our youth, in a contest which is eating up the manhood of many nations, and yet there is something symbolical and hopeful in this response of America's youth, spontaneously, splendidly, to a call which sounds vaguely upon the ears of an older generation.

Those who find reasons for pessimism in contemporary American life, in the snug, selfish, materialistic spirit of the many men of middle age, who see the denial of so much in what Americans in other generations believed and fought for, must still find a warrant for optimism in the actions, for their words are very few, of the many young men who have offered all they had or hoped to have to the cause of human liberty, which is being fought for in France.

With the realities of life, as contrasted with the theories and the pretences, these boys are becoming well acquainted. Those who return will bring back to their own country a useful, a precious commentary upon the weak, the flabby and the futile policies and purposes which still hold so many Americans in thrall and make the American situation as grave as was that of Great Britain when the war borke out.

We shall continue to be proud, many of us, that ther were Americans, American boys who had the courage and the inspiration to serve in France, to repay, in a very real way, the debt which American democracy owed to France from the hour of Lafayette. His spirit, his enthusiasm, his loyalty to a great and noble principle, is theirs. They cross the seas, as did he, to serve in an army fighting for a cause which is neither limited by national frontiers nor circumscribed by the widest seas. What our ancestors for at Lexington, Concord and Bunker Hill, what they established through the victories of Saratoga and Yorktown, the French are fighting for. From Marathon to the Marne the road runs straight and clear.

The old America, the America which derives from all the sufferings, struggles, traditions of 1775, will be permanently grateful to the youth which has revealed a devotion to ancient principles by a service in the latest conflict, by personal enlistment against an enemy more brutal, more dangerous and more beastly than any that has in modern history sought to destroy democracy and abolish all the hard-won vantage points of humanity and civilization.

The thing that Germany represents in the world to-day is a menace to all that the true America means. Were it to prevail, it would, in due course of time, destroy American liberty as it has frecked Belgian independence. Wars between European nations do not concern Americans, but a contest between civilization and barbarism, between humanity and brutality, cannot leave any free country unconcerned.

The American boys who have served, who have died, in France, have done something more than to give their lives for the things they believed in. They have done something far more considerable than to make a partial payment on an old debt of honor due from the United States to France. They have contributed not a little to reveal to their fellow countrymen what the struggle in Europe means to America. By their services and by their deaths they have reminded a people, blind and deaf, it would seem, to questions of honor and of principle, of what is at stake on the battlefields of France.

And in the larger view, these boys will be remembered as having died for their own country, for what their own country has meant and should mean in this world. Wearing the uniform of France they not less carried the colors of their own country. Whatever is best of America they represented, and the America they served will not forget them. Their memory will have an especial value in the minds and hearts of those to whom this country of ours is neither a factory nor a foundry, but the home of men and women, sustained by a brave tradition and dedicated to a noble service, the tradition of democracy and the service of liberty.—New York Times.

UNSIGHTLY PIMPLES
COVERED HIS FACE.
B. B. B. Cured Him.

All diseases and blemishes of the skin are caused by the blood being in an impure condition

The best blood cleansing medicine on the market to-day is Burdock Blood Bitters, a medicine that has been in use for over 40 years, so you do not experiment when you buy it.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few lines to tell you what Burdock Blood Bitters has done for me. My face was covered with pimples. I tried different kinds of medicine, and all seemed to fail. I was one day to a friend's house, and there they advised me to use B. B. B. so I purchased two bottles, and before I had them taken I found I was getting better. I got two more, and when they were finished I was completely cured. I find it is a great blood purifier, and I recommend it to all."

B. B. B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Chats With the Doctor

(By A PHYSICIAN)

People with a tendency to constipation do much to improve their condition by attention to diet. Some foods have a definite tendency to stimulate intestinal action, whilst others have an exactly opposite effect. In general, it may be said that vegetables and fruit are laxative in action, whilst meat and most farinaceous foods, such as bread, rice, sago and tapioca have a binding tendency. But among farinaceous foods there are some which by their mechanical constitution, tend slightly to irritate the lining membrane of the intestines, and bring about that forward movement which is called peristalsis. Brown bread and oatmeal act in this way, and should therefore form a regular feature in the diet of those inclined to be constipated. Brown sugar and treacle are found to help in many of these cases, and may be eaten with oatmeal porridge. It is important that plenty of fluid should be drunk, especially between meals, cold water and coffee being perhaps the most suitable fluids for this purpose.

Green vegetables should form a large part of every day's dietary, and are valuable whether taken cooked or raw in the form of salads. Fruit also, of every kind, both cooked and uncooked, should be taken at all seasons. Many people find an apple eaten before breakfast useful. It is certainly stimulating and refreshing.

PSORIASIS.

Psoriasis is the name given to a curious skin disease which is fairly common in this country. Its cause is unknown, and it occurs in individuals often perfectly healthy in every other respect. It is neither dangerous nor infectious, but it is very disfiguring.

Almost any part of the body may be attacked, but its most characteristic sites are on the front of the knees and the back of the elbows. Unfortunately, however, it rarely confines itself to these localities, but spreads itself in an even bilateral way, over the stomach, chest, face, and elsewhere. Its appearance was singular, red circular spots being covered with dry silvery scales, which can often be brushed off with the fingers. All kinds of medicines have been given for this disease, with very uncertain results. The most effective treatment is external, and consists in the application every night or every other night, of chrysophanic acid ointment. When the spots have disappeared it is often well to continue the application of the ointment at regularly increasing intervals. It is well to remember that chrysophanic acid stains linen, and the ointment should therefore be covered with lint or a bandage, or old underlinen should be worn.

CORNS AND VENTILATION.

A letter has reached me this week from a correspondent which raises an interesting point relative to the causation and consequent cure of corns. There can, of course, be no doubt that the cause of corns is, in the very great majority of cases, direct pressure, and the proof of this lies in the fact that the removal of the pressure in nearly all cases cures the corns. But our correspondent suggests that in some cases at all events a contributory cause is afforded by the lack of ventilation, and consequent difficulty of escape for the insensible perspiration which is always passing from the skin. Without expressing any opinion I think the point raised is of sufficient interest to quote my correspondent's letter. He gives his experience as follows:

"My business was one in which the hands were required to be smooth-skinned and free from harshness, so I wore almost continually gloves, generally of strong leather, as they lasted longest.

"I don't remember how long I kept the custom up. I don't think it was more than a few months, when I found corns were appearing on various parts of my hands; unmistakable corns that hurt on pressure and sometimes without pressure.

"Now in gloves each finger has its own division and can move freely, so I concluded that there was some other cause for corns besides compression or constant friction; and after thinking the matter over I came to the decision that it was want of ventilation, as corns, apparently, only occurred where the skin was enclosed in leather.

"I therefore took to wearing gloves of woven material, cloth of various kinds, and the corns vanished from my hands like magic.

"Since then I have noticed that when I take a bath there is always more dead skin to rub off the feet than any other part of the body. Previously to my experience with the gloves I should not have considered that a matter worthy of remark, but now I recognize it as another indication of the importance of free access of air to every portion of the skin if every portion is to be kept in healthy action."

The relation of ventilation to healthy action of the skin is certainly not new, but this particular manifestation of it is the first that I have come across.

Miss Ryval (triumphantly)—I suppose Jack never told you he once proposed to me. Jack's Fiancee—No; he told me there were a number of things [illegible]

WAS TROUBLED WITH HER LIVER
FOR FIVE YEARS.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the sourness of the stomach, belching of wind, heartburn, water brash, biliousness, etc.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and thus do away with constipation and all its allied troubles.

Mrs. John Fitzgerald, Brittania Bay, Ont., writes: "I have been troubled with my stomach and liver for the past five years, and have had constipation causing headache, backache and dizzy spells, and sometimes I would almost fall down. I tried all kinds of remedies without obtaining any relief.

I commenced using Milburn's Laxa-Liver Pills, and they have cured me. I have recommended them to many of my friends, and they are all very much pleased with the results they have obtained from their use."

Milburn's Laxa-Liver Pills, 25c. a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

ROYAL YEAST

ROYAL YEAST CAKES

Has been Canada's favorite yeast for over a quarter of a century. Bread baked with Royal Yeast will keep fresh and moist longer than that made with any other, so that a full week's supply can easily be made at one baking, and the last loaf will be just as good as the first.

FARM AND GARDEN

FARM WORK FOR AUGUST.

As for farm work in August continue the destruction of weeds; keep the ground mellow about young trees; pinch back shoots that are becoming too long in young trees and blackberry bushes; apply mulching to trees suffering from drought; and transplant strawberries according to directions given below, remembering that the sooner the work is done the more firmly will they become established for enduring winter, and the better they will bear next season.

TRANSPLANTING STRAWBERRY PLANTS.

Next to early spring planting, the season of partial rest to the plants which occurs immediately after bearing is the best time for transplanting. Take them up carefully, so as not to tear the fibres, cut off all the leaves except those just expanding, keep the roots moist by immersion in mud, and spread out when setting them. Settle the ground about them by pouring on water, then complete the surface by a covering of fine, mellow earth, next apply a mulching an inch and a half in thickness of fine, pulverized manure.

All, or nearly all, will grow without any further watering, but should the weather become unusually dry, water may be applied without detriment, the mulch keeping the surface moist and preventing the formation of a crust. These plants will immediately grow, become well established before winter, and, if well cared for, will bear a crop next year.

FIGHTING INSECTS AND DISEASE.

Continue to watch for insects, and especially for aphides or plant lice, which often increase rapidly during August. Whale-oil soap, strong soapsuds, or very strong tobacco water, may be used for destroying them. It may be thrown on with a coarse syringe, but it is more effectual where the shoots can be bent over and dipped in the liquid.

Keep a constant eye for black-knot on the plum and fire-blight on the pear, cutting off instantly the affected parts. Excision will prove a reliable and perfect remedy in the case of black-knot, and frequently, but not always so, in cases of fire-blight. But it is better to cut away half or even the whole of a tree than to have it wholly destroyed by disease and allow the malady to spread.

Budding may be continued. Finish up speedily on cherry, plum and standard pear, and commence early with apples. Peaches and quinces may be budded toward the close of the month. Watch the stocks in season and remove the ligatures as soon as they begin to cut into the bark.

GATHERING THE FRUIT.

Gather early pears as they approach maturity, but before they become ripe on the tree, and ripen them in drawers or boxes. This will much improve their quality and prevent rotting at the core, so common in summer pears.

The proper degree of maturity may be judged in most cases by bending the stem—if the fruit is nearly ripe it will loosen its hold on the tree, but if it adheres firmly, the pear has not sufficiently matured. There are, however, exceptions to this rule—the Bartlett, for instance, may be picked even before it has attained full size, and in a week or two, will ripen into a fine, melting texture and excellent flavor. Ripening summer pears in the dark much improves their appearance. A Bartlett, for instance, fully exposed to the sun and allowed to ripen on the tree, or in a well-lighted apartment, will show perhaps only a light brown cheek, but if in a dark drawer, the light brown will become a beautiful carmine or crimson.

When drawers are not at hand, the maturing process may be accomplished on shelves by first spreading a thick piece of woolen cloth, laying the pears on this, and covering them with the same.

Pear growers who send their crops to distant markets should pack them early enough to reach their destination before the softening process has commenced. Large losses have sometimes occurred from bruising and other injury when sent later.

FARM NEWS AND VIEWS.

For hog pasture, Dwarf Essex rape is the best of the crops that must be sown each year. It may be sown alone or broadcast at the rate of six pounds per acre, after which a bushel of oats per acre can be drilled in. Sorghum is also to be recommended, and blue grass is excellent, especially for early and late pasture, but it is likely to take a rest during a hot, dry summer. At such times the green succulent sorghum will be very acceptable.

The paint brush is an instrument of magic in beautifying a rural landscape.

An agricultural college education will not make a good farmer out of a natural born piano tuner.

The Illinois milk producers won their fight for higher prices by organized co-operation. It is the power that wins success in every movement.

There's a lot of information coming from the would-be agricultural experts that is just as available for practical farm use as is the potash in powdered feldspar.

Many farmers believe that oats and peas make one of the very best hay crops, and they have planted largely of this mixed crop. And they are men whose opinions are worth while.

Farmers in the richest limestone sections find it profitable to apply lime to their soils. This being true, it is especially necessary that lime be used liberally on soils that are not of limestone formation.

When nitrogen is estimated at 15 cents a pound, phosphoric acid at 7 cents a pound and potash at 4½ cents, Halligan estimates the average value of farm manure as follows: Droppings from one horse, per ton, $2.40; cow, matter of common experience we know when the manure is properly kept and applied to the land it is worth more, for the figures given do not include the value of the humus, which may be considerable.

The amount of manure voided by animals varies according to the kind, size and age of the animal. Helden estimates that for every 100 pounds of dry matter in the feed the horse voids 210 pounds of fresh manure, the cow 380 pounds of fresh manure, the sheep 180 pounds.

As to the proportion of urine to the manure, Snyder estimates that a well-fed horse will produce about fifty pounds of moisture a day. Of this, one quarter, or twelve and a half pounds, will be urine. In a stable, the horse will void about six tons of manure per year, according to the same authority.

A milch cow on an average will produce from 60 to 70 pounds of manure per day, estimating both solid excrement and liquid manure. Of this, from 20 to 30 pounds will be liquid manure. The daily droppings of a well-fed cow of average size are about 80 pounds, including the absorbents.

The best way to save manure is to apply it to the land as fast as enough accumulates to pay for the time required to spread it. Bedding should be used in the stalls to absorb the liquids, which are the most valuable parts of the manure. By applying this manure as fast as it accumulates the danger of flies breeding in it will be reduced and much of the ingredients will be saved. But if it is not possible to apply for some time, store in a pile, keep dry and screen or put hellebore on it occasionally to prevent flies from breeding in it.

Some farmers say the blossom test for cutting alfalfa is unreliable. The blossoms should be disregarded entirely and the alfalfa cut when the shoots are from one-half to three-fourths of an inch long.

Wood ashes should be saved and carefully stored in a dry place until applied to the soil. The potash in wood ashes gives them an unusually high value at the present time, says Prof. L. L. VanSlyke, of the Geneva station.

British Plantation Rubber Is Saving Canada Millions

Low Prices of Rubbers and Overshoes Due to Britain's Control of Situation

Here in Canada many of us have fallen into the truly Anglo-Saxon habit of considering the "Mother of Parliaments" slow and a bit behind the times. The present price of rubber, when its cause is revealed, affords one of the many proofs that such an opinion is away off the mark.

Thanks to great rubber plantations established, in the face of criticism and ridicule, many years before in her tropical Dominions, Great Britain at the outbreak of war held a firm and tightening grip on the world's supply of raw rubber—a grip reinforced by her dominating navy. From 1/14 in 1914, the production of these plantations has grown this year to 75% of the whole world's output, leaving only about half the requirements of the United States alone to come from all other sources.

The result has been that the needs of the Allies, enormous though they are, have been plentifully supplied, while Germany has been reduced to registered mails and the "Deutschland" in desperate attempts to mitigate her rubber famine. Neutrals have been allowed all the rubber they want, at prices actually lower than before the war, so long as they prevent any of it from reaching the enemy, while Canada and other parts of the Empire have an abundant supply at equally favorable Government regulated prices.

In this foresight and generosity of the British Government [illegible] rubber [illegible] overshoes are [illegible] leather shoes [illegible]. Wearing rubbers or overshoes, or rubber farm shoes to replace them, is more than practical thrift—it is patriotic, for in thus saving leather we make it easier for the Government to procure the absolutely necessary supplies of this alarmingly scarce material for our soldiers.

Both Thrift and Patriotism Point to Rubbers!

MY FOUR LITTLE ONES USED BABY'S OWN TABLETS

Mrs. Albert Nie, St. Brieux, Sask., writes: "I have been using Baby's Own Tablets for the past seven years and they have done my four little ones a great deal of good." The Tablets always do good—they cannot possibly do harm—being guaranteed by a government analyst to be absolutely free from injurious drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Manual Training of Mutilated Soldiers

As a suggestion in chiaroscuro of the value of arts and crafts this war is rich in fine examples taken from the tragic experiences of the actors. Surgeons who have seen the battlefields and hospitals of Europe dwell upon the stupendous problems of caring for the men disabled and mutilated by modern shot and explosives. How are these men to be trained and fitted for work? Can a man who has lost his right hand be taught to use the left? Should he learn a new trade or cultivate the old one with his left hand? Can men blinded by explosives be taught to use their fingers in drawing or in such unions of brain and fingers as music and typewriting?

These problems were discussed at a recent meeting of the French Academy of Sciences. Obviously both technical and social issues are here in question. In the first place the normal and working life of artisans and professional men has, of necessity, given way to military duty. Though we assume that most of them will be taken back into the industrial life of the nation, others will be permanently or partially incapacitated for one cause or another. In addition to the drainage of huge bodies of men from civil employments, which cannot fail to produce its effect in the future, there will be a shortage of sound men caused by the war. The loss of millions in war which is not merely destructive of limb but of life must accentuate the poverty and the number of unemployed which are always with us. Thus the main problem is the shortage of able-bodied men plus the unnatural increase of cripples.

Fortunately, throughout America and Europe the resources of science are being assembled to find a remedy. The war is a practical lesson in the value of manual training, training of the hand in a large sweep of uses. The manual arts are the earliest and the most productive, and, it is now asserted, the most intellectual, in the sense that they teach the most perfect union of the mind of the worker with the product of his work. According to experts this training of the hands, of both hands, it should be noted, enriches the mind by adapting from the impressions of the external world whatever produces symmetry in the development of the intellect. If this notion be obscure, examples may clear away the difficulty. For instance, painters like Leonardi da Vinci were at once painters, mathematicians and mechanics, and, on the other hand, Watts, who perfected the steam engine, was supremely at home in the processes of the arts.

The present method of training disabled soldiers is chiefly a continuation of the study of symmetry of mind and body. It is a study of the utmost importance at any time, for every year dangerous trades take annually a heavy toll of maimed and mutilated men. Three special works on the subject from three totally different points of view have recently appeared. One, by an American, Taylor, is devoted to the study of economy in muscular movements, or, in other words, the study of how to perform a given task with the least expenditure of motion and physical force. Of the other two, one describes the use of artificial limbs, hands, fingers, while the other is an outline of a new system, which will be published shortly in detail, of training the left hand.

The observations, which were made at first hand by a Polish surgeon, Kiesk, on the eastern battle front, are recorded and extended by the Belgian physician Joteyko and his pupil, Kiplani, whose book on ambidexterity is standard. These studies are of the most practical and useful kind. At the outset the interesting question arises: Why are the majority of the human race right-handed? Without entering into the countless theories of the cause it is probable that owing to the position of the heart and great arteries, which are placed for the most part on the left, the need to protect this side of the body has been a guiding factor and had led to the almost involuntary preference for the right hand. It is certain that the right side of the body is usually stronger and better developed than the left; the muscles and nerves are quicker and more responsive and more capable of precise movements. It also appears that the case of left-handed soldiers who have lost the right hand is marked by the following special features: Left-handed men who are being trained to use this hand when they are accustomed to help it with the right are more easily tired than right-handed men; it is found that left-handed men are less accurate in their work; they are able to work less, for muscular action in their case accelerates the heart and breathing so much that they leave off sooner. In fact, it is said that it is much easier to train a right-handed man to use the left hand than it is to train a left hander to use the right. Immemorial habit has left an asymmetry in the face to the marked prejudice of the left side of the body.

Practically, the questions to be solved were three: When a soldier has lost his right hand, the most common case, should he be re-educated in his old trade or profession by means of the left? Or should he be taught a new one? Or should he be fitted with an artificial right hand and be trained to write or draw or work with this? Dr. Joteyko tells us that in most instances the training of the left hand is successful; it is found it does work or performs writing and drawing that have all the characteristics of right handed work. It is also found that when a shot has produced paralysis or loss of speech a cure is often effected by the training of the left hand. This training calls into play centres in the brain which have not been exercised. For this reason in European schools ambidexterity, or the habitual use of both hands, is being taught. Apart from ambidexterity, it seems clearly proved by these war experiences that there is some connection, some anatomical or bodily relation, between righthandedness and the development of speech.

In regard to writing with the left hand a great difficulty presented itself. Many soldiers in learning to write with the left hand produced the peculiar effect known as "mirror" or looking glass writing, in which every letter of the word is reversed. It is read easily enough if it is placed before a mirror. This tendency is difficult to correct, but after many experiments the men were taught to write from left to right by showing them pictures of their motions in the cinematograph. Dr. Kiesk reports that soldiers who had lost the right hand learned to write correctly with the left in four weeks, though in some instances mirror writing seemed incorrigible. In these cases it appears to be useless to attempt any other kind. Much of the success of this training depends upon the nature of a man's trade or profession. It is far easier to re-educate a man in a trade which simply requires rough movements, the muscular work of lifting weights, for example. But in the teaching of trades that are skilled, that require very fine and precise movements of the hands and fingers, failures were not uncommon. Here a new trade is perhaps the best thing. But the great truth which these writers convey is the advantage of the training of both hands. A man who can use both hands in his work is much less helpless when he is disabled; it is said that the ambidextrous are more alert mentally, of stronger "fibre," as William James puts it. Perhaps they are; but there is something fanciful in these statements, and experience on a sufficient scale is wanting. The practical results of training disabled men are distinctly consoling. A considerable proportion are restored to a comfortable existence and earn their living with comparative ease. The manual training of such men is worth further investigation.—New York Sun.

A Very Merry Christmas

The Gift That Gets A Smile—

because it guarantees unequalled service—from Christmas to Christmas—over and over again—is

The Gillette Safety Razor

It's the "safest" gift you can select, for every man shaves, and knows that in the Gillette you are giving him the best equipment that money can buy. His appreciation will be SURE and LASTING.

Christmas Gillette displays will be in the windows of all the hustling Gillette dealers—Drug, Jewelry, Hardware and General Stores—everywhere—in a dozen styles or more—priced from $5 to $25.

STORY OF A LAWSUIT.

Queer Way in Which an Umbrella Case Was Decided in Poland.

The Central Law Journal says that the old fable of the lawyers and the oyster, in which the ownership of an oyster being contested, the lawyers ate the oyster and gave a shell to each of the litigants, is matched by a story of a lawsuit which a Russian journal relates as entirely authentic.

In a city in Poland, it appears, two men came into court with a suit over the ownership of an umbrella which had been left in a restaurant. Each one introduced evidence to prove that the umbrella was his. Being unable to match the wisdom of Solomon by dividing the umbrella between them, the judge postponed the case. Pending its decision, the umbrella was left in the judge's private room.

Later, as he left the court to go home, the judge found that the weather was rainy. He went back to his room, took the umbrella which was in litigation, and spread it over his head into the street. On the way home he went into a restaurant and left the umbrella on the rack, and when he was ready to leave the place he found that it had been taken away by some unknown customer. Then he bought another umbrella and took it to his court room.

When the case came up the litigants were confronted with it, and neither was able to identify it as his own. The court thereupon fined them both for invoking the law on a frivolous pretext, and they departed empty handed and decidedly "nonsuited."

DON'T GO INTO CONSUMPTION CURE YOUR CATARRH NOW

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhozone and get well. It clears the throat, cures hacking, relieves tight chest and soreness in the bronchial tubes. To cure away Catarrh of the nose nothing is better. Catarrhozone is nature's own remedy, it heals and soothes; cures every form of throat, lungs or bronchial trouble. Prescribed by many specialists and used by thousands every day. Get the dollar outfit, it lasts two months and is guaranteed. Small size 50c; trial size, 25c; sold everywhere.

DUBLIN PROSPERS.

No Poverty Has Followed the Great Rising.

Dublin, Ireland, Nov. 7.—(Correspondence of the Associated Press)—The Dublin correspondent of the Associated Press has interviewed the Right Hon. James Gallagher, Lord Mayor of Dublin, in reference to the statements which have been made regarding a supposed exception state of distress in the city, due to the April rebellion, and its suppression.

The Lord Mayor said: "We are absolutely better off this year than last year, notwithstanding the rebellion. There is, as far as I can see, no exceptional distress at all. There is, on the contrary, a good deal of money coming into the city for separation allowances for the dependents of the men, most of them of the working classes, who joined the army. Information obtained from various traders in the city enable me to say that trade is as good, if not better, than it was twelve months ago. Moreover, employment has been added to owing to the amount of munition work done in the city. We have five or six factories, each employing from one hundred to six hundred hands. Women are earning very good wages, and Dublin women have proved very adaptable in shell making. The result is that the Government is able to turn out shells in Dublin and in Ireland generally, cheaper than it can do in England."

"The effect of the rebellion," said the Lord Mayor, "was only temporary. A certain number of people were thrown out of employment by the destruction of the premises in which they worked; but that temporary need was promptly met. I got up a fund, which amounted to five or six thousand pounds, and the local committee, which had been working for the Prince of Wales' fund in relief of war distress gave me permission to spend from their resources something like £2,000 in addition. We had the advantage in distributing these funds to the necessitous of all the machinery used by the local relief committee. The need was only temporary, most of the people who were not employed at that time have got employment either from their old or new employers. Some went to England and secured employment in the munitions factories."

"The authorities of the St. Vincent de Paul Society, who have closer touch with the poor in the city of Dublin than any other organization, tell me that the number of cases on their books in the city is exactly the same to-day as it was at the beginning of October last year."

PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores—50c box.

Zam-Buk

Coming and Going.

One afternoon a cast down hobo timidly knocked on the door of a suburban home, and when the owner of the house appeared, he meekfully asked for bread.

"I see," responded the proprietor, critically sizing up the tramp, "that the knees of your trousers are badly worn."

"Yes, sir," answered the hobo in a subdued voice, "I wore them through kneeling in prayer."

A few minutes later the tramp was handed his fodder, and with many thanks he turned and started toward the gate.

"Just a moment," exclaimed the proprietor. "I notice that your trousers are pretty badly worn in the back."

"Yes, sir," responded the tramp, steering for the gate, "I did that back sliding."

Pleurisy Pains Vanish! Chest Colds Cured!

NERVILINE HAS NEVER FAILED TO CURE.

Don't suffer?

Nerviline is your relief.

Nerviline just rubbed on, lots of it, will ease that drawn, tight feeling over your ribs, will destroy the pain, will have you smiling and happy in no time.

"I caught cold last week while motoring," writes P. T. Mallery, from Lynden. "My chest was full of congestion, my throat was mighty sore, and I had the fiercest stitch in my side you could imagine. As a boy I was accustomed to have my mother use Nerviline for all our minor ailments, and remembering what confidence she had in Nerviline I sent out for a bottle at once. Between noon and eight o'clock I had a whole bottle rubbed on, and then got into a perspiration under the blankets. This drove the Nerviline in good and deep, and I woke up next morning fresh as a dollar and absolutely cured. Nerviline is now always part of my travelling kit, and I will never be without it."

The large 50c family size bottle is the most economical, or you can easily get the 25c trial size from any dealer.

FACTS FOR THE CURIOUS.

Waterpower electricity is gradually replacing and saving coal.

Except along the Caspian Coast, Persian agriculture is dependent almost entirely on irrigation.

That whooping cough is caused by a bacillus has been discovered by two European physicians.

Paper is spun into thread and woven into a substitute for jute textiles by a process invented in Bohemia.

Java is estimated to have exported $5,000,000 pounds of tea in 1915, as compared with 65,000,000 pounds the year before.

Silk fabrics, heavily impregnated with the salts of lead or tin are being made in France for X-ray garments for physicians.

Kansas is said to have fewer millionaires and paupers than any other state in the Union.

In the far north of the Russian Empire lives a race of people who do not know who the Russians are and who do not know that there is a war.

Weak, Sickly Folks Regain Health Quickly By New Remedy!

A BLOOD-FOOD NOW MANUFACTURED THAT ACCOMPLISHES MARVELS.

Lots of people that were thin and miserable for years have recently been restored by this simple treatment. All you have to do is take two little chocolate-coated tablets with a sip of water at the close of each meal.

The tablets which, by the way, are called "Ferrozone," are in reality a perfect food for the blood. They contain exactly those elements your blood lacks when it becomes thin, weak, and unhealthy.

This is just the time to use Ferrozone; it excites splendid appetite, gives digestion splendid aid, supplies nourishment for all weak organs. At once you feel buoyant and strong. Nutritious blood courses through your veins, supplies strength, makes you tingle with animation and ambition.

No more headaches.

None of that tired languor.

You feel like doing things because Ferrozone completely renews and strengthens your whole system.

No medicine on earth gives such quick, lasting benefits as Ferrozone. It has raised thousands from downright weakness, brings robust health simply because it contains the fortifying elements that run down systems require.

One week after using Ferrozone you'll feel like new, you'll appreciate what real robust health means. In a month you'll scarcely credit the push your vigor and spirits have received. Ferrozone is more than a tonic because its work lasts, its benefits remain and are not temporary. It restores health where other treatments fail, and should be used by every man, woman and child. Try it, 50c per box or six boxes for $2.50. Sold by all dealers or by mail from The Catarrhozone Co., Kingston, Ontario.

"How's business, old man? Been making anything lately?"

"Yes—an assignment."

LOTS OF IT.

(Judge)

"The world is full of poetry!" exclaimed the optimist.

"Yes, I dare say there is almost as much poetry in the rest of the world as there is in the waste-basket," added the pessimist.

WITHIN BOUNDS.

(Washington Star)

"Every man is entitled to his own opinion."

"Yes," replied Senator Sorghum; "but he shouldn't be encouraged to express it in a way that constitutes it a public nuisance."

OVER HIS HEAD.

(Washington Star)

"Have you studied the plays of Sophocles?" asked the serious young woman.

"Quit jokin'," replied Mr. Lowbrow. "I know everybody in both leagues. There ain't any such player."

A CERTAIN REMEDY.

(Buffalo Express)

"You say my husband needs exercise, but he won't take any, and I don't know how to make him," said a woman plaintively. "Is there any way in which we can force him to exercise?"

"Did you ever try, on windy days, making him wear a hat that will be sure to blow off?" asked the doctor.

AN EXCEPTION.

(Birmingham Age-Herald)

"When you roll up to a man's place of business in a fine auto I dare say it is comparatively easy to buy something from him on credit."

"Well, a scheme like that might work in the case of jewelry, millinery, dry-goods and clothing stores, but I've seen it fail to impress a dealer in gasoline."

WILLING TO TRY.

(Life)

Daughter of Western Farmer—Oh, George, the harvest hands threaten to quit, and papa is away!

Young Foreman—Yes, I know I wired him this morning for instructions.

Daughter of Western Farmer—What did he answer?

Young Foreman—He said: "Hold hands till I come."

Daughter of Western Farmer—Well, it means an awful lot of spooning, but I guess we can do it, can't we?

THE PROPRIETOR.

(New York Times)

Mrs. Jenkins had a passion for the old and curious. One day when rummaging about in a bric-a-brac shop she noticed a quaint figure, the head and shoulders of which appeared above the counter.

"What is that Japanese idol there worth?" she asked.

The salesman relied in a tone:

"About half a million. That proprietor."

BAPTISTS BARRED.

(Kansas City Star)

The mayor of a tough border town is about to engage a preacher for the new church.

"Parson, you aren't by any chance a Baptist are you?"

"Why, no, not necessarily. Why?"

"Well, I just again' to say we have to haul our water twelve miles."

THE JEWELRY CRAZE.

Dirty Ornaments Not Attractive, So Polish Up Your Treasures.

All jewelry that is constant should be washed every weeks. It is not a difficult ther. All you have to do is to soapy lather and add a few drops of ammonia. Take an old toothbrush and brush all the dirt out of the crevices. When quite clean take the jewelry out of the water and rub perfectly dry with a chamois leather or ordinary tissue paper.

When cleaning an article that is set with stones, such as a ring, be more gentle with the toothbrush, for if you brush too vigorously you may easily loosen a stone. A pendant set with emeralds, rubies or diamonds is better immersed in a little eau de cologne than water.

If you happen to be the lucky possessor of any pearls remember they must never be put in water, although sea water is good them. Pearls that are shut a dom worn lose their beaut so if you have such a necklace regularly, even if under your The contact with the skin will keep pearls a good color.

Turquoise are best washed with warm water and a little ammonia, but no soap. Soap is apt to turn their pretty blue into a green. When you are cleaning opals be careful not to drop them, for they are brittle and chip with alarming ease. In fact, they have earned a name for being unlucky simply because they are so fragile.

When you are not wearing jewelry do not leave it lying about or in a drawer knocking against other ornaments. Keep in a piece of leather or ments care will

EDITORIAL COMMENT

THE sorry part about three men running for Reeve is that we only need one of them.

+ + +

AN old Presbyterian was asked his views on Church union. "Union" he exclaimed, "Union wi' the fey Congregationalists and the godless Methodists! Mon, I'll gie up releegion altogether first—an' join the Anglicans."—Financial Post.

+ + +

ON DECEMBER 1st the Toronto Daily News and the Toronto Daily Star advanced their subscription rates from $2.00 per year to $2.50. This is done to meet the advanced price of material, etc., in connection with the issue of newspapers.

+ + +

WIVES are urged to bake their own bread in the interests of economy. The sad part of it is that if the wife takes the advice, father will have to buy a barrel of flour, a bread mixer, and a new gas or electric range, and then on top of it all have to eat the bread himself.

+ + +

BOOTS and shoes will retail at $20 to $30 a pair in the not far distant future, according to the prediction of leading leather and shoe manufactures and retailers of Great Britain. High leather shoes will soon pass and cloth tops will soon be all the rage, they say.

+ + +

LOCAL shareholders in the Durham cement works, will be interested to know that the big plant will shortly be running full blast in the manufacture of potash, for which there is a brisk demand at present. It is hoped that this new branch will increase the value of the stock in the concern.

+ + +

IN AN American town the subject of a debate was "Who will rock the cradle if mamma gets the vote?" Possibly the good lady would attend the poll and get back before folk had hardly [illegible] her. We know of men who spend idle time enough on election day to rock half the cradles in the neighborhood if the sleeping hours of the cherubs could be systematically arranged

+ + +

AN EXCHANGE tells of a newspaper reporter who interviewed thirty successful business men and found that all of them when boys had been governed strictly and frequently thrashed. He also interviewed thirty loafers and learned that twenty-seven of them had been "mamma's darling," and the other three had been reared by their grandmother.

+ + +

WHEN Mark Twain was editor of a weekly newspaper one of his subscribers wrote him that he had found a spider in his paper when it [illegible] him and inquired whether it [illegible] a sign of good luck. The noted humorist replied that the spider was simply looking over the paper to see which merchants were not advertising so he could visit them, spin a web across their door and live contented ever afterward.

+ + +

SOME folk who have mailed parcels to men in England and France have wondered why the postage to England should be higher than to France. A Walkerton citizen wrote the Post Office Department and the explanation given is that the Canadian Government has thrown off its [illegible] the postage to the men in the trenches, while still charging the full amount to those in England, where life is not so strenuous.

+ + +

WE NOTICE an exchange with a new idea. It says: "Rear lights on autos are very much to the front in police court circles these days." This is like the Irishman who jumped from the fifth storey of a burning hotel. In his hurry he got his trousers on wrong side foremost and on reaching terra firma in safety he decided that on looking himself over [illegible] he wasn't hurt but "mortally [illegible]."—Durham Chronicle.

+ + +

[illegible] nickel situation in Ontario is now dangerously serious and is [illegible]ging the Governments at Ottawa [illegible] at Toronto in for much warm criticism. The Toronto World, a Conservative journal, edited by a Conservative member of the House of Commons, commenting on Mr. Dewart's speech, said "the startling charges of Mr. Dewart must be probed to the bottom . . . the flow of Canadian nickel to German munition works must be stopped. The men responsible for it [illegible] be punished and all the [illegible] Cabinet Ministers [illegible] private life. . . . [illegible] close affili[illegible] control the [illegible] and Mr. [illegible]."

IN view of the proposals that are being made by a few individuals that a coalition government be formed in Canada, the following comment in the editorial column of the Walkerton Telescope of Feb. 8th, 1872 is interesting:—"We are entirely opposed to coalitions because they are almost unvariably composed of the most unprincipled men of both parties. Coalitions having no bond of union but power and plunder, are necessarily weak, and must and do resort to dangerous expediments to maintain their position."

+ + +

SERIOUS neglect of feeble-minded in the province, with grave attendant results, is the charge again renewed against the government, this time at a meeting of the Academy of Medicine in Toronto. Conditions in Toronto and other centres were described by Dr. C. K. Clark, retiring superintendent of the Toronto General Hospital and President of the Toronto Branch of the Provincial Association for the care of the Feeble-minded, and Dr. C. M. Hinks of the Psychiatric Clinic, as "revolting" "awful" "ghastly" and "nauseating." "When the facts are disclosed," said Dr. Hinks, "they should make your blood boil at the government's indifference."

+ + +

THE following comment by the Brussels Post applies equally as well to Bruce as to Huron County:—Huron county councillors will once more discuss the good roads movement at their December session. The present mode of keeping up the main highways is a patchwork method with results far from satisfactory. A number of municipalities are still wedded to the obsolete statute labor plan of forty years ago which have outlived their usefulness. Huron county council made a great mistake when the good roads provisions were not adopted years ago. By this time every main road in the county might have been in proper shape and a goodly proportion settled for by Government aid.

+ + +

BRUCE County Council will have an opportunity to join the good roads movement by passing the By-law which is to be presented for consideration at its December session. This is a movement which deserves the hearty support of every County and a prosperous County like Bruce which is so badly in need of road improvements should, in our opinion, have taken the step long ago. There is no excuse now for any county being behind in this respect, as the Government not only pays 40 per cent of the cost of construction, but 20 per cent of the cost of maintainance. If the roads are constructed according to plans of the Government engineers, The Bruce Council for 1916 will perform a lasting service to the County if they will make the initial move towards good roads under the Government plan. The present system is wasteful and utterly inadequate and the condition of the main roads of the county are anything but creditable to this prosperous county.

+ + +

ACCORDING to the Chesley Enterprise, Elderslie, like all other rural municipal organizations, has a council composed of five members and two officers whose appointment, though confirmed by the council at the first meeting each year, are always looked on as permanent officials. We refer to the Clerk and Treasurer. Every one of the septette is an abstainer from alcoholic beverages and not one of them uses tobacco. These days it is quite a rarity to meet men who do not smoke, and when the whole cabinet of Elderslie, including the Chancellor of the Exchequer and Secretary of State, refuse to bow the knee to Queen Nicotine or King Bacchus, it is, indeed, something unique. The whole bunch happen to be Presbyterians The fact that they are non-drinkers and non-smokers is not a passport for them to Heaven but it certainly will not hinder them in their pilgrimage to the Celestial Kingdom. The names of the seven are: Reeve Case; Councillors Allen, Thompson, Lewis and Fraser; Treasurer Ewart and Clerk Pearce.

+ + +

THIS story comes from a small town in Nova Scotia. It is true, and it points a moral at this time when the Canadian Patriotic Fund is appealing to the people of Ontario for six million dollars to cover the calls upon the Fund that are expected to be made by Ontario in 1917. A public meeting had been held in the town in question and an officer of the Patriotic Fund had explained the objects of the Fund and the urgency of the call it makes on the patriotism, generosity, gratitude and sense of justice of the Canadian people. The next day came the Mayor of the town to the speaker with this pathetic little story on his lips: "There were in the audience last night a father and mother whose only son is due to sail next week with his regiment They are not rich people and with difficulty they have saved forty dollars for the purpose of going to Halifax to see the last of their boy. They have come to me to-day to say that they heard your speech last night, and when they got home had a long talk about it, and came to the conclusion that it was their duty to give up their trip and hand over the forty dollars to the Patriotic Fund. Here is the money." And so one father and mother bade their son good-bye in their own home town instead of in Halifax, and somewhere there is one more mother and her children blessing the Patriotic Fund and its supporters.

Our Soldiers' Letters

Vic. Bell Writes Home from Germany—Interesting Letter from "Vic." McKechnie—Chum of Herbert Jarvis Says Ottawa Friends are Hopeful.

LETTER FROM GERMANY

Private Victor Bell, who was reported missing at Courcellette on Sept. 26th, and later as a prisoner of war in Germany, was heard from this week for the first time since his name appeared on the casualty list. Victor writes:—

Dulmen, Germany,
October 15th, 1916.

Dear May:—

Just a line to let you know I am well and hope you are the same.

Letters will be few and far apart now as we are only allowed to write two letters a month and one post card a week, so don't look for any more.

Will you send me a parcel every week. You can see in the paper what is allowed to be sent to us.

When you send me a parcel put in a tin of milk and a tin of syrup please. You are not allowed to send matches, pepper or onions, but anything else you like to.

You can ask at the Post Office what the weight is for a parcel. We are allowed to receive as many letters and parcels as you care to send. One thing we have is a good hut and bed so I will be alright.

I have another little souvenir, a bullet went through my left hand, but never hit a bone, so it is getting along fine.

You would laugh if you saw me now. I lost my razor in the battle, so I am growing a beard, about a ½ of an inch long now.

You are not allowed to send any newspapers. Can you arrange to send me a little money just enough to buy writing paper "as it has to be a special kind?"

Will have to close for now, with love.
Victor.

Gefangenenlager, Dulmen I Westf.
Group III Co'y 40, Barrack 26 A.

FROM LIEUT. V. A. McKECHNIE

100th Batt'n, Bramshott

Was out on a long route march lately and we were really tired, and were dragging along, when the band played "The Maple Leaf For Ever." Instantly the tired feeling was gone and some of the boys commenced to whistle in unison and ceased. Then thoughts of home were uppermost and some got out of pace, but after a little while heads were raised and all joined in the chorus and remembered what was expected of us. We were greatly shocked when the news came of Mr. Taylor's death. He was among the last that shook hands with us when we were leaving Londer and our sympathy went out to Mrs. Taylor and her interesting children. A very sad occurrence was the tragic death of Wesley Haug, one of the men I enlisted at Tiverton last spring. He was killed by an army motor truck. The Tiverton platoon was in quarantine and were out for a march by themselves for exercise when a car with staff officers came thundering up in the rear and instead of waiting to allow the column to pass the car, they tried to pass and one wheel caught Wesley and death was instantaneous. It is one of the most touching events I ever witnessed. There were about fifty men of our battalion left as the others were away on leave. C Co., with Adj. Whitehead, Capt. McKay, Lieut. Pettigrew and myself the officers left. The day of the funeral was a clear and silent one. There were the officers, the gun carriage, the flag draped coffin, the firing party with arms reversed, the men of the battalion still here and following as it were "afar off" his own friends, the Tiverton boys, who were not allowed to mingle because of quarantine. The quiet service in the ancient Bramshott Parish Church was very solemn as also the lowering of the coffin in a silent grave in a strange burial ground and in a foreign clime. There were tears in all our eyes and we were not ashamed. A holy silence seemed to prevail and not a single sound was to be heard, then the firing of the rifles, all heads bowed and a chant given. The solemnity of it all will remain forever. He was young, robust, clean, pure and a Christian. We all feel it. no drum—no call—not a hundred of us in all.

I must tell you about the Horse Guards in London—when a number of us were there, trying to find a place where we could get some money. It seems to be the custom over here to always go somewhere else for the necessities of life. We tried the banks, they sent us to Lloyds, one of their branches sent us to the head office and getting just a little panic stricken, we hailed a taxi driver by his first name and ventured through the traffic sufficient to crowd any one from the "straight and narrow." We zigzagged through the Strand into Trafalgar Square and out into a rather decent street without very many turnings and were headed for money and the much sought for Lloyds. On our way back to Whitehall we passed the office of those who give us a job—"The War Office." We stopped to look the Guards over and we did. You have read of the glittering Horse Guards, but the accounts are not nearly good enough. They are really gorgeous. There is a large courtyard surrounded by heavy and high iron bars. There are three arches and in two of these, guards were posted—no movement of horse or man simply a statute-like affair, with much fine raiment and glittering accoutrements. All of the horses are black, specially breeded and perfectly trained. Their hind feet were close together and the front ones of equal distance apart—their necks arched up and everything perfectly rigid. The men wear white kid tights, spotlessly clean. The boots are of black patent leather and come above the knee. The spurs are long and thin and look white, they are so highly polished. A white and red silk tunic from the shoulders to the waist and over this a tight mould of armour, fore and aft. This looks like a perfect mirror and keeps them perfectly straight. Tall handsome silver helmets surmounted by red plumes crown them all. They wear long black leather gauntlets and a stern gaze. Over the back of the horse and saddle a large and fine Persian lamb rug is thrown. The sentry has also a long silk lined cloak in case of rain. We saw them mounting guard. Just as we arrived, from each side of the courtyard eleven horsemen galloped and stopped short facing each other at about twenty feet apart, all were guards. The reds were being relieved, the blues going on guard. They saluted with long swords, then sat perfectly still. It was one of the prettiest sights I have ever seen. An officer came out to mount and even the horses moved forward or backward into perfect line. They were inspected, and saluted, and the new guard formed fours turned right and moved away. The old guard then dismissed in unison and were through for that time. Each man is over six feet and is warned one week in advance before going on guard and he polishes up everything. The new guard are all lifted on their horses so that nothing may be soiled. It costs an officer a very large sum of money each year to live and secure his uniforms and many of the men are millionaires; but can only draw the English Tommy's pay, about twenty-six cents per day.

Now dear people be good, be healthy and as we say here, be hungry. Best get used to all they tell us.

Yours, V. A.

OTTAWA FRIENDS SYMPATHIZE

Mr. Wess Jefferson, a member of Ottawa Free Press Staff, and an old friend of the publisher of the Telescope, writes:—

383 Chapel Street.
Ottawa, Nov. 23, 1916

Dear Lorne;—

Have been going to write you a few lines for some time with regard to a Walkerton boy, Pte. Herb Jarvis, who left Ottawa in June last with the 77th Battalion of this city. He was reported missing some three weeks ago and to-day is reported "believed killed." This splendid fellow worked with me on the Ottawa Free Press for some time and he was the friend of everybody on that paper. A couple of officers of the 77th Battalion came into the composing room one afternoon about a year ago and held a recruiting meeting. They addressed the members of the staff, explaining the need for men to fight for King and Country and the duty of every single man who had no ties. The result was that four of the staff enlisted, all of them fine, intelligent fellows who had good positions. Herb Jarvis was one of them and when we bade them good-bye we hoped old Fritz would not get any of them. I corresponded with Pte. Jarvis until recently and he assured me he would drop me a line when he got to Berlin. Only one of the four who enlisted at that time is on the firing line now. So you see the battalions from this city have suffered severely. To the family of poor Herb Jarvis the sympathy of the Free Press staff goes out. We are sure it will be some consolation to them to know he was so highly esteemed by his former companions and that if he has been killed he died gloriously fighting for the cause of liberty. All hope he will yet turn up alive.

Must close. I feel keenly the loss of poor Jarvis as we were fast friends and the report to-day that he was believed killed cast a gloom over the Free Press.

Again wishing you every success, I remain,

Your old friend,
Wess. Jefferson.

Shop Where Invited

The business men who advertise are the ones who invite your patronage and are most deserving of it. When a merchant persistently advertises an article, the critical customer can nearly always rely on it giving satisfaction, for the maker behind the product must be confident that it will earn your approval; otherwise he would not dream of holding it up for your criticism.

"I FEEL LIKE A NEW BEING"

"FRUIT-A-TIVES" Brought The Joy Of Health After Two Years' Suffering

MADAM LAPLANTE

35 St. Rose St., Montreal. April 4th.

"For over two years I was sick and miserable. I suffered from *constant Headaches, and had Palpitation of the Heart* so badly that I feared I would die. There seemed to be a lump in my stomach and the Constipation was dreadful. I suffered from *Pain in the Back and Kidney Disease.*

I was treated by a physician for a year and a half and he did me no good at all. I tried "Fruit-a-tives" as a last resort. After using three boxes, I was *greatly improved* and twelve boxes made me well. Now I can work all day and there are no Headaches, no Palpitation, no Heart Trouble, no Constipation, no Pain or Kidney Trouble and *I feel like a new being*—and it was "Fruit-a-tives" that gave me back my health".

MADAM ARTHUR LAPLANTE.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

ISSUER OF MARRIAGE LICENSES

T. E. ATTWOOD
GENERAL AGENT
Walkerton - Ontario

Notice to Creditors

In The Supreme Court Of Ontario In The Matter Of Perry Eli, A Lunatic.

PURSUANT to the order of the Supreme Court made in this matter, creditors of Perry Eli of the Town of Walkerton in the County of Bruce are required, on or before the 20th day of December, 1916, to send by post, prepaid, to John Henderson of Walkerton, the Committee of the person and estate of the said Perry Eli, their christian names and surnames, addresses and descriptions, and full particulars of their claims, a statement of their securities and the nature of the securities, if any, held by them, or in default thereof they will be peremptorily excluded from the benefit of the proceedings under said order.

Every creditor holding any security is to produce the same before me, at my chambers in the Court House at Walkerton, on the 21st day December, 1916, at ten o'clock in the forenoon, being the time appointed for adjudication of claims.

Dated this 17th day of November, 1916.

A. M. Greig,
Local Master at Walkerton,
pro tem.

Messrs. Robertson & McNab,
Solicitors for Committee.

POETS' CORNER

WHERE ARE YOU SLEEPING TO-NIGHT, DEAR LAD?

The following lines were handed to Lieut. Les. Young by a friend from Galt before he left for Overseas. Lieut. Young was killed in action while leading his Company on Nov. 11th 1916.

Where are you sleeping to-night, my lad?
Above ground or below,
The last we heard you were up at the front
Holding a trench and beating the brunt
But that was a week ago.
That was a week ago, dear lad,
And a week is a long, long time,
When a second's enough in the thick of the strife
To sever the thread of the bravest life
And end it in its prime.
Oh a week is long when so little's enough
To send a man below
It may be that while we named your name
The bullet sped and the quick end came
And the rest we shall never know.
But this we know, dear lad, all's well
With the man who has done his best
And whether he live or whether he die
He is sacred high in our memory
And to God we can leave the rest
So wherever you're sleeping to-night Dear Lad,
This one thing we do know
When the "Last Post" sounds and He makes His rounds
Not one of you all will be out of bounds
Above ground or below.

News About Town

A Christmas present that your friend receives 52 times—The Telescope.

John Inglis, of Chicago the "dean of crop experts" was at one time a Teeswater merchant.

A Christmas present that is appreciated by friends at a distance is a year's subscription to the Walkerton Telescope.

The village of Lion's Head will make application at the next session of the Ontario Legislature to be made an incorporated village.

Lieut. Leslie Martyn of Ripley, who was recruiting officer for the 160th Battalion in Ripley, has joined the British navy, and is now training at Halifax.

Mr. Timothy Hanley had a nice letter from Pte. Jack McGinity, now in France, in regard to the death of his son, Corp. Will Hanley, who made the supreme sacrifice in Flanders.

Mr. Ross Young is expected in town from the Canadian Soo in a few days, and Mrs. Young and children will return with him to the northern town to take up residence.—Hanover Post.

Rev. D. McLennan, Children's Aid Agent, visited Wiarton and the Peninsula last week in the interests of the Society, bringing back a small boy who will be placed in a foster home.

The Home Department of the Farmers' Sun, Toronto, is specially edited and present the latest ideas in every branch of the home work, in which the farmer's wife or daughter is interested. Your reading is not complete without the Sun.

Daniel MacDonald, the youngest son of Mrs. MacDonald of Chesley, has enlisted in the 9th Battery, Toronto. Daniel has been working in a munitions plant until recently. He has two brothers in khaki, Jack, who has been wounded in France, and Stuart in the 160th Bruce Battalion, now in England.

✢ ✢ ✢

Laws For Trappers

The Telescope has been frequently interrogated lately concerning the Ontario game laws respecting fur-bearing animals. All trappers are now required to secure licenses from the provincial government. The license fee for trappers is $5.00 and the license is not transferable. The license fee to non residents is $50.00. Muskrats can be caught legally now only from March 1st to April 21st. Mink from November 1st to May 1st. No license is required by a farmer or a farmer's son to trap on his own land, excepting in the case of trapping for beaver or otter.

NEW BOOKS AT LIBRARY

The following books have been added to the Public Library.

Passed by Censor—Wilbaim.
Witch of Endor—Norwood.
Parts of Europe—Cram.
Speaking of Home—Tryon.
Red Watch—Curtis.
Kingdom of the Blind—Oppenheim.
Big Timber—Martin.
Lolo's Share—Delane.
Filling His Own Shoes—Benson.
World for Sale—Parker.
Undressed Heroine—Grandy.
After the Manner of Men—Lynde.
Door of Dread—Stringer.
Little House in War Time—Caste.
Dr. Nick—Steele.

Juvenile Books

Old Man Coyote.
Prickly Pork.
Rod of Lone Patrol.
Single Code Girl.

PLUCKY REG. McCARTER

Was Hit by Shrapnel but Would Not Turn Back and Went on to his Death.

Those who knew Reg. McCarter in his lively boyhood days in Walkerton will not be surprised to learn that it was Reg's exceptional pluck that cost him his life on the battlefield in Flanders. Some particulars are given in a letter just received by Coun. McCarter, written to his son, Sergt. Milton McCarter of the 160th Batt'n, by an acquaintance of Reg's in the 13th Royal Canadian Highlanders, to which he belonged.

His friend, D. M. McNaught, writes from Drumpellier, Coatbridge, Scotland, under date of Oct. 10th:—"I convey this re your brother. On the morning of the 13th of June, we made a charge and as we went over the parapet your brother was hit in the arm with a small piece of high explosive. In spite of this, however, he kept on with his pals when he could have gone back to the dressing station. This I know of. The rest I heard lately, that your brother was caught by machine gun fire between the Boche first and second lines, which latter was our objective and which we took alright. Where your brother was killed was at —— and would be buried there in one of the cemeteries, probably at ——. —— is about 2 miles from —— in the Ypres Salient. Anyone can tell you where should you be in that part of the line. I may say your brother was well thought of in the trenches. I have heard him spoken of very highly and I think it would only have been a short time until he would have been decorated as he certainly was one game lad. He was always volunteering if there was anything dangerous on and would always be doing something when in the front line to bother the Boches. You and your parents have my sincere sympathy and I can say there were lots of the boys sorry when "Mac" got his. He certainly died game and did his full duty."

The letter was addressed to Sergt. Milt. McCarter at London, Ont. Camp but arrived too late and finally reached Walkerton after crossing the Atlantic three times.

Country School Reports

RIVERSDALE

The following report is based on the examinations held during November and on general class work. The names are in order of merit. The average for November was 47.

Sr. IV:—Frank O'Hagan, Marion Petteplace, Helen Dietrich, James Petteplace, Albert Radin.

Jr. IV:—Ella Moore, Lilyan Hoffman.

Sr. III:—Joseph Cassidy, Hannah Petteplace, Morley Petteplace, Erma McDonald, Everett McDonald, Eugene O'Hagan, Hobart Moore.

Jr. III:—Murdock McKinnon, Alex Chatreau, Thompson Lee, Florence Dietrich, Melinda O'Hagan, Norman Hoffman, Josephine Beninger, Willie Cassidy, Charles Gauthier.

Jr. II:—Mary Moore, Wilfred Moore, Bert Dietrich, Richard Carcagette, Ross Strause.

Sr. I:—Agnes Moore, Thomas Moore, Rena Moore, Florence Brown, Marjorie Cassidy, William O'Hagan, Kelvin Lamont, Catharine Petteplace.

Jr. I:—Doris Lee, Emily Carcagnette, Sherman Beninger, James Cassidy, Jimmie Carkanette.

Sr. Primary—Florence Beninger, George Dietrich, Archie McKinnon.

Jr. Primary:—Barney Petteplace, Edna O'Hagan, Harold Cassidy, Fred Moore, Clement Moore, Willie Moore, Neil Lamont.

J. A. Dietrich,
Teacher, S.S. No 2, Greenock.

CARRICK

S. S. NO. 2
Report for November

IV.—Bertha Polfus 88, Stanley Wilton 79, Otilda Polfus 70, Zenobia Miller 76.

Sr. III.—Elizabeth Polfus 88, Elsie Jasper 73, Wilma Koenig 65, Olivia Smith 64, Evelyn Hossfeld 62, Louisa Hossfeld 60.

Jr. III.—Nellie Jasper 74, Lorena Voigt 74, Arthur Hossfeld 69, Lucy Gillen 65, Wallace Wilton 59, Arthur Procknow 58, Edward Voigt 48.

Jr. II.—Alfred Polfus 80, Mike Gillen 77, Alma Krueger 70, Martin Polfus 70, Evely Weber, 65, Katie Hossfeld 57.

Pt. Bk.—Willie Hossfeld 77, Mabel Lerch 70, Annie Hossfeld 73, Orlando Smith 73, Hilda Lerch 62, Hilda Hossfeld 60, Matilda Voigt 59, Herbie Procknow 55.

Primer—Melinda Polfus, Edith Polfus, Ollie Hossfeld, Dominic Gillen, Arthur Weber, Verna Seegmiller, Herbie Hossfe'd, Mellville Seegmiller.

Enrollment 30, Average attendance 25.5.

M. B. Hogg,
Teacher.

Walkerton merchants are well-stocked for the Christmas trade. If you are looking for Christmas suggestions, you will find some good ones in the Telescope advertising columns.

S. C. Cooper, proprietor of the only newspaper north of Wiarton, The Bruce Peninsular News published at Lion's Head, has moved to Owen Sound where he is engaged in the insurance business.

WALKERTON HIGH SCHOOL

Standing of Students in the Various Forms for the Month of November.

The following are the results of the weekly examinations held during November. For Honors 75 is required; for Pass, 60. The number of subjects written upon in a form varies according to the course taken. The names are given in order of merit.

FORM I.

Subjects:—Latin, Composition, Art, Arithmetic.

Those that wrote on four subjects:—

Pass:—J. Norrish, C. McNab, G. Van Horne, F. Young, E. Bremner, S. Greenzenbach, A. Waechter, A. Pinkerton, A. Condy, I. Moore, L. Elder B. Thompson, A. Chisholm.

Below pass:—J. Kenny, L. Wallace, G. Ellis, L. Bryce, E. Smith.

On three subjects:—

Pass—S. Reichenbach, N. Shaw, F. Garner, C. Attwood, F. Brocklebank.

On two subjects:—J. Patterson 65%.

Below Pass:—G. Lamberton, G. Henderson, L. Hergott, J. Binder, A. Lamberton, E. Girsler, W. Inglis, F. Meagher N. McCarter.

FORM II.

Subjects:—History, Composition, Geometry, Latin.

Those that wrote on four subjects:—

Honors:—Leo. Yaeck, V. Eidt, A. Weiler, W. Ramsey, A. Johnston.

Pass:—N. Lay, F. Scherrer, W. Polfus, B. Moore, M. Chisholm, H. Johnston.

Below Pass:—G. Hibbert, J. Mitchell, E. Ramsey, C. Wilton, W. Small, B. Farewell, E. Miellhausen.

Three subjects:—

Honors.—G. Young, H. Irwin.

Pass:—T. Queen, M. Bonnyman, E. Lindsay, S. Brocklebank, M. Kenny, L. Bilger, E. Stevens, A. Reinhart, M. Wilson, D. Kenny.

Below Pass:—S. Taggart, I. Wisser.

FORM III.

Subjects:—Algebra, Chemistry, Latin, French, German.

Those writing on four subjects:—

Pass—A. McCool, A. Garland, L. McConnel, B. McCool.

Below Pass:—M. Forsythe, G. Pfohl, L. Hatte, J. Chalmers.

On three subjects:—

Pass—A. Tolton, E. Glave, E. Bilger, L. Bilger.

Below Pass:—C. Tovell, V. Tovell.

On two subjects.

Honors:—A. Pinkney, G. Rogers, F. Taylor, G. Seigner, W. Wilson.

Pass:—M. Chalmers.

Below Pass:—G. Lewis, C. Cargill, M. Baechler.

FORM IV

Subjects:—
Chemistry, History, Botany, Mineralogy.

Honors:—S. Bush.

Pass:—C. Fortune, J. Wells, C. Thornburn, M. Green, M. Weiler.

Mail Rates to the Soldier Boys

The following are the rates of postage on letters, parcels and newspapers to members of the Canadian Expeditionary Forces in Flanders, France and England:

Parcels—To France and Flanders

Up to three pounds, 24 cents. From three pounds to seven pounds, which is the limit, 32 cents.

To England

Twelve cents per pound or fraction of a pound, straight, up to limit of 11 pounds.

Letters—To France, Flanders and England

Three cents for the first ounce, and two cents for each additional ounce.

All should be addressed to Army Post Office, London, England, from whence they will be forwarded.

Newspapers

To France, one cent for two ounces.

English mails close each Monday and Thursday at one o'clock p. m., at Toronto. For registered matter the mails close at nine o'clock a. m., Mondays and Tuesdays (Toronto).

Parcels For the Soldier Boys

Ordinary thin cardboard boxes, such as shoe boxes, and thin wooden boxes should not be used; nor does a single sheet of ordinary brown paper afford sufficient protection. Even where proper materials are used, it is important that the contents should be tightly packed, so as not to shake about during transit. The following forms of package are recommended:

(1)—Strong double cardboard or strawboard boxes, those made of corrugated cardboard and having lids which completely enclose the sides of the boxes are most suitable.

(2)—Tin boxes, such as are used for packing biscuits.

(3)—Strong wooden boxes.

(4)—Several folds of stout packing paper.

For Prisoners of War

Parcels for prisoners of war in Germany must not be wrapped in linen, calico, canvass, or any other textile material.

P. S. HONOR ROLL

The Report of Walkerton Public School for the Month of November.

GRADE VII.

Sr. IV.—Honours—G. Miller, G. McCarter, E Crydremon.

Pass—W. George, V. Bush, F. Wilson, A. Bolden, M. Royce, V. Stelling, J. Flewelling, G. Thompson, K. Bell.

Jr. IV.—Honours—B. Hunter.

Pass—M. Lumley, M. Godwin, E. Searle, R. Wilson, C. Johnston, C. Kenney, M. McGregor.

H. Willoughby,
Principal.

GRADE VI.

Honours—(Dora White, Irene Harrison) Elmer Kolple, Pearl Riehl, Elwin Faust, Marguerite Johnston, Jack Knepflar, Gladys Sutton.

Pass—Ross Van Horne, Eddie Fennell, Alma Searle, Doris Van Horne, Eric Ramsey, Madaleen Hyslop, Mary Perdue, Dorothy Truax, Jean Delmage.

J. Stead.

GRADE V.

Sen.—Honours—Clifford Yates, Guy Ramsey, Marie Schwindt.

Pass—Howard Craig, Charlie Gordon, Millard White, Vinnie Dennie, Kathleen Pye, Charlie Wallace, Morris McCarter, Norman Webb.

Jun.—Pass—Waldon Forsythe, Ila Moore, Franklin Bush, Adeline Fastbrook, Verna Anderson.

M. Ross.

GRADE IV.

Honors:—W. Goode, D. Polley, H. Buehlow, J. Van Horne, J. Cotterman, N. McCartney, E. Yates, G. George, A. Royce, K. Perdue, N. Fortune, R. Hampson.

Pass:—N. Truax, W. Hunt, R. Gowanlock, E. Singer, W. Hehn, D. Gowanlock, R. Johnston, G. Dietsche.

Agnes Warren.

GRADE III.

Jun. Sec.—Honours—D. McNeil, H. Hartman, R. Fruin, D. George.

Pass—J. Nutting, N. Forsythe, O. Selling, B. Orser, C. Fields, G. Mawhinney.

Sen. First—Honours—H. Moore, H. Perdue, J. Hiscox, S. Hehn, A. Abell.

Pass—J. Webber, K. Fortune, C. Paull, G. Thompson, O. Fisk, N. Whitehead.

A. Halladay.

GRADE II.

First Class—Honors—R. Hunter, E. Dietsche, V. Bell, S. Channing, M. Appel, T. McEwen, M. Player.

Pass:—M. Shaw, H. Bush, P. George, H. Ernest, P. McConnell, A. Craig

Primer—Honors—M. Jones, E. Taylor, M. Faust, E. Watts, G. Schwindt, M. Pletsch, P. Webb.

Pass—D. Lancaster, J. George.

W. Thompson

GRADE I.

Sr. Pr.—Emma Leake, Florence McCarter, Jack Symon, Walter Menk, Billy Johnston, Edith Long, Arthur Whitehead, Geo. McGregor, Allie Leake, Willie Fennell, Helen Royce, Ruth Pye.

Mid. Pr.—Percy Nutting, Marjorie Bell, Jack McDougall, Hubert Dietz, Milton Ramsey, Peter Van Horne.

Jr.—Pr.—Dorothy Ernest, Alex Shaw, Mildred Silver, Garnet Van Horne, Paul George, Helen Reichenbach, Girda Bowlby, Milne Harrison, Lennox Winters, Henry Taylor, Agnes Gordon, Clayton Riehl, Franklin Spieran, Wilbur Hampson.

A. D. Thompson.

FROM FAR-OFF SASK.

Mr. G. B. Miller, of Southey, Sask., an old Bruce boy, writes the Telescope:—Southey is on the C. P. R. and about forty miles north of Regina, we have 300 population. It is a very good wheat district. They never have a total failure. This year crops averaged about 18 bushels per acre but the weather was quite a hindrance to threshing. A lot went tough but even then the prices were good. We have a very mixed settlement, mostly Austrians. Have quite a few Americans, Norwegians and English, and a few Canadians. There are a few Bruce people here, Henry Abrams, Frank Wolfe and a Mr. Zingler. Mr. Abrams and Wolfe are going to visit old Bruce this winter. They had good crops and can well afford it. You might wonder how the Austrians feel about the war. Well, nearly every one has a brother or some relative in the war, so you can't blame them for having a feeling for them. But that is about as far as it goes. They are all glad that they are in Canada and we need fear no trouble from them. Most of them are prosperous and many have cars. Land around here sells from $18 to $35 per acre. I suppose I could write a great deal more about our town and district but it wouldn't be interesting. One thing I might mention. We did fairly well for the Red Cross, about $1500, not bad, outside of other funds. Re myself, I sold my business last June and am as yet undecided where to take up residence. I might take a run down East this winter. Best wishes to all my pals and the brothers of the C. O. F. for I am still a member of that Court.

On the Belleville board last week 26 1-16 cents was paid for cheese, the highest figure in the history of the industry in Canada.

The Teeswater News is celebrating its fiftieth year of publication by installing an up-to-date type-setting machine. The News, which by the way is edited by a lady, Miss M. Fairbairn, is a bright local weekly and has our best wishes for its continued success.

Shingles!

New Brunswick White Cedar Shingles, Grades, Extra and Clear. Also a large stock of British Columbia Shingles in grades, 1, 2, 3, 4 and 5 X. Call and get special prices.

CURRENT COMMENT

"With a Field Ambulance at Ypres" is the title of a most interesting new war book, written by Mr. William Boyd, professor of Pathology in the University of Manitoba. The book is composed of letters written at the front between March 7 and Aug 16, 1915. Musson Book Co., Limited, Toronto.

SOME WAR FIGURES.

The October number of the United Empire, the Royal Colonial Institute Journal, gives some interesting figures. In 1914 the British army numbered 275,000 men; in 1916, 5,000,000. In 1914 the British navy numbered 146,000, in 1916, 350,000. The Dominion Overseas—Canada, Australia, New Zealand, South Africa, Newfoundland, India, Crown Colonies have given over 1,000,000 men to Britain. Although about 3,000,000 men have been drawn from industry by military requirements there are now more than 2,600,000 workers engaged in war industries in Britain of whom some [illegible],000 are women.

Great Britain is now manufacturing and issuing every week to her armies on the western front an amount of ammunition equal to the total stock available for her entire land services at the outbreak of war. The approximate amount of territory occupied by the Central Powers on August 2nd, 1916, was: In Belgium 11,100 square miles, in France 8,300, in Russia 106,-260, in Serbia 33,900, in Montenegro 5,600. Total, 165,100. That was how it stood before the beginning of the Somme advance. The approximate amount of territory occupied by the allies on August 2nd, 1916 was: In Alsace, 300 square miles, in Galicia [illegible]800, in Bukowina, 3,800. In Anatolia 800, in Turkey 1[illegible],800, In S. W. Africa 322,450, in E. Africa 211,60[illegible], in Cameroons 191,100, in Togoland 33,700, in Pacific, 96,160, in Kiao-Chau 200. Total 914,210. Great Britain has sustained the money power of the allies by loans to her allies, and the Dominions, aggregating £450,000,000.

SOME WAR COMMENT.

Mr. Frederick Palmer, the U. S. war correspondent the British War Office appointed to represent the American press at the front, has arrived in New York for his holidays and a rest. Mr. Palmer states that the war will last for two, perhaps three years longer. He declares that Britain is prepared to sacrifice a million lives next year to beat the enemy; that they will be given no rest this winter and that the allied generals are prepared to fight to a finish. He avers that the British soldiers will listen to no talk of peace, and that the British intend to keep the German colonies that they have captured.

Lord Robert Cecil, Minister of War Trade, has issued a vigorous protest against the deportation of Belgians to Germany, and appeals to American public opinion to bring pressure upon the Germans to halt in their new scheme to depopulate Belgium and make its people slaves in a foreign country. Lord Robert declares that the scheme is to turn Belgium into a desert, to force the manhood of Belgium to become Germanized, to swallow them up in the great military machine. The allies can and will save Belgium, he says, but they cannot prevent its depopulation. He appeals to the neutral nations to save the Belgian people from this new outrage.

While thus dealing with Belgium, the Germans have another plan for Poland. She is promised her independence, provided she supplies Germany with an army to fight against those who would befriend her. Should the Poles rally around the German standard and they are promised their independence; should they fail, the promise will be withdrawn. There are a great number of Germans in Poland and they may have influence enough to have such an army raised. Russia has already warned the Poles as to where their allegiance lies. Yesterday the Premiers of Britain, France and Italy wired the Russian Premier their approval of and satisfaction with the protest Russia had made against the pretension Germany had made of creating a new state out of territory temporarily held by her. The Allies have a different future in store for Poland.

The situation on all fronts is satisfactory from an Allied point of view except in the zone where Gen. Falkenhayn is pushing back the Roumanians. This is at present the only real danger spot. And it is a real danger. The Allies will no doubt strain every effort to check his advance. Were Germany to overrun Roumania as it has Poland, Belgium and Serbia, the result would be to lengthen out the war. The lesson for Canada in all this is to continue to increase her fighting forces at the front so that she will be able to say that she did her full duty for civilization and liberty in the great struggle.

DIDN'T WORK OUT.

(Judge)

"To be happy," said the Curate, "a man should decide on one thing he would like to do well, and then perfect himself until he can do it better than anybody else."

"Another storybook virtue, my dear Doctor," said the Old Member, "that doesn't work out. There is Ivry, for example, the loneliest man in the club."

"And what about Ivry?"

"He plays such a good game of billiards that nobody will play with him."

Of course there is graft in politics. Many a man shakes a plum tree only to get a lemon.

HER HUMBLE LOVER

"Well, Sir Frederic wishes you to go over to lunch," replies the rector. "I'll order the carriage to be ready in an hour, if you like. He expressly asks you to go early. You'll admire the park grounds, my dear," to Signa.

"Yes," Mrs Podswell says, with great interest, "and the house: it's quite a show place. Sir Frederic is very proud of it."

"So it appears," says Signa, smiling, as she remembers the baronet's remarks about "his place" and "people." "I think I will go and look after Archie," she adds.

The rector looks after her with his chin on his hand, musingly.

"Sir Frederic's very, ahem, attentive, Amelia," he says, suggestively.

"Yes," assents Mrs. Podswell, significantly. "He must have been struck by her; certainly the girl looked striking last night. It was a mistake, her not dining with us."

"I think I said so," said the rector, meekly.

Mrs. Podswell sniffs.

"Who was to know that they would have taken so much notice of her? I'm sure Lady Rookwell made herself quite ridiculous, however, they have taken to her, and that's an end of it. I wonder whether Sir Frederic's really smitten?"

The rector coughs.

"If—if it should be, it would be a great thing for the girl, Amelia. I think it is our duty to give her every assistance. It would be rather advantageous to have a niece of ours the future Lady Blyte, of Blyte Park; and really such strange things happen, and"—he coughs and shakes his head thoughtfully—"I wish we had let her sit down to dinner."

"Well, that can't be helped now," retorts Mrs. Podswell, sharply, "and, after all, there was no harm done. I'll go and get ready now. Have plenty of cushions put in the carriage. I'm sure I'm willing to do my duty by the girl, whatever it may cost me."

"Quite so, my dear," murmured the rector, meekly; and he falls into a brown study, in which he sees Signa, [illegible] alone, reigning at the Park, and himself an honored guest there.

Meanwhile, Signa had made straight for the garden, where she knows that she will find Archie perched on the back of a rustic seat, overlooking the road to the Grange. As she approaches this spot she hears a man's voice, mingled with the boy's, and she knows that it is Hector Warren's.

For a moment she stops, half inclined—why, she knows not—to go back; but ashamed of her folly, as she designates it, she goes on.

Archie is seated on the very top of the rustic seat, looking down upon Hector Warren, who leans over the fence, and Signa is in time to hear the child say:

"Well, if Signa says it's all right, I'll forgive you."

"Thanks!" says Hector Warren.

Then, as he sees Signa, he lifts his weather-stained deer-stalker and stands upright.

"Good morning, Miss Grenville. I have just been making my peace with Archie. I only need your advocacy to gain forgiveness."

She gives him her hand, feeling that the tell-tale color has mounted to her face, and smiles.

"I explained it all to Archie this morning," she says. "But he is a hard judge."

"So I find," he says, his eyes fixed on her face—not pale now, but lovely as a blush rose at sunrise. "Are you tired this morning after last night's dissipation?"

"No," she says. "Were you coming to the Rectory?"

He shakes his head.

"Not yet. I shouldn't dare to present myself before the regulation time, 12 o'clock. No, I was going to the Grange; but I saw Archie, and stopped to win forgiveness."

There is silence for a moment: his eyes are fixed upon her face—hers fixed upon the ground.

Archie regards them with his shrewd scrutiny for a moment, then he says:

"Signa is a great lady now, Mr. Warren."

"Indeed!" he says.

Archie nodds.

"Yes since last night. It was all last night. I heard papa and mamma talking about it. Mamma said that she had no idea Signa would look so well, or that Sir Frederic and Lady Rookwell—that's the old lady with the teeth—would take so much notice of her——"

"Archie!" exclaims Signa, laughing.

But he goes on undaunted. "And this morning mamma kissed her, and papa made ever so much fuss of her. Ain't it funny? And what do you think? Sir Frederic sent one of his grooms to ask her to go over and lunch at the Park. I saw him in the kitchen where he was drinking beer."

Hector Warren looks at Signa with a strange glance of inquiry, and for the life of her Signa cannot help the traitorous color flooding her cheek.

"Are you going to Sir Frederic's?" he asks quietly.

"Yes," says Signa, trying to speak indifferently.

He is silent for a moment, then he says:

"Sir Frederic is a great man, and Blyte Park must be worth seeing. I hope you will have a pleasant day."

"Thanks," she says.

"And what are you going to do?" asks Archie, bluntly.

"I?" he answers absently. "Oh, I am going to the Grange, to explore the library, Archie."

"Oh," says Archie, thoughtfully, then his eyes wander over the distinguished figure ruminatingly for a moment, and he says with the suddenness of his age:

"I say, why do you wear such old clothes?"

"My dear Archie!" expostulates Signa, with a smile, but Hector Warren laughs easily.

"Why do I wear old clothes, Archie? because new ones are expensive—not to say uncomfortable—and perhaps I am poor and cannot afford better."

"I see," says Archie. "I'm sorry you are poor—"

"So am I," retorts Hector Warren, ironically.

"Because," continues Archie, shrewdly, "poor people are always wicked; it is poor people who steal things and poach. Do you poach? I wish you were as rich as Sir Frederic."

"It would be very nice," says Hector Warren, his eyes fixed on Signa's face with a smiling watchfulness.

"Archie has found out the value of riches at an early age," says Signa, with a laugh. "Archie is fearfully wise. Money isn't everything, Archie."

"Isn't it?" he asks, shrewdly. "Don't you wish you were rich, Signa?"

Hector Warren waits for the answer as well as Archie, and the dark eyes, with their grave smile, rest upon hers questioningly.

"I don't know that I do," says Signa, lightly. "Money is not everything," she repeats, "one can be happy without it, Archie."

The child shakes his head.

"If I were rich I'd buy a pony," he says, and this seems to bring the argument to so practical a conclusion that he opens the gate and trots out.

"Can I tempt you to walk a little way?" says Hector Warren. "It is so beautiful a morning, the very hedges are fragrant. Will you not come to the end of the lane? Archie is already there", and the grave musical voice grows pleading.

Signa looks over the fence wistfully, then, with a faint smile, passes through the gate he opens for her. The sun is shining with all its summer splendor, up above their heads, in an old oak, a thrush is pouring out its after-breakfast song, the hedges, as he says, are fragrant with the breath of the wild flowers, and as Signa hears the gate click behind her she sighs half happily, half regretfully, thinking vaguely how much nicer it would be to wander along the lanes, or saunter over the deserted Grange, than pay the proposed visit to Blyte Park.

Perhaps he is thinking the same, for he looks up at the sky and then at the beautiful face at his side, and says:

"You will have a fine day for your trip. I hope you will enjoy it. I will think of you as I sit amongst the dusty books. Yes, Sir Frederic is a great man. It is rather surprising that he is not married," and he looks straight before him.

"Is it?" says Signa, laughing softly. "Perhaps Sir Frederic experiences some difficulty in finding a lady good enough for him."

He smiles thoughtfully. Signa fancies that he is graver than usual this morning—fancies also that the handsome face is somewhat paler and more haggard. She cannot guess that he has spent the night pacing his small room instead of sleeping.

"Perhaps so," he assents. "I should think Sir Frederic would be rather hard to please. The lady whom he honors with his choice will be a great lady in the land. After all, there is wisdom in Archie's opinion, one can buy things more precious even than a pony when one is rich."

"One cannot buy everything," says Signa, quietly, and he looks at her wistfully, his dark eyes seeming to penetrate to her very thoughts.

"And did you enjoy yourself last night?" he asks, suddenly changing the subject.

"Very much," she answers, looking up at him with the smile in her eyes which turns them from grey to violet. "It was very pleasant. I think everybody enjoyed themselves. Even Lady Rookwell."

He nods, and as a swift shadow passes over his face Signa knows that he is thinking of the story which her ladyship had told so dramatically. She longs to ask him plainly if he has heard it before, and whether it is true, but it is scarcely a subject that she can refer to, and he remains silent, walking with his hands behind his back and his head lowered, for a few moments, then he raises his head, and with a slight gesture as if dispelling a troublesome thought, he says, lightly:

"Do you know that I had a wild idea of asking you to let me show you a walk I have discovered! I half hoped to see you as I passed this morning."

"Had you? What walk?" says Signa, more than ever regretting Sir Frederic's invitation.

He turns and points to the view below them.

"Look there," he says. "Do you see where the river opens to the sea? There is a little bay there—there where the fishermen's cottages are. You have no idea how pretty the spot looks when one stands opposite to it on this side of the river. It makes a perfect little picture. I thought, perhaps, I might tempt you and Archie to accompany me—but you are going to Blyte Park!"

Signa sighs.

"Yes!"

"Never mind," he says. "The tide will not wash the picture out. Will you come to-morrow?"

"I should like to go very much," she says, shading her eyes and looking wistfully toward the sea, "and Archie will be delighted."

"Would you? Will you meet me to-morrow, at this time, at the end of the lane leading to the beach? It is a great deal to ask, I know," and his dark eyes rest on hers gravely.

Signa looks down and hesitates. She longs to say "Yes," but she wonders what the rector and his wife will say.

"A very great deal to ask," he repeats. "Too much. Never mind."

"But I do mind!" she says, with a low laugh. "I want to go very much, indeed. I do not know why I should not. It will not matter. I mean it will be of no consequence to any one——"

"Excepting Archie and me," he puts in, quietly.

Signa is silent for a moment: then she looks up.

"Yes, I will come. At the end of the lane?"

"It is a promise," he says, and his eyes brighten.

"Yes, but," and she colors faintly, "are you sure you can spare the time, my uncle said that he heard you say you were going to leave here soon."

He is silent for a moment, looking down at the ground, then he says:

"I did say so. I do not know. I am a wanderer on the face of the earth, without a tie, objectless, purposeless." There is something in his voice, though it is not intentionally sad, that touches Signa.

"Are you so quite alone?" she says, gently.

"Quite," he says, with a grave laugh, as if he were ashamed of having moved her pity. "I have absolutely no one to study. You know that line of Byron's—'Lord of himself, that heritage of woe.' It is very hackneyed, but fearfully true. I have been lord of myself ever since I was a boy, and I am rather tired of my heritage." Signa looks at the handsome face with deep interest. He has spoken almost to himself, and quite unconscious to the effect his words have produced. "Chance, mere chance directed my footsteps here; I was curious to see the place I had heard so much of, and I came, intending to stop a few hours only, and to drift away again as purposeless as when I came; but there is a charm——" He breaks off, and seems to suddenly recollect that he is not alone. "The Grange is rather fascinating," he goes on with a curious smile. "I am fond of old books, and I shall stay a little longer to pore over Delamere's."

Signa cannot speak. Already she seems to hear him say, "Good bye," and to feel that he has gone.

Fortunately for her, Archie comes running up with his hands full of wild flowers.

"Look here," he says: "I've picked these for you, Signa. Come and sit down and look at them."

And he drops on to the bank.

Signa obeys and Hector Warren stands looking down at them, wondering whether in all his surroundings he has seen a more beautiful picture than this, which the lovely girl makes as she bends over the flowers and lifts the face, lit with a loving smile, to the boy's eager one.

"Aren't they beautiful?" says Archie. "Do you know their names?"

"Not of half of them," says Signa, shaking her head.

Hector Warren throws himself down at her feet and holds out his hand.

"Give them to me," he says pleasantly. "I think I can satisfy Archie's curiosity."

And he takes the flowers and names them one by one.

"How clever you are, Mr. Warren! Do you know everything?"

"Not everything, Archie," he replies, smiling. "But I'm fond of flowers, you see. There's one that grows in Italy and Switzerland. You want a spray of pine to make your bouquet complete."

Archie follows his gaze to a tall pine growing opposite them and shakes his head.

"I can't get that," he says, decidedly. "Could you?"

"I think so," he replies.

"There's a nice piece there," says Archie, pointing almost to the topmost bough. "It would make such a nice finish for Signa's posy; but you couldn't get it, I'm sure."

"I can try," said Hector Warren, rising.

"Please do not," says Signa, quickly and emphatically. "You surely do not mean to climb that tree?" And her face flushes.

He looks round at her with a quiet smile.

"Why not?" he says. "Sir Frederic will no doubt pick you a grand bouquet from his hot houses—will you not let me offer you a modest spray of fir?"

And as he speaks, he takes off his coat and begins to climb.

"Pray do not!" exclaims Signa, eyeing the tall, gaunt pine aghast. "Archie was only in fun, and—oh, do not!"

She breaks off with genuine alarm in her voice, for with the ease of a practised athlete he sets his foot on the rough, scarred bark, and grasping a bough, pulls himself up to it.

"Do not be alarmed," he says, and his voice sounds light and cheerful, as if he enjoyed the task. "There is no danger, or I would not distress you by risking it. You shall have your spray of pine, Archie."

"Isn't it splendid?" whispers Archie, excitedly. "Fancy climbing that tree, and all for a bit of leaf, Signa!"

And he stands with his eager face upturned to the graceful figure that is slowly but surely ascending the tree.

"Is this it?" comes Hector Warren's voice downward.

"Higher still!" says Archie.

"No, no!" cries Signa. "Please do not! Archie, I am very angry with you! Oh!"—for a rotten branch gives way beneath the climber's weight, and comes crashing down amongst the leaves with an ominous sound; but Hector Warren is too practiced an athlete to trust himself to a bough unless he has tried it, and Signa, with bated breath, sees him swaying still higher, until he is lost amidst the thick branches of the tall pine.

"Oh, Archie, Archie!" murmurs Signa, reproachfully. "See what your idle words have done!"

"He is all right, Signa," says Archie, confidently. "Don't you be frightened. See, here he comes! And he has got the very spray."

Carefully, for all his apparently careless speed, Hector Warren comes down, and in another moment is standing with the spray in his hand before them.

"There you are," he says, with a smile.

But there is no smile on Signa's face—indeed, it is rather pale and anxious still.

"I am not at all pleased," she says, gravely. "It was not worth risking a broken limb for!"

He laughs, and wipes his hands, scratched and torn by the rough bark and sharp pine needles.

"There was no risk, I assure you. Please believe me. Won't you accept it, for Archie's sake?" and he holds out the dark-green spray.

Signa takes it with downcast eyes, and without even a "Thank you"—her heart beating too fast, perhaps, to allow of words, but Archie dances with delighted admiration.

"I didn't think you could climb like that," he says, confidentially. "I thought you couldn't do anything but read books."

"Did you?" retorts Hector Warren, good-naturedly. "Well, it isn't much after all. I'll teach you to mount a tree some day, perhaps. Now let me arrange the bouquet, may I? Then you can present it to Miss Grenville," and he seats himself on the bank and spreads out the wild flowers. Signa watches him, fascinated by the quiet, masterful manner which sits upon him so easily in his coatless state as it did last night, when in evening dress he overawed even the great Sir Frederic.

(To be continued.)

Figures never lie; but it sometimes takes an expert accountant to prove the truth of this.

We promise according to our hopes, and perform according to our fears.—La Rochefoucauld.

"Strange," remarked the grocer, weighing out the arsenate of lead, "nothing but a potato bug will eat a potato vine." "That bein' the case, however, nothin' else needs to," amended Uncle Lemuel, sighing.—Farm Life.

Hamilton, Ont. Canada's Oldest Stove Makers.

IS THE WAR MAKING YOU RICHER OR POORER?

A Question That Suggests An Answer That Every Citizen Should Make.

said a clergyman in a pulpit in one of the eastern townships of Quebec, a year ago. "The Canadian who comes out of this war richer than he he went into it, will have cause to be ashamed of himself."

The speaker had more in his mind than army contractors and their profits. He was thinking of the sacrifices financial as well as personal that are inevitably imposed in time of war on every good citizen.

In the time of such a world cataclysm in the real patriot nothing can be normal. He must view every act as it will help or hinder the winning of the war, and he is bound to spare no effort, to save no money, if thereby the cause is advanced. When nearly four hundred thousand Canadians are so impressed by the gravity of the call that comes to them that they have offered to risk the loss of limbs, of health, of life itself, what good citizen can hesitate to meet all righteous demands made in the same cause on his pocket-book? Let us confess that these demands are heavy, yet if Canadians were to give only their surplus earnings over and above what they were earning in, say, 1913, these demands would be more than satisfied.

Of all these calls, none is more important than that of the Canadian Patriotic Fund. This is the Fund that guarantees to the mothers, wives and children of our soldiers freedom from all danger of privation while their breadwinner is away. To make this provision for the dependents of Ontario's soldiers in 1917 will cost at least six million dollars, of which four millions must be raised by personal contributions of patriotic citizens. Let every man whose profits or income have been increased since August 4th, 1914, consider well if he will not have reason to be ashamed of himself if this great Fund is unable to fulfil its mission, and he at the same time is able to count himself the richer for the war?

Wonderful for the Blood!

Cures Sallow Skin, Headache, Langour and Tiredness.

You don't need to be told how you feel—blue, sort of sickish, poor appetite, vague pains, tired in the morning. This condition is common at this season.

Fortunately there is prompt relief in Dr. Hamilton's Pills, which immediately relieve the system of all poisons and disease-producing matter.

Thousands have been so utterly depressed, so worn out as to be despondent, but Dr. Hamilton's Pills always cured them. "I can speak feelingly on the power of Dr. Hamilton's Pills," writes C. T. Fearman, of Kingston. "Last spring my blood was thin and weak, I was terribly run down, and awful headaches and a gnawing, empty feeling about my stomach. I couldn't sleep or work until I used Dr. Hamilton's Pills—they did me a world of good." At all dealers in 25c boxes.

Being the Vice President.

"Isn't it easy to be a vice president?" remarked a young woman who had been sitting in one of the galleries for some time watching the Senate work. "Cinch," colloquially responded her escort.

But senators know differently, for they are fully aware of what it means to sit hour by hour and pilot their august body through the parliamentary tangles which frequently are confronted. The rules for legislative procedure in the United States Senate are practically no rules at all, paradoxical as it may seem. The course of the upper house is guided largely upon precedent and past rulings of vice presidents, and as a consequence the presiding officer must be thoroughly conversant with what his predecessors have done from the time the nation was born. This means long hours of study and extensive reading.—Cincinnati Enquirer.

Minard's Liniment Cures Distemper.

Vastness of South America.

The vastness of South America is little understood. Travel about 30,-000 or 40,000 miles each year trying to cover my circuit. It takes me longer to go between the extreme points from Panama by steamer down the west coast and on through the strait of Magellan to Asuncion, Paraguay, than it would take to go from San Francisco to Cairo and back to Glasgow.

You think of Bolivia as a little country. It is as big as Germany, Austria and England. Peru is as large as all the United States from Nova Scotia to Indiana, from Canada south to the gulf. Argentina equals all the United States west of Omaha. Brazil is a United States with another Texas added. The resources of that vast area are in keeping with the bigness of the continent.—Homer C. Stuntz in World Outlook.

The fellow who makes hay while the sun shines isn't the one who makes a night of it.

Muggins—Longbow says he believes only half what he hears. Buggins—Yes, even when he tells it himself.

Piles

That Dr. Chase's Ointment actually cures even the worst cases of itching, bleeding and protruding piles we know for a certainty, because of experience with thousands of cases.

To prove this to you we shall send you a sample box free, if you enclose a two-cent stamp to pay postage, and mention this paper.

Edmanson, Bates & Co., Limited, Toronto.

Dr. Chase's Ointment

Anonymous Shakespeare.

Margaret Anglin had been playing Viola, Katharine and other Shakespearean heroines in the great theatre at Melbourne, Australia, which had been crowded to the roof at every performance. But the time came to move on to a smaller city with a less sophisticated population, and her manager was assailed by doubts. He did not think Shakespeare would do. He proposed confining the repertory to modern plays. When she remonstrated he explained:

"They want to laugh."

"Then why not 'The Taming of the Shrew'?" Miss Anglin suggested.

He hesitated. Despair had him, but finally he replied, "Oh, well, we'll try it, but we mustn't let them know who wrote it."

"I had forgotten this incredible remark," says Miss Anglin, "until I arrived in the city to play, and there, to my horror, everywhere advertising was displayed announcing blithely that Miss Anglin would appear in a comedy, 'The Taming of the Shrew,' by Immortal Bard.'"

HARD WORKING WOMEN

Will Find New Strength Through the Use of Dr. Williams' Pink Pills.

It is useless to tell a hard working woman to take life easily and not to worry. Every woman at the head of a home; every girl in offices, shops and factories is subjected to more or less worry. These cannot be avoided. But it is the duty of every woman and every girl to save her strength as much as possible, and to build up her system to meet unusual demands. Her future health depends upon it. To guard against a breakdown in health the blood must be kept rich, red and pure. To keep the blood in this condition nothing can equal Dr. Williams' Pink Pills. They strengthen the nerves, restore the appetite, bring the glow of health to pallid cheeks, and renewed energy to listless people. Women cannot always rest when they should, but they can keep up their strength and keep away disease by the occasional use of Dr. Williams' Pink Pills. Mrs. N. E. Tompsett, Ottawa, Ont., writes: "For several years I suffered terribly from nervous debility and was scarcely able to do a thing. During that time I consulted several doctors, and many medicines without getting any help and I began to think that I never would get better. One day I saw Dr. Williams' Pink Pills advertised, and thought I would try them. After taking four boxes I was much better, but I continued using the pills for several months, when I was again in the best of health. When I began taking the pills I weighed only 100 pounds. While under their use with my renewed health I now weigh 146. I recommend Dr. Williams' Pink Pills to every one whom I know to be ailing."

You can get Dr. Williams' Pink Pills from any dealer in medicine, or by mail at 50 cents a box, or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Tea Chewers of Siam.

"Chewing tea comes from Siam," said a traveler. They call it mieng. It is in a plug, like chewing tobacco, and it has a villainous smell. This smell is due to the fermentation it has undergone. The tea that the Siamese employ for chewing purposes is a very coarse, rank plant. It is gathered like ordinary tea, but the leaves after being compressed into plugs are buried for fifteen days. They ferment during burial. On their resurrection they are very, very fragrant indeed. The Siamese boatmen chew tea. The rickshaw men chew it. The litterateurs chew it. They say it makes them work better. This is probably the truth, for I chewed a plug myself in Anam, and it exhilarated me strangely. But the aftermath was bad—a headache, smarting eyes and nervous depression."

Nature Worked Backward.

The following is an interesting instance of the reversal of the ordinary course of nature that cost an English market gardener dear.

Watercress is eagerly devoured by caddis worms, and caddis worms are a favorite food of trout. The trout in turn have a voracious enemy in herons, which catch the fish after they have grown fat on caddis worms. Now, in the case referred to, it happened that a large grower of watercress had three-quarters of his crop ruined by the ravages of caddis worms. On investigation it was found that the trout, which ordinarily protected the plants from the worms, had been devoured ahead of time, so to speak, by a flock of hungry herons, which, in thus reversing the course of events, had brought disaster to the owner of the watercress.

National Thrift and the High Cost of Living.

J. P. Bell, in the Canadian Municipal Journal.

The increase in the cost of living is something to which thoughtful men should give careful study in order, if possible, to ascertain the reasons and the remedy. While undoubtedly the prime cause is the increase in demand and the shortage in supply, I venture to suggest that the large National War Loans afford one reason for the increased cost of living. The response in Canada to both the War Loans has been a splendid one and I heartily congratulate Sir Thomas White upon the success of his efforts in arranging the terms and prospectus of each so as to prove attractive to people that are not accustomed to purchasing such securities. By the issue of such War Loans the Government increases the supply of commercial credit and of money in circulation. By taking up the loans the people at large extend credit to the Government, which, in turn, spends the money in the purchase of munitions, grain and supplies of all kinds, in paying for which the money returns to the people and increases the balances in the banks and the amounts in circulation. Just as soon as you have a condition when there is a surplus of money and the same quantity of commodities, it takes more money to buy these commodities. I respectfully submit that there is something faulty in a scheme of finance which at a time when the expenditure of large sums of money is required, places more money at their disposal instead of taking it out of the pockets of the people. I am sure that the Honorable the Minister of Finance is aware of this danger, but is confronted by many difficulties. He has, however, asked the co-operation of the Bankers' Association in some plans for getting the savings of the people loaned to the Government to meet the war expenditure. This will, to a large extent, prevent the issue of War Loans increasing the cost of living, and affairs running in a pernicious circle, as in the case if large financial concerns chiefly subscribe to them. The question is, what is the best way to get the people, as a whole, to lend their means to the Government, without unduly disturbing the financial concerns who are affording credit facilities to the business community. In England War Savings Certificates of £1 each, which can be bought for 15s. 6d., have proved very popular and successful, and by July had resulted in $5,000,000 being obtained by small investments on the part of working people. In this country, my personal opinion is that the Pass Book method of of collecting savings from people would be the more effective, and from time to time the sums obtained could be invested in War Savings Certificates, thus making a combination of the two plans. Our people like to see how much they have saved from time to time. Provision should be made for withdrawing the money in case of urgent necessity. Apart from all talk there must be some great vital plan for instilling economy and thrift into the minds of the people, which will result in reducing our imports as well as providing large sums for the use of the Government in War expenditure. There has been no real self-denial or hardship practised by any of our people in a financial way, and if instead of following the suggestions made in some quarters that the supplies of wheat and necessities be taken over by the Government, measures were introduced to prevent the consumption of luxuries and the waste of money in frivolity, the results would be more satisfactory. We must not forget Mr. Lloyd George's statement made early in the war, that it would probably be won by silver bullets, and every effort should be made to inspire our people with the necessity for accumulating and saving.

Killing the Calves

All sorts of excuses are offered for the high price of beef, the most plausible being the alleged demand for veal—"the killing of calves which should be allowed to grow into regular beef." You cannot have beef if you eat it as "veal," but you can have **Shredded Wheat Biscuit** which contains more real nutriment than beef and costs much less. Shredded wheat biscuit is the whole wheat steam-cooked, shredded and baked. Make it your "meat" for ten days and see how much better you feel. Wholesome and strengthening for any meal with milk or cream or in combination with fruits.

Can a German Bullet Send a Canadian Soldier to Hell?

(London Advertiser.)

The Christmas Pastoral, 1914, of Cardinal Mercier, archbishop of Malines, Belgium, was as follows:

If I am asked what I think of the eternal salvation of a brave man who has consciously given his life in defence of his country's honor and vindication of violated justice, I shall not hesitate to reply that without any doubt whatever Christ crowns his military valor, and that death, accepted in this Christian spirit, assures the safety of that man's soul. Greater love hath no man than this, said our Saviour, that a man lay down his life for his friends. And the soldier who dies to save his brothers, and to defend the hearths and altars of his country, reaches this highest of all degrees of charity. He may not have made a close analysis of the value of his sacrifice; but must we suppose that God requires of the plain soldier in the excitement of battle the methodical precision of the moralist or the theologian? Can we who revere his heroism doubt that his God welcomes him with love? Christian mothers, be proud of our sons. Of all griefs, of all our human sorrows, yours is perhaps the most worthy of veneration. I think I behold you in your affliction but erect, standing at the side of the Mother of Sorrows, at the foot of the cross. Suffer us to offer you not only our condolence, but our congratulation. Not all our heroes obtain temporal honors, but for all we expect the immortal crown of the elect. For this is the virtue of a single act of perfect charity, it cancels a whole lifetime of sins. It transforms a sinful man into a saint."

WOUNDED DISPLAY THE COURAGE OF BRITAIN

These are dark days in England; the adjective "merry" has become obsolete. Yet, to many intents and purposes, the casual observer would fail entirely to note the gloom which is in the hearts of the people, for they are keeping up a brave show, regardless of feelings. It is merely another example of Saxon stoicism, for if the Englishman is slow to express his joys, he is equally capable of hiding his sorrows. And thus it is that England seems still cheerful, though the evil days are full upon her.

A woman correspondent for the New York Tribune, who recently went to the British Isles for her paper, reports that even the wounded Tommies, sent home to die in their native isles, are keeping up courage. France has been left tearlessly serious by the coming of the conflict; England has been furnished with a smile. Yet, according to the correspondent, there is a look in British eyes that betrays national suffering, and she adds:

"The war is in their eyes, the horror of it; it is in their words, in their gestures, the misery and the pain of it; it is written in their faces, bore witness to by every fold of their stained and shabby garments. It is France they are bringing home with them, France and the memory of all the gray and wretched splendor of war. This is in their faces; this and courage.

SHRAPNEL MOSTLY.

"At first, when I walked down the concrete pavement at the side of the pier, with its railway lines and great, spreading gray roof, I thought that the hundred men or more whom I saw sitting on benches in a square, enclosed place were but one more unit of the soldiers which throughout England bear testimony to the new army of the King. But as I came nearer to them, saw them sitting there with, on one side of them, the white coaches of the ambulance train and on the other, anchored close in, the great white hospital ship, with its broad band of green, I knew these were wounded men sent home from France. The slightly wounded men, they call them.

"'These are not serious cases,' the captain who was in charge told me. 'shrapnel, mostly.'

"I looked at the long rows of men in khaki sitting on the wooden benches, with their coats drawn loosely over their shoulders, with their bandaged heads and arms and feet showing a very clear white against the dim and gray light of the pier. How patient they were, and how tired they looked! Slightly wounded: shrapnel, mostly. One of them with his arm bandaged from the elbow to the wrist, and supported in a wide sling; one of them with his feet wrapped thickly in layers of dressing and covered over with heavy woollen socks; one of them with his left hand in a splint and his right arm wrapped in gauze the full length of it; another man, leaning against the man next to him, with his thin hands folded across his knees, and his head and his face almost covered with fold upon fold of white linen. On his forehead a little round dark stain widened on the clean cloth. Slightly wounded; shrapnel, mostly. Such are the terms of war."

A SUDDEN CHANGE.

She went with the captain to the gangway to watch them bring out the stretchers with the wounded. It seemed, she says, such a big, clean spotless ship, with its broad band of green, like an emerald girdle, about it. It presented almost the symbolism of health in the sunlight, the great scarlet cross gleaming with all its brightness. Then came a sudden change:

"The gangway was lowered; and suddenly the ship, which had been an empty ship, became people. Men in khaki appeared everywhere. There were rows of them in the cabin doors; they stood by the rails; they came stumbling along the deck, two and two together, helping each other. Their khaki coats, shrunken, discolored, were fastened about their shoulders like capes, or with one arm thrust through a sleeve; their white bandages were extraordinarily immaculate in the brilliant sunshine, a clear and gleaming white. And all of these men were smiling. They told me afterward, some of them, how they had been waiting for the sight of England; and they told me about war. I knew then that I had known nothing of this war before.

"But even when I saw them, these soldiers standing by the rails or stumbling across the deck, I knew that men did not many times in their lives smile as these men were smiling.

HELPED EACH OTHER.

"Sometimes two of the wounded men would come fumbling and staggering down the gangway together, holding to each other. With intense concentration, without any knowledge of what was taking place around them, looking neither to the right nor left, they progressed step by step, infinitely cautious. They advised each other, admonished each other, argued absorbed, gentle monotone, engrossed, set apart, dedicated to the mysterious and immediate moment which lay between them and the [illegible] of the benches. With each uncertain step, with each circumspect, tentative advance, I think that a new [illegible] of destiny was spun for them, [illegible] was their earnestness and the simplicity of their world.

"Then, slowly, by open magic, the benches steadily filled. I don't know how many men were sitting there, nor how many more men were in the adjoining enclosure. But while I had been watching the unloading of the ship one ambulance train had been filled and had moved out, slowly, silently, toward her harmless destination. For each day, as the new offensive on the western front fulfills the tragic bartering of men for land, the hospitals of England register toll for victory.

"From below they were carrying up other men. And these men lay quite still on the stretchers, with their gray blankets drawn close around them. Their faces were very white, that extraordinary clear white of pain. But sometimes when they were carried by they smiled.

"Yes, there was courage enough among these men who were coming. I had never thought of that particular degree of courage which lies in the one very simple fact that men—even those men who are coming back to England to die—come back home smiling."

THE AMBULANCE TRAIN.

And there were more evidences of British courage in the ambulance train which, filled up, started for London from the coast. The observer went with the train, sitting in the compartment reserved for one of the doctors. The train was full of wounded men, some very comfortable, some on the last stage of their last journey.

And they were so patient and so pitiful and so happy. And I think that they, too, were sometimes filled with wonder.

For when I stopped to talk to them they said always that it was a miracle, a miracle being on that train.

"I never knew I was goin' to be 'ere," a Tommy told me. He was lying, both of his bandaged feet propped up at the foot of his cot. "They got me in both legs," he explained. "Fair an' square. Shrapnel. Two days I was lyin' out. Two days. No, you wouldn't believe—an' I wouldn't, either, hadn't I done it. Frightful it was. H. E. (high explosive) spatterin' 'round everywhere. They were rippin' things open them two days. Oh, I was sorter goin' out o' me mind toward the end of it. . . . . . Don't know where I'd got to—we was pushin' in. Down I went. Down I stayed. Wasn't no good to crawl. . . . . . Yes, I was a bit out o' me mind, thinkin' all sorts things out there. Two days an' a night of it thrown in. 'In the legs I'm 'it,' I said to meself. 'With they'd blowed off me arms. . . . . . I'm done,' I said. But I remember 'em gettin' me hout. Two days I'd 'ad. Two days in 'ell.

"Then I was put in a barn, full up it was, an' they went an' strafed that. Busted out a whole side of 'er. How 'er cavin' in—frightful noise. 'That's crocked up,' I said.

"An' now I'm 'ere—'ere in a train. It's 'eaven, I call it."

And so the contact with the seamy side of war went on, each carriage having its own quota of the wounded. The doctor returned to the writer to take her back to her own compartment. After all his own experiences he had not been blunted to the poignancy of suffering. He approached the traveller quietly, and then we learn from the one who had witnessed all this for the first time in her life:

"'Well,' said the doctor, 'have you seen courage?'

"We were just coming under the black roof of the station. I saw beside the platform the gray ambulances with their crosses of red. Beyond, by the railings, a great crowd waited. I knew there would be cheering and splendid moments when the doors of the white train were opened. But I was thinking about all of the things I had seen, of the orderlies coming and going with their heavy stretchers, of the great organization by which wounded men are brought from the trenches to the hospitals of England. I was thinking of the terrible toll of war.

"The train stopped. The doctor stood up to tell me good-bye. I thanked him as best I could. There were many things for which I owed him my gratitude. He had admitted me to a new world. I had seen at other times, in other places, [illegible] the hope, the strength which [illegible] the making of war. But in this world only had I found in its fullest measure the greatest of all these things—the courage of Britain."—New York Literary Digest.

TORONTO FAT STOCK SHOW

The Toronto Fat Stock Show will be held at the Union Stock Yards, Toronto, on Friday and Saturday, December 8th and 9th. A large number of prizes are offered, and the show this year bids to be an exceptionally good one.

SHARK HABITS AND SPECIES

The tragic depredations of man-eating sharks along the Atlantic seaboard lend an especially timely interest to a communication from Dr. Hugh M. Smith, the foremost American authority on fishes, addressed to the National Geographic society. "When giant fishes are mentioned, most people will at once think of the shark, among which, indeed, are found the largest fish now existing," writes Mr. Smith. "Of the many species of sharks noteworthy on account of their size there are about half a dozen which are pre-eminent. These differ much in their disposition, some being as harmless as doves and others the incarnation of ferocity.

"The sleeper shark (Somniosus microcephalus), whose scientific name fits it so admirably, appears to have developed its body at the expense of its brain, for it is a sluggish, stupid glutton, about six times as long as an average man. At home in the Arctic regions, it sometimes makes visits as far south as Cape Cod, the British Isles, and Oregon. It is most often observed lying quietly on the surface, apparently dozing and easily approached, but at times, when hungry, it rouses itself and fiercely attacks whales, biting huge pieces out of their sides and tails, and when feeding on the carcass of a whale has been killed by hunters it is so voracious that it permits spears and knives to be thrust into it without seeming to take any notice.

"One of the most prodigious and perhaps the most formidable of sharks is the man-eater (Carcharodon carcharias). It roams through all temperate and tropical seas and everywhere is an object of dread. Its maximum length is 40 feet and its teeth are three inches long. While there are few authentic instances of sharks attacking human beings, prior to the recent tragedies, there have undoubtedly been many cases where sharks simply swallowed people who had fallen overboard, just as they would swallow any other food. How easy it would be for a man-eater to devour a person whole may be judged from the finding of an entire 100-pound sealion in the stomach of a 30-foot shark on the California coast. A certain man-eater 36½ feet long had jaws 20 inches wide, inside measure, and teeth 1½ inches long. This may have been the great fish of the Scripture narrative, and it is possible that at that time much larger maneaters existed than are now known, as shark teeth with cutting edges five inches long have been found on the sea bottom, and these are believed by naturalists to have belonged to sharks not long dead. The phosphate beds of South Carolina yield very large fossil teeth of a shark which was related to the man-eater of the present day; judging from the comparative size of these teeth, Professor Goode thought that sharks, 70 to 80 feet long must have been common.

"Many years ago a Norwegian bishop in a learned paper brought to the attention of the scientific and theological worlds a shark which he attempted to prove must have been the great fish that swallowed Jonah. This was the basking shark (Cetorhinus maximus), known also as the elephant or bone shark, which is an inhabitant of the polar seas, but occasionally strays as far south as Virginia and California, and in former years was not rare on the United States and British coasts. The species has the habit at times of collecting in schools at the surface and basking in the sun with its back partly out of water. It reaches a maximum of 50 feet and is exceeded in size by only three or four animals extant. Provided with small teeth it feeds on fishes and floating crustaceans, and is not of a ferocious disposition. It is dangerous only by virtue of its great bulk and when attacks its powerful tail easily demolishes boats. In former years the basking shark was hunted for its oil on the coast of Norway and Iceland. It was also harpooned on the shore of Massachusetts in the early part of the last century, and as many as 12 barrels of oil were sometimes obtained from the liver of one shark. There are many records of basking sharks 25 to 35 feet long from the coast of New York, Massachusetts and Maine, but the species has not been common in our waters in recent years.

"The largest of all fishes, the largest of all cold-blooded animals, and the largest of all existing animals with the exception of a few species of whales, is the whale shark (Rhineodon typicus), originally described from Good Hope but now known from India, Japan, South America, Panama, California and various other places, a small specimen having been obtained on the Florida coast a few years ago. This shark has a very broad and obtuse snout and and exceedingly wide mouth armed with numerous minute teeth; the dark-colored body is marked with many small whitish spots. The species is said to attain a length of 70 feet, and is known to exceed 50 feet. Notwithstanding its immense size, however, it is harmless to man unless attacked, and feeds on the small creatures for which its teeth are adapted. Its huge bulk makes it dangerous in the same way that a whale is dangerous. Years ago it was reported that the sperm whale fishermen at the island of Saint Denis, in the Indian ocean, dreaded to harpoon a whale shark by mistake, and stories are told of a harpooned fish having, by a lightning-like dive, exhausted the supply of rope which had been accidentally fastened to the boat, dived deeper still, and so pulled a pirogue and crew to the bottom."

Many of the very latest evening gowns are shown in light colors and elaborately embroidered in spangles of vivid shades of exquisite iridescent colorings. This one is of rose metal cloth, which glitters through the folds of rich silver lace and apron tunic of spangle embroidery.

THE BEST WAY.

How to Do This, That and the Other Practical Things.

To keep meringue from falling, beat a saltspoonful of baking powder into it just before putting it on the pie.

To remove odors of onions or fish from cooking utensils, boil a little vinegar in the utensils after they have been washed.

To get longer service from sets of muslin curtains, hem both ends alike, and this permits you to reverse them when changing each time after being washed.

To clean dull steel, rub slices of raw potato over it, then polish with flannel cloth. If there are rust spots on the steel they may be removed by rubbing them with pumice stone or with salt wet with hot vinegar.

A WOMAN'S MESSAGE TO WOMEN

[illegible]

[illegible] shipments of manganese [illegible] from the Mandinga mines, situated near Colon, were made in 1916. It is planned to develop the property extensively.

YOUNG HERO'S ONLY FEAR

Major ———, second in command of a famous service battalion, who has been sent home wounded, told the following story of a subaltern of his battalion:

"He hated the sound of his own voice, you know, on parade—that kind of a boy; but, by gad, he fathered and mothered his platoon, until, upon my word, he knew the precise condition of every man's socks. 'Simpson,' I heard him say to one of his men one night, when neither of them knew anyone was within hearing, 'you haven't given me a letter for your mother for three weeks, and you've written half a dozen to girls and pals this week. Nothing to do with me, but—eh, I should if I were you.' And I'm open to bet that Simpson did. The boy may have mollycoddled 'em a bit; but there's no doubt they loved him; and nobody could find fault with the discipline of his platoon, for he'd only to lift a finger, and the whole lot of 'em would have walked over a precipice for him.

"It was two nights before the first advance, when we were back at ——— in billets, when I first learned that he was afraid, mortally afraid. No one else had ever guessed it, I'm certain, and I never shouted. But he told me; and there was no mistaking the fact that he was in agony over the telling. It wasn't strafing that he feared. He wasn't afraid of Boches, or of being killed, but he was mortally terrified of being afraid, afraid of fear that was his trouble.

FORTNIGHT OF TERROR.

"We were in the first advance, and others. Ten minutes before I was knocked out, young ——— was killed by a bomb. He lived for about three minutes after he was 'it, and died in my arms. I think he tasted greater happiness in dying than he'd ever known in living—since the war began, anyhow. He lived, without being wounded, through nearly a fortnight of the most [illegible] fighting ever known.

"I tell you that [illegible] was not less than one long [illegible] crucifixion to him, because of the terror that went everywhere with him, and never left him for a moment; the ghastly fear of fear. He dread that he was going to be afraid and [illegible] disgrace himself and the platoon that swore by him.

"[illegible] me, that was bravery, if you like. He was [illegible]. He had pale [illegible] nerves, and [illegible] living [illegible]. I had [illegible] with him nearly every night, all through that terrible time. Nothing could reassure him; nothing could teach him, he could not [illegible] himself. Even killing a [illegible] with a bayonet, as I saw him [illegible] of the Prussian Guard, [illegible] the [illegible] his platoon [illegible] nothing, and as a rule the first [illegible] with the steel [illegible] know. [illegible] and apparently he could not get killed.

"Anyone else would have been killed fifty times over. [illegible]

THE BOY'S LAST WORDS.

"[illegible] He was a knight of [illegible] chivalry. More fearless acts no [illegible] a dozen times a day during that fortnight, and all the time I knew, and nobody else but himself knew, that he went in mortal fear; afraid as most soldiers never have been; not of being killed, and [illegible] of being afraid. He was smiling [illegible] like a woman when [illegible] said 'They never spotted. I'm so thankful that I [illegible] And then he was gone. But I know [illegible] he would have said.

"I've been a soldier all my life. I've seen more than one win the V. C., but I have never seen, and never expect to see, any such bravery as young ——— showed in that fortnight. The public will never hear of him, and he wouldn't want [illegible]. But if you ask me [illegible] and [illegible] I tell you of all the brave men buried behind the Somme and the [illegible] behind Verdun [illegible] not one, in my belief, braver than the junior platoon commander of my battalion, young ———."

The men have no kick coming. About 567,654,321,000 women could paint their cheeks for what it costs one man to paint his nose.—Cincinnati Enquirer.

Lovely hats of fabric silks prove especially attractive for afternoon wear if donned in combination with a frock of Georgette crepe and spires silk, as illustrated here. The hat is developed in [illegible] silk in a charming shade of blue.

A topcoat, whether in broadcloth, [illegible] or mohair, is a winter essential. This is an attractive model of grey broadcloth, trimmed with raccoon fur. The princess effect gives attraction, also the square buttons.

The Summer Campaign

(New York Tribune.)

Regard being had for weather conditions rather than for precise calendar divisions, it may now be fairly said that the end of the summer campaign [illegible] when the [illegible] northward [illegible] invasion of Russia, [illegible] from the [illegible] changes in weather conditions [illegible] the [illegible]

What, then, have been the results of this contest, [illegible] phase of the great war, [illegible] two years of its duration? And [illegible] what has been the sum total of the great operations [illegible] at hand?

[illegible]

[illegible] pierced the enemy lines. It has not freed France, and there is no present prospect that it will free French soil in any immediate time. But it has inflicted heavy losses upon the Germans, and it has revealed that at last the Germans have to reckon with the manhood of Britain, as well as the main population of France and Russia. Twice as much territory has been won by the Allies as was gained by the Germans at Verdun. More than twice as many cannon have been captured and nearly twice as many prisoners taken.

At the Somme the Germans have lost not less than 250,000, the Allies about 300,000, accepting the rates of Verdun, which gives every advantage in calculation to the Germans. Terrific pressure has been exerted, and is being steadily exerted upon the nation inferior in numbers already crippled by losses out of proportion to its resources. And to the Somme attack we have to add the Italian drive at Trieste, which took Gorizia, gathered up [illegible] prisoners and inflicted very heavy losses upon the Austrians.

Since January 1 the Central Powers have lost not less than 1,750,000 men; of this number considerably more than half a million have been captured. Their losses in guns and material have been enormous, their loss in territory has been considerable.

Now, to balance this account, what can be said for Germany? Allied success has brought a new nation into the war, imposing a new strain upon German resources. This new nation has [illegible] an Austro-Hungarian province, but has now been driven out, having been heavily defeated. It now stands upon its own frontiers, it may presently suffer from invasion. Here is a shining German success; but to win it Germany has had to employ reserves destined to act against her other enemies, and she stands, to this extent, in a weaker position. She has [illegible] a new foe, but the coming of a new foe has weakened her position palpably.

In the larger sense the summer campaign has been wholly unfavorable to Germany. It has seen the loss of the offensive by her; it has seen the steady pounding upon all her fronts redoubled. It has seen a new foe brought into the fold and a new strain put upon German resources. It has given to the enemies of Germany new assurances of victory, and it has disclosed them at last co-operating their greatly superior resources in men and in money.

In our own Civil War, 1861, was the most disappointing year of all for the North, because it was the year in which the victory that seemed assured after Gettysburg and Vicksburg in 1863 was not achieved despite the terrible sacrifices of Grant from the Rapidan to Cold Harbor. The policy of Grant, however, relentlessly applied and inexorably followed, did, as we see now, make the collapse of the spring of 1865 inevitable. Men who expected in 1864 that the victory would be won in that year were mistaken because they underestimated the power and resources of the South to resist, but they were only mistaken in degree, and what they believed would happen in 1864 did happen in 1865.

Beyond all question the present summer has been the worst period of the war for the Germans since the Marne, because it has seen the gradual rise in strength and efficiency of the enemies, who were always bound to defeat Germany, because of their superior numbers, wealth, resources, if the war could be prolonged into a test of endurance. It has seen the Russians "come back" and the British at last "arrive."

A war between countries having a population in Europe of 300,000,000 and countries having a population of but 120,000,000—and this counts only the Great Powers—can have but one ending if the issue turns upon endurance. If Germany's chances of winning the war in the first weeks of 1914 were far more than even, if they were still better than even last year, because the superior preparedness of the military possessing inferior ultimate resources still counted, the balance has already shifted heavily, the odds are now heavily on the Allies.

German agents will make the most in Europe and here of the temporary and considerable success in Roumania, on the military side it is beyond [illegible], but it has in the longer view weakened, not helped, the Central Powers, because it has subjected them to new strain and made fresh demands upon their greatly inferior numbers.

It is not too much to say that with the ending of the summer campaign the certainty of German defeat is no longer to be mistaken. In the United States, for example, the conviction that Germany is going to lose has become [illegible] universal as a result of the past few months. [illegible] Civil War as an illuminating parallel [illegible] how inevitable must be the outcome of any war which is fought under similar conditions, and we are seeing at last how similar are the conditions. [illegible]

Hubby—How do you like the new boarding house? Stella—Well, it has its strong points. There's the butter, for instance.

FEEDS AND FERTILIZERS

The Latest in Science, the Best in Practice.

ALFALFA HAY AS A HOG FEED

The problem of the feeder at the present time is to feed as economical a ration as possible. Although prices for hogs are good at the present time, and promise to remain so for some considerable time, the hog raiser cannot afford to winter his sows on high priced feeds. He wants to economize wherever possible. In some experiments on the feeding of alfalfa hay to hogs, the North Dakota Experiment Station secured a saving on young pigs of 59 cents per hundred pounds gain with dry alfalfa and 49 cents with steamed hay. With fattening pigs the saving was greater, being $1.70 per 100 pounds gain for dry hay and $2.20 for steamed hay. Brood sows fed steamed hay showed a saving of $1.50 per 100 pounds gain over grain alone. These results were secured a year ago. Later results demonstrated that it was possible to replace one-third of the grain ration for brood sows with alfalfa hay, and that it required 1.84 pounds of alfalfa hay to replace 1 pound of grain. The feeding of alfalfa afforded excellent means of getting the sows to take more exercise than they do when fed grain alone. The sows fed alfalfa appeared to milk better and nurse their pigs a little better than did those not receiving hay.

It was concluded as a result of these experiments that in order to get sows started eating alfalfa hay in winter, it is necessary to limit the grain to such an extent that the hogs must eat hay or go hungry; when handled in this way they will take very readily to the hay and a limited amount of hay can be fed satisfactorily, securing just as good results just as good gains and at less cost than where grain alone is fed. The greatest advantage to be gained in feeding hay in winter is a saving of grain and the lowering of the cost of feeding.

GRAIN OR STRAW—WHICH?

Questions pertaining to the production of grain rather than fodder or straw are especially numerous now when wheat is selling above $1.50 a bushel and corn headed towards a dollar, and farmers realize as never before that they must grow a higher percentage of grain.

Wheat and other grains are now sold or in the bin. Did your wheat, your barley and other small grains go to straw, fall down and lodge? How about the corn? Is it all fodder or is the percentage of grain higher than that grown by any of your neighbors? If you were just like 999 out of every 1,000 farmers—planting corn, wheat, oats, barley or rye but harvesting too small a percentage of roughage rather than grain. You would agree with me that the average Canadian or American farmer [illegible] he wanted to grow was a [illegible] Canada averages less than 20 bushels of wheat to the acre, Germany's 32, the United Kingdom's 31.6, while corn and other crops run in like ratio.

Our Canadian yields are so low because we have not learned to grow grain in proportion to the amount of straw and fodder produced. We have not learned to heed the teachings of our plants. When you are sick and send for a physician he comes and asks you about your aches and pains. When your horse gets the colic he [illegible] these facts to you [illegible] that the crops cannot talk as we do, or utter groans, but they speak of their aches and pains, of their struggle for food, and their desires and needs as clearly as does the farmer of his animals. The European farmer and some Canadian farmers have learned to heed the cries of the crops. Now is the time to analyze the symptoms of this year's crops, and to be prepared to meet them next spring.

Did your grain crops grow enough straw and fodder? If not, they need more available ammonia than they are now getting from the soil, for ammonia, often spoken of as nitrogen, produces stalk or straw growth. If there was too much stalk growth and the small grains lodged, there was a need of more potash than the plants were able to obtain from the soil, for potash is very largely concerned in growing stiff stalks to hold up the grain. If the grain was poor and shriveled, or there was not enough of it, and here's where the rub comes on most farms, the plants want more available phosphoric acid. Let us take an account of stock now while the facts are fresh in our minds, then during the winter we can study up farther on the question of plantfood. These plantfoods are all in the soil, but in varying proportions. The crops require different amounts of them. They are supplied by organic crops, manures and commercial fertilizers. The fertilizers on the market are made up of different analyses to correct the various plantfood needs of the crops. Study your crops, your soils, manures and fertilizers, and be prepared to intelligently meet the needs of your plants next spring, and thus be able to grow grain in proportion to your straw and fodder. This means a bigger acre yield at a lower net cost per bushel, which further means a bigger grain check at threshing time.

WATER FOR COWS.

All animals require plenty of good, pure water. This is especially true of the milking cow, as water constitutes more than three-fourths of the total volume of milk. The water supply, therefore, demands the dairyman's most careful attention. Stale or impure water is distasteful to the cow, and she will not drink enough for maximum milk production. Such water may also carry disease germs which might make the milk unsafe for human consumption, or be dangerous to the cow herself. During the winter, when cows are stabled, the greater part of the time they should be watered two or three times a day, unless arrangements have been made to keep water before them at all times. The water should, if possible, be about 15 degrees above the freezing point, and should be supplied at practically the same temperature every day. When water well above freezing point is stored in tanks and piped directly to the cow, there is little occasion for facilities to warm it. When it stands in a tank on which, too often farms, it usually pays well to warm it slightly. This can be done by a tank heater, by live steam, or by hot water from a boiler. If a boiler is used for running a separator or for heating water to wash and sterilize utensils, steam from it can be readily and cheaply be used to warm the water.

The healthy animal, whether it be a calf, pig, colt or a chicken, should always be ready at meal time. The little fellows that are always willing to eat and are never over-stuffed with feed do the best.

—Canadian Countryman.

WHOOPING COUGH

The Infant's Most Dangerous Disease.

Whooping Cough, although specially a disease of childhood, is by no means confined to that period but may occur at any time of life. It is one of the most dangerous diseases of infancy, and yearly causes more deaths than scarlet fever, typhoid or diphtheria, and is more common in female than in male children.

Whooping Cough starts with sneezing, watering of the eyes, irritation of the throat, feverishness and cough. The coughing attacks occur frequently but are generally more severe at night.

On the first sign of a "whoop," Dr. Wood's Norway Pine Syrup should be administered, and weeks of suffering prevented, as it helps to clear the bronchial tubes of the collected mucous and phlegm.

Mrs. Nellie Darley, Amherst, N.S., writes: "I have much pleasure in saying that there is no cough syrup like Dr. Wood's Norway Pine Syrup. My little girl took whooping cough from a little girl who has since died with it. I tried lots of things but found 'Dr. Wood's' to give the greatest relief. It helped her to raise the phlegm, and she is now better.

My young brother is also taking the cough, and I am getting 'Dr. Wood's' to work again."

Dr. Wood's Norway Pine Syrup is put up in a yellow wrapper; 3 pine trees the trade-mark; price 25c. and 50c. Refuse substitutes.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review

Toronto—In spite of continued price increases which have carried nearly all staple commodities over highest previous prices the tone of business is quite satisfactory, and all lines of industry are very busy, and in fact are limited only by the shortage in the labor market. Drygoods lines are active and in spite of advances again this week on all kinds of textiles, the demand is as strong as ever. Hardware lines are active, with munitions business in seasonable lines, and prices are still on the upgrade. Food commodities continue to soar. Canned goods and dried fruits are much higher than when they were placed on the market last season. Money is plentiful, and commercial obligations are being well met.

Montreal—Analysis of general trade conditions show that the remarkable season of prosperity continues to be reflected in an ever-broadening volume of business, which appears to be getting brisker as the holiday season approaches. Retailers place further orders with wholesale houses, which in the case of drygoods firms are found difficult to fill in many cases. Hardware lines are strong, and further advances have been noted this week. Woolen goods are very active, and prices are firmer. Remittances continue to be good.

Ottawa—Drygoods, boots and shoes, millinery, men's hats and caps, hardware, groceries and jewelry lines all show satisfactory activity. Country trade is good. Payments are quite good.

Hamilton—The business situation is fully as good as it has been earlier in the season. Displays of Christmas goods are more and more noticeable, and the buying of men's wear, although less extensive, is remarkable in view of the smaller number wearing civilian attire. Labor is still very scarce, and employers are paying bonuses to their employees to retain their services. It has been noted lately, however, that there has been a movement of labor from country to city. Both wholesale and retail business is brisk in all lines. It is believed that there will be plenty of coal forthcoming to meet all local requirements.

London—Orders for spring merchandise are coming in freely to local wholesalers and sorting orders are now going on in considerable volume. Conditions are satisfactory in every line of business.

Winnipeg—The grain markets are still possessed of much inherent strength, and although setbacks are expected in grain circles, convictions are held that they will be only temporary. Mercantile business is very brisk, and the advancing prices for all textiles is proceeding with a regularity which does not seem, however, to be affecting the demand to a great extent. There is an active distribution of groceries at prices generally higher than a short time ago.

Calgary—The threshing returns are more than satisfactory, in regard to quality of the grain, but cold weather, shorter days and scarcity of labor are all militating against the threshing of a large part of the yield. All lines of business are active. Groceries are meeting a firm market and a good demand.

Vancouver—There has been no appreciable diminution in the volume of business either locally or in British Columbia as a whole. Industries are very active.

American merchandise is well received in Siam, and there are opportunities for increased trade in many lines, including iron and steel, electrical supplies, scientific instruments and canned goods.

WAS WEAK and RUN DOWN

SUFFERED WITH "NERVES."

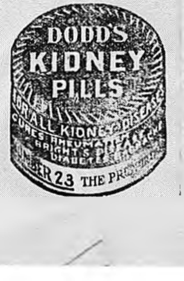
Many women become run down and worn out by their household cares and duties never ending, and sooner or later find themselves with shattered nerves and weak hearts.

When the heart becomes weak and the nerves unstrung it is impossible for a woman to look after her household [illegible]

[illegible] the first sign of any weakness of [illegible] the heart or nerves, take Milburn's Heart and Nerve Pills, and you will find that in a very short time you will become strong and well again.

Mrs. T. A. [illegible], [illegible], Ont., writes: "I cannot speak too highly of Milburn's Heart and Nerve Pills. I [illegible] with my nerves. I was [illegible] I could not stand [illegible] of any kind. I [illegible] Heart and Nerve Pills to be [illegible] to all sufferers from [illegible]

Milburn's Heart and Nerve Pills are [illegible] a box, 3 boxes for $1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.



PILES CONQUERED [illegible] by the drugless way. No more [illegible] appliances. Everything simple when [illegible] know how. Worth gold to sufferers. Get [illegible] treatment with booklet. Send [illegible]

McBURNEY & CO.

OUR NEIGHBORING TOWNS, VILLAGES, AND COUNTRYSIDE

Newsy Happenings of the Week Collected for Our Readers by a Staff of Live Correspondents

EDEN GROVE

The weather man looked more like the 24th of May than Christmas, with his display of fireworks, Monday.

Miss Clara Stannel, Walkerton, was a home visitor over Sunday.

Quite a number of the boys came back from the West last week and now they are burning dad's coal oil while telling their sweethearts what they saw and didn't see during their trip.

Miss Gertie Alexander left for Toronto last week to assist in supplying war material for the boys in France.

When the lightning struck in the telegraph office Monday afternoon, "Sunny Jim" wrote out a ticket for Kingdom Come, he thought his time had arrived.

Mr. W. Alexander and daughter Jessie, are visiting Royal City friends and taking in the chicken show.

The Box Social is over, now its Christmas festival, on 21st. Busy time for the kiddies.

Mrs. James Wilson from the 16th, was the guest of Mr. and Mrs. A. McKeeman, "Sleepy Hollow," Saturday.

Miss Lily Alexander and Miss Blanche Polly, called on Paisley friends, Saturday.

Mr. and Mrs. Robert Gallinger, Hanover, were the guests of Mr. and Mrs. Alex. Gallinger, "Spring Valley Farm," over the week-end.

Mr. Desmond has placed a gasoline engine in his elevator to elevate the grain. Thomas is always up to date.

Miss daler, Walkerton, spent Sunday at her home in town.

Mr. and Mrs. John Desmond, Pinkerton, called on Grove friends, Sunday.

We noticed a drop in fish, Monday.

Messrs Mack and George Scott, were business visitors to the County Town, Saturday.

Mr. and Mrs. Hopper are spending a few days with Guelph friends.

Mr. John Bellbeck made a trip to Walkerton, Monday.

The Epworth League will re-organize Thursday evening, for the winter months after the regular meeting. The Pastor will handle the topic for the evening. All Welcome.

Messrs Mike Briscoll and Morris Ralahan are taking in the Winter Fair at Guelph, learning all about the new kind of hens.

Dressed Poultry seems to be more plentiful, even the Turkey is coming down off the perch.

Miss Angeline Fair, Paisley, spent Sunday at her home, King St.

Mrs. McKeeman called on Paisley friends, Thursday.

Mr. R. H. Fish, the new G. T. R. Supt. was in town Thursday, on tour of inspection.

Miss Viola Kerry, Walkerton, was a visitor at her home over Sunday.

The G. T. R. will issue Return Tickets at Single Fare, Dec. 23 to 25; good returning Dec 26th this year. Now is your time to help grandmother or Aunt Sue pick the Turkey bones on Christmas.

Pte. Dan Desmond of the 116th enjoyed a few holidays with friends in this vicinity.

The Catalogues are having their innings at present. Better see what your own town merchant has in the present line.

Miss Nadine Gregg, Paisley, was the guest of her friend, Miss Nora Todd, Saturday.

Everybody has their troubles, now old Santa Claus don't know whether to start out with the runners or wheels.

Mr. R. Perdue shipped two hundred lbs. of dressed Turkeys to a firm in Fort William to be given their employees at Christmas.

Miss Florence Goodeon, Paisley, visited friends in town last week.

Yes, Sarah Jane, we always start going to Sunday School just before Christmas.

Mr. Cook, Michigan, is visiting at the home of Mr. and Mrs. Arthur Reid, "Mountain View Farm."

Mr. Proud left Monday on a trip to Toronto and Ottawa.

Only a couple more weeks left girls and Leap Year will be a thing of the past.

Comedy, Education and religion were blended in perfect harmony in an original manner when a live-wire, in the person of Rev. A. J. Crighton of Paisley, struck the Epworth League of Eden Grove and Purdy's Methodist churches last week. The Leagues were bent on rallying their forces for another winter's work. They enjoyed an unexpected treat. Mr. Crighton showed us how to see the Invisible. As we viewed the wonders of the "Infinitely Little" under a high-power microscope, we learned how this instrument had proved the blood on a man's shirt-sleeve to be human blood and not pig-blood and so had brought the murderer to the bar of justice, as we saw with our own eyes that "Little fleas have lesser fleas and so on infinitum" so we are learned too, how this instrument had brought disease-germs out of darkness into light, our faith in God was enlarged while our funny-bones and cheek-muscles were simultaneously exercised. Fleas, baldheads, glass eyes, w——'s tongues and cantankerous husbands were subjects of quite original jokes. The freshness and vivacity of this Rev. gentleman's style may be traced to his marked abundance of originality. Comedy, education and religion combined in one social evening which could be well worth while for any enterprising society to put to the test.

The powers of the Microscope demonstrated on stereopticon slides is an education for the educated and a splendid antidote to incipid frivolities. Mr. Crighton is to be congratulated on his discovery of another worthwhile social evening.

OTTER CREEK

Cheer up, for Christmas is coming, and please your friends for it is better to give than to receive.

Miss Katherine Gress was visiting at Mr. George Eckels in Walkerton.

Mrs. Henry Wolfe was a visitor at Mr. William Hessfeldt's on Sunday.

Mr. Harold Jasper returned home from the West.

Mr. Edward Fenner was a business visitor at Mr. Lorenz Schumacher's on the second con. of Carrick.

Mr. Weller of the Liesemer Co. of Mildmay, was a business visitor at Mr. John Bell's last week.

Mr. and Mrs. George Smith of Ayton were visiting friends on the fourteenth.

Mrs. Thomas Jasper was a visitor in Guelph last week.

An entertainment will be held at the home of Mr. Philip Gress on Wednesday evening, December 13th, under the auspices of the Cargill Bible Union. A good programme will be provided, commencing at eight o'clock, after which lunch will be served. A silver collection will be taken, the proceeds to be given to purchase Bibles for the soldiers. Everybody welcome.

CARGILL

Mrs. J. MacFeggan is spending a week with friends in Galt.

Miss L. Seiling spent the week end at her home in Mildmay.

Mr. and Mrs. R. Balsdon of Pickering are visiting at the former's brother Mr. F. F. Balsdon here.

Misses Irene Hood and Mabel Clancy visited in Walkerton on Friday.

Mrs. James Taylor and daughters who have been living in Brussels have returned to the burg and intend spending the winter here.

Mrs. C. W. Keeling spent Friday and Saturday of last week in Listowel.

Mr. Jas. Clancy of Walkerton spent Sunday at his home here.

Mr. Walter Spatling of Toronto who has been seriously ill with diphtheria is recuperating at his home here.

Mr. and Mrs. E. A. Fowlie left on Tuesday morning to attend the former's mother at Orillia.

Mr. C. W. Keeling accompanied by Mr. Jas. D. Campbell made a business trip to Listowel on Tuesday.

We are sorry to learn of the death of the infant son of Mr. and Mrs. Jas. J. Schmidt which occurred on Thursday last.

Mr. Mac. Loughlin of the Royal Bank staff, Paisley, is relieving here during the absence of Mr. Fowlie.

Mr. Joseph Clancy shipped a fine bunch of hogs on Tuesday

Mrs. Potter who has been visiting her cousin, Mrs. E. D. Baillie here, returned to her home in Appleby on Saturday.

PINKERTON

Miss Sylvia Reid spent a few days visiting her sister, Mrs. H. Sicer, 11th of Kincardine.

Messrs. Arthur Alexander and Neil Murray returned from the West on Saturday.

Pte. Harold Pinkerton spent a few days in Walkerton last week.

Mr. Howell of Toronto speaking under the auspices of the Canadian Brotherhood or the Belgian Relief gave a very interesting and instructive address on the needs of the Belgians in the Presbyterian Church on Sunday afternoon. $30 was given by the congregation which was an exceedingly large sum from such a small congregation.

The Canadian Order of Foresters here tendered a banquet to Brother Harold Pinkerton, lately from the front, on Tuesday evening.

HANOVER

Major Rorke, the new Commanding Officer of the new 248th Grey County Battalion, will start his recruiting campaign about the middle of December, to be continued throughout the winter with Owen Sound as the base.

Mayor (Dr.) Taylor will stand for a second term.

The 147th Grey Battalion is camped at Shoreham Camp, Sussex, England.

A death of a former Hanover man occurred at Brantford on Tuesday of last week when Mr. Edward Hillgartner passed away at the age of 58 years. He kept a harness-shop here about 20 years ago. Death was due to dropsy. He leaves a wife and one grown-up daughter. His brothers, George and John, of Hanover, attended the funeral on Thursday of last week

Mr. John Frook, Deputy Reeve of Hanover, returned home recently from Gull Lake, Sask., looking "pretty fit" after a sojourn of two and a half months in the land of number 1 hard. The crops as a whole were pretty good this year—though Manitoba did not fare well—but when Mr. Frook left Saskatchewan Nov. 12 there were thousands of acres yet to be threshed. Mr. Frook is of the opinion that another good crop will put the west right on its feet.

CLAMIS

Practising for Xmas entertainments seems the order of the day.

Mr. Harry Dechan was the guest of his cousin, Ferguson Morrison of Kincardine last week.

Miss Blanche Downey, who was at Mr. W. J. Graham's for the past two months, has returned to her home on the 6th con. of Bruce and purposes going to Toledo, Ohio, shortly.

Miss Reta McKinnon was the guest of the Misses Currie, 2nd con., over the week end.

Master and Miss McBeath of Paisley were Sunday visitors at George Webb's.

Miss Hilda White of Ogema, Sask., is here to spend the winter with her grandmother, Mrs. Woodstock.

Mr. Wilson Corr of Paisley renewed acquaintances here last week. He purposes going to Toronto for the winter.

Mr. Alex. McSween had the misfortune to lose one of his team on Thursday.

We are pleased to report that Mrs. R. J. Nesbitt has recovered from her illness.

Miss Sara Jackson of Detroit, Mich., is home on a two weeks' holiday.

On Monday night last the home of Mr. and Mrs. Roy McSween, Boundary west, was gladdened by the arrival of a little soldier. Congratulations.

The Free Methodists have rented one of the U. B. Churches on the 6th con. of Bruce and are holding special services there.

The Red Cross Lecture here last week given by Rev. Mr. Gilmore of Ripley, was a treat. Owing to unfavourable weather and roads, the crowd was not large. A little over $35.00 was the proceeds for the evening.

MILDMAY

Mr. and Mrs. August Weigert have taken up residence in Mrs. A. Schetter's new residence on Adam Street.

Pte. George Weiler, who was transferred from the 160th Battalion to the special Service Corps at London, has received his discharge papers and is now at his home here.

Miss K. Schwalm, school teacher, was ill last week with rheumatism, and the pupils of the second form of the public School were given a holiday.

The pupils of the Mildmay public School intend holding a concert and bazaar in the Town Hall on Thursday evening, Dec. 21st. The proceeds are to be divided evenly between the Red Cross Society and the Knitting Club.

Mr. Geo. Yost moved his household effects to Hanover last week. Mr. Yost and son Earl, have secured good positions in the Knechtel factory there.

Mr. Ed. Kalbfleisch and family, spent Sunday with friends at Wroxeter.

Mr. Anthony Kunkel has opened a shoe making business at Formosa, in connection with Oberle Bros. general store.

Miss Annie Lambertus of Walkerton, visited relatives here over Sunday.

Edgar Herringer, son of Mr. and Mrs. Seraphine Herringer has enlisted in the 153rd. Battalion.

Mr. W. F. Wendt spent Sunday with friends at Wroxeter.

Mr. John Leach of the 12 con. of Carrick, has purchased Dr. Clapp's fine residence on Elora St.

CHEPSTOW

Mr. Harry Klein, who has been visiting in the vicinity for the past few weeks, returned to Kitchener on Saturday.

Dr. T. J. Kirby, a former medical practitioner here, now of Formosa, renewed acquaintances in our town on Saturday.

The remains of the infant child of Jos. J. Schmidt of Cargill were interred in the R. C. cemetery on Saturday. This is the second of twin children which the grief stricken parents have had the misfortune to lose within three weeks.

Mrs. A. Kocher of Brant visited her sister, Mrs. H. Helm, last week, prior to leaving on Monday for her new home at Hesson.

Mr. Geo. Oehring of Toronto is on a prolonged visit to his parents, Mr. and Mrs. Wm. Oehring.

Word has been received by his father, that Albin Kreeplin, who two weeks ago began work in a Muskoka lumber camp, had the misfortune to fracture his leg, the result of it becoming pinned under a log. Although the accident is a painful one, we understand the patient is recovering satisfactorily.

Reeve Phelan is attending the final session of the 1916 County Council at Walkerton this week.

Born—On Monday, Nov. 27th, to Mr. and Mrs. John Walter, a son.

BRANT

At a meeting of the various committees from each Polling Sub. Div. in the Township held on Nov. 28th, it was moved by M. L. Ziegler and seconded by Archie Weir, that the secretary be instructed to send a letter of condolence to the families of Mr. and Mrs. Patrick McGarrity and Mr. and Mrs. Henry Young, both being bereaved through the death of their sons, and also that a copy be sent to the local papers for publication. Carried.

To Mr. and Mrs. Patrick McGarrity and Mr. and Mrs. Henry Young: The Brant Branch of the Bruce Preparedness League take this opportunity of extending to you their sympathy in the death of your sons who paid the supreme sacrifice on the battlefields of Flanders, upholding the cause of *Righteousness* and Liberty and the honour of their King and Country. You didn't urge your sons to enlist, neither did their Country force them to go to the Front. They had everything here to induce them to stay, comfortable homes, fond parents and friends, but they went of their own free will from a sense of manly duty towards their King and Country. At this particular time we feel that any sympathy flows from a deeper sense of feeling because from the most of our homes sons or relatives have also gone forth to uphold their Country's cause in this great struggle for universal freedom. And while ou may long mourn the loss of your our boys, you have the consolation of nowing that they died the death of eroes defending the rights of the reak against the hand of the oppressor.

Signed on behalf of the League.
ames A. Lamb, Frank Rennie,
Secretary. President
rant, Dec. 6th, 1916.

RIVERSDALE

Mrs. Lawrence Beninger returned home after visiting friends in Teeswater.

A number of young people spent a very enjoyable evening at the home of Adam Lippert, Tuesday evening.

Miss Della Chatreau is visiting her cousin, Mrs. Leeson of Kinloss

Mr. Albert Dietrich is taking in the uelph Fair.

Mr. and Mrs. L. S. Beninger visited in the burg on Sunday.

Mrs. Miller of Walkerton visited at ilbert Chatreau's.

A number of the farmers are ploughing again.

BRUCE PREP. LEAGUE

Favors Conscription for Canada and Wants Emigration of Eligible Young Men Stopped.

The fur flew for a few minutes at Bruce Preparedness League Meeting here last Wednesday when Mr. John Rowland took occasion to criticize the sending of officers up into this "neck of the woods" to urge on recruiting while there is still heaps of work for the recruiters to do in their own part of the world. Lt.-Col. Kelly Evans, who had been addressing the meeting on recruiting, was formerly commanding officer of a county battalion which has never been brought up to strength and he is now in civilian clothes again.

The meeting was also addressed by Capt. Clarke of London, representing Lt.-Col. Brown A. A. G., M. D. No 1.

It was moved by Reeve Kastner of Wiarton, seconded by Rev. R. Perdue that a resolution be passed asking the government to pass some system of compulsion or conscription for the more vigorous prosecution of the war as the present system of recruiting seems to have about exhausted itself and that copies of this resolution be mailed to the local Members of Parliament.—Carried.

It was moved by Mr. E. Roy Sayles of Port Elgin, seconded by Reeve Kuntz of Culross, that the attention of the Dominion Government be drawn to the fact that there are too many young men leaving Canada who are eligible for enlistment and that steps should be taken to stop this emigration and that copies of this resolution be also forwarded to the local members of the Dominion Parliament.

BAKER ESTATE MYTH

Discovered that the Philadelphia Heirs Have Been Chasing a Rainbow.

Walkerton people have been specially interested in the reports in the daily papers lately regarding the fabulous Baker Estate of Philadelphia, owing to the fact that a Walkerton lady had been notified that she was one of the heirs. The Estate now turns out to be a myth. Toronto Saturday Night gives the particulars:—

Chasing rainbows may be a pleasant, but it is certainly not a profitable occupation, except possibly to the few who organize the hunt. A case in point is the chase for the "Baker estate," which has been going on, off and on, now for a good many years. Every once in a while some glib talker, with an eye to the petty cash which people by the name of Baker may possess, organizes a new expedition to go after the mythical Baker millions. These Baker millions, variously estimated by the romancers to run anywhere from $150,000,000 to $700,000,000, are presumably located in the city of Philadelphia. The story goes that one Jacob Baker, who died three-quarters of a century ago, owned the land where now stands the City Hall of Philadelphia, as well as a good share of the property surrounding that locality. This man Baker was presumed to have died, leaving the property in trust to eventually be divided among the Baker heirs. A pretty story, but it does not fit in with the facts. The official records show that the Baker will was recorded in the City of Brotherly Love in the year 1840; that the estate was worth exactly $741; that a sister of Jacob's got $562 out of the estate and the remainder went for expenses of administration. Such is the rainbow which Baker's heirs have been chasing for years. Where the absurd story started, it is impossible to say, but it has been a source of petty graft for a good many years on the part of sharpers, or by those deluded with the idea that the Baker estate really exists. Toronto has recently had a revival of the fable, the Bakers foregathering by the score to hear news of the millions to come, and incidentally contribute some cold cash to the coffers of the "Baker estate" promoters.

THE TOWN COUNCIL

Sends Mayor Lippert and Councillor Arscott to Toronto to Get Hydro Figures at Once If Possible.

The Town Council held its regular monthly meeting of the year on Monday night, all the members present.

Mr. Robert Richardson, who was assessed $250 for business tax as implement dealer, asked to have the amount remitted as he had not been in the implement business for over a year.—Granted.

A letter from Deputy-Postmaster General Coulter to Postmaster Tolton, stated that Post Offices were being finished with enameled signs bearing the name of the town, and stating that many municipalities were going further and having signs erected at the entrances to the town. As there are already signs for motorists at the east and west approaches to the town, Council decided to take no action.

Mrs. Matthew Goetz asked for rebate on income tax for the last quarter of 1916.—Granted.

M. G. Woodman asked for rebate on business tax.—Tax confirmed.

Walkerton Electric Light Co. was given $1.65 rebate on business tax.

An order was passed for the County rate of $2591.77 for the year 1916. A number of small accounts were also passed.

Chief Ferguson reported fees of $10 collected for the month of December.

An urgent appeal was received from the Sailors Relief Fund. The Council responded with a grant of $100.

Barrister O. E. Klein wrote that his client A. P. Jenkins had paid $5 poll tax not knowing that he was exempt from poll tax being a volunteer of the 32nd Batt'n and asked to have the tax remitted.—Granted.

Dr. R. T. Porter, Medical Health Officer, reported that the general health of the town had been good during the year. There had been a widespread epidemic of measles early in the year with no fatalities. There had been no cases of typhoid, diphtheria or infantile paralysis. He expects to see an abatement of disease carrying flies through the appointment of scavengers and the new regulations brought into force by the recent Sanitary By-law.

By-law No 1125 was passed arranging for Nomination Day, December 22nd, and Municipal Election Day, January 1st.

Chairman Douglas of the water works Com. asked three days leave for Engineer Dan Wilton. Matter left with Chairman Douglas.

Can't Get Hydro Figures

Mayor Lippert said he did not understand the Hydro Electric Power Commission's delay in forwarding the estimates of cost of installing Hydro in Walkerton. It was the Commission's duty as well as that of the Town Council to get the information. The Commission had approved of the Council submitting the Hydro Enabling By-law to the people on January 1st. It is up to the Commission to help us out and give us the figures, said the Mayor. There had been promises and still no figures. What would he do about it? Would the Council have Mr. Collins write Gaby again? Would he go down to Toronto and see about it? Mayor Lippert stated that he himself had written Mr. Gaby again about the matter. And he had taken four trips to Toronto on his own hook at one time and another. We want the figures, concluded the Mayor, and we have got to have them.

Coun. Douglas—Apparently writing is no use.

Coun. Russell favored sending a delegation down to bring these people up by the neck. He suggested that Mayor Lippert and Coun. Arscott be sent. And a public meeting should be called. Everybody was talking Hydro and waiting for information.

Coun. Pletsch thought it was the Hydro Commission's business to send a man up here. They were paid for it. Apparently they weren't very anxious to do business with Walkerton.

Coun Russel—It won't cost much to send two men.

Coun McCarter—Especially now that we have prohibition.

Will Go To Toronto

A motion was brought in by Couns. McCarter and Russell that the Mayor and Coun. Arscott be a delegation to go to Toronto right away and get the much needed information.—Carried.

Coun. Russell asked a refund for Mr. Henry Williams, who had paid inadvertently water rates for a horse, for six years when he had no horse. The matter came up before the Assessment Committee earlier in the year when only 1 year's rate was remitted. Coun. Russell took the stand that the Town honestly owed Mr. Williams the money as he had paid the rate and had received no service whatever in return.

Reeve McNab said the matter had been fully considered and he did not believe in opening it again. The Council could not afford to start paying claims against previous Councils. There was no telling where it would end.

Coun. Russell thought Mr. Williams could collect by going to law.

Reeve McNab said he could not collect.

A motion by Couns. Russell and McCarter to make a refund to Mr. Williams, the amount to be allowed on his water rates was defeated by the following division:—

Yea—Russell, McCarter—2

Nay—Douglas, Arscott, Pletsch, McNab, Lippert—5.

Christmas Shoppers

You can get in touch with a whole lot of helpful suggestions by reading the Walkerton merchants' Ads in this week's Telescope.

+ + +

Reported "Missing"

Jim Cunningham, formerly of the Canada Saddlery here, was reported "missing" in Monday's Casualty lists. He enlisted at St. Catherines.

+ + +

Sacks Lost

On Friday on the road west of Walkerton, probably near the turn at Long's corners, two bundles of sacks. Will finder kindly communicate with Telescope Office.

+ + +

Sick With Rheumatism

Mrs. Dan Wilton received a letter this week from her son Pte. Alvin Wilton, stating that he is laid up with rheumatism in a Canadian Hospital in France.

+ + +

Aaron Ross Dead

The death occurred at Listowel, on Monday, of Aaron Ross, aged 56 yrs. proprietor of the Arlington Hotel. His wife was formerly Miss McGuire of Walkerton.

+ + +

Engagement Announced

Mr. and Mrs. John L. Bushlow announce the engagement of their only daughter, Melinda, S. to Rev. H. R. Mosig, pastor of the Lutheran Church, the marriage to take place quietly the end of December.

+ + +

An Appreciated Gift

A Christmas Gift that is appreciated by your boy or girl away from home is a year's subscription to the Telescope. It is a gift that is received 52 times. Bruce old Boys write:—"The Telescope is like a weekly letter from home." Send your order to-day!

+ + +

Auction Sale

An auction sale of the valuable farm, farm stock and chattels, belonging to the estate of the late D. A. Allardice, N. D. R. Brant, 2½ miles west of Walkerton on Monday, Dec. 18th. See complete sale list on page 4 of the Telescope.

Signallers Reach England

Mr. E. Glave had a letter from his son Ralph, last Wednesday stating that he had arrived safely in England and was camped at Crowborough, about an hour and a half's run from London. He reports a very smooth passage across the Atlantic.

+ + +

Surprised By Music Pupils

On Thursday last when Miss Mary Watt went to Allan Park to conduct her last music class of the season there her pupils gave her a very pleasant surprise. After reading a nice address in which they expressed their high appreciation of her efforts and an earnest hope that she would return again to resume her class in the Spring, they presented her with a very handsome manicure set and leather case.

+ + +

They Paid Dearly

Three young farmers of Kinloss Tp. who claimed that they took a drink to tone them up before going to a party, appeared here before Magistrates Tolton and Richardson on Monday, charged with "being intoxicated in a public place." The accused claimed that the liquor was drunk at home but had proved to be "terrible stuff." The Magistrates listened to their tale of woe and then they fined H. Harrison, D. Houton, and W. Small $20 and costs each. The information was laid by Licence Inspector W. M. White.

+ + +

Warden's Banquet

The Soldiers' Aid Tea Rooms were opened on Wednesday night with a banquet tendered by Warden McNab to the members of the County Council, Town Council, and officials. The young ladies had everything nicely arranged and served a very fine supper. Mayor Lippert made a capable toastmaster and introduced a number of toasts. After praising the good qualities of the genial Warden, and his fine record at the County Council, and at the Walkerton Town Council, the County members capped the climax by presenting Warden McNab with a handsome gold headed cane accompanied by all good wishes for success and future happiness.

Auction Sale

Auction sale of Farm Stock and Implements on lot 17, con. 4, Brant, on Tuesday, December 19th, commencing at one o'clock. Robert Parker, prop., Wes. Abell, auctioneer.

AT THE COUNTY COURT

Three Cases Are Up For Trial at the General Sessions.

General Sessions of the Court is being held this week before Judge Greig. Two jury cases and one non-jury case are up for trial.

Ernest Ashcroft and Elwin Bennett of Albemarle are suing Joseph Sanderson and Cecil Day of Huron County for $125 loss on a bunch of cattle which they bought in July when the market was high and refused to take in October, claiming that the animals were not up to the mark. The plaintiffs then sold the cattle by public auction and are seeking to recover from the defendants the amount lost. David Robertson K. C. appeared for the plaintiffs; R. L. Murphy K. C., M. P. of Listowel for the defendants

Currie vs. Griffith is a non-jury case in which a Wiarton man claims $300 damages from the owner of an adjoining property whom he claims has been improperly allowing water to flow from his store premises over his premises. He also seeks an injunction to restrain defendant from allowing the water to run. J. C. Moore of Wiarton for plaintiff; Wright & Telford of Owen Sound for defendant.

The case of the Crown against Tony Zuber charged with writing a threatening letter will be tried before a jury. D. Robertson will prosecute and O. E. Klein appear for defendant.

The Christmas Fair

The prize-lists for the Christmas Fair have been issued and copies may be had from the Secretary, Mr. N. C. McKay. The list has been revised and enlarged and the prizes in some classes increased. Indications are that the Show will be bigger and better than ever this year. Everybody is invited to come. Bring your friends. Remember the date, Wednesday, Dec. 20th.

+ + +

Nurse Going Overseas

Miss Annie Ferguson, daughter of Chief of Police Ferguson, who graduated from Stratford Hospital last week, winning the Gold Medal, has signed up for Overseas Service and received orders to report at Wolsey Barracks, London, on Wednesday. Miss Ferguson received notice of her coveted appointment the day after graduation and was given just a week in which to report. Chief Ferguson now has four sons and one daughter in the King's Service.

+ + +

Hydro At Chesley

Reeve Brown of Chesley, who was here last week attending County Council, says that Hydro at Chesley is proving more than satisfactory. Hydro has been installed less than a year and already it is on a good financial basis. And it will be even a greater success as the advantages of cheap power continue to prove themselves and more people keep wiring up for power and household service. Reeve Brown says the people of Chesley are learning for the first time what good street-lighting is like. The streets are lighted with 100 c. p. nitrogen-filled lamps.

+ + +

Hospital Christmas Shower

The Women's Institute will hold a provision shower for the Bruce County Hospital in Mr. N. C. McKay's office (Dept. of Agriculture) on Xmas Fair Day, Dec. 20th. While we have been aiding the sick and suffering across the seas, we have been forgetting our own and the hospital is in great need of our help. Donations of fruit and vegetables, fresh, canned or dried fowl, meat, butter, eggs and groceries will be gratefully received. Not only the Institute but all who wish to see the hospital maintained, are asked to contribute. A committee of ladies will be in attendance to receive the gifts.

+ + +

Death Of Robt. Steele

Early Wednesday morning Mr. Robt. Steele, an early settler of Brant passed to the Great Beyond. He had been in poor health for some time and had been quite ill the last two weeks, death resulting from uraemic poisoning. The late Mr. Steele was born in Scotland 75 years ago. He came to this country with relatives as a boy, settling very soon on the farm near Maple Hill where he resided up to the time of his death. Mr. Steele was a man of sterling principle, well-liked as a neighbour and well-known throughout the community. He was a member of Knox Church. Besides his widow, four sons survive. They are:—John and Thomas of Brant, Robt. of Treherne, Man., and James of Belle Plain, Sask.

+ + +

Strong Council Needed

The importance of the coming year's work at the Town Council demands that our citizens get busy and see to it that a strong list of good candidates be brought out. Unless the Hydro By-law should be defeated, the Council will have the local power question on its hands. Everybody must recognize that this is a matter of the utmost importance to the Community and if the people of Walkerton do not secure the right kind of men, they can look forward to spending the next twenty years lamenting their neglect to rise to the occasion. It looks like A. P. Johnston for Mayor by acclamation. Andy has probably more claim to the honor than anyone else so far as length of service is concerned, with the exception of Reeve Alex. McNab who will not be a candidate for Mayor this year. Reeve McNab has been the head, and shoulders too, of Finance in the Council for several years. If he persists in dropping out altogether this year he will be heard from later-on. Another man who would be greatly missed is Mayor Lippert. It might seem like a step down after holding the Mayoralty honors for three consecutive years to run as a common or garden variety Councilor, but we believe that Mayor Lippert has an opportunity to do the town possibly even greater service the coming year than he has done in the past. Besides having been the spokesman in bringing Hydro before the people, he is the only man at the Board well-posted on the subject of Hydro. He will be needed next year. With three Councillors running for Reeve and several dropping out, there are bound to be a number of new faces at next year's Board. It is up to the citizens to see that those new Councillors are the right kind of men to handle the important business which the Council has before it. Plenty of good men should be willing to sacrifice a bit of time for one year at least. Bring them out!

TO JOIN THE NAVY

Fifteen Walkerton Youths Have Signed Up Within the Last Few Days.

The idea of joining the British Navy took a firm hold of the youthful imagination of many Walkerton lads, following a talk by Lt Col. Kelly-Evans in the Town Hall last Wednesday night. The chartered banks of Canada are taking applications for Naval recruits and already this week Mr. H. M. Ley has three applications from three young men wishing to be taken on as seamen: Earl Obrecht, A. Giesler, and A. P. Jenkins, and no less than twelve younger fellows have handed in their names to be taken on. These are:—Clifton McKay, T. W. Reichenbach, T. J. Irwin, W. L. Ernest, Leslie Bryce, Ira M. Hiepel, Walter J. Small, Stewart Reichenbach, Les McConnell, Albert Field, Wilfrid Ernest, Frank Frulo. These boys will have to obtain the consent of their parents or guardians, and also pass the medical examination before being accepted.

The boys under eighteen who enlist, will be accepted for home service at fifty cents a day. On attaining eighteen, they become seamen and draw 1.10 a day. Those boys who are accepted will proceed to Halifax and go into immediate service in home waters, on one of the British cruisers at the naval base at Halifax, patrolling our own and adjacent American waters. This is where the boys will likely be used until they reach the age of 18 or the war ceases.

The Hydro Bylaw

It should not keep the people of Walkerton awake o' nights to decide how to vote on the preliminary Hydro By-law on January 1st. By carrying the By-law the citizens will secure for themselves for the first time a choice which they will be able to make later on—a choice between Hydro and the best proposition which the Walkerton Electric Light & Power Co. may see fit to make. At the present time we have no alternative but to pay what the Walkerton Power Co. dictates. And if the by-law is defeated we shall be in even a worse plight, for it will be taken as evidence that the people of Walkerton are so thoroughly satisfied with the service and the rates we have had for the last several years that they are unwilling even to entertain any competitive offer. If the by-law is defeated it will be like serving a notice on the local power company to charge whatever it likes.

Figures should be shortly forthcoming from Hydro as to the approximate cost of power for Walkerton. The Hydro Commission will be lacking in its duty to our citizens if it fails to place all available information at their disposal. But the figures are not absolutely essential. Even if the people should have to vote without any definite estimate before them, they would have nothing to lose by voting for the preliminary By-law. Before any contract whatever can be made with the Hydro Commission, a second by-law, the Money By-law, must be voted on by the people.

Those cities and towns of Western Ontario which voted on the original Hydro project 10 years ago, had not much data to go by and certainly required abundant faith to stake huge capital on what seemed to some people a chimerical project, a fanciful dream of engineers, a hair-brained attempt to accomplish what had not even been attempted in the world of engineering before. In backing the big Hydro project, by an almost unanimous vote in most instances, those towns and cities took a good deal on faith. But to-day, after Hydro has been thoroughly tried and proven in scores of towns and has been successful beyond the fondest dreams of its public-spirited originators, to-day one has only to look at what has been accomplished on all sides to know that an opportunity to secure Hydro is one that should be eagerly grasped. These things were not "done in a corner." Berlin, Preston, and many other towns familiar to Telescope readers, are standing illustrations of what Hydro can do towards making a "live" town. Wherever you may go, there is the same story. Hydro has reduced power rates, cut lighting rates sometimes in half, made electricity a useful household servant whose services are within the reach of all classes. You can tell a Hydro town as soon as you step into it. It is a good place to live in.

Will Don Khaki

Word has been received from Norman Cunningham, son of Mr. and Mrs. Thomas Cunningham that he is going to dispose of his business at Forward, Sask., and join the colors. Norman's brother Chester is [illegible]ent in a hospital in France, [illegible] from inflammation of the lungs [illegible] exposure in the trenches.

CURRENT COMMENT

King Charles of Austria has issued a manifesto, declaring that he will continue the war until Austria's safety is assured, but that he is anxious for peace.

◆

Great Britain and France are cancelling their orders for munitions in the United States. They feel it is wiser to import Chinese labor and make their own munitions.

◆

It is reported that Representative-elect Jeanette Rankin, of Montana, is greatly annoyed by offers of marriage received since her success at the polls. Jeanette is thus paying the penalty of popularity.

◆

The torpedoing of the British hospital ship Britannic, with a large loss of life, by an enemy submarine, is another example of the brutality of the enemy. Has President Wilson anything to say?

◆

The women of Kansas are in luck. At the last election in that State fifty-eight women were elected county superintendents of instruction, thirty-six registrars of deeds, twenty-five clerks of district courts, fifteen county treasurers, five county clerks, and two probate judges. Women are coming into their own.

◆

NO PEACE IN SIGHT.

It was only the other day that Lord Derby, Under Secretary for War, asserts that "The suggestion that contain any idea of peace which does not give them what they are fighting for," and he added that the British people are growing more determined to continue the war to a [illegible]. Great Britain should [illegible] can only be regarded as [illegible] citizen army is only now ready [illegible] assert that "The suggestion [illegible] conclusion. To-day Lord Northcliffe [illegible] war. There are no peace discussions in this country at all, and there will be none while Germany occupies a portion of the allied territory." We have equally emphatic statements from Germany. The German Government is now mobilizing all its manhood from 17 to 60 years of age. This will give it millions more men. The war is resolving itself into a war of nations, not of armies.

While military Germany is thus putting on a brave face, it is well known that the German people are tired of their sacrifices and sufferings and are longing for peace. The statement made yesterday that members of the Asquith Ministry were to stump the country on behalf of a continuance of the war may show that there is also a peace element in Britain that has to be dealt with.

◆

TRAPS FOR ZEPPELINS.

New Device is in the Hands of the British Government.

One of these days, perhaps, newspaper readers may learn of a Zeppelin caught in an aerial net "somewhere in England." Just as the submerged links of steel swept the seas and reduced the terrors of the German submarine to commonplace warfare so has a weapon been found to render impotent the battleship of the sky. It is a simple device, the invention of Joseph A. Steinmetz, of Philadelphia, and it is in the hands of the British Government.

The idea of netting and destroying Zeppelins is almost as unique in its simplicity as was the seining of submarines. It consists of releasing a great number of hydrogen balloons, tied in pairs or sets by piano wire several thousand feet long.

A perfect network of wires, carried upward at great speed, will drift against the Zeppelin. The balloons are swept into contact with the airship or will float about it. Automatic or earth-controlled triggers then release the bombs, which are of two varieties, high-explosive or inflammable. At or about this time things will begin to happen to the Zeppelin.

In war time things are done on a stupendous scale. Not 20 or 30 but a multitude of balloons carrying aloft a network of contact wires will be sent into the air and they will cover such a great area that the airship will have considerable difficulty getting away from the net.

"It has been shown," said Mr. Steinmetz, "that the high-angle artillery fire has failed against the German sky cruiser, but, what is worse, the falling fragments of shells and unexploded shells have seriously damaged the city of London. The Zeppelins, which have raided nearly a dozen times, had little difficulty in escaping unscathed, while London really bombarded herself."—Philadelphia North American.

◆

One Mother.

Hundreds of stars in the pretty sky,
  Hundreds of shells on the shore together;
Hundreds of birds that go singing by,
  Hundreds of bees in sunny weather.

Hundreds of dewdrops to greet the dawn;
  Hundreds of lambs in the purple clover;
Hundreds of butterflies on the lawn;
  But only one mother the wide world over.

—Author Unknown.

[illegible] a place for everything," [illegible] Wise Guy. "Yes, but the [illegible] who is looking for a job can't find his place," replied the [illegible]

HER HUMBLE LOVER

"First, a bunch of wild rose, that means 'beauty;' then some ox-eyed daisies I don't know what that means then some bluebells—they mean 'happiness' and then—"

"Oh, here's papa!" breaks in Archie, as the rector comes round the corner, looking very hot in his long, clerical coat and black, billy cock hat.

Signa starts, but Hector Warren looks up calmly enough, and goes on with the bouquet composedly.

"And then the primrose—that means 'purity;' yes, it will be a pretty posy—"

"Signa!" exclaims the rector, who has reached the group, and stands staring at the coatless figure of Hector Warren with bewildered amazement and disapproval.

"Good-morning, Mr. Podswell," says Hector Warren, just glancing up from his occupation.

"Good—er—morning," responds the rector, taken aback by the cool, impressive tone, and staring at Hector Warren's shirt-sleeves.

"What a lovely morning, isn't it?" says that gentleman. "Archie and I are concocting a bouquet—of wild flowers, simply, as you see—for Miss Grenville."

"And he climbed that big tree to get some leaves," says Archie, solemnly pointing to the pine.

"Good gracious!" ejaculates the rector, staring open-mouthed. "Er—Signa I came to look for you. It is time you got ready."

"One moment," says Hector Warren, calmly; "the bouquet will be finished directly. Warm, is it not?" and his dark eyes lift themselves from his work for a moment.

"Yes—yes," assents the rector, "but—er—Signa, your aunt will be waiting," he says, still unable to drag his eyes from the shirt-sleeves.

"Another minute will complete it," says Hector Warren, quietly. "I hope Mrs. Podswell is none the worse for last night's festivities."

"No, no," says the rector, staring at him. "Come, Signa."

"There," says Hector Warren, handing her the bouquet and looking up at the rector's disturbed countenance with a smile. "There is Archie's offering, Miss Grenville, with all its meaning."

Signa takes it, and her face crimsons, for there is a significance in his voice which does not reach the rector.

"Thank you," she says, hurriedly, "but I am still sorry that you should have had so much trouble—"

He waves her regret away.

"It was nothing," he says, and he reaches for his coat and slips it on. "A mere nothing. Are you going—"

"Miss Grenville is going to Sir Frederic Blyte's," says the rector, stiffly.

Hector Warren nods.

"I hope she will enjoy herself. Good-morning," and he takes up his weather-beaten deerstalker.

The rector doffs his billy-cock stiffly, but Signa holds out her hand, and the white fingers that, white as they are, helped the owner to climb the biggest pine in Northwell, close over her hand.

"Good-bye," he says, in his soft, grave voice, "and a pleasant day," and patting Archie on the head, he strides away toward the Grange.

Signa fingers her bouquet as only a woman can touch flowers, and the rector stands staring after the tall, graceful figure disappearing in the distance.

"What an er—extraordinary man!" he exclaims at last. "Did he really climb that tree, Signa?"

"Yes, he did," says Signa, examining her bouquet.

"And without his coat," says the rector, in tone of mild horror.

"Without his coat," says Signa, smiling.

"Extraordinary," says the rector. "Really, I cannot make this Mr. Hector Warren out; one would think a friend of Lord Delamere's would be—er—more civilized. Archie, run on and play. Most extraordinary, Signa."

"Yes," says Signa, so calmly and quietly, that the rector begins to feel embarrassed.

"I—er"—he says—"I think that you had better avoid this Mr. Warren's acquaintance. We don't know anything about him, excepting Lord Delamere's letter says, and a man who—er—climbs trees in his shirt sleeves can't be a man worth knowing. We must be careful, Signa. We owe a duty to society."

Signa's face flushes slowly, and there comes a light into the dark eyes that ought to warn the rector he is treading on dangerous ground.

"Is there any sin against society in a gentleman's obtaining a spray of pine although he has to climb a tree—and one look up at it—to get it, and in his shirt sleeves?" with a smile.

The rector rubs his chin.

"Er—well, not exactly, if you put it that way; a gentleman may do eccentric things—"

"Do you mean to infer that Mr. Warren is not a gentleman?" she asks with mild surprise and amazement.

The rector reddens—even he cannot go so far as that; if ever a man bore the outward and visible sign of the patrician order, this stranger who calls himself Hector Warren does.

"I—er—can't say that," he says; "but there are gentlemen and gentlemen. For instance, Sir Frederic Blyte, now; there is one we should call a gentleman—a baronet, a man of position and wealth, of—er—vast influence about his position. There can be no doubt about his position."

"I am sure Sir Frederic feels none," says Signa, with a smile about the corners of her lips.

"Certainly not," admits the rector, who is slow to recognize irony—"certainly not. But this Mr. Warren, he is a well-mannered—er—person, extremely distinguished-looking, no doubt; but it is not a question of manners. Fr—as a rule, I believe adventurers have the best of manners."

"If Mr. Warren is an adventurer they certainly have," says Signa, quietly.

"Just so," assents the rector as if she had fully agreed with him. "But to be [illegible]. We know nothing of him. He is a friend of Lord Delamere's, but Lord Delamere is—ahem—I do not like to allude to such a subject, but you heard the story Lady Rockwell told us last night?"

"Which may be true or false."

"If it was false why didn't Mr. Warren, his lordship's friend, contradict it?"

Signa is silent, and the rector, a little triumphant, goes on.

"At any rate, Lord Delamere is—er—eccentric, and not very particular whom he chooses for his acquaintances; he is just the sort of man to make friends of some fellow traveler, caring nothing whether he is an adventurer or not. This Mr. Warren may be a—er—an opera singer, or something disreputable of that sort; Lord Delamere wouldn't care! He would, if all they say of him be true, fraternize with a traveling tinker. Ah, even give him such a letter as this Mr. Warren brought me. You see how much his lordship cares about his ancestral home," pointing to the deserted Grange—"he would have no scruple in placing it at the disposal of the first chance acquaintance."

It was a long speech for the rector—he reads his sermons—and he feels rather proud of it.

"What do you wish me to do, then?" asks Signa, turning over the flowers in her bouquet, and lingering on the sprays of pine with a wistful thoughtfulness.

The rector coughs.

"Er—er," he says, hesitatingly. "Don't be too friendly with this stranger," he says. "He will be gone in a day or two, perhaps"—Signa's head sinks lower—"and it will be all right. Come, my dear child," and the rector puts on a bland, paternal smile, "consider my advice. You are young and—er—inexperienced. You are in my and your aunt's charge, and—er—your future happiness is a serious responsibility"—"since last night" he ought to have added. "Come, you will do as we wish, my dear?"

"I cannot 'cut' Mr. Warren," says Signa, her gray eyes lifted to the rector's commonplace face with a troubled gaze.

"Certainly not—certainly not!" says the rector, with a mild horror. "That would be—er—unchristianlike — to say nothing of running the risk of offending Lord Delamere!" Signa smiles. "What I mean is, don't encourage him."

"Encourage him!" says Signa, her eyes wide open with maidenly indignation.

"Dear me—er—there is no occasion to snap my nose off!" says the rector, nervously, for there is something in these gray eyes that make his small soul shrink. "I—er—mean don't be too familiar."

"I have promised to go with him to the bay—down there," says Signa, in her quiet, straightforward fashion, "with Archie," she adds.

The rector rubs his chin.

"Make some excuse and don't go," he says, promptly.

Signa's eyes flash with a fine scorn.

"If there was one lesson my father taught me more earnestly than another, it was not to break a promise," she says, in a low voice. "He said it was the beginning of dishonor and the refuge of a coward."

The rector reddens.

"Well, well," he says, shamefacedly. "If you have promised, I suppose—er—you must go, but I don't know what your aunt will say, I'm sure. Perhaps"—coloring and looking down nervously—"perhaps we'd better not say anything about it to her."

Signa smiles.

"That is as you wish," she says, [redacted]

and he stands at the end of the lane opening on to the beach, looking up at the two figures running down toward him—for pedestrian exercise generally means running with Archie; walking, he says, is waste of time.

"Yes, we have come," says Signa, her face flushed with the run, her gray eyes violet and beaming brightly, so brightly that Hector Warren's catch their reflection, as it seems. "Oh, yes, we have come, but are we not late? I had to hold a skein of wool for Mrs. Podswell a long skein, wasn't it, Archie? Never mind—[illegible], if you don't?"

"I should not mind waiting any time," he says, quietly, and giving her his hand to help her over the rocks.

"I want you to come round the head here. It is from that point you can see the view. Shall I carry you, Archie?"

"Certainly not," says Archie, gratefully. "You had better carry Signa, perhaps; girls always slip."

"Thanks, Archie," says Signa, with a smile, "but I can trust to my feet quite as well as you can. Oh, how beautiful!" she exclaims, as, turning the corner, they come full upon the open sea, where the river runs into it and the white-tipped waves are rushing in over the bar. "Oh, beautiful!" and she shades here eyes, and drinks it in with a long, steady gaze.

"I thought you would say so," he responds, just glancing at the view, then letting his eyes rest on her face with an unrestrained admiration. "Yes, beautiful!" he murmurs, absently.

"And how fresh and bright the sea looks this morning," says Signa, a little wistfully. "Look at those boats sailing up the river. Ah! I have not seen anything like this since I left Geneva."

He is silent for a moment, then he points to a boulder at her feet.

"Will you wait here for a moment or two?" he says. "I want to speak to the man at the house there."

Signa nods and looks around. There is a house, built of some portion of a ship, perched high upon the shore, with the ribs of an unfinished vessel rising behind it, like the skeleton of a whale one sees at museums.

Hector Warren climbs the bank, threading his way between huge banks of timber, and has some talk with the ship-builder, a bronze-faced man with a beard, who stands at the door of his strange-looking house, leaning upon his axe; and after a few moments Hector Warren comes back to her.

"Would you like a sail?" he says.

Signa looks up quickly, but Archie spares her the trouble of replying.

"Of course she would, Mr. Warren," he says. "Didn't you see her looking at the boats?" and he dances about eagerly.

"I did," replies Hector Warren, smiling. "Will you come? We will not go far; the water is quite smooth."

"Oh, I am not afraid!" says Signa, eagerly. "I am a good sailor, but—"

"Don't be afraid of me," says Archie, proudly. "I'm never ill. I used to go out with Whitefield's boy—that's Whitefield, with the axe—in awfully rough weather! I shan't be ill."

"I was thinking," hesitates Signa, "whether—"

"Whether Mrs. Podswell will be alarmed?" he says.

Signa laughs faintly at the idea of that lady being alarmed by any person's safety save her own.

"I think we can go," she says.

"Of course," exclaims Archie, confidently. "I'll help you get the boat, Mr. Warren," and he clutches his hand eagerly.

Signa watches the two men and the boy drag and push the boat into the water, notices half absently the skill and strength with which the tall, stalwart figure does his part of the work; then she gets up and goes down to them. Whitefield touches his cap as she approaches.

"I'll get a cushion for the young lady, sir," he says, "and here's an oilskin, if she'll take 'un; there may be a shower," and he looks up at the sky with a knowing eye.

Hector Warren arranges the cushion in the stern of the boat: Archie climbs in, scorning to accept any assistance, and Signa, not so proud, follows and takes her place.

"Quite sure you can manage 'un, sir?" inquires Whitefield, as Hector Warren climbs in as the boat glides off.

"Quite, thanks," he answers, quietly. "You are not afraid to trust yourself to my seamanship?" he asks with a smile.

Signa, watching him handle the sails laughs, confidently, though she knows no more about the management of a boat than the general run of her sex; but there is something in Hector Warren's quiet air of self-command that inspires confidence; and if he had asked her if she would trust herself to him in a balloon or in a diving bell under the sea, she would answer "Yes" just as readily.

"That is all right," he says; "now, then, you shall be captain. Take the tiller in your hand—so," and his hand closes over hers. "That's it! and when I say right or left—I should say 'port' or 'luff,' if you knew what I meant—move it in the direction I tell you. Now, Archie, come out of the way of the sheet, and coil your small body just there," and as Archie, laughing with infinite glee, obeys, Hector drops down at Signa's feet with the sheet in his hand.

A turn at the helm and the sails take the wind, and, like a bird skimming through the azure heavens, the boat glides over the sunny waters. The delight of it my poor pen cannot picture, and will not attempt it; suffice it that it brings the color to Signa's cheeks, the light to her eyes, and makes her feel as if she must sing, or laugh, or both; while Archie, with his chin perched on his fingers, stares with admiring awe at the quiet figure prone at Signa's feet, with all that broad expanse of sail at his command, and answering to his touch.

"This," says Signa, emphatically, "is simply the perfection of locomotion. I had no idea sailing was like this. One reads of it in books, where no doubt the poor author tries to describe it, but one never realizes it—never. It is like riding on the back of a great white bird—only that one has the sea instead of the air. How sweetly it smells, and—oh, I cannot describe it; but one feels as if one had left all the world and its troubles behind, and were happy, happy at last!"

"Perhaps you would get tired of this—"

"Oh, no!"

"In time. But I am glad you enjoy it; and how did you enjoy yourself yesterday?" And he looks up at her. "Press a little to the right, please—that's it. Was Blyte Park as fine as you expected?"

Signa laughs. This morning she feels so happy and light hearted, so—alas! for her promise to the rector!—so familiar with this stranger, that she answers as openly as if she had known him all her life.

"Oh, yes; it was a grand place," she says, pushing her hat from her face, and unconscious that every thought [illegible] responsive thrill in his heart; he is so calm and quiet, how should she guess?

"Oh, yes, very grand, and in the most perfect order. I felt as if we were committing a breach of the proprieties when I saw the marks our carriage wheels had made on the drive. It was like—like polished granite—not a stone out of place."

"Not like the Grange," with a faint smile.

"No, the poor Grange!" she says, with a little sigh. "No, but a weed, not as much as a speck of grass. And the house was the same, so were the stables—everything sparklingly clean; the stable tools were polished like silver. Sir Frederic said that he walked through the stables every morning, and that if he saw anything dirty he just threw it out into the yard, and if he had to do it twice, he discharged the man whose duty it was to keep the article clean. I don't think"—musingly—"that I should like to take service under Sir Frederic Blyte."

(To be continued.)

MAKE ENGINEERS IN A HOME CAMP.

Infantry had been in possession before us, and crack infantry at that—Scots and Welsh Guards among them. Doubtless their sojourn here was happy and their work in that time of urgent national need conscientious and thorough. We can well conceive how the sight of those stalwart six-footers, swinging along the village street in symmetrical platoons with a level, lilting stride must have quickened springtide gladness in the heart of every village lass. We know that their church parade could have been nothing short of a grandeur and a glory. The philosophic cobbler even, in all probability, abandoned his Sabbath morning reverie, with breakfast in bed, to witness so imposing a spectacle. We can allow all that, with reasonable humility and envy.

Yet knowing the district as we now do, after months of herculean training, we can also realize how meager and partial was their understanding and enjoyment of this luxurious, variegated countryside. Not even crack infantry could stimulate into patriotic activity these vast, brooding pine-woods or moors with the spirit of [illegible] those drowsy heathlands and tranquil riverways. What they needed was the magic craftsman touch of the R. E. [illegible] Ask the [illegible] O. C. who [illegible] a whole countryside in quest of an ideal training ground for his brood of London sappers [illegible] most of [illegible] And since the work has developed to such a magnitude that to-day we are happy to call this busy colony of khaki labor what virtually it is—an Engineers' Paradise.

The time, then, is late July and early August of this year of the European conflict, and the place an extensive training ground of military engineering "Somewhere in Arcadia." And because the engineers have a utility and personality uniquely their own, and a certain Bohemian geniality of temperament withal, we will watch them at a work which, in its manifold nature and the sublime beauty of its setting, is surely epic.

First of all, there is headquarters—a solid, stolid Victorian country mansion, standing a little back from the main road. In pre-war days it is signified by the word home; a quiet, spacious, dignified mansion of the English countryside. Now you behold it a teeming hive of khaki organization, the brain and nerve centre of a system that develops a specialized worker into a versatile R. E. in the space of a few crowded months. Either side of the main hall is a veritable cluster of orderly rooms and company offices.

Deeper within, you see, is the O. C.'s sanctum sanctorum—rather, I should say, the door of it, for enter we may not, under dire penalty. Here are the vital cells, the very grey matter of organization, whereunto privileged, bestriped mortals repair with army forms of every known shade of color, but the mere sapper, alas! seldom or never, unless it be with a little buff crime sheet. Sad thought! Let us pass on to this spacious room here which was [illegible] in civilized days, a drawing room, dedicated to afternoon tea, pretty sentiments, and genteel reminiscences of last Sunday's sermon. Now, behold! an officers' mess, dedicated to scintillating somethings the battery balance on a tray, and sometimes, I fear, to piquant anecdote.

Upstairs you find the officers' quarters, and what sacrilege is here! [illegible], bare room, with camp bed and plank table littered with engineering manuals, drawing instruments, boots and a French novel [illegible] surely it once boasted under the style of milady's boudoir! Is it not desecration that the spurs of a jovial clanking militarist should echo where the gentle swish swish of the crinoline was once heard or the devastating tear of the hobble? Sacrilege, is it not, that a chamber once redolent of delicate perfumes, enchanted by the singing of milady at her evening toilet, should become a mere room reeking of Sam Browne polish and reverberating with such wealth of epithet as only a driver batman seems capable of enunciating?

However, love is love and war is war, and ever the twain are linked; so we will turn from this romance of Milestones to a large room bare of everything but forms, tables and a blackboard. This is the lecture room of the school, where young officers and favored N. C. O's. swot at their theory stunts, particularly one called [illegible] "Formula!" Oh, no. The N. C. O.'s [illegible] don't call [illegible] that. They, at least, are at liberty to show their contempt for the [illegible]

Formulae are anathema to the average N. C. O., let me tell you. Not even the [illegible] will reconcile him [illegible] hundreds of [illegible] floating bridge to carry a certain load. After the first hour's orgy of fractions, decimals, algebraical [illegible] N. C. O.

Before you [illegible] your gaze through the window, and reflect what solace this scene has brought to hundreds of formula-dazed ones. You see placid, sunlit lawns and rose standards, enclosed by shrubs and clusters of mature trees. In the spring those shrubs were flaming cascades of rhododendron bloom. Beyond you have a glimpse of the walled-in kitchen garden and orchard and adjacent meadows. The immediate impression is one of beauty and gaiety and repose. If ever a poet swotted here, be sure he often lapsed from an obsession of road-bearers, cantilevers and transoms into a Watteau reverie of vivacious garden parties and fair women, gliding with diminutive feet over the soft, smooth lawns.

A camp is a community of soldiers, and each soldier to-day is a man of parts. To-morrow, or the day after, we will march out with him to his trestle bridge in an old sandpit, or his trenches in a ducal estate, or his pontoons bridging the lowland river. All in good time—or khaki time, which is better still.—London Chronicle.

Men Wanted for the Navy
The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy
Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.
PAY $1.10 per day and upwards. Free Kit. Separation allowance, $20.00 monthly.
Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

Sleepless Nights
You can't sleep because the nerves are irritable and exhausted. Narcotics cannot give you any lasting help, but Dr. Chase's Nerve Food can.
It cures sleeplessness, irritability, nervous headaches, etc., by restoring vigor and vitality to the run-down and exhausted nervous system. The benefits obtained are both thorough and lasting. 50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Minard's Liniment Cures Garget In Cows.

Colors and Heat.

In an attempt to illustrate graphically the relative values for summer wear of different colors in dress materials, an interesting experiment was recently conducted. Four strips of cloth, made of the same material and weight, but of different colors, were placed on a cake of ice and exposed to the sun. The fabrics were white, yellow, red, and black. The result showed in a striking way how white reflects the sun's rays while black absorbs them.

The ice covered by the piece of white cloth was not melted to any appreciable degree during the test; that under the yellow strip was slightly depressed; a deep cut was formed beneath the red cloth, and a groove approximately twice as deep as that covered by the latter was melted under the black fabric.

IF ALL PLAYED OUT, TRY THIS PRESCRIPTION
When that overpowering weariness and a never-rested feeling comes over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health by pure wholesome blood.
The one sure means of doing this is with Dr. Hamilton's Pills. They are a marvellous aid to appetite—convert all you eat into nutriment and tissue-building material. Thus a weak body is supplied with new nerve fibre, hardy muscle and firm flesh. Lasting good health is sure to follow. If you really want to get well and stay well, use Dr. Hamilton's Pills, 25c per box at all dealers.

TAIL OF THE KING CRAB

It's a Real Life Preserver When the Animal Turns Turtle.

The king crab uses his tail for a life preserver. Probably you can't imagine what a sea animal wants of a life preserver. If you watch this creature long enough, either along the beach or in an aquarium, you'll find out. He's got a shield on his back and a long, spiny tail that looks as if it could be used as a weapon of defense.

Sometimes the king crab gets turned over on his back. His feet are all curled up in the shell, so he can't touch anything with them, therefore when he's on his back he's helpless.

This is where the long tail comes in as a life preserver. The king crab sticks the point of his tail in the sand and lifts himself until he makes an angle with his body. Then he swings sideways, back and forth, until with one final effort he flops himself over right side up at last.

Along the Jersey coast they reckon the beginning of summer by the king crabs. About the time of the full moon in June, they say, the king crabs come up on the sand to lay their eggs. Men and boys go down on the beach with wagons and shovels and scoop up the crabs by the bushel. Then they feed them to the country.

It is interesting to know, too, that the Indians used to point their arrows with the sharp, spiny tail of the king crab. They used the shell for a ladle. The French have given a name to the crab — casserole fish—because the shell looks like a saucepan.

TEN MINUTE COLD CURE RELIEVES ALMOST INSTANTLY
Nothing cures so quickly as the healing Pine Essences in Catarrhozone. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely sure for Catarrh, and in throat trouble it works like a charm. Catarrhozone is a permanent cure for bronchitis and throat trouble. Not an experiment but a temporary relief—but a cure that's guaranteed. Get "Catarrhozone" to-day and beware of dangerous substitutes. The dollar outfit is guaranteed, and small size 50c, trial size 25c, at all dealers.

An Unsolved Puzzle of Biology

It is one of the innumerable puzzles of biology that the number of eggs a bird lays seems to have such small influence on the abundance of the species. A royal tern lays one egg, rarely two, a gull three, a skimmer four to six. The gull eats the eggs of the other two, especially of the tern, so far as we know all have the same foes, yet the abundance of the birds is in inverse ratio to the number of their eggs. Of course, there is an explanation, but we cannot even guess at it as yet. With this, as with so many other scientific questions, all we can say is, with Huxley, that we are not afraid to announce that we do not know.—Theodore Roosevelt in Scribner's Magazine.

Minard's Liniment Cures Distemper.

Events That Pass Us By.

We can be but partially acquainted even with the events which actually influence our course through life and our final destiny. There are innumerable other events, if such they may be called, which come close upon us, yet pass away without actual results or even betraying their near approach by the reflection of any light or shadow across our minds. Could we know all the vicissitudes of our fortune life would be too full of hope and fear, exultation or disappointment to afford us a single hour of true serenity.—Hawthorne.

HELP WANTED.
WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.
WANTED—LADIES TO DO PLAIN and light sewing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars.—National Manufacturing Company, Montreal.

Origin of the Hackney.

The hackney horse has given quite a number of useful words to the language. He and his name came from Normandy, originally haquenee, really a corruption of the Latin for horse—and he was a riding horse. Being commonly hired out, the name came to be associated with hiring. And in course of time also with drudgery. To-day there are far more hackney carriages, within the meaning of the act, without horses than with. A literary hack is another form of the same name, and hackneyed is an obvious derivation from a common source.—Leeds Chronicle.

Minard's Liniment Cures Diphtheria.

National Emblems.

On the origin of the adoption of the thistle as the emblem of Scotland history is almost completely silent, but tradition is as glib as ever. According to one story, the Danes were stealing barefooted through the darkness towards the Scottish camp in spite of their rule which regarded a midnight attack upon an enemy as unwarrantable, when one of the soldiers suddenly trod upon a thistle. Involuntarily he uttered a cry of pain, and the Scotsmen, being aroused, leaped to their feet, hurled themselves upon the Danes, and inflicted fearful slaughter upon their foes.

The origin of the "wearing of the leek" by Wales is still a matter of archaeological disputation. Welsh ecclesiastical tradition ascribes it to St. David, who caused the Britons under King Cadwaladr to distinguish themselves by wearing a leek in their bonnets when they fought against the Saxons. Shakespeare, however, ascribes the origin to an incident in the Battle of Crecy.

Minard's Liniment Co., Limited
Yarmouth, N. S.
Gentlemen,—It affords me
pleasure and must be gratifying to you to know that after using
bottles of your liniment on a case of paralysis which my father was afflicted with, I was able to restore h
to normal condition. Hoping other sufferers may be benefited by the use of your Liniment, I am,
Sincerely yours,
GEO. H. HOLMES.

Minard's Liniment Cures Colds, Etc.

White-Washed Kerbstones.

Since the exigencies of war have made it necessary largely to eliminate street lighting in British cities, it has been found advisable in certain instances to white-wash the kerbs on either side of public thoroughfares so as to make it easier to discern the roadways at night.

At Norwich a pneumatic painting-machine carried on a steam wagon has been successfully employed for doing this work. The lime solution is forced through a hose under air pressure and directed at the kerb. A nozzle especially designed so as to prevent the spreading of the wash beyond certain limits is used. With this equipment the work can be done at a rate of about three miles an hour.

Plumbing supplies are needed in France.

"Beans Is Beans"
—and the cost is soaring skyward with pork, beef, eggs and other foods until the cost of living represents an increase of from 30 to 50 per cent. While meats and vegetables are beyond the reach of many millions of families, **Shredded Wheat Biscuit** continues to sell at the same old price and retains the same high nutritive quality. Shredded wheat biscuit contains all the rich body-building nutriment in the whole wheat grain, including the bran coat, which is so useful in keeping the bowels healthy and active. Eat it for any meal with milk or cream or in combination with fruits.
Made in Canada

FOR THE AVERAGE PERSON

By the sale of his pills, Sir Joseph Beecham, who died recently in England, rose from the obscurity of boyhood on a farm to become a knight and a baronet and the third richest man in England, with a fortune estimated at more than $140,000,000.

He accomplished this by advertising, having been for a generation or more considered the greatest buyer of newspaper, billboard and fencerail space in the world. He advertised on every continent, including Greenland. His own picture, a strong, reliable face with side whiskers, usually accompanied the text recommending the pills.

Beecham's methods of advertising were often original and audacious. He delighted in the commotion when his advertisements shocked communities and were denounced as vulgar. The exploitation of his pills through the medium of a hymn book has become historic. He circulated at low prices a number of hymn-books just before Christmas so that when a number of congregtions got up to sing on Christmas they found the following words before them:

Hark! the herald angels sing
Beecham's pills are just the thing,
Peace on earth and mercy mild,
Two for man and one for child.

Beecham was at work in the fields at the age of eight years. He might have been an agriculturist to the end of his days except that, as a small boy, he took a deep interest in the ailments of farm animals and the compounds with which the cure was attempted. He grew to be an amateur veterinarian and, in treating live stock for a few years, acquired the experience and knowledge of medicine which he later applied to the human race. He quit the farm at about twenyt years and began to travel, peddling pills of his own manufacture. He soon learned the power of advertising, and after that let paint and printers' ink do his work.

He soon had praise of Beecham's pills in most of the periodical reading matter of the civilized world, and a few years later it became impossible in any part of the British Empire or the United States to travel on country roads or on the railways without seeing Beecham's advertisements on rail fences. A few of the high-priced periodicals did not receive the advertisements because the best customers were drawn, as he explained on a visit to this country in 1912, from the poorer middle classes and the working people who did not want to pay a doctor for treating slight ailments.

"But," added Mr. Beecham, "my pills are taken by dukes and lords, who conceal the fact from their family doctors. I have positive evidence of this. Medical men take them on the quiet, too."

After he had become one of the richest and probably the most widely-known Englishman living, the pill manufacturer made a liberal use of his money, contributing to large philanthropies backing popular causes and buying the Aldwych Theatre and other larger amusement properties. He was thrice Mayor of St. Helena between 1899 and 1912. He has been used again and again by novelists, notably by Locke, in 'Simple Septimus." He was knighted in 1911 and made a baronet in 1914.

NEW BOOKS

"The Leopard Woman," by Stewart Edward White (Musson Book Co., Toronto, $1.35).

Linking native Africa with the titanic warfare of Europe, Stewart Edward White has given to fiction-lovers in his latest creation, "The Leopard Woman," a decidedly well written and highly entertaining novel. Not, possibly, because of any particular brilliance of rhetoric, but more through the force of a well-swung story, with a plot not outrageously impossible.

The opening chapters deal, in a far more interesting manner than one might expect, with the country and some of its natives, also introducing the main male character of the narrative. Outwardly an ivory hunter, he is in reality a British agent, sent by higher authorities to make peace with interior tribes n case of an outbreak among the English and German of the country. His way is through supposedly unknown land. He comes across, though, a young woman, attended by a large force of natives and although surprised, is able to assist her when a terror-stricken rhinoceros scatters her party and leaves her in the way of the brute. Each endeavors to ascertain something of the other, but fails, separating. Another chapter brings the reader to a second meeting, under still more trying circumstances for the lady. Her party refuses to move until water is found, and with native obstinacy puts it up to the lady to find it. Into the interior, the two continue their way, striking the quarters of a tribe, which detains them for several weeks as a course of hospitality.

It is while here, after overcoming a wild infatuation for the strange woman, known as the Leopard Woman by now, and through discovering a map of the route head, heretofore considered unknown, that his suspicions awake. Delay after delay takes place to hinder the progress of his party. Events happen quickly. Blindness takes him and he is apparently at the mercy of the woman. A murder in his tent, by which one of his followers is speared while wearing his khaki coat, brings the revelation from the woman that she is working to delay him so that another German agent can reach the far-away tribes first from another direction.

A slight check allows him to ascend the situation. He secretly sends two trustworthy natives to lure the German agent by a highly-prized portion of newly-discovered material. In the meantime he has endeavored to restore his sight by using certain antidotes for blindness. With other vital poisons in the chest, he is unable to secure the right bottle. The woman refuses to read the various labels. He finally induces his servant to mark out the characters on the earth, but the bottle is dashed to pieces by the Leopard Woman.

It is when she witnesses him in blindness striking forward again despite the knowledge that unless he returns and secures treatment at once he will become permanently sightless, that the Leopard Woman displays her nature. The capture of the German agent by the natives and the arrival of the blind man at the tribal quarters first lead to a conclusion a story that is far from depressing, as most war novels are, and with the Leopard Woman striking her true role as an Austrian Countess and the sight of her companions restored, a happy climax is given.

"The Leopard Woman" is a fascinating book. It is not a brilliant study. It is fiction for the average reader—the kind which once started one does not desire to relinquish until the final chapter is read.

THE QUESTION

Nov. 19, 1916.

Dear Sir,—Will you kindly tell me something about Alaska, which, it seems to me, should be a portion of our Dominion. Yours,

British Born.

Alaska, first known as Russian America, was explored in 1741 by Russian officers. Settlement of Kodiak, in the Gulf of Alaska, was effected in 1762, twenty-one years after it was discovered. Captain James Cook, in 1778, made surveys, from which the first chart of any accuracy was published. It was Vancouver, though, in 1793-4, who made the first charts of the intricate southeastern coast, these being superseded merely recently. Owing to excesses committed by private traders and companies, who robbed, massacred and abused the native Indians, trade and regulation of it were left to a semi-official company, the Russian-American Company, for twenty years. In 1821, Russia endeavored to exclude navigators from Behring Sea and the Pacific coast of her possessions, leading Great Britain and the United States to protest. Treaties were signed, after which explorations were launched for a proposed telegraph overland from the Amur River in Siberia to Behring Strait, then through Alaska to British Columbia. Work on this continued for three years, but the success of the Atlantic cable made it unnecessary. Official overtures were made by the States for the purchase of Russian America and in 1867 the deal was consummated, the price being $7,200,000.

THE STAGE

"There never was a time when the theatre had greater or more urgent need of good plays," writes S. Morgan-Powell, of the Montreal Star. "By 'good' I do not mean the sort of play which would be certain to win the imprimatur of the Puritanical and the one-eyed, who can see nothing good in anything that does not coincide with their own narrow viewpoint. I am rather inclined to think that the type of play such people endorse is fairly safe of classification in the worthless class.

"As matters stand, how can anybody hope to see plays worth while coming in increasing numbers when the trashy musical revue draws $15,000, and the clever, well-written play with a theme only draws $3,000 or $4,000 by comparison. If the public likes trash it will get trash in ever increasing quantities. The producer will cherish his cash box and let his ideals lie where most of them have been flung long ago—in dusty cupboards.

"It is all very well to talk about redeeming the stage, restoring the drama to its proper function as an educative force in the nation, encouraging the modern dramatist with ideas, purifying the theatre, and exercising home influence, through drama leagues and other nebulous organizations which meet seldom and do nothing, but so long as the theatre-going public continues to say 'Yes, quite so,' and continues to lend its practical—that is to say, its cash—support to trash, to cheap, nonsensical, vulgar entertainments, so long will all this talk melt into thin air and be barren of result."

The plays of the day in New York treatres are: "Treasure Island" at the Punch and Judy, "Seven Chances" at the Belasco, "Cheating Cheaters" at the Eltinge, "Turn to the Right" at the Gaiety, "The Big Show" at the Hippodrome, "The Flame" at the Forty-fourth street, "Pierrot the Prodigal" at the Little, "Nothing But the Truth" at the Longacre, "The Man Who Came Back" at the Playhouse, "Pollyanna" at the Hudson, "Arms and the Girl" at the Fulton, "Upstairs and Down" at the Cort, "His Majesty Bunker Bean" at the Astor, "Rich Man, Poor Man" at the Forty-eighth street, "Backfire" at the Lyceum, "Under Sentence" at the Harris, "Fixing Sister" at the Maxine Elliott, "The Music Master" at the Knickerbocker, "Come Out of the Kitchen" at the Cohan, "Object—Matrimony" at the Cohan & Harris, "Major Pendonnis" at the Criterion, "The Basker" at the Empire, "Old Lady 31" at the Thirty-ninth street, "Der Gatte des Frauleins" at the Irving Place, and the Washington Square Players at the Comedy. The musical plays which are still on view include "Flora Bella" at the Casino, "Miss Springtime" at the New Amsterdam, "Betty" at the Globe, "So Long, Letty," at the Schubert, "Go to It" at the Princess, "The Show of Wonders" at the Winter Garden, and "Good Gracious, Annabelle," at the Republic.

Julia Arthur opened her new production, "Seremonda," at Broadway Theatre, Long Branch, N. Y., a week ago to-day. In another week Miss Arthur will take "Seremonda" to New York city. It is the largest purely dramatic organization of the season, taking three cars to transport the equipment alone. The cast includes trained singers, dancers, vaudevillians and musicians.

Klaw & Erlanger and Geo. C. Tyler are presenting George Arliss in Sir James Barrie's play, "The Professor's Love Story."

POETRY

VIRTUE.

Sweet day, so cool, so calm, so bright!
  The bridal of the earth and sky—
The dew shall weep thy fall to-night;
  For thou must die.

Sweet rose, whose hue angry and
    brave
  Bids the rash gazer wipe his eye;
Thy root is ever in its grave,
  And thou must die.

Sweet spring, full of sweet days and
    roses,
  A box where sweets compacted lie,
My music shows you have your closes,
  And all must die.

Only a sweet and victorious soul,
  Like seasoned timber, never gives;
But though the whole world turns to
    coal,
  Then chiefly lives.

George Herbert.

THE MOVIES

Sessue Hayakawa, Japanese star, and Myrtle Stedman are nearing the completion of the Lasky-Paramount production of "The Soul of Kura-San." The scenes of this photdrama, that were laid in Japan, were made by members of Mr. Hayakawa's Japanese stock company, which will soon open its winter engagement at his playhouse in Los Angeles.

The Brooklyn Eagle, commenting upon the heavy vote polled by Governor Whitman in his contest for re-election, gives a large measure of credit for this to the "movie" campaign, which was carried on in his behalf in the motion picture theatres of New York.

By an arrangement effected this week, Frank McIntyre, tht celebrated comedian, will make his debut on the screen under the auspices of the Famous Players Film Company in a picturization of his greatest stage success, "Tht Traveling Salesman," by James Forbes.

"Panthea," the drama that created a furore in Europe and America when presented by Mme. Olga Petrova, has been chosen as the vehicle for Miss Norma Talmadge in the first of her Selznick-Picture productions.

The New York photo-play spectacles which continue are: "Intolerance" at the Liberty Theatre, "A Daughter of the Gods" at the Lyric Theatre, and "The Masque of Life" at the Park Theatre.

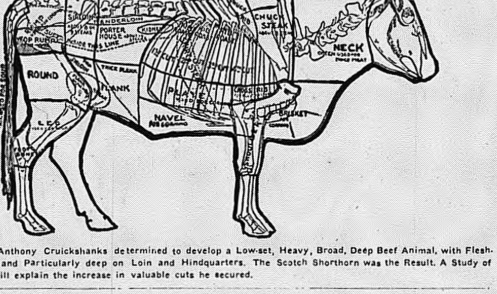
HOW AND WHY BEEF BREEDS WERE DEVELOPED

Bakewell First Practised Selection, Then the Brothers Colling Developed the Shorthorn, After That Came Other Breeds. Why Pure Blood in Any Herd Brings Profits To-day.



Amos and Anthony Cruickshanks determined to develop a Low-set, Heavy, Broad, Deep Beef Animal, with Fleshing Smooth and Particularly deep on Loin and Hindquarters. The Scotch Shorthorn was the Result. A Study of this chart will explain the increase in valuable cuts he secured.

The development of special breeds of domestic animals began in the latter half of the 18th century (1750-1800). Before that remarkable epoch, man had made no steady effort to improve the natural types of animals beyond what coud be accomplished by improving on nature in supply of food and shelter. Robert Bakewell first worked out the fundamental principles of scientific breeding, in establishing the Leicester breed of sheep. He showed that, by selecting the best as mates in breeding, the offspring could be secured that were superior, not only to the parents, but to any of their ancestors. Individuals of similar good qualities, if bred together, produced those qualities in greater accentuated degree in the offspring. By continuing this process of breeding like to like he evolved a fixed breed of improved sheep. This rule was applied by Bakewell and by others in other lives tock improvement, to the extent of breeding members of the same family or blood line, calledd line breeding, and of breeding close blood relations for successive generations, called in-and-in breeding.

The important lesson to be derived from the creation of breeds is that only animals of good qualities should be used for breeding, and that this is particularly important in the case of the male, a fact which is becoming widely recognized to-day. It is important also to note the intensity of the qualities bred into the animals resulting from a century of pure breeding. One of these animals, when bred to another of mixed or no particular breeding, will produce offspring more closely resembling itself than the other parent. From this fact arises the value of such pure bred animals for improving or "grading up" the common, scrub or ill-bred farm animals too generally found. Thus, by using a bull of good qualities and ancestry, the whole herd is, in one generation, greatly increased in value, at a medium of cost.

ARCHITECTS OF THE SHORTHORN.

Toward the end of the 18th century the brothers Colling applied the new principle of selection of mates to the common cattle of the north of England, found in the Teeswater district, and established the Shorthorn breed of cattle. They and others in the first fifty years of improving this breed worked first for the improvement of the beef type and yield but with an eye also to maintaining their natural milking capacity. Before the middle of last century, two English breeders of different ideals evolved two types of Shorthorns. Bates secured improvement in both beef form and milking qualities, aiming at the fitness of bone, head and style. Booth regarded beef form as of sole importance, and was aware that its further development could be secured only by neglecting the milking propensity. He sought to fix in the breed the attributes of deep flesh, breadth of back, depth of quarters and large girth, especially at the fore flank, to give vigorous constitution.

Importations into Canada and the United States at that period were perhaps more largely of the Bates, or milking type, and their influence is seen in the good milking and beefing qualities combined in the common herds of Ontario, New York State, Ohio, and other eastern sections of the continent.

The later development of the Shorthorn by its foremost breeders was in the direction taken by Booth. Amos and Anthony Cruickshanks, of Sittyton, in Scotland, were the most prominent of these exponents of Shorthorn type. Attracted by the early maturing and heavy fleshing qualities shown by good examples of the breed, they established a herd. The Shorthorn breed as revealed in the show rings of three continents to-day is pre-eminently the "Craick-Shanks" Shorthorn. It is low-set, heavy, broad and deep—in a word, the parallelogram in form. The flesh is deep, especially on loin and hindquarters. The legs, head and neck are short and refined. The coat is covered thickly with fine, mossy hair. In color, red, white and roan are found. Summed up, the Cruickshanks or Scotch Shorthorn differs from its English ancestry in being more positively and more exclusively a beef animal, more deeply fleshed, with great refinement and symmetry, and with no pretensions to milking capacity. Other qualities stamped into the breed by these noted men are rapid and early maturity and strong constitutions. In fact, the things sought for most persistently by them were, in order, constitution, deep wealth of flesh and rapid growth to maturity.

ENGLISH SHORTHORNS ARE HEAVY MILKERS.

All practical farmers do not agree that this is the ideal Shorthorn. Many insist that the farmer's herd must more than pay its way with milk and that the combination of good beefing and good milking qualities is essential for profitable results.

For such farmers there exists still a source of good stock, in the splendid milking Shorthorns of England. These are large, squarely built and thrifty, comparing well in milk production with most purely Dairy breeds, yet producing calves capable of highly profitable feeding for beef. In fact, most of the farms of northern and middle England are stocked with milking Shorthorns of this type.

Next to the Shorthorn in order of favor, in the United States and Canada, is the Hereford. This also is an English breed, originated from the native cattle in the west of England, and accustomed to sparse, hilly pastures. On this account they make hardy "rustlers" for forage(and so are favorites on the Western ranges. They are somewhat slower in maturing than the Shorthorns, but not faulty in this respect, and are relatively less heavy in the hindquarter than in forequarter. They are very strong and well fleshed in the back, and the marked development of the chest and heartgirth indicate marked constitution and pronounced ability to give their qualities to their offspring when crossed with common cattle. They are rather inclined to coarseness, however, and to a deficiency in development of the hindquarter. In color they are of a deep cherry red, marked by white face, the white extending down throat to dewlap and usually to hind flank and twist.

THE HARDY POLLED BREEDS.

The Aberdeen Angus is purely Scotch in origin, and is especially distinguished from the two English breeds of beef cattle by being polled or hornless, black in color and cylindrical rather than square in general form. Their chief distinction in utility is the fine quality of their flesh and the small proportion of waste on the block. Longer of body in proportion than the English breeds, they are heavily developed in the hindquarter, fine of bone, short and fine haired, smoothly fleshed throughout, and finish without roughness or excess of fat internally or in patches between skin and flesh. Where well "marbled" flesh of finest quality brings a relatively high price, the Aberdeen Angus is most profitable. They are smaller at maturity and slower in maturing than are the English breeds, however. Like the Scotch Shorthorn, the Angus is an inferior milker.

Like the Aberdeen Angus, the Galloway is native Scotch, polled, black and fine in quality of flesh. It is smaller, however, and lower set with more of the parallelogram shape characteristic of the Shorthorn. It has a heavy coat of long, mossy hair, and is proportionately heavier and sturdier of bone than the Angus. Galloways are rugged and hardy, accustomed in their development to severe winters with little shelter, and to scattered, scanty pasture.

The Red Polled of southern England, being a dual-purpose breed, combines, as one would expect, the characteristics of the beef and dairy types. In form it is very similar to the Aberdeen Angus, though less pronounced in the development of those parts most desirable from the butcher's standpoint. In reality it is not so popular for its double purpose as are the milking Shorthorns; the latter being superior milkers, while larger of body and giving a frame which yields more beef when finished.

The Highland cattle are not regarded as a utility breed, being small and slow of maturing. Like the Galloway—but more so—they are rugged and hardy foragers, yielding meat of a very fine quality. They are a mountain breed, as the name indicates, and are small in body and of very rugged constitutions.

Be a Judge—Know Your Animal.

For facility in judging beef animals whether pure bred or not, certain rules may be summarized with advantage. It should be noted that bulls cows and steers have characteristic differences in form which show a variation in details given, and that young animals of various stages of growth exhibit development of the characteristics of maturity in lesser and differing degree. The recognized table of points for beef animals should be studied as the basis of self-training in judging beef cattle. The ability to judge skilfully is an accomplishment of value to any farmer.

It is important also to keep in mind the correlation of the parts of the body when buying or selling breeding animals, or when choosing a bull from one's own herd for breeding. This correlation is no less important in stockers or steers for feeding, and in the finished beeves. The bull, for instance, must have pronounced masculinity, as his prepotency or ability to give his offspring those excellent qualities he may have, depends upon the vigor which is indicated by the massive, crested neck and head, the deep and wide chest and quick active movements. The cow especially must be of full width between hooks and pin bones, depth and width of chest, and largeness of barrel; which indicates the power of maternity and the good feeding capacity. The steer to be a good feeder, must be refined in bone, short and fine of neck, with small head, broad back and without unduly prominent hook bones or spinal column. The coarse, large head, large horn and long neck indicate a slow, wasteful feeder. Large, coarse bones will yield poorly in the proportion of valuable parts at slaughter.—**Canadian Countryman.**

It's all right to be natural, but even the man with false teeth isn't apt to envy the man who suffers from toothache.

MAY MEAN NDW BREED OF BEIR

Lineman Put Orphan Flicker in Robin's Nest.

Lives as Robin, Will He Continue So?

Saginaw, Mich.—Bird lovers and nature students in the section of Saginew centering around Fordney Park are deeply interested in a problem involving nature and environment produced by the hatching of the egg of a golden-winged woodpecker or flicker in a robin's nest. The conduct of the bird is at present furnishing much encouragement to those who believe with Dr. Kellog that environment determines the life conduct of the individual, but believes in the theory that natural instincts will in the end dominate say: "Hold on, wait until the crisis of the mating season is passed and you'll see," and their only trouble is going to be to trace the bird through the period of migration and keep track of it for another year.

Last spring a pair of flickers dug a hole in an oak stub in a field just beyond the city limits of Saginaw, and built therein a nest. Just as the female bird began the job of family raising, and on the day she laid her first egg, along came a boy with a small calibre rifle, and lacking any other mark, tried his accuracy of aim on her. The result was a widowed male bird and a broken home with one embryo flicker in it.

LINEMAN SAVES EGG.

The boy passes on and has nothing more to do with the story. Not so the egg. A telephone lineman working nearby saw him shoot the bird, and knowing where the nest was, climbed the stub and securing the egg carried it home. That night he placed it in a robin's nest that happened to have been just built in a thornapple tree in his back yard, and leaving it to take its chances with its new foster parents gave it no more thought for several days. There were three robin's eggs in the nest when he put the flicker's egg in it and when he next ascended the tree to have a look at the eggs he found four young birds in the place of them, and one of them plainly not a robin.

All through the nestling period he watched the birds, and the story he told his neighbors excited their interest. The result is a rather close life history of this particular flicker, which thrived on robin fare, and in due time left the nest with its foster brothers and began taking lessons in the hunting of its own food and the thousand and one things necessary for a bird to know to make its way in the world. And the lessons were all robin lessons and the schooling in life robin schooling.

To all intents and purposes the flicker was a young robin and is today. He has spent the summer with his foster brothers under the care and attention of his foster parents and eaten robin food hunted and secured after the manner of robins. He has learned to like cherries, apples and pears, hunted and found earth worms and dragged them from their holes, and has been daily observed doing things exactly after the manner of his instructors. Not once has he been seen to light on the side of a tree or attempt in any way to live the life of a flicker. Now that fall is at hand and the migration period of the robins approaching, he is seen consorting with a flock of robins that is gathering preparatory to flight southward. New members of the flock seem to resent his presence at times, but his own family accept him as though he were garbed as are they, and he appears to be content with their company.

The lineman whose meddling with the family affairs of the flicker and robins produced this muddle believes the robins will all come back to this section of Saginaw, and insists the foster parents of this flicker have reared a brood of young in the thornapple tree in his back yard each year for four years. He is very anxious to mark the flicker so that he will be able to identify him next spring in case he returns and his tried many schemes to capture the bird, but so far has failed in all attempts. There are others familiar with the bird who will be pleased to see some mark put on him by which he can be recognized in case he returns next spring. Especially is this true of the ones who believe that the mating season will see his return to, or rather his assumption of, the habits and life of a flicker. If he returns and settles down with a drab colored robin wife in a nest built in an apple tree, the adherents of the Kellog theory that environment is everything will certainly have cause to consider the theory justified, and this can be determined regardless of marks.

It may be—is just barely possible—that the kindly act of a humble lineman is to give to America new species of birds, a general utility breed capable of getting and eating all kinds of grubs and insects and living on fruit in seasons when insects are scarce.

* * *

Mourning Friday.

It was not always called Good Friday. Years ago in Germany it was frequently referred to as Mourning Friday. Our early ancestors in England did not call it Good Friday, either, but Long Friday. Such is the term in an ancient ecclesiastical law about 1,000 years old. The Danes used the same name, Long, instead of Good Friday.

The reason for using the word "long" was doubtless found in the seeming endless and severe fast practised that day. At one time the Spaniards emphasized the solemnity of Good Friday by closing all the churches.

Nowhere else that I have happened to be on a Good Friday was the day so solemnly observed as in Rome. The city seemed to be in mourning, making all the more inspiring the matchless services and singing in St. Peter's Cathedral at Easter.—Philadelphia Ledger.

I wish to be profoundly learned, and should like to comprehend what is upon earth or in Heaven, science and nature.—Goethe.

Authoress Is American, But Aids the Allies

(From a Seattle Exchange.)

Miss Elizabeth Banks, journalist and author, arrived in Seattle yesterday. She recently came from England on the Allan liner Grampian. She made the journey through Canada over the Grand Trunk. She was captivated with the scenery along the route, and expressed herself eloquently about the beauties of mountains and lakes she viewed on her journey.

Miss Banks, while an American, is heart and soul for England and its soldiers. She has written and published a set of stories of dogs that have been heroes in the trenches, and given all the returns from the sale of these booklets to the wounded of the allies. One of the dog books—"Dik, a Dog of Belgium"—has earned $1,000. The others are equally industrious in the cause. Very popular, indeed, with soldiers at the front is her story of "Sergeant Major of Canada," a British bulldog, that went from Saskatchewan as mascot for a Canadian regiment.

HAD NEWSPAPER TRAINING.

Miss Banks was born in New Jersey, educated in Wisconsin, and started her newspaper career as society reporter in St. Paul. She is author of "In Cap and Apron," "Campaigns of Curiosity," "The Autobiography of a Newspaper Woman," "The Mystery of Frances Farrington," "The Luck of the Black Cat," "An Englishwoman in New York," and the dog stories mentioned. She has been London correspondent for America dailies, and is a contributor to magazines on both sides of the water.

Her first introduction to Washington life was listening to Judge Turner's keynote address at the Hippodrome yesterday. She then visited the Women's Democratic headquarters and interviewed the leaders there.

IMPRESSIONS OF NORTHWEST.

Miss Banks, at the Hotel Calhoun yesterday, gave the Post-Intelligencer the following "impressions" of her first day on the Pacific Coast, in a state where women have been granted the equal privileges for which Englishwomen have fought so strenuously.

"I wanted," said Miss Banks, "to talk with some of my countrywomen who will have a vote at this presidential election, and that is one of the reasons I came over to Seattle. Now, of course, coming directly from England, where the one and only thing of importance at the present time is to get on with the war, it is the natural thing that I should wish to know how the women voters of the United States feel on the subject of being prepared. I have often heard it said that American women, if given the vote, would vote almost solidly against a large army or navy—that women as a sex are for peace at any price. I have resented this accusation as an insult to the intelligence of my sex. I have contended that women, having so much to suffer by war, would be anxious to do whatever would most surely defend the country from invasion, and I believe there is no safety for the United States except the safety that comes from being strong in both the army and the navy. I believe in national service for every man and every woman. If England had had national service years ago she would have insured the peace of Europe. If the United States and Canada now had national service they would insure the safety of the whole western continent.

DISAPPOINTED IN WOMEN.

"Well, I have had a talk with some of the leading women of the Democratic headquarters since I arrived in Seattle. I have asked them how they stood on the preparedness question, and they have assured me that they don't stand on it at all; that they believe preparedness means war, and they tell me that they speak for the majority of the women voters of Washington and of the United States in this respect. This has been a surprise and a disappointment to me—almost a shock. I was a keen believer in equal suffrage, but I want to say this: If it is true that the women of the United States are against national preparedness, then I hope the men of other states will refuse to give the vote to any more women until the women are made to understand the terrible necessity of preparedness. Why, when I hear women talking as though this great war had nothing to do with them; when I note their attitude as onlookers merely; when they talk as outsiders of this war which the Allies are waging in behalf of all that is worth living for, a horrible fear comes upon me that perhaps the only way they will be able to understand what this war means for the liberty of women as well as of men will be by a foreign invasion of this country.

"I don't understand how any woman who believes in the dignity of womanhood, in good comradeship between men and women, to say nothing of equal suffrage, can be anything but bitterly anti-German, and working with all her heart and soul for the success of the Allies. Personally, I feel that as a woman and as an American citizen I owe a debt of gratitude to every soldier in the allied army, and since my visit to Canada I have been made happy and proud by the knowledge that thousands of American citizens have gone across the border and joined the Canadian army. God bless those American boys! I intend to see to it that they do not lack for warm socks and chocolates next year over there in France.

CANADA A REVELATION.

"And speaking of the Canadians: This has been my first visit to their wonderful country. Of course I knew that Canada was a large country, but until I took my trip from east to west, from the Atlantic to the Pacific, and met hundreds of Canadian men and women in their homes, in their offices and on their farms, I had no real understanding of Canada as the great nation that she is. The Canadians seem to me very much like the Western Americans in their freedom from shams, their democracy, their lack of the class and caste system, and I have observed so close and sympathetic a feeling of the Canadians for Americans and of Africans for Canadians that I am convinced that no serious trouble or disagreement could ever occur between the people of these two countries. Politicians may at times try to stir up trouble, but they will not succeed. The people of Canada and the people of the States are brothers, children of the same great mother."

GETTING LITERARY MATERIAL.

Miss Banks will return to Prince Rupert, stopping at Victoria and Vancouver, the last of the week, and will go from Toronto to Detroit and Chicago, in which latter city she expects to spend election day. Her mission to Canada and the United States is to write articles for the London Daily express, for which paper she is a special correspondent under the name of "Mary Mortimer Maxwell," and to gather material for a book of impressions about Canada. She also expects at the conclusion of the war to have completed a novel the chief scenes of which are laid in the farm lands of Canada.

She will return to England about the first of December, sailing, as she declares, by a British ship under the British Jack, to show her independence of the Kaiser, who has advised Americans to travel by their own lines. She says that the greatest insult any one could do her would be to call her a "neutral," and that she is not a "pro" of any sort.

Had Severe Cold
ON HER LUNGS.
RAISED PHLEGM AND BLOOD.

Never neglect what at first seems to be but a slight cold. You think perhaps you are strong enough to fight it off, but colds are not so easily fought off in this northern climate, and if they are not attended to at once will sooner or later develop into some serious lung trouble such as bronchitis, pneumonia, and perhaps that dreadful disease, consumption.

Miss Kasye McDonald, Sydney Mines, N.S., writes: "Last winter I contracted a severe cold, and it settled on my lungs. I would cough and raise phlegm and blood. I had the cough for a month, and had medicine from the doctor, but it did not seem to do me any good. I really thought I had consumption.

My friends advised me to use Dr. Wood's Norway Pine Syrup, which I did, and it gave me great relief. I am very glad I used 'Dr. Wood's,' and would recommend it to every one."

You can procure Dr. Wood's Norway Pine Syrup from any druggist or dealer, but be sure and get "Dr. Wood's," when you ask for it as there are a number of imitations on the market, which some dealers may try to palm off on you as the genuine.

See that it is put up in a yellow wrapper; three pine trees is the trade mark; price 25c. and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review

Toronto.—Ante-holiday trade is much better than it was last year. Price advances are general in nearly all lines. Dry goods lines continue to be very active, and sorting orders are keeping wholesalers busy. The revision of dry goods prices this week has been extensive, but it does not appear to have affected business to an appreciable extent. Groceries are active, and dried fruits and canned goods especially are firm and higher. Sole leather is very firm, and the harness trade with the West is quite active. Labor shortage continues to curtail the output of local industries.

Montreal.—Dry goods, boots and shoes, millinery and furniture are all active. Foodstuffs are firm, and canned goods promise to be scarce throughout the winter. All available labor is busily employed; money is fairly plentiful, and remittances are reported to be good. November dry goods payments were very satisfactory.

Ottawa.—There is no change in the intrinsic situation. There has been unusually heavy early Christmas buying. Money is quite plentiful and commercial obligations are reported to be fairly well met.

Hamilton.—The early Christmas trade has been more active than has been experienced for several years. The large volume of buying for shipment overseas has furnished a considerable proportion of the early shopping. Retail firms are endeavoring to stimulate this early trade, and with staple winter commodities moving out freely, trade is very active generally. All labor is busily employed, and local industries are limited in their outputs only by the capacity of their plants and the supply of help at their disposal. Rising prices of iron and steel on United States markets have made the local situation even stronger.

London.—Country trade is very good, with the demand for dry goods, leather goods and groceries most pronounced. Boots and shoes are active at high prices, and travellers are sending in large spring orders. Prospects are good for a Christmas trade much better than that of 1915.

Winnipeg.—The wheat market is stronger than at any previous time in the season, and if export demand from Great Britain continues, there is every prospect that still higher price levels will be reached. The mercantile trade situation is reported to be good, and prices are higher in most staples of hardware, dry goods, etc. Steel goods are almost prohibitive, and coal shortage, both bituminous and anthracite, is felt here. There is a good country trade, and money seems to be plentiful.

Calgary.—The trade situation both locally and throughout the province as well is quite good, and the outlook is cheerful. There is a good feeling in all trade circles. Winter staples are selling well, with woollens, cotton goods, harness, boots and shoes, and hardware lines being particularly good. Payments are good.

Vancouver.—Optimism is prevalent in trade circles in British Columbia. Export trade to the United States and to Eastern Canada is holding well. Reports of the lumbering industry show very large returns. Mercantile trade is active, and there is general confidence for the future.

Quebec.—Business as a rule is in a healthy condition. The turnover for the year has been satisfactory. Wholesale dry goods report orders ahead of this time a year ago, shoe conditions are unchanged, factories are well employed. City trade is active. Collections as a rule are fair.

Sick Headache and Biliousness
CURED BY
MILBURN'S
LAXA-LIVER PILLS.

Mrs. Willard Tower, Hillsboro, N.B., writes: "I have suffered something awful with sick headache. At times I would become bilious, and would have severe pains in my stomach after eating, and have a bad taste in my mouth every morning. I told some of my friends about it and I was advised to use Milburn's Laxa-Liver Pills. This I did and they cured me."

When the liver becomes sluggish and inactive, the bowels become constipated, the tongue becomes coated, the stomach foul and sick and bilious headaches occur.

Milburn's Laxa-Liver Pills clean the foul coated tongue and stomach and banish the disagreeable headaches.

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

BRACEBRIDGE butchers have jointly agreed to adopt the cash system.

+ + +

THE Farmer's Advocate says the way to avoid the high cost of living is to stop living so high.

+ + +

THE passing of the cheap cigar is predicted—or rather the "cheap" cigar will remain, but it will cost double the money.

+ + +

THE Ingersol Daily Chronicle has gone out of business, the steady advance in cost of production exceeding the revenue by too great a margin.

+ + +

THE Buffalo newspapers have advanced in price from one cent to two cents a copy. The increased cost of white paper and other materials is given as the cause.

+ + +

THE Department of Agriculture has issued a bulletin relative to poultry raising, in which a warning is given particularly as to selling off pullets, also marketing birds that are not fat. The pullets are needed for egg production and the lean fowl are reducing the price of poultry. Profitable poultry raising should be the aim of those keeping flocks and those who get rid of their pullets now will likely miss the best egg selling period of the century.

+ + +

"IF IN what has been done or in what remains to be done there may be anything which in our judgment should be differently done, we take no exception, we offer no criticism so long as there is danger at the front.' The above statement from a speech made by Sir Wilfred Laurier in 1914, is being quoted by Conservative papers in an effort to cast reproach upon the Liberal leader. Surely no self-respecting Canadian would have asked Sir Wilfred Laurier to be silent while the Government permitted such misappropriations of public moneys as have gone on. The Government has not on a single occasion taken the initiative to punish grafters and war time profiteers. None of this rottenness would have been brought to public notice but for the Liberals. Garland and Foster would have still been in the drug and horse business; Allison would have been a Croesus over again; Sir Sam Hughes would have been free from criticism; all would have been merry as a marriage bell with the profiteers. Sir Wilfred Laurier expected honesty and fair dealing when he offered the Government his support. He was ready to give way to Government policy but to dishonesty. The Government did everything possible to alienate this support and no statesman of Laurier's calibre could have condoned its actions and maintained his place as the leader of the Liberal party. Laurier's confidence and co-operation were betrayed almost as soon as given.—London Advertiser.

+ + +

MR. N. W. Rowell, leader of the Liberals in provincial affairs, is not a sidestepper. In all his speeches he is clear and pointed. This probably was never better emphasized than in his address at the general meeting of the Reform Association in Toronto on November 24th when he said "men might honestly differ within the ranks of the same party, but there is one thing I am sure of and it is this: that it is the conviction of the people of this province that while there is room for difference of opinion, there is no room for wobbling of public men on public issues of the utmost moment, and we would deservedly forfeit the respect of the people if on great matters of public moment on which we had taken a stand and pledged ourselves, we did not stand to our pledges and carry them out to the letter. So long as I remain leader of the Liberal party it is my intention to keep faithful to the people of this province, and to what I have pledged myself I will stand. The people will settle the temperance matter for themselves when they have an opportunity to do so." Further, Mr. Rowell declared that with this question settled they would then have to press forward to deal other large issues affecting the welfare of our agricultural interests, affecting the welfare of our industrial population, believing that the highest call to every man to-day, whether in public life or private life, is to the best of his ability to serve his fellowmen, to make life a little easier the way a little smoother for those who find life difficult and many obstacles in the way, to extend a helping hand to those in need, and by all the ability and energy God has given us seek to make the province what her natural resources and the character of her people intended to be—a great province in our growing and expanding Dominion."

WHO will be the candidate for the Liberals in North Bruce is a very absorbing question at the present time. Among the names mentioned are Messrs. Alex McConnell, Saugeen; A. P. Mewhinney, Bruce; Ald. Kastner, Wiarton; Ernie Campbell, Hepworth; D. J. Izzard, E. Roy Sayles, Port Elgin; Archie McLean, Bruce; James Malcolm, F. E. Coombe, Kincardine. This is a fine array of good men, and if we were guessing it would be hard to say which of them would be the choice of a convention to fight Hugh Clarke, M. P. Just here it might be said that a number of them could not be induced to leave their business interests for politics.—Kincardine Reporter.

+ + +

A PROMINENT Brant farmer who has been active in the management of the Northern Fair, told the Telescope on Saturday that he was heartily in favor of the Telescope's suggestion that the Northern Fair and the Christmas Fair join forces and get up an agricultural show which will be a credit to Walkerton and to Bruce County. All that would be necessary, said the Brant man, would be to shift the Northern Fair date forward a couple of months. The main building at the Fair Grounds of course should be rebuilt, but in the meantime the big military tents belonging to the Town could be utilized for a year or two. That the introduction of some new blood into the Fair directorate was also necessary, was the opinion of the Brant man, who is himself a director.

+ + +

BRUCE County Council discussed the biggest proposition that ever came before that body at its meeting last week. The proposition as outlined by Chairman Anderson of the Special Committee on Good Roads is to spend a mill and a half a year for the next ten to fifteen years to provide a thorough system of permanent leading roads throughout the County. This would be handled under the Ontario Good Roads System, the County paying $42,000 a year to which the province would add the usual 40 per cent, making $70,000 in all. The government would in addition pay 20 per cent of the up-keep of all roads designated in the proposed Good Roads By-law as County roads. The Council was almost unanimously impressed with the advisability of the scheme, and had it been the first session of the year instead of the last session would undoubtedly have put it over. The close proximity of election day, however had a chilling effect on the pedal extremities of some Councillors, and it was decided by those who had the proposition in hand to hold it over until January. As Reeve Ballachey pointed out the bigger the territorial basis for a good roads Scheme the better and eventually our leading thoroughfares may be come under a large Provincial Scheme. The Good Roads movement offers the County Councillors an opportunity to show that they are big enough to get beyond any little sideline selfishness and to legislate in a broad way for the common benefit of the whole county. We have confidence enough in the men of the Bruce County Council to believe that they will do so in the very near future.

+ + +

1916 HAS PROVED rather an important year in the municipal life of Walkerton and as the curtain is about to be rung down on the Town Council of 1916 it is interesting to take a brief look back. Two problems faced the town at the beginning of the year—permanent roads and Hydro Electric. It took the Council some time to get going on these two questions but they have made good on hydro by giving the people an opportunity to express their opinion by a Hydro Enabling by-law. The permanent road question has been allowed to go over with the expenditure of some $2,000 on the Station Road. The Council felt that it was not the best time to tackle such a big proposition just now with labor so scarce. Just the same we believe this is a matter that should be put up to the ratepayers at the earliest opportunity so that everything will be in readiness to proceed with construction just as soon as our men begin returning from the war. The Council did the best it could to fix up the Station roadway, which has been a disgrace to the town but we don't believe the town will begin to get good returns for the money spent on road making until it goes in for making good permanent roadways. The mobilization of the Bruce Batt'n here was entirely unforseen at the beginning of the year and we believe no one can criticize the Town Council for giving the financial support which it did to the undertaking. $1100 spent this way, together with $1400 on the Town Hall, $[illegible] for the New Ontario fire sufferers, made a lot of unforseen expenditure and yet the Council has been nothing if not careful. The Council made good its promise to lay some new sidewalk and a mile or so of much needed walk has been laid. And more streets are crying out for walks. We do not all agree with the judgment of the Council in a good many matters and yet we believe that in the main essentials they have "made good." One of the chief pastimes in many towns is to find fault with the Town Council. The effect is to discourage Councillors in their efforts and to prevent good men from offering their services. The 1916 Council has had its full share of abuse and in our opinion they deserve also a good deal of praise for what they have accomplished.

Telescope Letter Box

Highly Interesting War Letter From Pte. Jack Russell—Joe Fritz writes of Conditions in Saskatchewan—Interesting Facts from Buffalo.

PTE JACK RUSSELL WRITES

Somewhere In France.
Nov. 19th, 1916.

Dear Father;—

Received your most welcome letter a few days ago and was sure pleased to hear from you and to know that everybody at home is well, but was surprised to hear that you have been laid up. I have not been feeling very well these last few days, I have a touch of the Grippe I think, for it has been very cold and wet in the trenches lately and we had a little snow the other night. I am sitting in a dug-out writing this letter and it is nice and warm but of course we are not in the dugouts all the time, for we have to keep a good look out for Fritz, although he does not bother us very much here for we are on a very quiet part of the line now, but the part of the line we came from where Leith is now there was always something doing and I have seen and been under some terrible Bombardments and hope I never have to go through the same again. I am going to tell you about the first battle the Canadians had there, it was a hard fight but they drove the Hun's back, that is those that were able to get back before our boys got to them. Well I had better start and tell you about it now so here goes. We had just finished a march of about twelve miles and were nicely settled down when about four o'clock in the afternoon we got orders to pack up and to be ready to go up the line in one hour, so we got ready and started up the line and we were good and tired for we had to march seven miles to get there. Well we arrived there about nine o'clock and got our Machine Guns mounted, with orders to open fire at six o'clock in the morning. Well things were very quiet during the night, of course there were a few shells bursting around but nothing to speak of. We were in a support trench behind our front line a couple of hundred yards and we held a ridge, and the German front line was down in a hollow with a high ridge lying behind them. We did not know that there was anything unusual going to be pulled off but about two minutes past six our artillery started to bombard his lines and talk about shells going through the air and bursting, well its hard to explain what the racket was like, but just imagine you hear about five thousand heavy guns going to it, with machine gun fire and rifle fire. I thought the world had come to an end, and it did too for thousands of Huns that morning. Well, shortly after the bombardment had started, our boys started over the parapet and away they went with fixed bayonets across No Man's Land and just behind them came the tanks. It lasted for a few hours then we saw the German prisoners coming, which our boys had taken. The cream of the Hun Army, the "Prussian Guards" and they were pretty sick looking articles believe me, for they were up against the real stuff that day. We advanced 1500 yds that morning and captured a small village and again that night we took another village which you have probably read about and I think two thousand more prisoners so that ended the good day's work. But it was a terrible day. The people of Canada should never forget the way their soldiers fought that day. Now I will close hoping you are able to be around soon again, and send my love to all.

I remain your loving Son.

JOE FRITZ WRITES

Editor Telescope,
Walkerton, Ont.

Dear Sir—

Just a few lines to let you all know how I am getting along. I have been in poor health all summer, bothered with appendicitis. It took me very bad on Oct. 22nd, and I have been in bed mostly all the time since. I have been able to get out and around a little the past week, but I can't stand much walking as the pain is very bad at times. I don't like to go under an operation but I suppose I will have to if I want to get better again. Geo. Fritz and I intend to go to Guelph or Kitchener some time next week, if nothing happens. I may go to Rochester Hospital as it is supposed to be the best in the world, and the best is none too good for me, as I went through the mill before and know something about the game. Geo. has been very good to me and has done everything he could to help me in my needs and I cannot praise him too much.

The crops are nothing compared with last year's crop in this district, but nobody has need to complain as they might have been a whole lot worse. There is plenty of feed for the cattle and other stock, and the grain had a good price. There was lots of wheat not cut, and more not threshed at all. The wheat averages all the way from 5 to 45 per acre, and graded from No. 1 Northern to poor feed. Oats and barley were fairly good, and flax too, but nothing compared with last year's crop as it was a bumper and people may never get another like it. Potatoes were not so bad but cabbage and other garden stuff did not amount to very much. This is about all for this time, hoping to see some of you by Christmas, as I intend to go to Walkerton Business College for the winter if I don't go elsewhere.

Wishing you all a Merry Christmas and a Happy New Year and many more of them.

Yours very truly,
Jos. W. Fritz,
Shaunavon P. O.
Sask.

"QUEEN CITY OF THE LAKES"

Miss [illegible] Schnurr, a Walkerton girl, sends the Telescope some interesting facts regarding her present home city. "Buffalo," she writes, "is the cleanest city in the world—called the "Queen City of the Lakes"—is prosperous, growing and enterprising. Its population is now over half a million. There are 78 Catholic churches, 120 Protestant and 9 Jewish. St. Joseph's Cathedral on Delaware Ave. is of white marble and the finest in the country. There are 21 miles of parkway in the city. The International R. R. has 800 street cars and over 400 miles of track. Two hundred and fifty passenger trains arrive at Buffalo and depart daily. Over fifty per cent of the people own their own homes, Ellicott Square is the largest office building in the world, having 400,000 sq. ft. of floor space or over 9 acres. There are 70 public schools, 20 kindergartens, 4 High Schools, 1 University, [illegible] parochial and 25 private schools. Buffalo's paved streets are better than any other city in the world—105 miles of stone pavements, 5 miles macadam, 221 miles of asphalt, giving Buffalo more smooth pavement than Paris, Washington, New York, London or any other city on earth. Buffalo has seven large parks and several smaller ones. Many more interesting facts could be stated about the "Queen City of the Lakes."

AUCTION SALE

—OF—

VALUABLE FARM, FARM STOCK AND CHATTELS

The undersigned has received instructions from Frederick John Allardyce, the Administrator of the Estate of David Albert Allardyce, and will offer for sale by public auction, on

Monday, December 18th,

1916, at one o'clock in the afternoon, on the premises Lot Number Five in the First Concession North of the Durham Road in the Township of Brant, two and one-half miles West of Walkerton, the following farm stock, implements and chattels namely: About fifteen tons of hay, two horses, two milk cows, two two year steers, two yearlings, one calf, one brood sow, a number of hens, one binder, one mower, one hay rake, one land roller, one disc harrow, one set iron harrows, one grain drill, one turnip seeder, one scuffler, one Fleury plow, one wagon, one buggy, one pair sleighs, one cart, one fanning mill, one horse power, one circular saw, one hay fork, and numerous other articles, and a quantity of household furniture.

Terms of Sale,—Hay and all sums under $10.00, cash. All other purchases on six months' credit on approved joint notes with interest at 6%.

There will be also offered for sale by public auction, subject to the approval of the Official Guardian of infants, the farm of said deceased, being said Lot Number 5, save and except one acre off the south-west corner thereof, and the lands occupied by the Grand Trunk Railway Company near the north-east corner also about one acre.

The land is all cleared and is all under cultivation except about twelve acres, which although drained, is low and used for pasture.

On the said premises, there is a brick veneered dwelling house about 10 feet by 20 feet, with frame kitchen addition, about 12 feet by 14 feet; a barn with stone foundation and stabling underneath, about 28 feet by 60 feet and an old log building used as a driving shed.

TERMS OF SALE OF LAND.—10% at the time of sale, and the balance within sixty days thereafter, or at the purchaser's option, any sum up to 60%, may remain on mortgage on the premises, payable in five years, or such less time as the purchaser desires, with interest at 5% per annum payable yearly. The land will be offered for sale subject to a reserve bid.

Further conditions are the standing conditions of the Supreme Court of Ontario.

For further particulars, apply to the undersigned.

Dated this 8th day of December, A. D. 1916.

JOHN PURVIS,
Auctioneer.

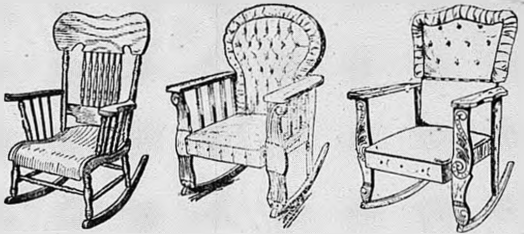
ROBERTSON & McNAB,
Walkerton, Ontario,
Vendor's Solicitors.

Just the Thing For Christmas

Beginning to think of Christmas Gifts? Discard trivial gifts in favor of big and sensible expression of your Christmas thoughtfulness for your family and loved ones. What more pleasing gift could you get than a Chair? Everyone rests some time and there's no better way of being remembered than to be presented with a big, comfortable chair for Christmas. We have them, the kind that make you want to drop into them when you see them.

Here are a few values in Rockers:

$2.25



$4.00 $7.25 $5.00

And many others up to $12.00 to $14.00.

This Iron Bed for $5.50

Furnishing the Bed-room at little cost with big values. This beautiful Iron Bed with brass rods head and foot; brass pillars and brass knobs for **$5.50.**

Others in iron from **$3.50** to **$12.00** and Brass Beds from **$13.50 to $30.00.**

Pianos, Organs, Sewing Machines

Furniture **E. MYLES** Undertaking

This Christmas

Let us Give Moderately to Each Other and Generously to the Soldiers' Families

Nineteen hundred and sixteen years ago came the very first Christmas, and for all these centuries there has recurred the Great Anniversary with its message of good will to men.

And so we give gifts.

Men and women of Ontario! We who stand for good will among men and nations! we whose men fight that there may at last be real peace on earth—let us make this a Christmas worthy of the day it commemorates—let us lay aside a generous proportion of our Christmas money for the families of those who are fighting the good fight.

Give to the Canadian Patriotic Fund

the fund that guards the soldiers' families from want.

Great as the result will be among the families of our soldiers, greater yet may the blessing be among us, the givers. Christmas will have a more vital meaning for us than perhaps ever before, and as for the children, who can measure the impression they will receive and keep of that Christmas Day when they shared their Christmas with the loved ones of the men who saved their country!

Let each Canadian boy and girl get a lesson from this historic Christmas which will go with them all through life.

Good men and women of Ontario! Can the need of our soldiers' families cry in vain for the relief which this Fund alone makes possible? Can we—can we, in the face of it all, again give lavishly among ourselves? Shall we not this year, with hearts full of the spirit of Christmas, lay aside a generous proportion of our Christmas money for the cause which so urgently needs it?

"Somewhere in France" he is fighting the good fight.

Somewhere in Ontario all that he holds dear is depending upon our decision.

Truly "It is more blessed to give than to receive."

Ontario will be asked in January to assure the Canadian Patriotic Fund that it can depend on having six million dollars in 1917 for the families of Ontario's soldiers.

Four million of these dollars must be secured from individual subscriptions. If there is no Branch of the Fund in your town or county send your subscription direct to the Head Office, Canadian Patriotic Fund, Victoria street, Ottawa. 8

S. W. VOGAN

TWO LONG YEARS HE SUFFERED

"Fruit-a-tives" Made Him Feel As If Walking On Air

ORILLIA, ONT., Nov. 26th, 1914.
"For over two years, I was troubled with *Constipation, Drowsiness, Lack of Appetite and Headaches*. One day I saw your sign which read "Fruit-a-tives make you feel like walking on air." This appealed to me, so I decided to try a box. In a very short time, I began to feel better, and *now I feel fine*. I have a good appetite, relish everything I eat, and the Headaches are gone entirely. I recommend this *pleasant fruit medicine* to all my friends".
DAN McLEAN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Do You Miss the Concerts?

Theatre and amusement of the winter season?

The New Edison

supplies what you miss. It is not a talking machine. It is a wonderful invention which baffles detection from the original.

Superiority of the New Edison

No Needles to Change
No Partially Reproduced Music.
Indestructible Records

No uneveness in playing, no harsh, discordant qualitities, no shortened records

Wont you please call or write for further information about this new invention. I shall esteem the privelege of giving you a free demonstration at your home.

Jeweler Walkerton

Christmas Gift

Received 52 times —A Year's Subscription to The Telescope

POETS' CORNER

THE FOOL

(From Robert W. Service's New Book, "The Rhymes of a Red Cross Man")

"But it isn't playing the game," he said,
And slammed his books away;
"The Latin and Greek I've got in my head
Will do for commoner clay."
"Rubbish," I cried; "The bugle's call
Isn't for lads at school."
D'ye think he'd listen! Oh not at all!
So I called him a fool, a fool.
Now there's a dog by his empty bed,
And the flute he used to play,
And his favorite bat . . . but Dick, he's dead,
Somewhere in France, they say:
Dick with his rapture of song and sun,
Dick of the yellow hair,
Dick whose life had just begun,
Carrion cold out there
Look at his prizes all in a row,
Surely a hint of fame.
Now he's finished with nothing to show;
Doesn't it seem a shame?
Look from the window! All you see
Was to be his one day:
Forest and furrow, lawn and lea,
And he goes and chucks it away,
Throws it away to die in the dark,
Somebody saw him fall,
Part of him mud, part of him blood.
The rest of him—not at all.
And yet I'll bet he was never afraid,
And he went as the best of them go,
That his hand was clenched on his broken blade,
And his face was turned to the foe.
A fool? Ah no! He was more than wise,
His was the proudest part.
He died with the glory of faith in his eyes
And the glory of love in his heart,
And though there's never a grave to tell,
Nor a cross to mark his fall,
Thank God! we know that he "batted well"
In the last great Game of all.

News About Town

Five Paisley men went to Toronto last week to take positions in munition factories.

Pte. Hugh Megraw of Paisley has been killed in action in France. He enlisted in B. C.

Mr. and Mrs. Stemler, con. 6 Brant, were bereaved by the death of their infant son on Saturday.

Dr. W. G. Shields, a veterinary surgeon of Mount Forest, died last week from the effects of drinking wood alcohol.

Misses G. Reichenbach, Grace Henderson and Hazel Irwin of Walkerton were the guests of Miss Marie Weiler on Sunday.—Mildmay Gazette.

These are hard times. We throw away the ashes and buy soap. We raise dogs and buy hogs. We grow weeds and buy vegetables. We catch fish with a $1 rod. And at last we send our boys with a $10 gun and an $18 dog to hunt 10 cent game.

Fire Chief Alex George has received a letter from the Fire Underwriters Association calling attention to the danger to life and property from Christmas decorations. The use of Christmas greens, and draperies, cotton in connection with electric lights is very hazardous and should be avoided.

Thamesvill's village Council must have a big heart a level head and a philanthropy worth talking about. For 20 years they have presented the Editor of that spruce burg with $12.00 as a recognition of his publishing the minutes of that body. Imagine one of Bruce County Municipal Councils handing over such a sum.—Teeswater News.

Inspector White is certainly after those who violate the temperance act in this locality. Friday he was here for the third time, having summoned two Bruce Tp. young men for being intoxicated in a public place. Otto Klein prosecuted and it is plain Inspector White does not want any more $10 fines. It cost the men $111 55 each.—Port Elgin Times.

Parcel Had Long Trip

A good example of the efficiency of the British parcel system was noted here last week when a parcel which had been sent out to Capt. A. J. McNally at the Front a year ago, returned to Walkerton after having followed him on his rounds a good many thousand miles without quite catching up. The parcel was in just as about as good shape as when it first started for its destination last December.

BRUCE COUNTY COUNCIL

Held Good Roads By-law Over for Further Discussion in January—Warden McNab Presented With Gold-Headed Cane.

All members were present.

There was as usual, little new business offering at the session, this being the clean-up session of the year and the Finance Committee was left busy auditing and passing accounts.

The Committee appointed to sell the debentures issued to raise money for Patriotic purposes, $[illegible], reported that the debentures had been sold for over $[illegible] above par. The credit of the County of Bruce is evidently high. A large number of Committees appointed in January and June Sessions to look after bridges, etc., reported the completion of the work.

Several delegations addressed the council in connection with different parts of Patriotic work, and council passed resolutions requesting that at all recruiting meetings some one should advance to claims of the navy for recruits. They also endorsed the formation of "The Associated Kin of Canadian Expeditionary Forces," believing that if the relatives of those now at the front were united they would have a great influence in stimulating recruiting and would also be able to assist largely in providing employment for returned soldiers.

The report of the Inspector of Houses of Refuge on the Bruce House was read. The Inspector found the House very efficiently managed and everything in good order, but recommends that the heating system be improved and that a trained nurse be employed to assist the matron.

The County of Stormont is petitioning the Government to compel every auto to carry "dimmers" on the headlights and that all vehicles carry some light. The council endorsed the petition.

Wm J. Henry, of Kincardine, was appointed High School Trustee for unexpired part of term of J. H. Kaake, deceased, and at the request of the Reeve of Wiarton it was recommended that the Chief Constable of Wiarton should be appointed a County Constable.

The chief item of business was the question of adopting the Good Roads System. The discussion on this took no considerable time and brought out much valuable information for the members. It was pointed out that many thought that it was a very expensive System but it really was not and in the end would be a much cheaper and better way than the present, that it is much easier to keep a good article in repair than a poor one. To the objection that the Government borrowed the money they gave towards it, and the people of Bruce had to pay it, Reeve Cass neatly replied that that was one of his objections to the present system. The Government had already borrowed the money for Good Roads, the County of Bruce was paying its share but the Counties who went in on the Good Roads movement were getting all the money and Bruce got none. The system of dealing with towns and villages and with those townships who may not get as much work done as others and are therefore compensated by grants, was explained. After a thorough discussion many who before had been rather opposed to it, thought the System might be all right, but it was decided to leave it over until the January session for further consideration.

Col. A. E. Belcher, of Toronto, a former member of Council, wrote offering an oil painting of himself to hang in the Council Chamber. An offer gladly accepted.

A strong resolution was passed urging the Government to take some action whereby the slacker would be compelled to come forward and do his bit, instead of holding back at the expense of the willing and taking advantage of the increased chances of making money.

Warden McNab entertained the members at the Young Ladies' Tea Rooms and the members took advantage of the occasion to present the Warden with a gold headed cane in token of their appreciation of his services.

P. A. MALCOMSON, Clerk.

Retiring Warden "Caned"

WARDEN ALEX. McNAB

Bruce's Popular Warden for 1916, who was presented with a Gold Headed Cane by the Members of the County Council.

Country Correspondence

(Continued from Page 8)

EAST BRUCE

Two young men of the east end of Bruce went to a sale drunk and for the offence paid $100 and costs each.

Much sympathy is extended to Mr. and Mrs. A. Shipley in the death of their little boy who died on Nov. 28th. The funeral took place to Starkvale cemetery on Nov. 30th, the service being conducted by Rev. De Mille of Glamis.

Word has been received by Mrs. M. Reppel that her son Gunner Dan had been wounded in the hand having his two fingers and thumb blown off of his right hand and is now in a hospital in England.

It seems Town Councils are like the government. The longer they are in office the worse they get instead of better. A Reeve that don't know enough to retire from office after a year or two in power should be cast out at the election and councillors should be weeded out too and some should never be in. They should be given a wheel-barrow to run instead of money to spend.

Our local butcher, Wm. Parker is building an up-to-date sanitary slaughter house and will have it ready for the winter trade.

Farmers that held their wheat for the $2 a bushel price, got it where the chicken got the axe.

+ + +

HANOVER

Mrs. Albert Jacobs of Hanover received a telegram this week from Ottawa advising her that her husband had sustained a gun shot wound in his eye.

A large number of the employees of the Hanover Cement Co., gathered at the house of Mr. Arthur Clark, who has recently severed his connection as superintendent with the Company. After the reading of an address, Mr. and Mrs. Arthur Clark were presented with two handsome parlor rockers.

Mrs. Harry McGeagh, received a telegram on Dec. 6th. that her husband had been killed at the Front. Pte McGeagh enlisted at Galt in the 71st and went overseas with that Battalion. He had been in the trenches for some months. He leaves a wife and two children, a girl and a boy, and three brothers and two sisters to mourn his death as follows:—Dr. McGeagh of Detroit, David and George of Hanover, Mrs. R. M. Brunt of Hanover, and Mrs. T. R. Todd of Hillview, Sask. Pte. McGeagh was about 32 years of age.

PINKERTON

Miss Kathleen and Mr. Harold Pinkerton visited in Niagara Falls and Toronto this week.

The banquet tendered Bro. Harold Pinkerton by the Foresters last Tuesday evening was largely attended and a very pleasant evening spent. The Foresters presented Harold with a gold headed cane. Bro. Harvey Clark was chairman.

Quite a number from the village attended the memorial service of Lieutenant Leslie Young in Cargill on Sunday afternoon. The evening service here was dispensed with.

Rev. Mr. Gale drove to Belmore last Thursday to attend the induction of a friend.

Quite a number from here attended the box social in aid of the Red Cross, held in Bradley schoolhouse last Friday evening.

AN EVIL HERITAGE

Mingling with the discomfort, as she listened to Bernard, would come pangs of jealousy so sharp that she was frightened at herself, until suddenly there flashed upon her the thought—

"Great God, what am I thinking of! If he is nameless and poor he cannot marry her. Her father will not give his consent: he told me so himself." And for one single moment a mad joy leaped up within her, and a weight, as of a mountain, seemed lifted from her heart. But only for one moment; the next already she saw what his suffering would be, and was suffering with him and for him.

"This is not exactly the same road I came to Cane Hill by," remarked Bernard, presently; "or is it only that being in a good humor makes everything look about twice as jolly? Surely the palms were neither so big nor so green yesterday." He laughed light-heartedly. "I suppose I must, after all, have been in a bit of funk, though I wasn't aware of it myself. How is it that the humming birds made no impression on me yesterday?"

"Probably because they were hiding from the rain," said Marian, a little shyly.

"Nonsense! there's no sunshine today, either. It's not the weather. It's my state of mind, I tell you that the improvement is universal; everything is more beautiful than it used to be. Are you aware, by-the-bye"—he paused and looked at her in momentary surprise—"that even my little cousin is no exception to the rule? Do you know that you have become quite grown up since I saw you last, Marian?"

"Have I really?" was trembling bitterly on Marian's lips, but she did not trust herself to speak. Without looking at Bernard she knew that he was still scanning her features with a sort of pleased astonishment, as though under the impression of a newly made discovery. The wonder in his eyes made her heart beat faster, and at the same time it caused her pain.

"You have told me nothing yet of the improvements at Thornton," Marian began, nervously, and merely for the sake of breaking the silence which to her was unbearable.

Bernard's face brightened instantly. "The improvements at Thornton? Oh, I have had quite a new idea about the chimneys of the model cottages." Upon which he plunged joyfully into explanations, for a listener to his plans was always welcome, and of all the listeners in his experience Marian had been by far the most satisfactory.

"Of course you must stay at Thornton often after we are married," he remarked, unconsciously following his own train of thought. "Oh, yes, you must; I will need you, you know, for talking to when Sybil is busy, for instance, or—or tired," he substituted, aware of its being more appropriate. "You remember our talks at Thornton last summer, don't you, Marian?"

"Yes—I remember them," said Marian, with a quaint little smile. What would she not have given to have been able to forget them?

"What is that noise?" she asked, raising her head at the same moment.

Bernard reined in his pony and lent ear somewhat impatiently.

"Only the wind," he assured her, raising her head in the same moment.

He had been talking for some minutes more when Marian found courage to interrupt him

"Bernard, do listen! It isn't the wind; I'm sure it is water."

"Then there is probably a river somewhere near. As I was telling you, the roofs must all be——"

"Good gracious, it must be the Dry River, and we won't be able to cross it!"

Marian's last words were all but drowned in the loud blowing rush which seemed to leap up to meet them as they came round a bend in the road.

"By Jove!" said Bernard, and pulled up his pony short.

To Marian it seemed all but impossible to believe that this was the same spot she had seen once before in Miss McCrie's company. Of the stony riverbed of that day all that was now visible were a few points of rock round which green waters foamed angrily; the rustling clumps of reeds were transformed into islands, soon to be decked with new-born verdure; and all the time more and more of that same dull green water, flecked with streaks of that same yellow foam, came roaring down from the hills, dragging at the grass by the river-side, bringing uprooted bushes with it, rolling the very boulders before it, making the earth shake with its thunder and filling the air with its spray.

"...hall never be able to cross," ...ian, when the first moment ...ishment was over.

"...e may be some place higher ...emias will know. Why the ... is that fellow not keeping up ..." And they both looked ... for Jeremias.

... had been lagging far behind ...ng the whole of the ride, and now ...eared at a jog-trot round the turn ... the road.

"Jeremias!" shouted Bernard, in order to be heard above the rush of the water, "is there any spot where the river can be crossed, or must we turn back?"

Apparently he had not shouted loud enough for Jeremias gave no sign of having heard, but kept on at the same jog-trot, reached the spot where Marian and Bernard were waiting — still without giving any sign— passed them by; then, suddenly raising his whip with a shout, and digging his heels into the sides of his mule, turned its head straight towards the river.

"Bernard, he is mad!" cried Marian, in alarm. "He is going into the water. Stop him! oh, stop him!"

With a muttered oath Bernard had started forward, but it was too late. After a struggle of not more than ten seconds the drunken negro had succeeded in urging the terrified mule into the water. For a few paces the beast partially kept its footing; once it stumbled and recovered itself, but at the second stumble the water had grown deep. It attempted to swim, and was at the same moment seized by the current and whirled out into the river, where a clump of reeds intervening, man and steed were lost sight of.

It had happened so quickly that there had been no possibility of an intervention. The mule had not disappeared when already Bernard had jumped off his pony, flinging the reins to Marian, and had swung himself on to a rock in the river-bed. He might as well have been at Cane Hill for any help he could give to Jeremias or for anything he could see of him. The reeds were a tantalizing screen, and beyond these reeds glimpses were to be caught of a big green pool, a sort of halting station for the waters on their journey down from the hills, where they circled slowly round and round, once and once again, before resuming their headlong course. It was the look of this pool, with its unmistakable character of death, that first made Bernard feel certain that the negro was lost. The current, roaring and foaming down over the rocks, was not nearly so terrifying as this dark green pool, which, but for the trains of bubbles that swept over its surface, was as smooth as though hewn out of white-veiled marble.

Standing upright on the slippery rock, Bernard strained his eyes to see what there was to be seen, but he was blinded by flying spray, and to advance further would simply have been to plunge into the torrent. Suddenly as he stood thus he remembered Marian, and, belonging as he did to the order of men who consider that women are intended only for the amenities of life, and are worse than useless in its emergencies, it was with a distinct feeling of annoyance that he turned back towards her. Marian was sitting rigid in the saddle. Her face was colorless, and her look seemed to be wildly interrogating him.

"Do you think he can have saved himself on one of the islands?" she asked, quickly, after the two had looked for an instant in silence into each other's horror-stricken eyes.

Bernard shook his head. "Give me the reins. We must go back for help. Try and keep quiet, Marian, for God's sake! You don't feel like falling off, do you? What's that?"

As he spoke his eye had been caught by a movement on the bank, some dozen yards downstream. Was not that the head of a mule? Bernard took his foot out of the stirrup and ran to the spot just in time to help ashore the exhausted animal, which had succeeded in recovering its footing. Of its rider there was no trace.

When Bernard came back, leading the dripping mule, Marian was standing beside her own beast. She did not wait for him to speak. Her eyes had again interrogated him, and she knew what he would say.

"Listen, Bernard. We must not both go; one of us must stay here and watch in case the poor man tries to come ashore. You can ride quicker, you must go. I will stay here and wait."

"All alone? Are you not afraid?" asked Bernard, aghast at the idea.

"It doesn't matter whether I am or not; one of us must stay. Here is your pony. Be quick, Bernard, for God's sake!"

There was no time for further parley. What Marian said sounded like common sense, though it was not at all what he would have expected her to say. Swinging himself into the saddle, and with a parting injunction to her to "keep quiet, for Heaven's sake!"—oblivious to the fact that she was in truth much quieter than he was—Bernard set off at a breathless gallop along the road by which they had come. He was indeed of opinion—having seen that green pool beyond the reeds—that his errand was a fool's errand, but so awful is it to look on with tied hands at a fellow-creature's death that he rode as though his own life depended on it.

"She's a plucky little thing, and no mistake," he kept repeating to himself as he galloped. The pleased surprise with which Marian's self-possession had filled him, was able to pierce even through the pervading horror of the moment. Presently some words that Sybil had spoken with regard to Marian last summer returned to his memory. She had declared then that Marian's coolness on horseback was the result of what she had called an heroic effort of will; could it be that the courage displayed to-day sprang from the same source? The question aroused his curiosity, and, despite his excitement, he was aware that the answer might well chance to place his little cousin in a more interesting light than that in which she had stood until to-day. He would certainly look at her more attentively than he had hitherto done.

To Marian that half hour spent beside the Dry River between the two mules, of which the one nibbled the grass while the other stood with lowered head and shaking knees, was the most trying of her life. Though outwardly quiet, she was in reality too excited to be conscious of anything like fear. But the solitude of the spot weighed upon her indistinctly, and the unwonted absence of sunlight. It wanted but one sunbeam to make of the torrent a gorgeous spectacle, but under this grey sky all the beauty was extinguished, and there remained but the terror. With the gloomy monotony of a nightmare the waters rolled over the stones and the dull green leaves drooped above them. Eyes and ears were ever on the strain. Often she would think to hear a human cry piercing through the roar of the current, and the gurgle of the pools sounded to her hearing like the gasps of a drowning man. If a grass-blade at the water's edge bent aside more quickly than its fellows, or if out there in the river's bed a reed waved unexpectedly, her eyes were on it already. Sometimes she fancied she could see a black hand grasping the edge of a rock, and once the specks of foam on a wave took for her the semblance of a nigger's gleaming eyeballs and teeth. The blood rushed to her heart more than once in expectation, but the suspense passed as it had come, and ever and again her eyes, after sweeping over the banks and scanning the rocks, would return unwillingly and yet unresistibly to what she could see of the big green pool beyond the reeds; and the longer she stood and watched, the more surely did the conviction come over her that poor Jeremias, with all his wide sympathies and instinctive philanthropy, lay buried under that smooth surface. When the last doubt was gone and the strain of attention perforce relaxed, Marian knelt down on the grass between the two mules, and, as well as the reins she was holding would allow her, clasped her hands on her breast.

It was thus that Bernard, returning with succor, found her—her pale face uplifted, her white lips moving in prayer. He had never seen his cousin at her prayers, and at sight of her new he half checked his pony, as though with the instinctive feeling that he had no right to look on this picture. And yet it was one which haunted his mind for long.

Without rendering to himself a clear account of his reasoning—indeed amidst the strain and flurry of what now followed, no consecutive reasoning was possible—he instinctively felt that henceforward Marian must be taken more seriously, that within this last hour she was becoming something more than that "good little girl" to whom he had always showed such patronizing kindness.

CHAPTER XXXI.

Despite the efforts made and energetically directed by Bernard, the body of poor Jeremias, much gashed and cut about the head, was not recovered till next morning. Marian had been unwilling to leave the spot with the question unsolved, but Bernard, alarmed by her pallor, had asserted his authority, and late that evening the two cousins reached Lot 13 by another road.

Early next morning the start for Williamstown was made. The mail was expected to sail soon after mid-day, so truly there was no superfluous time. It was a somewhat silent and subdued little party that jogged into town somewhere about eleven o'clock. The yesterday's catastrophe had thrown a deep shadow over the moment of departure. Bernard's triumphant mood was sobered, and nothing but the dread of needlessly postponing her father's departure gave Marian the strength to appear outwardly calm.

Williamstown was in that faint state of bustle which "mail day" could not fail to awaken even here. A couple of grimy coal barges lay alongside of the steamer, and the work of coaling was being carried on by a swarm of half-naked men and women. A few unmistakably European coats were to be seen on the pier, while from time to time boats laden with bananas and pine-apples pushed off from the shore for the benefit of the passengers on board.

The start from Lot 13 had been made earlier than necessary, as it now appeared, since the coaling was not expected to be done before the middle of the afternoon.

"It will be best for Marian to get into her berth at once," Bernard decided when some luncheon had been eaten. I shall see you on board first, and then I shall take another look at the place. There is no sense in kicking my heels on board till the middle of the afternoon."

"But there is nothing to see about the place, Bernard."

Despite her almost unbounded confidence in Miss McCrie's powers of averting evil, Marian knew that she could not feel quite at rest so long as Bernard had the soil of St. Clare beneath his feet.

"Oh yes, there is lots to see. You forget that I am not a hardened West Indian like you and Uncle James."

"I tell you what you might do, Bernard," put in the Captain, "you might look up old Rudd, I hadn't time to give him warning of our start."

It was settled accordingly, and Bernard, having seen his uncle and cousin on board, turned once more to descend the ladder.

"Three o'clock!" called out Marian when already he was settled in the boat, "Don't forget that you must be back by three o'clock at latest."

He nodded to her reassuringly as she leant over the steamer's side, and in the same moment already the boat was dancing away over the waves and towards the shore, and Marian stood and watched it with an unaccountable feeling of anxiety upon her.

There were two hours to be passed until his return. She spent the first hour quietly enough in her berth, though the chattering in the coal barge alongside effectually banished sleep. When the second hour began without there being any sign of Bernard, Marian returned to deck and took to scanning the landing place more and more attentively. By this time the deck was growing crowded, and the bustle increasing, but three o'clock came and went and the coal barges were not yet empty, and though several boats came from the shore none of them brought Bernard. Four o'clock had struck and steam was beginning to be got up when Marian, still at her post and still straining her eyes towards the town, became aware that her father was making his way towards her through the crowd. He was looking very much annoyed, and held a piece of paper in his hand.

"Read that," he said, shortly. "It's an awful nuisance."

Marian took the paper, which was apparently a sheet torn out of a notebook, and read scrawled upon it in Bernard's handwriting:

"Unexpectedly detained by business. Cannot sail this mail. Please give the man my luggage."

"Something has happened to him," said Marian, looking into her father's face with such an unmistakable expression of terror on her own that the Captain broke into an angry laugh.

"Bless me, child! There's no need to look like a big misfortune. It's a nuisance, since he would have been good company on the voyage, but there's no question of a catastrophe. It isn't likely that he has been bitten by a rat-tailed snake."

Marian said nothing. She was not thinking of a rat-tailed snake, but of a policeman.

As it so happened, however, neither the snake nor the policeman were implicated in Bernard's deferred voyage.

In the moment that he stepped ashore there remained two hour's time before him to be more or less agreeably filled up. It would be safest, he decided, to acquit himself first of his errand to Mr. Rudd, more especially as he would have to ask his way to the house. The Captain had said that any one could direct him. Ah, there, by good luck, was a face he knew; the very thing he wanted. Mr. Hibbert would be sure to know the way to Mr. Rudd's house, and it was Mr. Hibbert whom he now caught sight of, preparing to enter a boat just as he had left his own.

(To be continued.)

"What has he been doing since he graduated from college?" "He has been trying to find out what he learned."—Life.

SUNDAY SCHOOL LESSON

LESSON XI. December 10, 1916

Faithful unto death.—Revelation 2; 1-17

COMMENTARY.—I. Message to the Church at Ephesus (vs. 1-7). 1. Unto the angel. To the pastor, or the one on whom falls the responsibility of caring for the church. Ephesus—Ephesus was situated in the southwestern part of Asia Minor. The church there was founded by Paul (Acts 19). Write—John was commissioned to write to the church at Ephesus and to the other churches, but what he wrote to them is written also to us. That holdeth the seven stars, etc.—Compare the description here given by Christ Himself with that found in 1:12-16. 2. I know—Jesus would give the churches to understand that He was fully acquainted with their spiritual and moral condition. Labor—Toil, suffering, patience—Endurance. Canst not bear them which are evil—The Christians at Ephesus were zealous for the purity and integrity of the church. Say they are apostles, and are not—Those who falsely claimed to be apostles would be tested by the writings of the evangelists and of Paul. Liars — A strong term. It means that those who intentionally practise deception. 3. Hast not fainted—They had labored and suffered for Jesus' sake and had not become weary.

6. Nevertheless—Thus far Jesus had commended the church at Ephesus and the commendation was strong, but there was a serious failure that must not pass unnoticed. Thou hast left thy first love—The state of any individual or church that has lost that fervent, soulful love which characterizes a young convert, is deplorable. There may be a form of godliness and many good works, but if there be a loss of the first love, the condition is not pleasing to God. 5. Remember—One who has enjoyed the glowing love, that comes to the soul at conversion can not forget it. Jesus in His message calls upon the "angel" of the church and through him the church itself to repentance. Fallen—It is a sad fall to go down from one's first love to God to a condition of formalism. Repent—This failure calls for repentance, which includes sorrow for the sin and a hearty return to God. Do the first works—That early love was not a mere emotion ending where it began, within the feeling, but put itself forth in works.—Whedon. Will remove the candlestick—The candlestick is the church (1:20), and the church would suffer dissolution unless there should come a return to the Lord. Except thou repent—The responsibility upon the minister of the church is great. 6. But this thou hast—Jesus again commends the church at Ephesus. Deeds of the Nicolaitanes—They were a class of professed Christians who attempted to make Christian freedom a license for the commission of wicked acts. 7. To him that overcometh—John in this book as well as in his other w[illegible] has much to say about over[illegible]. The Christian who retains [illegible] love, overcomes.

II. Message to the church at Smyrna (vs. 8-11). 8. Smyrna—A city forty miles north of Ephesus, and Polycarp, a pupil of John, was at one time the minister of the church. The first and the last—Compare with 1. 17, 18. The risen and ever-living Christ. 9. Tribulation—Severe affliction. This is a figure of a thrashing instrument being dragged over grain to separate the straw and chaff from the wheat. Poverty—Lack of earthly goods. But thou are rich—Rich in the possession of faith, of heavenly treasure and of eternal life. Blasphemy, etc.—There were those who may have been Jews by birth and who professed to be Jews religiously, but did not show themselves to be the followers of Jesus. 10. Fear none of those things which thou shalt suffer—It is clearly foretold that the church at Smyrna would be called upon to suffer, but the Christians were encouraged by the comforting exhortation not to fear. The devil shall cast, etc.—Satan is represented as the great instigator of persecution against the saints of the Lord. Be thou faithful unto death—This exhortation means not only that Christians should be faithful all their lives long, but they should be faithful even if their faithfulness should lead to a martyr's death. A crown of life—Immortal life in glory is represented as the crown which they who are made kings through grace shall receive from the Lord. 11. Shall not be hurt of the second death—The saints might suffer physical death as martyrs, but eternal death, the second death, with its unceasing torment, would have no power over them.

III. Message to the Church at Pergamos (vs. 12-17). 12. Pergamos — Sixty miles northeast of Smyrna. Sharp sword—See 1. 16. 13. Where Satan's seat is—The god of Pergamos was Aesculapius who was worshiped under the symbol of a serpent. This may have given rise to the thought that Satan had his throne here. Another explanation is that Pergamos was a centre of fierce persecution against Christians. Thou holds fast my name—Jesus uses strong statements in commendation of the Christians at Pergamos. They had not denied his name even in the face of death. Antipas—Nothing is really known of Antipas except what is given here. He was probably a pastor, or bishop, of the church of Pergamos who suffered martyrdom. Martyr—Witness. 14. Doctrine of Balaam—See Num. 25. 1-3. The account of Balaam and Balak is given in Num. 22-24. 15. Doctrine of Nicolaitanes— See v. 6. 16. Repent—Turn away from sin. The sins of which the church was guilty called for repentance. Against them. Against those who were sinning against God. With the sword of my mouth—Jesus refers to His words. See 1. 16, 17. The hidden manna—The hidden manna represents spiritual sustenance and the fruit of the tree of life. Reference is made to the pot of manna gathered in the wilderness and placed in the ark of the covenant (Exod. 16. 32-34). White stone—Many different interpretations have been given to this passage, and they cannot be included here for lack of space. It seems to us that the white stone, which is given to overcomers, indicates that they who receive it are justified and pure, the white stone being an emblem of purity as well as of worth. The new name in the stone stands for assurance of acceptance with God and a revelation of God to the individual soul. Only those who overcome really know God.

Questions.—Give the names of the seven churches to which Jesus sent messages by John. What is meant by the angel of the church? What similarity is there in the several messages? What was the state of the church at Ephesus? What is meant by the candlestick? What had the church at Smyrna to suffer? What remedy is proposed for the evils or defects in the churches at Ephesus and Pergamos?

PRACTICAL SURVEY.

Topic.—Divine admonitions.

I. Against declension in vital piety.

II. To perseverance under persecution.

III. Against compromise with religionists.

I. Against declension in vital piety. In this letter which John was directed to write to the Ephesian church, Christ was presented as holding the stars in his right hand and as walking in the midst of the seven golden candlesticks. He was presented, in some distinct aspect of his character and work, to each of the seven churches, yet these particular symbols applied to all the churches. Holding the stars in his right hand indicated his special care over the ministers of his church, appointing them to their office, imparting qualifications necessary for the effectual discharge of their office, keeping them at his absolute disposal. The symbol of the stars tells of the pastor's duty, to lighten the darkness of ignorance, sorrow and sin. He is to reflect the light of the Sun of Righteousness. He is to keep his appointed course in obedient, reverent service to God. The emblem of the candlestick tells of the character of Christ's people, radiant, cheering, penetrating, beneficent, revealing, manifesting its source, but not itself. The church at Ephesus was threatened with the loss of its very existence. Christ saw beneath their admirable exterior a weakening in the springs of their spiritual life. The Head of the church marked every declension in piety. "First love" was the gem which he prized most of all. Departure from it was regarded as a grievous fall, which called for prompt and practical repentance. Christ commended the Ephesians for their repugnance to wrong-doing, their patience in toil, their insight into character and their hostility to error. After crediting them with the good they possessed, he reproved them for their declension and urged their reform. His censure pointed to a slackening in those qualities for which they had been commended. The watchword to them was "Remember." They were exhorted to compare and contrast their past with their present. The most solemn part of the message was that in which the Master declared the removal of their candlestick.

II. To perseverance under persecution. The letter to the church from Smyrna contained words of cheer from a reigning Saviour to a suffering church. To them he presented his mediatorial dominion, showing himself a living Saviour, knowing all, estimating all, foreseeing all, cheering them amid all, promising light and life at the end of all. The storm of persecution was beating fiercely on the despised community that dared defy the pagan population and their established worship. The church was subjected to the persecution of inveterate enemies and the bigotry and reproach of co-religionists. The poverty which they suffered was directly traceable to the fact of their being Christians. They were in danger of future afflictions and imprisonment. Their history can be compressed into the word tribulation. The Master's "Fear not" indicated how great the peril was of their being crushed and heart-broken. The all-seeing One discerned the coming storm and cheered his faithful people to stand firm in the day of their suffering and to be faithful even unto death. His words, "I know," afforded unspeakable comfort. His testimony, "Thou art rich," spoke volumes for the genuineness of their lives.

III. Against compromise with religionists. The symbol of the two-edged sword indicated Christ's supreme right of judging his people. Pergamos was the incomplete church. It was indifferent to subtle inward influences which were corrupting its teachers and endangering the spiritual life of its members, and thus weakening the power of resistance. In Pergamos there were two forces that made life a battle for the Christian, the Church of Christ and the Temple of Idolatry. The Christians were not enjoined to leave the city on account of its wickedness. Consideration was granted for all their hindrances, and assurance given of a perfect understanding of their peculiar needs. Special strength and highest distinction were embodied in the promise made to the Church of Pergamos upon their faithful return to whole-hearted service and correct discipline. The possibility of triumph was made distinctive to each of the churches. The leadings of the Holy Spirit would be vouchsafed.

T. R. A.

Many of the very latest evening gowns are shown in light colors and elaborately embroidered in spangles of vivid shades of exquisite iridescent colorings. This one is of rose metal cloth, which glitters through the folds of rich silver lace and apron tunic of spangle embroidery

TANK KILLED 300 GERMANS

The evolution of modern gunnery is a marvellous and fascinating study in many respects, and in none more than its application of scientific methods to practical purposes, and its control of titanic forces with ease and precision. The rapidity of the development of guns and gunnery, both military and naval, has been increasingly marked in modern times, as some of the cleverest brains have, in times of peace, as well as in times of war, been devoted to improvements in the construction and in the use of these huge instruments of destruction. Alike in range, rate of fire, and power, the evolution of the modern gun has been marvellously rapid and successful.

It goes almost without saying (says a writer in the Glasgow Herald) that every war has its own lessons, some of which upset the pet theories of peacetime students. And one of the first and most striking lessons of the Great War of 1914-16 was the paramount importance of artillery. The increasing deadliness of modern rifle and machine gun fire compels infantry to entrench and the only way of ending the ensuing position of stalemate is for one side to secure an overwhelming preponderance of artillery and to blast its way through the enemy trenches. This immense and increasing use of artillery is apparently the only way of securing a decision in modern warfare, and every type and calibre of artillery is employed, from the superannuated trench mortar to the huge howitzer and the unshipped naval gun, which need locomotives for haulage and concrete beds for platforms.

SEVEN KINDS OF ARTILLERY.

No fewer than seven different kinds of artillery are taken into the field by a modern army. By far the best of the field guns is the French "75." Its special excellence consists in its recoil buffer. Most modern guns are placed on carriages designed to absorb the shock of recoil without allowing the carriage to move. In this way great rapidity of fire is attained, as the gunners have not to lay it after each shot. The French gun is held in position by a spade at the end of the trail, and the wheels are strongly braked. The gun when it recoils slides along a cradle and is stopped by the ingenious pneumatic buffer, which operates with marvellous smoothness. The gunner keeps the sights, which do not move with the gun, on the target all the time.

Howitzers are short, squat guns of large bore, which can be used either like field guns for direct fire at close range, or, like the old-fashioned mortar, for high-angle fire, when they throw their shells high into the air so that these fall almost vertically upon the target. In this way they do great damage either in bombarding a besieged fort or among troops in trench warfare. In the British Army before the war there were two kinds of howitzers—field howitzers of 4½-inch bore, and heavy 6-inch, firing 100-lb shells, which latter were not at first sent into the field. The German Army possessed howitzers very similar, but sent not only these, but even heavier howitzers into the field. The most famous of the German heavy howitzers are the 8.2 inch, firing a shell of 600 lbs. Both are fitted with field carriages, are hauled by motor tractors, and can be taken wherever the roads are good. On the eve of war Krupps had secretly completed a number of 17 inch howitzers, the largest weapons ever made for field service. They fired a shell of nearly a ton weight a distance of over nine miles. The gun itself weighed 100 tons. The whole equipment of the gun 300 tons. To move it by road required 12 traction engines, and before firing the weight had to be supported on a concrete foundation. It was by means of these monstrous weapons that the Germans succeeded in rapidly reducing such fortresses as Liege, Namur, Maubeuge and Antwerp.

THE INVISIBLE TARGET.

One of the elementary facts in modern gunnery which strikes the mere layman is remarkable, is that the gunner seldom sees his target at all. The necessity of this will be realized when it is remembered that if he could see he could also be seen by the enemy. Concealment is therefore one of the first duties of a battery. This frequently involves the use of retired position on reversed slopes, and in low-lying ground. The target is then generally invisible, and the greatest stress is laid in all modern artillery practice on firing by indirect means. One great advantage of retired positions is that, provided unity of direction is kept, an overwhelming artillery surprise is carried out more easily than from an exposed and visible position. A case in point was the overwhelming bombardment of the German trenches at Neuve Chapelle by massed British artillery, which came like a thunderbolt to the Germans and taught them a lesson, which they afterwards improved upon.

Laying or pointing the gun is a comparatively simple matter when the point aimed at is also the target. But this is seldom the case. In the battlefield the target is often indistinct or altogether invisible, and in either case an "auxiliary mark" or aiming point, quite distinct from the target, has to be employed. This is called the indirect method.

After laying the guns comes the ranging, which includes not only finding the range, but also "timing" the shells that is correcting the standard length of fuse for each range according to circumstances. The battery commander tells off a "ranging section" of two guns which fire long and short range respectively. Verifying rounds are then fired to make sure of the exact range, throw a few huge shells from near

RAPID TARGET.

Since the introduction of the modern quick-firing gun and the perfection of "time" shrapnel and high explosive shells new and scientific methods of rapid firing have been developed in the French, British and other armies. When a rapid and overwhelming fire is wanted the range is found, and the ground within the limits of the prescribed area is swept from end to end with a tornado of fire. In the French army this is called a rafale (a squall or gust). Technically it is a series of eight rounds per gun, each two rounds being laid to burst 100 yards further than the last, thus sweeping an area of, say, 400 yards with a rain of shrapnel or a devastating series of high explosive shells. "Sweeping" fire is a series of three rounds per gun, one in the original line, one to the right, and one to the left. This is also, and significantly called "moving." A further combination is called "search and sweep." As showing the marvellous skill of the French gunners, it is said that they can fire over 20 rounds per minute or 18 rounds to sweep an area of 600 by 20 metres in 75 seconds, a rate unequaled in any other army. Theoretically, the result of such a fiery blast would be, in the case of shrapnel, that 15 per cent. of the men and 75 per cent. of the horses in that area and not under bullet-proof cover would be hit by separate bullets.

Time was when the commander of a battery stood near his guns and shouted commands to his gunner. To-day the artillery officer may be two or three miles away, directing operations by telephone from an observation post in view of the enemy's works. The observatory may be a ruined house, a tree trunk, a shell crater, or a haystack, and from this point he observes the accuracy of the fire of the battery, and telephones instructions to the gunners in the rear, altering the range when necessary and communicating any enemy movements, so that the shells soon find the new mark. Instructions of precisions and careful calculations are of course necessary to fight a battery in this manner, many allowances having to be made for the difference in height, distance and angle between the battery commander and the guns under his charge.

THE NAVAL GUN.

Now while modern armies and navies have gained similarly in the striking power, rate of fire and range of their guns, the modern army has grown in the number of its unit —the man, while the navy has decreased in the number of its unit—the ship. The ease with which the heaviest guns can be carried at sea, as compared with the difficulty of their transport on land, has led to the evolution of larger naval guns, the most gigantic, destructive, and accurate of modern weapons. The tremendous size of these guns implies huge ships to carry them and hence the tendency of development of the modern navy to smaller numbers of ships, greater speed, quicker decisions. So great is the power of the modern naval gun that to-day probably no ship could withstand three broadsides of its own artillery, and as the actual speed at which a big ship can fire its guns is at the rate of three broadsides per minute, it is possible for one battleship in favorable circumstances to destroy another in a single minute. So far as pitched battles, as apart from running fights, have been fought they are extremely short. The battle of Tsushima, in the Russo-Japanese war, for instance, we are told by Admiral Togo, was virtually over in twenty minutes. The battles of the Falkland Isles and the Dogger Bank were longer, but were running fights. To show the increase and concentration of power in the naval gun of to-day, it is only necessary to compare the armaments of the fleet which Nelson commanded and the weapons of a modern fleet. At Trafalgar Nelson had twenty-seven ships, representing about a quarter of the navy, under his command, carrying 2,300 guns. If it were necessary for Admiral Jellicoe to take so many first-class ships into action, he would have to take almost our entire force of Dreadnoughts, say three squadrons, of twenty-four ships, and these would carry 240 guns. But the decrease in numbers of guns is more than counterbalanced by an almost incredible increase in power.

THE 15-INCH GUN.

Comparing the super-Dreadnought Queen Elizabeth of to-day with Nelson's Victory, we find that a single round from one gun of the Queen Elizabeth would be more powerful than both broadsides of Nelson's flagship. The advance in power has been increasing, but not uniform. The broadside of Lord Fisher's flagship in 1902 would be about double that of the Victory, but the broadside of the Queen Elizabeth is eight times more terrible than that of the Renown.

The 15-inch gun which is being mounted on all the modern battleships has been tested at the Dardanelles and was pronounced by Mr. Churchill to be "the best gun we ever had," accurate at all ranges, and "exceptionally long lived." According to information published before the war, the 15-inch gun weighs 96 tons, fires a shell of from 1,720 to 1,950 lbs., and has a muzzle energy of from 84,510 foot tons, with a range of nearly twenty miles. The gun used by the Germans to throw a few huge shells from near Dixmude into Dunkirk was supposed to be of a somewhat similar type.

Had Weak and Dizzy Spells.

WAS CURED BY MILBURN'S HEART AND NERVE PILLS.

Mrs. J. S. Nicholls, Listowel, Ont., writes: "I was weak and run down, my heart would palpitate, and I would take weak and dizzy spells. A friend advised me to take your Heart and Nerve Pills, so I started at once, and found that I felt much stronger, and my heart was ever so much better in a short time. I cannot praise your medicine too highly for it has done me a world of good. My husband has also been bothered with heart trouble ever since childhood, and finds quick relief by using your valuable pills."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally known as the very best remedy for all troubles arising from the heart or nerves.

Milburn's Heart and Nerve Pills 50c. per box, 3 boxes for $1.2[illegible] dealers, or mailed direct on [illegible] price by The T. Milburn C[illegible] Toronto, Ont.

—THE— Quiet Hour

FOR THOUGHTFUL PEOPLE

SUBMISSION AND REST.

The camel at the close of day
Kneels down on the sandy plain,
To have his burden lifted off,
And rest again.

My soul, thou, too, shouldst to thy knees
When daylight draweth to a close
And let thy Master lift thy load
And grant repose.

Else how canst thou to-morrow meet,
With all to-morrow's work to do,
If thou thy burden all the night
Dost carry through?

The camel kneels at break of day
To have his guide replace his load,
Then rises up anew to take
The desert road.

So thou shouldst kneel at morning's dawn
That God may give thy daily care,
Assured that He no load too great
Will make thee bear.

—Matthew xi. 29, 30.

BEHOLD, I MAKE ALL THINGS NEW.

Except a man be born again, he cannot see the kingdom of God.—If any man be in Christ, he is a new creature: old things are passed away: behold, all things are become new.

A new heart also will I give you, and I will take away the stony heart out of your flesh, and I will give you an heart of flesh.—Purge out therefore the old leaven, that ye may be a new lump.—The new man, which after is created in righteousness and true holiness.

Thou shalt be called by a new name, which the mouth of the Lord shall name.

Behold, I create new heavens and a new earth; and the former shall not be remembered, nor come into mind.

Seeing ... that all these things shall be dissolved, what manner of persons ought ye to be in all holy conversation and godliness?

QUIET.

There was quiet in the compass box as we sailed up the Baltic, and then there was an invasion, an eruption, and the compass card spun round like a top. The helmsman was frightened; the officer of the watch did not know; the next morning the captain surmised that the iron mountains of Sweden had brought a powerful [illegible] attraction, and for the time being the comp[illegible] were useless.

There was quiet in the cell of [illegible] monk in the middle ages, when [illegible] fled from the rough and guilty w[illegible] to think of and prepare for he[illegible] But here again there was an inv[illegible] and eruption; he had fled from [illegible] world and put it outside the cloister walls, but he found, alas! that he [illegible] brought the world in his heart [illegible] and he was confused and capt[illegible]

There was quiet in the cav[illegible] Elijah took refuge, he sought [illegible] from overstrain and a great [illegible] he promised himself repose, but th[illegible] came a voice "what doest thou h[illegible] Elijah." Again there was invasion [illegible] eruption, the hurricane and the fi[illegible] were but a preparation for the m[illegible] of the still, small voice.

There was quiet in the dell wh[illegible] the Master took His disciples and sa[illegible] "Come ye apart and rest awhile." [illegible] would give them a spiritual holiday, time to think of the trees sending down their roots, and taking a firm hold of the rocks, oh, these quiet days, such a retreat brings benefit; only two are necessary—oneself and the Lord. As on the Mount, we feel it good to be here, but we only tarry to be refreshed, to have our vision purified, and enlarged, and then we go down to duty.

There was quiet in the Cavendish Laboratory where Dr. Rendell Harris and a friend were trying to make a magnetic measurement. They could not make out what caused the instrument to behave in so extraordinary a manner, till they discovered that they were working in the neighborhood of some iron pipes, which were falsifying their results.

The human heart is an insulator; spiritual influences flow through it, and flow out. It is often the victim of sensations of the moment; success intoxicates, disappointment dejects. The heart is the life. Some day the old nature dies and a new nature is born. A new insulator invades and inspires, spiritual streams flow with the glory of a new light. There is disturbance, there is delight, departure, decision, and destiny, and anchorage in a quiet haven for ever!

TRUE LIVING.

We live in deeds, not years; in thoughts, not breaths;
In feelings, not in figures on a dial,
We should count time by heart-throbs.
He most lives
Who thinks most, feels the noblest, acts the best.
And he whose heart beats quickest lives the longest;
Life is but a means to an end—that end—
Beginning, means an end to all things—God.

A FORGIVING GOD.

The Lord is merciful and gracious, slow to anger, and plenteous in mercy. He will not always chide: neither will he keep His anger for ever. He hath not dealt with us after our sins; nor rewarded us according to our iniquities. For as the heaven is high above the earth, so great is his mercy toward them that fear Him. As far as the east is from the west, so far hath he removed our transgressions from us. Like as a father pitieth his children so the Lord pitieth them that fear Him.

Ye have received the Spirit of adoption, whereby we cry, Abba, Father. The Spirit itself beareth witness with our spirit, that we are the children of God. —Ye who sometime were far off are made nigh by the blood of Christ. —Now therefore ye are no more strangers and foreigners, but fellow citizens with the saints, and of the household of God.

A fashion item says men's trousers will be fuller this winter. Let us hope this applies to pockets.

In the sea of matrimony the drowning man will clutch at a straw, but it won't keep him afloat.

Many Women Suffer From Pains in the Back.

When the back begins to ache it is a sure sign that there is something radically wrong with the kidneys.

What you want is a kidney medicine Doan's Kidney Pills are not a cure-all, but a medicine for the kidneys only.

Mrs. L. Melanson, Plympton, N.S., writes: "I am sending you this testimonial, telling you what a wonderfu[illegible] cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housewor[illegible] I used several kinds of pills, but none o[illegible] them seemed to be doing me any good. At last I was advised to try a box o[illegible] Doan's Kidney Pills. When I h[illegible] taken the first box I found relief. I [illegible] used five boxes and to-day I feel [illegible] new woman. I cannot recommen[illegible] too highly."

Doan's Kidney Pills bea[illegible] mark of a Maple Leaf and [illegible] an oblong grey box. Se[illegible] "Doan's" when you ask [illegible]

LESS SURGERY THAN SORCERY

Marvels of France's Work for Maimed Soldiers.

Blind Men Are Cheery and Perfectly Independent.

"Somebody once reproached Watts with having made his Hope so melancholy a figure, crouching blindfolded over her broken lyre, and he replied that the whole point of the picture rested in the one unbroken string, from which all future melody must come. One remembers that reply when one sees something of what the French are doing for the re-education of the wounded. If ever a man might mope it is when he has lost his eyes or arms or legs, but the unbroken string is merrily played upon and made to give out cheery music.

"Surgery to-day is less surgery than sorcery. At the Maison Blanche near Paris, there are men amputated of both legs high in the thigh, who will shortly walk, go even kneel, with so little stiffness that they might pass for having but a slight touch of rheumatism. I talked to one man who excused himself for using sticks, smiling delightedly at his artificial legs, on the ground that he had only had legs for three days, "and one has to practise running for the train." The very stumps with which they are provided until the artificial limbs arrive are marvels of efficiency as compared with the butt end of wood or cork. The limbs are combinations of fine but strong springs, set in a leather and aluminum mould, and so well made that a leg is guaranteed for a lifetime, for every part is easily renewable.

The Maison Blanche, formerly a large hospital for women, is now a military hospital, with four separate medical staffs, for its different branches. The artificial limbs are its ruling occupation, but it has a ward for madmen, and another for those called "the confined." Here the men looked well, but their set eyes had no meaning in them. One seemed to be conscious of nothing but a spray of lilac in a royal blue medicine bottle; perhaps he was the happiest. But the staff knew how much worse they had been, how much better they would be, and how much good work was going on. The Maison Blanche could be [illegible] surpassed. The head of the work[illegible] where the patients can have a preliminary training in several trades, [illegible] exhibited [illegible] one of [illegible] masterpieces, [illegible] Indeed [illegible] store at the Grand [illegible] soon taken over by [illegible] as a hospital. For [illegible] has been lighted, [illegible] with packing cloth soaked in linseed oil and then coated with lime; each large room fitted with a small one as a service chamber, and contains over 1,000 beds. It has a complete installation of radioscopy, radiography, scientific gymnastics and such an array of machines for teaching hands to hold, feet to walk, arms to lift, heads to turn, as constitutes an Arabian night of wonders. Some of these machines on the Zander principle are extremely complicated, a terrific array of levers and wheels is necessary to move a finger in the right way; others are clever make-shifts, not very durable, but welcome as make-shifts. All the machines can be worked by the men unless they are helpless, and some have a whole programme to go through every day. Casts of the human body and its hurts and paintings of especially interesting wounds are kept. From some of these it is possible to teach anatomy to the blind.

If cheeriness is a characteristic of the maimed and the mutilated, the blind are positively gay. At the convalescent home in Reuilly, where they learn various trades, they sound from the garden like birds in an aviary. They can very soon distinguish a distant voice in a babel, and follow it, as the seeing can pick out a figure from a group and watch it. In the room where blind dictators were reading aloud to blind typewriters this was very noticeable. In the brushmaking department, also, conversations were going on comfortably across intervening men who were talking. In the big garden were blind men walking slowly, blind men on the arms of nurses, blind men holding each other, but also blind men walking freely from the hip, with a sure step, and stopping or turning a reasonable distance before they come to a wall or other obstacle. To walk is the first thing they are taught.

All over France this work is going on. The more a French soldier has suffered, the cheerier he is; and if ever one sees a long face it is a civilian's mourning, perhaps, for the very soldier who uses Hope's last string.—London Times.

A DEVOUT WISH.

(London Opinion)

MacQuirk—Yes, sir, my wife always finds something to harp on.
MacShirk—I hope mine does, too.
MacQuirk—What makes you say you hope she does?
MacShirk—She's dead.

WILLIE'S AGE.

(Puck)

Visitor—And just how old are you, Willie?
Willie—Mother says I'm too young to eat the things I like, and too old to cry when I don't get them.

"Nerviline" Cures Cramps Ends Misery Instantly

NO REMEDY SO SPEEDY OR EFFICIENT.

A real cramp cure?

Yes, a real one—in a twinkling the cramp is a dead one, and the last squirm is over, once you get a stiff dose of Nerviline on the inside.

This isn't mere talk—it's a solid, truthful fact. No other remedy—not a single one—will cure cramps so quickly and harmlessly as Nerviline. It hits the spot in a jiffy and saves a heap of misery.

"Last Saturday night my stomach felt like an infernal machine," writes T. P. Granger, from Hartford. "I was awakened from a sound sleep and found myself suffering the worst kind of torture. I was so doubled up I could hardly cross my room. I had used Nerviline before for the same thing, and took a real good dose. Once I felt the warm, soothing sensation of Nerviline in my stomach I knew I was all right. It finished the cramps—[illegible]"

Sickness at night is rendered a nightmare of the past if Nerviline is handy. It may be earache, toothache or cramps. Nerviline in every case will cure at once and save calling the doctor. Nerviline is a family physician in itself. The large 50c family size bottle, of course, is most economical; trial size costs a quarter. All dealers sell Nerviline.

Wheat too Dear? Then Try Rice

As the rising price of wheat sends it farther and farther out of reach of workingmen and workingwomen who must count their pennies before they buy their daily loaf of bread, it becomes more and more important to find foods that may serve as substitutes for the costly bread and still more costly meats.

As far more than half of the whole world's population depend mainly for subsistence upon rice, and as rice is one of the half dozen greatest energy foods obtainable from the cultivation of the soil, there is very good reason for eating more rice. It is easy of digestion. It is one of the easiest of all foods to cook. It keeps good longer than other foods after cooking. There is no waste. No other food has a like capability of being mixed or compounded with other foods, meats, fish or vegetable with appetizing relish. It follows that there are a thousand ways of cooking rice to make palatable appeal to the hungry, and there are new ways discovered from day to day. The Times makes no apology to its women readers for furnishing a few timely rice recipes:

RICE MUFFINS.

These must be prepared over night. Take a pint of warm milk, two cupfuls of boiled rice, which should also be warm; four cupfuls of flour, a teaspoonful of salt, a lump of butter and about one third of a yeast cake. Mix the rice, milk and butter and pour on the flour, beating it into a batter. Add the yeast, mixed with four tablespoonfuls of cold water, to the batter, and let it rise in a cool place until the morning. In the morning fill well-buttered muffin pans a little more than half full with the batter; set to rise in a warm place. Bake about half an hour.

RICE GEMS.

One-half cupful boiled rice, one cupful flour, one egg, one teaspoonful baking powder, one large cupful milk or enough to make a thin batter, one-half tablespoonful melted butter, one pinch of salt. Beat egg separately. Bake in buttered pans about 15 minutes in quick oven.

STEAMED RICE.

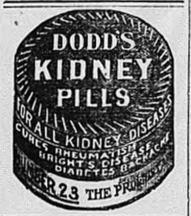
Half a cupful of rice, half a teaspoonful of salt and one and one-third cupfuls of boiling water. Put in small cups in a steamer, cover closely and steam three-quarters of an hour. Serve with stewed fruit and cream or sugar and cream.

LEMON RICE PUDDING.

Boil half a pint of rice in a quart of milk until very soft. Add to it while hot the yolks of two eggs, two tablespoonfuls of sugar, the grated rind of two lemons and a little salt; if too thick add a little cold milk; this should be a little thicker than a boiled custard. Turn into a pudding dish, beat the whites of the eggs very stiff with eight tablespoonfuls of sugar and the juice of two lemons, and brown the top delicately in the oven. Set on the ice until very cold.

RICE SOUP WITHOUT MEAT.

Four heaping tablespoonfuls of rice, three pints of water, butter size of walnut, two yolks of eggs, pepper and salt. Wash the rice in three waters. Rub dry, put it in a saucepan with one pint of cold water. When swelled add one pint of boiling water and when quite tender the remaining pint of boiling water. Add a saltspoonful of white pepper and a rounding tablespoonful of salt. Rub up the yolks of the eggs with four tablespoonfuls of cream. When smooth stir in carefully a few spoonfuls of the boiling rice water; then pour the eggs and cream into the saucepan, stirring very briskly. Draw aside and stir for two or three minutes. Do not allow the soup to boil after adding the eggs. Serve sprinkled with finely minced parsley and croutons.



RICE A LA PRINCESS.

Two cups of boiled rice, two eggs, half a cup of milk, pepper and salt, a boiled sweetbread minced fine or any cold meat minced and worked to a paste, with the pounded yolk of two boiled eggs, and well seasoned with salt, cayenne and a little lemon. Mix the eggs and milk and salt into the hot rice and stir in a saucepan until stiff. Let it get cold, make into flat round cakes. Inclose a spoonful of the meat paste in the centre of each and roll the rice ball round. Dip in beaten egg, then in cracker crumbs, and fry carefully in plenty of hot lard. Drain and serve very hot.

RICE WAFFLES.

Boil half a pint of rice and let it get cold; mix with it one-fourth pound of butter and a little salt, stir in 1½ pints of flour, beat five eggs separately, and yolks together with one quart of milk, lastly the well beaten whites. Beat well and bake at once in waffle irons.

RICE AND TOMATOES.

Rice and tomato are excellent to serve together. To a cupful of boiled rice add a half-cupful of strained tomato sauce which has been well seasoned with butter, salt, pepper and a bay leaf. Toss them together and mix lightly with a fork, so as not to mash the grains.

THE LOST TIME.

(Washington Star)

"It only takes me twenty minutes to get to my office," said Mr. Chuggins.
"But you didn't arrive until an hour after you telephoned that you were leaving home."
"Yes. It took the other forty minutes to get the car started."

DIFFERENT.

(Boston Transcript)

"That horse of yours interferes."
"Wal, he ain't interferin' with you, is her"

Von Hindenburg On the War.

(New York Sun)

It may be assumed that the Chief of the German General Staff has no time to waste on interviewers. He carries on his broad shoulders the destinies of Germany, and his business is to organize victory, if it can be done. Therefore when Field Marshal von Hindenburg talks about the war for publication, there is a reason. We fancy that the purpose of the interview given to the world by the Vienna Neue Freie Presse was the encouragement of Austria-Hungary. Assisted by his Quartermaster-General, von Ludendorf, who is probably the more fluent, the Field Marshal made out a plausible case on paper for the triumph of the Teutonic allies. It pivoted on the exhaustion of France. "The French," said he, "show great tenacity, but they are exterminating lives by their method of fighting." He added that in the end "there would be none of them left."

But what about Austria, the only ally upon which Germany can place any dependence? Will not the argument of extermination also apply to the Austrians, beset on three sides by their enemies? The population of Austria in 1912 was 28,905,844; that of France the year before was 39,601,509. Later figures are not available. Would not the exhaustion of Austria come first as the war is being conducted to-day? The German Field Marshal, be it noted, speaks only of men, of effectives. Economic exhaustion he does not touch on; yet he must be aware that as compared with France Austria is at an ominous disadvantage in being unable to import foodstuffs and equipment for her armies in the field.

PILES CONQUERED by the drugless [illegible]. No [illegible] ments or appliances. Everything simple when you know how. Write and learn more. Get this treatment with [illegible]
THE ARONA CO. 165 North Bay St. A, Hamilton, Ont. Ca

The extermination argument seems rather forced. Von Hindenburg says nothing about Great Britain's present and continuing losses, and makes no allusion to those of Germany, which are published at Berlin and already far exceed [illegible]. The fact is that if emphasis is laid upon the effect of the casualties incurred by France, those of each opposed allies must be considered, which leads to a survey of census statistics. Not to go deep into the subject, Germany's population on June 20, 1914, was estimated to be 67,812,000, and at the same time the population of Great Britain and Ireland, Canada, Australia and New Zealand (including other constituents of the empire) was certainly not more than 10,000,000 less than the estimate made for Germany. So that if Austria-Hungary, with a population 16,000,000 less than that of France, be added to Germany, the two groups are about equal. And Bulgaria and European and Asiatic Turkey (respectively 4,452,427 and 21,273,900), allowing for the natural increase in each case over a census taken several years ago, and Germany and her allies have a total population of no more than 125,000,000 to draw on.

The Entente with [illegible] estimated in 1914, Italy with 36,120,118 (estimated January 1, 1915), Roumania with 7,508,009 (census December 19, 1912), France with 39,601,509 (census of 1911) and Great Britain and her colonies, for the moment, with [illegible], yield the grand total of 220,000,000 or more. The figures are approximately correct.

Obviously there can be no exhaustion of men on the side of the Entente Allies, and certainly no exhaustion of supplies, as they control the seas. Exhaustion of finance is another matter. If the Entente Allies can keep their war chests full, what they may have to fear is the military skill of the German strategists, notwithstanding the fact that they command armies inferior in numbers to those of the Entente Allies.

"We never were afraid of the Russian numerical superiority," says the German Chief of Staff, "we know no numerical superiority." Brave words, but that and a long purse are really what the Germans do fear.

THE ONLY WAY TO CURE RHEUMATISM

Must Be Treated Through the Blood and the Poisonous Acid Driven Out.

The twinges and tortures of rheumatism are not due to cold, damp weather, as so many people suppose. Rheumatism comes from poisonous acid in the blood. This is a medical truth that every rheumatic sufferer should realize. There is only one way to cure rheumatism—it must be treated through the blood. All the liniments and rubbing and so-called electrical treatment in the world will not cure rheumatism, and the sufferer who tries them is not only wasting money, but is allowing the trouble to become more firmly rooted in the system and harder to cure when the proper remedy is tried. Dr. Williams' Pink Pills have had remarkable success in curing rheumatism because they go right to the root of the trouble in the blood, driving out the poisonous acid, releasing the stiffened joints, clearing away the torturing pains, and giving the victim renewed health and ease. Mr. Vincent Brow, Havre Boucher, N. S., says: "For two years I was an almost constant sufferer from rheumatism, the trouble being so bad at times that I could scarcely get about. The trouble seemed to bring with it anaemia, and altogether I was in a very bad condition. I used doctor's medicine for almost a year without relief. Then on the advice of a friend I decided to try Dr. Williams' Pink Pills. I think I took altogether about a dozen boxes, with the result that I am now enjoying perfect health."

You can get these pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

NEW TETRABELODON.

Nebraskan Finds Skeleton of Extinct Animal On a Farm.

A few miles northeast of Bristow, Neb., lives Z. T. Long, who about a year ago went to inspect a pasture on his farm, where streams, swollen by heavy rains, had caused gullies. In one of these gullies he was surprised to see what appeared to be part of the skeleton of some enormous animal. He set about excavating it, but found the job so big as to require special apparatus and men specially trained in the work if the bones were to be taken out uninjured and properly kept in place. So to avoid having his discovery tramped upon by herds of cattle he enclosed it by a barricade and sent word to the University of Nebraska.

Without delay two of the university's scientific staff, Prof. [illegible]win H. Barbour and C. Harold E[illegible] started for the Long farm. Wo[illegible] was commenced at once, and within two weeks the skeleton of a new tetrabelodon, practically complete, was discovered. In recognition of a distinguished resident of New York, Dr. Henry Fairfield Osborn, Prof. Barbour has named this new proboscidean Tetrabelodon osborni.

In brief, says Prof. Barbour, the skull is that of an "unelephantlike elephant." The dome is unexpectedly low; the occiput flat, though rounding above; the pit small. Cranial walls are strikingly thin, and the air cells generally reduced both in size and in number. These do not extend to all parts of the skull as they do in mammoths and modern elephants. Furthermore, they are wanting altogether in all portions of the zygomatic arch.

The articulated forelimb of this creature indicates an animal little more than seven feet in height, half that of a large mammoth. The vertebrae seem large out of all proportion, being equal in size to those of the mammoth. This new species of tetrabelodon was short legged, broad hipped, heavily bodied and perhaps semi-aquatic in habit. Its body must have dragged close to the ground, adds Prof. Barbour, not unlike the short legged rhinoceros.

The jaw is that of an adult, but not an aged individual, as is indicated by the number and condition of the teeth, which slant backward and inward. The low stature of the creature, seven feet, and the long jaw, five feet, made it easy to reach the ground with the lower tusks. It was a grotesque head on a grotesque body. A conjectural restoration of the head drawn in outline appears in the American Journal of Science.

A New Blood-Food Has Been Discovered That Works Wonders

SAID TO PUT NEW LIFE INTO PEOPLE THAT ARE RUN-DOWN.

For years doctors have been searching for a combination that would enable them to inject into thin blood the elements it lacked. This can now be done, and any weak-blooded person can quickly be made strong and well.

Already a small army of ailing people has proved the merit of taking after each meal with a sip or two of water, two chocolate coated Ferrozone Tablets. This is easily done, and even one week's use of this wonderful blood-food will prove its nourishing and strengthening and flesh-building [illegible].

Just think [illegible] uplifts the entire nervous system, removes the blood, makes it rich and red—gives the [illegible] in throwing off weakness and languor.

Tens of thousands enjoy the advantages of renewed health through Ferrozone—[illegible] you'll surely grow strong, too; its beneficial action is noticed even in a week. You are [illegible] right to work. Ferrozone [illegible] the cause of the trouble and then quickly takes a [illegible].

For those who sleep poorly and have nervous apprehensions, Ferrozone is a [illegible] specialist in such cases.

Where there is paleness, poor appetite and languor, Ferrozone makes the patient feel like new in a few days.

In tiredness, nerve exhaustion, spring fever or debility the power of Ferrozone (known from coast to coast and universally used with grand results).

Let Ferrozone build you up, let it win you back to robust health. It will do so quickly if you give it the chance. Sold by all dealers [illegible] per box or six for [illegible]. Remember the name Ferrozone.

Waltzing Ostriches.

One of the oddest sights of the sandy stretches of [illegible] in southern Africa is a party of waltzing ostriches. A writer on the subject thus describes their queer antics:

"When there are a number of them they will start off and after running a few hundred yards will stop and, with raised wings, will whirl rapidly round till they are stupefied or perhaps break a leg. The males pause also before fighting. They kneel on their ankles, opening their wings and balancing themselves alternately forward and backward or to one side or the other, while the neck is stretched on a level with the back, and the head strikes the sides, now on the right, now on the left, while the feathers are bristling. The bird appears at this time to be absorbed in its occupation as to forget all that is going on around him and can be approached and caught. The male also utters a cry, which sounds much like an effort to speak with the mouth shut tight."—Philadelphia Inquirer.

A SUCCESSFUL SOLUTION

The railway unions of North Bay have solved the high cost of living. Some time ago a special committee was appointed to purchase food and fuel supplies as required by their members. The committee has handled within the past week two carloads of potatoes, two cars of wood, forty head of cattle, two tons of honey, eight carloads of coal, and fifty carloads of hardwood. In a few days it expects a carload of groceries and two of apples. The committee is composed of twenty-five members, representing different crafts, and has saved 30 per cent. on its purchases to date.

TOO DEVOTED.

(Washington Star)

"Have you been studying the science of efficiency?"
"Yes; but I quit reading about it. Got [illegible] and I found it was [illegible] regular work."

Rubber Supply Steady While Leather Gets Scarcer

This Explains Low Price of Rubber Footwear in Spite of Increase in Cost of Chemicals, Fabrics and Labor.

The war is using up enormous quantities, both of leather and rubber. At the same time it is seriously restricting the output of the former, much of which came from Russia—while rubber production keeps pace with the demand. From the great plantations now reaching maturity in Britain's tropical Dominions will come this year 150,000 tons of raw rubber—75% of the world's production, and an increase of over 40,000 tons over last year.

Thus, thanks to the British Government's foresight in encouraging these plantations, the Allied armies have been abundantly supplied with all the rubber products they need—Germany and her allies have been cut off—and the price to the world at large has actually been reduced. Meanwhile leather has been getting scarcer and more expensive—80% higher than in 1914—and the end is not yet.

At normal prices a pair of good shoes cost about four times as much as a pair of rubbers—and would last twice as long if rubbers or overshoes were worn to protect them. Or a pair of heavy rubbers for the farm cost much less than heavy shoes, and would stand much more wear in bad weather. So even before the war rubbers were a mighty good investment, to say nothing of their prevention of wet feet, colds and doctors' bills.

Now, when leather costs so much more in proportion, the saving from wearing rubber footwear is so outstanding that no one who believes in thrift will think of doing without rubbers, overshoes, rubber boots, or whatever kind of rubber footwear best suits his needs. Nor will he who is anxious to help win the war, for by wearing rubber he conserves the leather that is so scarce, yet so absolutely necessary to the soldiers.

Wear Rubbers and Save Leather for our Fighting Men

SHINING TRESSES.

Doctor's Suggestions About Shampoos and Daily Care of Hair.

Although it may not be possible or indeed desirable for every woman to have tresses of Godiva-like abundance, it is within the power of almost everybody to have a fine head of hair or to possess what looks like one, whether her locks are long or short, thick or [illegible] fair or just middling, dry or oily, da[illegible] in the brown. The whole secret [illegible] care state of the health and the daily [illegible] of the hair.

If the hair is in an impoverished condition, abnormally greasy or abnormally dry, showing a tendency to become brittle and break off short; if it loses its color and bulk, then it is no good in beginning any hair treatment without first attending to the general state of the health.

One should take sufficient exercise and rest and correct any indiscretions in diet. When an anaemic condition exists a tonic often does wonders, so will a course of cod liver oil, while raw [illegible] which directly [illegible].

As to the general care of the hair, it should be washed as often as it requires cleaning. Once a week is not too often for a very oily type of hair, and about once in three weeks is a good average for ordinary hair.

If it is washed at home liquid soap is the best thing to use. The hair should be thoroughly wetted with warm water, then a handful of the liquid rubbed in. If it does not lather at once use a little more water and a little more liquid till the whole head is in a perfect foam; rinse out the lather very thoroughly, take the worst of the moisture off with hot towels and dry by brushing and fanning. Do not on any account seek to dry it by the fire.

The daily care of the hair is most important. It should be well brushed every night, the scalp being first of all treated with a rather hard brush to stimulate the circulation and the long hair afterward brushed with long, sweeping strokes, two brushes with rather long stiff bristles being used. They keep the hair clean and give it a natural gloss.

PILES CURED at HOME By New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. Summers, Box P. 8, Windsor, Ont.

Limbs.

Limbs come on trees and people. They are seen on trees, in court rooms, on the stage and at the seaside. They may be covered with bark, plaster or silk, as the case may be.

Limbs are useful in many ways. Policemen, who are very economical and therefore never get into deep water, use only one at a time. Soldiers use them for various purposes, sometimes standing upon them and sometimes running away.

Limbs are made of cork, wood or bone. Cork limbs are useful on life preservers. Wooden limbs can be taken off and used for purposes of defence. Bone limbs often enable one to get on one's feet.

Rough On the Surgeon.

In the ancient life of Mesopotamia the surgeon failed to occupy the exalted position accorded him in the present age, and to discourage him from making rash operations severe penalties were fixed in case of unsuccessful ones. If the patient died the surgeon's hands were cut off. In the case of a slave he had to replace him with one of equal value. If the slave's eye was lost he had to pay half the value of the slave. If a veterinary surgeon were successful he received one-sixth of a sh[illegible] but if the animal died he [illegible] one-sixth of its

THE FUND'S NEW PRESIDENT

THE DUKE OF DEVONSHIRE BECOMES THE CHIEF EXECUTIVE OF THE CANADIAN PATRIOTIC FUND.

Ottawa, Nov. 29.—The new Governor General, the Duke of Devonshire, has manifested his interest in the work being carried on by the Canadian Patriotic Fund by consenting to become the President of the Fund. This position was held by the Duke's predecessor, the Duke of Connaught, from the inception of the fund until his departure from Canada and the front position of the fund in nation[illegible] his de[illegible] and financial strength is present [illegible] to his inspiration and al confidence [illegible] to its interests. The largely due [illegible] general evidently proposes personal devo[illegible] same active part in new Governo[illegible] welfare of [illegible] great poses to take [illegible] promoting [illegible] taking.

Corns Drop Out INSTANT RELIEF

Paint on Putnam's Corn Extractor tonight, and corns feel better in the morning. Magical, the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "Putnam's" Extractor to-day.

A BEAUTIFUL NECK.

How to Improve Your Throat Without Slavery to Routine.

We all know that the neck should not be too short; should be smaller at the top than where it joins the chest and shoulders; that the shoulders should be neither too broad and well developed nor too narrow; that the bones of the chest and back should not be buried with flesh.

It is not given to every woman to have a beautiful neck and shoulders and chest. But she can make the most of the trio, as nature gave them to her, by massage and exercise. And she can chest and shoulders becomes secondary.

Often the skin of the back and chest and shoulders will have small eruptions when the face of the person is clear and free from any such disorder. This is because the clothes cover the body so tightly that the air and sun have no chance to purify the skin beneath as they do the skin of the face.

Frequent baths of sea salt also tend to clear the skin of the neck and bring the blood to the surface, giving it the glow of health. Olive oil or some good cold cream applied to this part of the body keeps the pores open and helps the skin to throw off and secretions which are clogging the pores.

Exercises which stretch the muscles of the back, chest and neck will keep away any superfluous flesh and make the flesh hard and firm.

The neck sometimes gets dark from high and tight collars. For a bleach use the magic of lemon juice diluted one-third with water. Sponge with it and allow to dry on.

Oatmeal is splendid for whitening the skin and may be used freely.

TRAPPERS! Send your RAW FURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commission and pay all charges. We have paid out millions of dollars to thousands of trappers in Canada who send their furs to us because they know they get a square deal, and receive more money for their furs. You will also. We buy more furs from Trappers for cash than any other five firms in Canada.

WIT AND HUMOR

QUIBBLING

(Boston Transcript)

"I'm sorry, my daughter, to hear you make light of marriage."
"Why, it's all right to make light of a match, isn't it?"

CLASSIFICATIONS.

(Louisville Courier-Journal)

"Oil wells are divided into gushers and spouters."
"Wells did you say?"
"I said wells. What should I say?"
"I thought maybe you were alluding to the promoters."

WHY THEY LIE.

(Washington Star)

"Some men fails to tell de truth," said Uncle Eben, "simply because dey's overloaded wif originality and a desire to please."

BOBBIE'S ANSWER.

(Judge)

Teacher—This makes four times I've had to punish you this week, Bobbie. What have you to say to that?
Bobbie—I'm glad it's Friday, teacher.

DEPENDS ON THE BRAND.

(Washington Star)

"Do you really think the public likes to be humbugged?" asked the man of many anxieties.
"Yes," replied Senator Sorghum; "when the humbug is pretty and harmless. But they resent the kind that buzzes around waiting for a chance to sting em."

REGULAR RATES.

(Boston Transcript)

Editor—What compensation do you expect for your poem?
Poet—Regular rates.
Editor—All right! Thanks!

NOT A NEW ONE.

(Judge)

She—What is the trouble between Millie and Arthur? Have they had a new quarrel?
He—No. The patch came off their old one.

HAD THE NAME SURE.

(Louisville Courier-Journal)

"Yes, I am going on the stage."
"Well, I hope you succeed in making a name for yourself."
"That has already been attended to. I picked a beautiful one out of a romantic novel."

THE BUSYBODIES.

(Birmingham Age-Herald)

"There are a great many people in this world who don't know what's good for them."
"Perhaps so," replied the cynical man, "but they always have plenty of neighbors who would gladly tell them what is good for them, if they would only listen."

A CONNOISSEUR.

(Washington Star)

"Are you an art connoisseur?"
"Yes," replied Mr. Comrox; "although I should never speak of myself as such."
"Why not?"
"Because I'm not absolutely sure I know how to pronounce the world."

THE NEWEST CAR.

(Baltimore American)

"Do you know how to handle an emergency?"
"Is that going to be one of the new makes?"

NEWLYWED'S TROUBLES.

(Puck)

Grace (sobbing)—You don't love me! I know you don't.
George—Why, darling, what makes you say that?
Grace—Because you're not jealous. Maude Mullins has been married nearly a year, and her husband's so jealous he has shot at her twice and tried to kill himself three times.

DIFFERENT.

(Boston Transcript)

"That horse of yours interferes."
"Wal, he ain't interferin' with you, is he?"

A SOFT [illegible]

(Judge)

[illegible] he got a soft job?
Pupil—I guess so. He lies down on it all the time.

JOSH'S TASTES.

(Washington Star)

"So your boy Josh is looking for a position."
"Yep," replied Farmer Corntossel.
"What kind of a position does he desire?"
"I dunno exactly. But to suit Josh's tastes these days, it'll have to be something graceful and easy."

THE WORD "LOVE."

In the Orient It Means to Like or is Used to Express Good Will.

The word "love" has been more highly specialized in the west than in the east. In its proper English use it means only that ancient, amorous feeling which cannot be created by will and design. In the west the word "love" has been relieved of the function of expressing the less ardent desires, such as the terms "to like," "to have good will toward" and "to be well disposed toward" simply.

Not so in the east. The word "like" meaning "to be favorably inclined toward," is not found either in the Bible or in the Arabic tongue. In the English version of the Bible it is used in two places, but the translation is incorrect. In the twenty-fifth chapter of Deuteronomy and the seventh verse, "If the man like not to take his brother's wife," should be rendered "If the man 'consent' not," and in the fourth chapter of Amos, the fifth verse, "If this liketh you, O ye children of Israel," is the original, "For this ye 'loved,' O ye children of Israel." In any standard concordance of the Bible the Hebrew verb which—to love—precedes these quotations.

So to us orientals the only word which can express and cordial inclination of approval is "love." One loves his wife and children and loves grapes and figs and meat, if he likes these things. An employer says to his employee, "If you 'love' to work for me according to this agreement, you can."

It is nothing uncommon for one to say to a casual acquaintance whom he likes: "I must say, sahib (friend), that I love you!" I know of no equivalent in the Arabic for the phrase, "I am interested in you." "Love" and "hate" are the usual terms by which to express approval and disapproval, as well as real love and hatred.

From all this it may be seen that when the Great Oriental Teacher said to his countrymen, who considered all other chaps than their own as their enemies, "Love your enemies," he did not mean that they should be enamored of them, but that they should have good will toward them. We cannot love by will and design, but we certainly can will to be well disposed even toward those who, we believe, have ill will toward us.—Abraham Mitrie Rihbany in Atlantic Monthly.

Teacher—What is the difference between the sun and the moon? Pupil—Please, sir, the sun's bigger and healthier-looking than the moon because he goes to bed earlier.—Chicago Herald.

THIS STORE WILL BE OPEN EVENINGS ALL NEXT WEEK

FOR CHRISTMAS SHOPPERS

OUR NEIGHBOR[illegible]NG TOWNS, VILLAGES, AND COUNTRYSIDE

Newsy Happenings of the Week Collected for Our Readers by a Staff of Live Correspondents

CARGILL

Mr. Phillips of Stratford is relieving our G. T. R. agent, Mr. Russell, who is having two weeks vacation.

Miss Lillian Seiling, our popular milliner left for her home in Mildmay on Saturday.

Miss Marie Maloney of the Queen's Hotel, Walkerton, is visiting at her home here.

Mrs. F. F. Balsdon and Mrs. (Dr.) Bricker left for their respective homes in Pickering and Toronto on Tuesday.

Mr. M. L. Ziegler made a business trip to Toronto on Thursday last.

Messrs Jas. F. Clancy and Dave George of Walkerton, spent Sunday with friends here.

Mr. R. A. Fewke made a business trip to Paisley on Tuesday.

Miss C. W. Keeling spent the week-end with friends in Paisley.

A memorial service was held in St. Andrews Church here to the memory of the the late Lieut. S. L. Young, who was killed in action about Nov. 15th, 1916. The vast numbers who attended the service go to show the high esteem in which the deceased was held.

We understand that one of our ministers intends buying a new car next year. Not likely it will be [illegible] to be treat them as a joke.

A concert will be given by the Public School in the Hall, Dec. 21st. Be sure and come it will be worth while.

Messrs F. H. Smith and W. Knoer spent Sunday at the former's home in Walkerton.

BORN—To Mr. and Mrs. Joseph Schumbach, on Sunday, Dec 3rd, a daughter.

A Cantata entitled "Santa's Surprise Party" will be given by the Cargill Public School in the C. O. F. Hall, Cargill, on Thursday night at 8 o'clock, Dec. 21st. Songs, dialogues and recitations complete this splendid programme. Proceeds to go to Patriotic purposes. Admission for adults 25c, children 15 cents.

EDEN GROVE

Well, Sarah Jane, this looks a little more like Santa Claus weather.

The youngsters and teachers are having a busy time getting ready for their Christmas festival on the 22nd.

Miss Gertie O'Reilly, graduate nurse of Guelph, is enjoying her Christmas vacation at her home, King St. East.

There was quite a stir in the grove last week when one of the Elmwood merchants had an auction sale of goods in the Opera House. The people soon found it was hard to beat their home merchant and the sale stopped—the man who helps to build up your town and is always on the job, is the man to patronize.

Mrs. J. Metcalfe from the 10th left for Michigan on Monday.

Mr. O'Reilly shipped a car of fine grunters on Tuesday.

Sunny Jim called on Cargill friends Wednesday evening.

Let us have a good lively election in the Township this year.

Mr. Jim Sparling of Cargill was in the Grove on Monday renewing old acquaintances.

A large number of the late Lieut. Leslie Young's friends from here attended the memorial service held in Cargill on Sunday afternoon.

Mr. Doer of Chepstow shipped a load of cattle from here on Tuesday.

Not only for a day but for 52 times during the year you can gladden the hearts of your friends in the distance by paying a year's subscription in their name for the 'Telescope.' Try it.

Mrs. Conners called on Paisley friends last week.

Sunday the minister preached on "Love your Enemies." How would it do to hang a nice present for them on the Christmas tree just to show there is no hard feelings on your side.

Miss Mary Wilson from the 10th visited at the home of Mr. and Mrs. A. McKeeman, King St. previous to leaving for a visit to Michigan.

Miss [illegible] Reid visited friends in Owen Sound and other northern towns last week.

Our Merchant reports business picking up. A large quantity of grain coming in to the elevators puts the money in circulation and it takes money to go far these days unless you walk.

Miss Edna Emery attended the Foresters Banquet held in Pinkerton last week.

Mr. Morris McCarthy of the 12th intends spending the winter in California.

GLAMIS

Mr. John Groves of Kerrobert, Sask., arrived here on Saturday to spend the winter with his parents, Mr. and Mrs. J. Groves.

BORN—To Mr. and Mrs. Daniel Bell, [illegible], Kincardine, on Sunday, Dec. 10th, a daughter. Congratulations.

The Annual S. S. Entertainment of the Presbyterian and Baptist Churches will be given on the evenings of Dec. 19th and 20th, respectively. Don't forget the date. Come everybody.

Additional Correspondence on Page 5

Miss Sadie Showfeld of Kincardine is nurse in attendance at Mr. Daniel Bell's.

The Ladies Missionary Society of St. Paul's Church held their business meeting for the year on Wednesday.

Gunner James McCormick of Edmonton, Alta., spent the past week with his parents, Mr. and Mrs. J. B. McCormick and renewing other acquaintances. He enlisted last June and a few weeks ago was transferred to the Royal Navy. He left this week for Halifax whence he will go Overseas. All wish Jim success and a safe return.

Messrs. Walter Webb and George Percy and Misses Florence and Elsie Webb attended the box social in their sister Mary's school near Vesta on Friday evening.

The name of Corp. C. E. Russell of Mt. Hamilton appeared in the casualty list on Thursday. "Killed in Action." Corp. Russell is well known here.

On Wednesday of last week Mr. Hector McNally, Boundary West, surprised his friends by taking unto himself a wife, Miss Annie Gottschalk of Tiverton. They left last week for Detroit. Their many friends join in wishing them much joy and happiness.

Quite a number from here attended the Bradley box social on Friday evening. All report a good time.

The many friends of Mr. Albert Swanwell will be pleased to learn that he is doing nicely in Guelph Hospital. The operation of breaking the bone and resetting it seems to be satisfactory so far. All wish for his speedy recovery and that he will soon be home.

MILDMAY

On Thursday evening of last week Mrs. Conrad Liesemer while coming down the steps of the veranda in front of her home accidentally slipped and fractured a hip bone. She is getting along as well as might be expected.

Mr. John Coates, druggist has purchased Mr. Eidt's house in Mildmay lately occupied by Mr. Peter Liesemer. The price we understand is around [illegible].

The weather on Monday Dec. 4th, was very unfavourable for the monthly meeting of the Bruce Preparedness League. However a fair crowd was present. Mr. J. Thompson acted as chairman. The topic for the evening was Immigration. It was discussed under three heads by three speakers. Mr. J. A. Johnston opened the discussion [illegible] on what countries w[illegible] grants from the characteristics of each people, which people are desirable and which are not desirable. Dr. J. A. Wilson followed his up speaking on immigration from a national viewpoint. He suggested a limiting of franchise for the immigrant, and stricter medical examination at the port of entry. Mr. Wm. Wendt dealt with assimilation of the immigrants or the manufacture of Canadians out of the raw material of foreigners. He laid emphasis on the teaching of the English language to them.

The ladies of the U. J. Knitting Club delighted the audience with several patriotic songs. The Wurtlaer Orchestra played several choice musical selections. In it altogether it was a very enjoyable evening. A collection was taken and handed over to the U. J. K. Club.

Rev. Mr. Holland of Victoria College delivered two well received addresses in the Methodist Church on Sunday last.

Mr. Kalbfleish has finished his garage and has several cars in it which are to be overhauled during the winter.

Mr. Gideon Schieler returned from the West last week. He reports that conditions are fairly good in the part he visited.

It looks like an election in Carrick this year. Nominations are to open on Friday, December 22nd.

Mr. Peter Liesmer has moved to his new home which he has lately bought from Mr. J. S. Milne.

Mr. Albert Leach returned home from the west last week.

Mr. Anthony Strauss held an auction sale on Thursday last. Mr. Strauss intends to move to the West in the spring. He will locate at Provost, Sask.

The next monthly meeting of the B. P. League (Carrick Branch) will take the form of a box social and entertainment to take place on Dec. 29. Mr. C. M. Bowman of Southampton, M. P. P. will speak at this meeting.

Mr. J. A. Johnston motored to Teeswater on business on Monday afternoon.

The following books have been added to the Mildmay Public Library during the past week:—Pioneer Life among the Loyalists in Upper Canada, by Herrington; In Pastures Green, Rod of the Lone Patrol; Rhymes of a Red Cross Man; Rev. Wm. Sunday, The Man and His Message; When a Man's a Man; Between the Lines, Boyd Cable; Amateur Gentleman; The B[illegible] The In[illegible]the Cup; Polly Anna; A Fool and His Money; The Calling of Dan Matthews; That Printer of Udell's; Crip of the Flying U; Flying U Ranch; The Little Shepherd of Kingdom Come; The Silver Maple; Treasure Valley; Freckles; At the Foot of the Rainbow; Song of the Cardinal; The Riverman; Tom, Dick and Harry; The Ne'er-Do-Well.

WESTFORD

Miss Annie Miller and her brother, Peter, of Teeswater spent Sunday at Mr. John McGlynn's.

Mr. Arch McFarlane and family visited at Mr. Ed. Walls on Saturday.

Mr. Henry Mcilyon of Belmore and his niece, Miss Maude McGlyen of Detroit, spent Monday afternoon at Mr. P. Linehan's.

Messrs. Howard and George Haldenby have returned home after spending a few months in the West.

Miss Irene Cassidy of Greenock has returned home after spending a week with her aunt, Miss Fallon.

Mrs. Peter Murray spent the week-end with her mother, Mrs. Donovan of Holyrood.

We are pleased to report that Master Art Hodgins has quite recovered from his recent illness.

FORMOSA

Mr. James Kraemer, his son Fred, and Mr. Albert Bildstein, left on Monday for Porcupine.

Miss Abbie Weigers, whose death occurred at Stratford on Monday will be buried here to-day. She was an adopted daughter of the late F. H. Messner.

PRAISES PUBLIC SCHOOL

Inspector John McCool Commends the Work of Walkerton Public School Staff in Highest Terms.

Inspector John McCool's report of his inspection of the Walkerton Public School, presented by him some time ago, and read at the last meeting of the Board, speaks in the highest terms of the work being done.

The staff is first class, he reports. While the Inspector regrets the departure of Miss Sinclair, he is very glad she secured a position worthy of her scholarship and ability, and also that the Trustees were fortunate in securing a worthy successor. The promotion of Miss Warren was well-merited. Every subject is well taught from the lowest form to the highest. The essential and important subjects of reading, writing, spelling, and Arithmetic are exceedingly well taught. If the Trustees care to take a glance through each room, they will have no trouble in learning the attention given to Art and in noticing how very attractive each room is made by maps, drawing and pictures. In this regard, Walkerton takes easily first place in the Inspectorate.

Under "General Remarks," the Inspector pays a further high compliment: For several years the high standing of so many Entrance pupils from Walkerton public School has reflected much credit on the Principal and Staff. A Walkerton pupil, Norman Shaw, really won the County Gold Medal at the Entrance Examination, as only the written examination should be counted, not Oral Reading, and he was 9 marks ahead on the written examination.

The teachers' salaries at time of inspection were:—Prin. Willoughby, $1025, Miss J. Stead, $650, Miss Mary Rose, $500, Miss A. Warren, $475, Miss Annie Thompson, $500, Miss W. Thompson, $475, Miss A. Halladay, $500.

The total enrollment was 228, average attendance for last month 210, or 92 per cent.

Notice to Creditors

In The Supreme Court Of Ontario. In The Matter of Perry Eli, A Lunatic

PURSUANT to the order of the Supreme Court made in this matter, creditors of Perry Eli of the Town of Walkerton in the County of Bruce are required, on or before the 20th day of December, 1916 to send by post, prepaid, to John Henderson of Walkerton, the Committee of the person and estate of the said Perry Eli, their christian names and surnames addresses and descriptions, and full particulars of their claims, a statement of their securities and the nature of the securities, if any, held by them, or in default thereof they will be peremptorily excluded from the benefit of the proceedings under said order.

Every creditor holding any security is to produce the same before me, at my chambers in the Court House at Walkerton, on the 21st day December, 1916, at ten o'clock in the forenoon, being the time appointed for adjudication of claims.

Dated this 17th day of November, 1916.

A. M. Greig,
Local Master at Walkerton,
pro tem.

Messrs. Robertson & McNab,

Hydro Case Presented At Nomination Meeting

Hydro Engineer James

States Emphatically that the Interests of the Walkerton Electric Light Co. will be Fully Protected if Walkerton Gets Hydro—Shows How Hydro has Wrought a Revolution in Power Rates in Ontario—Municipal Candidates Speak.

At the Nomination Meeting Friday night the ratepayers heard a clear and convincing statement regarding the working of the Hydro Electric System, what Hydro has done for over 200 cities, towns and villages of Ontario and what it will mean to Walkerton if the property-owners carry the Hydro Enabling By-law next Monday. Mr. James, district engineer of the Hydro Electric Power Commission of Ontario and Mayor Lippert were the speakers on Hydro. Mr. James was able to clear up a number of points on which there was uncertainty in the minds of some people. First of all he assured the audience that it was not the policy of the Hydro Commission to treat local power companies any way but fairly, and he emphatically stated that the interests of Messrs Robertson and Rowland, owners of the local power plant, would be fully protected. This authoritative assurance from an officer of the Commission removes the last objection that could be mustered against the by-law.

Costs Nothing In Taxes

Mr James showed that the taxpayers have absolutely not one cent to pay towards the cost of installing and operating Hydro, everything being paid by the Consumers. Hydro lighting and power rates provide for the cost of running expenses in maintainance, wear and tear, and also for meeting the debentures coming due annually on the Hydro investment. At the end of twenty years, the town will have an up-to-date plant entirely paid out of rates, as well as being part owners of the Hydro Electric System of Ontario. When this point is reached, the people of Hydro towns will be getting their power almost for nothing, as compared with present rates.

Doesn't Affect Wiring

Mr. James effectively demolished another street rumor to the effect that the introduction of Hydro would mean the re-wiring of shops and houses. He showed that all premises must conform to the provincial regulations regarding wiring and it makes no difference whatever, whether a town is Hydro or not Hydro regarding wiring. Mr. James covered the subject pretty thoroughly in about half an hour and the audience was certainly pleased with his clear and business-like explanation. He was to be given time for reply after Mr. Rowland had spoken, but unfortunately the hour was so late that a reply was out of the question.

The Walkerton Power and Light Co., which in spite of the assurances by Hydro that their interest will be protected, is fighting the public ownership scheme to the last ditch, had an able champion in its manager, Mr. John Rowland. If Mr. Rowland took two hours to cover ground which might have been covered in twenty minutes, if he gave his attention largely to pointless and somewhat silly, personalities, it was of course not owing to his lack of ability in presenting his case, but rather to the fact that he had no arguments to present which could stand alongside the cold, logical and convincing facts so ably presented by the Hydro engineer. Mr. Rowland reminded one more than anything of a lawyer who realizes that the evidence is entirely against his client and as a last resort tries to move the jury with "sob stuff". When he began by stating in his emphatic and downright way that he was in favor of Hydro, but not Hydro for Walkerton, it must have occurred to his audience that if Mr. Rowland were not interested in selling power to Walkerton, to-day he would be out fighting for hydro for Walkerton "like a house on fire". Nothing could stop him.

Ex-Mayor McKay In Chair.

Ex-Mayor R. H. McKay held his perennial job as Nomination Night Chairman, a position which he has always filled to the satisfaction of everybody.

A Magnificent Speech.

Mayor Lippert was the first speaker. In taking leave of public office after three years in the Mayor's Chair he gave the electors the best review of municipal matters they have heard for a long time. And it was about the nicest thing in the way of speaking that the Mayor has done. The Mayor

tax but certain circumstances had stood in the way. In the first place $[illegible] was required for war expenditure. The fixing of the Town Hall, which had been in a dangerous condition, had cost $1520, the closing of the Hotel Bars meant $[illegible] in loss of license fees and business tax. The Council had recognized the fact that the workingmen were struggling against the increased cost of living and had endeavored to be as economical as possible. Coming to the question of permanent roadways, which was up before the Council, the speaker said that before putting down permanent roads, sewerage, waterworks, etc., should be completed in front of the properties concerned as far as possible, and that the whole scheme should be undertaken under the local improvement plan, the persons whose properties were benefitted paying a portion of the cost.

Deep Seated Dissatisfaction

There has been dissatisfaction regarding power and lighting in Walkerton for many years, said the Mayor. This dissatisfaction is under cover most of the time, but every time an opportunity appears to come for obtaining redress, it bursts from under cover like a flame. A few years ago when the prospect seemed bright of getting power from Niagara Falls the people were mightily interested and a deputation was sent to Harriston. When it was found that power from Niagara was not practicably for Walkerton the people again went to sleep on the question, until Eugenia Falls was harnessed up. Walkerton could now be hitched to the Eugenia system and the Saugeen System utilized also. Hydro means public ownership. A proportion of the rates goes to pay for the distributing plant. In the end the town owns the whole thing out of rates without costing anything in taxes. The money paid for current comes back into our own pocket. At the end of twenty years with the plant kept up to date and paid for, the rates will be a mere fraction of what they are in hydro towns at present. With periodic coal famines we naturally look for relief. Electricity will be the solution. Before long our homes will be heated by electricity. This country will soon be a network of hydro radials and the current used by the radials will go to reduce the rates in hydro. By carrying the Hydro Enabling By-law the people of Walkerton will have the skilled engineers of the Hydro Commission working for them. Mr. Lippert disposed of the idea that tax-payers, not using electric light, would help pay for hydro. The only way it would cost the tax-payers anything would be for hydro in Walkerton to be a complete failure, a condition which has not occurred in any of the 200 towns where they have hydro. The full shot is paid by the Consumer, including original cost of plant and upkeep so that the consumer, who pays taxes, will be part owner in a plant which did not cost him a cent. Replying to a statement which was being used against hydro that the houses would have to be rewired for hydro, he pointed out that no matter whether Walkerton has hydro or not the wiring has to conform to the same standard enforced by the Government.

Hydro Engineer Speaks.

Mr. James, District Engineer of the Hydro Electric Power Commission, spoke concisely and to the point. He assured the audience that the interests of the Walkerton Electric Light and Power Co. would be protected by Hydro, but that is all. Hydro is not going to ask the people to pay for something they don't get. It was not the intention of Hydro however that Robertson and Rowland should suffer.

Hydro Rates at Walkerton.

Estimates for Walkerton had been prepared by the Engineers but the Hydro Commission would not pass their estimates until an estimate was worked out for the entire district, as Hanover and other adjoining towns

Walkerton's Opportunity

IF THE PEOPLE OF WALKERTON fail to give a sweeping endorsation to the Hydro Enabling By-law next Monday, nobody will be to blame but the people of Walkerton and nobody will suffer but themselves. The opportunity to gain control of the local power situation is before them. It is up to them to grasp it with both hands. When Mr. James, the official representative of the Hydro Electric Power Commission of Ontario emphatically stated on the public platform Friday night that the interests of the Walkerton Electric Light Co would receive full protection from the Hydro Commission he knocked out the last leg from under the "Anti" case. The passing of the Hydro Enabling By-law will simply give the Town Council authority to obtain a definite proposition from Hydro which the people would require to vote on, in the form of a second Hydro or Money By law later on. Everybody recognizes that Hydro means very much cheaper rates, that it means power at absolute cost, that it means owning our own plant in twenty years. But leaving rates and suchlike advantages entirely aside, there is the big question of Hydro Radials which will be a live issue in the very near future. If we turn down Hydro while neighbouring towns like Chesley and Hanover are taking it, we are voluntarily penalizing this town by an insurmountable handicap. When Hydro radials form a network of railroads through this peninsula in the very near future, where do you, Mr. Property-Owner, want Walkerton to be—On the Map, or off it? We do not believe the people of Walkerton are foolish enough deliberately to stand in their own light.

This By-law should be supported just as strongly by those opposed to it (if there are any considerable number) as those who want it. This is just a preliminary vote. The real contest will be later on. By carrying the By-law next Monday the citizens will secure for themselves for the first time a choice which they will be able to make later on—a choice between Hydro and the best proposition which the Walkerton Electric Light & Power Co. may see fit to make. At the present time we have no alternative but to pay what the Walkerton Power Co. dictates. And if the by-law is defeated we shall be in even a worse plight, for it will be taken as evidence that the people of Walkerton are so thoroughly satisfied with the service and rates we have had for the past several years that they are unwilling even to entertain any competitive offer. If the by-law is defeated it will be like serving a notice on the local power company to charge whatever it likes.

NEWS ABOUT TOWN

Wool mufflers at half price to clear at Woodman's.

Mr. Angus McPhail of Clifford was a visitor in town on Saturday.

Miss Ethel Lindsay of Toronto is spending the holiday at her home here.

Hats, caps, sweater coats, ties, at reduced prices at Woodman & Co's.

Mr. and Mrs. Wm Trotter are spending a week with relatives at Arthur.

Mrs. David Noble returned home last week from visiting relatives in Toronto.

Miss Clarice Vogan returned home last week from an extended visit to the West.

Miss Tillie MacGregor of Paris is spending a month's holidays at her home here.

Mrs. Wm. Peyne spent Christmas with her daughter, Mrs. Robinson, at Newbury, Ont.

Rev D McLennan was in Wiarton Tuesday on business for the Children's Aid Society.

Mr. and Mrs. John Cruickshank of Portal visited Coun. and Mrs. Alex. McCarter last Thursday.

Mrs. James Watt and Miss Watt spent Christmas with Rev. and Mrs. W. J. Watt at Burgoyne.

Mr. and Mrs. John Mckinnon and little granddaughter, Dorothy Hatley, spent Christmas in Detroit.

Miss Ethel Cryderman, trained nurse of Toronto, and Miss Mae Cryderman B. A. of Durham were home for Christmas.

You can buy your furnishings, suitings and pantings 25 to 50% cheaper than any other place in town at Woodman & Co's.

The members of Miss Watt's music class at Allan Park drove over last Thursday night and spent a pleasant social evening at her home.

Miss Elizabeth Wilson of Essex recited the "Angel and the Shepherds" from Ben Hur at the Methodist Church last Sunday night.

A happy family gathering took place at Mr. George Lambertus' on Christmas Day, those present including Mr. and Mrs. Jos. Lambertus of Greenock, Mr. and Mrs. Will Lambertus, Mr. and Mrs. Henry Siegner of Brant, Mr. and Mrs. Geo. Frank of Mildmay, and all their families.

The Christmas festival held in the Evangelical church on Christmas night was well attended. The numbers on the programme were interesting and well rendered. The church, we may say, was packed to the doors Rev Mr. Burn acted as chairman Everyone spent a very enjoyable evening.

Mr. R. E. Hueghan spent Christmas at Toronto.

Miss Walker, teacher of Toronto is home for Christmas vacation.

Mike LaFrance of the Guelph Herald Staff was a Christmas visitor in town.

Mr. Neil Sinclair, barrister of Toronto, spent Christmas at his old home.

Mrs. Malcolm France of Edburg, Alta. is visiting her sister, Miss Carrie Allen.

Mr. Eddie Mosack of Preston is spending a week at his home at his old home here.

"Bob" Turner a Walkerton boy at the Front, has been promoted to Lance Corporal.

Mrs. Arthur James of Cranbrook, B. C. spent Sunday with her friend, Mrs. Ray Vogan.

Mrs. Payne returned home yesterday from a visit to her daughter, Mrs. Robinson of Newbury.

Mr. Will Pengelly of Toronto, spent Christmas with his parents, Mr. and Mrs. Arthur Pengelly.

Miss Sinclair of the Clinton High School Staff, is spending Christmas vacation at her home here.

Mr. and Mrs. Geo. Kilmer and son, Capt. C. E. Kilmer D. S. O. spent Christmas at Mr. N. Crawford's.

Jos. Ellinghausen is home from Sturgeon, Mich. on a visit to his parents, Mr. and Mrs. B, Ellinghausen.

Mr. and Mrs. J. W. Fowler, and master "Bob" are visiting Mrs. Fowler's parents, Mr. and Mrs. R. B. Ferguson.

Coun. and Mrs. McCarter spent Christmas with Mr. and Mrs. John Cruickshanks and Mr. Sandy Carr's at Lovat.

Miss Annie Ferguson graduate of the General Hospital will spend New Years with her parents, Mrs. R. B. Ferguson.

Ross Munro, son of the former publisher of the Port Elgin Times, is the editor-in-chief of the new Ottawa paper, the Journal-Press.

Mrs. Hunter and little daughter of Oak Lake, Manitoba, arrived here on Friday, on a visit to Mrs. Hunter's father, Mr. Thos. Cunningham.

It has been customary at Knox Church for many years to have a special Program of Music Christmas Sunday. This year the program arranged by Prof. Leeson was in the opinion of many, the best yet.

Mrs. Latimer Sr. arrived home this week from a visit to her five sons in Saskatchewan. She was accompanied on the return journey by her son, John, of Eyebrow Sask., who will spend a couple of months here.

Mr. John Bilger is preparing to build a red pressed brick residence on his property at the head of Gibson St. in the Spring. He will have one of the most comfortable homes in the town with all modern improvements.

Mr. Roger Clancy, the well-known cattle man, who returned recently from the West, states that between good crops and high prices the farmers in Medicine Hat have done famously this year. His sons sold their wheat at $1.75. A good many are holding for a higher price and may

Smashed to Smithereens

What Hydro Has Done to Domestic and Commercial Lighting Rates

Hydro has brought down the average domestic rates in Ontario Towns from 9.3 to 3.9. And the commercial rates have been reduced from an average of 10.5 to an average of 3 under Hydro. These figures are official.

FACTS ABOUT HYDRO

The power and lighting system in Hydro towns is paid for by debentures spread over a term of years, usually twenty years. When these debentures payments come due each year, they are paid, NOT by the tax payers, but out of the money received from hydro customers.

+ + +

It is the consumers living in small houses—the workingmen—who will benefit most from hydro rates. People living in big houses have to pay a little more for floor space charge.

+ + +

There is no minimum charge of a dollar in hydro towns. You pay simply for the current you use and the floor space charge. Floor space is 3c per hundred square feet. An ordinary size house of 1200 square feet of floor space would pay 36c a month.

+ + +

People who are buying coal oil should be as much interested in Hydro as anybody in Walkerton. If Hydro comes, it will be so cheap everybody will use it. Even if you don't use it you will benefit if you are a tax-payer

+ + +

Will Hydro raise taxes in Walkerton? Not one cent. Everything including the original investment for plant is paid for out of sinking fund which comes direct from the consumers.

+ + +

How will Hydro lower your taxes? By cutting down the cost of lighting the streets, the cost of lighting the Town Hall, the cost of electric power at the water works pumping station. It will cut down taxes by increasing the value of real estate in Walkerton, Mr. Property owner.

+ + +

In comparing Walkerton lighting rates with Chesley and Durham rates, it is well to remember that Hydro has only been recently installed at Chesley and Durham. Cheap as it is, it will likely be cut in two in those towns in the next three or four years. That has been the experience of the older Hydro towns.

+ + +

According to the Hydro Statement for 1915 there isn't a Hydro town anywhere with lighting rates as high as in Walkerton. But there are plenty of towns where the rates are a good deal less than half Walkerton rates.

+ + +

Five years ago there were only 13 Hydro Towns. To-day there are over 200.

+ + +

When this district is a network of hydro radial railroads a few years hence, what do you want Walkerton to be—a radial centre—or on the shelf?

+ + +

The property owners of Walkerton have the most to gain from Hydro, for they will become owners of the system without paying anything except for whatever electric current they may use in their homes.

+ + +

Where does the money come from to pay for the plant in hydro towns? It is done this way. Supposing the distributing plant costs $25,000. The Town Council sells debentures for $25,000, repayable by twenty equal annual instalments covering principal and interests, say $1500. This $1500 is charged up against the Hydro dept and comes out of earnings. Running expenses, and up-keep of plant all came out of earnings, so that at the end of 20 years, the town has an up-to-date plant all paid for out of earnings.

+ + +

By defeating the Hydro Enabling By-law the people of Walkerton would be simply handing a Club to Robertson and Rowland, and saying to them, "Go ahead and do your worst, boys."

+ + +

Case of Fergus: The deficit mentioned by Mr. Rowland was on capital expenditure—the surplus in operation of the plant. Anyone who understands book-keeping will understand that it takes capital to extend plant which is met by new debentures or by bank overdraft until surplus revenue pays off bank. Such expenditure cannot be charged to operation accounts and operation accounts are the only ones which can show surplus.—Engineer James.

+ + +

Is the Walkerton Power Co. not satisfied with the assurance that they will get a square deal from the Hydro Electric Power Commission? How much more than a square deal do these gentlemen want?

+ + +

Every workingman in Walkerton should give Hydro his strongest support. If he is a property owner, he has all the more reason to support it.

+ + +

Dont get the idea that the By-law will carry "dead easy". Get every vote out.

+ + +

Harriston has the highest rate—6 cents—of any town on the Niagara circuit. The reason is of course that Harriston is the farthest from the Falls.

A Quiet Wed

ISSUE NO. 51, 1916

HER HUMBLE LOVER

The lining is still warm from its contact with her beautiful face, and a thrill of delight runs through him as he slips it on, remonstrating the while; then, with another touch to the bed of seaweed, he faces the pelting rain again, and goes down to the boat.

It is some hours since they started; it is long past luncheon-time, and he knows, though Signa would not admit it for the world, that she must be hungry. He hopes that there may be, by some chance, some biscuits left in the locker, if Archie has not eaten them all.

Hoping against hope, he climbs into the boat and starts [illegible]. With a thankfulness which is [illegible] and devout, he discovers not only a [illegible] of biscuits, but a tin mug and a canister of coffee, with [illegible] keg of fresh water, the [illegible] of a coasting boat.

With these under his arm he turns to the cave, and, looking in, says, as mournfully as he can:

"I hope you are not hungry, Archie. Are you, Miss Grenville?"

"I am, and so is Signa," says Archie, promptly; "she just said so."

Signa colors with annoyance.

"Archie! I — don't pay any attention to him, please. I had a capital breakfast, and can wait six hours! for dinner!"

Hector Warren almost chuckles.

"There is no occasion," he says. "What do you say to a cup of coffee?"

Archie claps his hands, but Signa laughs incredulously.

"Really?" she says.

"Really," he retorts. "See here, I found these in the locker of the boat. Whitefield must have left them by mistake or intention. We'll drink Whitfield's health, in either case."

And he stoops down and enters the cavern with his precious prize.

"Have you any letters about you, you don't care for?" he asks.

Signa turns out her pockets and hands the contents to him, and he takes a pile of letters from [illegible]. Signa sees that some of the envelopes are stamped with crests and coats-of-arms, and remembers the fact afterward.

"Thanks," he says. "I dare say I shall be able to find some brushwood dry enough to burn."

And away he goes again.

"What a wonderful man Mr. Warren is, isn't he, Signa?" says Archie, clasping his small knees with an air of intense enjoyment. "It's like Robinson Crusoe, isn't it? I thought he only cared for books and that sort of thing, didn't you?"

"It is my conviction that he has saved our lives, Archie," says Signa, musingly. "Yes, dear, he is a wonderful man. Hush! here he is!" she adds, as Hector Warren enters with an armful of broken twigs and brushwood.

"Here we are," he says, cheerfully. "We will soon have a fire. Now for your letters, Miss Grenville! You are sure you don't mind?"

"Not in the least," she says, laughingly. "I would burn the most precious correspondence for a cup of coffee."

"Well, I've seen gold diggers in California give a handful of gold-dust for one," he says, lightly.

And he goes down on his knees and piles up the brushwood scientifically.

"Let me do that," says Signa, eagerly; but he shakes his head.

"By no means; you would scratch your hands, and the smoke would get in your eyes, and that would never do. I should think the coffee dearly purchased at such a price; eh, Archie?"

"At any rate," says Signa, "I intend to do something."

And she seizes the tin mug, and pulling the cork from the little wooden keg, begins to pour some water into the mug, but seeing rather an anxious look in his face, she pauses.

"Am I doing wrong?" she asks. "I was going to wash it out."

"Hem," he says. "But you mustn't use too much fresh water. It would be rather difficult to sink a well, and I expect that this little keg holds all the fresh water there is in St. Clare."

Signa sighs a little.

"I never thought of that," she says half vexed, half laughing. "Women were born without brains, I am afraid;" and she poured out the water very gingerly.

"[illegible]," he says, lightly, "I have had to rough it so often that I have grown cautious. I remember once when we were crossing Sahara that the Arabs got short of water, and allowed us three spoonfuls to wash ourselves with."

Archie laughs, open-eyed.

"What wonderful places you have been to, Mr. Warren!" he says. "I wish I could go. I shouldn't mind not having to wash!"

Hector Warren laughs, too, and the youthful ring of the laugh strikes Signa with a feeling of surprise; looking at his face she notices how bright and joyous it is, notwithstanding the [illegible] that he is wet to the skin, something has made him happy. She herself is conscious of a subtle sensation of delight and enjoyment, and as she leans back and watches the flames curling round the blackened [illegible], she finds herself wishing that the storm may hold out at least for another hour or two. Like Archie, too, she is thinking what a wonderful man this mysterious visitor to Delamere Grange must be, and she finds it difficult to realize that Hector Warren, bending with a smile over the coffee-pot, and [illegible] up the fire, can be the Hector Warren who, dressed in evening attire, parried Lady Rockwell's questions with such calm, impassive self-possession; there was as much difference between his manner as his appearance between the distinguished looking patrician in the black evening suit, and the tall patrician, but easy, [illegible] form in the rough [illegible] jacket.

All unconscious of her regard, Hector Warren watches the pot, and at the critical moment lifts it from the fire with a cracked stick.

"There is no sugar, Miss Grenville," he said, [illegible], apologetically. "I am sorry to say, no milk!"

"I don't care," says Signa, cheerfully. "How beautiful it smells! and to reflect that one thinks so little of one's cup of coffee in the morning! Ah, to enjoy luxuries one wants to be cast on St. Clare and short of necessaries."

"That's true," he says, filling the cup, "but I wish we had some milk! Wait a moment!" he exclaims, struck by a sudden idea, and out he darts.

"He is gone to find a cow!" says Archie, with suppressed delight, but Signa sighs.

"All through the pelting rain again!" she murmurs.

In a few moments, before the coffee had time to cool, he comes back, smiling and triumphant, with something in his hand.

"An excellent substitute for milk," as the labels don't say on the marmalade pots," and he opens his hand and shows her a couple of eggs. Don't be afraid; they are seagull's, and they won't taste fishy if I pour away the white." And before Signa could recover from her astonishment he neatly breaks the eggs, lets the white drip away, and pours the yolk into the cup. "Now, if you will stir it with your pencil-case," he says, nodding to one that hangs on her watch-chain, "it will, at any rate, look like coffee with milk."

"It's nectar!" says Signa. "Oh, never did coffee taste so delicious!" and she hands the mug to him with girlish admiration, half a dozen other womanly sensations expressed in her violet eyes.

"Thanks to our friend, the worthy ship-builder," he says, and, without tasting the coffee, he hands the mug to Archie.

"Aren't you going to have some, Mr. Warren?" cried Archie.

"Oh, I'll have some presently," he answers, carelessly, and Archie takes a long pull and hands the cup back to Signa.

She takes it and put it on the ground beside her without a word, but there is a curious expression in her face. She knows that he will not drink out of the same cup, out of respect for her.

Quite unconscious of all that is passing in her mind, he produces the biscuits and hands them on one of the plates he has preserved for the purpose.

"The patent plate," he says, with a smile, but Signa takes a biscuit coldly, and with no answering smile, and sits with it in her hand as if her appetite had suddenly vanished.

"Don't leave the coffee till it is cold," he says, cheerfully. "I want it to warm you, and prevent anything like a chill."

"I don't want any more," says Signa, freezingly.

A look of disappointment comes over his face.

"Is it so bad?" he says. "I'm so sorry. The egg has spoiled it, I suppose. But I'll soon have some more," and he takes up the fire.

Then Signa looks up, a crimson flush comes over his face.

"Do not," she says. "I will not touch another drop, unless you will take some of this," and she holds out the cup.

Their eyes meet; hers ardent, beaming, womanly indignant, his full of reverence and suppressed passion. His face flushes for a moment, then grows pale, but without a word he takes the cup from her and drinks.

But the emotion has gone in a moment, or all sign of it, rather, and with a light laugh he says:

"Not so bad. Trust a sailor to get good tea and coffee, he knows the value of them on a dark, wet night, when the wind blows cold. A hot cup of coffee beats all the wine or brandy," and he fills the cup up from the pot and hands it to her.

Signa takes it and drinks now in real earnest, and the ice thaws in a moment, her eyes glow with the old, and a newer light, and as she leans back and munches the biscuit, the hard ship biscuit which would have filled the soul of Aunt Podswell with horror, but which tastes so sweet and is so welcome to these three, she laughs softly.

"If my uncle could see us now!" she says, with keen enjoyment of the vision his face calls up.

"Ah," he says, rather gravely. "Don't let us think of them at the Rectory. There will be an account to settle for this, I am afraid."

"Do not be uneasy," she says. "It is very likely we shall not be missed. Archie and I often do not turn up to lunch and there are no inquiries made. If we get home to dinner——"

He looks up at the sky, still black with heavy clouds and pelting rain.

"I hope we shall," he says, "and I trust you will not be missed. At any rate, it was all my fault; I had no business to cross the bar. I shall never forgive myself."

"Don't think of it," says Signa. "Don't say a word—at least not yet. Don't let us anticipate; it spoils one's happiness."

"You are happy?" he says in a low voice.

"I should be supremely happy," she says, "if I were not haunted by the knowledge that you are wet through."

He laughs.

"Don't let that trouble you. It is not of the slightest consequence, it will not matter in the very least. Indeed, I am nearly, if not quite, dry now. The air of this cavern soon dries one. If you and Archie are not wet, all is exceedingly well." And he stirs up the fire, so that he may see the beautiful face in the glow of the burning wood.

"How long shall we have to wait, Mr. Warren?" says Archie, but not at all impatiently.

"Not long, I hope," he replies, but with something like a sigh. "It will soon be over;" and he does not mean the storm only.

"Suppose you were to tell us a story?" says Archie, with the cool assurance of his age. "Do, Mr. Warren; you must know a lot. I don't mean fairy stories—I've got past them, but something real."

Hector Warren is silent for a moment, then, as he stirs the fire slowly, he says:

"I think I know what you mean; well——"

"Wait a minute," says Archie; "till we make ourselves comfortable," and by way of example, he throws himself full length, leans his face on his hands, and stares up in Hector Warren's face.

Hector Warren pulls the heap of dry sea-weed into a larger couch, and pats it coaxingly.

"Will you not also make yourself comfortable?" he says, in the musical, winning voice that Signa can no more resist than his tone of command. Without a word she coils herself up and lies down, her eyes fixed on the fire.

"Once upon a time," he begins, carefully avoiding the violet eyes that beam softly in the firelight, "there was a man—he was a very young man, which accounts for his foolishness—who had read so much about the world that he determined to see it for himself. In the books he read, the world was described as being so full of beautiful things, of things worth seeing, great countries and lovely scenery, and fine adventures, noble men and great souled women, that the young man—we will call him Viator, Archie—grew discontented with his stay at home lot, and never rested until he had started on his travels."

"I should have liked to have been him," said Archie, emphatically.

"Yes, well, he was happy for a time," goes on the story teller. "He saw strange countries and beautiful scenes, and a multitude of men and women, whom the world called noble and high-souled, and for a time he enjoyed himself very much, oh, very much indeed. But presently, after a very little time, alas, he grew disenchanted. He got tired of strange countries and the beautiful scenes, but he could have borne this and even enjoyed himself, but unfortunately for him he was too keen-eyed, and he got disappointed with the men and women. He found that most of the men whom the world called great and noble were only great and noble on the outside, like the giants you see in the pantomime, who are only made of pasteboard and have a very ordinary-sized man moving about inside them."

"I know," said Archie, wisely. "Only sham giants."

"Exactly. And he found some of these great men very sham, indeed, and the real men inside them very small and mean—smaller and meaner than others the world did not think so much of. And Viator was very disappointed. But he could have borne that if the women had answered to the lofty idea he had formed of them. He thought them the noblest, the purest, the holiest creatures; and it was his ill-luck to meet with those who were like the giants, all these things outside. He found women, who looked like angels, ready to sell themselves for gold to the first man who came with a title and a wedding ring; he discovered that their smiles meant nothing, that their dove-like eyes were simply masks to covetous, ambitious minds, and that there was not one of them who could resist the temptation of wealth and position. I mean gold and power," he interprets.

"I understand," says Archie, lightly. "Go on."

Hector Warren stirs the fire again, and glances at the graceful figure curled on the sea-weed; but the violet eyes are fixed on the fire, and make no sign.

"Well, Viator was terribly disappointed, and he grew discontented and bitter, and he felt that he should like to creep into some cave — like this, for instance — and hide himself away. But he could not do this. He had been traveling about so long, always moving and seeing the world, that he found he could not rest, and although he had tired of strange countries, and seen through the giants, and unmasked the beautiful angel-ladies, he could not rest."

"Poor Viator!" says Archie, "what an unhappy man he must have been."

"He was," says Hector Warren, quietly, "very unhappy, just as unhappy as you would be, Archie, if you had learnt to dislike your dinner, and were still bound to go on eating it. Well, he wandered about, finding no good in anything. He was a foolish young man, and he tried strange things, all sorts of things, but it was all of no use, and he wished himself dead, he wasn't a good sort of young man, you see."

"I'm afraid he wasn't," assents Archie.

"Not by any means," says Hector Warren, again glancing at the prone figure that lies as motionless as if asleep.

"Well, one day he chanced to find himself in a quiet place right out of the world, as it were, and he rested there for a day or two, but he soon got tired, and was starting off for some other place, anywhere, it didn't matter to him—when he chanced to meet a young girl."

"Was she very beautiful?" asks Archie.

Hector Warren pauses for a moment, then he throws some wood on the fire, and resumes:

"Yes, [illegible] the most beautiful woman he had ever seen."

"What was she like?" demanded Archie impatiently.

Hector Warren is silent again, and he looks out on the sky before continuing.

"I don't think he ever asked himself that question. He knew and felt that she was beautiful, and if he tried he could have told the color of her eyes and her hair, and described her altogether, but he just felt that she was beautiful. But it was not only because he thought that she was beautiful in every way. He felt that if one of the fairies you are so fond of were to touch her with a wand, and make her ugly in the opinion of others, she would still be beautiful to him."

"Then he was in love with her," says Archie, shrewdly.

Silence for a moment while the fire flames up, showing its light on the story-teller's handsome face, now grave and almost solemnly sad.

Wear Those Comfortable Old Shoes This Winter

And Show Your Patriotism and Thrift —Inexpensive Rubbers or Overshoes Will Protect Your Feet

The spectacular rise in leather prices has a significance far beyond its painful effect on our personal expenses—it is becoming a serious matter for the Government and our soldiers at the Front.

The war is using up leather much faster than it is being produced. The reserve, particularly of high-grade leather, is steadily diminishing. If the soldiers are to have plenty for shoes and equipment, and if the Government is to be able to procure it at prices within reason, civilians must economize on it to the limit.

This is the reason well-worn shoes are no longer a discredit, but an honor—an evidence that the wearer puts patriotism before pride, thrift before vanity.

Fortunately the prevailing moderate prices of rubbers and overshoes make this practicable. In most cases they cost little more than before the war, and a very small expenditure for either will protect the old shoes perfectly through the winter, keep the feet dry and comfortable, and guard the wearer's health. Many are also following the sensible course of wearing rubber boots or "rubbers and socks" for working around the stables, in the woods, or in the fields during the cold, wet weather. Not the least of their advantages is their cleanliness around the house.

Wearing rubbers or overshoes is one of the rare cases where virtue brings its own reward, for in addition to the very considerable money saving, what is there that affords such solid comfort as a well-worn pair of shoes?

Saving Shoe-Leather Is a Public Service as Well as a Private Economy

IT RELIEVES EVERY EXTERNAL PAIN

Cures Colds, Coughs, Sore Throat, Tight Chest and Hoarseness

It's when sickness comes at night, when you are far from the druggist or the doctor, that's when you need Nerviline most. [illegible] Without Nerviline a sleepless night for the entire household. With Nerviline the pain is relieved quickly. If it's toothache, earache, perhaps a stiff neck or one of the kiddies coughing with a bad chest cold. Nothing can give quicker results than vigorous rubbing with this old-time family remedy.

Nerviline is too useful, too valuable to be without. For lumbago, lame back, sciatica or neuralgia there is no liniment with half of Nerviline's power to penetrate and ease the pain.

As a family safeguard, as something to ward off sickness and to cure the minor ills that will occur in every family, to cure pain anywhere, you can find nothing to compare with old-time Nerviline, which for forty years has been the most widely used family remedy in the Dominion. 25c per bottle. All dealers sell Nerviline.

OUR MOUNTAIN SHEEP.

Their Home is Picturesque and Their Food Dainty.

The mountain sheep of Canada are the proudest and handsomest of our wild animals. They are the most perfect combination of strength, hardihood, endurance, agility, beauty and grace. They are the most difficult in their tastes and the most artistic in temperament. Their home is the most picturesque, and their food the daintiest. They are extremely timid in the presence of their enemies, but courageous in battling with the many forbidding elements to which their lives in the high mountains are exposed.

They range through the greatest depth of latitude of any family of the ruminants on the continent and are instinctively wild. No wild animals are further removed from domestication; they find the most congenial home in the pure air of the wildest mountain countries, and so far, all efforts to transplant and domesticate them have been failures.

According to Indian tradition they once lived in the low lands when the earth was set in darkness, but when the earth was lighted and the rays of the sun burst suddenly upon them, they were seriously frightened and fled to the mountains, where they have ever since remained.

Indians are not our most reliable source of knowledge in tracing the early history of our animal life, but their story is not entirely improbable, for we have records of much greater changes having taken place in the habits of many of our wild animals.

Many names have been given to the first species of mountain sheep discovered in America, and it required careful investigation to trace the priority between canadensis and [illegible], but it is now generally admitted that Shaw described them as Ovis canadensis in 1804, and there is but little doubt that canadensis will be recognized in scientific circles as the name [illegible]

[illegible] unquestionable breed.

The habits of the sheep are very regular and yet interesting. In winter [illegible]

The other varieties, the Dall, the Stone, and [illegible] simply defy the elements throughout the long Arctic and sub-Arctic winters. Like most animals they do not feed much during severe storms, and will huddle closely, the little ones crouching alongside the older ones for warmth and protection, while many of the adult males and stronger animals get restless, and prowl about, walking the highest ridges and nibbling indifferently at the single sprouts of grass found peeping through the snow here and there. When the storm breaks they will at once set out to some feeding ground of which they have a most perfect knowledge. They know their own home, and always know where to look for food, even when it would seem that every foot of their country was buried deep in snow. It not infrequently happens, however, that during storms they remain in some small rocky cave and the winds drift the snow across their only avenue of escape so deeply that they find their way out with difficulty. The old males are always the first to break their way out, and their superior strength is often put to a severe test, but the road made by them is of great advantage to the weaker and younger animals. During the winter season the older males always lead the way from one feeding ground to another.—Out of Doors.

Minard's Liniment Cures Garget in Cows.

FANTASTIC GOLDFISH.

Some Curious Shapes Produced by the Experts of Japan.

Japanese fish breeders took advantage of one of nature's pranks to obtain this much decorated goldfish. Years ago a Jap found in his aquarium a fish with two tails. He was so well pleased with the novelty that he undertook to make it the basis of a new type. Thus the one accident by nature became the grandfather of a race of two-tailed fish. We call them Japanese fantails.

Not satisfied with the double tail, the breeders next set to work moulding the bodies of their fish into round balls. Breeders first picked out the fish with the shortest bodies and bred them every year by painstaking selection. Fish with shorter and shorter bodies were produced until to-day the accepted type of Japanese fantail has a body as round as a ball.

Not all fantails are alike. One with the ends of the tail cut off flat is called the square tail. Another with a slight inward curve to the edges of the tail is called veil tail. A third, with a deep cut out tail, is named the ribbon tail.

All these varieties have long tails and fins. You will recognize them instantly when you see them in an aquarium floating about like bits of lace in the water.

The Exclusive X Club.

One of the most exclusive of clubs was the X, whose last surviving member was Lord Avebury. It was founded by a little coterie of literary scientists, including Sir Jos. Hooker and Herbert Spencer, and, though intended to comprise ten members, never got beyond nine, because no body was found who came up to the two requirements of mental calibre and intimacy with the other nine. Many names for the club were suggested and rejected before a member's wife proposed terming it after the unknown quantity X.—London Opinion.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address, Mrs. M. Summers, Box [illegible], Windsor, Ontario.

LIMBLESS SOLDIERS.

British soldiers who have lost an arm in the war are doing some amazing feats. Indeed, with the artificial limbs now offered it is possible for a persevering man to almost equal nature. Queen Mary Auxiliary Hospital at Roehampton is exclusively for disabled soldiers and sailors. The King and Queen visited the institution founded by Mrs. Gwynne Holford, and were deeply impressed. At one of the branches the King saw a Tommy working and found that though he had lost an arm and leg at Armentieres, he is now able to do useful work. With a special clip taking the place of a dummy right hand he used a variety of tools under the King's inspection, and afterwards took a match from a box and lighted it with dexterity and ease.

"Can you shake hands?" asked the Queen of an armless private of the First West Ontario Regiment. "Try me, Your Majesty," promptly replied the Canadian. The Queen shook hands with him, laughing merrily at the convincing grip of the artificial hand.

Professor Laveran showed the French Academy of Science a remarkable [illegible] invented by Professor Aurar. The arm hand and [illegible] are of aluminum and very light. With a glove on it is almost impossible to perceive the limb is artificial. Certain movements of the thorax acting on fine steel wires gives to the hand and arm almost all the movements of the natural limb. Mutilated soldiers equipped with this device played the violin, made cigarettes and gave out change for a bank-note before the Academy.

A pupil of the London School of Art went out to the front early in the war and lost the use of his right hand. He has now taught himself to draw with his left hand and his work is considered as good as he ever did with his right.

HELP WANTED.

WANTED—GIRLS TO WORK ON knit underwear—seamers and finished stitchers preferred. We also teach learners, any girl with good knowledge of plain sewing; good wages; ideal factory conditions. Zimmerman Manufacturing Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED—LADIES TO DO PLAIN and light sewing at home, whole or spare time, good pay, work sent any distance, charges paid. Send stamp for particulars.—National Manufacturing Company, Montreal.

What Christ Came Into the World For.

I must confess that I like the sentiment I read a short time ago, thus expressed by its author: "People who talk facts, I like; people who talk theories, I fly from." I think, upon the whole, that I shall always like the first kind of people better than clever ones. I believe we owe more to the former, too, and learn more from them of human nature, which, after all, is what we want to know. I am sure we have been given wrong ideas of things. Human nature is lovely; it is unhuman nature that we want to get rid of. God is human: that is what Christmas shows. If you want to know what God is like, look at the Man who was the Son of God, but who always loved to call Himself the Son of Man. What did He come into this world for? Not to condemn the world, but that the world through Him might be saved. He did not come to call all the people who thought they were good, around Him. He distinctly said, "I came not to call the righteous, but sinners, to repentance." What is repentance? Turning from the wrong to the right. Did He come to save me? That is exactly what He did come for. His name shall be called Jesus because He shall save His people from their sins. Ah, you say, "His people," but I am not one of His people. Yes, you are. We are all the people of His pasture. You may be a prodigal son, but you are a son; you may have been among the swine, but that is not your home. At any time you can say, "I will arise and go to my Father. I am going home." And Christmas is a good time to start for home, and to become in heart a child.

Minard's Liniment Cures Diphtheria.

Billy—Do you doubt the depths of my love? Milly—No, the length of it.

For a Quick Pick-Up Luncheon try that most delicious, nourishing, whole wheat food, Triscuit, the shredded wheat wafer-toast. It contains all the body-building material in the whole wheat grain, including the bran coat which promotes healthful and natural bowel movement. It is real whole wheat bread without yeast, baking powder or chemicals of any kind—an ideal food for children because it compels thorough mastication and ensures perfect digestion. A crisp, tasty "snack" for picnics or excursions. Toast in the oven and serve with butter, soft cheese or marmalades.

Christmas Customs In Many Climes

Compared with the celebrations of our ancestors ,the modern Christmas is but a tawdry, tinseled thing. The rush and hurry of the twentieth century forbids 12 days of merry-making or even two. Pater familias considers himself very indulgent if he gives two nights and a day to the annual festival, since, forsooth, the "office" needs him.

One by one the quaint old customs have vanished. We still have the Christmas tree, evergreens in our houses and churches and the yawning stocking yet waits for good St. Nicholas. But what is poor Santa Claus to do, when the chimney leads to the furnace? And what of the city apartment, which boasts a radiator and a gas grate, but no chimney? The myth must be adjusted to fit the times in which we live, and doubtless we shall soon see pictures of Santa Claus arriving in an automobile and taking the elevator to the ninth floor, Flat B, where a single childish stocking is hung upon the gilded radiator.

Nearly all of the Christmas observances began in ancient Rome. The primitive Italians were wont to celebrate the winter solstice and call it the feast of Saturn. Thus "Saturnalia" came to mean almost any kind of high jinks, and in the wake of conquest the heathen ceremonies were engrafted upon Saxon customs and assumed a religious significance.

ORIGIN OF THE MISTLETOE

The pretty maid who hesitates and blushes beneath the overhanging branch of mistletoe never stops to think of the grim festival with which the Druids celebrated its gathering. In their religion the plant was regarded with the utmost reverence and love, especially when found growing upon an oak, the favorite tree of their god Tutanes.

At the time of the winter solstice the ancient Britons, accompanied by their priests, the Druids, went out with great pomp and rejoicing to gather the mistletoe, which was believed to possess great curative powers. These processions were usually by night, to the accompaniment of flaring torches and the solemn chant of the church.

When an oak was reached on which mistletoe grew the company paused. Two white bulls were bound to the tree, and the chief Druid, clothed in white to signify purity, climbed, more or less gracefully, one must believe, to the mistletoe. It was severed from the oak with a golden knife, and another priest, standing below, caught it in the folds of his robe. The bulls were then sacrificed, and often, alas, human victims also. The mistletoe thus gathered was divided into small portions and distributed among the people. The tiny sprays were fastened above the doors of the houses, as propitiation to the sylvan deities during the season of cold.

These rites were retained throughout the Roman occupation of Great Britain, and for some time afterward, under the sovereignty of the Jutes, Saxons and Angles.

In the Scandinavian mythology there is an interesting story about the mistletoe. Balder, the god of poetry, the son of Odin and Friga, one day told his mother that he had dreamed his death was near at hand. Much alarmed, the mother invoked all the powers of nature—earth, air, fire, water, and plants—and obtained from them an oath that they would do her son no hurt. Then Balder fearlessly took his place in the combats of the gods and fought unharmed, while showers of arrows were falling all about him. His enemy, Loake, determined to discover the secret of his invulnerability, and disguising himself as an old woman, went to Friga and complimented her upon the valor of

Friga answered that she had made a charm, and invoked all nature to keep from injuring her son. "Indeed," said the old woman, "and did you invoke all the animals and plants? There are so many, it seems impossible."

"All but one," answered Friga, proudly, "all but a little insignificant plant which grows upon the back of the oak. It is impossible that so small a thing should do harm."

Much delighted, Loake went away and gathered mistletoe. Then he entered the assembly of the gods and made his way to the blind Heda. "Why do you not fight with the arrows of Balder?" asked Loake. "Alas," replied Heda. "I am blind and I have no arms." Loake then gave him an arrow tipped with mistletoe and said, "Balder is before thee." Heda shot and Balder fell, pierced through the heart.

In its natural state the plant is believed to be propagated by the mistle-thrush, which feeds upon its berries, but, under favorable climatic conditions, one may raise one's own mistletoe. When the berries are bruised on the bark of fruit trees they take root readily. It very seldom grows on the oak nowadays, but in Western England it grows freely in almost every orchard.

Kissing under the mistletoe was also a custom of the Druids, and in those uncivilized days men kissed each other. For each kiss a single white berry was plucked from the spray and kept as a souvenir by the one who was kissed.

BURNING OF THE YULE LOG.

The burning of the Yule log was an ancient Christmas ceremony borrowed from our Scandinavian ancestors. At their feast of Juul, at the time of the winter solstice, they were wont to kindle huge bonfires in honor of their god Thor. The custom soon made its way to England, where it is still in vogue in various parts of the country.

One may imagine an ancient feudal castle, heavily fortified, standing in splendid isolation upon a snowy hill, on that night of all others when war was forgotten and peace proclaimed. Drawn by six horses, the great Yule log was brought into the hall and rolled into the vast fireplace, where it was lighted with the charred remnants of last year's Yule log, religiously kept in some secure place as a charm against fire.

As the flames seize upon the oak and the light gleams from the castle windows a lusty procession of wayfarers passes through, each one raising his hat as he passes the fire, which burns out all evil in the hearts of men. Up to the rafters rings a stern old Saxon chant.

When the song was finished the

Up to the time of Henry VI., and even afterward, the Yule log was greeted with lords and minstrelsy. It was bad luck if a squinting person came into the hall while that log was burning. The appearance of a barefooted man was worse, and a flat-footed woman was the worst of all.

As an accompaniment to the Yule log a monstrous Christmas candle was burned on the table at supper. Even now, in the buttery of St. John's College at Oxford, there is an old candle socket of stone, ornamented with a figure of the Holy Lamb. What generations of gay students must have sat around that kindly light when Christmas came to Oxford!

Snapdragon was a favorite Christmas sport at that time. Into a large, shallow bowl several raisins were put, and thoroughly saturated with brandy. All other lights were extinguished and the spirits ignited. By turns each one of the company tried to snatch a raisin out of the flames, singing meanwhile.

In Devonshire they burn a great bundle of ash sticks, while master and servants all sit together, for once in perfect equality, and drink spiced ale. There are various sports and the season is one of great rejoicing. Another custom in Devonshire is for the farmer, his family and friends to partake of hot cake and cider and afterward to go to the orchard with more hot cake and cider as an offering to the principal apple tree. The cake is ceremoniously placed in the fork of the tree and the cider poured over it while the men fire off guns and pistols and the women sing.

A similar libation of spiced ale used to be sprinkled through the orchards and meadows in Norfolk. Midnight of Christmas eve was the time usually chosen for the ceremony.

In Devon and Cornwall a belief is current that on midnight of Christmas eve the cattle kneel in their stalls in honor of the infant Saviour, as legend reports them to have done in the stables at Bethlehem. Bees were said to sing in their hives at this time and bread baked upon Christmas eve would never become mouldy. In Devonshire, if the sun shines brightly at noon on Christmas day, a large crop of apples may be expected.

Strangely enough, a relic of Devonshire superstition is found among the Indians of French Canada, who believe that the deer kneel in the forest at midnight on Christmas eve.

In Herefordshire it is considered very unlucky for new shoes or tanned leather to be received into the house during Christmas week, and thus the favorite "useful" present of a pair of shoes is entirely barred out.

On Christmas eve in Chester and surrounding villages numerous parties of singers parade the streets and are hospitably entertained wherever they call. But the farmers of Cheshire pass a very uncomfortable season, since according to old custom, servants engage themselves from New Year's eve to Christmas Day. On the morning after Christmas hundreds of servants throng the streets of Chester, spending their year's wages upon gay and sometimes useless, attire.

In Wales, they carry about at Christmas time a horse's skull gaily decorated with ribbons, and supported on a pole by a man who is wholly concealed by a large white cloth. There is a contrivance for opening and shutting the jaws, and this strange creature pursues and bites all who come near it. The figure is usually accompanied by a party of men and boys, grotesquely dressed, who, upon reaching a house, sing some extemporaneous verses demanding admittance, and are answered in the same fashion by those within till rhymes have given out on one side or the other. This horse's head is called Mari Lwyd.

Here, too, on Christmas Day the fishermen dress up one of their number, whom they call the "Lord Mayor of Pennylear Cone." They cover his face with a mask, heap evergreen around him, and carry him about on a chair, with flags flying and two violins playing before him. Before every house the "Lord Mayor" addresses the occupants and wishes them a Merry Christmas and Happy New Year. If money is thrown out in answer, three rousing cheers are given by the "Lord Mayor" and his attendants. Afterward the coin thus collected is spent in a general jollification.

In Scotland he who first opens the door on Christmas expects more good luck than will fall to the lot of other members of the family during the year, because, as the saying goes, "he lets in Yule."

In Herefordshire they make a cake, poke a stick through the centre of it, then hang it on the horn of an ox and say a charm, begging a good crop of corn for the master. Men and boys attending the ox range themselves around. If the ox throws the cake behind him, the man gets it; if he tosses it in front of him, the boys get it. The cake is then eaten with an accompaniment of hot cider while all repeat the charm.

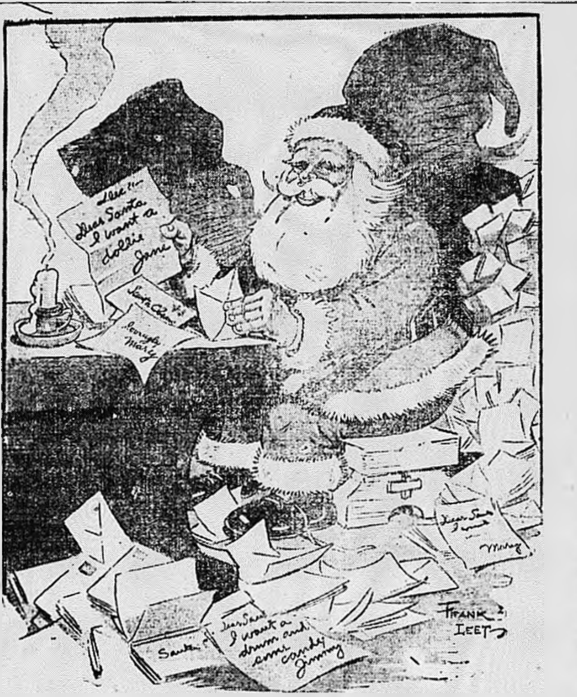
In Germany, Christmas eve is the children's night, and there is a tree and an exchange of presents. England and America borrowed the Christmas tree from Germany, where the custom is ancient and of long standing.

In the smaller towns and villages in Northern Germany the presents are sent by all the parents to some one fellow, who, in high buskins, white robe, mask and flaxen wig, personates the servant, Rupert. On Christmas night he goes around to every house and says that Jesus Christ, his master, sent him. The parents and older children receive him with pomp and reverence, while the younger ones, as may well be imagined, are badly scared.

He asks for the children, and then demands of their parents a report of their conduct during the past year. The good children are given sugar plums, while for the bad ones a rod is given to the parents, with instructions to use it frequently.

In those parts of Pennsylvania where there are many German settlers the little sinners find birchen rods suggestively placed in their stockings on Christmas morning.

In Poland the Christmas gifts are hidden, and the members of the family search for them. In Sweden and Norway the house is thoroughly cleaned and juniper and fir branches are spread over the floor. Then each member of the family goes in turn to the bakehouse, or outer shed, where



Dear Santa I want a dollie Jane
Lovingly Mary
Dear Santa I want a drum and some candy Jimmy
Santa
FRANK LEET

HIS BUSY DAY

two or three weeks beforehand men and boys of the poorer class, who were called "waits," sang Christmas carols under every window. Until quite recently these carols were sung all through England, and many of similar import were heard in France and Italy. Scotland, the [illegible], passes Christmas by, and reserves its merry-making for New Year's.

The English are said to "take their pleasures sadly," but in the matter of Christmas old England "could give us cards and spades and still win." Parties of Christmas dramatists used to go around to the different houses, grotesquely attired, and play all manner of pranks. The actors were chiefly boys, and the parish beadle always went along to ensure order.

The Christmas dinner of old England was a thing to give modern dyspepsia. The main dish was a boar's head, roasted to a turn, and preceded by trumpets and minstrelsy. Mustard was indispensable with this dish. Next came a peacock, skinned, roasted and carefully put back into his gorgeous plumage. The beak was gilded, and sometimes a bit of cotton soaked in spirits, and ignited, was put into his mouth. The table was [illegible] with spices, basted with yolks of eggs and served with plenty of gravy. Geese, capons, pheasants, carps' tongues, frumenty and "mince" or "shred" pies made up the balance of the feast.

The chief functionary of the old Christmas was called the Lord of Misrule. With such liberty, not to say license, as was exercised, it is not strange that an edict was eventually issued against the Lord of Misrule by the house of the King and nobleman he held full sway for twelve days. His badge of office was a fool's bauble, and he was always attended by a page, both of them being masked.

In the monasteries, before the Reformation, a monk was given similar powers and vested with the title, "The Abbot of Unreason." In this there is a strange inconsistency, since the custom flourished most in the place sacred to the Glastonbury thorn. According to legend, Joseph of Arimathea, with his companions, at one time stopped near a certain hill to rest.

The hill was named "Weary-All Hill," afterward corrupted to "Werral Hill." On leaving, he thrust his hawthorn staff into the ground and left it. The staff grew constantly, budded and every year thereafter blossomed gloriously at the dawn of Christmas morning. What if the light from the monastery windows, during the reign of the "Abbot of Unreason," had fallen upon the snowy blossoms of the Glastonbury thorn.

The Lord of Misrule was specially reviled by the Puritans. One of them, a testy old fellow enough, set him down as "a grand captain of mischief." One may easily imagine that this stern old Puritan had been ducked by a party of revelers in the wake of Lord of Misrule, because he refused to contribute to their entertainment.

One need not lament the passing of the Christmas pageantry, if the spirit of the festival remains. Through the nineteen centuries and more that have passed since the first Christmas, as we know it now, the spirit of it has wandered in and out like a golden thread in a dull tapestry, sometimes hidden, but never wholly lost. It behooves us to keep well such Christmas as we have, else we shall share old Ben Johnson's lament in "The Mask of Father Christmas," which was presented before the English court nearly 200 years ago:

"And man or woman * * * that can give any knowledge or tell any tidings of an old, old, grey-bearded gentleman called Christmas, who was wont to be a verie familiar ghost, and visit all sorts of people both pore and rich, and used to appear in glittering gold, silk and silver in the court and in all shapes in the theatre in Whitehall, and had singing, feasts and jollitie in all places, both in the city and countrie for his coming, whosoever can tell what has become of him or where he may be found, let them bring him back againe into England."

It is estimated that 25 per cent. of

How to Cook the Turkey

At this early winter holiday season the mind of the housekeeper quite naturally turns towards your turkey.

In selecting a turkey choose, if the number in the family permit, a young one that is plump and weighs not more than eight or nine pounds. A ten or seven-pound fat turkey [illegible] better, and two such birds are better than one very large one if the purchaser desires the finest flavor. Pull out every bit of feather that the vendor has left, and with a rolled piece of lighted paper singe over the whole bird carefully so that not a hair remains. Take out the fat [illegible] and set it aside. Wash thoroughly, and rinse and wipe dry. Inside and out rub the inside with salt and pepper. To stuff with breadcrumbs, take a pint and a half of [illegible] [illegible] age or celery, according to liking, a teaspoonful of salt and a half a saltspoonful of white pepper.

These directions may be varied to suit family likings, one household preferring little salt or other seasoning while another (unfortunately for the digestive organs) chooses high flavors. Add as little water as will hold the crumbs in a mass and pack it into the turkey.

After the turkey is filled with the dressing sew the openings with a coarse cotton thread and then rub all over with salt and pepper that is mixed in the proportion of one saltspoonful of pepper to one teaspoonful of salt. Lay upon the breast a thin slice of salt fat pork, and tie it with the legs and wings close to the body. Place the bird upon a [illegible] rack or trivet in the baking pan, and pour in a pint [illegible] of hot water.

A turkey of this size should be baked at least three hours, with frequent bastings. The meat, unlike game, must be well done, or its flavor is [illegible]. A large turkey will require a proportionately longer time for proper roasting.

Half an hour before removing from [illegible] the pork and let [illegible] drip into the water. Dredge the [illegible] with flour and permit it to [illegible] dark brown. [illegible] too dark, baste oftener and cover with a piece of brown paper. Remove the turkey from the trivet to another pan, and return it to the oven. Place the pan containing the water and fat upon the top of the stove and stir in a [illegible] of hot water, permitting it to boil up a moment or so. Then stir in a tablespoonful of browned flour, or as much less or more as will make the gravy as thick as cream. It will be ready for use.

Santa Claus in the Zoo.

Said Santa Claus [illegible] Christmas eve,
[illegible]
[illegible]
[illegible]
[illegible]

[illegible]
[illegible]
[illegible]
[illegible]
Would be [illegible] on the shelf,
With which I'd like to light myself.

The wish was granted. Then up spake
A timid little adder:
"Sir, but a trifle it will take
To make my Christmas gladder.
A slate and pencil, if you please,
Would let me do my sums with ease."

The reindeer said, "You may believe
I'd be a happy fellow
If I were sure I would receive
A good sized umberellow,
And also I'd make life four galoche,
Yes, and a rubber mackintosh."

—Walton Williams.

The first thing to remember is that the gift without the giver is bare; therefore, put some of yourself, your sympathy, your affection, and your enthusiasm into all the packages, no matter whether for relatives, friends, employes or poor proteges.

The Journey of THE Christmas Spirit

It was Christmas eve. From the north came a keen, cold wind laden with powdery flakes of snow. The Spirit shivered—though not with the cold; two women had brushed by him, and one had said: "It's so tiresome, you know—this Christmas shopping!"

The Spirit wavered and fell back to where the snow lingered into a big feathery drift, white and untrodden. For some minutes he stayed there motionless, a curious air of indecision mingling with the dejection of his attitude; then merry voices and shouts of laughter reached his ears and he raised his head abruptly.

Down the street were tramping half a dozen youths and maidens, bright-eyed, rosy-cheeked, and smiling-faced. The Spirit waited until they had quite passed, then, dejection and indecision all gone, he stepped into line and followed them.

Everywhere were a blaze of light and a riot of color. Scarlet bells and berries vied with the brilliancy of the glossy green leaves and diamond dust and tinsel caught the light from numberless bulbs and gas jets, and sent it back scintillating with all the colors of the rainbow. The Spirit saw it all and smiled. He raised his head yet higher and squared his shoulders. He had the air of a king who has come into his own.

Before a toy shop window the youths and maidens paused, and when, a moment later, they filed in at the swinging door, the Spirit trod close upon their heels. For a time he saw only the lights, the gay toys, the rosy faces, and heard only the laughter and happy voices; then he saw the drawn face of a tired salesgirl, and heard the cry of a sleepy baby in a woman's arms. His face changed. The next moment he was out once more with the hurrying throngs on the street.

There were other Christmas windows after that, before which the Spirit paused, and other swinging doors through which he filed in the wake of some Christmas shopper; but no longer did he see the scarlet and green of the Christmas cheer—he saw only the weariness of long days of selling, and the fretfulness of long days of buying, and his heart grew sick within him.

"So it's come to this," he muttered, as he strode along, head down, and shoulders bowed. "It's come to this!"

"Once in Royal David's city," pealed the bells far up in the church tower, and the Spirit raised his eyes from the ground.

Across the street stood a great stone church whose wide-flung doors and illuminated windows seemed to bid the whole world a radiant welcome. Over each entrance hung a Christmas wreath and from the tower above still pealed the Christmas music. The Spirit crossed the street and joined the throngs that were entering the doors.

It was an impressive service. The well paid, well-trained choir sang sweetly of the Holy Child, and the deep-voiced, scholarly man in the pulpit referred to him most touchingly in his prayers. Even the lights burned softly, and cast a reverent glow over the silks and furs and laces of the kneeling worshippers. Yet the Spirit was not at peace; and long before it was time for the sermon to begin, he slipped from his seat.

Far down a side street he came to a small chapel, and here, too, a brightly-lighted doorway bade him enter, and once again he accepted the invitation. There were no well-paid, well-trained singers here, no subdued lights, no silks and laces and jewels. Nor yet was there something else that the Spirit looked for anxiously—there was not a single face bearing the imprint of the real Christmas joy.

On the platform a weary-looking, [illegible] man was speaking. "I tell you, my friends," he was saying, "we have lost [illegible] the Christmas Spirit. Things have come to a sorry pass indeed when we dread the coming of Christmas."

The Spirit shivered and shrank lower in his seat.

"At the first," continued the man on the platform, "at the first the idea of Christmas was the most beautiful thing under God's heaven. There was to be this one day when care and worry were to be done away with; when joy and peace were to reign supreme; when everyone was to forget self and give a simple token of love and good will to his nearest and dearest, not forgetting the poor at his gate."

The Spirit drew a long breath and sat more erect in his seat. It was not so hopeless, after all, he thought. This man at least knew.

"And what have we done with it—this Christmas celebration?" went on the earnest voice from the platform. "What have we done with it? We have made it an annual hurly-burly wherein peace and joy have no part; a frantic struggle to give any one and every one as much as—and a little more than—any one and every one gave us last year; and we came out of it with nerves worn to a frazzle and tempers strained to the breaking point. We—"

But the Spirit heard no more. With a groan that was as soundless as were his steps, he left his seat and hurried down the aisle toward the door.

"It's not true. I'll not believe it," he muttered. "Somewhere I'll find the home of the Christmas Spirit!"

On and on he sped. The streets grew broad and quiet. Brightly lighted stores gave way to sombre, imposing-looking residences, though here and there an uncurtained window allowed a glimpse of blazing hearth or of glittering tree. Before one door a sleigh drew up with a jingle of bells, and two women stepped out. When they entered the house a moment later, the Spirit entered too. He was still at their side when, with the mistress of the mansion, they stood before a great tree in the back parlor.

"Oh, how lovely!" cried the two women who had come in the sleigh.

"Think so?" murmured their hostess, with a sigh. "To tell the truth I'm so tired I don't know how it looks—and I don't know that I care!"

"Oh, Evelyn, and it's Christmas!"

"Yes, I know," confessed Evelyn, wearily. "Rank heresy and all that; but I can't help it. Why, girls, I've bought two hundred presents in the last two weeks, and by the time the two-hundredth one was reached I didn't have an atom of wit left."

"You poor thing!" laughed the taller of her two visitors. "You should do as Ruth Seymore said she was going to do—begin the 26th of December to [illegible] for the next Christmas."

ing tragic voice, "Have you seen Ruth Seymore—lately?"

"Why, no; I don't know that I have."

"Well, she's a wreck—a total wreck; and 'twas Christmas that did it."

"A wreck? Then she didn't carry out her idea?"

"But she did—and that's just what's the matter," laughed Evelyn. She said she had the whole thing down to a system as fine as the multiplication table, and she thought it was going to be perfect. Not a store could she go into, not a thing could she see without asking herself, "Now for whom shall I buy that?"

"And as if that weren't trouble enough," continued Evelyn, after a pause for breath, "there were the presents themselves; the furs she bought in January were all moth-eaten before July. And so it went! No wonder she's a wreck. . . . Brrr! Where's that draft come from!" she finished with a shiver, as the spirit swept past her chair on his way to the street.

It was nearly eleven o'clock when the Spirit stopped again. He was in the theatre district. All about him were music, laughter and gay crowds. One after another he scanned the faces of the men and women; again and again he paused to listen to their words.

"Stockings? They're all filled," he heard one woman say. "I get the ready-made kind—all filled when you buy them. It's ever so much easier!"

"I know it; 'tis a bother," came the answer; and at the words the Spirit covered his ears with his hands and fled.

A "bother"—this sweet privilege that comes to a mother but once a year—a bother!

All night the Spirit wandered from street to street, and from town to town, with many a pause before lighted door or window. And as the hours passed his step grew slower, and his face became pale and drawn. Everywhere he heard the sighs of a weary, nerve-wrecked people. But at dawn, when the Christmas sun flooded the world with light, the Spirit once more took heart. Christmas had come. It was already now the day. Let the past be blotted out.

Christmas! From end to end the earth was littered with bits of ribbon and squares of tissue paper. On every side rose the cries of "Merry Christmas!" Yet the Spirit sighed. Everywhere the strain had told. The arduous preparation had defeated its own ends. As for the "simple token of good will" that was to crown the day with love, even the children weighed their presents with a practiced hand, and looked their hobby-horses in the mouth!

It was night when the Spirit once more reached the city streets. The lights, the laughter, they were all there; but with a frown he turned his back and strode swiftly down a narrower street whose windows did not flaunt the Christmas green.

The street was dirty and ill-paved. Here and there a drunken man reeled against a post. A woman, shivering in her rags, rubbed her numbed fingers and lifted them to her blue lips. The Spirit hesitated and almost turned back. Surely nowhere here, in the midst of all this gloom and misery could be found the thing he sought! Then, from far down the street came the sound of music, and he lifted his head and passed on with irresolute steps.

A dozen children were singing. In spite of their rags their faces were aglow, and their eyes were dancing.

"And I have not (it makes me sigh)
One gift within my power;
'Tis winter, too, in me, and I have
Neither fruit nor flower,"

they sang cheerily.

On both sides of the street doors and windows flew open.

The Spirit watched amazed. The song, the singers, the surroundings—he could not understand. Then a low voice came to his ears.

"Who are those children? Who taught them to sing?" a sweet-faced little woman was asking.

"An' don't ye know?" said a woman in the doorway. "They're lame Molly's kids. It's that little English girl what was hurt, ye know, last year. She's been teachin' them songs fer all the kids she could get hold of for weeks. She said Christmas was comin' an' that we ought to sing an' be happy an' make other folks happy. An' she said she couldn't go out an' do it, of course, bein' as how she couldn't walk, ye know, an' so she sent them. She told 'em ter sing it everywhere—all up an' down the streets. Kind o' pretty, now, ain't it? Hush! there they go again."

"Yet let me give my thankful heart,
O little Lord, to Thee;
Bless it and give it out again to other
men from me,"

sang the children.

The Spirit smiled, his face alight with sudden joy. He had found his own.

◆◆◆

Alone at Christmas.

If in this age of organizations innumerable there is room for one more, it is for an organization which would bring together, especially on Christmas, those who are alone in the world, particularly women. Many of us who have our kin closest to us on Christmas day do not stop to realize what our feelings would be if they were not with us. It is so hard to imagine ourselves in a position other than the one we are in. We remember some poor family at Christmas, but at least it is a family. It is together. The one is company for the other even in poverty. We remember the sick, and God bless those who do. Would that some of us might cast a look around and give a thought to those who are not sick, who are not perhaps poor as the world judges, yet who are alone—some girl perhaps, alone; some woman, alone; some young man, some old man, alone. Alone at Christmas!

◆◆◆

Quite as pretty and appropriate the Christmas gummed seals, with suitable design, and they are not pensive. When you are packing cels, spread paper all over the on which you work, and on the around the table. When you finished, all the scraps can be in the paper, and carried away w out trouble and without damage table-cover and carpet.

Color blindness is believed much more common in men

Brant Electors Declared Against Election Fight

But There Will Be a Fight

David Willoughby Forces an Election, Claiming that the North People Want a Representative at Township Council Badly—Most of Speakers at the Meeting Strong for Acclamation—Reeve Nesbitt Retires Leaving Contest Between Weir and Willoughby.

Brant electors met in the Town Hall, Walkerton, after Nominations on Friday to hear Reeve Nesbitt and the Township Councillors give an account of their stewardship in 1916 and to listen to any prospective candidates who might have ambitions to break into the Municipal ring. Unlike a good many Nomination Meetings more praise than criticism was heard. Most of the nominees, of whom there were a goodly number favored an acclamation for the old Council, on the ground that the present Council is composed of a good body of men who should do even better for the Township the coming year with the experience gained in 1916. Most of the candidates expressed a willingness to drop out in case of an acclamation, but there was very determined opposition to this idea by Messrs David Willoughby, and Geo. McCallum.

Mr. Willoughby claimed he had understood plainly that Reeve Nesbitt was dropping out and when he (Willoughby) had been urged to run by a number of North Brant ratepayers he had promised them to do so. If he had not promised, he said, they would have got some other candidate as there was a strong feeling in his neighbourhood that the North part of the township should be represented.

Other speakers claimed that there was a wide-spread feeling that no election was necessary and when the old veteran of many municipal battles Ex-Reeve Fred Frook, moved that the meeting express itself in favor of returning the old Council by Acclamation, the usual election expenses to be donated to the Red Cross, his resolution was carried by an overwhelming majority.

The meeting did not lack good talkers. There were orators of every style from the plain, manly, straightforward Reeve Nesbitt to spick-and-span Geo. McCallum with his even flow of flowery language.

Reeve Spance Nesbitt

Reeve Nesbitt led off, giving a good account of the year's work both at Township and County Council. The Council had tried, he said, to be as economical as possible. Five years ago, the finances had received a bad set-back through damage by floods to roads and bridge, and later through a costly lawsuit. Only this year had the Council been able to catch up again, and now had the pleasure of presenting one of the best financial statements the Council had ever shown. Patriotic needs had been uppermost in their minds. The Council had granted $1500 to Red Cross and in addition the Brant side of the village of Cargill had contributed over $[illegible] to Canadian Red Cross. Speaking of Brant's share of the County contribution of $40,000 to the Patriotic Fund, he said it figured down to $1.50 for each farm for ten years. The Council had been criticized for appointing Dr. Bricker in preference to Dr. Campbell of Elmwood, who had offered to do the work for less. The Council did not consider Dr. Campbell because he lived outside the township and also outside the County line. Dr. Bricker had agreed to do certain work without charge. Coming to the question of Good Roads, Reeve Nesbitt expressed the opinion that we have come to a time when we need a broader and better system for our leading roads anyway. Large sums were paid by Bruce County for auto licenses and the only way we could get our money back was through the Good Roads system. The Good Roads By-law had been given its first reading at the December session and he wanted to see Brant's representative at the County Council whoever he might be, give the matter very careful consideration at least, before opposing it in January.

Deputy Reeve Weir

Deputy Reeve Arch. Weir gave a good account of his stewardship at the Township and County Councils. He reviewed the work of the Road and Bridge Committee of which he had been a member. The work included the rebuilding of a bridge at [illegible] at an outlay of $1800, and the construction of a cattle pass north of Cargill costing over $200. Mr. Weir said he had voted against the Good Roads Scheme in June but had since found reason to change his mind. The system would take in 30 or 40 miles of leading roadway in Brant. Most of the traffic would gravitate to these county roads and the result would be upkeep of the remaining highways in the township would amount to very little. It would require a year or two to get the Good Roads Scheme working and by that time labor should be plentiful owing to soldiers returning from the Front. Mr. Weir said he had turned over the $500 allotted to his division for roadwork to the pathmasters and believed they had given good returns for the money spent.

Finances in Good Shape

The Council's finances were dealt with by Coun. W. A. Howard. He showed how the Council's finances had just recovered from the heavy expenditure caused by floods and an expensive law suit of a few years ago. The 1916 Council are leaving a surplus of $[illegible] which will place the incoming council in a better position than any council for the past four years. It had been the policy of the council not to undertake any new work that would incur large expense but just to keep things going. Roads had been widened at several points which were proving hazardous for automobiles, to save the township from incurring heavy damages. The Council had issued debentures for the installing of Hydro at Elmwood, the 6 per cent debentures for $2000 selling at $31 above par. The time was soon coming when the farmers would have the same privileges regarding electric power as the towns but the present was not an opportune time (1) because of high labor cost at present (2) price of current is yet too high for the farm. With three customers per mile Hydro quoted $3 a month each as a fixed charge for ½ to 5 h. p.; $2.50 for four customers per mile; $2 for five customers. Under Hydro the township would own its own system in twenty years. He looked to the time not far distant when the farmers of Brant would have electric power and electric light.

Coun. Wm. Johnston reported on the work which had been done in his division, which included the widening of the Durham Road at points hazardous for autos. The farmers did the work. He believed they had done their very best. The audience laughed and applauded when Mr. Johnston remarked he was sorry for the farmers if they did not do their best on this roadwork for they were paying the shot themselves through the taxes.

Mr. D. W. Gregg jr., who was elected by 1 majority last year, said he wanted his majority at least doubled this year. He had been allotted $200 to spend in his division but did not spend $75 of the amount. Of this amount $25 was to have gone to the village of Eden Grove for sidewalks. The villagers had proposed putting up $25 themselves if Mr. Gregg would get them a further $25, but as the villagers had not come up with their portion, they did not get the $25 from him.

Willoughby Wants Election

Mr. David Willoughby said it was not his purpose to criticize the work of the Council the past year. But there was a strong feeling in the northern part of the Township that they should have a representative at the Council. A number of ratepayers had come to him to urge him to run. And Reeve Nesbitt having given him to understand last year that he would be dropping out now, he had promised these men to be a candidate for Reeve. If he had not promised, they would have got somebody else to run as they were determined to have a candidate. He referred to the fact that the County Council Committee of which Reeve Izzard of Port Elgin had been chairman, had brought in a report against the county taking over the bridge on con. 6, and that the Brant representatives at County Council had previously voted against Izzard for Warden and against Izzard's resolution to have the June session held at his home village of Port Elgin.

Reeve Nesbitt denied Willoughby's statement that he had said he would drop out. What he had said was that he would not run another election.

Deputy-Reeve Weir replied to Mr. Willoughby that in voting for McNab they had secured a Warden second to none in Canada. The place to hold the County Council session was at the county buildings. He was not in favor of spending [illegible] extra per session to take the council elsewhere.

Mr. F. W. Fisher believed the council should have an acclamation. He was not going to force an election but if there was an election, he was in the field for deputy reeve. He had experience at the council and he believed he was the man for the North rather than Willoughby.

Mr. Walter Findlay, who missed municipal honors last year by a close shave, heartily thanked all those who had supported him. He made a rattling speech in his sharp, clear-cut style touched off with a bit of dry humor. Those who voted against him last year for lack of acquaintance, he hoped would get to know him better. Any who voted against him for spite he felt sorry for. He differed with the present Council on the M. O. H. appointment and minor matters but he considered the present Council a good body of men and he wanted to see them re-elected by acclamation. He had been urged by many ratepayers to come out but he would be a candidate only in case of there being an election.

Mr. Thos. H. Wilson, a well-known ex-councillor, also favored an acclamation. He approved of the present Council's work and thought the rate as good as it could be made at the present time. He believed the Good Roads Scheme was a move in the of commuting statute labor in addition. It would run up too big a bill.

Strong For Good Roads

Thos. H. Tanner, candidate for deputy-reeve, said he had withdrawn last year to make a fair fight. He was strong for good roads. Is there a farmer here to-day, he asked, who would not put a good floor in his stable on account of the cost? The same argument applied to the roads. Mr. Tanner maintained that if there were a good system of leading roads through the Township, the upkeep of the roads would become a small matter. Supposing, he said, there were one good permanent road built between the Walkerton G. T. R. station and down town, would not that street be used for traffic to the exclusion of the other streets. The same in Brant. With good leading roads, the upkeep of the remaining roads would be very small. He criticized the 1916 County Council for allowing the Good Roads Scheme to drag along. If you elect me I will see that the people of Brant get an opportunity to vote on the question next January, he said. In conclusion Mr. Tanner said that the ratepayers would know he was a candidate if they saw his name on the ballot.

Praise From John Rowland.

Mr. John Rowland, who was nominated for Reeve, created a laugh when he said he could not be Reeve of Brant for he was going to be Mayor of Walkerton the coming year. He put up both his hands for good roads and said he understood the Govt. was going to increase its share from [illegible] per cent to 50 per cent. He strongly commended the township and township Council for what it had done along patriotic lines. He wanted to see the Council returned by acclamation. Mr. Rowland also commended the part taken by the German born residents. They were the best settlers we have on our farms to-day.

Vote For The Man.

Mr. John Clancy, of Cargill, was well satisfied with the present Council. He was not sure but what his division did better when it had no representative at Council. His division had the reputation of being great to turn over from election to another. The explanation was they voted for the Man, no matter where he was situated. Mr. Clancy said he might be a candidate at some future time but not this year.

Geo McCallum's Last Appearance

Mr. Geo. McCallum did not believe the Council deserved too much credit for its Patriotic grants. Either he or Mr. Willoughby would have been just as liberal had they been elected last year. For the first time in several years the gang of workers who had always done their best to defeat him would now have an easy time. "Rest to them will now be sweet." They will be able to enjoy their Christmas holidays. The speaker heartily thanked the ratepayers of Brant for their support in past years. He had always followed the path of duty as he saw it. This was probably his last appearance on a Brant platform, as other places were developing for him.

Fred Frock's Resolution.

The Veteran ex-Reeve Fred Frock said he believed it was the general feeling throughout Brant that there should be no election this year. The fact that there was not a representative from the north end did not make much difference to that division. There was no necessity for an election every year. Mr. Frock brought in a resolution that the cost of an election $100, be voted by the Township to the Red Cross.

Mr. Frock's recommendation was carried by the meeting by an overwhelming majority.

Mr. D. Willoughby reiterated from his place in the Hall what he had previously said, adding that in view of the stand he had taken that it was impossible for him to withdraw without breaking his promise. Cross-firing occurred between Reeve Nesbitt and Mr. Willoughby as to what the Reeve said last year. Mr. Nesbitt stated that he had said he would not run another election. He believed the Council was now fairly entitled to an acclamation.

There was so little criticism offered of the Council's work, that the Councillor's, who were given an opportunity to reply, added very little to their previous remarks.

Good-bye, Mother, Don't Worry!

Good-bye—trusting in God to bring him home to her safely—if that be His will.

Good-bye—trusting in you and me to see his Mother through while he, her natural support and defender, is somewhere in France, facing shot and shell for God, for right, and for native land.

In the name of Christendom, men and women, what sacrifice is this! What consecration to duty! What response to the call of the Motherland! What clarion challenge to the world to "Watch Canada!"

He goes—joy of his Mother's heart—idol of all her dreams from the day she bore him—hope and bulwark of her declining years.

He goes—and, Heaven bless his belief in us, his people, he goes, leaving his most beloved possession to our care and protection.

He trusts us. Who will fail him? What man or woman, rich with the possession of the memory of a Mother, will fail his Mother as a reward for her sacrifice?

This trust of our soldiers is a holy legacy.

Give to the Mothers of our soldiers in the name of your mother—as your testimonial to Canadian Motherhood. Give to the Canadian Patriotic Fund. $6,000,000 must be raised in Ontario for this Fund for 1917.

Mothers, wives, and children of Canadian soldiers shall never say that their own people neglected them after their men went forward to suffer and to die.

Every case helped by the Patriotic Fund is carefully investigated. Only where assistance is really needed is assistance given. Everything humanly possible is done to avoid waste and prevent imposition.

Give as Your Own Heart Prompts You to the Patriotic Fund

Ontario is being asked to assure the Canadian Patriotic Fund that it can depend on having six million dollars in 1917 for the families of Ontario's soldiers.

Four million of these dollars must be secured from individual subscriptions. If there is no Branch of the Fund in your town or county send your subscription direct to the Head Office, Canadian Patriotic Fund, Vittoria street, Ottawa.

HIGH SCHOOL REPORT

Record of Pupils in the Various Forms for the Month of December

The following are the results of the weekly examinations held during December. For Honours, 75% is required; for Pass, 60%. The number of subjects written upon in a form varies according to the course taken. The names are given in order of merit.

FORM I

Subjects: Geography, Algebra, History, Spelling, Writing.

Honours—J. Norrish, F. Meagher, C. McNab.

Pass—S. Bremner, A. Condy, N. Shaw, F. Brockelbank, I. Moore, S. Greenzebach, G. Henderson, L. Elder, J. Kenny, M. Pinkerton, L. Wallace, G. Lambertus, J. Paterson, G. Van Horne, A. Chisholm, C. Attwood, G. Ellis, H. Thompson, S. Reichenbach, J. Bruder.

Below Pass—W. Inglis, L. Bergett, E. Giesler, A. Lambertus, A. Waechter, N. McCarter, E. South.

F. Young, 81% on two subjects; F. Garner, 72% on three subjects; L. Bryce, 64% on four subjects.

FORM 2

Subjects:—Science, Arith., French or German.

Pass—W. Ramsey, B. Moore.

Below pass—G. Hibbert, E. Ramsey, H. Johnston.

On German and Science—F. Scherer, 60%.

Subjects—Science, Art, Arithmetic.

Pass—G. Young, A. Weiler, E. Lindsay, E. Stevens.

Below Pass—T. Queen, F. Myles, M. Kenny, L. Bilger, M. Chisholm, M. Bonnyman, M. Wilson, H. Irwin, S. Brockelbank, D. Kenny, E. Milhausen, S. Taggart.

Subjects—Science, Art, Arithmetic, French or German.

Pass—A. Johnston, L. Yack, W. Poltues, N. Pinkerton, N. Lay, V. Eidt, A. Reinhartt.

Below Pass—J. Michell, C. Wilton, D. Farewell, I. Wisser.

FORM 3

Subjects—Geometry, History, Literature, Composition.

Honours—A. Garland, L. McConnell.

Pass—O. Rogers, L. Bilger, L. Batte, E. Glave, A. McCool, G. Seigner, A. Pinkney, E. Bilger, M. Chalmers.

Below Pass—G. Pfohl, J. Chalmers, M. Baechler, H. McCool, M. Forsythe.

Subjects—Geometry, History, Literature.

Pass—W. Wilson, V. Tovell, G. Lewis, C. Cargill, C. Tovell.

Members of the third form taking subjects in the second form.

Subjects—Art, Arithmetic.

Below Pass—C. Tovell, V. Tovell, C. Cargill.

Subjects—Art.

Below Pass—E. Glave, H. McCool, A. Pinkney.

Subjects—Arithmetic.

Below Pass—W. Wilson, G. Lewis.

FORM 4

Subjects—Latin, Chemistry, Zoology, Latin.

Pass—S. Bush, M. Green, M. Weiler, J. Wells.

Below Pass—C. Fortune, C. Thornburn.

WALKERTON BOY IN CLEVELAND

The Telescope heard this week from a former member of the staff, Mr. Art Schmitt, now of the Cleveland Leader. In the course of his letter, our genial young friend makes some interesting comment on conditions in the big American cities which we are taking the liberty to reproduce:—"High life in the city has not impaired my health and and although I work at nights, I always secure plenty of sleep and enough "eats" to quelch my gluttonous appetite. "H.C.L." is the bye-word here and living expenses in all lines are continually advancing. "Eats" seem to be the headline though and like in other cities are causing boycotts through the numerous organizations. Here are a few quotations from prevailing prices at the city markets:—Butter 48c, eggs 68c, turkey 40c, potatoes $2.50 a bushel, apples 5c, a lb etc. Had a laugh the other day when I bought a few apples and paid at the rate of 3c, each for them. Seemed like buying oranges in Walkerton to me. Plenty of amusements houses here in which to idle away leisure hours. Have already seen some good Operas. There are also plenty of other attractions being staged here continually and so always something to attract the public and their ready cash. Christmas business in the mercantile line has passed all records. And all one needs do is to promenade some of the large stores and see how flush the shoppers are with money to bear out the foregoing statement. We have had some fine weather here so far, although visited by a small-sized storm or two. There is meagre evidence of it now. Assure you I find much pleasure in reading the 'Scope. Wish I could trek into the office for a while, could relate a good deal more than in writing, and also have a confab with the old staff.

Week Of Prayer

By order of the Ministerial Association of Walkerton the usual services on the week of prayer, will be held the first week of January, 1917, and in the following order: Monday, Jan. 1st, at 8 p. m. in the Baptist Church, on Tuesday, in the English Church, on Wednesday, in the Presbyterian Church, Bible Society, on Thursday in the Methodist Church. A collection taken at each meeting for the

Lively Contest in Greenock

Ex-Reeve Mike McNab of Chepstow is Out to Beat Dennis Phelan for the Reeveship—Contest for Councillors Also.

The Greenock Council Nominations were held in McNab's Hall at Chepstow, on Saturday from 1 to 2 p. m. and were followed by an enthusiastic meeting of the rate payers. Township Clerk Purdy, who presided as chairman, presented the following repertoire of nominees on his ticket. For Reeve, D. Phelan, M. McNab, H. G. Clark and D. Pinkerton. For Councillors, J. Campbell, T. Symonds, T. Sawyer, T. Gilchrist and J. Collison, the two latter being new candidates in the field.

Reeve Phelan was called upon to report what had transpired in the municipal arena during the past year and touched at length upon the Council's action regarding the Red Cross grant and the Kaake Ditch. The general feeling among the members throughout is that the grant of $1,000 was a very substantial donation compared with grants made by sister municipalities although he was reprimanded for slowness of action. There was considerable cross-firing when he launched upon the subject of the Kaake Ditch, Jas. Collison charging the Council with discrimination and favoritism regarding the fixing of assessments, and claiming that he had been the victim of injustice. He reported a small balance in the Township coffers after the payment of the Trafalgar Day grant. He announced his opposition to the Good Roads scheme before the County Council Board on the ground that the roads of the Township were not likely to be considered to any extent in the proposed project. He declared that he was once more in the field for re-election and solicited the support of his old friends on the basis of past efficient service as pilot of the municipal barge.

H. Clark, the next speaker, declared that he felt an uncanny feeling creeping over him owing to the recent carving which had been going on, alluding to the reduction of the proposed reduction of the Red Cross grant. He outlined a plan for a Better Roads Scheme and advocated the extension of the Council's term to two years. He declared however, that like the small boy who didn't wish to go to heaven because his companions expected to go there, he wasn't desirous of entering the race with the other candidates for the Reeveship and asked to have his name withdrawn.

M. McNab asked for the support of the ratepayers explaining that previous experience at the head of the Council qualified him aptly for the position. He declared that he would stand at least until Denny should knock him down and intimated that he would come back even in the event of a knockout.

D. Pinkerton explained that business interests prevented him from accepting the nomination at this particular time. Thus the list for the Reeveship dwindled down to two, Phelan and McNab abiding by their decision.

The Councillors each in turn reported the work done in his respective division during the past year. J. Campbell stated that although favoring the original proposed grant of $1,000, he had been vanquished by superior opposition at the Board.

The real fireworks began when T. Symonds took the stand and was bombarded with a shower of questions hurled by Jas. Collison, relative to the Kaake Ditch proceedings, the men in question both being interested parties and Collison claiming that Symons as a member of the Council had been favoured at his expense. He continued his bombardment in a spicy speech a few moments later and closed his remarks by agreeing to accept the nomination. Sawyer and Gilchrist also consented to stand.

The struggle for premier honours will no doubt be a close one and will be followed with intense interest.

CHRISTMAS FAIR PRIZE LIST

CLASS I. HORSES.
Heavy Draft—3000 lbs. and up.

Sec.

1. Span to conveyance, 1st W. Long & Sons.
2. Two-year-old Filly or Gelding, John Mielhausen.

AGRICULTURAL—(Under 3000 lbs)

3. Span to conveyance, 1st Alex George, 2nd J. A. McDermid.
4. 2 year-old Filly or Gelding, 1st J. Mielhausen, 2nd Wm J. Richardson.
5. 1-year-old Filly or Gelding, Agr or Heavy Draft, 1st Frank Rennie.
6. Foal 1916, (Filly or Gelding, Agr. or Heavy Draft, 1st E. Fenner, 2nd Charles Tanner.

GENERAL PURPOSE—(Draft type excluded)

7. Span to conveyance (not to exceed 2500 lbs), 1st Alex Carr, 2nd F. A. Kent.

CARRIAGE.

9. Single to conveyance, 1st C. J. Dickison, 2nd Walter Jasper.
10. 1-year-old Filly or Gelding 1st C. J. Dickison.

ROADSTER.

11. Span to conveyance, 1st George Brer.
12. Single to conveyance, Robt McKee, 2nd Pierce Bros.
13. 2-year-old Filly or Gelding, H. J. Ernest, 2nd Frank L. Lang.

CLASS II. BEEF CATTLE

2. Fat Heifer, 2 yrs. old, Andrew Schmidt.
3. Steer or Heifer, one year and under, 1st Andrew Schmidt, 2 W. A. Tolton.
4. Calf under one year, 1st W. A. Tolton, 2nd A. Schmidt.

CLASS III, SHEEP.

1. Fat Wether, or Ewe, any breed, 1st J. L. Tolton.
2. 3 Ewes under one year, 1st J. L. Tolton.

CLASS IV. BACON HOGS.

2. Sow, 250 lbs and under, J. L. Tolton.

CLASS V.—POULTRY.

1. Plymouth Rock Cockerel, A. V. Cooke, 2nd C. J. Dickison.
2. Plymouth Rock Pullet, J. Garbutt, A. V. Cooke.
3. Wyandotte Cockerel, Roy Lamb, 2nd Lorne Stevens.
4. Wyandotte Pullet, Lorne Stevens.
5. Orpington Cockerel, J. Sidle Jr., A. Kirstine.
6. Orpington Pullet, A. E. Wahn, 2nd A. Kirstine.

CLASS VI—TURKEYS

1. 1 Male, 1st C. J. Dickison,
3. Pair, Oscar Johnston.

CLASS VII.—GEESE

2. Pair Colored, 1st W. J. Richardson, 2nd H. J. Ernest.

CLASS VIII.—DUCKS

1. Pair White, J. Sidle, Jr. 2nd A. V. Cooke.
2. Pair Colored, 1st W. J. Richardson, 2nd W. J. Richardson.
3. Pair Indian Runner, 1st E. Fenner, 2nd A. V. Cooke.

CLASS IX.—EGGS.

1. 1 doz. White Eggs, Mary E. E. Bell, 2nd E. Fenner.
2. 1 doz. Brown Eggs, E. Fenner, 2nd Mary E. Bell.

CLASS X.—DRESSED POULTRY.

1. Pair Cockerels, 1st Wm Johnston, 2nd Mrs. C. J. Dickison, 3rd J.
2. Chicken, J. Garbutt, 2nd Wm. Johnston, 3rd J. Dippel.
3. Turkey, Mrs. C. J. Dickison, 2nd Mrs. J. Johnston.
4. Pair Turkeys, Mrs. J. Johnston, 2nd Mrs. C. J. Dickison.
5. Pair Geese, 1st W. Van Horne, 2nd H. J. Ernest, 3rd Mary Ann Sidle.
6. Pair Ducks, Mrs. C. MacLean, 2nd Mrs A. Gowanlock, 3rd Mrs. A. Gowanlock.

CLASS XI. MEATS.

1. Hog dressed, 1st Wm. Parker,
2. Hind-quarter Beef, X. Oberle, 2nd Wm. Parker.

CLASS XII FRUIT.

1. Dessert Apples, N. P. Schmidt,
2. ½ bus. Spies, N. P. Schmidt.
3. ½ bus. Baldwins, N. P. Schmidt
4. ½ bus. Kings, N. P. Schmidt.

CLASS XIII. VEGETABLES.

1. Bushels of Potatoes, 1st J. L. Tolton, 2nd A. Schmidt.
2. Dozen Celery, J. Dippel.
3. 6 Turnips, A. Schmidt, J. L. Tolton
4. 1 dozen Beets, 1st Mary E. Bell, 2nd N. P. Schmidt.
5. 2 Cabbage, (drumhead,) A. Schmidt, 2nd N. P. Schmidt.
6. 2 Cabbages, (Winningstadt,) J. Garbutt, 2nd A. Schmidt.
7. 1 dozen Carrots, 1st Mary E. Bell, 2nd N. P. Schmidt.
8. 2 Citrons, 1st J. Dippel, 2nd J. Garbutt.
9. 2 Cauliflower, N. P. Schmidt.
10. 1 dozen Parsnips, A. Schmidt 2nd A. E. Wahn.
11. Squash, Hubbard, A. V. Cooke.
12. Pumpkin (largest.) N. P. Schmidt.
13. 1 dozen Onions, A. Schmidt, 2nd A. Wahn.

CLASS XIV. BUTTER.

1. 5 lbs. butter in prints 1st Ab. Rowand, 2nd Mary Bell, 3rd A Schmidt
2. 10 lbs. butter in crock, 1st J. Bell, 2nd A. Schmidt, 3rd Mary Bell.

CLASS XV. BREAD.

1. 2 loaves White bread, 1st H. J. Ernest, 2nd A. Schmidt.
2. 1 doz. Buns, J. Mielhausen, 2nd Mary Bell.
3. Fruit Cake, J. Bell, 2nd Mrs. A. Gowanlock.
4. 1 doz. Fried Cakes, Mrs. J. Lymbery, 2nd H. J. Ernest.

Apple Pie, J. Mielhausen, J. Bell

CLASS XVI. MISCELLANEOUS.

1. Home-made Cheese, J. S. Schmidt, 2nd J. S. Schmidt.
2. Crock Apple Butter, 1st Oscar Johnston, 2nd H. J. Ernest.
3. 5 lbs Honey in glass, 1st Ab. Rowand, 2nd J. J. Ernest.
4. 5 lbs Honey in comb, J. J. Ernest.
5. Pail of Sauerkraut, H. J. Ernest

SPECIALS

1. Halter Broken Colt (open to boys 15 years or under,) 1st Wilfred O'Keefe, 2nd Jimmie Rennie.

4. Best Dairy Cow exhibited by parties supplying milk to Robert

Country Correspondence

Continued from Page 8

CARGILL

Among those who spent the holiday in town were, Miss Nellie Clancy of London, Miss Verna Loughleen of Woodstock, Mr. Harold Loughleen of Drayton, Mr. and Mrs. Wes. Brownscombe of Stratford, Mr. W. D. Keeling of Toronto, Pte. W. Grainger and Corp. Hamilton of London, Mr. Louis Cliff of Oshawa, Mr. Fleming Keyes of Toronto, Miss Agnes Keyes of Chesley, Mrs. Dietrich and Miss Muriel of Chesley, Mrs. and Lieut. Oatle of Toronto, Mr. and Mrs. Gordon Young of Woodstock.

Mr. and Mrs. Jno. Cowing and Mrs. R. Loughleen spent Satubday in Walkerton.

The Cantata entitled "Santa's Surprise Party" which was given by the School children on Thursday evening in the hall here was a decided success. Much credit is due to the teachers, Miss Keeling and Mr. Ruttle, for the interest they took in getting it up. The nice sum of $30.00 was handed over to the Women's Patriotic Society.

Mr. Jas. Sparling, assistant at the G. T. R. depot here, relieved the agent at Pinkerton station of his duties on Monday.

Mr. Philips of Stratford who has been relieving at the G. T. R. depot here returned to Stratford on Saturday.

A number of local citizens spent the holiday out of town, among them were:—Messrs. R. A. Fowlie at Whitby, F. H. Smith at Walkerton, F. F. Balsdon at Pickering, and James H. Alexander at Allenford.

Mr. Fred Hamilton who for some years has been in British Columbia arrived here on Monday and will visit his mother Mrs. Charles Hamilton here.

Mr. Wm. Welsford formerly of here now of Guelph spent the holiday with relatives here.

Mrs. (Dr.) Bricker who has been visiting her parents in Toronto returned to her home here on Tuesday.

A dance was held in the hall here on Tuesday night and the young people all report a fine time.

SOLWAY

Miss Loretta McGarrity is holidaying at her home here.

We are sorry to report the illness of Miss M. Quirk. Here's wishing her a speedy recovery.

Mr. and Mrs. Ed. E O'Connor and Miss E. O'Connor, spent Christmas day at the home of Mr. Jas. O'Connor, Walkerton.

Mr. and Mrs. Dankwart and babe from Kitchener, spent the holiday at the home of Mr. A. Reih.

Mr. and Mrs. L. Mielhausen from Elbow, Sask. spent Christmas at the home of the latter's mother, Mrs. Jno. McCallum

Miss Eleanor McGarity, teacher from near Durham, is spending her holidays under the parental roof.

Mr. Jno. Coates and Master Tom are visiting the former's parents, Mr. and Mrs. Thos. Coates.

Mr. and Mrs. Ben Michell spent Christmas at Mr. Jno. Whitehead's.

Miss K. McCallum from Toronto, is visiting at her home here.

We wish you all a Happy New Year.

SOUTH LINE

The South Line school annual entertainment was held Thursday. There was a good attendance. Lunch was served at noon and a good programme of recitations, dialogues, choruses, quartettes, drills and pantomimes was well rendered by the pupils during the afternoon. At the close of the programme the pupils presented their teacher Miss Hamilton with a nice jewel case. Santa Claus then treated all the children to an orange and candy. The very pleasant gathering was brought to a close by singing "God save the King".

Mrs. Walter Kirstine and Mrs. George Fleming returned Monday to their homes at Matheson, New Ontario.

Mrs. Steele moved last week to reside with her son John.

Mr. Robert Steele and son Wellie of Treherne and Mr. Robert Hyslop of Ovid, Mich. are visiting Mrs. Steele and other friends in the district.

Miss Hamilton is spending the holidays at her home in Paisley.

worth; then there followed some remarks as to the limited accommodation which the Little House presented to a married couple, culminating in the plain question as to whether Mr. Simon would have any objection to Mrs. Simon being moved from the Big House into the Little one—supposing that she should manage after all to last till June, for it appeared that the wedding days of servant and master had been fixed for about the same time.

Simon himself would have seen no objection to the arrangement had it not been for a letter of tearful complaint which the same mail brought him from the sick Caroline. As the new made fiance of Miss Ingram, he was feeling particularly guilty towards his wife, and the result was that the return mail took two letters to Lot 12, a soothing one to Caroline, and a severe one to Joseph Silkworth, in which he was told that he could have the Big House the very day after Mrs. Berrincott's death, but not an hour before it.

There now followed some uncomfortable weeks for Simon. Two mails came without bringing him the news of his liberty; twice his wedding-day had been fixed and twice he had managed to have it deferred. He was beginning to be near his wits' end, when on June 26th the following letter reached his hands:

"Lot 12, June 8, 18[illegible].

"Honoured Sir: I have run myself so close with the time that it is all I can do to put these lines to paper. The reason that I had deferred writing was that I had expected" (he had begun to write "hoped" and then scratched it out hastily) "to be able to convey to you by this mail the news of Mrs. Simon's death. Dr. Garnet, who is attending her, did not expect her to see the night. He declares a revival to be quite out of the question this time. The agony has indeed already begun. I shall keep this letter open till the last possible moment.

"Your obedient servant,
"Joseph Silkworth."

"P. S. I have just sent over to the Big House, and am told that she is still breathing. Dr. Garnet thinks she may hold out till morning, but more likely the end may come before midnight. In any case Mrs. Simon is a dead woman by the time this letter reaches your hands."

Three days later Simon's wedding took place, he having, on the strength of the above letter, decided to risk it. And yet, although his mind was almost quite at rest, he was aware of waiting rather impatiently for the next mail. It came empty-handed, bringing from St. Clare no news either of Caroline or of sugar canes. Puzzled and a little anxious, he despatched a sharp epistle to the manager, calling upon him to state by return of post on which day Mrs. Berrincott had died. The answer came brimming with the most abject apologies—it had been the first ecstasies of the honeymoon which had caused mail day to be missed—and announcing that Mrs. Simon had breathed her last upon June 18th, having, contrary to Dr. Garnet's expectations, revived for another ten days.

It was with a big breath of relief that Simon pushed the letter into its cover.

"Enjoying his honeymoon, has he been, the wretch," he muttered, "and spoiling mine for me by keeping me on thorns. Well, well, all's well that ends well—eleven days to spare."

And from that day forward Lot 12—which after his second marriage he gave up visiting—became for him no more than a spot from which monthly reports reached him as to the state of the canes, and as the years rolled on, his very memory of the brief period of wedded life which he had spent in the shadow of cocoanut palms became to him as unreal as the images of the palm trees themselves.

Of all this, of course, Bernard knew nothing. All that he was aware of as yet, while he kicked his heels in Williamstown waiting for the next mail, was that his name, according to English law, was not Bernard Berrincott, but Bernard Ingram, this latter having been his mother's name; also that Thornton would now pass to the next heir—in other words, to his Uncle James.

For his own future he had formed no plan as yet, except that nothing would induce him to stay in England, although it was unavoidable to visit it for the winding up of affairs. Besides, even had it not been unavoidable, he knew that if he was to start on his new life with anything like peace of mind he must attempt to clear up some of the mystery attached to the old. It was, after all, possible that among his father's old papers at Thornton some clue would be found which might guide him to daylight.

Two days before mail-day Bernard made his last expedition townward. It was an expedition to Cane Hill, for he did not wish to leave the island without seeing Miss McCrie once more.

The day was brilliant and windy—more than usually brilliant and more than usually windy—and Bernard, drawing up in front of Cane Hill house, was surprised to see several dozen people of various shades of color collected round the door step and swarming up and down the grass bank, while a gigantic mulatto, standing upon what seemed to him to be the dining-room table, waved some indistinguishable object above his head and shouted something in a stentorian voice. Having mounted the bank, he perceived the object in the mulatto's hand to be a carved mahogany box, and the words that were being shouted he distinguished as

"One shilling and ten pence, ladies and gentlemen, going for one shilling and tenpence—going, going—gone!"

An auction? Was that what was going on? And what could it mean? And where was Miss McCrie? Bernard looked about him in astonishment. It seemed to him that the whole of the furniture and most of the other belongings of the house had been collected on the top of the bank. He recognized several of the Chippendale tables that stood in the drawing-room upstairs; and he caught sight of one of the old cabinets being lugged up on to a cart down on the road by a knot of chattering negroes. The scene would have been lively enough without the wind and the sun to enhance the details, for the former caught hold of every scrap of drapery as well as of all the gaudy aprons and head-cloths in the crowd, and turned them into fluttering signals of distress, and the latter flashed back from the handles of the silver spoons which the mulatto was now bringing to the notice of the public, and struck sparks from every bit of glass and crockery that stood about waiting for its turn. Before a couple of cracked mirrors leaning against the wall, half a dozen ragamuffins were dancing with hands joined, grinning gleefully at their own black faces.

It seemed that nothing was to escape the hammer. Bernard, having stood for some minutes watching the scene in amazement, stooped to pick up a paper that the wind had carried to his feet—it was an old song, very limp and ragged, and with the name "Nellie" written on it in faded ink.

Having made his way round the house, he entered by a side door and went in search of Miss McCrie. In the dining-room, whose door he first opened, he was greeted by four naked walls. Every one of the dark green volumes which he had seen last had vanished. He opened several other doors and was met by a great many more naked walls, but of Miss McCrie there was no trace downstairs. It was in the drawing-room that he found her at last, walking briskly up and down, with her hands tightly clasped behind her back and her mouth drooping more than usual at the corners. There was not a chair remaining in the room, which undoubtedly was one of the reasons for her walking up and down, but even had there been half a dozen chairs available, it is probable that Miss McCrie would not have sat down, but would have preferred to keep up her breathless walk, stopping only every now and then in order to throw a glance out of the window at the doings below. Here also the walls were bare, the red-green color which had once adorned them showing in faint green squares wherever it had been shielded by a picture now removed.

"Miss McCrie!" broke out Bernard, unheedful of any more conventional greeting. "Tell me, for Heaven's sake, what this all means?"

"It means that I am going away," said Miss McCrie, standing still.

"Going away? But why? Where to? And why are you not taking any of your things with you?"

"Because I need money."

"As badly as all that?" escaped from Bernard's lips before he had time to stop it. He was thinking of that song that had fluttered to his feet. "You certainly do things thoroughly when you are about it," he added, quickly. "This is the most complete clearing out I have ever heard of."

The matter looked so serious that evidently the best thing to do was to treat it as lightly as possible.

"The look of the dining-room quite gave me a turn; surely the register books have not gone the way of the tables and chairs?" and he tried to laugh.

"The registry books? Which registry books?" Miss McCrie was beginning, and then with an exclamation darted off to the nearest window. "It is the piano now," she said, with something of a gulp. "Poor Nelly's piano."

"A splendid instrument, ladies and gentlemen," was heard from below. "Who will give more than nine and sixpence for this truly elegant object?"

"But it not make music," objected a voice in the crowd.

"That is not true," said Miss McCrie, just above her breath. "It is only a little hoarse in damp [illegible], and that only because it was unluckily swamped on the coast when it came to the house twenty-five years ago and the salt water got into the cords."

She gave one long look at the piano, and then turned resolutely from the window.

"You were asking me about the registers. I have got nothing more to do with registers. I handed over the books to the governor a week ago."

"But I don't understand—for what reason?"

"Mr. Burton. I told you that I thought it rather relieved him to have something to report. It was an outlet to his red-hot zeal, and, as the governor happens to be an old enemy of mine, it turned out that a mutilated register was enough to kill me as registrar general. Don't look so distressed, Mr. Berrincott, for pity's sake, the loss isn't so awful. My pay used only to be sixty-five pounds."

"And what else have you got to live on besides those sixty-five pounds?" asked Bernard, bluntly.

Miss McCrie flushed scarlet, in the way she had flushed the other evening.

"Oh, it isn't easy to starve in the tropics," she replied, evasively. "And besides, the sale will bring in something, I suppose." And she walked back again to the window.

Bernard, following more slowly, saw that the piano had been disposed of, probably to somebody who would use it as a sideboard, or a washing table, and that the auctioneer was unpacking something white and strange-looking out of a box.

"The skeleton," said Miss McCrie, with a quick sigh. "Harry's skeleton. I would have offered it to Dr. O'Lynn, but he is away."

Meanwhile the mulatto's glib tongue was running over a list of the advantages which are bound to accrue to every household by the possession of a skeleton, as well as the commendable points of this skeleton in particular, which as it turned out, was short of only two ribs and one finger, and all the time the wind was making the skeleton dance merrily off the table to the music of its own rattling bones.

When Miss McCrie turned from the window this time she found Bernard's eyes fixed upon her.

"What are you going to do?" he asked.

"To live as best I can. I am leaving this house because I don't think I could bear to live in it without the things; I have been offered a [illegible] house, which is smaller, down by the sea. [illegible] go with me, and that is really all I want."

"But this is rubbish," burst out Bernard. "You must let me help you, Miss McCrie."

"You?" was all that Miss McCrie said, but the stress she laid upon the word brought Bernard to his senses.

"To be sure, I'm a duffer," and he struck himself on the forehead.

(To be continued.)

SUNDAY SCHOOL LESSON

Lesson XIII. Dec. 24, 1916.

Unto Us a Son is Given—Christmas Lesson.—Isaiah 9: 2-7.

Commentary.—I. Light in darkness (vs. 2, 3). 2. The people that walked in darkness—Isaiah had been showing the deplorable condition into which his people had fallen because of their sins. Ruler and subjects were far from God. The nation's enemies were permitted to overrun the country. The prophet turns toward the future and paints a brighter picture. People do not need to walk in darkness. The darkness comes from the failure to make the right use of knowledge and opportunity. Rejected light, and truth spurned, leave one in a state of spiritual night. There was also social and political darkness, for temporal adversity came upon the nation because of their rejection of the true God. Have seen a great light—The prophet uses the perfect tense, speaking as if the light had already come. "The perfect throughout are those of prophetic certainty. The writer is transported into the future."—Camb. Bib. The prophecy is twofold. In its lower sense, there was its fulfilment in the temporary and partial removal of the Assyrian oppression; but in its higher sense its fulfilment meant the coming of Christ. The land of the shadow of death. This represents a condition in which spiritual death prevails. Some think the Babylonish captivity is meant. There would be deliverance from that captivity, and the light would shine upon the nation in its fulness with the appearing of the Messiah. 3. Thou hast multiplied the nation—Isaiah's prophetic vision beholds the rising and spreading of the Redeemer's kingdom. And not increased the joy—Dr. Clarke as well as most recent scholars, thinks the text should read, "Thou hast increased their joy." Many ancient manuscripts have the latter reading. They joy—They rejoice. According to the joy in harvest—The springtime [illegible] of a harvest is fulfilled, and there is joy because of the fruitage obtained. "They joy before thee" is an expression which shows that the joy is a religious joy. "Hilarious joy is still a common usage in Palestinian festive seasons after harvest and after vintage; and spiritual joy in the text is, in its outward manner, not in its quality or kind, compared with this; also with the joy which occurred in old time in the division of spoils of war after great victories."—Whedon. As men rejoice when they divide the spoil—This is the joy of victory and conquest. The coming of Jesus means the defeat of Satan and victory over sin. In earthly affairs there is rejoicing over [illegible] victory; in the spiritual warfare also there is abundant reason for gladness over the victories gained.

II. Deliverance from oppression (vs. 4, 5). 4. Thou hast broken the yoke—The prophet in his vision saw so clearly that deliverance from oppression was coming, that he spoke of it as already realized. Many deliverances came to Israel, such as that from the Assyrians, that from the Chaldeans and those from the Persians and Macedonians. The great deliverance would come when the power of Satan would be broken by the coming and complete work of the Messiah. The staff of his shoulder—A sort of yoke fitted to the shoulders, upon the ends of which burdens were balanced. The rod of his oppressor—The rod is the symbol of oppression and authority. There was to be temporary deliverance from Judah from Assyrian oppression, but the prophecy would have its complete fulfilment in the deliverance of the people from the power and bondage of Satan. As in the day of Midian—Reference is here made to the marvelous deliverance from the hosts of Midian (Judg. 7) wrought for Israel by the Lord, through Gideon, and his small company of men. 5. For every battle, etc.—See the Revised Version. It was an ancient custom to gather the armor and weapons of a conquered enemy, together with their blood-stained garments into a heap to be burned. "The idea of the verse is that after Jehovah's great victory every vestige of war shall be burned up in preparation for the kingdom of universal peace."—Skinner. The time is coming when the war shall be no more.

III. The Messiah (vs. 6, 7). 6. For—There is a great difference between the sentiment of this verse and the one which precedes it. The word "for" introduces the reason for the victory, deliverance and joy that were coming to the nation and to the world. Unto us—One of the names of Jesus is Immanuel, "which being interpreted is God with us" (Matt. 1:23). The one whom the prophet saw in his vision was to be identified with the Israelitish nation, and not only with them, but with the entire race of mankind. A child is born ... a son is given. As Son of man Jesus was "a child ... born"; as Son of God he was "a son ... given."—Spurgeon. He came to the earth as an infant, being thus most intimately joined to the race. Government ... upon his shoulder—He would be born to rule. All power is vested in him. His name—All the names applied to Jesus are expressive of his nature or work. Wonderful—Jesus stands alone in all the universe. There is no other being with whom he may be compared. He is wonderful in his nature, human and divine; wonderful in the works he performed; wonderful in his manifestations of love; wonderful in his sacrificial death; wonderful in his resurrection and ascension, and wonderful in his intercession. Counsellor—Guide. None have ever submitted to his leadership and been led astray. The mighty God—Divine in the absolute sense. The everlasting Father—He not only possesses the attribute of eternity, but the thought is, he continually acts as a Father to his people, in provision, in protection, and in loving kindness. The Prince of Peace—His reign is promotive of peace. He sets up his kingdom in individual hearts, and that kingdom is peace. Wherever he reigns, peace prevails. Families, communities, organizations and nations that act in harmony with the Prince of Peace are not engaged in strife and warfare. The horrible wars of the world, and all wars are horrible, indicate the absence of the spirit of the Prince of Peace.

IV. Messiah's kingdom (v. 7). 7. Of the increase ... no end—The kingdom of Jesus Christ is an expanding and an enduring kingdom. Its progress can not be stopped. It is irresistible. Earthly kingdoms have their rise and fall, but the kingdom of Christ shall have no end. Upon the throne of David—Christ sprang from the family of David, and he is spoken ruler of the people of all ages and climes, who accept the great salvation which he has provided. To order it—To rule it. With judgment and with justice—His administration is absolutely just, and unimpeachable. Zeal—Earnest care, intense, glowing love, and determined purpose. "It is that overflow of the love that can not keep still, which, when men think God has surely done all he will or can do for an ungrateful race, visits them in their distress, and carries them forward into unconceived dispensations of grace and glory. It is the Spirit of God, that yearns after the lost, speaks to the self-despairing of hope, and surprises rebel and prophet alike with new revelations of love. We have our systems representing God's work up to the limits of our experience, and we settle upon them; but the Almighty is ever greater than his promise or than his revelation of himself."—Expositor's Bible. Lord of hosts—It is he who commands all forces in the universe and who will carry his purposes into execution. Men and nations may conspire to defeat God's purposes, but he is the Almighty and is able to defeat the plans of his enemies.

Questions.—Who is the writer of the words of this lesson? When and where did he live? Who was king in Judah at the time he wrote these words? To what people did he write? What was their condition? Whose coming did he foretell? How was the Messiah to come to earth? What names are given to Christ and what do they mean? Describe the kingdom which he was to establish.

PRACTICAL SURVEY.

Topic.—The divinity of Christ.

I. The foundation of the world's hope.

II. The certainty of full redemption.

I. The foundation of the world's hope. In his prophecy Isaiah contemplated the world at large in a picture of the spiritual conditions as they were and would be when Jesus should come. That which was typified was the advent and mission of Christ. His incarnation, His advancement to supreme rule and authority, bringing light and liberty, constituted the design of God for a lost world. He was to be the marvelous light in the midst of a dreadful darkness, working an astounding change such as only God could work. The entrancing view of future glory which burst upon the prophet's soul was in bright contrast to the preceding gloomy outlook which had filled his mind. The long dark shadow which was so evident had fallen over all the pursuits and hopes of human life. The glory which was revealed at that time was but the prelude to that greater glory which the incarnation made manifest. The era in which Jesus was born was one of peculiar darkness, ignorance, vice, superstition, violence, fanaticism, unbelief and despair. His coming was to [illegible] and expel blighting error, to uproot pride, cruelty and selfishness, to abolish iniquity, to plant and nourish in the mind and heart of man the opposites of all these and so to exercise a beneficent and transcendent power, and thus to take the government of the world upon His shoulder. The only way to do this was by winning the world's devotion to Himself through His undying love. Therefore Christ entered and pursued the path which led to Gethsemane and Calvary. He stood pre-eminently glorious as a great light dividing the darkness from the day, possessing in Himself a fullness, commensurate with His divinity.

II. The certainty of full redemption. God designed to reveal Himself at last to His creatures through an earthly life. The very person of Jesus Christ revealed the Father. In announcing the birth of the child and the gift of the Son, the prophet unfolded the purpose for which He was born, His work, His sufferings, His death and resurrection. God's names always reveal character. They were always revelations. All the perfections of "the mighty God" are, in scripture, ascribed to the Redeemer. Christ revealed every distinct part of His nature. The prophet may not have been familiar with the doctrine of the Trinity, but he could apprehend the thought of God incarnate. The names by which Isaiah designated the coming Redeemer include his past, present and future. The first arouses wonder and awe, the foundation of religious feeling. They then call forth trust in the all-wise, almighty One. Then follows love towards Him as a protecting Father, who will at last conduct them into perfect peace. Isaiah saw that the only deliverer who could accomplish the necessary work must fill out the full measure of these terms. The grandeur of the titles sufficiently determines the meaning of the prophet. Every name is the divine exponent of a corresponding attribute or office or work. They are appropriate descriptions of living realities. As a child born, the reality of his human nature is set forth; as a Son given, the same nature with His Father is expressed. The kingdom of grace and the administration of mercy are proclaimed in the words, "The government shall be upon his shoulder." All parts of the universe are concerned in this glorious person. Christ is to be proclaimed the Son, wonderful in the constitution of his person, wonderful in his character, his teaching and his mission. His truth illumined the dark valleys of error. His life shed a bright light on the life of men. His atonement made clear to mankind the way of return and reconciliation to God. Wonderful is the Son in his eternal relation to the almighty Father. The chief counsel of Christ was that man with his sins, his sorrows, his struggles, his aspirations, should come into intimate union with Himself, the Saviour of mankind. The Kingdom of the Prince of Peace in its essential laws and principles differs from all the kingdoms of men. It wins its way among men by the inherent power of its own excellence, eliminating war and conflict, restoring love and order. Higher yet, it establishes peace between man and his own conscience, between him and his maker.

T. R. A.

Knife Duels in Mexico.

A duel between cattle herders on the Mexican plains is about as savage and crude a manner of fighting as one could possibly imagine. Each opponent extends his left arm, and a third party who has been selected to act as referee binds their wrists together with a thong of rawhide. He then places a knife in the right hand of each, and the fight is on. Needless to say, it does not last long. Every stab may be calculated upon to do damage, and it often happens that both duelists receive fatal wounds. Yet, in spite of the savage rules of the match, there are men who become experts and terrorize a whole neighborhood. They pride themselves on being able to strike so quickly and so surely that they can kill an opponent with the first blow and get away unscratched.—Exchange.

—Oh, yes, they do. Job did. My Sunday school teacher read to me out

SUNDAY AT HOME

WHY DO WE WORRY?

Why do we worry about the nest?
We only stay for a day,
Or a month or a year, at the Lord's behest,
In this habitat of clay.

Why do we worry about the road,
With its hill or deep ravine?
In a dismal path or a heavy load,
We are helped by hands unseen.

Why do we worry about the years
That our feet have not yet trod?
Who labors with courage and trust, nor fears,
Has fellowship with God.

The best will come in the great "To be,"
It is ours to serve and wait.
And the wonderful future we soon shall see,
For death is but the gate.

—Sarah K. Bolton.

ABIDE IN ME, AND I IN YOU.

I am crucified with Christ; nevertheless I live; yet not I, but Christ liveth in me: and the life which I now live in the flesh I live by the faith of the Son of God, who loved me, and gave Himself for me.

I know that in me (that is, in my flesh,) dwelleth no good thing: for to will is present with me; but how to perform that which is good I find not. O wretched man that I am! who shall deliver me from the body of this death? I thank God through Jesus Christ our Lord.

If Christ be in you, the body is dead because of sin; but the Spirit is life because of righteousness. If ye continue in the faith grounded and settled and be not moved away from the hope of the gospel, which ye have heard.

Little children, abide in Him: that, when He shall appear, we may have confidence, and not be ashamed before Him at His coming. He that saith he abideth in Him ought himself also so to walk, even as He walked.

STAND.

It is said of an emperor that when he came to die, he was lifted to his feet, so as to meet the enemy standing. An old Puritan said: "I want to have the marks of my warfare on my breast, not on my back, as if I was running away; I want to face the foe to the last."

Stand! Stand fast in the faith. The old emperor did not forget his drill. He wanted to stand at "attention" in himself, for himself, by himself. Not armies, territory, officers of state or bodyguard, but simply myself. Not what I have, what I have wrought, not the long reign associated with my name, but what I am, my personal conflicts, conquests, and my crown.

Do we stand for principles or possessions, bigness or greatness? What constitutes greatness? It is not show, not worldly possessions, it is not the man, but the load he carries, that is the big thing, and the load is not ornamental. An American writer draws the picture of a dinner party of millionaires; the hostess stands on a ten thousand dollar rug, looks round in a hundred thousand drawing room which is part of a two million dollar mansion. At dinner one of the guests speaks in a fifty million dollar voice, and is answered by a merely ten million dollar tone.

Is this the height to which men climb? "Fain would I climb, but that I fear to fall." If you fear, better not to climb at all.

Greatness finds itself not in the size of our buildings, or of our bank balance, but in the size of the soul, in the quality and furniture of it. Who sat in that chair? [illegible] What company found welcome? Was it lofty thoughts, and pure emotions, and motives with nerves in touch with the highest sources of life. How can we face our foes and receive their darts on our breastplates if there beat not beneath our armor a heart that is pure and in touch with the infinite and heavenly? It was said of the old worthies, "They die well." Listen to old David Cargill, the Covenanter, when executed for his faith in Edinburgh: "The Lord knows I go up this ladder with less fear, confusion or perturbation of mind, than I enter the pulpit to preach."

All creatures look out and look down, but man looks up, he is the only creature that stands erect, the only being with a forehead, on which you can write a name; birds build their nests and man builds his home.

"Too low he builds who builds beneath the stars." God dwelleth in the congregation of God. Deep calleth unto deep. Man is the only being who can say with Samuel, "Surely, Thou didst call me." The only one who can say, "I saw the Lord, high and lifted up." Man is the only being who can inquire like Saul, "What wouldst Thou have me to do?"

The bigness of man is the bigness of soul. He is ever chasing the horizon. He is not made to fall, but to stand to say with the angel, "I stand in the Presence of God."

H. T. Miller.

MASEFIELD AT GALLIPOLI

(St. John, N. B., Telegraph.)

John Masefield, the English poet, has written a book, "Gallipoli," in justification of the Allied attempt to pierce the Dardanelles, and in answer to those critics who characterized that expedition as one of the great failures of the Allies. In this book there is no note of apology, for Masefield believes the campaign was not a mistake or a tragedy, but "a great human effort which came more than once very near to triumph, achieved the impossible many times, and failed in the end ... from something which had nothing to do with arms nor with the men who bore them."

During the first and second weeks of August, Masefield says the English, [illegible] Indian, New Zealand and Australian troops "came for breathless hours within sight of victory and the end of the war." Then they were pushed back. On August 8th, when the attacking forces almost carried the crest above Suvla, "the knife-point was touching the Turkish heart, and at Suvla was the strength to send it home, were the intervening road cleared. If, as men say, the souls of a race, all the company of a nation's dead, rally to the [illegible] sweat and blood and agony of our thousands, must have answered with a ghostly muster of English souls in the afternoon of that eighth of August. There was the storm, there was the crisis, the one picked hour, to which this death and dying misery and exultation had led."

The men at Suvla had been instructed—by some one not named—not to attack until the following day. Sir Ian Hamilton, when he learned it, hurried to Suvla and ordered them forward; but the Turkish reinforcements were in place before the fresh strength could be brought to bear, and the whole movement failed. Masefield quotes the Turks as saying of the British:

"Had they the reserves, they would have conquered, but by God's pity they had none. Then, after a lapse of time, when we were men again, they had reserves, and they hit us a staggering blow, which needed but a push to end us, but God again had pity. After that our God was indeed pitiful, for England made no further thrust, and they went away."

In one passage Masefield describes the incredible difficulties and miseries against which the British struggled. He asks the reader to imagine one charge, to think of himself as lying with others along a three mile line, about to storm a slope one thousand feet across:

Let him imagine himself to be more weary than he has ever been in his whole life before, and dirtier than he has ever believed it possible to be, and parched with thirst, nervous, wild-eyed, and rather lousy. Let him think that he has not slept for more than a few minutes together for eleven days and nights, and that in his waking hours he has been fighting for his life, often hand to hand in the dark with a fierce enemy, and that after each fight he has had to dig himself a hole in the ground, and then walk three or four roadless miles to bring up heavy boxes under fire. Let him think, too, that in all those eleven days he has never been for an instant out of the thunder of cannon, that waking or sleeping, their devastating crash has been blasting the air within a mile or two, and this from an artillery so terrible that each discharge beats the air within a mile or two, and this from an artillery so terrible that each discharge beats as it were a wedge of shock between the skull bone and the brain. Let him think, too that never for an instant in all that time has he been free from the peril of death in its most sudden and savage forms, and that hourly he has seen his friends blown to pieces at his side, or dismembered or drowned or driven mad or stabbed or sniped or bombed in the dark sap, with a handful of dynamite in a beef-tin, till their blood is caked upon his clothes and thick upon his face, and that he knows as he stares at that hill, that more of that band will be gone the same way and that he himself may reckon that he has done with life, tasted and spoken and loved his last, and that in a few minutes more he may be blasted dead, or lying bleeding in the scrub with perhaps his face gone and a leg or an arm broken, unable to move, but still alive, unable to drive away the flies or screen the ever-dropping rain.

After frightful heat, and thirst with little water to quench it and that water filled with flies, there came a cold rain storm that filled every gully with a flood so that many were actually drowned at their posts; and yet by the next morning the rain had turned to sleet and soon afterward many were frozen to death where but a little time before they had almost died of heat and thirst. "Masefield denies emphatically," as one reviewer says, "German reports that the Turks were once or twice on the point of retreat through shortage of men or munitions. They were always more numerous and better equipped than the British. He reckons the campaign as by no means a failure, for it hastened Italy's entry, delayed Bulgaria's, killed many more Turks than British, and was of direct assistance to Russia. He believes it also proved the British and Australians the first soldiers of the world. It may be noted that Masefield seldom speaks of himself, though in one or two fine descriptive passages he appears as spectator."

From Empire To Democracy

It would be a great change for Germany to cast aside imperialism, and with it the outworn doctrine of divine right, to make the "Government," that is, the Chancellor, responsible to the Reichstag, not to the Kaiser, to make the Kaiser himself the servant and executive of the people, not their master, to establish the veritable rule of the people as it exists in England, France and the United States to-day. That change is surely coming, it is inevitable, for divine right and imperial sway are grotesque anachronisms in a nation made up of intelligent people, but the transformation may be wrought much earlier than has been expected, indeed very soon. It is plainly foreshadowed by the interview given by Chief Permanent Under Secretary of State for Foreign Affairs Zimmermann to Mr. Swope, the correspondent of our neighbor, the World, who has recently returned from Germany. Mr. Zimmermann is a statesman of great ability and prominence in Germany. That he should have given such an interview and authorized its publication is in itself highly significant, but the import of his language is unmistakable.

"It would be useless and dangerous to deny," said Mr. Zimmermann, "that the trend of political thought in Germany is toward liberalization." There is antagonism; certainly the Prussian landed aristocracy, the conservative and military class, will not consent without a struggle to the overthrow of the imperial system which gives them influence and privilege. But the conclusion is irresistible, from what Mr. Zimmermann said, that the demand of the people is one not to be denied. "There is a subsurface movement of vast political portent," says Mr. Swope.

The immediate change, the change that may come before the conclusion of peace, is indicated with all frankness by Mr. Zimmerman.

The important feature of the change will be the erection of direct responsibility of Government to the people through their representatives in the Reichstag. Under the present system there is actually no such responsibility. The Chancellor is at the head of the political Government. He owes his responsibility to the Kaiser [illegible] tions they are responsible. It was during the discussion of the Zabern affair that the Chancellor pointed out that "the Government was not answerable to the Reichstag for [illegible] course it persisted, but was answerable alone to the Emperor." This change is all-important. It is the very essence of liberalization. When the Ministry is made answerable to the body of legislators elected by the people, then the Prime Minister, or Chancellor, becomes the head of the Government and the people become their own rulers. It matters not what the man who wears the crown may call himself, whether Emperor or King, though the Imperial title would be an absurdity, and though for custom's sake he may speak of "his" people and call them his subjects, they are not in truth his subjects at all, they are his masters and their own. England has a K[illegible] as a democracy, like the United Sta[illegible] It is governed through a responsible Ministry.

"A certain measure of reform will be accomplished before the war has reached an end, according to Mr. Zimmerman. "The real body of the reformation will be deferred until peace comes." That is not so certain. "Subsurface movements of vast political extent" do not shape themselves to anybody's prediction or anybody's convenience. The world has wondered why this change did not take place long ago in Prussia; it should have resulted from the revolution of 1848; it has wondered why the Germans have so long endured imperialism and militarism. They are united, wonderfully united for the prosecution of the war, but their endurance is sorely tried and liberalizing reform and the end of the war may have a relation one to the other not yet suspected in imperial circles.

It has been the belief of the Times, long ago expressed, that the German people would ultimately and by a common movement seek freedom and peace. We appealed to the men of German race in this country, who have had experience of freedom, to use their influence to that end among the Germans of the Fatherland. That counsel may have to some extent been heeded, but the organs of German-American opinion scornfully rejected it; they have been furiously, madly devoted to imperialism and the military ideal. The voting on Tuesday in centres where there is a large German-American population gives very solid reasons for doubting whether the readers of the German language newspapers have shared their opinions. It seems to us that the German-language papers could print no more important news that these letters of Mr. Swope published by the World. Surely they ought to give space in their columns to news from the Fatherland vastly more interesting to their readers than anything they are now printing.—New York Times.

CONSTIPATION
THE COMMONEST ILL.

Constipation is one of the commone ills of mankind and one too often al to go unlooked after until some s complication sets in.

If the bowels are properly lo there will be no constipation, sick or bilious headaches, coated tongue, sour stomach, specks before the eyes, etc.

Milburn's Laxa-Liver Pills w the bowels regular and cure all liv

Mr. Philip McLeod, Tarbot, writes: "I suffered from consti ever since I can remember, and for had pains in the left side of the If I walked across the kitchen would have to sit down and rest, I think was terrible for a man of 2 of age. The condition of my syste danger by pimples breaking out o face. I suffered so much pain and ness in my back I am sure my was full of poison. Milburn's Liver Pills have entirely cured me. I thoroughly recommend them to everybody."

Milburn's Laxa-Liver Pills are 25c. a vial, 5 vials $1.00, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Numbers of Metal Colors.

A method by which numerical values for the colors of metals has been obtained and described recently in a foreign contemporary. The metal sample is polished with emery, and is then photographed through a blue glass screen. The time of exposure, time of development of the plate, temperature of the developer, and all other conditions must be reproduced exactly in order to obtain comparable results. The density of the resulting negative is measured in a Sanger-Shepherd densometer, and the result calculated to a scale in which the color value for silver is 0 and that of copper is 50. The results obtained show that an increase of coloration in the metal does give a higher "color figure" but the method can detect no difference between pure and "standard" silver—silver 92.5 per cent., copper 7.5 per cent.—and is only just sufficiently sensitive to distinguish between German silvers having respectively 15 and 7 per cent. of nickel.

COULD NOT SWEEP
BACK WAS SO SORE.

Women are coming to understand that weak, lame and aching backs from which they suffer so much excruciating pain and agony are due to wrong action of the kidneys.

On the first sign of any weakness in the back Doan's Kidney Pills should be taken.

Mrs. L. Goshaw, 692 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, telling the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to use Doan's Kidney Pills, and before I had used one box there was a great improvement, and my back was completely cured. I highly recommend 'Doan's' for lame back."

Doan's Kidney Pills are put up in an oblong grey box, the trade-mark is a Maple Leaf, so accept no other.

Price 50c. per box, 3 boxes for $1.25

FARM AND GARDEN

MACHINE INCREASES WHEAT YIELD.

The news comes from England that a clergyman has invented an agricultural machine which is expected to increase the wheat yield many times. The machine is intended to assist nature to tiller or produce additional stems by stimulating the wheat plants and ears above ground and surface roots below.

The system has been tested by sowing a patch of ground with wheat and cultivating it in the usual fashion and comparing its yield with that of another patch of wheat sown and cultivated by the Rev. Edward Seeley's tillerer. Mr. Sealey explains the operation of the machine as being simply an aid to nature, as follows:

"The wheat plant has a natural faculty that enables it to tiller; that is, to produce additional stems and ears above ground and also of surface roots below which grow from the joints of the stems at or very near the surface of the ground. During the early growth of the plant if the surface of the soil be forced in contact with the plant by design or otherwise an additional growth usually takes place.

"This may be done repeatedly at intervals, and so a large structure of roots, stems may be constructed with a large quantity of what grew at first as surface roots, but were more and more buried as the tillering process continued. This gives man his opportunity of assisting nature and of simultaneously accepting nature's assistance in producing a larger crop. For by hand cultivation with a good deal of attention thirty or more stems and ears may be obtained as a rule from each grain sown separately at a distance of eight inches or more from each other, especially if sown in September.

"In England perhaps it cannot pay if done by man power only. It must be carried out more quickly on a larger scale, that is, by machinery and horse power or steam or oil. But these [illegible] do not effect tillering directly.

"The new machine, the tillerer, consists of a well known drill slightly altered, with the addition of the tillerer implements, which consist of a set of moulders (small ploughshares) placed in front of the seeding coulters to make furrows about four inches deep, which the coulters sow the seeds. When the seedlings have three small blades the coulters and moulders are removed and the first set of forks is put into position and the tillerer is drawn along the lines with the forks pressing sufficiently on the ridges to restore about half the soil in them to the furrows, nearly burying the little plants. When those plants have again grown three or four blades the second set of forks is put in and is used to restore the rest of the soil, thus filling up the furrows.

"In early spring the moulders, without the coulters, can be used to make slight furrows, about two inches deep, where the ridges were, throwing the raised soil over the roots of the plants on each side, and so earthing them up and making slight ridges where the furrows were at first. This refreshes the soil, and may destroy many weeds just beginning their growth.

"These operations, by raising the level of the soil, assist the natural faculty by inducing fresh rooting and fresh stems.

"The manifestation this year at Ashurst of the natural power inherent in wheat that is usable by man is more encouraging than startling, because the past winter was unfavorable for experiment. War conditions delayed the sowing; and not long after the sowing winter wet set in, and damp soil for five months kept horses off the ground in the judgment of the farmer. Therefore, the normal tillering process was not used as intended, but only the very simplest method of it.

"The increase of produce by tillerer sown wheat is generally in three classes, and in each class according to the method used: 1—Increase in number of ears. 2—Increase in average length of ears, among ears of all sizes, in the plot compared with those in the control plot; (a) spring sown wheat and incomplete treatment—about half an inch; (b) the autumn sown and the simplest method—about three-eighths of an inch. 3—Stronger rooting, preventing the plants lying down in bad weather."

For wintering the cattle breeding herd there is no roughage that is better than silage. All the animals will relish a ration containing it, and it will create an appetite for other feeds. Cows that are fed on all the silage they will consume, along with good hay, will go through the winter in fine shape and make gains. Some dry coarse fodder or straw should always be kept before animals getting silage as it reduces the amount of silage to be consumed and [illegible] from getting too loose. The succulent feed will cause the cows to give a good flow of milk, even though the calf be born in mid-winter, and a thrifty calf will result. If the silage is free from mold or rotten places, there is no danger [illegible] to breeding cows.

If the weeds have flourished in your garden, or in parts of it, mow them down now. If they have not gone to seed, they can be plowed under later [illegible] removed from the garden and thrown on the compost heap; composting kills weed seed.

The manure from sheep has a higher fertilizing value than that derived from any other animal. Next in strength comes that from pigs and horses. Cattle manure is less concentrated, but as regards quantity produced cattle come first then horses, while sheep and pigs naturally produce less per animal. The fertilizing value of a manure, however, does not altogether depend on the animal producing it, as the character of the food consumed influences in a great measure the quality of the manure, and the manure from the same animal may vary daily in quantity and quality.

Pails of cold water should be placed in rooms which are being treated to fresh paint. Change the water night and morning, and, where possible, add a handful of hay to the water in each pail. This will almost entirely destroy the paint odor.

Have you tested your soil for acidity? Just a few cents' worth of blue litmus paper will enable each farmer to determine whether his soil needs lime or not. One of the easiest methods of testing is pointed out by M. S. [illegible], of the Agricultural College Extension Service, Ohio State University. It is to go into a field when the soil is moist, insert a knife blade into the under layer of soil, and place a strip of the litmus paper in the opening made by the blade. Then press the soil firmly together on the paper and let stand for twenty minutes. Then remove the paper and notice its appearance. If delicate streaks of red are found on the paper, lime should be applied to correct the acidity. Ordinarily, from two to four tons of ground limestone will neutralize the acids in soil.

The editor of the Rural New Yorker said that when he was a boy a circus came to town. He asked his father to let him go and see it. "No," he said, "but if you work real hard I will take you to the cemetery next week to view the family plot." No wonder boys grow tired of the farm. The father who is too mean to allow his children any pleasure, who keeps them hard at work without any recreation and enjoyment, is sure to create dissatisfaction, and when that boy or that girl grows up to maturity, he or she will be very apt to leave the country and participate in more serious pleasures than a circus.

Cement floors and mangers are best from a sanitary and economic standpoint. The stables should be whitewashed every fall, which will add much to their light and sanitary condition. The manure is removed from gutters twice daily and the cows curried and brushed every day.

City Knights Rescue Girls

(Chicago Tribune.)

THE PHILOSOPHICAL CABMAN.

She was sixteen, and her two bulging suitcases seemed discouragingly heavy as she swung them across the platform of the union station. A cabman, leaning on his sleepy horse, straightened up as she approached.

"Drive me to the B—— Hotel," she ordered.

This particular cabman had seen a bit of the world. He knew "cabbies" were made to see nothing and obey orders. It wasn't at all the usual thing, but——

"Your number is goin' to be th' Y. W. C. A.," he retorted. "You wouldn't fit at the B——."

"I want to go to the Y. W. C. A.," retorted his fare. "I don't want to, and I've got $20 and I'm going to the B——."

"Get in, then," said the cabman, with mock resignation.

Straight to the Young Women's Christian Association he drove. Up the steps he tugged the two suitcases. The girl, perforce, followed.

"Sit here," directed the autocrat, "while I speak to th' lady a minute."

There was a moment's conference with the superintendent. "Now," he said, "you can do what y' like with her." And he departed, minus his fare.

The girl explained. She was, she said, Desira La Rose, from Green Bay, Wis., travelling abroad as a dancer in vaudeville, parents and all other relatives dead. She wanted to go to the B—— Hotel, and there she stepped to go, if she could find a cabman that wasn't too fresh.

She did, however, accept the invitation to dinner. The superintendent was pondering her next step when a policeman called with perfunctory inquiries concerning one Mary Brown, of Clifton, Wis. She had run away, according to a telegram from her parents, and was to be sent back instanter.

The superintendent, incredulous, kept her charge from being arrested, but they convinced her the next morning. Mary Brown's parents came with letters addressed to Mary by a man at the B—— Hotel. They told of a glowing future in Jacksonville, Miss. Mary had run away in the night to join the writer.

Mary, contrite now, went back home. But first she led her father to a cab stand at the union station, and a cabman, leaning on a sleepy horse, was paid a fare that violated all the city ordinances.

THE CHIVALROUS TELEGRAPHER.

A week ago yesterday a young woman came from Minneapolis. She waited all day at the station for a friend who didn't come. Tired out, she fell asleep. When she awoke her purse was empty.

Someone suggested she telegraph her parents for money to go back home. The telegrapher read her message, recalled the rule that customers' affairs are none of his business and violated it.

"They'll give you something to eat at the Y. W. C. A.," he ventured. "And, say—I'll be off duty in a minute. I'll take you over there."

While she was breaking her long fast in the dining room a dapper young man called to ask for "the girl who was robbed."

"I know her brother," he said. "I want to take her to him."

The girl said she had no brother, and the young man was sent about his business. Undismayed, he returned the next day with insistent proffers of assistance.

"That was the man who robbed her," said the superintendent. "When I asked about it he fled a second time and that was the last of him. The girl—I won't tell you her name—is safe home now in Minneapolis."

THE SKEPTICAL POLICEMAN.

"Please, mister," chorused two girls, 7 and 9 respectively, "where is a nice cheap hotel?"

"Huh?" returned the guardian of the law.

"A hotel," explained the older ponderously. "Yessir. Our stepmother doesn't like us, and our own mother, you know, is in California, an' we're going to her."

The policeman suggested the Y. W. C. A. and told the wanderers how to get there. The girls were the daughters of a south side physician.

"Do what you like with them," was his amazing answer when the superintendent telephoned. But after a bit of argument he changed his mind. And the girls weren't even punished.

AN INTERESTING BOOK

No publication issued by the Canadian Pacific Railway is better known all over the world than the "Annotated Guide," describing every station along the line. Issued originally at the suggestion of Sir William Van Horne, it has passed through many editions and is now a fair-sized book owing to the great increase in the extent of the railway system. It is interesting to look over the early issues to see how Canada has progressed. In 1886, for instance, Winnipeg had a population of only 25,000, Fort William 1,000, Regina 800, Calgary 2,400, Lake Louise had not been discovered, and Vancouver was proud of its 5,200. Indian Head was famous for the Bell Farm, of which the "Annotated Guide" remarks: "The furrows on this farm are usually ploughed four miles long, and to plow one furrow outward and another returning is a half day's work for a man and team. The work is done with an almost military organization, ploughing by brigades and reaping by divisions." Toronto is described as "distinctly Western in its activity and energy."

THE FALKLANDS

Shackleton's Haven On the Edge of Civilization.

The Falkland Islands, where Sir Ernest Shackleton recently found a haven after the hardships of a perilous antarctic expedition, have figured seldom in world news since 1833, when the British flag was firmly planted over the land which, together with South Georgia, constitutes the Empire's "farthest south" insular possessions. The Falkland group is described in a bulletin issued from the Washington headquarters of the National Geographic Society, which says:

"Except when some unfortunate skipper is compelled to cast anchor in the harbor of Port Stanley, where the damage wrought by the fierce storms off Cape Horn can be expensively repaired, the Falkland Islands are seldom visited, save by the monthly mailboats from England. It must have been a sensational news event, therefore, when the [illegible] Port Stanley inhabitants and the 1,100 other people distributed over the more than 100 islands of the Falkland group learned that on the last day of May the intrepid explorer, Sir Ernest Shackleton had arrived at this town with five companions, after having lost his ship, the Endurance, in the antarctic the last October.

"Not since the thrilling naval engagement off the Falklands in December, 1914, when a British squadron, under Vice-Admiral Sturdee, sank the German cruisers Scharnhorst, Gneisenau and Leipzig, and captured two colliers, have these islands figured so prominently in the news of the day as now.

"The Falklands are among Great Britain's colonial possessions which cling to the very fringe of civilization. They comprise an area somewhat larger than the Bahama group and lie [illegible] miles east of the mainland of South America and more than 1,200 miles south of Buenos Ayres. Only two of the islands are of considerable size—East Falkland, which is about five-sixths as large as Porto Rico, and West Falkland, with an area somewhat less than that of the State of Delaware.

"While the climate of the Falkland group is comparatively mild, the rigors of its winters in no degree approaching the cold of the southeast coast of Labrador, which lies in the corresponding parallels of latitude in the northern hemisphere, yet the islands are not an agreeable place in which to live, as a penetrating drizzling rain is experienced here during 250 days of the year.

"Except for the palm-resembling tussock grass, which furnishes excellent fodder for the herds of cattle, flocks of sheep and droves of wild horses, on the islands there is little vegetation. The commerce, which does not reach a million dollars a year, consists chiefly of the exportation of wool, hides, tallow and frozen mutton. Extensive peat beds supply the islands with a satisfactory fuel.

"During the last quarter of the 18th century Spain laid claim to the islands and not a little threatened to go to war with England over their control. The territory belonged to the British Empire by right of discovery, [illegible]

"[illegible] Argentina [illegible] Buenos Ayres."

Great Statue Blaze of Light

The Statue of Liberty, in New York harbor, was 30 years old on Oct. 28. On that day subscriptions of the American people to flood light the statue were closed with what has been termed "Liberty Day" collections throughout the United States.

With this fund it has been arranged to permanently flood light [illegible] that great French gift to the people of America, so that at night it may be seen far out upon the Atlantic.

The night of Saturday, Dec. 2, was fixed for the inauguration of the statue as "Liberty Enlightening the World." These words were first used by Auguste Bartholdi, the illustrious French sculptor, when he placed the statue in 210 cases aboard the French warship Isere in April 1885.

Engineers from General Electric Company, working in conjunction with Government engineers, stretched a transmission cable from the New Jersey shore to Bedloe's Island, which carries current to light up the hundreds of great reflectors, installed to evenly illuminate all sides of the huge statue and its base, which covers nearly an acre of ground.

HISTORY OF STATUE.

1871—Franco-American union established in Paris to undertake construction of Statue "Liberty Enlightening the World."
1875—Auguste Bartholdi, illustrious French sculptor, made the first small model of the proposed statue.
1876—Hand of the statue, 16 feet long, completed and displayed at Centennial Exhibit in Philadelphia.
1877—[illegible] Bedloe's Island, leaving choice to be made by General W. T. Sherman, who confirmed Bartholdi's selection of Bedloe's.
1878—Head of the statue, measuring 17 feet from neck to cranium, finished and exhibited at the Paris Exposition.
1880—Entire statue completed.
1881—"Liberty Enlightening the World" mounted in Paris.
1884—Statue formally presented to the United States on July 4th, by M. de Lesseps and accepted by L. P. Morton, United States Minister.
1885—Statue taken apart and brought to the United States in 210 cases on board the French man-of-war [illegible]
1885—New York World in four months raised over $100,000 in contributions from 120,000 patriotic American citizens to provide pedestal for the statue.
1886—On October 28th President Grover Cleveland, members of the Cabinet, governors of many states and distinguished members of the diplomatic corps, besides a delegation from France, headed by M. Bartholdi, Count de Lesseps and Admiral Jaurès, dedicated the statue. These exercises were accompanied by a great procession through New York streets and a naval parade in the harbor.
1916—Congress authorizes flood lighting, provided $[illegible] be raised [illegible]
1916—October 28th, the 30th anniversary of the dedication of the statue, fixed as the final day upon which contributions will be received from American people to flood light the statue.
1916—December 2nd "Liberty Enlightening the World" permanently flood lighted for the first time, with President Wilson officiating at the notable ceremonies.

DIMENSIONS OF STATUE.

The statue weighs 450,000 pounds, or 225 tons. The bronze alone weighs 200,000 pounds. Forty persons can stand comfortably inside the head. The torch will hold twelve persons.

The immensity of the lighting problem may be appreciated only by close view of the statue, the dimensions of which are:

	Ft.	In.
Height from base to torch	151	1
Foundation form pedestal to torch	305	6
Heel to top of head	111	6
Length of hand	16	5
Index finger	8	0
Circumference at second joint	7	6
Size of finger nail	13x10 in.	
Head from chin to cranium	17	3
Head thickness from ear to ear	10	0
Distance across the eye	2	6
Length of nose	4	6
Right arm, length	42	0
Right arm, length	42	0
Do, greatest thickness	12	0
Thickness of waist	35	0
Width of mouth	3	0
Tablet, length	23	7
Tablet, width	13	7
Tablet, thickness	2	0

A Pimply Face or Poor Complexion Quickly Restored

Thousands of young men and women would be handsome and attractive were it not for unsightly pimples, blackheads and rough uneven skin. Custom seems to recommend lotions and salves, but unfortunately their effect is but temporary. These disfiguring blemishes do not originate in the skin—their birth in every case goes back to the blood, which [illegible] humors [illegible] for good.

A physician who has made a careful study of such cases says that the quickest cure comes from a blood-building medicine like Ferrozone. The minute Ferrozone strikes the blood its good work begins. Poisons and bad matter are expelled. Every [illegible] humor is driven out, and the whole blood current is supplied with nutriment and health-giving qualities. You can always tell a Ferrozone complexion when you see it—the cheeks are clear and rosy, no signs of sallowness—the eyes are bright, and expressive because rich, red blood is circulating through the whole system, carrying health, energy and vitality with it. Not only will all skin eruptions disappear, but an increase in vital strength, an all-round improvement will be apparent. No rebuilding tonic could be more efficient. Get Ferrozone today. Good for young and old, for well folks and sick ones, too. 50c per box, or six boxes for $2.50 at all dealers, or direct by mail from The Catarrhozone Co., Kingston, Ont.

Poultry World

CARE OF WINTER LAYERS.

With the price of feed high and no prospect of it becoming lower for a considerable period, and the steady advance of fresh eggs, [illegible] is highly important if a balance is to be kept on the proper side of the ledger.

Although the weather conditions have been ideal for the development of the late-hatched chicks, yet they cannot, unless grown with expert care and good conditions, be made to lay before they reach full maturity. Few of the fresh eggs that go in the market now can come from the chicks hatched in June or July. The bulk of [illegible] hen fruit is obtained from chicks hatched in March and April, especially from the heavy breeds and Leghorns or the lighter varieties in May. Even then on the care of these fowls depends how soon a steady egg yield can be obtained. Many poultry keepers, especially those who have had but a limited experience, do not give the attention and care to growing stock that is required to obtain the best results. To properly raise the poultry, good feeding is essential. With the high price of all poultry feeds many have looked to the cheap grades or substitutes for the A 1 goods, with the result of slower development, and which fully matured do not fully realize the large egg yield that should be returned. It is false economy to cut down the regular quantity of feed and to substitute grains of poor quality. To make body and eggs means the feeding of grains, and the mash mixtures that contain egg making and body-building feed. To cut this out from any ration is to retard both the building up of the body and afterward the egg making. This food question is one that the beginner often overlooks, with the result that the fowls do not lay, or if they do, in quantities that do not reach the profit mark.

It is better to keep no poultry than to neglect the essential of good feeding. Cheap feeds cannot give the same results as returned by good, clean feed of high quality. The few dollars saved on the hundred pounds or the ton is false economy. With [illegible] corn at wheat prices it can be dispensed with. Any flock will give results with equal parts of corn, wheat and oats, and a good dry mash that contains bran, middlings, ground oats, gluten and from 10 to 15 per cent. of good beef scraps. Clean quarters, with four square feet of floor space for each fowl in the heavy breeds, such as [illegible] Rocks, Wyandottes, Rhode Island Reds, Orpingtons, and three square feet for the lighter breeds, as the Leghorns, Anconas, etc., will give good results.

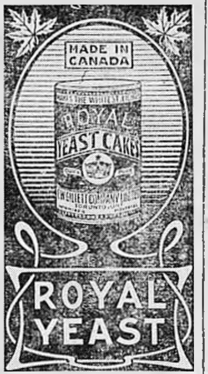
Overcrowding is an evil that is as bad as poor feeding, and many poultry keepers try to quarter more fowls than should be housed in the given space. Well ventilated poultry quarters are essential to good development and egg production in the flock, and [illegible] the best. In the heavy breeds the best results can be obtained in flocks of 100 or smaller, and with the Leghorns 200 to 300 is the limit for good egg production. The fair egg production has been obtained in larger units, and the safer plan is for smaller flocks. Water [illegible] clean [illegible] grit and [illegible] especially when they are taken from the growing quarters and placed in their permanent winter quarters. There is no secret in getting winter eggs, but the essentials that bring this about must be followed. Chicks must come from good parent stock, properly hatched and reared, and then fed in the proper manner; the poultry quarters must have light and good ventilation, for this means good health and no fowl that is not in perfect health can be expected to produce eggs. Much has been written regarding the time to hatch. April and the first week in May are good dates to pin one's faith. In February and March chicks do well and grow fast and will make good layers, especially the heavy breeds. But when one hatches later than May they always take a chance as far as a good flock average of hen fruit is concerned, and especially does the beginner do wrong in selecting a late date, as without careful handling and good growing conditions they do not mature in time to be winter layers. Avoid the changing of feeding systems. Once started on a known egg ration that has made good for the leading poultry breeders stick to it. Changing from one ration to another has put more flocks off of their balance and retarded laying than is generally supposed.

Do not become over eager to have the pullets lay. At the proper time they will start and increase each week. Forcing the pullets unduly is poor policy in the long run, a steady egg yield during almost the whole year is the policy that should be aimed for.

Judging from the unprecedented heavy deliveries of poultry on the central eastern markets so early in the season, it would appear that farmers and producers generally are not only depleting their flocks unwarrantably, but also rushing them to the market in an unfinished condition. As a result, the current price of chickens is much below normal value at the present time, in comparison with the prices of other meats. This is directly due to the overloading of the market.

With the brisk inquiry for Canadian poultry from Great Britain, it is expected by exporters that the demand for well finished, good quality stock will be very keen during the coming winter. Besides, there will be a good demand for home consumption. The price for well finished birds continues firm, but with so poor stock arriving wholly unsuited their storage or export, many buyers have recently reduced their quotations for all low grades.

Remember, also, that because you can give little is no reason why you should not share in the joy of Christmas giving. If you have nothing else to give, write a cheery Christmas letter, telling your friend the old old story, that you think of her, and care for her, and wish her well at Christmas time.



There are so many uses for Old Dutch that it's a household necessity.

THE FIRST GUNS

Auspicious Opening of the Great Campaign to Raise Six Million Dollars for the Canadian Patriotic Fund.

Ottawa, Dec.—The officers of the Canadian Patriotic Fund are greatly elated over the encouraging outlook for the fund in Ontario in 1917 owing to the generous action of the County Councils of Simcoe, Victoria and Dufferin at the fall session recently held. The decision of these Councils marks the real beginning of the campaign, which will reach its climax in January and February to raise at least six millions in this province in 1917. As this is a million dollars more than was subscribed for 1916, it has been felt by the fund authorities that much of the success of the campaign would depend on the increase of the grants made by the County Councils.

The three counties which have already acted have done so well and given so generous an example that the chances of attaining the desired sum are now considered greatly improved.

Simcoe, which in the past has left the support of the fund largely to the townships and town councils, has decided to make a general levy on the whole county for the purposes of the fund. This implies taxing not only the rural districts, but such important centres as Orillia, Collingwood, Barrie and Midland. The sum to be given is $10,000 a month, making the fine aggregate of $120,000 to the year. This is a large increase over 1916, and the county councillors by unanimously supporting the grant, have shown not only their appreciation of the fund, but their political courage, for naturally the majority of them will be offering for re-election in January and will have to justify their action before their constituents. But more than this, the Simcoe councillors expressed the hope that the voluntary grants by individuals and organizations would be continued. The county grant represents two and one half mills on the dollar.

Victoria, a county much smaller in wealth and population, has also excelled itself, and has raised its contribution from $2,500 a month to $5,000, or a total of $60,000 in the year. This means a tax of three mills on the dollar. It is a noble grant, and places Victoria well up in the front rank of Ontario counties for generous giving, as it is for recruiting.

Dufferin, in 1916, gave $500 a month. It has decided to quadruple this for 1917, and will give $2,000 a month—a splendid increase.

The fund's campaign has certainly started with a bang!

ST. VITUS DANCE CAN BE EASILY CURED

A Tonic for the Blood and Nerves With Rest, All That is Needed.

Many a child has been called awkward, has been punished in school for not keeping still or for dropping things, when the trouble was really St. Vitus dance. This trouble may appear at any age but is most often met between the ages of [illegible] and fourteen. The most frequent cause of the disease is poor blood, aggravated by indoor confinement, or mental strain at school. Under these conditions the blood fails to carry nourishment to the nerves and the child begins to show listlessness and inattention. Then it becomes restless and twitching of the muscles and jerking of the limbs and body follow. A remedy that cures St. Vitus dance and cures it so thoroughly that no trace of the disease remains is Dr. Williams Pink Pills which renew the blood thus feeding and strengthening the starved nerves. This is the only way to cure the trouble, and parents should lose no time in giving this treatment if their child seems nervous or irritable. Mrs. William A. Spires, Cannington, Ont., says: "My only daughter, now fourteen years of age, was troubled for several years with St. Vitus dance. She was so bad that at times she would lose control of her limbs and her face and eyes would be contorted. We had medical advice and medicine, but it did not help her. In fact we thought the trouble growing worse, and finally we had to take her from school. About a year ago we began giving her Dr. Williams' Pink Pills and by the time she had taken five boxes she was completely cured, and is now a fine, healthy girl. I firmly believe we owe this to Dr. Williams' Pink Pills and are very grateful for her restoration to perfect health."

You can get these pills from any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Forest customer's bill amounting to $14.25. Figured at Walkerton rates, it would be $21.70.

He had in his hand a residence lighting bill of a Mr. Forest doctor $2.02. Figured at Walkerton rates it would be $1.80.

He had a Walkerton power bill totalling $10.76. Figured at Chesley rates it would be $11.00.

The experience of hydro towns is that the sale of power exceeds all expectations. Some towns have increased their power loads from 100 h. p. to 800 to 900 h. p. under hydro.

Hydro Lowers Taxes

Mr. James emphasized the fact that hydro does not raise taxes. The entire cost, principal and interest, comes out of revenue. Hydro lowers taxes as you get the street-lighting, Town Hall lighting etc. at actual cost

The municipality simply lends its credit. The debentures are charged to the hydro system.

The inside wiring has nothing to do with hydro. The wiring inspector has the same jurisdiction in hydro towns and non-hydro towns.

The Hydro Electric Power Commission wishes to give the Walkerton Electric Light and Power Co. a square deal. Mr. Robertson and Mr Rowland can rest assured, said engineer James, and the people can rest assured that they will get that.

Mr. John Rowland

Mr. John Rowland was glad to be present even if they had the hangman here. He had met Mr. James once or twice and found him a gentleman. He (Rowland) was not here to knock Hydro. Hydro was a great thing. Sir Adam Beck was a great man. If Walkerton were in the same position as other towns, I would be the greatest hydro booster in Walkerton said Mr. Rowland. But we are in a class ahead of hydro. Hydro can't produce the juice at the same price. This gets the boosters up from Toronto to make you all millionaires in 30 years. 30 years is a long way off. I have an A. O. U. W. life insurance policy in my pocket which was to be worth $2,000 in thirty years but it isn't. I like talking about the present said Mr. Rowland. The speaker registered a violent kick against holding the hydro meeting on nomination night and not giving the municipal candidates a proper chance, incidentally taking a slam at the delegation which went to Toronto to arrange the meeting.

Mr. Rowland said he did not need to go any farther than Harriston to discover some things about Hydro. He happened to be in Harriston himself the night Hydro power went off and allowed the Davies Packing establishment to burn down. He also had evidence to show that the Davies Co would not rebuild at Harriston because they considered the hydro power rates too high. And what about Fergus? Didn't hydro show a sell at there? He read a letter from Mr. W. J. Mickle K. C. of Chesley, in reply to a letter from Mr. Rowland, stating that he believed Walkerton would do well to hang on to the local power company. Mr. James here interposed from where he was sitting that the writer of that letter did

(Additional Correspondence On Page 5.)

understand the case.

Mr. Rowland said he had stated from this platform last year that he would give the town hydro rates.

Mayor Lippert said in reply that the only communication the Council had received from the Walkerton Co. had come a few days after the Council had asked the Hydro Electric Power Commission for estimates. After paying his compliments to the local newspapers by way of a few personalities, Mr. Rowland produced a letter which he wrote to S. A. Rife, then Mayor, which gave the impression that Mayor Rife was urging him to go ahead and invest a lot of money. Is it right, is it fair, is it square, to cut our heads off in view of all that. Is it possible, asked Mr. Rowland dramatically, that you men will go to the polls and vote to take away the boys' homes who are fighting in the trenches to protect your lives

Mr. Rowland produced figures for lighting Mr. G. Schwindt's house which he said would cost 61 cents more under Hydro, D. McKerracher's house 2 cents more, Mr. Harry Stephan's four cents more than under hydro.

Under pressure of space we have had to hold over the speeches of the various municipal nominees.

CHEPSTOW

Mr. and Mrs. Oliver Coumans and children, and Pte. W. Coumans of the 167th Battalion, Winnipeg, are on a few week's visit to Mr. and Mrs. John Coumans.

Among those who spent the holiday with friends here were: Geo O'Neill Guelph, Pte. J. Murray London, L. Wagner Chesley, Frank Spitzig, L. Hunziger, and Emma Lippert, Toronto, Misses Clara, Mary and Johanna Spitzig, Kitchener, Pte. Jas. Goblen, Hamilton.

Those who spent the day abroad were: Alex and L. McNab to Buffalo, N. Y. and Miss V. Wimmer to Hespeler.

The Xmas Entertainment conducted in McNab's Hall on Friday evening was a splendid success. The programme which was a choice one, consisted of a variety of drills, recitations, and short sketches as well as a number of short acts by local adult talent and was thoroughly appreciated by a large audience.

Mr. John Schaubach who during the past four years has been homesteading in the vicinity of Jamestown, Alberta, arrived on Xmas Day to spend the winter with friends.

The death occurred early last Sunday morning of an old and highly respected resident of the vicinity, in the person of Anthony Keltz. Deceased who met with painful injuries in a runaway accident a few months ago, had been ailing since and his health may be attributed directly to the unfortunate accident. Although in his 74th year, the patient rallied from his injuries and made satisfactory prospects to recovery, with the result that his condition gradually weakened until the end came. The remains were followed by a large concourse of friends and admirers to the R. C. Cemetery on Monday. Deceased is mourned by three sons and three daughters, who have the sympathy of the community at large.

The aspirants for seats at the coming Greenock Council are out handshaking these days. Intense interest is centred in the struggle for the seat at the head of the table.

PINKERTON

Rev. and Mrs. R. M. Gale and Misses Hattie and Gladys spent Xmas at their former home in Alma. They were accompanied home by Mr. Jas. Gale of Toronto.

Merti's Donnelly and her two brothers, Frank and Clare of Toronto, are spending their holidays at their home here.

Miss Mary McKee of Stratford spent Xmas at her home here.

Messrs Russel and Walter Birrell accompanied by two friends of Toronto, spent Xmas at Mr. T. Birrel's.

Corp. Harold Pinkerton returned home on Monday after visiting in Toronto.

Mr. and Mrs. N. Nelson and Miss Clara Clark of Toronto are visiting at the home of Mr. Jas. Clark.

The Christmas Tree entertainment which was held on Friday evening was well attended. The programme given mostly by the Sunday School scholars was excellent and a nice sum was realized for the S. S. work.

Mrs. H. Elliot and daughter, Miss Grace and Mr. Neil Murray spent Xmas at Molesworth.

We wish to congratulate "The Telescope" for the splendid account of our pretty little village. It was certainly a masterpiece and in the opinion of many could not be improved upon.

MILDMAY

The Box Social and entertainment held in Lin's School on Friday evening was a huge success. The audience was packed like herrings in a barrel. The program was excellent in every way. Waechter's Orchestra furnished the music. Mr. Campbell acted as chairman for the evening. The boxes were auctioneered off by Mr. Darrock and sold at good prices. The net proceeds amounted to the handsome sum of $114.

Mr. E. R. Schwalm of Pinkham, Sask. is visiting friends in town this week.

We are pleased to record that Mr. Jacob Fink is showing considerable improvement this week.

The following were among the visitors in Mildmay during the holidays: Mr. William Miller of Waterloo, Messrs. Joe Lobsinger Jr. and Philip Lobsinger of Detroit, Miss Margaret Helling of Oshawa, Miss Zettie Liesemer of the Baden Public School Staff, Mr. Leo. Buhlman of Windsor, Mr. and Mrs. Peter Haustein of Wallaceburg, Miss Lillie Mauer of Clifford, Mr. Chas. Pletch of Detroit, Miss Clara Schwalm of Toronto. Miss Margaret Schwalm of Kitchener Mr. Harper of Toronto, Mr. William Diebel of Kincardine, Mr. Edward Diebel of Elora. Miss Rose Buhlman of Hospital Staff Hamilton, Mr. Robert MacNamara of Sarnia.

Mrs. Henry Schulteis left for Richdale, Alberta, on Monday afternoon last week with her three children and will make their home there in the future.

Miss Tena Schulteis is home from Chicago and intends to spend a month with her parents Mr. and Mrs. Joseph Schulteis.

Miss Stella Schefter, Mr. Frank Schmidt and Mr. Stuart Thompson who are attending Central Business College, Stratford, are home for the vacation.

It is our sad duty this week to record the death of Mr. John Coutts Sr. which took place on Xmas Eve. Mr. Coutts has been very ill for some time with kidney trouble and a complication of diseases and his condition grew gradually worse until death came and relieved his sufferings. Funeral will take place on Wednesday afternoon to McIntosh's cemetery.

Messrs Alfred Sauer and Sport Schefter have secured a very fair sheet of ice in the rink and the first skating was on Christmas night. In a few days the ice will be in very good shape.

Mr. J. A. Johnston and wife spent Christmas at the latter's home at Glencoe.

GLAMIS

To our many friends and readers, we wish you all a Happy and Prosperous New Year.

Mr. McCauley spent this week with his parents in Tara.

Misses Sadie and Ida Stanley spent Xmas with their sister, Mrs. Laura Pollock of Grand Bend.

Mr. Dave Robertson, Blacksmith, had a Bruce Telephone installed in his residence last week.

Miss Nettie Gunn of Norland is holidaying with her parents.

Mrs. Angus McLean left last week to spend some time with her daughter Mrs. Matheson of Southampton.

Miss Minnie McNally, Lapier, Mich. Pte. Wilbert McNally, London. Miss Nora McNally, Toronto, spent the holiday vacation at their home here.

The Baptist S. S. will hold their annual entertainment on Friday evening of this week. A good program is being prepared. Everybody welcome.

Mr. E. J. Pickard of Toronto is visiting his sister Mrs. S. K. McLennan, and other relatives.

Mr. and Mrs. Conrad, Mrs. and Misses Pearl and Mamie Francis of Toronto spent Xmas at Messrs. Angus Campbell's and M. McKay's.

Mr. and Mrs. Thos. McIntosh and child of Stratford spent Xmas with his parents here.

Mr. Albert Wood of Langham, Sask.

day visitor at Mr. Kirktown's.

Mrs. Agnes McDermid spent Xmas with her daughters the Misses McDermid in London.

Misses Mary and Annie McLeod left on Friday to visit their sister Mrs. D. H. Gilchrist of Detroit, Michigan.

Mr. and Mrs. George Clark of Millarton were visitors at J. Cunningham's on Wednesday.

Mr. Arthur Groves bought the house lately occupied by Mr. John Wright 11th con. Greenock, and is having it moved to his farm on Boundary West.

Mr. Will Bradley and Miss Flossie McLennan spent Xmas with Detroit friends.

Mr. Joseph Purdy has returned from an extended visit with Ft. William friends.

Pte. Clyde McKeeman, Motor Cycle Corps, Toronto, is home for the holiday.

Mr. Will Green of Toronto spent Xmas under the parental roof.

Mr. Duncan Guest of Bervie is a visitor here this week.

Mr. and Mrs. David Colwell and family arrived here on Friday and their household effects on Saturday. In March they will take possession of their farm, on Boundary West. All welcome this family back again.

Miss Mary Webb, teacher at Vesta is home for the holidays.

Miss Mabel Kirktown, Hanover, and Alberta Kirktown, Paisley are spending this week at their home.

Miss Minnie Howson is visiting Mrs. Jack Fisher of Paisley.

Mr. Green is on the sick list, all hope to see him around soon.

NOTICE

Notice is hereby given that a By-law was passed by the municipal council of the Township of Brant, on the 6th day of November, 1916, providing for the issue of Debentures, to the amount of $2,000, for the purpose of Hydro Electric Power and Light for the village of Elmwood, in the Township of Brant, that such By-law was registered in the Registry Office for the registered division of the County of Bruce, on the 22nd day of December, 1916. Any motion to quash or set aside the same or any part thereof, must be must be made within three months after the first publication of this notice, and cannot be made thereafter.

Dated this 20th day of Dec. 1916.

M. A. McCallum.
Clerk of Brant Township.

Election Cards

To the Electors of Walkerton:—

I am a candidate for the position of Reeve for 1917 and take this means of soliciting your vote and influence. I trust that on my record of four years at the Council, you will, in your good judgment, see fit to give me a step up.

Wishing you all the Compliments of the Season.

Respectfully yours,
Geo. S. Lettner.

To the Ratepayers of Walkerton:—

I am a candidate for the Reeveship for 1917 and solicit your votes because I believe I can apply reasonable business ability and good judgment to the problems now confronting our town and county.

Robert Russell.

To the Electors of Brant:—

Ladies and Gentlemen;

I am a candidate for the position of deputy-reeve and take this means of soliciting your vote and influence. Having had several years' experience at the Council, I believe I am in a position to merit your confidence.

Wishing you all Compliments of the Season.

Frank W. Fisher.

To the Electors of Brant:

I am in the field for Deputy Reeve. If elected I shall continue to use my best efforts to advance your interests, and take this means of respectfully soliciting your support.

Yours Sincerely,
W. A. Rowand.

To the Electors of Brant:

I am in the field for Reeve, and solicit your vote and influence to elect me. If elected, I shall continue to do my best to advance the interests of the Township. Wishing you all the Compliments of the Season.
